AGENDA ADOPTION

DISCUSSION OF AMERICAN RESCUE PLAN ACT

1. American Rescue Plan Act Basics

REVIEW OF CURRENT GUIDANCE

2. ARPA Webinar 09/14/2021
3. ARPA Webinar Q & A
4. Interim Final Rule NEU's
5. NEU Letter 06/09/2021
6. NEU Guidance
7. SLFRPFAQ
8. Projects Under Fiscal Recovery Funds

REVIEW OF PROPOSED PROJECTS

9. ARPA Public Hearing Comments
10. ARPA Project Request

COMMITTEE MEMBERS COMMENTS

ADJOURN

Agenda Item 4

TO: Mayor Leonard and ARPA Projects Committee
FROM: Michael Tolbert, Town Manager
DATE: October 6, 2021
SUBJECT: Project Selection

Thank you for lending your time and talents to the work of this committee. The Mayor has tasked this committee with reviewing and selecting suitable projects for funding under the American Rescue Plan Act (ARPA) and recommending those projects to Council for approval.

Town staff has compiled a list of projects that we believe will qualify for funding based on the current guidance provided by the US Treasury Department. For clarity, each project along with its justification and scope is presented on an individual form for consideration by the Committee.

This first meeting will be used to review the ARPA basics including public hearing comments and project requirements as well as the individual projects from the list. Committee members may also want to include projects not on the staff's list. Subsequent meetings will address detailed questions by committee members concerning project scope, costs, qualification and justification.

American Rescue Plan Basics

Background

As most of you are aware, Congress passed and the President signed the American Rescue Plan Act of 2021. This Act provides funding for a number of different programs to address the adverse effects of the COVID-19 pandemic. A primary component of the ARPA is \$350 billion in assistance for eligible state, local, territorial and Tribal governments for the direct impact of the COVID-19 pandemic through the establishment of the Coronavirus State and Local Fiscal Recovery Fund (CSLFRF). The CSLFRF provides for \$19.53 billion to support tens of thousands of non-entitlement units of government (NEUs), which are local governments typically serving a population of under 50,000. Allocations for NEUs were sent to states based on population. Localities with populations greater than 50,000 could apply to receive funds directly from Treasury. All other CSLFRF funds were distributed to the states to disburse to the NEUs. Virginia received approximately \$316.9 million on May 28, 2021, which is half of the Commonwealth's allocated \$633.8 million of NEU CSLFRF. Virginia was required to distribute these funds to its NEUs within 30 days or seek a waiver from Treasury. The

remaining fifty percent of the NEU allocation will not be sent to Virginia until approximately June 2022. NEU CSLFRF provides eligible governments with a substantial infusion of resources to meet pandemic response needs and rebuild a stronger, and more equitable, economy as the country recovers.

Allocation:

Funds are allocated to each NEU in proportion of its population as compared to the overall qualifying population of NEU's. For the Town of Chincoteague with a 2010 census population of 2,875 the allocation is \$2,982,860. These funds will be transferred to the Town in 2 draws. The first half, \$1,491,430, was transferred on June 30 of this year and the second should be received in about 12 months.

Permissible Uses of Funds

Descriptions of the basic categories of expenditures for which recipients may use these funds are listed below. Within these overall categories, recipients have broad flexibility to decide how best to use this funding to meet the needs of their communities.

The locality's proposed uses of the funds received as direct payment from the Commonwealth of Virginia under section 601(b) of the Social Security Act will be used only to cover those costs that:

- **Support public health expenditures**, by, for example, funding COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff.
- **Address negative economic impacts caused by the public health emergency**, including economic harms to workers, households, small businesses, impacted industries, and the public sector.
- **Replace lost public sector revenue**, using this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic.
- **Provide premium pay for essential workers**, offering additional support to those who have and will bear the greatest health risks because of their service in critical infrastructure sectors.
- **Invest in water, sewer, and broadband infrastructure**, making necessary investments to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet.

Guidance

The overall controlling document for the legal use of ARPA funds is the Interim Final Rule (IFR) published by the Treasury Department on May 17 2021 which is included in this packet for your review. In addition to the IFR, Treasury provides guidance by publishing answers to frequently asked questions (FAQ's) and periodically updating the list. The latest FAQ list is included here as well as a few presentations by VML and NCL on qualifying uses.

There is no process to submit a project for approval to the State or Treasury Dept. and therefore each NEU must determine on its own through use of available guidance if a project qualifies for funding.

There is of course a process for reporting the use of ARPA funds to the Treasury Department and an accompanying audit once expenditures are complete. I am sure there will also be a process for the repayment of funds for projects that any audit determines were unqualified for funding.

Revenue Loss

Unlike the C.A.R.E.S. act, ARPA allows local governments to replace revenue lost as a result of decreased economic activity resulting from COVID -19. In this case, the actual amount of revenue loss is very important since these funds can be used for a wider variety of projects and do not have the same limitations as other ARPA funds.

Treasury devised the below standard “formula” for NEU’s to calculate the loss.

A reduction in a recipient’s General Revenue equals:

$$\text{Max } \{[\text{Base Year Revenue} * (1 + \text{Growth Adjustment}) \text{Exp}(nt/12)] - \text{Actual General Revenue } t; 0\}$$

Where:

Base Year Revenue is General Revenue collected in the most recent full fiscal year prior to the COVID-19 public health emergency.

Growth Adjustment is equal to the greater of 4.1 percent (or 0.041) and the recipient’s average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency.

n equals the number of months elapsed from the end of the base year to the calculation date.

Actual General Revenue is a recipient’s actual general revenue collected during 12-month period ending on each calculation date.

Subscript **t** denotes the calculation date.

The Government Finance Officers Association developed an Excell calculator to assist local governments in making the calculation. Calculation of base revenue cannot include any revenues resulting from utilities or transportation and also disallows all federal funds even if they flow through the State. For this reason, trolley and water revenues were removed as well as federal grants such as Sarbanes.

Background Information		Notes:
1) Fiscal Year End	June	
Base Year Revenue Period	6/30/2019	FY used for base year calculation
2) Calculation Date	12/31/2020	
Number of Months	18	Months between Base Year and Calculation Date

Estimate Revenue		
3) Base Year Revenue	\$ 6,169,708	Use Worksheet to Calculate
4) Growth Rate	5.2%	Use Worksheet to Calculate
Counterfactual Revenue	\$ 6,653,350	Estimated Revenue Without Pandemic
5) Actual Revenue	\$ 6,165,660	Use Worksheet to Calculate

Reduction in Revenue		Fiscal Year Ended	12/31/2020
Revenue Reduction	\$ 487,690		
Revenue Reduction %	-7.3%		

Growth Rate Calculator	2016	2017	2018	2019
Total	\$ 5,312,118	\$ 5,377,912	\$ 5,675,277	\$ 6,169,708
Total Included in Base Revenue	\$ 5,312,118	\$ 5,377,912	\$ 5,675,277	\$ 6,169,708
Growth Rate		1.2%	5.5%	8.7%
Average Growth Rate	5.2%			
Growth Rate Used for Calculation	5.2%			

As you can see, the Town's average growth rate prior to the pandemic was 5.2% producing a calculated loss of \$487,690.

American Rescue Plan Webinar: OPPORTUNITIES TO FUND WATER INFRASTRUCTURE PRIORITIES

Tuesday, September 14th, 2021
10:00 am – 11:30 am

(Photo by Will Parson/Chesapeake Bay Program)

Goals of the webinar:

- Provide information on the opportunity to fund water infrastructure using American Rescue Plan Act resources.
- Offer examples of projects that address long-standing water infrastructure needs.

Presenters

Diana Esher

American Rescue Plan Act for Cities and Counties

Carolyn Berndt, National League of Cities

Adam Pugh, National Association of Counties

What is the American Rescue Plan Act (ARPA)

- COVID-19 recovery package signed into law on March 11, 2021, with \$1.9 trillion of programming for emergency stabilization and economic recovery.
- Includes Coronavirus State and Local Fiscal Recovery Fund (SLFRF).
 - \$350 billion for states, municipalities, counties, tribes, territories
 - \$65.1 billion for cities, towns and villages
 - \$65.1 billion for counties
- SLFRF is non-competitive funding – every local government is *entitled* to funding.
- Funds must be obligated by Dec. 31, 2024. However, funds do not have to be spent/performed until Dec. 31, 2026.
- The first reporting deadline for the SLFRF for states, counties and many cities was Aug. 31. Next reporting deadline is Oct. 31.
- Cities and counties can address emergency needs ASAP, and then pause to formulate a long-term plan for remaining funds.

What can I use SLFRF funds for generally?

Treasury identifies 7 broad categories of use and 66 subcategories (see pages 32-32 of [Treasury's Compliance and Reporting Guidance](#) for a comprehensive listing of eligible uses – referred to as “expenditure categories”).

Support Public Health Response

Fund COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff

Address Negative Economic Impacts

Respond to economic harms to workers, families, small businesses, impacted industries, and the public sector

Replace Public Sector Revenue Loss

Use funds to provide government services to the extent of the reduction in revenue experienced due to the pandemic

Premium Pay for Essential Workers

Offer additional support to those who have and will bear the greatest health risks because of their service in critical infrastructure sectors

Water and Sewer Infrastructure

Make necessary investments to improve access to clean drinking water and invest in wastewater and stormwater infrastructure

Broadband Infrastructure

Make necessary investments to provide unserved or underserved locations with new or expanded broadband access

What can't I use SLFRF funds for?

- Premium pay for telework.
- Payments into pension funds, rainy day funds, financial reserves or outstanding debt.
- Payment of federal match requirements (if explicitly prohibited by another federal program).
- Using funds for Tax Anticipation Notes (TANs)

Key Highlights of the Guidance

1. The Fiscal Recovery fund was established to help turn the tide on the pandemic, address its economic fallout and lay the foundation for a strong and equitable recovery.
2. Funds may cover costs from March 3, 2021, through December 31, 2024.
3. There is no deadline for cities or counties to certify for the Recovery Funds.
4. Broad flexibility to help those disproportionately impacted by the COVID-19 pandemic.
5. Recovery Funds can be distributed into interest-bearing accounts.
6. Understand the important differences between CARES Act Coronavirus Relief Fund (CRF) and ARPA Fiscal Recovery Fund, especially for city and county employee payroll support.

Key Highlights of the Guidance

7. Use of recouped “lost revenue” is more flexible than other Recovery Fund eligibility.
8. Recovery Funds may not be used as non-federal match, unless specifically authorized.
9. Re-hiring local government staff to pre-pandemic levels.
10. Cities and counties may use Recovery Funds for routine pension costs of employees.
11. Cities and counties may use Recovery Funds to invest in certain critical infrastructure projects.
12. All counties + cities over 50,000 receive funding directly from Treasury; smaller cities, towns and villages receive funding through their state.
13. Allows recipients to pool funds for regional projects (cities and counties combining Recovery Funds with a neighboring municipality to magnify their investments)

How to certify for funds

U.S. Treasury released [certification guidance](#) and [opened the portal](#) for cities and counties to request Recovery Funds

Prior to requesting Recovery Funds, cities and counties should complete the following steps immediately:

1. Ensure your city or county has a [DUNS number](#)
2. Ensure your city or county has an [active SAM registration](#)
3. Gather payment information:
 - Entity Identification Number (EIN), name and contact information
 - Name and title of an authorized representative of the city or county (i.e. chief elected official)
 - Financial institution information (e.g., routing and account number, financial institution name and contact information)

How to certify for funds

U.S. Treasury [opened the portal](#) for counties to request Recovery Funds. To receive Recovery Funds, **a city or county must request funds through this portal.**

CLICK HERE

To access the portal and request Recovery Funds from the U.S. Treasury, [click here.](#)

If you are having issues with the new U.S. Treasury portal, email covidreliefitsupport@treasury.gov.

How to certify for funds

U.S. Treasury is using the **ID.me platform** for cities and counties to request Recovery Funds

- ID.me is a trusted technology partner to multiple government agencies – **your information is secure**
- **Site provides secure digital identity verification to government agencies** to ensure you are the correct individual requesting Recovery Funds
- You are required to provide the following information to receive Recovery Funds:
 - Social Security Number
 - Driver's license/passport number
 - Facial recognition

How to Report Funds

- All cities and counties that have certified Recovery Funds are required to submit an Interim Report.
- The [Recovery Plan Performance Report](#) must be completed by cities and counties with populations over 250,000.
- Project and Expenditure Report – These reports require project and expenditure data for awards and sub-awards, demographic information for each project, and other programmatic data
 - Initial Project and Expenditure Report is **due October 31, 2021**
 - For cities and counties with **awards over \$5 million**, project and expenditure reports are due **quarterly**
 - For cities and counties with **awards under \$5 million**, project and expenditure reports are due **annually**
- Cities and counties should refer to [Treasury's Portal for Recipient Reporting](#) which includes step-by-step guidance for submitting required reports using Treasury's portal.
- U.S. Treasury released [video walkthrough](#) of reporting portal.
- **New CFDA number – 21.027** - for Recovery Fund Tracking

Water and Sewer Infrastructure

Coronavirus State and Local Fiscal Recovery Funds – “necessary investments in water, sewer, or broadband infrastructure.”

- Projects eligible under the **Clean Water State Revolving Fund**
- Projects eligible under the **Drinking Water State Revolving Fund**
- **Climate Change, Resilience and Green Infrastructure**
- **Cybersecurity** needs to protect water or sewer infrastructure, such as developing effective cybersecurity practices and measures at drinking water systems and publicly owned treatment works.
- **Lead Service Line Replacement** programs

Clean Water State Revolving Fund (CWSRF)

CWSRFs funds a wide range of water infrastructure projects. Eleven types of projects are eligible to receive CWSRF assistance:

1. Construction of publicly owned treatment works

- Assistance to any municipality or inter-municipal, interstate, or state agency for construction of publicly owned treatment works (as defined in CWA section 212)

2. Nonpoint source

- Assistance to any public, private, or nonprofit entity for the implementation a state nonpoint source pollution management program, established under CWA section 319

3. National estuary program projects

- Assistance to any public, private, or nonprofit entity for the development and implementation of a conservation and management plan under CWA section 320

4. Decentralized wastewater treatment systems

- Assistance to any public, private, or nonprofit entity for the construction, repair, or replacement of decentralized wastewater treatment systems that treat municipal wastewater or domestic sewage

Clean Water SRF

5. Stormwater

- Assistance to any public, private, or nonprofit entity for measures to manage, reduce, treat, or recapture stormwater or subsurface drainage water

6. Water conservation, efficiency, and reuse

- Assistance to any municipality or inter-municipal, interstate, or state agency for measures to reduce the demand for publicly owned treatment works capacity through water conservation, efficiency, or reuse

7. Watershed pilot projects

- Assistance to any public, private, or nonprofit entity for the development and implementation of watershed projects meeting the criteria in CWA section 122

8. Energy efficiency

- Assistance to any municipality or inter-municipal, interstate, or state agency for measures to reduce the energy consumption needs for publicly owned treatment works

Clean Water SRF

9. Water reuse

- Assistance to any public, private, or nonprofit entity for projects for reusing or recycling wastewater, stormwater, or subsurface drainage water

10. Security measures at publicly owned treatment works

- Assistance to any public, private, or nonprofit entity for measures to increase the security of publicly owned treatment works

11. Technical assistance

- Assistance to any qualified nonprofit entity, to provide technical assistance to owners and operators of small- and medium-sized publicly owned treatment works to plan, develop, and obtain financing for CWSRF eligible projects and to assist each treatment works in achieving compliance with the CWA

Drinking Water State Revolving Fund (DWSRF)

DWSRFs fund a wide range of drinking water infrastructure projects. Six categories of projects are eligible to receive DWSRF assistance. These categories and examples of projects within them are:

1. Treatment

- Projects to install or upgrade facilities to improve drinking water quality to comply with SDWA regulations

2. Transmission and distribution

- Rehabilitation, replacement, or installation of pipes to improve water pressure to safe levels or to prevent contamination caused by leaky or broken pipes

3. Source

- Rehabilitation of wells or development of eligible sources to replace contaminated sources

4. Storage

- Installation or upgrade of finished water storage tanks to prevent microbiological contamination from entering the distribution system

5. Consolidation

- Interconnecting two or more water systems

6. Creation of new systems

- Construct a new system to serve homes with contaminated individual wells or consolidate existing systems into a new regional water system

SRF Project Examples

Clean Water SRF

- **City of Mariana, FL** - \$5M CWSRF loan for the installation of two solar facilities and solar arrays at wastewater treatment plant.
- **Wayne County, MI** - \$36M CWSRF loan for Combined Sewer Overflow basin upgrades, pump station upgrades and recirculation facility upgrades.

Drinking Water SRF

- **City of Pretty Prairie, KS** – \$2.4M in DWSRF funding to construct a new reverse osmosis water treatment plant to address nitrate contamination in their source water.
- **Washington County, VA** - \$420K in DWSRF funding to extend their water mains and provide water to a nearby community that was previously served by contaminated private wells and springs.

Other Water & Sewer Projects

- Treasury encourages recipients to consider green infrastructure investments to improve resilience and the effects of climate change
 - Stormwater runoff
 - Water pollution
 - Flood control projects
- Green infrastructure projects that support stormwater system resiliency could include rain gardens that provide water storage and filtration benefits and green streets, where vegetation, soil and engineered systems are combined to direct and filter rainwater from impervious surfaces.
- In cases of natural disaster, recipients may use recovery funds to provide relief, such as interconnecting water systems or rehabilitating existing wells during an extended drought.

Water, Sewer, Stormwater FAQ

Q: How do I determine if my drinking water, wastewater or stormwater project is eligible?

See eligibility guides for [Clean Water](#) and [Drinking Water](#)

Q: Do I need to have an SRF loan in order to use these funds for my water project?

No. And – funds cannot be used for expenses related to financing, fines, settlement costs.

Q: Can a local government transfer funds to a water utility/water district?

Yes. And – under “Revenue Loss” to utilities for unpaid bills; under “COVID/ Negative Impact” to households for utility assistance.

Q: Can the funds be used for other types of infrastructure projects and/or projects related to cybersecurity or climate change that are not water/sewer projects?

“Infrastructure” provision vs. “Revenue Loss” provision

Q: Does NEPA and other Federal statutes apply to these funds/projects?

Are you using other federal dollars for your project?

Climate and Resilience in ARPA

Coronavirus State and Local Fiscal Recovery Funds

- Parks and outdoor spaces (see [FAQ 2.18](#))
 - “There are multiple ways that investments in improving outdoor spaces could qualify as eligible uses; several are highlighted below, though there may be other ways that a specific investment in outdoor spaces would meet eligible use criteria.”
 - **Qualified Census Tract** – programs and services designed to build stronger neighborhoods and communities and to address health disparities and the social determinants of health.
 - EX: “investments in parks, public plazas, and other public outdoor recreation spaces may be responsive to the needs of disproportionately impacted communities by promoting healthier living environments and outdoor recreation and socialization to mitigate the spread of COVID-19.”
 - **Small Businesses** – enhance outdoor spaces for COVID-19 mitigation (outdoor patios); improving built environment of the neighborhood (façade improvement)
 - **Government Operations** – many governments saw significantly increased use of parks during the pandemic that resulted in damage or increased maintenance needs. IFR says, “decrease[s to] a state or local government’s ability to effectively administer services” can constitute a negative economic impact of the pandemic.

Climate and Resilience in ARPA

Coronavirus State and Local Fiscal Recovery Funds

- Addressing disparate impacts of COVID-19 (see [FAQ 2.11](#))
 - Qualified Census Tract
 - Addressing health disparities and the social determinants of health
 - Building stronger neighborhoods and communities
 - Addressing educational disparities exacerbated by COVID-19
 - Promoting healthy childhood environments

EX: climate related building work for affordable housing, such as efficiency measures or HVAC systems – as long as it remains affordable housing

Climate and Resilience in ARPA

EPA Environmental Justice Funding - \$100 million

- Grants to address disproportionate environmental harm to minority and low-income populations, in addition to funding air quality monitoring grants under the Clean Air Act.
- [\\$50 million in EJ grants to cities and states](#)
- [\\$50 million in future EJ grant opportunities](#)

Community Stormwater Drainage Improvement Program - Charles County, MD

Beth A. Groth
Senior Planner, Charles County Government

Community Stormwater Drainage Improvement Program - Charles County, MD

• The Problem

- **Charles County has identified approximately 100 neighborhoods with private stormwater management system issues**
 - **Consistent complaints of flooding**
 - **Pre-date stormwater ordinance**
 - **No County-owned easements or maintenance agreements in place**
 - **Homeowners Associations do not exist, are defunct, or do not have resources**
 - **Impacts of climate change, including extreme weather and sea-level rise, are making problems worse**
 - **Failing systems will eventually become emergency situations**

Community Stormwater Drainage Improvement Program - Charles County, MD

- **The Solution**

- **Charles County will offer/resolve to take over responsibility for repair/maintenance of these stormwater drainage systems in perpetuity.**
- **This will take place over time and in priority order based on the following criteria:**
 - **Urgency of Need**
 - **Equity**
 - **Availability of Funding**
 - **Dual Benefits**
- **Property owners will be required to donate the necessary easements for repair and maintenance**

Community Stormwater Drainage Improvement Program - Charles County, MD

- **Water Infrastructure and Community Benefits**

- **Stormwater drainage problems fixed over time for communities**
 - **Alleviate flooding**
 - **Improve water quality**
- **Natural solutions preferred to maximize multiple benefits**
- **Cost would be borne by Charles County Government from a variety of sources**
- **More cost effective to deal with the problem now, before it becomes an emergency**
- **The Resilience Authority of Charles County will be the contracting authority for this project**

Community Stormwater Drainage Improvement Program - Charles County, MD

• Cost and Funding

- Total cost unknown at this time
- Approximately 35% of Charles County's American Rescue Plan (ARP) Funds will be used for this effort: \$11.2 million
- ARP funds will also be used for:
 - Rural Broadband Initiative
 - Reclaimed Water Filtration for CPV and Panda Power Plants
 - Public Safety
 - Grants to Support Local Businesses and Non-Profits

Green Infrastructure Maintenance – Washington, DC

Train District residents and maintain green stormwater infrastructure. The program will create green jobs, with a focus on creating opportunities for under and unemployed District residents.

- Identified as a major need in the District's Phase III WIP.
- Functioning BMPs are critical to the water quality benefits they are designed to provide.
- Well maintained BMPs are better received by the communities where they are located.
- About \$8,100,000 in FY22 and about \$24,900,000 over 5 years.

Kingman Rangers – Washington, DC

Hire full time and seasonal Park Rangers to support the visitor experience and the amenities on DC's only State Conservation Area and Critical Wildlife Habitat. The program will support career development and wraparound services for underserved residents.

- The Islands have seen growth in visitors, particularly since the COVID-19 pandemic began.
- Currently there are no full-time staff designed to support the visitor experience.
- Goal is to make islands more inclusive and create opportunities for District communities experiencing health and economic disparities.
- About \$232,000 in FY22 and about \$780,000 over 5 years.

American Rescue Plan Act Funding Example

Laurel, Delaware

Project:

Wastewater Treatment Plant Upgrades

Description:

- 2021 (92%) to upgrade lagoons, drying beds, and septic receiving station associated with wastewater treatment plant, with a major portion addressing postponed sludge removal/processing
- 2021 (8%) to replace unpaid W/S fees now in bad/debts

Water Infrastructure Benefits:

- Funds often-postponed upgrades to WW system
- Supplements chronic W/WW fees/income shortfalls
- Preserves 'outside septic receiving station' operation
- Allows optimal levels of operation and 'bug' efficiency
- Allows Town to maintain surplus capacity and higher regulatory standards
- Precludes tax and fee increases

American Rescue Plan Act Funding Example

Laurel, Delaware

Community Benefits:

- Eases the 'cost side' of Laurel's clean water commitment
- Holds down tax and fee increases
- Spreads the cost burden of clean water
- Provides higher, enhanced W & WW standards and quality to our rural neighbors
- Maintains excess capacity, allows continued residential and commercial growth
- Outside rural septic dumping is processed to a much higher quality level

Cost: \$2.2 million

Percent of total ARP funding allocation: 100%

Takeaway:

Laurel is using ARPA funds to primarily (1) catch up on postponed operating and capital spending on its Wastewater facilities, and to a much smaller extent, (2) supplement its 30% shortfall in budgeted W&WW fees during the COVID crisis

Special thanks to our co-sponsors:

American Rescue Plan September 14 Webinar: Questions and Answers

Note: Below are questions asked in the Q&A section during the September 14th ARP Webinar in order as they appeared. Adam and Carolyn were able to answer some during the webinar and then kindly answered the rest over the last several days.

1. Are the State and Local Recovery Funds (that can be used for parks, perhaps creekside trails, etc.) part of the ARP funding or a separate source? If part of ARP, via "economic recovery?"
 ARPA is the overall bill. State and Local Recovery Fund is just one part of ARPA (the part that gives \$ directly to cities/counties). The State and Local Recovery Fund has various eligible uses, one of which is the water/sewer projects. There are other ways/eligibilities to spend on parks - for example through disparate impacts/Qualified Census Tract as well as responding to negative economic impacts caused by the COVID-19 pandemic.
2. Please clarify whether our ARPA funds can be used for matching grants?
 Fiscal Recovery Funds are subject to pre-existing limitations in other federal statutes and regulations and may not be used as non-federal match for other Federal programs whose statute or regulations bar the use of Federal funds to meet matching requirements.
3. Is it correct to assume that projects eligible for state sewer overflow and stormwater municipal grant fund are also eligible?
 Here is the CW SRF eligibility guide to search on stormwater projects. Stormwater projects must have a water quality connection. https://www.epa.gov/sites/default/files/2016-07/documents/overview_of_cwsrf_eligibilities_may_2016.pdf
4. Does transmission and distribution include water meter reading equipment?
 I believe "equipment" is generally an eligible use. You can check here in the DWSRF guide: https://www.epa.gov/sites/default/files/2019-10/documents/dwsrf_eligibility_handbook_june_13_2017_updated_508_version1.pdf
5. Can the funds be used to pay for the actual project that is being undertaken due to a DEQ consent order?
 I believe so, yes. As long as for actual project, and not on financing, fees, debt.
6. In a community with lots of older homes, is there a way that the government could offer testing for the existence of lead service lines? That would mean hiring a consultant to execute these tests.
 I believe testing for lead would be covered. Here is the DW SRF eligibility guide: https://www.epa.gov/sites/default/files/2019-10/documents/dwsrf_eligibility_handbook_june_13_2017_updated_508_version1.pdf Do a search on lead. I don't think ARPA could be used for the consultant's fee/hiring.
7. Can these funds be used to reimburse for a water infrastructure project that was completed last year?
 No. Use of Fiscal Recovery Funds is generally forward looking. The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021. --- Question 2.7 <https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf#page=19>
8. In addition to being eligible for Clean Water State Revolving Fund, do the projects have to have a direct 'nexus' or connection to pandemic relief?
 If the project is eligible under the CWSRF, it does not have to directly tied to the pandemic.
9. Are costs of hiring consultants - for example, for stormwater mitigation planning - eligible for reimbursement? Or just the hard infrastructure investments themselves?
 It's mostly going to be actual project/capital cost, not salaries. However, under Treasury FAQ question 6.12, funds may be used for pre-project development costs such as planning and evaluation uses, project start-up costs such as training and warranty for equipment, and costs associated with obtaining project authorization, planning and design.

10. If we use the funds to replace exiting water lines under a road, can we use funds to also repair the road after the pipe is replaced?
Road repair that is solely in response to the authorized project is covered - see Treasury FAQ 6.15.
11. Should NEU's use the Treasury Portal as well for reporting?
NEU's should not use the portal to request funds, however they should use the portal for reporting. Treasury is still finalizing the reporting process for NEU's. It's not clear if the NEU process will be identical to the metro reporting process.
12. Is there any sense of when final guidance (rather than interim) may be available?
next few months - but Treasury recently said that the Interim Final Rule should be followed now, as if it's final.
13. So to be eligible for this grant process, you need to show a loss from the Covid pandemic?
No. Every city, town, village and county is eligible to receive funding. Every county and cities with populations over 50k receive a direct allocation from Treasury. Cities, towns, villages under 50k will need to work with their state to get the funding.
14. Early in the presentation it was stated that the projects needed to be identified and initially reported by Oct 31, 2021, is this correct? To clarify, do all projects need to be ID'd by Oct 31?
No. The deadline for projects is when all funds must be obligated (12/31/2024) and spent by 12/31/2026. Treasury expects the reports that are due annually or quarterly, based on population, to change.
15. Also, can you verify the dates that the funds have to be obligated (12/31/24) and spent by (12/31/26).
That is correct.
16. are the DC water quality funds targeted to qualified census tracts, or citywide?
This is City-wide, "publicly owned" BMPs in DC (those found on DC-owned land) can be found across the city in all 8 of our wards here.
17. Can funds be used for engineering for these infrastructure improvements?
To determine whether Funds can be used on pre-project development for an eligible water or sewer project, recipients should consult whether the pre-project development use or cost is eligible under the Drinking Water and Clean Water State Revolving Funds (CWSRF and DWSRF, respectively). Generally, the CWSRF and DWSRF often allow for pre-project development costs that are tied to an eligible project, as well as those that are reasonably expected to lead to a project.
18. Can you clarify what is required for the 10/31 report to Treasury for a NEU? Our Town will probably not have identified a specific project(s) until November.
Treasury is still finalizing the reporting process for NEU's. It's not clear if the NEU process will be identical to the metro reporting process.
19. What if you have a large project this is being completed in phases and federal funds was used for previous phase - then would NEPA and other fed rules apply if using ARPA funds on another phase?
As we've stated in other places, recovery funds are really meant to be forward thinking. I'd love to learn more about this project because I'd imagine NEPA would've been done all at once.
20. can we use the funds for sewer repairs I and I projects also water line replacement?
yes, Eligibilities are aligned with the Clean Water State Revolving Funds Eligibilities. Here's the full guidance documents: https://www.epa.gov/sites/default/files/2016-07/documents/overview_of_cwsrf_eligibilities_may_2016.pdf
21. Can questions be directed to EPA? Would like to know if there is a person in region 3 who can help small communities apply for SO/SMR grant funding
Questions about using SLFRF should be directed to Treasury. There is no specific SO/SMR grant program to apply for...once you get your allocation, you may proceed with whatever projects desired as long as they meet the eligibility requirements.
22. Will any of this funding be available to individual property owners as well as municipalities? We've had residents dealing with stormwater management as well as ground contamination issues on private property. Addressing

these issues would benefit the community as a whole but are not directly under the purview of local government.

Yes, a local government can transfer to a private entity. See Q 1.8 in the treasury FAQ.

<https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf>

As the project falls under an eligible use category from the CW or DW SRF guides.

23. If we have stormwater project that involves digging in street/sidewalk, can funds be used to repair the roads/sidewalks?

Road repair that is solely in response to the authorized project is covered - see Treasury FAQ 6.15.

24. I understand ARPA funds can be used for replacement of old water and sewer lines. Can you confirm that it can also be used for the necessary street repairs associated with replacing the water and sewer lines?

Road repair that is solely in response to the authorized project is covered - see Treasury FAQ 6.15.

25. For the Green Infrastructure, can ARPA funds be used on private properties

Yes, funds can be used on private property, as long as the project meets the eligibilities. And the local government would maintain control/oversight/accountability of the funds.

26. Can stormwater funds be used for green infrastructure projects that are partly on private property not just in public space?

Yes, funds can be used on private property as long as the project meets the eligibility. Local government maintains control/oversight/accountability of the funds. Stormwater projects must have a water quality connection.

27. Can local governments work with or through watershed and environmental organizations to implement stormwater projects?

You can definitely work with partners/stakeholders on projects. The local government needs to maintain control/oversight/accountability of the funds though.

28. Reference use of local labor force for construction; however, in smaller, rural communities there is limited or no qualified labor to work on infrastructure projects. How will this be considered?

Treasury has indicated in its Interim Final Rule that it is important that necessary investments in water, sewer, or broadband infrastructure be carried out in ways that produce high-quality infrastructure, avert disruptive and costly delays, and promote efficiency. Treasury encourages recipients to ensure that water, sewer, and broadband projects use strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions, not only to promote effective and efficient delivery of high-quality infrastructure projects, but also to support the economic recovery through strong employment opportunities for workers. Using these practices in construction projects may help to ensure a reliable supply of skilled labor that would minimize disruptions, such as those associated with labor disputes or workplace injuries. Treasury has also indicated in its reporting guidance that recipients will need to provide documentation of wages and labor standards for infrastructure projects over \$10 million, and that these requirements can be met with certifications that the project is in compliance with the Davis-Bacon Act (or related state laws, commonly known as "baby Davis-Bacon Acts") and subject to a project labor agreement. Please refer to the

Reporting and Compliance Guidance, page 21, for more detailed information on the reporting requirement.

29. My town is seeking a Capital Grant to replace our Public Works Building that houses all of the equipment used to run the town. If we are successful in getting a grant are we allowed to use some of our ARP monies to supplement the costs of his.

As it currently stands, the Interim Final Rule only allows for capital improvements to existing facilities.

We do not currently have sufficient guidance on constructing new facilities, and we are not advising counties to proceed with constructing new facilities until we receive more clarity from the Treasury Department. The Interim Final Rule currently provides the following context for capital improvements to existing facilities: under the "Responding to COVID-19" eligible use category, "Other responses and

adaptation costs include capital investments in public facilities to meet pandemic operational needs such as physical plant improvements to public hospitals and health clinics, or adaptations to public buildings to implement COVID-19 mitigation tactics.

30. If our population is under 1,000 don't we still need to file copies of the assurances and other forms that we submitted to our state?

All reporting requirements can be found at this link - <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-fund/non-entitlement-units>

31. Can a state use their ARPA funds to fund a wastewater project that is also receiving SRF funds (using the SRF loan as interim financing)?

Note (from Carolyn) - this question confuses me. Person is asking if the STATE will put some of their SLFRF money to a local wastewater project? Regarding using ARPA + SRF - ARPA can be used to cover a portion of a larger project. Just have to be careful that there is no overlap of the financing and that ARPA isn't used to cover the SRF repayment or as any matching funds. There should be a clear delineation between the portion that's funded with ARPA and the portion that funded through SRF.

32. The QCTs for our City changed from 2021 to 2022. 2 tracts that had been designated as a QCT in 2021 when the act was passed, have since lost the designation. Do you know which year we should follow?

The QCT is one measure in which the Interim Final Rule identifies communities can be identified as experiencing a disproportionate impact due to the COVID-19 pandemic, but it is not the only measure. Any individual or low-income community that has experienced negative economic impacts can be presumed to have experienced them due to the COVID-19 pandemic, which would make them eligible for assistance similar to that provided to QCTs. Please review pages 6-12 of the Interim Final Rule as well as Treasury FAQ 2.11 for more information

33. Our state CWSRF program doesn't seem to focus on all 11 eligible areas, per EPA. We have a large road project that will bring much needed improvements to the stormwater system in one of the oldest parts of our city - would that be eligible as a measure to manage stormwater (will also help the resilience in that area to the larger rain storms we've been experiencing lately).

States can have different SRF categories/eligibility/definitions. Project eligibility is determined by the national guidance. You can ask your state CWSRF contact for a general idea, but ultimately you should follow the national SRF guidance documents. Nationally, eligibilities are aligned with the Clean Water State Revolving Funds Eligibilities. Here's the full guidance documents:

https://www.epa.gov/sites/default/files/2016-07/documents/overview_of_cwsrf_eligibilities_may_2016.pdf

34. Can these funds be used for city-wide comprehensive planning?

The Interim Final Rule as provided by the Treasury Department currently includes as an eligible use the drafting of planning and analysis resources that will "improve programs addressing the COVID-19 pandemic, including through use of targeted consumer outreach, improvements to data or technology infrastructure, impact evaluations, and data analysis". These planning documents and analysis resources can be intended to improve the design and execution of health and public health programs, as well as improving the efficacy of economic relief programs. The planning document would need to have a direct relation to the use of funds that provides a response to the COVID-19 pandemic and/or addressing a negative economic impact caused by the pandemic.

35. Are you aware if/how states or counties have or plan to use funds to assist low income populations on septic system repairs or drinking water well quality repairs/filtration?

The National League of Cities is tracking how local governments are using their funds here:

<https://www.nlc.org/resource/covid-19-local-action-tracker/>

36. Are there specific audit requirements separate from the General Municipal Audit?

Depending on the size of your allocation, you may be required to report annually or quarterly. If you received over \$5 million in recovery funds, it will be quarterly reporting. If under \$5 million, then you are

required to submit a report annually. Compliance and reporting responsibilities can be found here

<https://home.treasury.gov/system/files/136/SLFRF-Compliance-and-Reporting-Guidance.pdf>

37. Can ARPA funds be used for stormwater/flood mitigation projects that don't use green infrastructure (i.e., gray infrastructure, storm walls)?

Stormwater project must have a water quality connection. Eligibilities are aligned with the Clean Water State Revolving Funds Eligibilities. Here's the full guidance documents:

https://www.epa.gov/sites/default/files/2016-07/documents/overview_of_cwsrf_eligibilities_may_2016.pdf

38. Can ARPA funds be used to assist other nonprofit organizations?

You can definitely work with partners/stakeholders on projects. The local government needs to maintain control/oversight/accountability of the funds though.

39. We need to replace a sewer line due to new growth in our town, but the ARP funds won't cover the entire cost. Can we still utilize the full amount of the funds to put towards this project or do the new funds need to be used to complete a project?

ARPA funds can be used for a portion of a project.

40. Our city manager was asking about using some funds for city wide clean up or trash pick up, would this be something that would be eligible?

If the cleanup project is connected to negative economic impacts caused by COVID-19, then you may be able to use recovery funds for enhanced cleaning efforts. But you would really need to make the connection to COVID-19 and not just a regular city-wide clean up.

41. So I have two long term projects that began earlier this year. They are both in the design stage - It is a water clarifier and pump station upgrade. I saw that eligible expenses were between 03/03/21 and 12/31/24. Am I ok to utilize ARPA monies for invoices that have already been paid?

I don't think so. Use of Fiscal Recovery Funds is generally forward looking. The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021. --- Question 2.7

<https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf#page=19>

42. In the second disbursement next year, can a municipality use some of the funds to build a building that would house a Boys & Girls club/ Community Center? In meetings with representatives from our County's Board of Education and local elected officials, the idea came about that this type of project might qualify as an eligible use under the Mental Health/Recreational/Providing a safe recreational environment for area youth.

We believe this would be an eligible use under mental health. However, you would need all of the contracts for the building to be signed by 12/31/2024 and be completely built by 12/31/2026.

Maintenance fees and all other responsibilities would be on the municipality moving forward. This is why we've been recommending not to build new buildings, but if this municipality believes they can do it in time, they should be able to make the argument under mental health! Also I think you might be able to do this inside a qualified census tract. In other words it would have to primarily serve a low-income community. It could possibly also fit under "childcare" if the facility provides before school or after school care. The big downside to a building is that COVID-19 is more transmissible indoors, and the rule gives more latitude for building recreational environments that gets people outdoors.

43. I am an NEU that received over \$5 million. Will I have to report annually or quarterly?

Each NEU must submit a Project Expenditure Report by October 31, 2021 and then annually thereafter.

<https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-fund/non-entitlement-units>

44. One of the stumbling blocks we have is chronic City staff shortages. Can we use ARP funds to hire four people as a task force to break the log jam re: ok projects?

As discussed in the Interim Final Rule, funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, for the portion of the employee's time that is dedicated to responding to the COVID-19 public health emergency.

45. Would mitigating ground runoff stormwater damage to forests be eligible? Water originating from roads a residential areas... How do we justify using the CWSRF requirements?
Stormwater projects must have a water quality connection. Eligibilities are aligned with the Clean Water State Revolving Funds Eligibilities. Here's the full guidance documents:
https://www.epa.gov/sites/default/files/2016-07/documents/overview_of_cwsrf_eligibilities_may_2016.pdf
46. I am a major Stakeholder in a historical African American community which I disproportionately impacted. Builders have come in and have compounded the environmental impact that this organization is addressing. These builders act as if the people who have lived here for over seven generations do not exist. There are erosion occurring in our shorelines of the Nansemond River. How can you help us?
I'd suggest reaching out to Meryem Karad (meryem.karad@governor.virginia.gov). She staffs the Virginia Council on Environmental Justice and can connect you with helpful information for your region further.
<https://www.naturalresources.virginia.gov/initiatives/environmental-justice/>
47. We are a small muni and I did all the paperwork and id.me was never even mentioned and we did not submit. Sam.gov asks for lots of info but not driver's license, etc.
FI think id.me was for larger municipalities that were receiving funds directly from treasury not for those that go through the state to receive funds

DEPARTMENT OF THE TREASURY

31 CFR Part 35

RIN 1505-AC77

Coronavirus State and Local Fiscal Recovery Funds

AGENCY: Department of the Treasury.

ACTION: Interim final rule.

SUMMARY: The Secretary of the Treasury (Treasury) is issuing this interim final rule to implement the Coronavirus State Fiscal Recovery Fund and the Coronavirus Local Fiscal Recovery Fund established under the American Rescue Plan Act.

DATES: *Effective date:* The provisions in this interim final rule are effective May 17, 2021.

Comment date: Comments must be received on or before July 16, 2021. **ADDRESSES:** Please submit comments electronically through the Federal eRulemaking Portal: <http://www.regulations.gov>. Comments can be mailed to the Office of the Undersecretary for Domestic Finance, Department of the Treasury, 1500 Pennsylvania Avenue NW, Washington, DC 20220. Because postal mail may be subject to processing delay, it is recommended that comments be submitted electronically. All comments should be captions with “Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule Comments.” Please include your name, organization affiliation, address, email address and telephone number in your comment. Where appropriate, a comment should include a short executive summary.

In general, comments received will be posted on <http://www.regulations.gov> without change, including any business or personal information provided. Comments received, including attachments and other supporting materials, will be part of the public record and subject to public disclosure. Do not enclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

FOR FURTHER INFORMATION CONTACT: Katharine Richards, Senior Advisor, Office of Recovery Programs, Department of the Treasury, (844) 529-9527.

SUPPLEMENTARY INFORMATION:

I. Background Information

A. Overview

Since the first case of coronavirus disease 2019 (COVID-19) was discovered in the United States in January 2020, the disease has infected

over 32 million and killed over 575,000 Americans.¹ The disease has impacted every part of life: As social distancing became a necessity, businesses closed, schools transitioned to remote education, travel was sharply reduced, and millions of Americans lost their jobs. In April 2020, the national unemployment rate reached its highest level in over seventy years following the most severe month-over-month decline in employment on record.² As of April 2021, there were still 8.2 million fewer jobs than before the pandemic.³ During this time, a significant share of households have faced food and housing insecurity.⁴ Economic disruptions impaired the flow of credit to households, State and local governments, and businesses of all sizes.⁵ As businesses weathered closures and sharp declines in revenue, many were forced to shut down, especially small businesses.⁶

Amid this once-in-a-century crisis, State, territorial, Tribal, and local governments (State, local, and Tribal governments) have been called on to respond at an immense scale. Governments have faced myriad needs to prevent and address the spread of

COVID-19, including testing, contact tracing, isolation and quarantine, public communications, issuance and enforcement of health orders, expansions to health system capacity like alternative care facilities, and in recent months, a massive nationwide mobilization around vaccinations. Governments also have supported major efforts to prevent COVID-19 spread through safety measures in settings like nursing homes, schools, congregate living settings, dense worksites, incarceration settings, and public facilities. The pandemic’s impacts on behavioral health, including the toll of pandemic-related stress, have increased the need for behavioral health resources.

At the same time, State, local and Tribal governments launched major efforts to address the economic impacts of the pandemic. These efforts have been tailored to the needs of their communities and have included expanded assistance to unemployed workers; food assistance; rent, mortgage, and utility support; cash assistance; internet access programs; expanded services to support individuals experiencing homelessness; support for individuals with disabilities and older adults; and assistance to small businesses facing closures or revenue loss or implementing new safety measures.

In responding to the public health emergency and its negative economic impacts, State, local, and Tribal governments have seen substantial increases in costs to provide these services, often amid substantial declines in revenue due to the economic downturn and changing economic patterns during the pandemic.⁷ Facing these budget challenges, many State, local, and Tribal governments have been forced to make cuts to services or their workforces, or delay critical investments. From February to May of 2020, State, local, and Tribal governments reduced their workforces by more than 1.5 million jobs and, in April of 2021, State, local, and Tribal government employment remained nearly 1.3 million jobs below pre-pandemic levels.⁸ These cuts to State, local, and Tribal government workforces

come at a time when demand for government services is high, with State, local, and Tribal governments on the frontlines of fighting the pandemic. Furthermore, State, local, and Tribal government austerity measures can hamper overall economic growth, as occurred in the recovery from the Great Recession.⁹

Finally, although the pandemic's impacts have been widespread, both the public health and economic impacts of the pandemic have fallen most severely on communities and populations disadvantaged before it began. Low-income communities, people of color, and Tribal communities have faced higher rates of infection, hospitalization, and death,¹⁰ as well as higher rates of unemployment and lack of basic necessities like food and housing.¹¹ Pre-existing social vulnerabilities magnified the pandemic in these communities, where a reduced ability to work from home and, frequently, denser housing amplified the risk of infection. Higher rates of pre-existing health conditions also may have contributed to more severe COVID-19 health outcomes.¹² Similarly, communities or households facing economic insecurity before the pandemic were less able to weather business closures, job losses, or declines in earnings and were less able to participate in remote work or education due to the inequities in access to reliable and affordable broadband infrastructure.¹³ Finally, though schools in all areas faced challenges, those in high poverty areas had fewer resources to adapt to remote and hybrid learning models.¹⁴ Unfortunately, the pandemic

also has reversed many gains made by communities of color in the prior economic expansion.¹⁵

B. The Statute and Interim Final Rule

On March 11, 2021, the American Rescue Plan Act (ARPA) was signed into law by the President.¹⁶ Section 9901 of ARPA amended Title VI of the Social Security Act¹⁷ (the Act) to add section 602, which establishes the Coronavirus State Fiscal Recovery Fund, and section 603, which establishes the Coronavirus Local Fiscal Recovery Fund (together, the Fiscal Recovery Funds).¹⁸ The Fiscal Recovery Funds are intended to provide support to State, local, and Tribal governments (together, recipients) in responding to the impact of COVID-19 and in their efforts to contain COVID-19 on their communities, residents, and businesses. The Fiscal Recovery Funds build on and expand the support provided to these governments over the last year, including through the Coronavirus Relief Fund (CRF).¹⁹

¹⁶ American Rescue Plan Act of 2021 (ARPA), sec. 9901, Public Law 117-2, codified at 42 U.S.C. 802 *et seq.* The term "state" as used in this **SUPPLEMENTARY INFORMATION** and defined in section 602 of the Act means each of the 50 States and the District of Columbia. The term "territory" as used in this **SUPPLEMENTARY INFORMATION** and defined in section 602 of the Act means the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, the Commonwealth of Northern Mariana Islands, and American Samoa. Tribal government is defined in the Act and the interim final rule to mean "the recognized governing body of any Indian or Alaska Native tribe, band, nation, pueblo, village, community, component band, or component reservation, individually identified (including parenthetically) in the list published most recently as of the date of enactment of the [American Rescue Plan Act] pursuant to section 104 of the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 5131)." See section 602(g)(7) of the Social Security Act, as added by the American Rescue Plan Act. On January 29, 2021, the Bureau of Indian Affairs published a current list of 574 Tribal entities. See 86 FR 7554, January 29, 2021. The term "local governments" as used in this **SUPPLEMENTARY INFORMATION** includes metropolitan cities, counties, and nonentitlement units of local government.

¹⁷ 42 U.S.C. 801 *et seq.*

¹⁸ Sections 602, 603 of the Act.

¹⁹ The CRF was established by the section 601 of the Act as added by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), Public Law 116-136, 134 Stat. 281 (2020).

Through the Fiscal Recovery Funds, Congress provided State, local, and Tribal governments with significant resources to respond to the COVID-19 public health emergency and its economic impacts through four categories of eligible uses. Section 602 and section 603 contain the same eligible uses; the primary difference between the two sections is that section 602 establishes a fund for States, territories, and Tribal governments and section 603 establishes a fund for metropolitan cities, nonentitlement units of local government, and counties. Sections 602(c)(1) and 603(c)(1) provide that funds may be used:

(a) To respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality;

(b) To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers;

(c) For the provision of government services to the extent of the reduction in revenue due to the COVID-19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency; and

(d) To make necessary investments in water, sewer, or broadband infrastructure.

In addition, Congress clarified two types of uses which do not fall within these four categories. Sections 602(c)(2)(B) and 603(c)(2) provide that these eligible uses do not include, and thus funds may not be used for, depositing funds into any pension fund. Section 602(c)(2)(A) also provides, for States and territories, that the eligible uses do not include "directly or indirectly offset[ing] a reduction in the net tax revenue of [the] State or territory resulting from a change in law, regulation, or administrative interpretation."

The ARPA provides a substantial infusion of resources to meet pandemic response needs and rebuild a stronger, more equitable economy as the country recovers. First, payments from the Fiscal Recovery Funds help to ensure that State, local, and Tribal governments have the resources needed to continue to take actions to decrease the spread of COVID-19 and bring the pandemic under control. Payments from the Fiscal Recovery Funds may also be used by recipients to provide support for costs incurred in addressing public health and economic challenges resulting from the pandemic, including resources to offer premium pay to essential workers, in recognition of their sacrifices over the

¹⁴ Emma Dorn et al., COVID-19 and student learning in the United States: The hurt could last

last year. Recipients may also use payments from the Fiscal Recovery Funds to replace State, local, and Tribal government revenue lost due to COVID-19, helping to ensure that governments can continue to provide needed services and avoid cuts or layoffs. Finally, these resources lay the foundation for a strong, equitable economic recovery, not only by providing immediate economic stabilization for households and businesses, but also by addressing the systemic public health and economic challenges that may have contributed to more severe impacts of the pandemic among low-income communities and people of color.

Within the eligible use categories outlined in the Fiscal Recovery Funds provisions of ARPA, State, local, and Tribal governments have flexibility to determine how best to use payments from the Fiscal Recovery Funds to meet the needs of their communities and populations. The interim final rule facilitates swift and effective implementation by establishing a framework for determining the types of programs and services that are eligible under the ARPA along with examples of uses that State, local, and Tribal governments may consider. These uses build on eligible expenditures under the CRF, including some expansions in eligible uses to respond to the public health emergency, such as vaccination campaigns. They also reflect changes in the needs of communities, as evidenced by, for example, nationwide data demonstrating disproportionate impacts of the COVID-19 public health emergency on certain populations, geographies, and economic sectors. The interim final rule takes into consideration these disproportionate impacts by recognizing a broad range of eligible uses to help States, local, and Tribal governments support the families, businesses, and communities hardest hit by the COVID-19 public health emergency.

Implementation of the Fiscal Recovery Funds also reflect the importance of public input, transparency, and accountability. Treasury seeks comment on all aspects of the interim final rule and, to better facilitate public comment, has included specific questions throughout this **SUPPLEMENTARY INFORMATION**. Treasury encourages State, local, and Tribal governments in particular to provide feedback and to engage with Treasury regarding issues that may arise regarding all aspects of this interim final rule and Treasury's work in administering the Fiscal Recovery Funds. In addition, the interim final rule establishes certain regular reporting

requirements, including by requiring State, local, and Tribal governments to publish information regarding uses of Fiscal Recovery Funds payments in their local jurisdiction. These reporting requirements reflect the need for transparency and accountability, while recognizing and minimizing the burden, particularly for smaller local governments. Treasury urges State, territorial, Tribal, and local governments to engage their constituents and communities in developing plans to use these payments, given the scale of funding and its potential to catalyze broader economic recovery and rebuilding.

II. Eligible Uses

A. Public Health and Economic Impacts

Sections 602(c)(1)(A) and 603(c)(1)(A) provide significant resources for State, territorial, Tribal governments, and counties, metropolitan cities, and nonentitlement units of local governments (each referred to as a recipient) to meet the wide range of public health and economic impacts of the COVID-19 public health emergency.

These provisions authorize the use of payments from the Fiscal Recovery Funds to respond to the public health emergency with respect to COVID-19 or its negative economic impacts. Section 602 and section 603 also describe several types of uses that would be responsive to the impacts of the COVID-19 public health emergency, including assistance to households, small businesses, and nonprofits and aid to impacted industries, such as tourism, travel, and hospitality.²⁰

Accordingly, to assess whether a program or service is included in this category of eligible uses, a recipient should consider whether and how the use would respond to the COVID-19 public health emergency. Assessing whether a program or service "responds to" the COVID-19 public health emergency requires the recipient to, first, identify a need or negative impact of the COVID-19 public health emergency and, second, identify how the program, service, or other intervention addresses the identified need or impact. While the COVID-19 public health emergency affected many aspects of American life, eligible uses under this category must be in response to the disease itself or the harmful consequences of the economic disruptions resulting from or exacerbated by the COVID-19 public health emergency.

²⁰ Sections 602(c)(1)(A), 603(c)(1)(A) of the Act.

The interim final rule implements these provisions by identifying a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of the Fiscal Recovery Funds not explicitly listed. The interim final rule also provides flexibility for recipients to use payments from the Fiscal Recovery Funds for programs or services that are not identified on these non-exclusive lists but that fall under the terms of section 602(c)(1)(A) or 603(c)(1)(A) by responding to the COVID-19 public health emergency or its negative economic impacts. As an example, in determining whether a program or service responds to the negative economic impacts of the COVID-19 public health emergency, the interim final rule provides that payments from the Fiscal Recovery Funds should be designed to address an economic harm resulting from or exacerbated by the public health emergency. Recipients should assess the connection between the negative economic harm and the COVID-19 public health emergency, the nature and extent of that harm, and how the use of this funding would address such harm.

As discussed, the pandemic and the necessary actions taken to control the spread had a severe impact on households and small businesses, including in particular low-income workers and communities and people of color. While eligible uses under sections 602(c)(1)(A) and 603(c)(1)(A) provide flexibility to recipients to identify the most pressing local needs, Treasury encourages recipients to provide assistance to those households, businesses, and non-profits in communities most disproportionately impacted by the pandemic.

1. Responding to COVID-19

On January 21, 2020, the Centers for Disease Control and Prevention (CDC) identified the first case of novel coronavirus in the United States.²¹ By late March, the virus had spread to many States and the first wave was growing rapidly, centered in the northeast.²² This wave brought acute

²¹ Press Release, Centers for Disease Control and Prevention, First Travel-related Case of 2019 Novel Coronavirus Detected in United States (Jan. 21, 2020), <https://www.cdc.gov/media/releases/2020/p0121-novel-coronavirus-travel-case.html>.

²² Anne Schuchat et al., Public Health Response to the Initiation and Spread of Pandemic COVID-19 in the United States, February 24–April 21, 2021, *MMWR Morb Mortal Wkly Rep* 2021, 69(18):551–56 (May 8, 2021), <https://www.cdc.gov/mmwr/volumes/69/wr/mm6918e2.htm>.

strain on health care and public health systems: Hospitals and emergency medical services struggled to manage a major influx of patients; response personnel faced shortages of personal protective equipment; testing for the virus was scarce; and congregate living facilities like nursing homes and prisons saw rapid spread. State, local, and Tribal governments mobilized to support the health care system, issue public health orders to mitigate virus spread, and communicate safety measures to the public. The United States has since faced at least two additional COVID-19 waves that brought many similar challenges: The second in the summer, centered in the south and southwest, and a wave throughout the fall and winter, in which the virus reached a point of uncontrolled spread across the country and over 3,000 people died per day.²³ By early May 2021, the United States has experienced over 32 million confirmed COVID-19 cases and over 575,000 deaths.²⁴

Mitigating the impact of COVID-19, including taking actions to control its spread and support hospitals and health care workers caring for the sick, continues to require a major public health response from State, local and Tribal governments. New or heightened public health needs include COVID-19 testing, major expansions in contact tracing, support for individuals in isolation or quarantine, enforcement of public health orders, new public communication efforts, public health surveillance (e.g., monitoring case trends and genomic sequencing for variants), enhancement to health care capacity through alternative care facilities, and enhancement of public health data systems to meet new demands or scaling needs. State, local, and Tribal governments have also supported major efforts to prevent COVID-19 spread through safety measures at key settings like nursing homes, schools, congregate living settings, dense worksites, incarceration settings, and in other public facilities. This has included implementing infection prevention measures or making ventilation improvements in congregate settings, health care settings, or other key locations.

Other response and adaptation costs include capital investments in public facilities to meet pandemic operational

needs, such as physical plant improvements to public hospitals and health clinics or adaptations to public buildings to implement COVID-19 mitigation tactics. In recent months, State, local, and Tribal governments across the country have mobilized to support the national vaccination campaign, resulting in over 250 million doses administered to date.²⁵

The need for public health measures to respond to COVID-19 will continue in the months and potentially years to come. This includes the continuation of the vaccination campaign for the general public and, if vaccinations are approved for children in the future, eventually for youths. This also includes monitoring the spread of COVID-19 variants, understanding the impact of these variants (especially on vaccination efforts), developing approaches to respond to those variants, and monitoring global COVID-19 trends to understand continued risks to the United States. Finally, the long-term health impacts of COVID-19 will continue to require a public health response, including medical services for individuals with “long COVID,” and research to understand how COVID-19 impacts future health needs and raises risks for the millions of Americans who have been infected.

Other areas of public health have also been negatively impacted by the COVID-19 pandemic. For example, in one survey in January 2021, over 40 percent of American adults reported symptoms of depression or anxiety, up from 11 percent in the first half of 2019.²⁶ The proportion of children’s emergency department visits related to mental health has also risen noticeably.²⁷ Similarly, rates of substance misuse and overdose deaths have spiked: Preliminary data from the CDC show a nearly 30 percent increase in drug overdose mortality from September 2019 to September 2020.²⁸ Stay-at-home orders and other pandemic responses may have also reduced the ability of individuals affected by domestic violence to access

services.²⁹ Finally, some preventative public health measures like childhood vaccinations have been deferred and potentially forgone.³⁰

While the pandemic affected communities across the country, it disproportionately impacted some demographic groups and exacerbated health inequities along racial, ethnic, and socioeconomic lines.³¹ The CDC has found that racial and ethnic minorities are at increased risk for infection, hospitalization, and death from COVID-19, with Hispanic or Latino and Native American or Alaska Native patients at highest risk.³²

Similarly, low-income and socially vulnerable communities have seen the most severe health impacts. For example, counties with high poverty rates also have the highest rates of infections and deaths, with 223 deaths per 100,000 compared to the U.S. average of 175 deaths per 100,000, as of May 2021.³³ Counties with high social vulnerability, as measured by factors such as poverty and educational attainment, have also fared more poorly than the national average, with 211 deaths per 100,000 as of May 2021.³⁴

²⁸ Centers for Disease Prevention and Control, National Center for Health Statistics, Provisional Drug Overdose Death Counts, <https://www.cdc.gov/nchs/nvss/vsrr/drug-overdose-data.htm> (last visited May 8, 2021).

Over the last year, Native Americans have experienced more than one and a half times the rate of COVID-19 infections, more than triple the rate of hospitalizations, and more than double the death rate compared to White Americans.³⁵ Low-income and minority communities also exhibit higher rates of pre-existing conditions that may contribute to an increased risk of COVID-19 mortality.³⁶

In addition, individuals living in low-income communities may have had more limited ability to socially distance or to self-isolate when ill, resulting in faster spread of the virus, and were over-represented among essential workers, who faced greater risk of exposure.³⁷ Social distancing measures in response to the pandemic may have also exacerbated pre-existing public health challenges. For example, for children living in homes with lead paint, spending substantially more time at home raises the risk of developing elevated blood lead levels, while screenings for elevated blood lead levels declined during the pandemic.³⁸ The combination of these underlying social and health vulnerabilities may have contributed to more severe public health outcomes of the pandemic within these communities, resulting in an exacerbation of pre-existing disparities in health outcomes.³⁹

Eligible Public Health Uses. The Fiscal Recovery Funds provide resources to meet and address these emergent public health needs, including through measures to counter the spread of COVID-19, through the provision of care for those impacted by the virus, and through programs or services that address disparities in public health that have been exacerbated by the pandemic. To facilitate implementation and use of payments from the Fiscal Recovery Funds, the interim final rule identifies a non-exclusive list of eligible uses of funding to respond to the COVID-19 public health emergency. Eligible uses listed under this section build and expand upon permissible expenditures under the CRF, while recognizing the differences between the ARPA and CARES Act, and recognizing that the response to the COVID-19 public health emergency has changed and will continue to change over time. To assess whether additional uses would be eligible under this category, recipients should identify an effect of COVID-19 on public health, including either or both of immediate effects or effects that may manifest over months or years, and assess how the use would respond to or address the identified need.

The interim final rule identifies a non-exclusive list of uses that address the effects of the COVID-19 public health emergency, including:

- *COVID-19 Mitigation and Prevention.* A broad range of services and programming are needed to contain COVID-19. Mitigation and prevention efforts for COVID-19 include vaccination programs; medical care; testing; contact tracing; support for isolation or quarantine; supports for vulnerable populations to access medical or public health services; public health surveillance (e.g., monitoring case trends, genomic sequencing for variants); enforcement of public health orders; public communication efforts; enhancement to health care capacity, including through alternative care facilities; purchases of personal protective equipment; support for prevention, mitigation, or other services in congregate living facilities (e.g., nursing homes, incarceration settings, homeless shelters, group living facilities) and other key settings like schools;⁴⁰ ventilation improvements in

note 38; Nathaniel M. Lewis et al., Disparities in COVID-19 Incidence, Hospitalizations, and Testing, by Area-Level Deprivation—Utah, March 3–July 9, 2020, *Morb. Mort. Wkly. Rep.* 69(38):1369–73 (Sept. 25, 2020), <https://www.cdc.gov/mmwr/volumes/69/wr/mm6938a4.htm>.

⁴⁰ This includes implementing mitigation strategies consistent with the Centers for Disease Control and Prevention's (CDC) Operational

congregate settings, health care settings, or other key locations; enhancement of public health data systems; and other public health responses.⁴¹ They also include capital investments in public facilities to meet pandemic operational needs, such as physical plant improvements to public hospitals and health clinics or adaptations to public buildings to implement COVID-19 mitigation tactics. These COVID-19 prevention and mitigation programs and services, among others, were eligible expenditures under the CRF and are eligible uses under this category of eligible uses for the Fiscal Recovery Funds.⁴²

- *Medical Expenses.* The COVID-19 public health emergency continues to have devastating effects on public health; the United States continues to average hundreds of deaths per day and the spread of new COVID-19 variants has raised new risks and genomic surveillance needs.⁴³ Moreover, our understanding of the potentially serious and long-term effects of the virus is growing, including the potential for symptoms like shortness of breath to continue for weeks or months, for multi-organ impacts from COVID-19, or for post-intensive care syndrome.⁴⁴ State and local governments may need to continue to provide care and services to address these near- and longer-term needs.⁴⁵

Strategy for K–12 Schools through Phased Prevention, available at <https://www.cdc.gov/coronavirus/2019-ncov/community/schools-childcare/operation-strategy.html>.

⁴¹ Many of these expenses were also eligible in the CRF. Generally, funding uses eligible under CRF as a response to the direct public health impacts of COVID-19 will continue to be eligible under the ARPA, including those not explicitly listed here (e.g., telemedicine costs, costs to facilitate compliance with public health orders, disinfection of public areas, facilitating distance learning, increased solid waste disposal needs related to PPE, paid sick and paid family and medical leave to public employees to enable compliance with COVID-19 public health precautions), with the following two exceptions: (1) The standard for eligibility of public health and safety payrolls has been updated (see section II.A of this **SUPPLEMENTARY INFORMATION**) and (2) expenses related to the issuance of tax-anticipation notes are no longer an eligible funding use (see discussion of debt service in section II.B of this **SUPPLEMENTARY INFORMATION**).

⁴² Coronavirus Relief Fund for States, Tribal Governments, and Certain Eligible Local Governments, 86 FR 4182 (Jan. 15, 2021), available at <https://home.treasury.gov/system/files/136/CRF-Guidance-Federal-Register-2021-00827.pdf>.

⁴³ Centers for Disease Control and Prevention, *supra* note 24.

⁴⁴ Centers for Disease Control and Prevention, Long-Term Effects (Apr. 8, 2021), <https://www.cdc.gov/coronavirus/2019-ncov/long-term-effects.html> (last visited Apr. 26, 2021).

⁴⁵ Pursuant to 42 CFR 433.51 and 45 CFR 75.306, Fiscal Recovery Funds may not serve as a State or locality's contribution of certain Federal funds.

• *Behavioral Health Care.* In addition, new or enhanced State, local, and Tribal government services may be needed to meet behavioral health needs exacerbated by the pandemic and respond to other public health impacts. These services include mental health treatment, substance misuse treatment, other behavioral health services, hotlines or warmlines, crisis intervention, overdose prevention, infectious disease prevention, and services or outreach to promote access to physical or behavioral health primary care and preventative medicine.

• *Public Health and Safety Staff.* Treasury recognizes that responding to the public health and negative economic impacts of the pandemic, including administering the services described above, requires a substantial commitment of State, local, and Tribal government human resources. As a result, the Fiscal Recovery Funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, to the extent that their services are devoted to mitigating or responding to the COVID-19 public health emergency.⁴⁶ Accordingly, the Fiscal Recovery Funds may be used to support the payroll and covered benefits for the portion of the employee's time that is dedicated to responding to the COVID-19 public health emergency. For administrative convenience, the recipient may consider public health and safety employees to be entirely devoted to mitigating or responding to the COVID-19 public health emergency, and therefore fully covered, if the employee, or his or her operating unit or division, is primarily dedicated to responding to the COVID-19 public health emergency. Recipients may consider other presumptions for assessing the extent to which an employee, division, or operating unit is engaged in activities that respond to the COVID-19 public health emergency, provided that the recipient reassesses periodically and maintains records to support its assessment, such as payroll records, attestations from supervisors or staff, or regular work product or correspondence demonstrating work on

⁴⁶ In general, if an employee's wages and salaries are an eligible use of Fiscal Recovery Funds, recipients may treat the employee's covered benefits as an eligible use of Fiscal Recovery Funds. For purposes of the Fiscal Recovery Funds, covered benefits include costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans (Federal and state), workers compensation insurance, and Federal Insurance Contributions Act (FICA) taxes (which includes Social Security and Medicare taxes).

the COVID-19 response. Recipients need not routinely track staff hours.

• *Expenses to Improve the Design and Execution of Health and Public Health Programs.* State, local, and Tribal governments may use payments from the Fiscal Recovery Funds to engage in planning and analysis in order to improve programs addressing the COVID-19 pandemic, including through use of targeted consumer outreach, improvements to data or technology infrastructure, impact evaluations, and data analysis.

Eligible Uses to Address Disparities in Public Health Outcomes. In addition, in recognition of the disproportionate impacts of the COVID-19 pandemic on health outcomes in low-income and Native American communities and the importance of mitigating these effects, the interim final rule identifies a broader range of services and programs that will be presumed to be responding to the public health emergency when provided in these communities. Specifically, Treasury will presume that certain types of services, outlined below, are eligible uses when provided in a Qualified Census Tract (QCT),⁴⁷ to families living in QCTs, or when these services are provided by Tribal governments.⁴⁸ Recipients may also provide these services to other populations, households, or geographic areas that are disproportionately impacted by the pandemic. In identifying these disproportionately-impacted communities, recipients should be able to support their determination that the pandemic resulted in disproportionate public health or economic outcomes to the

⁴⁷ Qualified Census Tracts are a common, readily-accessible, and geographically granular method of identifying communities with a large proportion of low-income residents. Using an existing measure may speed implementation and decrease administrative burden, while identifying areas of need at a highly-localized level.

While QCTs are an effective tool generally, many tribal communities have households with a wide range of income levels due in part to non-tribal member, high income residents living in the community. Mixed income communities, with a significant share of tribal members at the lowest levels of income, are often not included as eligible QCTs yet tribal residents are experiencing disproportionate impacts due to the pandemic. Therefore, including all services provided by Tribal governments is a more effective means of ensuring that disproportionately impacted Tribal members can receive services.

⁴⁸ U.S. Department of Housing and Urban Development (HUD), Qualified Census Tracts and Difficult Development Areas, <https://www.huduser.gov/portal/datasets/qct.html> (last visited Apr. 26, 2021); U.S. Department of the Interior, Bureau of Indian Affairs, Indian Lands of Federally Recognized Tribes of the United States (June 2016), <https://www.bia.gov/sites/bia.gov/files/assets/bia/ots/webteam/pdf/idc1-028635.pdf> (last visited Apr. 26, 2021).

specific populations, households, or geographic areas to be served.

Given the exacerbation of health disparities during the pandemic and the role of pre-existing social vulnerabilities in driving these disparate outcomes, services to address health disparities are presumed to be responsive to the public health impacts of the pandemic. Specifically, recipients may use payments from the Fiscal Recovery Funds to facilitate access to resources that improve health outcomes, including services that connect residents with health care resources and public assistance programs and build healthier environments, such as:

- Funding community health workers to help community members access health services and services to address the social determinants of health;⁴⁹
- Funding public benefits navigators to assist community members with navigating and applying for available Federal, State, and local public benefits or services;
- Housing services to support healthy living environments and neighborhoods conducive to mental and physical wellness;
- Remediation of lead paint or other lead hazards to reduce risk of elevated blood lead levels among children; and
- Evidence-based community violence intervention programs to prevent violence and mitigate the increase in violence during the pandemic.⁵⁰

2. Responding to Negative Economic Impacts

Impacts on Households and Individuals. The public health emergency, including the necessary measures taken to protect public health, resulted in significant economic and financial hardship for many Americans. As businesses closed, consumers stayed home, schools shifted to remote

⁴⁹ The social determinants of health are the social and environmental conditions that affect health outcomes, specifically economic stability, health care access, social context, neighborhoods and built environment, and education access. See, e.g., U.S. Department of Health and Human Services, Office of Disease Prevention and Health Promotion, Healthy People 2030: Social Determinants of Health, <https://health.gov/healthypeople/objectives-and-data/social-determinants-health> (last visited Apr. 26, 2021).

J. of Emerg. Med.* 38(12): 2753-55 (Dec. 1, 2020), available at [https://www.ajemjournal.com/article/S0735-6757\(20\)30307-7/fulltext](https://www.ajemjournal.com/article/S0735-6757(20)30307-7/fulltext) (showing a spike in domestic violence).

education, and travel declined precipitously, over 20 million jobs were lost in March and April 2020.⁵¹

Although many have returned to work, as of April 2021, the economy remains 8.2 million jobs below its pre-pandemic peak,⁵² and more than 3 million workers have dropped out of the labor market altogether relative to February 2020.⁵³

Rates of unemployment are particularly severe among workers of color and workers with lower levels of educational attainment; for example, the overall unemployment rate in the United States was 6.1 percent in April 2021, but certain groups saw much higher rates: 9.7 percent for Black workers, 7.9 percent for Hispanic or Latino workers, and 9.3 percent for workers without a high school diploma.⁵⁴ Job losses have also been particularly steep among low wage workers, with these workers remaining furthest from recovery as of the end of 2020.⁵⁵ A severe recession—and its concentrated impact among low-income workers—has amplified food and housing insecurity, with an estimated nearly 17 million adults living in households where there is sometimes or often not enough food to eat and an estimated 10.7 million adults living in households that were not current on rent.⁵⁶ Over the course of the pandemic,

inequities also manifested along gender lines, as schools closed to in-person activities, leaving many working families without child care during the day.⁵⁷ Women of color have been hit especially hard: The labor force participation rate for Black women has fallen by 3.2 percentage points⁵⁸ during the pandemic as compared to 1.0 percentage points for Black men⁵⁹ and 2.0 percentage points for White women.⁶⁰

As the economy recovers, the effects of the pandemic-related recession may continue to impact households, including a risk of longer-term effects on earnings and economic potential. For example, unemployed workers, especially those who have experienced longer periods of unemployment, earn lower wages over the long term once rehired.⁶¹ In addition to the labor market consequences for unemployed workers, recessions can also cause longer-term economic challenges through, among other factors, damaged consumer credit scores⁶² and reduced familial and childhood wellbeing.⁶³

These potential long-term economic consequences underscore the continued need for robust policy support.

Impacts on Businesses. The pandemic has also severely impacted many businesses, with small businesses hit especially hard. Small businesses make up nearly half of U.S. private-sector employment⁶⁴ and play a key role in supporting the overall economic recovery as they are responsible for two-thirds of net new jobs.⁶⁵ Since the beginning of the pandemic, however, 400,000 small businesses have closed, with many more at risk.⁶⁶ Sectors with a large share of small business employment have been among those with the most drastic drops in employment.⁶⁷ The negative outlook for small businesses has continued: As of April 2021, approximately 70 percent of small businesses reported that the pandemic has had a moderate or large negative effect on their business, and over a third expect that it will take over 6 months for their business to return to their normal level of operations.⁶⁸

This negative outlook is likely the result of many small businesses having faced periods of closure and having seen declining revenues as customers stayed home.⁶⁹ In general, small businesses can face greater hurdles in accessing credit,⁷⁰ and many small businesses were already financially fragile at the outset of the pandemic.⁷¹ Non-profits, which provide vital services to communities, have similarly faced

⁵⁶ Center on Budget and Policy Priorities, Tracking the COVID-19 Recession's Effects on

economic and financial challenges due to the pandemic.⁷²

Impacts to State, Local, and Tribal Governments. State, local, and Tribal governments have felt substantial fiscal pressures. As noted above, State, local, and Tribal governments have faced significant revenue shortfalls and remain over 1 million jobs below their pre-pandemic staffing levels.⁷³ These reductions in staffing may undermine the ability to deliver services effectively, as well as add to the number of unemployed individuals in their jurisdictions.

Exacerbation of Pre-existing Disparities. The COVID-19 public health emergency may have lasting negative effects on economic outcomes, particularly in exacerbating disparities that existed prior to the pandemic.

The negative economic impacts of the COVID-19 pandemic are particularly pronounced in certain communities and families. Low- and moderate-income jobs make up a substantial portion of both total pandemic job losses,⁷⁴ and jobs that require in-person frontline work, which are exposed to greater risk of contracting COVID-19.⁷⁵ Both factors compound pre-existing vulnerabilities and the likelihood of food, housing, or other financial insecurity in low- and moderate-income families and, given the concentration of low- and moderate-income families within certain communities,⁷⁶ raise a substantial risk that the effects of the COVID-19 public health emergency will be amplified within these communities.

These compounding effect of recessions on concentrated poverty and the long-lasting nature of this effect were observed after the 2007–2009 recession, including a large increase in concentrated poverty with the number of people living in extremely poor

neighborhoods more than doubling by 2010–2014 relative to 2000.⁷⁷ Concentrated poverty has a range of deleterious impacts, including additional burdens on families and reduced economic potential and social cohesion.⁷⁸ Given the disproportionate impact of COVID-19 on low-income households discussed above, there is a risk that the current pandemic-induced recession could further increase concentrated poverty and cause long-term damage to economic prospects in neighborhoods of concentrated poverty.

The negative economic impacts of COVID-19 also include significant impacts to children in disproportionately affected families and include impacts to education, health, and welfare, all of which contribute to long-term economic outcomes.⁷⁹ Many low-income and minority students, who were disproportionately served by remote or hybrid education during the pandemic, lacked the resources to participate fully in remote schooling or live in households without adults available throughout the day to assist with online coursework.⁸⁰ Given these trends, the pandemic may widen educational disparities and worsen outcomes for low-income students,⁸¹ an

⁷⁷ Elizabeth Kneebone & Natalie Holmes, U.S. concentrated poverty in the wake of the Great Recession, Brookings Institution (Mar. 31, 2016), <https://www.brookings.edu/research/u-s-concentrated-poverty-in-the-wake-of-the-great-recession/>.

⁸⁰ See, e.g., Bacher-Hicks, *supra* note 14.

⁸¹ A Department of Education survey found that, as of February 2021, 42 percent of fourth grade students nationwide were offered only remote education, compared to 48 percent of economically disadvantaged students, 54 percent of Black students and 57 percent of Hispanic students. Large districts often disproportionately serve low-income students. See Institute of Education Sciences, Monthly School Survey Dashboard, <https://ies.ed.gov/schoolsurvey/> (last visited Apr. 26, 2021). In summer 2020, a review found that 74 percent of the largest 100 districts chose remote learning only.

effect that would substantially impact their long-term economic outcomes. Increased economic strain or material hardship due to the pandemic could also have a long-term impact on health, educational, and economic outcomes of young children.⁸² Evidence suggests that adverse conditions in early childhood, including exposure to poverty, food insecurity, housing insecurity, or other economic hardships, are particularly impactful.⁸³

The pandemic's disproportionate economic impacts are also seen in Tribal communities across the country—for Tribal governments as well as families and businesses on and off Tribal lands. In the early months of the pandemic, Native American unemployment spiked to 26 percent and, while partially recovered, remains at nearly 11 percent.⁸⁴ Tribal enterprises are a significant source of revenue for Tribal governments to support the provision of government services. These enterprises, notably concentrated in gaming, tourism, and hospitality, frequently closed, significantly reducing both revenues to Tribal governments and employment. As a result, Tribal governments have reduced essential services to their citizens and communities.⁸⁵

Eligible Uses. Sections 602(c)(1)(A) and 603(c)(1)(A) permit use of payments from the Fiscal Recovery Funds to respond to the negative economic impacts of the COVID-19 public health emergency. Eligible uses that respond to the negative economic impacts of the public health emergency must be designed to address an economic harm resulting from or exacerbated by the public health emergency. In considering whether a program or service would be

⁷⁶ Elizabeth Kneebone, The Changing geography of US poverty, Brookings Institution (Feb. 15, 2017), <https://www.brookings.edu/testimonies/the-changing-geography-of-us-poverty/>.

eligible under this category, the recipient should assess whether, and the extent to which, there has been an economic harm, such as loss of earnings or revenue, that resulted from the COVID-19 public health emergency and whether, and the extent to which, the use would respond or address this harm.⁸⁶ A recipient should first consider whether an economic harm exists and whether this harm was caused or made worse by the COVID-19 public health emergency. While economic impacts may either be immediate or delayed, assistance or aid to individuals or businesses that did not experience a negative economic impact from the public health emergency would not be an eligible use under this category.

In addition, the eligible use must “respond to” the identified negative economic impact. Responses must be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses. Where there has been a negative economic impact resulting from the public health emergency, States, local, and Tribal governments have broad latitude to choose whether and how to use the Fiscal Recovery Funds to respond to and address the negative economic impact. Sections 602(c)(1)(A) and 603(c)(1)(A) describe several types of uses that would be eligible under this category, including assistance to households, small businesses, and nonprofits and aid to impacted industries such as tourism, travel, and hospitality.

To facilitate implementation and use of payments from the Fiscal Recovery Funds, the interim final rule identifies a non-exclusive list of eligible uses of funding that respond to the negative economic impacts of the public health emergency. Consistent with the discussion above, the eligible uses listed below would respond directly to the economic or financial harms resulting from and/or exacerbated by the public health emergency.

- *Assistance to Unemployed Workers.* This includes assistance to unemployed workers, including services like job training to accelerate rehiring of unemployed workers; these services may extend to workers unemployed due to the pandemic or the resulting recession, or who were already unemployed when the pandemic began

and remain so due to the negative economic impacts of the pandemic.

- *State Unemployment Insurance Trust Funds.* Consistent with the approach taken in the CRF, recipients may make deposits into the state account of the Unemployment Trust Fund established under section 904 of the Social Security Act (42 U.S.C. 1104) up to the level needed to restore the pre-pandemic balances of such account as of January 27, 2020 or to pay back advances received under Title XII of the Social Security Act (42 U.S.C. 1321) for the payment of benefits between January 27, 2020 and May 17, 2021, given the close nexus between Unemployment Trust Fund costs, solvency of Unemployment Trust Fund systems, and pandemic economic impacts. Further, Unemployment Trust Fund deposits can decrease fiscal strain on Unemployment Insurance systems impacted by the pandemic. States facing a sharp increase in Unemployment Insurance claims during the pandemic may have drawn down positive Unemployment Trust Fund balances and, after exhausting the balance, required advances to fund continuing obligations to claimants. Because both of these impacts were driven directly by the need for assistance to unemployed workers during the pandemic, replenishing Unemployment Trust Funds up to the pre-pandemic level responds to the pandemic’s negative economic impacts on unemployed workers.

- *Assistance to Households.* Assistance to households or populations facing negative economic impacts due to COVID-19 is also an eligible use. This includes: Food assistance; rent, mortgage, or utility assistance; counseling and legal aid to prevent eviction or homelessness; cash assistance (discussed below); emergency assistance for burials, home repairs, weatherization, or other needs; internet access or digital literacy assistance; or job training to address negative economic or public health impacts experienced due to a worker’s occupation or level of training. As discussed above, in considering whether a potential use is eligible under this category, a recipient must consider whether, and the extent to which, the household has experienced a negative economic impact from the pandemic. In assessing whether a household or population experienced economic harm as a result of the pandemic, a recipient may presume that a household or population that experienced unemployment or increased food or housing insecurity or is low- or moderate-income experienced negative

economic impacts resulting from the pandemic. For example, a cash transfer program may focus on unemployed workers or low- and moderate-income families, which have faced disproportionate economic harms due to the pandemic. Cash transfers must be reasonably proportional to the negative economic impact they are intended to address. Cash transfers grossly in excess of the amount needed to address the negative economic impact identified by the recipient would not be considered to be a response to the COVID-19 public health emergency or its negative impacts. In particular, when considering the appropriate size of permissible cash transfers made in response to the COVID-19 public health emergency, State, local and Tribal governments may consider and take guidance from the per person amounts previously provided by the Federal Government in response to the COVID-19 crisis. Cash transfers that are grossly in excess of such amounts would be outside the scope of eligible uses under sections 602(c)(1)(A) and 603(c)(1)(A) and could be subject to recoupment. In addition, a recipient could provide survivor’s benefits to surviving family members of COVID-19 victims, or cash assistance to widows, widowers, and dependents of eligible COVID-19 victims.

- *Expenses to Improve Efficacy of Economic Relief Programs.* State, local, and Tribal governments may use payments from the Fiscal Recovery Funds to improve efficacy of programs addressing negative economic impacts, including through use of data analysis, targeted consumer outreach, improvements to data or technology infrastructure, and impact evaluations.

- *Small Businesses and Non-profits.* As discussed above, small businesses and non-profits faced significant challenges in covering payroll, mortgages or rent, and other operating costs as a result of the public health emergency and measures taken to contain the spread of the virus. State, local, and Tribal governments may provide assistance to small businesses to adopt safer operating procedures, weather periods of closure, or mitigate financial hardship resulting from the COVID-19 public health emergency, including:

- Loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure, for example by supporting payroll and benefits costs, costs to retain employees, mortgage, rent, or utilities costs, and other operating costs;
- Loans, grants, or in-kind assistance to implement COVID-19 prevention or mitigation tactics, such as physical

⁸⁶ In some cases, a use may be permissible under another eligible use category even if it falls outside the scope of section (c)(1)(A) of the Act.

plant changes to enable social distancing, enhanced cleaning efforts, barriers or partitions, or COVID-19 vaccination, testing, or contact tracing programs; and

- Technical assistance, counseling, or other services to assist with business planning needs.

As discussed above, these services should respond to the negative economic impacts of COVID-19. Recipients may consider additional criteria to target assistance to businesses in need, including small businesses. Such criteria may include businesses facing financial insecurity, substantial declines in gross receipts (e.g., comparable to measures used to assess eligibility for the Paycheck Protection Program), or other economic harm due to the pandemic, as well as businesses with less capacity to weather financial hardship, such as the smallest businesses, those with less access to credit, or those serving disadvantaged communities. Recipients should consider local economic conditions and business data when establishing such criteria.⁸⁷

- *Rehiring State, Local, and Tribal Government Staff.* State, local, and Tribal governments continue to see pandemic impacts in overall staffing levels: State, local, and Tribal government employment remains more than 1 million jobs lower in April 2021 than prior to the pandemic.⁸⁸ Employment losses decrease a state or local government's ability to effectively administer services. Thus, the interim final rule includes as an eligible use payroll, covered benefits, and other costs associated with rehiring public sector staff, up to the pre-pandemic staffing level of the government.

- *Aid to Impacted Industries.* Sections 602(c)(1)(A) and 603(c)(1)(A) recognize that certain industries, such as tourism, travel, and hospitality, were disproportionately and negatively impacted by the COVID-19 public health emergency. Aid provided to tourism, travel, and hospitality industries should respond to the negative economic impacts of the

pandemic on those and similarly impacted industries. For example, aid may include assistance to implement COVID-19 mitigation and infection prevention measures to enable safe resumption of tourism, travel, and hospitality services, for example, improvements to ventilation, physical barriers or partitions, signage to facilitate social distancing, provision of masks or personal protective equipment, or consultation with infection prevention professionals to develop safe reopening plans.

Aid may be considered responsive to the negative economic impacts of the pandemic if it supports businesses, attractions, business districts, and Tribal development districts operating prior to the pandemic and affected by required closures and other efforts to contain the pandemic. For example, a recipient may provide aid to support safe reopening of businesses in the tourism, travel, and hospitality industries and to business districts that were closed during the COVID-19 public health emergency, as well as aid for a planned expansion or upgrade of tourism, travel, and hospitality facilities delayed due to the pandemic.

When considering providing aid to industries other than tourism, travel, and hospitality, recipients should consider the extent of the economic impact as compared to tourism, travel, and hospitality, the industries enumerated in the statute. For example, on net, the leisure and hospitality industry has experienced an approximately 24 percent decline in revenue and approximately 17 percent decline in employment nationwide due to the COVID-19 public health emergency.⁸⁹ Recipients should also consider whether impacts were due to the COVID-19 pandemic, as opposed to longer-term economic or industrial trends unrelated to the pandemic.

To facilitate transparency and accountability, the interim final rule requires that State, local, and Tribal governments publicly report assistance provided to private-sector businesses under this eligible use, including

tourism, travel, hospitality, and other impacted industries, and its connection to negative economic impacts of the pandemic. Recipients also should maintain records to support their assessment of how businesses or business districts receiving assistance were affected by the negative economic impacts of the pandemic and how the aid provided responds to these impacts.

As discussed above, economic disparities that existed prior to the COVID-19 public health emergency amplified the impact of the pandemic among low-income and minority groups. These families were more likely to face housing, food, and financial insecurity; are over-represented among low-wage workers; and many have seen their livelihoods deteriorate further during the pandemic and economic contraction. In recognition of the disproportionate negative economic impacts on certain communities and populations, the interim final rule identifies services and programs that will be presumed to be responding to the negative economic impacts of the COVID-19 public health emergency when provided in these communities.

Specifically, Treasury will presume that certain types of services, outlined below, are eligible uses when provided in a QCT, to families and individuals living in QCTs, or when these services are provided by Tribal governments.⁹⁰ Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic. In identifying these disproportionately impacted communities, recipients should be able to support their determination that the pandemic resulted in disproportionate public health or economic outcomes to the specific populations, households, or geographic areas to be served. The interim final rule identifies a non-exclusive list of uses that address the disproportionate negative economic effects of the COVID-19 public health emergency, including:

- *Building Stronger Communities through Investments in Housing and Neighborhoods.* The economic impacts of COVID-19 have likely been most acute in lower-income neighborhoods, including concentrated areas of high unemployment, limited economic opportunity, and housing insecurity.⁹¹

Services in this category alleviate the immediate economic impacts of the COVID-19 pandemic on housing insecurity, while addressing conditions that contributed to poor public health and economic outcomes during the pandemic, namely concentrated areas with limited economic opportunity and inadequate or poor-quality housing.⁹² Eligible services include:

- Services to address homelessness such as supportive housing, and to improve access to stable, affordable housing among unhoused individuals;
- Affordable housing development to increase supply of affordable and high-quality living units; and
- Housing vouchers, residential counseling, or housing navigation assistance to facilitate household moves to neighborhoods with high levels of economic opportunity and mobility for low-income residents, to help residents increase their economic opportunity and reduce concentrated areas of low economic opportunity.⁹³

- *Addressing Educational Disparities.* As outlined above, school closures and the transition to remote education raised particular challenges for lower-income students, potentially exacerbating educational disparities, while increases in economic hardship among families could have long-lasting impacts on children's educational and economic prospects. Services under this prong would enhance educational supports to help mitigate impacts of the pandemic. Eligible services include:

- New, expanded, or enhanced early learning services, including pre-kindergarten, Head Start, or partnerships between pre-kindergarten programs and local education authorities, or administration of those services;
- Providing assistance to high-poverty school districts to advance equitable funding across districts and geographies;
- Evidence-based educational services and practices to address the academic needs of students, including tutoring, summer, afterschool, and other

persistent-urban-inequality-and-concentrated-poverty/.

⁹³ The Opportunity Atlas, <https://www.opportunityatlas.org/> (last visited Apr. 26, 2021); Raj Chetty & Nathaniel Hendren, The Impacts of Neighborhoods on Intergenerational Mobility I: Childhood Exposure Effects, Quarterly J. of Econ. 133(3):1107–162 (2018), available at <https://opportunityinsights.org/paper/neighborhoodsi/>.

⁹⁴ See supra notes 52 and 84.

extended learning and enrichment programs; and

- Evidence-based practices to address the social, emotional, and mental health needs of students;

- *Promoting Healthy Childhood Environments.* Children's economic and family circumstances have a long-term impact on their future economic outcomes.⁹⁴ Increases in economic hardship, material insecurity, and parental stress and behavioral health challenges all raise the risk of long-term harms to today's children due to the pandemic. Eligible services to address this challenge include:

- New or expanded high-quality childcare to provide safe and supportive care for children;

- Home visiting programs to provide structured visits from health, parent educators, and social service professionals to pregnant women or families with young children to offer education and assistance navigating resources for economic support, health needs, or child development; and

- Enhanced services for child welfare-involved families and foster youth to provide support and training on child development, positive parenting, coping skills, or recovery for mental health and substance use challenges.

State, local, and Tribal governments are encouraged to use payments from the Fiscal Recovery Funds to respond to the direct and immediate needs of the pandemic and its negative economic impacts and, in particular, the needs of households and businesses that were disproportionately and negatively impacted by the public health emergency. As highlighted above, low-income communities and workers and people of color have faced more severe health and economic outcomes during the pandemic, with pre-existing social vulnerabilities like low-wage or insecure employment, concentrated neighborhoods with less economic opportunity, and pre-existing health disparities likely contributing to the magnified impact of the pandemic. The Fiscal Recovery Funds provide resources to not only respond to the immediate harms of the pandemic but also to mitigate its longer-term impact in compounding the systemic public health and economic challenges of disproportionately impacted populations. Treasury encourages recipients to consider funding uses that foster a strong, inclusive, and equitable recovery, especially uses with long-term benefits for health and economic outcomes.

⁹⁴ See supra notes 52 and 84.

Uses Outside the Scope of this Category. Certain uses would not be within the scope of this eligible use category, although may be eligible under other eligible use categories. A general infrastructure project, for example, typically would not be included unless the project responded to a specific pandemic public health need (e.g., investments in facilities for the delivery of vaccines) or a specific negative economic impact like those described above (e.g., affordable housing in a QCT). The ARPA explicitly includes infrastructure if it is "necessary" and in water, sewer, or broadband. See Section II.D of this **SUPPLEMENTARY INFORMATION**. State, local, and Tribal governments also may use the Fiscal Recovery Funds under sections 602(c)(1)(C) or 603(c)(1)(C) to provide "government services" broadly to the extent of their reduction in revenue. See Section II.C of this **SUPPLEMENTARY INFORMATION**.

This category of eligible uses also would not include contributions to rainy day funds, financial reserves, or similar funds. Resources made available under this eligible use category are intended to help meet pandemic response needs and provide relief for households and businesses facing near- and long-term negative economic impacts. Contributions to rainy day funds and similar financial reserves would not address these needs or respond to the COVID-19 public health emergency but would rather constitute savings for future spending needs. Similarly, this eligible use category would not include payment of interest or principal on outstanding debt instruments, including, for example, short-term revenue or tax anticipation notes, or other debt service costs. As discussed below, payments from the Fiscal Recovery Funds are intended to be used prospectively and the interim final rule precludes use of these funds to cover the costs of debt incurred prior to March 3, 2021. Fees or issuance costs associated with the issuance of new debt would also not be covered using payments from the Fiscal Recovery Funds because such costs would not themselves have been incurred to address the needs of pandemic response or its negative economic impacts. The purpose of the Fiscal Recovery Funds is to provide fiscal relief that will permit State, local, and Tribal governments to continue to respond to the COVID-19 public health emergency.

For the same reasons, this category of eligible uses would not include satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring

plan in a judicial, administrative, or regulatory proceeding, except to the extent the judgment or settlement requires the provision of services that would respond to the COVID-19 public health emergency. That is, satisfaction of a settlement or judgment would not itself respond to COVID-19 with respect to the public health emergency or its negative economic impacts, unless the settlement requires the provision of services or aid that did directly respond to these needs, as described above.

In addition, as described in Section V.III of this **SUPPLEMENTARY INFORMATION**, Treasury will establish reporting and record keeping requirements for uses within this category, including enhanced reporting requirements for certain types of uses.

Question 1: Are there other types of services or costs that Treasury should consider as eligible uses to respond to the public health impacts of COVID-19? Describe how these respond to the COVID-19 public health emergency.

Question 2: The interim final rule permits coverage of payroll and benefits costs of public health and safety staff primarily dedicated to COVID-19 response, as well as rehiring of public sector staff up to pre-pandemic levels. For how long should these measures remain in place? What other measures or presumptions might Treasury consider to assess the extent to which public sector staff are engaged in COVID-19 response, and therefore reimbursable, in an easily-administrable manner?

Question 3: The interim final rule permits rehiring of public sector staff up to the government's pre-pandemic staffing level, which is measured based on employment as of January 27, 2020. Does this approach adequately measure the pre-pandemic staffing level in a manner that is both accurate and easily administrable? Why or why not?

Question 4: The interim final rule permits deposits to Unemployment Insurance Trust Funds, or using funds to pay back advances, up to the pre-pandemic balance. What, if any, conditions should be considered to ensure that funds repair economic impacts of the pandemic and strengthen unemployment insurance systems?

Question 5: Are there other types of services or costs that Treasury should consider as eligible uses to respond to the negative economic impacts of COVID-19? Describe how these respond to the COVID-19 public health emergency.

Question 6: What other measures, presumptions, or considerations could be used to assess "impacted industries"

affected by the COVID-19 public health emergency?

Question 7: What are the advantages and disadvantages of using Qualified Census Tracts and services provided by Tribal governments to delineate where a broader range of eligible uses are presumed to be responsive to the public health and economic impacts of COVID-19? What other measures might Treasury consider? Are there other populations or geographic areas that were disproportionately impacted by the pandemic that should be explicitly included?

Question 8: Are there other services or costs that Treasury should consider as eligible uses to respond to the disproportionate impacts of COVID-19 on low-income populations and communities? Describe how these respond to the COVID-19 public health emergency or its negative economic impacts, including its exacerbation of pre-existing challenges in these areas.

Question 9: The interim final rule includes eligible uses to support affordable housing and stronger neighborhoods in disproportionately-impacted communities. Discuss the advantages and disadvantages of explicitly including other uses to support affordable housing and stronger neighborhoods, including rehabilitation of blighted properties or demolition of abandoned or vacant properties. In what ways does, or does not, this potential use address public health or economic impacts of the pandemic? What considerations, if any, could support use of Fiscal Recovery Funds in ways that do not result in resident displacement or loss of affordable housing units?

B. Premium Pay

Fiscal Recovery Funds payments may be used by recipients to provide premium pay to eligible workers performing essential work during the COVID-19 public health emergency or to provide grants to third-party employers with eligible workers performing essential work.⁹⁵ These are workers who have been and continue to be relied on to maintain continuity of operations of essential critical infrastructure sectors, including those who are critical to protecting the health and wellbeing of their communities.

Since the start of the COVID-19 public health emergency in January 2020, essential workers have put their physical wellbeing at risk to meet the daily needs of their communities and to provide care for others. In the course of this work, many essential workers have

contracted or died of COVID-19.⁹⁶ Several examples reflect the severity of the health impacts for essential workers. Meat processing plants became "hotspots" for transmission, with 700 new cases reported at a single plant on a single day in May 2020.⁹⁷ In New York City, 120 employees of the Metropolitan Transit Authority were estimated to have died due to COVID-19 by mid-May 2020, with nearly 4,000 testing positive for the virus.⁹⁸ Furthermore, many essential workers are people of color or low-wage workers.⁹⁹ These workers, in particular, have borne a disproportionate share of the health and economic impacts of the pandemic. Such workers include:

- Staff at nursing homes, hospitals, and home care settings;
- Workers at farms, food production facilities, grocery stores, and restaurants;
- Janitors and sanitation workers;
- Truck drivers, transit staff, and warehouse workers;
- Public health and safety staff;
- Childcare workers, educators, and other school staff; and
- Social service and human services staff.

During the public health emergency, employers' policies on COVID-19-related hazard pay have varied widely, with many essential workers not yet compensated for the heightened risks they have faced and continue to face.¹⁰⁰

Rogers et al., Racial Disparities in COVID-19 Mortality Among Essential Workers in the United States, *World Med. & Health policy* 12(3):311–27 (Aug. 5, 2020), available at <https://onlinelibrary.wiley.com/doi/full/10.1002/wmh.3.358> (finding that vulnerability to coronavirus exposure was increased among non-Hispanic blacks, who disproportionately occupied the top nine essential occupations).

¹⁰⁰ Economic Policy Institute, Only 30% of those working outside their home are receiving hazard pay (June 16, 2020), <https://www.epi.org/press/only-30-of-those-working-outside-their-home-are-receiving-hazard-pay-black-and-hispanic-workers-are-most-concerned-about-bringing-the-coronavirus-home/>.

⁹⁵ Sections 602(c)(1)(B), 603(c)(1)(B) of the Act.

Many of these workers earn lower wages on average and live in socioeconomically vulnerable communities as compared to the general population.¹⁰¹ A recent study found that 25 percent of essential workers were estimated to have low household income, with 13 percent in high-risk households.¹⁰² The low pay of many essential workers makes them less able to cope with the financial consequences of the pandemic or their work-related health risks, including working hours lost due to sickness or disruptions to childcare and other daily routines, or the likelihood of COVID-19 spread in their households or communities. Thus, the threats and costs involved with maintaining the ongoing operation of vital facilities and services have been, and continue to be, borne by those that are often the most vulnerable to the pandemic. The added health risk to essential workers is one prominent way in which the pandemic has amplified pre-existing socioeconomic inequities.

The Fiscal Recovery Funds will help respond to the needs of essential workers by allowing recipients to remunerate essential workers for the elevated health risks they have faced and continue to face during the public health emergency. To ensure that premium pay is targeted to workers that faced or face heightened risks due to the character of their work, the interim final rule defines essential work as work involving regular in-person interactions or regular physical handling of items that were also handled by others. A worker would not be engaged in essential work and, accordingly may not receive premium pay, for telework performed from a residence.

Sections 602(g)(2) and 603(g)(2) define eligible worker to mean “those workers needed to maintain continuity of operations of essential critical infrastructure sectors and additional sectors as each Governor of a State or territory, or each Tribal government, may designate as critical to protect the health and well-being of the residents of their State, territory, or Tribal government.”¹⁰³ The rule incorporates this definition and provides a list of industries recognized as essential critical infrastructure sectors.¹⁰⁴ These sectors include healthcare, public health and safety, childcare, education, sanitation, transportation, and food production and services, among others

as noted above. As provided under sections 602(g)(2) and 603(g)(2), the chief executive of each recipient has discretion to add additional sectors to this list, so long as additional sectors are deemed critical to protect the health and well-being of residents.

In providing premium pay to essential workers or grants to eligible employers, a recipient must consider whether the pay or grant would “respond to” to the worker or workers performing essential work. Premium pay or grants provided under this section respond to workers performing essential work if it addresses the heightened risk to workers who must be physically present at a jobsite and, for many of whom, the costs associated with illness were hardest to bear financially. Many of the workers performing critical essential services are low- or moderate-income workers, such as those described above. The ARPA recognizes this by defining premium pay to mean an amount up to \$13 per hour in addition to wages or remuneration the worker otherwise receives and in an aggregate amount not to exceed \$25,000 per eligible worker. To ensure the provision is implemented in a manner that compensates these workers, the interim final rule provides that any premium pay or grants provided using the Fiscal Recovery Funds should prioritize compensation of those lower income eligible workers that perform essential work.

As such, providing premium pay to eligible workers responds to such workers by helping address the disparity between the critical services and risks taken by essential workers and the relatively low compensation they tend to receive in exchange. If premium pay would increase a worker’s total pay above 150 percent of their residing state’s average annual wage for all occupations, as defined by the Bureau of Labor Statistics’ Occupational Employment and Wage Statistics, or their residing county’s average annual wage, as defined by the Bureau of Labor Statistics’ Occupational Employment and Wage Statistics, whichever is higher, on an annual basis, the State, local, or Tribal government must provide Treasury and make publicly available, whether for themselves or on behalf of a grantee, a written justification of how the premium pay or grant is responsive to workers performing essential worker during the public health emergency.¹⁰⁵

The threshold of 150 percent for requiring additional written justification is based on an analysis of the distribution of labor income for a sample of 20 occupations that generally correspond to the essential workers as defined in the interim final rule.¹⁰⁶ For these occupations, labor income for the vast majority of workers was under 150 percent of average annual labor income across all occupations. Treasury anticipates that the threshold of 150 percent of the annual average wage will be greater than the annual average wage of the vast majority of eligible workers performing essential work. These enhanced reporting requirements help to ensure grants are directed to essential workers in critical infrastructure sectors and responsive to the impacts of the pandemic observed among essential workers, namely the mis-alignment between health risks and compensation. Enhanced reporting also provides transparency to the public. Finally, using a localized measure reflects differences in wages and cost of living across the country, making this standard administrable and reflective of essential worker incomes across a diverse range of geographic areas.

Furthermore, because premium pay is intended to compensate essential workers for heightened risk due to COVID-19, it must be entirely additive to a worker’s regular rate of wages and other remuneration and may not be used to reduce or substitute for a worker’s normal earnings. The definition of premium pay also clarifies that premium pay may be provided retrospectively for work performed at any time since the start of the COVID-19 public health emergency, where those workers have yet to be compensated adequately for work previously performed.¹⁰⁷ Treasury encourages recipients to prioritize providing retrospective premium pay where possible, recognizing that many essential workers have not yet received additional compensation for work conducted over the course of many

of Labor Statistics, May 2020 Metropolitan and Nonmetropolitan Area Estimates listed by county or town, https://www.bls.gov/oes/current/county_links.htm (last visited May 1, 2021).

¹⁰⁶ Treasury performed this analysis with data from the U.S. Census Bureau’s 2019 Annual Social and Economic Supplement. In determining which occupations to include in this analysis, Treasury excluded management and supervisory positions, as such positions may not necessarily involve regular in-person interactions or physical handling of items to the same extent as non-managerial positions.

¹⁰⁷ However, such compensation must be “in addition to” remuneration or wages already received. That is, employers may not reduce such workers’ current pay and use Fiscal Recovery Funds to compensate themselves for premium pay previously provided to the worker.

¹⁰¹ McCormack, *supra* note 37.

¹⁰² *Id.*

¹⁰³ Sections 602(g)(2), 603(g)(2) of the Act.

¹⁰⁴ The list of critical infrastructure sectors provided in the interim final rule is based on the list of essential workers under The Heroes Act, H.R. 6800, 116th Cong. (2020).

¹⁰⁵ County median annual wage is taken to be that of the metropolitan or nonmetropolitan area that includes the county. See U.S. Bureau of Labor Statistics, State Occupational Employment and Wage Estimates, <https://www.bls.gov/oes/current/oesrscst.htm> (last visited May 1, 2021); U.S. Bureau

months. Essential workers who have already earned premium pay for essential work performed during the COVID-19 public health emergency remain eligible for additional payments, and an essential worker may receive both retrospective premium pay for prior work as well as prospective premium pay for current or ongoing work.

To ensure any grants respond to the needs of essential workers and are made in a fair and transparent manner, the rule imposes some additional reporting requirements for grants to third-party employers, including the public disclosure of grants provided. See Section VIII of this **SUPPLEMENTARY INFORMATION**, discussing reporting requirements. In responding to the needs of essential workers, a grant to an employer may provide premium pay to eligible workers performing essential work, as these terms are defined in the interim final rule and discussed above. A grant provided to an employer may also be for essential work performed by eligible workers pursuant to a contract. For example, if a municipality contracts with a third party to perform sanitation work, the third-party contractor could be eligible to receive a grant to provide premium pay for these eligible workers.

Question 10: Are there additional sectors beyond those listed in the interim final rule that should be considered essential critical infrastructure sectors?

Question 11: What, if any, additional criteria should Treasury consider to ensure that premium pay responds to essential workers?

Question 12: What consideration, if any, should be given to the criteria on salary threshold, including measure and level, for requiring written justification?

C. Revenue Loss

Recipients may use payments from the Fiscal Recovery Funds for the provision of government services to the extent of the reduction in revenue experienced due to the COVID-19 public health emergency.¹⁰⁸ Pursuant to sections 602(c)(1)(C) and 603(c)(1)(C) of the Act, a recipient's reduction in revenue is measured relative to the revenue collected in the most recent full fiscal year prior to the emergency.

Many State, local, and Tribal governments are experiencing significant budget shortfalls, which can have a devastating impact on communities. State government tax revenue from major sources were down 4.3 percent in the six months ended September 2020, relative to the same

period 2019.¹⁰⁹ At the local level, nearly 90 percent of cities have reported being less able to meet the fiscal needs of their communities and, on average, cities expect a double-digit decline in general fund revenues in their fiscal year 2021.¹¹⁰ Similarly, surveys of Tribal governments and Tribal enterprises found majorities of respondents reporting substantial cost increases and revenue decreases, with Tribal governments reporting reductions in healthcare, housing, social services, and economic development activities as a result of reduced revenues.¹¹¹ These budget shortfalls are particularly problematic in the current environment, as State, local, and Tribal governments work to mitigate and contain the COVID-19 pandemic and help citizens weather the economic downturn.

Further, State, local, and Tribal government budgets affect the broader economic recovery. During the period following the 2007-2009 recession, State and local government budget pressures led to fiscal austerity that was a significant drag on the overall economic recovery.¹¹² Inflation-adjusted State and local government revenue did not return to the previous peak until 2013,¹¹³ while State, local, and Tribal government employment did not recover to its prior peak for over a decade, until August 2019—just a few months before the COVID-19 public health emergency began.¹¹⁴

¹⁰⁹ Major sources include personal income tax, corporate income tax, sales tax, and property tax. See Lucy Dadayan, States Reported Revenue Growth in July-September Quarter, Reflecting Revenue Shifts from the Prior Quarter, State Tax and Econ. Rev. (Q. 3, 2020), available at https://www.urban.org/sites/default/files/publication/103938/state-tax-and-economic-review-2020-q3_0.pdf.

¹¹³ State and local government general revenue from own sources, adjusted for inflation using the GDP price index. U.S. Census Bureau, Annual Survey of State Government Finances and U.S. Bureau of Economic Analysis, National Income and Product Accounts.

¹¹⁴ U.S. Bureau of Labor Statistics, All Employees, State Government [CES9092000001] and All Employees, Local Government [CES9093000001],

Sections 602(c)(1)(C) and 603(c)(1)(C) of the Act allow recipients facing budget shortfalls to use payments from the Fiscal Recovery Funds to avoid cuts to government services and, thus, enable State, local, and Tribal governments to continue to provide valuable services and ensure that fiscal austerity measures do not hamper the broader economic recovery. The interim final rule implements these provisions by establishing a definition of “general revenue” for purposes of calculating a loss in revenue and by providing a methodology for calculating revenue lost due to the COVID-19 public health emergency.

General Revenue. The interim final rule adopts a definition of “general revenue” based largely on the components reported under “General Revenue from Own Sources” in the Census Bureau’s Annual Survey of State and Local Government Finances, and for purposes of this interim final rule, helps to ensure that the components of general revenue would be calculated in a consistent manner.¹¹⁵ By relying on a methodology that is both familiar and comprehensive, this approach minimizes burden to recipients and provides consistency in the measurement of general revenue across a diverse set of recipients.

The interim final rule defines the term “general revenue” to include revenues collected by a recipient and generated from its underlying economy and would capture a range of different types of tax revenues, as well as other types of revenue that are available to support government services.¹¹⁶ In calculating revenue, recipients should sum across all revenue streams covered as general revenue. This approach minimizes the administrative burden for recipients, provides for greater consistency across recipients, and presents a more accurate representation of the overall impact of

retrieved from FRED, Federal Reserve Bank of St. Louis, <https://fred.stlouisfed.org/series/CES9092000001> and <https://fred.stlouisfed.org/series/CES9093000001> (last visited Apr. 27, 2021).

¹¹⁵ U.S. Census Bureau, Annual Survey of State and Local Government Finances, <https://www.census.gov/programs-surveys/gov-finances.html> (last visited Apr. 30, 2021).

¹¹⁶ The interim final rule would define tax revenue in a manner consistent with the Census Bureau’s definition of tax revenue, with certain changes (*i.e.*, inclusion of revenue from liquor stores and certain intergovernmental transfers). Current charges are defined as “charges imposed for providing current services or for the sale of products in connection with general government activities.” It includes revenues such as public education institution, public hospital, and toll revenues. Miscellaneous general revenue comprises of all other general revenue of governments from their own sources (*i.e.*, other than liquor store, utility, and insurance trust revenue), including rents, royalties, lottery proceeds, and fines.

¹⁰⁸ ARPA, *supra* note 16.

the COVID-19 public health emergency on a recipient's revenue, rather than relying on financial reporting prepared by each recipient, which vary in methodology used and which generally aggregates revenue by purpose rather than by source.¹¹⁷

Consistent with the Census Bureau's definition of "general revenue from own sources," the definition of general revenue in the interim final rule would exclude refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, and agency or private trust transactions. The definition of general revenue also would exclude revenue generated by utilities and insurance trusts. In this way, the definition of general revenue focuses on sources that are generated from economic activity and are available to fund government services, rather than a fund or administrative unit established to account for and control a particular activity.¹¹⁸ For example, public utilities typically require financial support from the State, local, or Tribal government, rather than providing revenue to such government, and any revenue that is generated by public utilities typically is used to support the public utility's continued operation, rather than being used as a source of revenue to support government services generally.

The definition of general revenue would include all revenue from Tribal enterprises, as this revenue is generated from economic activity and is available to fund government services. Tribes are not able to generate revenue through taxes in the same manner as State and local governments and, as a result, Tribal enterprises are critical sources of revenue for Tribal governments that enable Tribal governments to provide a range of services, including elder care, health clinics, wastewater management, and forestry.

Finally, the term "general revenue" includes intergovernmental transfers between State and local governments, but excludes intergovernmental transfers from the Federal Government, including Federal transfers made via a State to a local government pursuant to the CRF or as part of the Fiscal Recovery Funds. States and local governments often share or collect revenue on behalf of one another, which results in

intergovernmental transfers. When attributing revenue to a unit of government, the Census Bureau's methodology considers which unit of government imposes, collects, and retains the revenue and assigns the revenue to the unit of government that meets at least two of those three factors.¹¹⁹ For purposes of measuring loss in general revenue due to the COVID-19 public health emergency and to better allow continued provision of government services, the retention and ability to use the revenue is a more critical factor. Accordingly, and to better measure the funds available for the provision of government services, the definition of general revenue would include intergovernmental transfers from States or local governments other than funds transferred pursuant to ARPA, CRF, or another Federal program. This formulation recognizes the importance of State transfers for local government revenue.¹²⁰

Calculation of Loss. In general, recipients will compute the extent of the reduction in revenue by comparing actual revenue to a counterfactual trend representing what could have been expected to occur in the absence of the pandemic. This approach measures losses in revenue relative to the most recent fiscal year prior to the COVID-19 public health emergency by using the most recent pre-pandemic fiscal year as the starting point for estimates of revenue growth absent the pandemic. In other words, the counterfactual trend starts with the last full fiscal year prior to the COVID-19 public health emergency and then assumes growth at a constant rate in the subsequent years. Because recipients can estimate the revenue shortfall at multiple points in time throughout the covered period as revenue is collected, this approach accounts for variation across recipients in the timing of pandemic impacts.¹²¹ Although revenue may decline for

reasons unrelated to the COVID-19 public health emergency, to minimize the administrative burden on recipients and taking into consideration the devastating effects of the COVID-19 public health emergency, any diminution in actual revenues relative to the counterfactual pre-pandemic trend would be presumed to have been due to the COVID-19 public health emergency.

For purposes of measuring revenue growth in the counterfactual trend, recipients may use a *growth adjustment* of either 4.1 percent per year or the recipient's average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency, whichever is higher. The option of 4.1 percent represents the average annual growth across all State and local government "General Revenue from Own Sources" in the most recent three years of available data.¹²² This approach provides recipients with a standardized growth adjustment when calculating the counterfactual revenue trend and thus minimizes administrative burden, while not disadvantaging recipients with revenue growth that exceeded the national average prior to the COVID-19 public health emergency by permitting these recipients to use their own revenue growth rate over the preceding three years.

Recipients should calculate the extent of the reduction in revenue as of four points in time: December 31, 2020; December 31, 2021; December 31, 2022; and December 31, 2023. To calculate the extent of the reduction in revenue at each of these dates, recipients should follow a four-step process:

- *Step 1:* Identify revenues collected in the most recent full fiscal year prior to the public health emergency (*i.e.*, last full fiscal year before January 27, 2020), called the *base year revenue*.
- *Step 2:* Estimate *counterfactual revenue*, which is equal to *base year revenue* * $[(1 + \text{growth adjustment})^n]$, where *n* is the number of months elapsed since the end of the base year to the calculation date, and *growth adjustment* is the greater of 4.1 percent and the recipient's average annual revenue growth in the three full fiscal

¹¹⁷ Fund-oriented reporting, such as what is used under the Governmental Accounting Standards Board (GASB), focuses on the types of uses and activities funded by the revenue, as opposed to the economic activity from which the revenue is sourced. See Governmental Accounting Standards Series, Statement No. 54 of the Governmental Accounting Standards Board: Fund Balance Reporting and Governmental Fund Type Definitions, No. 287-B (Feb. 2009).

¹¹⁹ U.S. Census Bureau, Government Finance and Employment Classification Manual (Dec. 2000), <https://www2.census.gov/govs/class/classfull.pdf>.

¹²⁰ For example, in 2018, state transfers to localities accounted for approximately 27 percent of local revenues. U.S. Census Bureau, Annual Survey of State and Local Government Finances, Table 1 (2018), <https://www.census.gov/data/datasets/2018/econ/local/public-use-datasets.html>.

¹²¹ For example, following the 2007-09 recession, local government property tax collections did not begin to decline until 2011, suggesting that property tax collection declines can lag downturns. See U.S. Bureau of Economic Analysis, Personal current taxes: State and local: Property taxes [S210401A027NBEA], retrieved from Federal Reserve Economic Data, Federal Reserve Bank of St. Louis, <https://fred.stlouisfed.org/graph/?g=r3YI> (last visited Apr. 22, 2021). Estimating the reduction in revenue at points throughout the covered period will allow for this type of lagged effect to be taken into account during the covered period.

¹²² Together with revenue from liquor stores from 2015 to 2018. This estimate does not include any intergovernmental transfers. A recipient using the three-year average to calculate their growth adjustment must be based on the definition of general revenue, including treatment of intergovernmental transfers. 2015-2018 represents the most recent available data. See U.S. Census Bureau, State & Local Government Finance Historical Datasets and Tables (2018), <https://www.census.gov/programs-surveys/gov-finances/data/datasets.html>.

years prior to the COVID-19 public health emergency.

- *Step 3:* Identify *actual revenue*, which equals revenues collected over the past twelve months as of the calculation date.

- *Step 4:* The extent of the reduction in revenue is equal to *counterfactual*

revenue less actual revenue. If actual revenue exceeds counterfactual revenue, the extent of the reduction in revenue is set to zero for that calculation date.

For illustration, consider a hypothetical recipient with *base year revenue* equal to 100. In Step 2, the hypothetical recipient finds that 4.1

percent is greater than the recipient's average annual revenue growth in the three full fiscal years prior to the public health emergency. Furthermore, this recipient's base year ends June 30. In this illustration, *n* (months elapsed) and *counterfactual revenue* would be equal to:

As of:	12/31/2020	12/31/2021	12/31/2022	12/31/2023
<i>n</i> (months elapsed)	18	30	42	54
<i>Counterfactual revenue:</i>	106.2	110.6	115.1	119.8

The overall methodology for calculating the reduction in revenue is illustrated in the figure below:

Upon receiving Fiscal Recovery Fund payments, recipients may immediately calculate revenue loss for the period ending December 31, 2020.

Sections 602(c)(1)(C) and 603(c)(1)(C) of the Act provide recipients with broad latitude to use the Fiscal Recovery Funds for the provision of government services. Government services can include, but are not limited to, maintenance or pay-go funded building¹²³ of infrastructure, including roads; modernization of cybersecurity, including hardware, software, and protection of critical infrastructure; health services; environmental remediation; school or educational services; and the provision of police, fire, and other public safety services. However, expenses associated with obligations under instruments evidencing financial indebtedness for

borrowed money would not be considered the provision of government services, as these financing expenses do not directly provide services or aid to citizens. Specifically, government services would not include interest or principal on any outstanding debt instrument, including, for example, short-term revenue or tax anticipation notes, or fees or issuance costs associated with the issuance of new debt. For the same reasons, government services would not include satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring in a judicial, administrative, or regulatory proceeding, except if the judgment or settlement required the provision of government services. That is, satisfaction of a settlement or judgment itself is not a government service, unless the settlement required the provision of government services. In addition, replenishing financial reserves (e.g., rainy day or other reserve funds) would

not be considered provision of a government service, since such expenses do not directly relate to the provision of government services.

Question 13: Are there sources of revenue that either should or should not be included in the interim final rule's measure of "general revenue" for recipients? If so, discuss why these sources either should or should not be included.

Question 14: In the interim final rule, recipients are expected to calculate the reduction in revenue on an aggregate basis. Discuss the advantages and disadvantages of, and any potential concerns with, this approach, including circumstances in which it could be necessary or appropriate to calculate the reduction in revenue by source.

Question 15: Treasury is considering whether to take into account other factors, including actions taken by the recipient as well as the expiration of the COVID-19 public health emergency, in determining whether to presume that revenue losses are "due to" the COVID-

¹²³ Pay-go infrastructure funding refers to the practice of funding capital projects with cash-on-hand from taxes, fees, grants, and other sources, rather than with borrowed sums.

19 public health emergency. Discuss the advantages and disadvantages of this presumption, including when, if ever, during the covered period it would be appropriate to reevaluate the presumption that all losses are attributable to the COVID-19 public health emergency.

Question 16: Do recipients anticipate lagged revenue effects of the public health emergency? If so, when would these lagged effects be expected to occur, and what can Treasury do to support these recipients through its implementation of the program?

Question 17: In the interim final rule, paying interest or principal on government debt is not considered provision of a government service. Discuss the advantages and disadvantages of this approach, including circumstances in which paying interest or principal on government debt could be considered provision of a government service.

D. Investments in Infrastructure

To assist in meeting the critical need for investments and improvements to existing infrastructure in water, sewer, and broadband, the Fiscal Recovery Funds provide funds to State, local, and Tribal governments to make necessary investments in these sectors. The interim final rule outlines eligible uses within each category, allowing for a broad range of necessary investments in projects that improve access to clean drinking water, improve wastewater and stormwater infrastructure systems, and provide access to high-quality broadband service. Necessary investments are designed to provide an adequate minimum level of service and are unlikely to be made using private sources of funds. Necessary investments include projects that are required to maintain a level of service that, at least, meets applicable health-based standards, taking into account resilience to climate change, or establishes or improves broadband service to unserved or underserved populations to reach an adequate level to permit a household to work or attend school, and that are unlikely to be met with private sources of funds.¹²⁴

It is important that necessary investments in water, sewer, or broadband infrastructure be carried out in ways that produce high-quality infrastructure, avert disruptive and costly delays, and promote efficiency. Treasury encourages recipients to

ensure that water, sewer, and broadband projects use strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions, not only to promote effective and efficient delivery of high-quality infrastructure projects but also to support the economic recovery through strong employment opportunities for workers. Using these practices in construction projects may help to ensure a reliable supply of skilled labor that would minimize disruptions, such as those associated with labor disputes or workplace injuries.

To provide public transparency on whether projects are using practices that promote on-time and on-budget delivery, Treasury will seek information from recipients on their workforce plans and practices related to water, sewer, and broadband projects undertaken with Fiscal Recovery Funds. Treasury will provide additional guidance and instructions on the reporting requirements at a later date.

1. Water and Sewer Infrastructure

The ARPA provides funds to State, local, and Tribal governments to make necessary investments in water and sewer infrastructure.¹²⁵ By permitting funds to be used for water and sewer infrastructure needs, Congress recognized the critical role that clean drinking water and services for the collection and treatment of wastewater and stormwater play in protecting public health. Understanding that State, local, and Tribal governments have a broad range of water and sewer infrastructure needs, the interim final rule provides these governments with wide latitude to identify investments in water and sewer infrastructure that are of the highest priority for their own communities, which may include projects on privately-owned infrastructure. The interim final rule does this by aligning eligible uses of the Fiscal Recovery Funds with the wide range of types or categories of projects that would be eligible to receive financial assistance through the Environmental Protection Agency's (EPA) Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF).¹²⁶

¹²⁵ Sections 602(c)(1)(D), 603(c)(1)(D) of the Act.

¹²⁶ Environmental Protection Agency, Drinking Water State Revolving fund, <https://www.epa.gov/dwsrf> (last visited Apr. 30, 2021); Environmental Protection Agency, Clean Water State Revolving Fund, <https://www.epa.gov/cwsrf> (last visited Apr. 30, 2021).

Established by the 1987 amendments¹²⁷ to the Clean Water Act (CWA),¹²⁸ the CWSRF provides financial assistance for a wide range of water infrastructure projects to improve water quality and address water pollution in a way that enables each State to address and prioritize the needs of their populations. The types of projects eligible for CWSRF assistance include projects to construct, improve, and repair wastewater treatment plants, control non-point sources of pollution, improve resilience of infrastructure to severe weather events, create green infrastructure, and protect waterbodies from pollution.¹²⁹ Each of the 51 State programs established under the CWSRF have the flexibility to direct funding to their particular environmental needs, and each State may also have its own statutes, rules, and regulations that guide project eligibility.¹³⁰

The DWSRF was modeled on the CWSRF and created as part of the 1996 amendments to the Safe Drinking Water Act (SDWA),¹³¹ with the principal objective of helping public water systems obtain financing for improvements necessary to protect public health and comply with drinking water regulations.¹³² Like the CWSRF,

¹²⁷ Water Quality Act of 1987, Public Law 100-4.

¹²⁸ Federal Water Pollution Control Act as amended, codified at 33 U.S.C. 1251 *et seq.*, common name (Clean Water Act). In 2009, the American Recovery and Reinvestment Act created the Green Project Reserve, which increased the focus on green infrastructure, water and energy efficient, and environmentally innovative projects. Public Law 111-5. The CWA was amended by the Water Resources Reform and Development Act of 2014 to further expand the CWSRF's eligibilities. Public Law 113-121. *The CWSRF's eligibilities were further expanded in 2018 by the America's Water Infrastructure Act of 2018, Public Law 115-270.*

¹³¹ 42 U.S.C. 300j-12.

¹³² Environmental Protection Agency, *Drinking Water State Revolving Fund Eligibility Handbook*, (June 2017), https://www.epa.gov/sites/production/files/2017-06/documents/dwsrf_eligibility_handbook_june_13_2017_updated_508_version.pdf; Environmental Protection Agency, *Drinking Water*

¹²⁴ Treasury notes that using funds to support or oppose collective bargaining would not be included as part of "necessary investments in water, sewer, or broadband infrastructure."

the DWSRF provides States with the flexibility to meet the needs of their populations.¹³³ The primary use of DWSRF funds is to assist communities in making water infrastructure capital improvements, including the installation and replacement of failing treatment and distribution systems.¹³⁴ In administering these programs, States must give priority to projects that ensure compliance with applicable health and environmental safety requirements; address the most serious risks to human health; and assist systems most in need on a per household basis according to State affordability criteria.¹³⁵

By aligning use of Fiscal Recovery Funds with the categories or types of eligible projects under the existing EPA state revolving fund programs, the interim final rule provides recipients with the flexibility to respond to the needs of their communities while ensuring that investments in water and sewer infrastructure made using Fiscal Recovery Funds are necessary. As discussed above, the CWSRF and DWSRF were designed to provide funding for projects that protect public health and safety by ensuring compliance with wastewater and drinking water health standards.¹³⁶ The need to provide funding through the state revolving funds suggests that these projects are less likely to be addressed with private sources of funding; for example, by remediating failing or inadequate infrastructure, much of which is publicly owned, and by addressing non-point sources of pollution. This approach of aligning with the EPA state revolving fund programs also supports expedited project identification and investment so that needed relief for the people and communities most affected by the pandemic can be deployed expeditiously and have a positive impact on their health and wellbeing as soon as possible. Further, the interim final rule is intended to preserve flexibility for award recipients to direct funding to their own particular needs and priorities and would not preclude recipients from applying their own additional project eligibility criteria.

In addition, responding to the immediate needs of the COVID-19 public health emergency may have diverted both personnel and financial resources from other State, local, and Tribal priorities, including projects to ensure compliance with applicable water health and quality standards and provide safe drinking and usable water.¹³⁷ Through sections 602(c)(1)(D) and 603(c)(1)(D), the ARPA provides resources to address these needs. Moreover, using Fiscal Recovery Funds in accordance with the priorities of the CWA and SWDA to “assist systems most in need on a per household basis according to state affordability criteria” would also have the benefit of providing vulnerable populations with safe drinking water that is critical to their health and, thus, their ability to work and learn.¹³⁸

Recipients may use Fiscal Recovery Funds to invest in a broad range of projects that improve drinking water infrastructure, such as building or upgrading facilities and transmission, distribution, and storage systems, including replacement of lead service lines. Given the lifelong impacts of lead exposure for children, and the widespread nature of lead service lines, Treasury encourages recipients to consider projects to replace lead service lines.

Fiscal Recovery Funds may also be used to support the consolidation or establishment of drinking water systems. With respect to wastewater infrastructure, recipients may use Fiscal Recovery Funds to construct publicly owned treatment infrastructure, manage and treat stormwater or subsurface drainage water, facilitate water reuse, and secure publicly owned treatment works, among other uses. Finally, consistent with the CWSRF and DWSRF, Fiscal Recovery Funds may be used for cybersecurity needs to protect water or sewer infrastructure, such as developing effective cybersecurity practices and measures at drinking water systems and publicly owned treatment works.

Many of the types of projects eligible under either the CWSRF or DWSRF also

support efforts to address climate change. For example, by taking steps to manage potential sources of pollution and preventing these sources from reaching sources of drinking water, projects eligible under the DWSRF and the ARPA may reduce energy required to treat drinking water. Similarly, projects eligible under the CWSRF include measures to conserve and reuse water or reduce the energy consumption of public water treatment facilities. Treasury encourages recipients to consider green infrastructure investments and projects to improve resilience to the effects of climate change. For example, more frequent and extreme precipitation events combined with construction and development trends have led to increased instances of stormwater runoff, water pollution, and flooding. Green infrastructure projects that support stormwater system resiliency could include rain gardens that provide water storage and filtration benefits, and green streets, where vegetation, soil, and engineered systems are combined to direct and filter rainwater from impervious surfaces. In cases of a natural disaster, recipients may also use Fiscal Recovery Funds to provide relief, such as interconnecting water systems or rehabilitating existing wells during an extended drought.

Question 18: What are the advantages and disadvantages of aligning eligible uses with the eligible project type requirements of the DWSRF and CWSRF? What other water or sewer project categories, if any, should Treasury consider in addition to DWSRF and CWSRF eligible projects? Should Treasury consider a broader general category of water and sewer projects?

Question 19: What additional water and sewer infrastructure categories, if any, should Treasury consider to address and respond to the needs of unserved, underserved, or rural communities? How do these projects differ from DWSRF and CWSRF eligible projects?

Question 20: What new categories of water and sewer infrastructure, if any, should Treasury consider to support State, local, and Tribal governments in mitigating the negative impacts of climate change? Discuss emerging technologies and processes that support resiliency of water and sewer infrastructure. Discuss any challenges faced by States and local governments when pursuing or implementing climate resilient infrastructure projects.

Question 21: Infrastructure projects related to dams and reservoirs are generally not eligible under the CWSRF and DWSRF categories. Should Treasury consider expanding eligible

infrastructure under the interim final rule to include dam and reservoir projects? Discuss public health, environmental, climate, or equity benefits and costs in expanding the eligibility to include these types of projects.

2. Broadband Infrastructure

The COVID-19 public health emergency has underscored the importance of universally available, high-speed, reliable, and affordable broadband coverage as millions of Americans rely on the internet to participate in, among critical activities, remote school, healthcare, and work. Recognizing the need for such connectivity, the ARPA provides funds to State, territorial, local, and Tribal governments to make necessary investments in broadband infrastructure.

The National Telecommunications and Information Administration (NTIA) highlighted the growing necessity of broadband in daily lives through its analysis of NTIA Internet Use Survey data, noting that Americans turn to broadband internet access service for every facet of daily life including work, study, and healthcare.¹³⁹ With increased use of technology for daily activities and the movement by many businesses and schools to operating remotely during the pandemic, broadband has become even more critical for people across the country to carry out their daily lives.

By at least one measure, however, tens of millions of Americans live in areas where there is no broadband infrastructure that provides download speeds greater than 25 Mbps and upload speeds of 3 Mbps.¹⁴⁰ By contrast, as noted below, many households use upload and download speeds of 100 Mbps to meet their daily needs. Even in areas where broadband infrastructure

exists, broadband access may be out of reach for millions of Americans because it is unaffordable, as the United States has some of the highest broadband prices in the Organisation for Economic Co-operation and Development (OECD).¹⁴¹ There are disparities in availability as well; historically, Americans living in territories and Tribal lands as well as rural areas have disproportionately lacked sufficient broadband infrastructure.¹⁴² Moreover, rapidly growing demand has, and will likely continue to, quickly outpace infrastructure capacity, a phenomenon acknowledged by various states around the country that have set scalability requirements to account for this anticipated growth in demand.¹⁴³

The interim final rule provides that eligible investments in broadband are those that are designed to provide services meeting adequate speeds and are provided to unserved and underserved households and businesses. Understanding that States, territories, localities, and Tribal governments have a wide range of varied broadband infrastructure needs, the interim final rule provides award recipients with flexibility to identify the specific locations within their communities to be served and to otherwise design the project.

Under the interim final rule, eligible projects are expected to be designed to deliver, upon project completion, service that reliably meets or exceeds symmetrical upload and download speeds of 100 Mbps. There may be instances in which it would not be practicable for a project to deliver such service speeds because of the geography, topography, or excessive costs associated with such a project. In these instances, the affected project would be expected to be designed to deliver, upon project completion, service that reliably meets or exceeds 100 Mbps download and between at least 20 Mbps and 100 Mbps upload speeds and be scalable to

a minimum of 100 Mbps symmetrical for download and upload speeds.¹⁴⁴ In setting these standards, Treasury identified speeds necessary to ensure that broadband infrastructure is sufficient to enable users to generally meet household needs, including the ability to support the simultaneous use of work, education, and health applications, and also sufficiently robust to meet increasing household demands for bandwidth. Treasury also recognizes that different communities and their members may have a broad range of internet needs and that those needs may change over time.

In considering the appropriate speed requirements for eligible projects, Treasury considered estimates of typical households demands during the pandemic. Using the Federal Communication Commission's (FCC) Broadband Speed Guide, for example, a household with two telecommuters and two to three remote learners today are estimated to need 100 Mbps download to work simultaneously.¹⁴⁵ In households with more members, the demands may be greater, and in households with fewer members, the demands may be less.

In considering the appropriate speed requirements for eligible projects, Treasury also considered data usage patterns and how bandwidth needs have changed over time for U.S. households and businesses as people's use of technology in their daily lives has evolved. In the few years preceding the pandemic, market research data showed that average upload speeds in the United States surpassed over 10 Mbps in 2017¹⁴⁶ and continued to increase significantly, with the average upload speed as of November, 2019 increasing to 48.41 Mbps,¹⁴⁷ attributable, in part to a shift to using broadband and the internet by individuals and businesses

¹³⁹ See, e.g., <https://www.ntia.gov/blog/2020/more-half-american-households-used-internet-health-related-activities-2019-ntia-data-show>; <https://www.ntia.gov/blog/2020/nearly-third-american-employees-worked-remotely-2019-ntia-data-show>; and generally, <https://www.ntia.gov/data/digital-nation-data-explorer>.

¹⁴⁰ As an example, data from the Federal Communications Commission shows that as of June 2020, 9.07 percent of the U.S. population had no available cable or fiber broadband providers providing greater than 25 Mbps download speeds and 3 Mbps upload speeds. Availability was significantly less for rural versus urban populations, with 35.57 percent of the rural population lacking such access, compared with 2.57 percent of the urban population. Availability was also significantly less for tribal versus non-tribal populations, with 35.93 percent of the tribal population lacking such access, compared with 8.74 of the non-tribal population. to create and share content using video sharing, video conferencing, and other applications.¹⁴⁸

The increasing use of data accelerated markedly during the pandemic as households across the country became increasingly reliant on tools and applications that require greater internet capacity, both to download data but also to upload data. Sending information became as important as receiving it. A video consultation with a healthcare provider or participation by a child in a live classroom with a teacher and fellow students requires video to be sent and received simultaneously.¹⁴⁹ As an example, some video conferencing technology platforms indicate that download and upload speeds should be roughly equal to support two-way, interactive video meetings.¹⁵⁰ For both work and school, client materials or completed school assignments, which may be in the form of PDF files, videos, or graphic files, also need to be shared with others. This is often done by uploading materials to a collaboration site, and the upload speed available to a user can have a significant impact on the time it takes for the content to be shared with others.¹⁵¹ These activities require significant capacity from home internet connections to both download and upload data, especially when there are multiple individuals in one household engaging in these activities simultaneously.

This need for increased broadband capacity during the pandemic was reflected in increased usage patterns seen over the last year. As OpenVault noted in recent advisories, the pandemic significantly increased the amount of data users consume. Among data users observed by OpenVault, per-subscriber average data usage for the fourth quarter of 2020 was 482.6 gigabytes per month, representing a 40 percent increase over the 344 gigabytes consumed in the fourth quarter of 2019 and a 26 percent increase over the third quarter 2020 average of 383.8

¹⁴⁸ *Id.*

¹⁴⁹ One high definition Zoom meeting or class requires approximately 3.8 Mbps/3.0 Mbps (up/down).

¹⁵⁰ See, e.g., Zoom, System Requirements for Windows, macOS, and Linux, https://support.zoom.us/hc/en-us/articles/201362023-System-requirements-for-Windows-macOS-and-Linux#h_d278c327-e03d-4896-b19a-96a8f3c0c69c (last visited May 8, 2021).

¹⁵¹ By one estimate, to upload a one gigabit video file to YouTube would take 15 minutes at an upload speed of 10 Mbps compared with 1 minute, 30 seconds at an upload speed of 100 Mbps, and 30 seconds at an upload speed of 300 Mbps. *Reviews.org*: What is Symmetrical internet? (March 2020).

gigabytes.¹⁵² OpenVault also noted significant increases in upstream usage among the data users it observed, with upstream data usage growing 63 percent—from 19 gigabytes to 31 gigabytes—between December, 2019 and December, 2020.¹⁵³ According to an OECD Broadband statistic from June 2020, the largest percentage of U.S. broadband subscribers have services providing speeds between 100 Mbps and 1 Gbps.¹⁵⁴

Jurisdictions and Federal programs are increasingly responding to the growing demands of their communities for both heightened download and upload speeds. For example, Illinois now requires 100 Mbps symmetrical service as the construction standard for its state broadband grant programs. This standard is also consistent with speed levels, particularly download speed levels, prioritized by other Federal programs supporting broadband projects. Bids submitted as part of the FCC in its Rural Digital Opportunity Fund (RDOF), established to support the construction of broadband networks in rural communities across the country, are given priority if they offer faster service, with the service offerings of 100 Mbps download and 20 Mbps upload being included in the “above baseline” performance tier set by the FCC.¹⁵⁵ The Broadband Infrastructure Program (BBIP)¹⁵⁶ of the Department of Commerce, which provides Federal funding to deploy broadband

infrastructure to eligible service areas of the country also prioritizes projects designed to provide broadband service with a download speed of not less than 100 Mbps and an upload speed of not less than 20 Mbps.¹⁵⁷

The 100 Mbps upload and download speeds will support the increased and growing needs of households and businesses. Recognizing that, in some instances, 100 Mbps upload speed may be impracticable due to geographical, topographical, or financial constraints, the interim final rule permits upload speeds of between at least 20 Mbps and 100 Mbps in such instances. To provide for investments that will accommodate technologies requiring symmetry in download and upload speeds, as noted above, eligible projects that are not designed to deliver, upon project completion, service that reliably meets or exceeds symmetrical speeds of 100 Mbps because it would be impracticable to do so should be designed so that they can be scalable to such speeds. Recipients are also encouraged to prioritize investments in fiber optic infrastructure where feasible, as such advanced technology enables the next generation of application solutions for all communities.

Under the interim final rule, eligible projects are expected to focus on locations that are unserved or underserved. The interim final rule treats users as being unserved or underserved if they lack access to a wireline connection capable of reliably delivering at least minimum speeds of 25 Mbps download and 3 Mbps upload as households and businesses lacking this level of access are generally not viewed as being able to originate and receive high-quality voice, data, graphics, and video telecommunications. This threshold is consistent with the FCC’s benchmark for an “advanced telecommunications capability.”¹⁵⁸ This threshold is also consistent with thresholds used in other Federal programs to identify eligible areas to be served by programs to improve broadband services. For example, in the FCC’s RDOF program, eligible areas include those without current (or already funded) access to terrestrial broadband service providing 25 Mbps download and 3 Mbps upload speeds.¹⁵⁹ The Department of Commerce’s BBIP also considers households to be “unserved” generally if they lack access to broadband service

¹⁵⁷ Section 905(d)(4) of the Consolidated Appropriations Act, 2021.

¹⁵⁸ *Deployment Report*, *supra* note 142.

¹⁵⁹ *Rural Digital Opportunity Fund*, *supra* note 156.

with a download speed of not less than 25 Mbps download and 3 Mbps upload, among other conditions. In selecting an area to be served by a project, recipients are encouraged to avoid investing in locations that have existing agreements to build reliable wireline service with minimum speeds of 100 Mbps download and 20 Mbps upload by December 31, 2024, in order to avoid duplication of efforts and resources.

Recipients are also encouraged to consider ways to integrate affordability options into their program design. To meet the immediate needs of unserved and underserved households and businesses, recipients are encouraged to focus on projects that deliver a physical broadband connection by prioritizing projects that achieve last mile-connections. Treasury also encourages recipients to prioritize support for broadband networks owned, operated by, or affiliated with local governments, non-profits, and co-operatives—providers with less pressure to turn profits and with a commitment to serving entire communities.

Under sections 602(c)(1)(A) and 603(c)(1)(A), assistance to households facing negative economic impacts due to COVID-19 is also an eligible use, including internet access or digital literacy assistance. As discussed above, in considering whether a potential use is eligible under this category, a recipient must consider whether, and the extent to which, the household has experienced a negative economic impact from the pandemic.

Question 22: What are the advantages and disadvantages of setting minimum symmetrical download and upload speeds of 100 Mbps? What other minimum standards would be appropriate and why?

Question 23: Would setting such a minimum be impractical for particular types of projects? If so, where and on what basis should those projects be identified? How could such a standard be set while also taking into account the practicality of using this standard in particular types of projects? In addition to topography, geography, and financial factors, what other constraints, if any, are relevant to considering whether an investment is impracticable?

Question 24: What are the advantages and disadvantages of setting a minimum level of service at 100 Mbps download and 20 Mbps upload in projects where it is impracticable to set minimum symmetrical download and upload speeds of 100 Mbps? What are the advantages and disadvantages of setting a scalability requirement in these cases? What other minimum standards would be appropriate and why?

Question 25: What are the advantages and disadvantages of focusing these investments on those without access to a wireline connection that reliably delivers 25 Mbps download by 3 Mbps upload? Would another threshold be appropriate and why?

Question 26: What are the advantages and disadvantages of setting any particular threshold for identifying unserved or underserved areas, minimum speed standards or scalability minimum? Are there other standards that should be set (e.g., latency)? If so, why and how? How can such threshold, standards, or minimum be set in a way that balances the public's interest in making sure that reliable broadband services meeting the daily needs of all Americans are available throughout the country with the providing recipients flexibility to meet the varied needs of their communities?

III. Restrictions on Use

As discussed above, recipients have considerable flexibility to use Fiscal Recovery Funds to address the diverse needs of their communities. To ensure that payments from the Fiscal Recovery Funds are used for these congressionally permitted purposes, the ARPA includes two provisions that further define the boundaries of the statute's eligible uses. Section 602(c)(2)(A) of the Act provides that States and territories may not "use the funds . . . to either directly or indirectly offset a reduction in . . . net tax revenue . . . resulting from a change in law, regulation, or administrative interpretation during the covered period that reduces any tax . . . or delays the imposition of any tax or tax increase." In addition, sections 602(c)(2)(B) and 603(c)(2) prohibit any recipient, including cities, nonentitlement units of government, and counties, from using Fiscal Recovery Funds for deposit into any pension fund. These restrictions support the use of funds for the congressionally permitted purposes described in Section II of this Supplementary Information by providing a backstop against the use of funds for purposes outside of the eligible use categories.

These provisions give force to Congress's clear intent that Fiscal Recovery Funds be spent within the four eligible uses identified in the statute—(1) to respond to the public health emergency and its negative economic impacts, (2) to provide premium pay to essential workers, (3) to provide government services to the extent of eligible governments' revenue losses, and (4) to make necessary water, sewer, and broadband infrastructure investments—and not otherwise. These

four eligible uses reflect Congress's judgment that the Fiscal Recovery Funds should be expended in particular ways that support recovery from the COVID-19 public health emergency. The further restrictions reflect Congress's judgment that tax cuts and pension deposits do not fall within these eligible uses. The interim final rule describes how Treasury will identify when such uses have occurred and how it will recoup funds put toward these impermissible uses and, as discussed in Section VIII of this **SUPPLEMENTARY INFORMATION**, establishes a reporting framework for monitoring the use of Fiscal Recovery Funds for eligible uses.

A. Deposit Into Pension Funds

The statute provides that recipients may not use Fiscal Recovery Funds for "deposit into any pension fund." For the reasons discussed below, Treasury interprets "deposit" in this context to refer to an extraordinary payment into a pension fund for the purpose of reducing an accrued, unfunded liability. More specifically, the interim final rule does not permit this assistance to be used to make a payment into a pension fund if both:

1. The payment reduces a liability incurred prior to the start of the COVID-19 public health emergency, and
2. the payment occurs outside the recipient's regular timing for making such payments.

Under this interpretation, a "deposit" is distinct from a "payroll contribution," which occurs when employers make payments into pension funds on regular intervals, with contribution amounts based on a pre-determined percentage of employees' wages and salaries.

As discussed above, eligible uses for premium pay and responding to the negative economic impacts of the COVID-19 public health emergency include hiring and compensating public sector employees. Interpreting the scope of "deposit" to exclude contributions that are part of payroll contributions is more consistent with these eligible uses and would reduce administrative burden for recipients. Accordingly, if an employee's wages and salaries are an eligible use of Fiscal Recovery Funds, recipients may treat the employee's covered benefits as an eligible use of Fiscal Recovery Funds. For purposes of the Fiscal Recovery Funds, covered benefits include costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans

(Federal and State), workers' compensation insurance, and Federal Insurance Contributions Act taxes (which includes Social Security and Medicare taxes).

Treasury anticipates that this approach to employees' covered benefits will be comprehensive and, for employees whose wage and salary costs are eligible expenses, will allow all covered benefits listed in the previous paragraph to be eligible under the Fiscal Recovery Funds. Treasury expects that this will minimize the administrative burden on recipients by treating all the specified covered benefit types as eligible expenses, for employees whose wage and salary costs are eligible expenses.

Question 27: Beyond a "deposit" and a "payroll contribution," are there other types of payments into a pension fund that Treasury should consider?

B. Offset a Reduction in Net Tax Revenue

For States and territories (recipient governments¹⁶⁰), section 602(c)(2)(A)—the offset provision—prohibits the use of Fiscal Recovery Funds to directly or indirectly offset a reduction in net tax revenue resulting from a change in law, regulation, or administrative interpretation¹⁶¹ during the covered period. If a State or territory uses Fiscal Recovery Funds to offset a reduction in net tax revenue, the ARPA provides that the State or territory must repay to the Treasury an amount equal to the lesser of (i) the amount of the applicable reduction attributable to the impermissible offset and (ii) the amount received by the State or territory under the ARPA. See Section IV of this **SUPPLEMENTARY INFORMATION**. As discussed below Section IV of this **SUPPLEMENTARY INFORMATION**, a State or territory that chooses to use Fiscal Recovery Funds to offset a reduction in net tax revenue does not forfeit its entire allocation of Fiscal Recovery Funds (unless it misused the full allocation to offset a reduction in net tax revenue) or any non-ARPA funding received.

The interim final rule implements these conditions by establishing a framework for States and territories to determine the cost of changes in law, regulation, or interpretation that reduce tax revenue and to identify and value the sources of funds that will offset—

i.e., cover the cost of—any reduction in net tax revenue resulting from such changes. A recipient government would only be considered to have used Fiscal Recovery Funds to offset a reduction in net tax revenue resulting from changes in law, regulation, or interpretation if, and to the extent that, the recipient government could not identify sufficient funds from sources other than the Fiscal Recovery Funds to offset the reduction in net tax revenue. If sufficient funds from other sources cannot be identified to cover the full cost of the reduction in net tax revenue resulting from changes in law, regulation, or interpretation, the remaining amount not covered by these sources will be considered to have been offset by Fiscal Recovery Funds, in contravention of the offset provision.

The interim final rule recognizes three sources of funds that may offset a reduction in net tax revenue other than Fiscal Recovery Funds—organic growth, increases in revenue (*e.g.*, an increase in a tax rate), and certain cuts in spending.

In order to reduce burden, the interim final rule's approach also incorporates the types of information and modeling already used by States and territories in their own fiscal and budgeting processes. By incorporating existing budgeting processes and capabilities, States and territories will be able to assess and evaluate the relationship of tax and budget decisions to uses of the Fiscal Recovery Funds based on information they likely have or can obtain. This approach ensures that recipient governments have the information they need to understand the implications of their decisions regarding the use of the Fiscal Recovery Funds—and, in particular, whether they are using the funds to directly or indirectly offset a reduction in net tax revenue, making them potentially subject to recoupment.

Reporting on both the eligible uses and on a State's or territory's covered tax changes that would reduce tax revenue will enable identification of, and recoupment for, use of Fiscal Recovery Funds to directly offset reductions in tax revenue resulting from tax relief. Moreover, this approach recognizes that, because money is fungible, even if Fiscal Recovery Funds are not explicitly or directly used to cover the costs of changes that reduce net tax revenue, those funds may be used in a manner inconsistent with the statute by indirectly being used to substitute for the State's or territory's funds that would otherwise have been needed to cover the costs of the reduction. By focusing on the cost of changes that reduce net tax revenue—and how a recipient government is

offsetting those reductions in constructing its budget over the covered period—the framework prevents efforts to use Fiscal Recovery Funds to indirectly offset reductions in net tax revenue for which the recipient government has not identified other offsetting sources of funding.

As discussed in greater detail below in this preamble, the framework set forth in the interim final rule establishes a step-by-step process for determining whether, and the extent to which, Fiscal Recovery Funds have been used to offset a reduction in net tax revenue. Based on information reported annually by the recipient government:

- First, each year, each recipient government will identify and value the changes in law, regulation, or interpretation that would result in a reduction in net tax revenue, as it would in the ordinary course of its budgeting process. The sum of these values in the year for which the government is reporting is the amount it needs to "pay for" with sources other than Fiscal Recovery Funds (total value of revenue reducing changes).

- Second, the interim final rule recognizes that it may be difficult to predict how a change would affect net tax revenue in future years and, accordingly, provides that if the total value of the changes in the year for which the recipient government is reporting is below a de minimis level, as discussed below, the recipient government need not identify any sources of funding to pay for revenue reducing changes and will not be subject to recoupment.

- Third, a recipient government will consider the amount of actual tax revenue recorded in the year for which they are reporting. If the recipient government's actual tax revenue is greater than the amount of tax revenue received by the recipient for the fiscal year ending 2019, adjusted annually for inflation, the recipient government will not be considered to have violated the offset provision because there will not have been a reduction in net tax revenue.

- Fourth, if the recipient government's actual tax revenue is less than the amount of tax revenue received by the recipient government for the fiscal year ending 2019, adjusted annually for inflation, in the reporting year the recipient government will identify any sources of funds that have been used to permissibly offset the total value of covered tax changes other than Fiscal Recovery Funds. These are:

- State or territory tax changes that would increase any source of general

¹⁶⁰ In this sub-section, "recipient governments" refers only to States and territories. In other sections, "recipient governments" refers more broadly to eligible governments receiving funding from the Fiscal Recovery Funds.

¹⁶¹ For brevity, referred to as "changes in law, regulation, or interpretation" for the remainder of this preamble.

fund revenue, such as a change that would increase a tax rate; and

- Spending cuts in areas not being replaced by Fiscal Recovery Funds.

The recipient government will calculate the value of revenue reduction remaining after applying these sources of offsetting funding to the total value of revenue reducing changes—that, is, how much of the tax change has not been paid for. The recipient government will then compare that value to the difference between the baseline and actual tax revenue. A recipient government will not be required to repay to the Treasury an amount that is greater than the recipient government's actual tax revenue shortfall relative to the baseline (*i.e.*, fiscal year 2019 tax revenue adjusted for inflation). This “revenue reduction cap,” together with Step 3, ensures that recipient governments can use organic revenue growth to offset the cost of revenue reductions.

- Finally, if there are any amounts that could be subject to recoupment, Treasury will provide notice to the recipient government of such amounts. This process is discussed in greater detail in Section IV of this

SUPPLEMENTARY INFORMATION.

Together, these steps allow Treasury to identify the amount of reduction in net tax revenue that both is attributable to covered changes and has been directly or indirectly offset with Fiscal Recovery Funds. This process ensures Fiscal Recovery Funds are used in a manner consistent with the statute's defined eligible uses and the offset provision's limitation on these eligible uses, while avoiding undue interference with State and territory decisions regarding tax and spending policies.

The interim final rule also implements a process for recouping Fiscal Recovery Funds that were used to offset reductions in net tax revenue, including the calculation of any amounts that may be subject to recoupment, a process for a recipient government to respond to a notice of recoupment, and clarification regarding amounts excluded from recoupment. See Section IV of this **SUPPLEMENTARY INFORMATION.**

The interim final rule includes several definitions that are applicable to the implementation of the offset provision.

Covered change. The offset provision is triggered by a reduction in net tax revenue resulting from “a change in law, regulation, or administrative interpretation.” A covered change includes any final legislative or regulatory action, a new or changed administrative interpretation, and the phase-in or taking effect of any statute

or rule where the phase-in or taking effect was not prescribed prior to the start of the covered period. Changed administrative interpretations would not include corrections to replace prior inaccurate interpretations; such corrections would instead be treated as changes implementing legislation enacted or regulations issued prior to the covered period; the operative change in those circumstances is the underlying legislation or regulation that occurred prior to the covered period. Moreover, only the changes within the control of the State or territory are considered covered changes. Covered changes do not include a change in rate that is triggered automatically and based on statutory or regulatory criteria in effect prior to the covered period. For example, a state law that sets its earned income tax credit (EITC) at a fixed percentage of the Federal EITC will see its EITC payments automatically increase—and thus its tax revenue reduced—because of the Federal Government's expansion of the EITC in the ARPA.¹⁶² This would not be considered a covered change. In addition, the offset provision applies only to actions for which the change in policy occurs during the covered period; it excludes regulations or other actions that implement a change or law substantively enacted prior to March 3, 2021. Finally, Treasury has determined and previously announced that income tax changes—even those made during the covered period—that simply conform with recent changes in Federal law (including those to conform to recent changes in Federal taxation of unemployment insurance benefits and taxation of loan forgiveness under the Paycheck Protection Program) are permissible under the offset provision.

Baseline. For purposes of measuring a reduction in net tax revenue, the interim final rule measures actual changes in tax revenue relative to a revenue baseline (baseline). The baseline will be calculated as fiscal year 2019 (FY 2019) tax revenue indexed for inflation in each year of the covered period, with inflation calculated using the Bureau of Economic Analysis's Implicit Price Deflator.¹⁶³

FY 2019 was chosen as the starting year for the baseline because it is the last full fiscal year prior to the COVID–

¹⁶² See, e.g., Tax Policy Center, How do state earned income tax credits work?, <https://www.taxpolicycenter.org/briefing-book/how-do-state-earned-income-tax-credits-work/> (last visited May 9, 2021).

¹⁶³ U.S. Department of Commerce, Bureau of Economic Analysis, GDP Price Deflator, <https://www.bea.gov/data/prices-inflation/gdp-price-deflator> (last visited May 9, 2021).

19 public health emergency.¹⁶⁴ This baseline year is consistent with the approach directed by the ARPA in sections 602(c)(1)(C) and 603(c)(1)(C), which identify the “most recent full fiscal year of the [State, territory, or Tribal government] prior to the emergency” as the comparator for measuring revenue loss. U.S. gross domestic product is projected to rebound to pre-pandemic levels in 2021,¹⁶⁵ suggesting that an FY 2019 pre-pandemic baseline is a reasonable comparator for future revenue levels. The FY 2019 baseline revenue will be adjusted annually for inflation to allow for direct comparison of actual tax revenue in each year (reported in nominal terms) to baseline revenue in common units of measurement; without inflation adjustment, each dollar of reported actual tax revenue would be worth less than each dollar of baseline revenue expressed in 2019 terms.

Reporting year. The interim final rule defines “reporting year” as a single year within the covered period, aligned to the current fiscal year of the recipient government during the covered period, for which a recipient government reports the value of covered changes and any sources of offsetting revenue increases (“in-year” value), regardless of when those changes were enacted. For the fiscal years ending in 2021 or 2025 (partial years), the term “reporting year” refers to the portion of the year falling within the covered period. For example, the reporting year for a fiscal year beginning July 2020 and ending June 2021 would be from March 3, 2021 to July 2021.

Tax revenue. The interim final rule's definition of “tax revenue” is based on the Census Bureau's definition of taxes, used for its Annual Survey of State Government Finances.¹⁶⁶ It provides a consistent, well-established definition with which States and territories will be familiar and is consistent with the approach taken in Section II.C of this **SUPPLEMENTARY INFORMATION** describing the implementation of sections 602(c)(1)(C) and 603(c)(1)(C) of the Act, regarding revenue loss. Consistent with the approach described in Section II.C of this **SUPPLEMENTARY INFORMATION**, tax

¹⁶⁴ Using Fiscal Year 2019 is consistent with section 602 as Congress provided for using that baseline for determining the impact of revenue loss affecting the provision of government services. See section 602(c)(1)(C).

¹⁶⁵ Congressional Budget Office, An Overview of the Economic Outlook: 2021 to 2031 (February 1, 2021), available at <https://www.cbo.gov/publication/56965>.

¹⁶⁶ U.S. Census Bureau, Annual Survey of State and Local Government Finances Glossary, <https://www.census.gov/programs-surveys/state/about/glossary.html> (last visited Apr. 30, 2021).

revenue does not include revenue taxed and collected by a different unit of government (e.g., revenue from taxes levied by a local government and transferred to a recipient government).

Framework. The interim final rule provides a step-by-step framework, to be used in each reporting year, to calculate whether the offset provision applies to a State's or territory's use of Fiscal Recovery Funds:

(1) *Covered changes that reduce tax revenue.* For each reporting year, a recipient government will identify and value covered changes that the recipient government predicts will have the effect of reducing tax revenue in a given reporting year, similar to the way it would in the ordinary course of its budgeting process. The value of these covered changes may be reported based on estimated values produced by a budget model, incorporating reasonable assumptions, that aligns with the recipient government's existing approach for measuring the effects of fiscal policies, and that measures relative to a current law baseline. The covered changes may also be reported based on actual values using a statistical methodology to isolate the change in year-over-year revenue attributable to the covered change(s), relative to the current law baseline prior to the change(s). Further, estimation approaches should not use dynamic methodologies that incorporate the projected effects of macroeconomic growth because macroeconomic growth is accounted for separately in the framework. Relative to these dynamic scoring methodologies, scoring methodologies that do not incorporate projected effects of macroeconomic growth rely on fewer assumptions and thus provide greater consistency among States and territories. Dynamic scoring that incorporates macroeconomic growth may also increase the likelihood of underestimation of the cost of a reduction in tax revenue.

In general and where possible, reporting should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. This approach offers recipient governments the flexibility to determine their reporting methodology based on their existing budget scoring practices and capabilities. In addition, the approach of using the projected value of changes in law that enact fiscal policies to estimate the net effect of such policies is consistent with the way many States

and territories already consider tax changes.¹⁶⁷

(2) *In excess of the de minimis.* The recipient government will next calculate the total value of all covered changes in the reporting year resulting in revenue reductions, identified in Step 1. If the total value of the revenue reductions resulting from these changes is below the de minimis level, the recipient government will be deemed not to have any revenue-reducing changes for the purpose of determining the recognized net reduction. If the total is above the de minimis level, the recipient government must identify sources of in-year revenue to cover the full costs of changes that reduce tax revenue.

The de minimis level is calculated as 1 percent of the reporting year's baseline. Treasury recognizes that, pursuant to their taxing authority, States and territories may make many small changes to alter the composition of their tax revenues or implement other policies with marginal effects on tax revenues. They may also make changes based on projected revenue effects that turn out to differ from actual effects, unintentionally resulting in minor revenue changes that are not fairly described as "resulting from" tax law changes. The de minimis level recognizes the inherent challenges and uncertainties that recipient governments face, and thus allows relatively small reductions in tax revenue without consequence. Treasury determined the 1 percent level by assessing the historical effects of state-level tax policy changes in state EITCs implemented to effect policy goals other than reducing net tax revenues.¹⁶⁸ The 1 percent de minimis level reflects the historical reductions in revenue due to minor changes in state fiscal policies.

(3) *Safe harbor.* The recipient government will then compare the reporting year's actual tax revenue to the baseline. If actual tax revenue is greater than the baseline, Treasury will deem the recipient government not to have any recognized net reduction for the reporting year, and therefore to be in a safe harbor and outside the ambit of the offset provision. This approach is consistent with the ARPA, which contemplates recoupment of Fiscal Recovery Funds only in the event that

such funds are used to offset a reduction in net tax revenue. If net tax revenue has not been reduced, this provision does not apply. In the event that actual tax revenue is above the baseline, the organic revenue growth that has occurred, plus any other revenue-raising changes, by definition must have been enough to offset the in-year costs of the covered changes.

(4) *Consideration of other sources of funding.* Next, the recipient government will identify and calculate the total value of changes that could pay for revenue reduction due to covered changes and sum these items. This amount can be used to pay for up to the total value of revenue-reducing changes in the reporting year. These changes consist of two categories:

(a) *Tax and other increases in revenue.* The recipient government must identify and consider covered changes in policy that the recipient government predicts will have the effect of increasing general revenue in a given reporting year. As when identifying and valuing covered changes that reduce tax revenue, the value of revenue-raising changes may be reported based on estimated values produced by a budget model, incorporating reasonable assumptions, aligned with the recipient government's existing approach for measuring the effects of fiscal policies, and measured relative to a current law baseline, or based on actual values using a statistical methodology to isolate the change in year-over-year revenue attributable to the covered change(s). Further, and as discussed above, estimation approaches should not use dynamic scoring methodologies that incorporate the effects of macroeconomic growth because growth is accounted for separately under the interim final rule. In general and where possible, reporting should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. This approach offers recipient governments the flexibility to determine their reporting methodology based on their existing budget scoring practices and capabilities.

(b) *Covered spending cuts.* A recipient government also may cut spending in certain areas to pay for covered changes that reduce tax revenue, up to the amount of the recipient government's net reduction in total spending as described below. These changes must be reductions in government outlays not in an area where the recipient government has spent Fiscal Recovery Funds. To better align with existing reporting and accounting, the interim final rule considers the department, agency, or

¹⁶⁷ See, e.g., Megan Randall & Kim Rueben, Tax Policy Center, Sustainable Budgeting in the States: Evidence on State Budget Institutions and Practices (Nov. 2017), available at https://www.taxpolicycenter.org/sites/default/files/publication/149186/sustainable-budgeting-in-the-states_1.pdf.

¹⁶⁸ Data provided by the Urban-Brookings Tax Policy Center for state-level EITC changes for 2004–2017.

authority from which spending has been cut and whether the recipient government has spent Fiscal Recovery Funds on that same department, agency, or authority. This approach was selected to allow recipient governments to report how Fiscal Recovery Funds have been spent using reporting units already incorporated into their budgeting process. If they have not spent Fiscal Recovery Funds in a department, agency, or authority, the full amount of the reduction in spending counts as a covered spending cut, up to the recipient government's net reduction in total spending. If they have, the Fiscal Recovery Funds generally would be deemed to have replaced the amount of spending cut and only reductions in spending above the amount of Fiscal Recovery Funds spent on the department, agency, or authority would count.

To calculate the amount of spending cuts that are available to offset a reduction in tax revenue, the recipient government must first consider whether there has been a reduction in total net spending, excluding Fiscal Recovery Funds (net reduction in total spending). This approach ensures that reported spending cuts actually create fiscal space, rather than simply offsetting other spending increases. A net reduction in total spending is measured as the difference between total spending in each reporting year, excluding Fiscal Recovery Funds spent, relative to total spending for the recipient's fiscal year ending in 2019, adjusted for inflation. Measuring reductions in spending relative to 2019 reflects the fact that the fiscal space created by a spending cut persists so long as spending remains below its original level, even if it does not decline further, relative to the same amount of revenue. Measuring spending cuts from year to year would, by contrast, not recognize any available funds to offset revenue reductions unless spending continued to decline, failing to reflect the actual availability of funds created by a persistent change and limiting the discretion of States and territories. In general and where possible, reporting should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. Treasury chose this approach because while many recipient governments may score budget legislation using projections, spending cuts are readily observable using actual values.

This approach—allowing only spending reductions in areas where the recipient government has not spent Fiscal Recovery Funds to be used as an

offset for a reduction in net tax revenue—aims to prevent recipient governments from using Fiscal Recovery Funds to supplant State or territory funding in the eligible use areas, and then use those State or territory funds to offset tax cuts. Such an approach helps ensure that Fiscal Recovery Funds are not used to “indirectly” offset revenue reductions due to covered changes.

In order to help ensure recipient governments use Fiscal Recovery Funds in a manner consistent with the prescribed eligible uses and do not use Fiscal Recovery Funds to indirectly offset a reduction in net tax revenue resulting from a covered change, Treasury will monitor changes in spending throughout the covered period. If, over the course of the covered period, a spending cut is subsequently replaced with Fiscal Recovery Funds and used to indirectly offset a reduction in net tax revenue resulting from a covered change, Treasury may consider such change to be an evasion of the restrictions of the offset provision and seek recoupment of such amounts.

(5) *Identification of amounts subject to recoupment.* If a recipient government (i) reports covered changes that reduce tax revenue (Step 1); (ii) to a degree greater than the de minimis (Step 2); (iii) has experienced a reduction in net tax revenue (Step 3); and (iv) lacks sufficient revenue from other, permissible sources to pay for the entirety of the reduction (Step 4), then the recipient government will be considered to have used Fiscal Recovery Funds to offset a reduction in net tax revenue, up to the amount that revenue has actually declined. That is, the maximum value of reduction in revenue due to covered changes which a recipient government must cover is capped at the difference between the baseline and actual tax revenue.¹⁶⁹ In the event that the baseline is above actual tax revenue and the difference between them is less than the sum of revenue reducing changes that are not paid for with other, permissible sources, organic revenue growth has implicitly offset a portion of the reduction. For example, if a recipient government reduces tax revenue by \$1 billion, makes no other changes, and experiences revenue growth driven by organic economic growth worth \$500 million, it need only pay for the remaining \$500 million with sources other than Fiscal Recovery Funds. The revenue reduction cap implements this

¹⁶⁹ This cap is applied in § 35.8(c) of the interim final rule, calculating the amount of funds used in violation of the tax offset provision.

approach for permitting organic revenue growth to cover the cost of tax cuts.

Finally, as discussed further in Section IV of this **SUPPLEMENTARY INFORMATION**, a recipient government may request reconsideration of any amounts identified as subject to recoupment under this framework. This process ensures that all relevant facts and circumstances, including information regarding planned spending cuts and budgeting assumptions, are considered prior to a determination that an amount must be repaid. Amounts subject to recoupment are calculated on an annual basis; amounts recouped in one year cannot be returned if the State or territory subsequently reports an increase in net tax revenue.

To facilitate the implementation of the framework above, and in addition to reporting required on eligible uses, in each year of the reporting period, each State and territory will report to Treasury the following items:

- Actual net tax revenue for the reporting year;
- Each revenue-reducing change made to date during the covered period and the in-year value of each change;
- Each revenue-raising change made to date during the covered period and the in-year value of each change;
- Each covered spending cut made to date during the covered period, the in-year value of each cut, and documentation demonstrating that each spending cut is covered as prescribed under the interim final rule;

Treasury will provide additional guidance and instructions the reporting requirements at a later date.

Question 28: Does the interim final rule's definition of tax revenue accord with existing State and territorial practice and, if not, are there other definitions or elements Treasury should consider? Discuss why or why not.

Question 29: The interim final rule permits certain spending cuts to cover the costs of reductions in tax revenue, including cuts in a department, agency, or authority in which the recipient government is not using Fiscal Recovery Funds. How should Treasury and recipient governments consider the scope of a department, agency, or authority for the use of funds to ensure spending cuts are not being substituted with Fiscal Recovery Funds while also avoiding an overbroad definition of that captures spending that is, in fact, distinct?

Question 30: Discuss the budget scoring methodologies currently used by States and territories. How should the interim final rule take into consideration differences in approaches? Please discuss the use of

practices including but not limited to macrodynamic scoring, microdynamic scoring, and length of budget windows.

Question 31: If a recipient government has a balanced budget requirement, how will that requirement impact its use of Fiscal Recovery Funds and ability to implement this framework?

Question 32: To implement the framework described above, the interim final rule establishes certain reporting requirements. To what extent do recipient governments already produce this information and on what timeline? Discuss ways that Treasury and recipient governments may better rely on information already produced, while ensuring a consistent application of the framework.

Question 33: Discuss States' and territories' ability to produce the figures and numbers required for reporting under the interim final rule. What additional reporting tools, such as a standardized template, would facilitate States' and territories' ability to complete the reporting required under the interim final rule?

C. Other Restrictions on Use

Payments from the Fiscal Recovery Funds are also subject to pre-existing limitations provided in other Federal statutes and regulations and may not be used as non-Federal match for other Federal programs whose statute or regulations bar the use of Federal funds to meet matching requirements. For example, payments from the Fiscal Recovery Funds may not be used to satisfy the State share of Medicaid.¹⁷⁰

As provided for in the award terms, payments from the Fiscal Recovery Funds as a general matter will be subject to the provisions of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 200) (the Uniform Guidance), including the cost principles and restrictions on general provisions for selected items of cost.

D. Timeline for Use of Fiscal Recovery Funds

Section 602(c)(1) and section 603(c)(1) require that payments from the Fiscal Recovery Funds be used only to cover costs incurred by the State, territory, Tribal government, or local government by December 31, 2024. Similarly, the CARES Act provided that payments from the CRF be used to cover costs incurred by December 31, 2021.¹⁷¹ The

definition of “incurred” does not have a clear meaning. With respect to the CARES Act, on the understanding that the CRF was intended to be used to meet relatively short-term needs, Treasury interpreted this requirement to mean that, for a cost to be considered to have been incurred, performance of the service or delivery of the goods acquired must occur by December 31, 2021. In contrast, the ARPA, passed at a different stage of the COVID–19 public health emergency, was intended to provide more general fiscal relief over a broader timeline. In addition, the ARPA expressly permits the use of Fiscal Recovery Funds for improvements to water, sewer, and broadband infrastructure, which entail a longer timeframe. In recognition of this, Treasury is interpreting the requirement in section 602 and section 603 that costs be incurred by December 31, 2024, to require only that recipients have obligated the Fiscal Recovery Funds by such date. The interim final rule adopts a definition of “obligation” that is based on the definition used for purposes of the Uniform Guidance, which will allow for uniform administration of this requirement and is a definition with which most recipients will be familiar.

Payments from the Fiscal Recovery Funds are grants provided to recipients to mitigate the fiscal effects of the COVID–19 public health emergency and to respond to the public health emergency, consistent with the eligible uses enumerated in sections 602(c)(1) and 603(c)(1).¹⁷² As such, these funds are intended to provide economic stimulus in areas still recovering from the economic effects of the pandemic. In implementing and interpreting these provisions, including what it means to “respond to” the COVID–19 public health emergency, Treasury takes into consideration pre-pandemic facts and circumstances (e.g., average revenue growth prior to the pandemic) as well as impact of the pandemic that predate the enactment of the ARPA (e.g., replenishing Unemployment Trust balances drawn during the pandemic). While assessing the effects of the COVID–19 public health emergency necessarily takes into consideration the facts and circumstances that predate the ARPA, use of Fiscal Recovery Funds is forward looking.

As discussed above, recipients are permitted to use payments from the Fiscal Recovery Funds to respond to the public health emergency, to respond to workers performing essential work by providing premium pay or providing

grants to eligible employers, and to make necessary investments in water, sewer, or broadband infrastructure, which all relate to prospective uses. In addition, sections 602(c)(1)(C) and 603(c)(1)(C) permit recipients to use Fiscal Recovery Funds for the provision of government services. This clause provides that the amount of funds that may be used for this purpose is measured by reference to the reduction in revenue due to the public health emergency relative to revenues collected in the most recent full fiscal year, but this reference does not relate to the period during which recipients may use the funds, which instead refers to prospective uses, consistent with the other eligible uses.

Although as discussed above the eligible uses of payments from the Fiscal Recovery Funds are all prospective in nature, Treasury considers the beginning of the covered period for purposes of determining compliance with section 602(c)(2)(A) to be the relevant reference point for this purpose. The interim final rule thus permits funds to be used to cover costs incurred beginning on March 3, 2021. This aligns the period for use of Fiscal Recovery Funds with the period during which these funds may not be used to offset reductions in net tax revenue. Permitting Fiscal Recovery Funds to be used to cover costs incurred beginning on this date will also mean that recipients that began incurring costs in the anticipation of enactment of the ARPA and in advance of the issuance of this rule and receipt of payment from the Fiscal Recovery Funds would be able to cover them using these payments.¹⁷³

As set forth in the award terms, the period of performance will run until December 31, 2026, which will provide recipients a reasonable amount of time to complete projects funded with payments from the Fiscal Recovery Funds.

IV. Recoupment Process

Under the ARPA, failure to comply with the restrictions on use contained in sections 602(c) and 603(c) of the Act may result in recoupment of funds.¹⁷⁴ The interim final rule implements these provisions by establishing a process for recoupment.

Identification and Notice of Violations. Failure to comply with the restrictions on use will be identified based on reporting provided by the

¹⁷³ Given the nature of this program, recipients will not be permitted to use funds to cover pre-award costs, *i.e.*, those incurred prior to March 3, 2021.

¹⁷⁴ Sections 602(e) and 603(e) of the Act.

¹⁷⁰ See 42 CFR 433.51 and 45 CFR 75.306.

¹⁷¹ Section 1001 of Division N of the Consolidated Appropriations Act, 2021 amended section 601(d)(3) of the Act by extending the end of the covered period for CRF expenditures from December 30, 2020 to December 31, 2021.

¹⁷² Sections 602(a), 603(a), 602(c)(1) and 603(c)(1) of the Act.

recipient. As discussed further in Sections III.B and VIII of this SUPPLEMENTARY INFORMATION, Treasury will collect information regarding eligible uses on a quarterly basis and on the tax offset provision on an annual basis. Treasury also may consider other information in identifying a violation, such as information provided by members of the public. If Treasury identifies a violation, it will provide written notice to the recipient along with an explanation of such amounts.

Request for Reconsideration. Under the interim final rule, a recipient may submit a request for reconsideration of any amounts identified in the notice provided by Treasury. This reconsideration process provides a recipient the opportunity to submit additional information it believes supports its request in light of the notice of recoupment, including, for example, additional information regarding the recipient's use of Fiscal Recovery Funds or its tax revenues. The process also provides the Secretary with an opportunity to consider all information relevant to whether a violation has occurred, and if so, the appropriate amount for recoupment.

The interim final rule also establishes requirements for the timing of a request for reconsideration. Specifically, if a recipient wishes to request reconsideration of any amounts identified in the notice, the recipient must submit a written request for reconsideration to the Secretary within 60 calendar days of receipt of such notice. The request must include an explanation of why the recipient believes that the finding of a violation or recoupable amount identified in the notice of recoupment should be reconsidered. To facilitate the Secretary's review of a recipient's request for reconsideration, the request should identify all supporting reasons for the request. Within 60 calendar days of receipt of the recipient's request for reconsideration, the recipient will be notified of the Secretary's decision to affirm, withdraw, or modify the notice of recoupment. Such notification will include an explanation of the decision, including responses to the recipient's supporting reasons and consideration of additional information provided.

The process and timeline established by the interim final rule are intended to provide the recipient with an adequate opportunity to fully present any issues or arguments in response to the notice of recoupment.¹⁷⁵ This process will allow the Secretary to respond to the

issues and considerations raised in the request for reconsideration taking into account the information and arguments presented by the recipient along with any other relevant information.

Repayment. Finally, the interim final rule provides that any amounts subject to recoupment must be repaid within 120 calendar days of receipt of any final notice of recoupment or, if the recipient has not requested reconsideration, within 120 calendar days of the initial notice provided by the Secretary.

Question 34: Discuss the timeline for requesting reconsideration under the interim final rule. What, if any, challenges does this timeline present?

V. Payments in Tranches to Local Governments and Certain States

Section 603 of the Act provides that the Secretary will make payments to local governments in two tranches, with the second tranche being paid twelve months after the first payment. In addition, section 602(b)(6)(A)(ii) provides that the Secretary may withhold payment of up to 50 percent of the amount allocated to each State and territory for a period of up to twelve months from the date on which the State or territory provides its certification to the Secretary. Any such withholding for a State or territory is required to be based on the unemployment rate in the State or territory as of the date of the certification.

The Secretary has determined to provide in this interim final rule for withholding of 50 percent of the amount of Fiscal Recovery Funds allocated to all States (and the District of Columbia) other than those with an unemployment rate that is 2.0 percentage points or more above its pre-pandemic (*i.e.*, February 2020) level. The Secretary will refer to the latest available monthly data from the Bureau of Labor Statistics as of the date the certification is provided. Based on data available at the time of public release of this interim final rule, this threshold would result in a majority of States being paid in two tranches.

Splitting payments for the majority of States is consistent with the requirement in section 603 of the Act to make payments from the Coronavirus Local Fiscal Recovery Fund to local governments in two tranches.¹⁷⁶

¹⁷⁶ With respect to Federal financial assistance more generally, States are subject to the requirements of the Cash Management Improvement Act (CMIA), under which Federal funds are drawn upon only on an as needed basis and States are required to remit interest on unused balances to Treasury. Given the statutory requirement for Treasury to make payments to States within a certain period, these requirements

Splitting payments to States into two tranches will help encourage recipients to adapt, as necessary, to new developments that could arise over the coming twelve months, including potential changes to the nature of the public health emergency and its negative economic impacts. While the U.S. economy has been recovering and adding jobs in aggregate, there is still considerable uncertainty in the economic outlook and the interaction between the pandemic and the economy.¹⁷⁷ For these reasons, Treasury believes it will be appropriate for a majority of recipients to adapt their plans as the recovery evolves. For example, a faster-than-expected economic recovery in 2021 could lead a recipient to dedicate more Fiscal Recovery Funds to longer-term investments starting in 2022. In contrast, a slower-than-expected economic recovery in 2021 could lead a recipient to use additional funds for near-term stimulus in 2022.

At the same time, the statute contemplates the possibility that elevated unemployment in certain States could justify a single payment. Elevated unemployment is indicative of a greater need to assist unemployed workers and stimulate a faster economic recovery. For this reason, the interim final rule provides that States and territories with an increase in their unemployment rate over a specified threshold may receive a single payment, with the expectation that a single tranche will better enable these States and territories to take additional immediate action to aid the unemployed and strengthen their economies.

Following the initial pandemic-related spike in unemployment in 2020, States' unemployment rates have been trending back towards pre-pandemic levels. However, some States' labor markets are healing more slowly than others. Moreover, States varied widely in their pre-pandemic levels of unemployment, and some States remain substantially further from their pre-

of the CMIA and Treasury's implementing regulations at 31 CFR part 205 will not apply to payments from the Fiscal Recovery Funds. Providing funding in two tranches to the majority of States reflects, to the maximum extent permitted by section 602 of the Act, the general principles of Federal cash management and stewardship of Federal funding, yet will be much less restrictive than the usual requirements to which States are subject.

¹⁷⁷ The potential course of the virus, and its impact on the economy, has contributed to a heightened degree of uncertainty relative to prior periods. *See, e.g.*, Dave Altig et al., Economic uncertainty before and during the COVID-19 pandemic, *J. of Public Econ.* (Nov. 2020), available at <https://www.sciencedirect.com/science/article/abs/pii/S0047272720301389>.

¹⁷⁵ The interim final rule also provides that Treasury may extend any deadlines.

pandemic starting point. Consequently, Treasury is delineating States with significant remaining elevation in the unemployment rate, based on the net difference to pre-pandemic levels.

Treasury has established that significant remaining elevation in the unemployment rate is a net change in the unemployment rate of 2.0 percentage points or more relative to pre-pandemic levels. In the four previous recessions going back to the early 1980s, the national unemployment rate rose by 3.6, 2.3, 2.0, and 5.0 percentage points, as measured from the start of the recession to the eventual peak during or immediately following the recession.¹⁷⁸ Each of these increases can therefore represent a recession's impact on unemployment. To identify States with significant remaining elevation in unemployment, Treasury took the lowest of these four increases, 2.0 percentage points, to indicate states where, despite improvement in the unemployment rate, current labor market conditions are consistent still with a historical benchmark for a recession.

No U.S. territory will be subject to withholding of its payment from the Fiscal Recovery Funds. For Puerto Rico, the Secretary has determined that the current level of the unemployment rate (8.8 percent, as of March 2021¹⁷⁹) is sufficiently high such that Treasury should not withhold any portion of its payment from the Fiscal Recovery Funds regardless of its change in unemployment rate relative to its pre-pandemic level. For U.S. territories that are not included in the Bureau of Labor Statistics' monthly unemployment rate data, the Secretary will not exercise the authority to withhold amounts from the Fiscal Recovery Funds.

VI. Transfer

The statute authorizes State, territorial, and Tribal governments; counties; metropolitan cities; and nonentitlement units of local government (counties, metropolitan

cities, and nonentitlement units of local government are collectively referred to as "local governments") to transfer amounts paid from the Fiscal Recovery Funds to a number of specified entities. By permitting these transfers, Congress recognized the importance of providing flexibility to governments seeking to achieve the greatest impact with their funds, including by working with other levels or units of government or private entities to assist recipient governments in carrying out their programs. This includes special-purpose districts that perform specific functions in the community, such as fire, water, sewer, or mosquito abatement districts.

Specifically, under section 602(c)(3), a State, territory, or Tribal government may transfer funds to a "private nonprofit organization . . . a Tribal organization . . . a public benefit corporation involved in the transportation of passengers or cargo, or a special-purpose unit of State or local government."¹⁸⁰ Similarly, section 603(c)(3) authorizes a local government to transfer funds to the same entities (other than Tribal organizations).

The interim final rule clarifies that the lists of transferees in sections 602(c)(3) and 603(c)(3) are not exclusive. The interim final rule permits State, territorial, and Tribal governments to transfer Fiscal Recovery Funds to other constituent units of government or private entities beyond those specified in the statute. Similarly, local governments are authorized to transfer Fiscal Recovery Funds to other constituent units of government (*e.g.*, a county is able to transfer Fiscal Recovery Funds to a city, town, or school district within it) or to private entities. This approach is intended to help provide funding to local governments with needs that may exceed the allocation provided under the statutory formula.

State, local, territorial, and Tribal governments that receive a Federal award directly from a Federal awarding agency, such as Treasury, are "recipients." A transferee receiving a transfer from a recipient under sections 602(c)(3) and 603(c)(3) will be a subrecipient. Subrecipients are entities that receive a subaward from a recipient to carry out a program or project on behalf of the recipient with the recipient's Federal award funding. The recipient remains responsible for monitoring and overseeing the subrecipient's use of Fiscal Recovery Funds and other activities related to the award to ensure that the subrecipient complies with the statutory and

regulatory requirements and the terms and conditions of the award. Recipients also remain responsible for reporting to Treasury on their subrecipients' use of payments from the Fiscal Recovery Funds for the duration of the award.

Transfers under sections 602(c)(3) and 603(c)(3) must qualify as an eligible use of Fiscal Recovery Funds by the transferor. Once Fiscal Recovery Funds are received, the transferee must abide by the restrictions on use applicable to the transferor under the ARPA and other applicable law and program guidance. For example, if a county transferred Fiscal Recovery Funds to a town within its borders to respond to the COVID-19 public health emergency, the town would be bound by the eligible use requirements applicable to the county in carrying out the county's goal. This also means that county A may not transfer Fiscal Recovery Funds to county B for use in county B because such a transfer would not, from the perspective of the transferor (county A), be an eligible use in county A.

Section 603(c)(4) separately provides for transfers by a local government to its State or territory. A transfer under section 603(c)(4) will not make the State a subrecipient of the local government, and such Fiscal Recovery Funds may be used by the State for any purpose permitted under section 602(c). A transfer under section 603(c)(4) will result in a cancellation or termination of the award on the part of the transferor local government and a modification of the award to the transferee State or territory. The transferor must provide notice of the transfer to Treasury in a format specified by Treasury. If the local government does not provide such notice, it will remain legally obligated to Treasury under the award and remain responsible for ensuring that the awarded Fiscal Recovery Funds are being used in accordance with the statute and program guidance and for reporting on such uses to Treasury. A State that receives a transfer from a local government under section 603(c)(4) will be bound by all of the use restrictions set forth in section 602(c) with respect to the use of those Fiscal Recovery Funds, including the prohibitions on use of such Fiscal Recovery Funds to offset certain reductions in taxes or to make deposits into pension funds.

Question 35: What are the advantages and disadvantages of treating the list of transferees in sections 602(c)(3) and 603(c)(3) as nonexclusive, allowing States and localities to transfer funds to entities outside of the list?

Question 36: Are there alternative ways of defining "special-purpose unit of State or local government" and

¹⁷⁸ Includes the period during and immediately following recessions, as defined by the National Bureau of Economic Research. National Bureau of Economic Research, US Business Cycle Expansions and Contractions, <https://www.nber.org/research/data/us-business-cycle-expansions-and-contractions> (last visited Apr. 27, 2021). ¹⁸⁰ Section 602(c)(3) of the Act.

“public benefit corporation” that would better further the aims of the Funds?

VII. Nonentitlement Units of Government

The Fiscal Recovery Funds provides for \$19.53 billion in payments to be made to States and territories which will distribute the funds to nonentitlement units of local government (NEUs); local governments which generally have populations below 50,000. These local governments have not yet received direct fiscal relief from the Federal Government during the COVID-19 public health emergency, making Fiscal Recovery Funds payments an important source of support for their public health and economic responses. Section 603 requires Treasury to allocate and pay Fiscal Recovery Funds to the States and territories and requires the States and territories to distribute Fiscal Recovery Funds to NEUs based on population within 30 days of receipt unless an extension is granted by the Secretary. The interim final rule clarifies certain aspects regarding the distribution of Fiscal Recovery by States and territories to NEUs, as well as requirements around timely payments from the Fiscal Recovery Funds.

The ARPA requires that States and territories allocate funding to NEUs in an amount that bears the same proportion as the population of the NEU bears to the total population of all NEUs in the State or territory, subject to a cap (described below). Because the statute requires States and territories to make distributions based on population, States and territories may not place additional conditions or requirements on distributions to NEUs, beyond those required by the ARPA and Treasury’s implementing regulations and guidance. For example, a State may not impose stricter limitations than permitted by statute or Treasury regulations or guidance on an NEU’s use of Fiscal Recovery Funds based on the NEU’s proposed spending plan or other policies. States and territories are also not permitted to offset any debt owed by the NEU against the NEU’s distribution. Further, States and territories may not provide funding on a reimbursement basis—*e.g.*, requiring NEUs to pay for project costs up front before being reimbursed with Fiscal Recovery Funds payments—because this funding model would not comport with the statutory requirement that States and territories make distributions to NEUs within the statutory timeframe.

Similarly, States and territories distributing Fiscal Recovery Funds payments to NEUs are responsible for

complying with the Fiscal Recovery Funds statutory requirement that distributions to NEUs not exceed 75 percent of the NEU’s most recent budget. The most recent budget is defined as the NEU’s most recent annual total operating budget, including its general fund and other funds, as of January 27, 2020. Amounts in excess of such cap and therefore not distributed to the NEU must be returned to Treasury by the State or territory. States and territories may rely for this determination on a certified top-line budget total from the NEU.

Under the interim final rule, the total allocation and distribution to an NEU, including the sum of both the first and second tranches of funding, cannot exceed the 75 percent cap. States and territories must permit NEUs without formal budgets as of January 27, 2020 to self-certify their most recent annual expenditures as of January 27, 2020 for the purpose of calculating the cap. This approach will provide an administrable means to implement the cap for small local governments that do not adopt a formal budget.

Section 603(b)(3) of the Social Security Act provides for Treasury to make payments to counties but provides that, in the case of an amount to be paid to a county that is not a unit of general local government, the amount shall instead be paid to the State in which such county is located, and such State shall distribute such amount to each unit of general local government within such county in an amount that bears the same proportion to the amount to be paid to such county as the population of such units of general local government bears to the total population of such county. As with NEUs, States may not place additional conditions or requirements on distributions to such units of general local government, beyond those required by the ARPA and Treasury’s implementing regulations and guidance.

In the case of consolidated governments, section 603(b)(4) allows consolidated governments (*e.g.*, a city-county consolidated government) to receive payments under each allocation based on the respective formulas. In the case of a consolidated government, Treasury interprets the budget cap to apply to the consolidated government’s NEU allocation under section 603(b)(2) but not to the consolidated government’s county allocation under section 603(b)(3).

If necessary, States and territories may use the Fiscal Recovery Funds under section 602(c)(1)(A) to fund expenses related to administering payments to NEUs and units of general local

government, as disbursing these funds itself is a response to the public health emergency and its negative economic impacts. If a State or territory requires more time to disburse Fiscal Recovery Funds to NEUs than the allotted 30 days, Treasury will grant extensions of not more than 30 days for States and territories that submit a certification in writing in accordance with section 603(b)(2)(C)(i)(I). Additional extensions may be granted at the discretion of the Secretary.

Question 37: What are alternative ways for States and territories to enforce the 75 percent cap while reducing the administrative burden on them?

Question 38: What criteria should Treasury consider in assessing requests for extensions for further time to distribute NEU payments?

VIII. Reporting

States (defined to include the District of Columbia), territories, metropolitan cities, counties, and Tribal governments will be required to submit one interim report and thereafter quarterly Project and Expenditure reports through the end of the award period on December 31, 2026. The interim report will include a recipient’s expenditures by category at the summary level from the date of award to July 31, 2021 and, for States and territories, information related to distributions to nonentitlement units. Recipients must submit their interim report to Treasury by August 31, 2021. Nonentitlement units of local government are not required to submit an interim report.

The quarterly Project and Expenditure reports will include financial data, information on contracts and subawards over \$50,000, types of projects funded, and other information regarding a recipient’s utilization of the award funds. The reports will include the same general data (*e.g.*, on obligations, expenditures, contracts, grants, and subawards) as those submitted by recipients of the CRF, with some modifications. Modifications will include updates to the expenditure categories and the addition of data elements related to specific eligible uses, including some of the reporting elements described in sections above. The initial quarterly Project and Expenditure report will cover two calendar quarters from the date of award to September 30, 2021, and must be submitted to Treasury by October 31, 2021. The subsequent quarterly reports will cover one calendar quarter and must be submitted to Treasury within 30 days after the end of each calendar quarter.

Nonentitlement units of local government will be required to submit

annual Project and Expenditure reports until the end of the award period on December 31, 2026. The initial annual Project and Expenditure report for nonentitlement units of local government will cover activity from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year.

States, territories, metropolitan cities, and counties with a population that exceeds 250,000 residents will also be required to submit an annual Recovery Plan Performance report to Treasury. The Recovery Plan Performance report will provide the public and Treasury information on the projects that recipients are undertaking with program funding and how they are planning to ensure project outcomes are achieved in an effective, efficient, and equitable manner. Each jurisdiction will have some flexibility in terms of the form and content of the Recovery Plan Performance report, as long as it includes the minimum information required by Treasury. The Recovery Plan Performance report will include key performance indicators identified by the recipient and some mandatory indicators identified by Treasury, as well as programmatic data in specific eligible use categories and the specific reporting requirements described in the sections above. The initial Recovery Plan Performance report will cover the period from the date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Thereafter, Recovery Plan Performance reports will cover a 12-month period, and recipients will be required to submit the report to Treasury within 30 days after the end of the 12-month period. The second Recovery Plan Performance report will cover the period from July 1, 2021 to June 30, 2022, and must be submitted to Treasury by July 31, 2022. Each annual Recovery Plan Performance report must be posted on the public-facing website of the recipient. Local governments with fewer than 250,000 residents, Tribal governments, and nonentitlement units of local government are not required to develop a Recovery Plan Performance report.

Treasury will provide additional guidance and instructions on the reporting requirements outlined above for the Fiscal Recovery Funds at a later date.

IX. Comments and Effective Date

This interim final rule is being issued without advance notice and public comment to allow for immediate implementation of this program. As

discussed below, the requirements of advance notice and public comment do not apply “to the extent that there is involved . . . a matter relating to agency . . . grants.”¹⁸¹ The interim final rule implements statutory conditions on the eligible uses of the Fiscal Recovery Funds grants, and addresses the payment of those funds, the reporting on uses of funds, and potential consequences of ineligible uses. In addition and as discussed below, the Administrative Procedure Act also provides an exception to ordinary notice-and-comment procedures “when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.”¹⁸² This good cause justification also supports waiver of the 60-day delayed effective date for major rules under the Congressional Review Act at 5 U.S.C. 808(2). Although this interim final rule is effective immediately, comments are solicited from interested members of the public and from recipient governments on all aspects of the interim final rule.

These comments must be submitted on or before July 16, 2021.

X. Regulatory Analyses

Executive Orders 12866 and 13563

This interim final rule is economically significant for the purposes of Executive Orders 12866 and 13563. Treasury, however, is proceeding under the emergency provision at Executive Order 12866 section 6(a)(3)(D) based on the need to act expeditiously to mitigate the current economic conditions arising from the COVID-19 public health emergency. The rule has been reviewed by the Office of Management and Budget (OMB) in accordance with Executive Order 12866. This rule is necessary to implement the ARPA in order to provide economic relief to State, local, and Tribal governments adversely impacted by the COVID-19 public health emergency.

Under Executive Order 12866, OMB must determine whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive Order and subject to review by OMB. Section 3(f) of Executive Order 12866 defines a significant regulatory

action as an action likely to result in a rule that may:

(1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local, or Tribal governments or communities in a material way (also referred to as “economically significant” regulations);

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This regulatory action is an economically significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866. Treasury has also reviewed these regulations under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, section 1(b) of Executive Order 13563 requires that an agency:

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives taking into account, among other things, and to the extent practicable, the costs of cumulative regulations;

(3) Select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including providing economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or providing information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available

¹⁸¹ 5 U.S.C. 553(a)(2).

¹⁸² 5 U.S.C. 553(b)(3)(B); *see also* 5 U.S.C. 553(d)(3) (creating an exception to the requirement of a 30-day delay before the effective date of a rule “for good cause found and published with the rule”).

techniques to quantify anticipated present and future benefits and costs as accurately as possible.” OMB’s Office of Information and Regulatory Affairs (OIRA) has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

Treasury has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action, and is issuing this interim final rule only on a reasoned determination that the benefits exceed the costs. In choosing among alternative regulatory approaches, Treasury selected those approaches that would maximize net benefits. Based on the analysis that follows and the reasons stated elsewhere in this document, Treasury believes that this interim final rule is consistent with the principles set forth in Executive Order 13563.

Treasury also has determined that this regulatory action does not unduly interfere with States, territories, Tribal governments, and localities in the exercise of their governmental functions.

This Regulatory Impact Analysis discusses the need for regulatory action, the potential benefits, and the potential costs.

Need for Regulatory Action. This interim final rule implements the \$350 billion Fiscal Recovery Funds of the ARPA, which Congress passed to help States, territories, Tribal governments, and localities respond to the ongoing COVID-19 public health emergency and its economic impacts. As the agency charged with execution of these programs, Treasury has concluded that this interim final rule is needed to ensure that recipients of Fiscal Recovery Funds fully understand the requirements and parameters of the program as set forth in the statute and deploy funds in a manner that best reflects Congress’ mandate for targeted fiscal relief.

This interim final rule is primarily a transfer rule: It transfers \$350 billion in aid from the Federal Government to states, territories, Tribal governments, and localities, generating a significant macroeconomic effect on the U.S. economy. In making this transfer, Treasury has sought to implement the program in ways that maximize its potential benefits while minimizing its costs. It has done so by aiming to target relief in key areas according to the congressional mandate; offering clarity to States, territories, Tribal governments, and localities while maintaining their flexibility to respond

to local needs; and limiting administrative burdens.

Analysis of Benefits. Relative to a pre-statutory baseline, the Fiscal Recovery Funds provide a combined \$350 billion to State, local, and Tribal governments for fiscal relief and support for costs incurred responding to the COVID-19 pandemic. Treasury believes that this transfer will generate substantial additional economic activity, although given the flexibility accorded to recipients in the use of funds, it is not possible to precisely estimate the extent to which this will occur and the timing with which it will occur. Economic research has demonstrated that state fiscal relief is an efficient and effective way to mitigate declines in jobs and output during an economic downturn.¹⁸³ Absent such fiscal relief, fiscal austerity among State, local, and Tribal governments could exert a prolonged drag on the overall economic recovery, as occurred following the 2007–09 recession.¹⁸⁴

This interim final rule provides benefits across several areas by implementing the four eligible funding uses, as defined in statute: Strengthening the response to the COVID-19 public health emergency and its economic impacts; easing fiscal pressure on State, local, and Tribal governments that might otherwise lead to harmful cutbacks in employment or government services; providing premium pay to essential workers; and making necessary investments in certain types of infrastructure. In implementing the ARPA, Treasury also sought to support disadvantaged communities that have been disproportionately impacted by the pandemic. The Fiscal Recovery Funds as implemented by the interim final rule can be expected to channel resources toward these uses in order to achieve substantial near-term economic and public health benefits, as well as longer-term benefits arising from the allowable investments in water, sewer, and broadband infrastructure and aid to families.

¹⁸³ Gabriel Chodorow-Reich et al., Does State Fiscal Relief during Recessions Increase Employment? Evidence from the American Recovery and Reinvestment Act, *American Econ. J.: Econ. Policy*, 4:3 118–45 (Aug. 2012), available at <https://www.aeaweb.org/articles?id=10.1257/pol.4.3.118>.

¹⁸⁴ See, e.g., Fitzpatrick, Haughwout & Setren, Fiscal Drag from the State and Local Sector?, Liberty Street Economics Blog, Federal Reserve Bank of New York (June 27, 2012), <https://www.libertystreeteconomics.newyorkfed.org/2012/06/fiscal-drag-from-the-state-and-local-sector.html>; Jiri Jonas, Great Recession and Fiscal Squeeze at U.S. Subnational Government Level, IMF Working Paper 12/184, (July 2012), available at <https://www.imf.org/external/pubs/ft/wp/2012/wp12184.pdf>; Gordon, *supra* note 9.

These benefits are achieved in the interim final rule through a broadly flexible approach that sets clear guidelines on eligible uses of Fiscal Recovery Funds and provides State, local, and Tribal government officials discretion within those eligible uses to direct Fiscal Recovery Funds to areas of greatest need within their jurisdiction. While preserving recipients’ overall flexibility, the interim final rule includes several provisions that implement statutory requirements and will help support use of Fiscal Recovery Funds to achieve the intended benefits. The remainder of this section clarifies how Treasury’s approach to key provisions in the interim final rule will contribute to greater realization of benefits from the program.

- *Revenue Loss:* Recipients will compute the extent of reduction in revenue by comparing actual revenue to a counterfactual trend representing what could have plausibly been expected to occur in the absence of the pandemic. The counterfactual trend begins with the last full fiscal year prior to the public health emergency (as required by statute) and projects forward with an annualized growth adjustment. Treasury’s decision to incorporate a growth adjustment into the calculation of revenue loss ensures that the formula more fully captures revenue shortfalls relative to recipients’ pre-pandemic expectations. Moreover, recipients will have the opportunity to re-calculate revenue loss at several points throughout the program, recognizing that some recipients may experience revenue effects with a lag. This option to re-calculate revenue loss on an ongoing basis should result in more support for recipients to avoid harmful cutbacks in future years. In calculating revenue loss, recipients will look at general revenue in the aggregate, rather than on a source-by-source basis. Given that recipients may have experienced offsetting changes in revenues across sources, Treasury’s approach provides a more accurate representation of the effect of the pandemic on overall revenues.

- *Premium Pay:* Per the statute, recipients have broad latitude to designate critical infrastructure sectors and make grants to third-party employers for the purpose of providing premium pay or otherwise respond to essential workers. While the interim final rule generally preserves the flexibility in the statute, it does add a requirement that recipients give written justification in the case that premium pay would increase a worker’s annual pay above a certain threshold. To set this threshold, Treasury analyzed data

from the Bureau of Labor Statistics to determine a level that would not require further justification for premium pay to the vast majority of essential workers, while requiring higher scrutiny for provision of premium pay to higher-earners who, even without premium pay, would likely have greater personal financial resources to cope with the effects of the pandemic. Treasury believes the threshold in the interim final rule strikes the appropriate balance between preserving flexibility and helping encourage use of these resources to help those in greatest need. The interim final rule also requires that eligible workers have regular in-person interactions or regular physical handling of items that were also handled by others. This requirement will also help encourage use of financial resources for those who have endured the heightened risk of performing essential work.

- *Withholding of Payments to Recipients:* Treasury believes that for the vast majority of recipient entities, it will be appropriate to receive funds in two separate payments. As discussed above, withholding of payments ensures that recipients can adapt spending plans to evolving economic conditions and that at least some of the economic benefits will be realized in 2022 or later. However, consistent with authorities granted to Treasury in the statute, Treasury recognizes that a subset of States with significant remaining elevation in the unemployment rate could face heightened additional near-term needs to aid unemployed workers and stimulate the recovery. Therefore, for a subset of State governments, Treasury will not withhold any funds from the first payment. Treasury believes that this approach strikes the appropriate balance between the general reasons to provide funds in two payments and the heightened additional near-term needs in specific States. As discussed above, Treasury set a threshold based on historical analysis of unemployment rates in recessions.

- *Hiring Public Sector Employees:* The interim final rule states explicitly that recipients may use funds to restore their workforces up to pre-pandemic levels. Treasury believes that this statement is beneficial because it eliminates any uncertainty that could cause delays or otherwise negatively impact restoring public sector workforces (which, at time of publication, remain significantly below pre-pandemic levels).

Finally, the interim final rule aims to promote and streamline the provision of assistance to individuals and communities in greatest need,

particularly communities that have been historically disadvantaged and have experienced disproportionate impacts of the COVID-19 crisis. Targeting relief is in line with Executive Order 13985, “Advancing Racial Equity and Support for Underserved Communities Through the Federal Government,” which laid out an Administration-wide priority to support “equity for all, including people of color and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality.”¹⁸⁵ To this end, the interim final rule enumerates a list of services that may be provided using Fiscal Recovery Funds in low-income areas to address the disproportionate impacts of the pandemic in these communities; establishes the characteristics of essential workers eligible for premium pay and encouragement to serve workers based on financial need; provides that recipients may use Fiscal Recovery Funds to restore (to pre-pandemic levels) state and local workforces, where women and people of color are disproportionately represented;¹⁸⁶ and targets investments in broadband infrastructure to unserved and underserved areas. Collectively, these provisions will promote use of resources to facilitate the provision of assistance to individuals and communities with the greatest need.

Analysis of Costs. This regulatory action will generate administrative costs relative to a pre-statutory baseline. This includes, chiefly, costs required to administer Fiscal Recovery Funds, oversee subrecipients and beneficiaries, and file periodic reports with Treasury. It also requires States to allocate Fiscal Recovery Funds to nonentitlement units, which are smaller units of local government that are statutorily required to receive their funds through States.

Treasury expects that the administrative burden associated with this program will be moderate for a grant program of its size. Treasury expects that most recipients receive direct or indirect funding from Federal Government programs and that many

¹⁸⁵ Executive Order on Advancing Racial Equity and Support for Underserved Communities through the Federal Government (Jan. 20, 2021) (86 FR 7009, January 25, 2021), <https://www.whitehouse.gov/briefing-room/presidential-actions/2021/01/20/executive-order-advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government/> (last visited May 9, 2021).

¹⁸⁶ David Cooper, Mary Gable & Algernon Austin, Economic Policy Institute Briefing Paper, The Public-Sector Jobs Crisis: Women and African Americans hit hardest by job losses in state and local governments, <https://www.epi.org/publication/bp339-public-sector-jobs-crisis> (last visited May 9, 2021).

have familiarity with how to administer and report on Federal funds or grant funding provided by other entities. In particular, States, territories, and large localities will have received funds from the CRF and Treasury expects them to rely heavily on established processes developed last year or through prior grant funding, mitigating burden on these governments.

Treasury expects to provide technical assistance to defray the costs of administration of Fiscal Recovery Funds to further mitigate burden. In making implementation choices, Treasury has hosted numerous consultations with a diverse range of direct recipients—States, small cities, counties, and Tribal governments—along with various communities across the United States, including those that are underserved. Treasury lacks data to estimate the precise extent to which this interim final rule generates administrative burden for State, local, and Tribal governments, but seeks comment to better estimate and account for these costs, as well as on ways to lessen administrative burdens.

Executive Order 13132

Executive Order 13132 (entitled Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State, local, and Tribal governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This interim final rule does not have federalism implications within the meaning of the Executive order and does not impose substantial, direct compliance costs on State, local, and Tribal governments or preempt state law within the meaning of the Executive order. The compliance costs are imposed on State, local, and Tribal governments by sections 602 and 603 of the Social Security Act, as enacted by the ARPA. Notwithstanding the above, Treasury has engaged in efforts to consult and work cooperatively with affected State, local, and Tribal government officials and associations in the process of developing the interim final rule. Pursuant to the requirements set forth in section 8(a) of Executive Order 13132, Treasury certifies that it has complied with the requirements of Executive Order 13132.

Administrative Procedure Act

The Administrative Procedure Act (APA), 5 U.S.C. 551 *et seq.*, generally requires public notice and an opportunity for comment before a rule

becomes effective. However, the APA provides that the requirements of 5 U.S.C. 553 do not apply “to the extent that there is involved . . . a matter relating to agency . . . grants.” The interim final rule implements statutory conditions on the eligible uses of the Fiscal Recovery Funds grants, and addresses the payment of those funds, the reporting on uses of funds, and potential consequences of ineligible uses. The rule is thus “both clearly and directly related to a federal grant program.” *National Wildlife Federation v. Snow*, 561 F.2d 227, 232 (D.C. Cir. 1976). The rule sets forth the “process necessary to maintain state . . . eligibility for federal funds,” *id.*, as well as the “method[s] by which states can . . . qualify for federal aid,” and other “integral part[s] of the grant program,” *Center for Auto Safety v. Tiemann*, 414 F. Supp. 215, 222 (D.D.C. 1976). As a result, the requirements of 5 U.S.C. 553 do not apply.

The APA also provides an exception to ordinary notice-and-comment procedures “when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.” 5 U.S.C. 553(b)(3)(B); *see also* 5 U.S.C. 553(d)(3) (creating an exception to the requirement of a 30-day delay before the effective date of a rule “for good cause found and published with the rule”). Assuming 5 U.S.C. 553 applied, Treasury would still have good cause under sections 553(b)(3)(B) and 553(d)(3) for not undertaking section 553’s requirements. The ARPA is a law responding to a historic economic and

public health emergency; it is “extraordinary” legislation about which “both Congress and the President articulated a profound sense of ‘urgency.’” *Petry v. Block*, 737 F.2d 1193, 1200 (D.C. Cir. 1984). Indeed, several provisions implemented by this interim final rule (sections 602(c)(1)(A) and 603(c)(1)(A)) explicitly provide funds to “respond to the public health emergency,” and the urgency is further exemplified by Congress’s command (in sections 602(b)(6)(B) and 603(b)(7)(A)) that, “[t]o the extent practicable,” funds must be provided to Tribes and cities “not later than 60 days after the date of enactment.” *See Philadelphia Citizens in Action v. Schweiker*, 669 F.2d 877, 884 (3d Cir. 1982) (finding good cause under circumstances, including statutory time limits, where APA procedures would have been “virtually impossible”). Finally, there is an urgent need for States to undertake the planning necessary for sound fiscal policymaking, which requires an understanding of how funds provided under the ARPA will augment and interact with existing budgetary resources and tax policies. Treasury understands that many states require immediate rules on which they can rely, especially in light of the fact that the ARPA “covered period” began on March 3, 2021. The statutory urgency and practical necessity are good cause to forego the ordinary requirements of notice-and-comment rulemaking.

Congressional Review Act

The Administrator of OIRA has determined that this is a major rule for purposes of Subtitle E of the Small Business Regulatory Enforcement and Fairness Act of 1996 (also known as the

Congressional Review Act or CRA) (5 U.S.C. 804(2) *et seq.*). Under the CRA, a major rule takes effect 60 days after the rule is published in the **Federal Register**. 5 U.S.C. 801(a)(3). Notwithstanding this requirement, the CRA allows agencies to dispense with the requirements of section 801 when the agency for good cause finds that such procedure would be impracticable, unnecessary, or contrary to the public interest and the rule shall take effect at such time as the agency promulgating the rule determines. 5 U.S.C. 808(2). Pursuant to section 808(2), for the reasons discussed above, Treasury for good cause finds that a 60-day delay to provide public notice is impracticable and contrary to the public interest.

Paperwork Reduction Act

The information collections associated with State, territory, local, and Tribal government applications materials necessary to receive Fiscal Recovery Funds (*e.g.*, payment information collection and acceptance of award terms) have been reviewed and approved by OMB pursuant to the Paperwork Reduction Act (44 U.S.C. chapter 35) (PRA) emergency processing procedures and assigned control number 1505–0271. The information collections related to ongoing reporting requirements, as discussed in this interim final rule, will be submitted to OMB for emergency processing in the near future. Under the PRA, an agency may not conduct or sponsor and a respondent is not required to respond to, an information collection unless it displays a valid OMB control number.

Estimates of hourly burden under this program are set forth in the table below. Burden estimates below are preliminary.

Reporting	Number of respondents (estimated)	Number of responses per respondent	Total responses	Hours per response	Total burden in hours	Cost to respondent (\$48.80 per hour*)
Recipient Payment Form	5,050	1	5,050	.25 (15 minutes) ...	1,262.5	\$61,610
Acceptance of Award Terms	5,050	1	5,050	.25 (15 minutes) ...	1,262.5	61,610
Title VI Assurances	5,050	1	5,050	.50 (30 minutes) ...	2,525	123,220
Quarterly Project and Expenditure Report.	5,050	4***	20,200	25	505,000	24,644,000
Annual Project and Expenditure Report from NEUs.	TBD	1 per year	†20,000–40,000	15	300,000–600,000	14,640,000–29,280,000
Annual Recovery Plan Performance report.	418	1 per year	418	100	41,800	2,039,840
Total	(**)	N/A	55,768–75,768	141	851,850–1,151,850	41,570,280–56,210,280

*Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, Accountants and Auditors, on the internet at <https://www.bls.gov/oooh/business-and-financial/accountants-and-auditors.htm> (visited March 28, 2020). Base wage of \$33.89/hour increased by 44 percent to account for fully loaded employer cost of employee compensation (benefits, etc.) for a fully loaded wage rate of \$48.80.

**5,050–TBD.

***Per year after first year.

† (Estimate only).

Periodic reporting is required by section 602(c) of Section VI of the Social Security Act and under the interim final rule.

As discussed in Section VIII of this **SUPPLEMENTARY INFORMATION**, recipients of Fiscal Recovery Funds will be required to submit one interim report

and thereafter quarterly Project and Expenditure reports until the end of the award period. Recipients must submit interim reports to Treasury by August

31, 2021. The quarterly Project and Expenditure reports will include financial data, information on contracts and subawards over \$50,000, types of projects funded, and other information regarding a recipient's utilization of the award funds.

Nonentitlement unit recipients will be required to submit annual Project and Expenditure reports until the end of the award period. The initial annual Project and Expenditure report for Nonentitlement unit recipients must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year. States, territories, metropolitan cities, and counties with a population that exceeds 250,000 residents will also be required to submit an annual Recovery Plan Performance report to Treasury. The Recovery Plan Performance report will include descriptions of the projects funded and information on the performance indicators and objectives of the award. Each annual Recovery Plan Performance report must be posted on the public-facing website of the recipient. Treasury will provide additional guidance and instructions on all the reporting requirements outlined above for the Fiscal Recovery Funds program at a later date.

These and related periodic reporting requirements are under consideration and will be submitted to OMB for approval under the PRA emergency provisions in the near future.

Treasury invites comments on all aspects of the reporting and recordkeeping requirements including: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Comments should be sent by the comment deadline to the www.regulations.gov docket with a copy to the Office of Information and Regulatory Affairs, U.S. Office of Management and Budget, 725 17th Street NW, Washington, DC 20503; or email to oir_submission@omb.eop.gov.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act (RFA) generally requires that when an agency issues a proposed rule, or a final rule

pursuant to section 553(b) of the Administrative Procedure Act or another law, the agency must prepare a regulatory flexibility analysis that meets the requirements of the RFA and publish such analysis in the **Federal Register**. 5 U.S.C. 603, 604.

Rules that are exempt from notice and comment under the APA are also exempt from the RFA requirements, including the requirement to conduct a regulatory flexibility analysis, when among other things the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. Since this rule is exempt from the notice and comment requirements of the APA, Treasury is not required to conduct a regulatory flexibility analysis.

List of Subjects in 31 CFR Part 35

Executive compensation, Public health emergency, State and local governments, Tribal governments.

For the reasons stated in the preamble, the Department of the Treasury amends 31 CFR part 35 as follows:

PART 35—PANDEMIC RELIEF PROGRAMS

- 1. The authority citation for part 35 is revised to read as follows:

Authority: 42 U.S.C. 802(f); 42 U.S.C. 803(f); 31 U.S.C. 321; Division N, Title V, Subtitle B, Pub. L. 116–260, 134 Stat. 1182; Section 104A, Pub. L. 103–325, 108 Stat. 2160, as amended (12 U.S.C. 4701 *et seq.*); Pub. L. 117–2, 135 Stat. 4 (42 U.S.C. 802 *et seq.*).

- 2. Revise the part heading to read as set forth above.
- 3. Add subpart A to read as follows:

Subpart A—Coronavirus State and Local Fiscal Recovery Funds

Sec.	
35.1	Purpose.
35.2	Applicability.
35.3	Definitions.
35.4	Reservation of authority, reporting.
35.5	Use of funds.
35.6	Eligible uses.
35.7	Pensions.
35.8	Tax.
35.9	Compliance with applicable laws.
35.10	Recoupment.
35.11	Payments to States.
35.12	Distributions to nonentitlement units of local government and units of general local government.

§ 35.1 Purpose.

This subpart implements section 9901 of the American Rescue Plan Act (Subtitle M of Title IX of Pub. L. 117–2), which amends Title VI of the Social Security Act (42 U.S.C. 801 *et*

seq.) by adding sections 602 and 603 to establish the Coronavirus State Fiscal Recovery Fund and Coronavirus Local Fiscal Recovery Fund.

§ 35.2 Applicability.

This subpart applies to States, territories, Tribal governments, metropolitan cities, nonentitlement units of local government, counties, and units of general local government that accept a payment or transfer of funds made under section 602 or 603 of the Social Security Act.

§ 35.3 Definitions.

As used in this subpart:

Baseline means tax revenue of the recipient for its fiscal year ending in 2019, adjusted for inflation in each reporting year using the Bureau of Economic Analysis's Implicit Price Deflator for the gross domestic product of the United States.

County means a county, parish, or other equivalent county division (as defined by the Census Bureau).

Covered benefits include, but are not limited to, the costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans (Federal and State), workers' compensation insurance, and Federal Insurance Contributions Act taxes (which includes Social Security and Medicare taxes).

Covered change means a change in law, regulation, or administrative interpretation. A change in law includes any final legislative or regulatory action, a new or changed administrative interpretation, and the phase-in or taking effect of any statute or rule if the phase-in or taking effect was not prescribed prior to the start of the covered period.

Covered period means, with respect to a State, Territory, or Tribal government, the period that:

- (1) Begins on March 3, 2021; and
- (2) Ends on the last day of the fiscal year of such State, Territory, or Tribal government in which all funds received by the State, Territory, or Tribal government from a payment made under section 602 or 603 of the Social Security Act have been expended or returned to, or recovered by, the Secretary.

COVID–19 means the Coronavirus Disease 2019.

COVID–19 public health emergency means the period beginning on January 27, 2020 and until the termination of the national emergency concerning the COVID–19 outbreak declared pursuant to the National Emergencies Act (50 U.S.C. 1601 *et seq.*).

Deposit means an extraordinary payment of an accrued, unfunded liability. The term deposit does not refer to routine contributions made by an employer to pension funds as part of the employer's obligations related to payroll, such as either a pension contribution consisting of a normal cost component related to current employees or a component addressing the amortization of unfunded liabilities calculated by reference to the employer's payroll costs.

Eligible employer means an employer of an eligible worker who performs essential work.

Eligible workers means workers needed to maintain continuity of operations of essential critical infrastructure sectors, including health care; emergency response; sanitation, disinfection, and cleaning work; maintenance work; grocery stores, restaurants, food production, and food delivery; pharmacy; biomedical research; behavioral health work; medical testing and diagnostics; home- and community-based health care or assistance with activities of daily living; family or child care; social services work; public health work; vital services to Tribes; any work performed by an employee of a State, local, or Tribal government; educational work, school nutrition work, and other work required to operate a school facility; laundry work; elections work; solid waste or hazardous materials management, response, and cleanup work; work requiring physical interaction with patients; dental care work; transportation and warehousing; work at hotel and commercial lodging facilities that are used for COVID-19 mitigation and containment; work in a mortuary; work in critical clinical research, development, and testing necessary for COVID-19 response.

(1) With respect to a recipient that is a metropolitan city, nonentitlement unit of local government, or county, workers in any additional sectors as each chief executive officer of such recipient may designate as critical to protect the health and well-being of the residents of their metropolitan city, nonentitlement unit of local government, or county; or

(2) With respect to a State, Territory, or Tribal government, workers in any additional sectors as each Governor of a State or Territory, or each Tribal government, may designate as critical to protect the health and well-being of the residents of their State, Territory, or Tribal government.

Essential work means work that:

- (1) Is not performed while teleworking from a residence; and
- (2) Involves:

(i) Regular in-person interactions with patients, the public, or coworkers of the individual that is performing the work; or

(ii) Regular physical handling of items that were handled by, or are to be handled by patients, the public, or coworkers of the individual that is performing the work.

Funds means, with respect to a recipient, amounts provided to the recipient pursuant to a payment made under section 602(b) or 603(b) of the Social Security Act or transferred to the recipient pursuant to section 603(c)(4) of the Social Security Act.

General revenue means money that is received from tax revenue, current charges, and miscellaneous general revenue, excluding refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, agency or private trust transactions, and intergovernmental transfers from the Federal Government, including transfers made pursuant to section 9901 of the American Rescue Plan Act. General revenue does not include revenues from utilities. Revenue from Tribal business enterprises must be included in general revenue.

Intergovernmental transfers means money received from other governments, including grants and shared taxes.

Metropolitan city has the meaning given that term in section 102(a)(4) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(4)) and includes cities that relinquish or defer their status as a metropolitan city for purposes of receiving allocations under section 106 of such Act (42 U.S.C. 5306) for fiscal year 2021.

Net reduction in total spending is measured as the State or Territory's total spending for a given reporting year excluding its spending of funds, subtracted from its total spending for its fiscal year ending in 2019, adjusted for inflation using the Bureau of Economic Analysis's Implicit Price Deflator for the gross domestic product of the United States.

Nonentitlement unit of local government means a "city," as that term is defined in section 102(a)(5) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(5)), that is not a metropolitan city.

Nonprofit means a nonprofit organization that is exempt from Federal income taxation and that is described in section 501(c)(3) of the Internal Revenue Code.

Obligation means an order placed for property and services and entering into

contracts, subawards, and similar transactions that require payment.

Pension fund means a defined benefit plan and does not include a defined contribution plan.

Premium pay means an amount of up to \$13 per hour that is paid to an eligible worker, in addition to wages or remuneration the eligible worker otherwise receives, for all work performed by the eligible worker during the COVID-19 public health emergency. Such amount may not exceed \$25,000 with respect to any single eligible worker. Premium pay will be considered to be in addition to wages or remuneration the eligible worker otherwise receives if, as measured on an hourly rate, the premium pay is:

(1) With regard to work that the eligible worker previously performed, pay and remuneration equal to the sum of all wages and remuneration previously received plus up to \$13 per hour with no reduction, substitution, offset, or other diminishment of the eligible worker's previous, current, or prospective wages or remuneration; or

(2) With regard to work that the eligible worker continues to perform, pay of up to \$13 that is in addition to the eligible worker's regular rate of wages or remuneration, with no reduction, substitution, offset, or other diminishment of the workers' current and prospective wages or remuneration.

Qualified census tract has the same meaning given in 26 U.S.C. 42(d)(5)(B)(ii)(I).

Recipient means a State, Territory, Tribal government, metropolitan city, nonentitlement unit of local government, county, or unit of general local government that receives a payment made under section 602(b) or 603(b) of the Social Security Act or transfer pursuant to section 603(c)(4) of the Social Security Act.

Reporting year means a single year or partial year within the covered period, aligned to the current fiscal year of the State or Territory during the covered period.

Secretary means the Secretary of the Treasury.

State means each of the 50 States and the District of Columbia.

Small business means a business concern or other organization that:

(1) Has no more than 500 employees, or if applicable, the size standard in number of employees established by the Administrator of the Small Business Administration for the industry in which the business concern or organization operates; and

(2) Is a small business concern as defined in section 3 of the Small Business Act (15 U.S.C. 632).

Tax revenue means revenue received from a compulsory contribution that is exacted by a government for public purposes excluding refunds and corrections and, for purposes of § 35.8, intergovernmental transfers. Tax revenue does not include payments for a special privilege granted or service rendered, employee or employer assessments and contributions to finance retirement and social insurance trust systems, or special assessments to pay for capital improvements.

Territory means the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, or American Samoa.

Tribal enterprise means a business concern:

(1) That is wholly owned by one or more Tribal governments, or by a corporation that is wholly owned by one or more Tribal governments; or

(2) That is owned in part by one or more Tribal governments, or by a corporation that is wholly owned by one or more Tribal governments, if all other owners are either United States citizens or small business concerns, as these terms are used and consistent with the definitions in 15 U.S.C. 657a(b)(2)(D).

Tribal government means the recognized governing body of any Indian or Alaska Native tribe, band, nation, pueblo, village, community, component band, or component reservation, individually identified (including parenthetically) in the list published by the Bureau of Indian Affairs on January 29, 2021, pursuant to section 104 of the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 5131).

Unemployment rate means the U–3 unemployment rate provided by the Bureau of Labor Statistics as part of the Local Area Unemployment Statistics program, measured as total unemployment as a percentage of the civilian labor force.

Unemployment trust fund means an unemployment trust fund established under section 904 of the Social Security Act (42 U.S.C. 1104).

Unit of general local government has the meaning given to that term in section 102(a)(1) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(1)).

Unserved and underserved households or businesses means one or more households or businesses that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed.

§ 35.4 Reservation of authority, reporting.

(a) *Reservation of authority.* Nothing in this subpart shall limit the authority of the Secretary to take action to enforce conditions or violations of law, including actions necessary to prevent evasions of this subpart.

(b) *Extensions or accelerations of timing.* The Secretary may extend or accelerate any deadline or compliance date of this subpart, including reporting requirements that implement this subpart, if the Secretary determines that such extension or acceleration is appropriate. In determining whether an extension or acceleration is appropriate, the Secretary will consider the period of time that would be extended or accelerated and how the modified timeline would facilitate compliance with this subpart.

(c) *Reporting and requests for other information.* During the covered period, recipients shall provide to the Secretary periodic reports providing detailed accounting of the uses of funds, all modifications to a State or Territory's tax revenue sources, and such other information as the Secretary may require for the administration of this section. In addition to regular reporting requirements, the Secretary may request other additional information as may be necessary or appropriate, including as may be necessary to prevent evasions of the requirements of this subpart. False statements or claims made to the Secretary may result in criminal, civil, or administrative sanctions, including fines, imprisonment, civil damages and penalties, debarment from participating in Federal awards or contracts, and/or any other remedy available by law.

§ 35.5 Use of funds.

(a) *In general.* A recipient may only use funds to cover costs incurred during the period beginning March 3, 2021, and ending December 31, 2024, for one or more of the purposes enumerated in sections 602(c)(1) and 603(c)(1) of the Social Security Act, as applicable, including those enumerated in section § 35.6, subject to the restrictions set forth in sections 602(c)(2) and 603(c)(2) of the Social Security Act, as applicable.

(b) *Costs incurred.* A cost shall be considered to have been incurred for purposes of paragraph (a) of this section if the recipient has incurred an obligation with respect to such cost by December 31, 2024.

(c) *Return of funds.* A recipient must return any funds not obligated by December 31, 2024, and any funds not expended to cover such obligations by December 31, 2026.

§ 35.6 Eligible uses.

(a) *In general.* Subject to §§ 35.7 and 35.8, a recipient may use funds for one or more of the purposes described in paragraphs (b) through (e) of this section

(b) *Responding to the public health emergency or its negative economic impacts.* A recipient may use funds to respond to the public health emergency or its negative economic impacts, including for one or more of the following purposes:

(1) *COVID–19 response and prevention.* Expenditures for the mitigation and prevention of COVID–19, including:

(i) Expenses related to COVID–19 vaccination programs and sites, including staffing, acquisition of equipment or supplies, facilities costs, and information technology or other administrative expenses;

(ii) COVID–19-related expenses of public hospitals, clinics, and similar facilities;

(iii) COVID–19 related expenses in congregate living facilities, including skilled nursing facilities, long-term care facilities, incarceration settings, homeless shelters, residential foster care facilities, residential behavioral health treatment, and other group living facilities;

(iv) Expenses of establishing temporary public medical facilities and other measures to increase COVID–19 treatment capacity, including related construction costs and other capital investments in public facilities to meet COVID–19-related operational needs;

(v) Expenses of establishing temporary public medical facilities and other measures to increase COVID–19 treatment capacity, including related construction costs and other capital investments in public facilities to meet COVID–19-related operational needs;

(vi) Costs of providing COVID–19 testing and monitoring, contact tracing, and monitoring of case trends and genomic sequencing for variants;

(vii) Emergency medical response expenses, including emergency medical transportation, related to COVID–19;

(viii) Expenses for establishing and operating public telemedicine capabilities for COVID–19-related treatment;

(ix) Expenses for communication related to COVID–19 vaccination programs and communication or enforcement by recipients of public health orders related to COVID–19;

(x) Expenses for acquisition and distribution of medical and protective supplies, including sanitizing products and personal protective equipment;

(xi) Expenses for disinfection of public areas and other facilities in

response to the COVID-19 public health emergency;

(xii) Expenses for technical assistance to local authorities or other entities on mitigation of COVID-19-related threats to public health and safety;

(xiii) Expenses for quarantining or isolation of individuals;

(xiv) Expenses of providing paid sick and paid family and medical leave to public employees to enable compliance with COVID-19 public health precautions;

(xv) Expenses for treatment of the long-term symptoms or effects of COVID-19, including post-intensive care syndrome;

(xvi) Expenses for the improvement of ventilation systems in congregate settings, public health facilities, or other public facilities;

(xvii) Expenses related to establishing or enhancing public health data systems; and

(xviii) Mental health treatment, substance misuse treatment, and other behavioral health services.

(2) *Public health and safety staff.*

Payroll and covered benefit expenses for public safety, public health, health care, human services, and similar employees to the extent that the employee's time is spent mitigating or responding to the COVID-19 public health emergency.

(3) *Hiring State and local government staff.* Payroll, covered benefit, and other costs associated with the recipient increasing the number of its employees up to the number of employees that it employed on January 27, 2020.

(4) *Assistance to unemployed workers.* Assistance, including job training, for individuals who want and are available for work, including those who have looked for work sometime in the past 12 months or who are employed part time but who want and are available for full-time work.

(5) *Contributions to State unemployment insurance trust funds.* Contributions to an unemployment trust fund up to the level required to restore the unemployment trust fund to its balance on January 27, 2020 or to pay back advances received under Title XII of the Social Security Act (42 U.S.C. 1321) for the payment of benefits between January 27, 2020 and May 17, 2021.

(6) *Small businesses.* Assistance to small businesses, including loans, grants, in-kind assistance, technical assistance or other services, that responds to the negative economic impacts of the COVID-19 public health emergency.

(7) *Nonprofits.* Assistance to nonprofit organizations, including loans, grants, in-kind assistance, technical assistance

or other services, that responds to the negative economic impacts of the COVID-19 public health emergency.

(8) *Assistance to households.*

Assistance programs, including cash assistance programs, that respond to the COVID-19 public health emergency.

(9) *Aid to impacted industries.* Aid to tourism, travel, hospitality, and other impacted industries that responds to the negative economic impacts of the COVID-19 public health emergency.

(10) *Expenses to improve efficacy of public health or economic relief programs.* Administrative costs associated with the recipient's COVID-19 public health emergency assistance programs, including services responding to the COVID-19 public health emergency or its negative economic impacts, that are not federally funded.

(11) *Survivor's benefits.* Benefits for the surviving family members of individuals who have died from COVID-19, including cash assistance to widows, widowers, or dependents of individuals who died of COVID-19.

(12) *Disproportionately impacted populations and communities.* A program, service, or other assistance that is provided in a qualified census tract, that is provided to households and populations living in a qualified census tract, that is provided by a Tribal government, or that is provided to other households, businesses, or populations disproportionately impacted by the COVID-19 public health emergency, such as:

(i) Programs or services that facilitate access to health and social services, including:

(A) Assistance accessing or applying for public benefits or services;

(B) Remediation of lead paint or other lead hazards; and

(C) Community violence intervention programs;

(ii) Programs or services that address housing insecurity, lack of affordable housing, or homelessness, including:

(A) Supportive housing or other programs or services to improve access to stable, affordable housing among individuals who are homeless;

(B) Development of affordable housing to increase supply of affordable and high-quality living units; and

(C) Housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity and to reduce concentrated areas of low economic opportunity;

(iii) Programs or services that address or mitigate the impacts of the COVID-19 public health emergency on education, including:

(A) New or expanded early learning services;

(B) Assistance to high-poverty school districts to advance equitable funding across districts and geographies; and

(C) Educational and evidence-based services to address the academic, social, emotional, and mental health needs of students; and

(iv) Programs or services that address or mitigate the impacts of the COVID-19 public health emergency on childhood health or welfare, including:

(A) New or expanded childcare;

(B) Programs to provide home visits by health professionals, parent educators, and social service professionals to individuals with young children to provide education and assistance for economic support, health needs, or child development; and

(C) Services for child welfare-involved families and foster youth to provide support and education on child development, positive parenting, coping skills, or recovery for mental health and substance use.

(c) *Providing premium pay to eligible workers.* A recipient may use funds to provide premium pay to eligible workers of the recipient who perform essential work or to provide grants to eligible employers, provided that any premium pay or grants provided under this paragraph (c) must respond to eligible workers performing essential work during the COVID-19 public health emergency. A recipient uses premium pay or grants provided under this paragraph (c) to respond to eligible workers performing essential work during the COVID-19 public health emergency if it prioritizes low- and moderate-income persons. The recipient must provide, whether for themselves or on behalf of a grantee, a written justification to the Secretary of how the premium pay or grant provided under this paragraph (c) responds to eligible workers performing essential work if the premium pay or grant would increase an eligible worker's total wages and remuneration above 150 percent of such eligible worker's residing State's average annual wage for all occupations or their residing county's average annual wage, whichever is higher.

(d) *Providing government services.* For the provision of government services to the extent of a reduction in the recipient's general revenue, calculated according to paragraphs (d)(1) and (2) of this section.

(1) *Frequency.* A recipient must calculate the reduction in its general revenue using information as-of December 31, 2020, December 31, 2021, December 31, 2022, and December 31, 2023 (each, a calculation date) and following each calculation date.

(2) *Calculation.* A reduction in a recipient's general revenue equals:

$$\text{Max} \{ [\text{Base Year Revenue} * (1 + \text{Growth Adjustment})^{\left(\frac{n_t}{12}\right)}] - \text{Actual General Revenue}_t; 0 \}$$

Where:

Base Year Revenue is the recipient's general revenue for the most recent full fiscal year prior to the COVID-19 public health emergency;

Growth Adjustment is equal to the greater of 4.1 percent (or 0.041) and the recipient's average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency.

n equals the number of months elapsed from the end of the base year to the calculation date.

Actual General Revenue is a recipient's actual general revenue collected during 12-month period ending on each calculation date;

Subscript *t* denotes the specific calculation date.

(e) *To make necessary investments in infrastructure.* A recipient may use funds to make investments in:

(1) *Clean Water State Revolving Fund and Drinking Water State Revolving Fund investments.* Projects or activities of the type that would be eligible under section 603(c) of the Federal Water Pollution Control Act (33 U.S.C. 1383(c)) or section 1452 of the Safe Drinking Water Act (42 U.S.C. 300j-12); or,

(2) *Broadband.* Broadband infrastructure that is designed to provide service to unserved or underserved households and businesses and that is designed to, upon completion:

(i) Reliably meet or exceed symmetrical 100 Mbps download speed and upload speeds; or

(ii) In cases where it is not practicable, because of the excessive cost of the project or geography or topography of the area to be served by the project, to provide service meeting the standards set forth in paragraph (e)(2)(i) of this section:

(A) Reliably meet or exceed 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed; and

(B) Be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed.

§ 35.7 Pensions.

A recipient may not use funds for deposit into any pension fund.

§ 35.8 Tax.

(a) *Restriction.* A State or Territory shall not use funds to either directly or indirectly offset a reduction in the net tax revenue of the State or Territory

resulting from a covered change during the covered period.

(b) *Violation.* Treasury will consider a State or Territory to have used funds to offset a reduction in net tax revenue if, during a reporting year:

(1) *Covered change.* The State or Territory has made a covered change that, either based on a reasonable statistical methodology to isolate the impact of the covered change in actual revenue or based on projections that use reasonable assumptions and do not incorporate the effects of macroeconomic growth to reduce or increase the projected impact of the covered change, the State or Territory assesses has had or predicts to have the effect of reducing tax revenue relative to current law;

(2) *Exceeds the de minimis threshold.* The aggregate amount of the measured or predicted reductions in tax revenue caused by covered changes identified under paragraph (b)(1) of this section, in the aggregate, exceeds 1 percent of the State's or Territory's baseline;

(3) *Reduction in net tax revenue.* The State or Territory reports a reduction in net tax revenue, measured as the difference between actual tax revenue and the State's or Territory's baseline, each measured as of the end of the reporting year; and

(4) *Consideration of other changes.* The aggregate amount of measured or predicted reductions in tax revenue caused by covered changes is greater than the sum of the following, in each case, as calculated for the reporting year:

(i) The aggregate amount of the expected increases in tax revenue caused by one or more covered changes that, either based on a reasonable statistical methodology to isolate the impact of the covered change in actual revenue or based on projections that use reasonable assumptions and do not incorporate the effects of macroeconomic growth to reduce or increase the projected impact of the covered change, the State or Territory assesses has had or predicts to have the effect of increasing tax revenue; and

(ii) Reductions in spending, up to the amount of the State's or Territory's net reduction in total spending, that are in:

(A) Departments, agencies, or authorities in which the State or Territory is not using funds; and

(B) Departments, agencies, or authorities in which the State or Territory is using funds, in an amount equal to the value of the spending cuts in those departments, agencies, or authorities, minus funds used.

(c) *Amount and revenue reduction cap.* If a State or Territory is considered to be in violation pursuant to paragraph (b) of this section, the amount used in violation of paragraph (a) of this section is equal to the lesser of:

(1) The reduction in net tax revenue of the State or Territory for the reporting year, measured as the difference between the State's or Territory's baseline and its actual tax revenue, each measured as of the end of the reporting year; and,

(2) The aggregate amount of the reductions in tax revenues caused by covered changes identified in paragraph (b)(1) of this section, minus the sum of the amounts in identified in paragraphs (b)(4)(i) and (ii).

§ 35.9 Compliance with applicable laws.

A recipient must comply with all other applicable Federal statutes, regulations, and Executive orders, and a recipient shall provide for compliance with the American Rescue Plan Act, this subpart, and any interpretive guidance by other parties in any agreements it enters into with other parties relating to these funds.

§ 35.10 Recoupment.

(a) *Identification of violations—(1) In general.* Any amount used in violation of § 35.5, § 35.6, or § 35.7 may be identified at any time prior to December 31, 2026.

(2) *Annual reporting of amounts of violations.* On an annual basis, a recipient that is a State or Territory must calculate and report any amounts used in violation of § 35.8.

(b) *Calculation of amounts subject to recoupment—(1) In general.* Except as provided in paragraph (b)(2) of this section, Treasury will calculate any amounts subject to recoupment resulting from a violation of § 35.5, § 35.6, or § 35.7 as the amounts used in violation of such restrictions.

(2) *Violations of § 35.8.* Treasury will calculate any amounts subject to recoupment resulting from a violation of § 35.8, equal to the lesser of:

(i) The amount set forth in § 35.8(c); and,

(ii) The amount of funds received by such recipient.

(c) *Notice.* If Treasury calculates an amount subject to recoupment under paragraph (b) of this section, Treasury will provide the recipient a written notice of the amount subject to recoupment along with an explanation of such amounts.

(d) *Request for reconsideration.* Unless Treasury extends the time period, within 60 calendar days of receipt of a notice of recoupment provided under paragraph (c) of this section, a recipient may submit a written request to Treasury requesting reconsideration of any amounts subject to recoupment under paragraph (b) of this section. To request reconsideration of any amounts subject to recoupment, a recipient must submit to Treasury a written request that includes:

(1) An explanation of why the recipient believes all or some of the amount should not be subject to recoupment; and

(2) A discussion of supporting reasons, along with any additional information.

(e) *Final amount subject to recoupment.* Unless Treasury extends the time period, within 60 calendar days of receipt of the recipient's request for reconsideration provided pursuant to paragraph (d) of this section, the recipient will be notified of the Secretary's decision to affirm, withdraw, or modify the notice of recoupment. Such notification will include an explanation of the decision, including responses to the recipient's supporting reasons and consideration of additional information provided.

(f) *Repayment of funds.* Unless Treasury extends the time period, a recipient shall repay to the Secretary any amounts subject to recoupment in accordance with instructions provided by Treasury:

(1) Within 120 calendar days of receipt of the notice of recoupment provided under paragraph (c) of this section, in the case of a recipient that does not submit a request for reconsideration in accordance with the

requirements of paragraph (d) of this section; or

(2) Within 120 calendar days of receipt of the Secretary's decision under paragraph (e) of this section, in the case of a recipient that submits a request for reconsideration in accordance with the requirements of paragraph (d) of this section.

§ 35.11 Payments to States.

(a) *In general.* With respect to any State or Territory that has an unemployment rate as of the date that it submits an initial certification for payment of funds pursuant to section 602(d)(1) of the Social Security Act that is less than two percentage points above its unemployment rate in February 2020, the Secretary will withhold 50 percent of the amount of funds allocated under section 602(b) of the Social Security Act to such State or territory until the date that is twelve months from the date such initial certification is provided to the Secretary.

(b) *Payment of withheld amount.* In order to receive the amount withheld under paragraph (a) of this section, the State or Territory must submit to the Secretary at least 30 days prior to the date referenced in paragraph (a) the following information:

(1) A certification, in the form provided by the Secretary, that such State or Territory requires the payment to carry out the activities specified in section 602(c) of the Social Security Act and will use the payment in compliance with section 602(c) of the Social Security Act; and,

(2) Any reports required to be filed by that date pursuant to this subpart that have not yet been filed.

§ 35.12 Distributions to nonentitlement units of local government and units of general local government.

(a) *Nonentitlement units of local government.* Each State or Territory that receives a payment from Treasury pursuant to section 603(b)(2)(B) of the Social Security Act shall distribute the amount of the payment to nonentitlement units of government in such State or Territory in accordance

with the requirements set forth in section 603(b)(2)(C) of the Social Security Act and without offsetting any debt owed by such nonentitlement units of local governments against such payments.

(b) *Budget cap.* A State or Territory may not make a payment to a nonentitlement unit of local government pursuant to section 603(b)(2)(C) of the Social Security Act and paragraph (a) of this section in excess of the amount equal to 75 percent of the most recent budget for the nonentitlement unit of local government as of January 27, 2020. A State or Territory shall permit a nonentitlement unit of local government without a formal budget as of January 27, 2020, to provide a certification from an authorized officer of the nonentitlement unit of local government of its most recent annual expenditures as of January 27, 2020, and a State or Territory may rely on such certification for purposes of complying with this paragraph (b).

(c) *Units of general local government.* Each State or Territory that receives a payment from Treasury pursuant to section 603(b)(3)(B)(ii) of the Social Security Act, in the case of an amount to be paid to a county that is not a unit of general local government, shall distribute the amount of the payment to units of general local government within such county in accordance with the requirements set forth in section 603(b)(3)(B)(ii) of the Social Security Act and without offsetting any debt owed by such units of general local government against such payments.

(d) *Additional conditions.* A State or Territory may not place additional conditions or requirements on distributions to nonentitlement units of local government or units of general local government beyond those required by section 603 of the Social Security Act or this subpart.

Laurie Schaffer,

Acting General Counsel.

[FR Doc. 2021-10283 Filed 5-13-21; 11:15 am]

BILLING CODE 4810-AK-P

COMMONWEALTH of VIRGINIA

Aubrey L. Layne, Jr., MBA, CPA
Secretary of Finance

P.O. Box 1475
Richmond, Virginia 23218

June 9, 2021

To: Local Officials of Non-Entitlement Units of Government

From: Aubrey L. Layne, Jr., Secretary of Finance

Subject: Allocations of Coronavirus State and Local Fiscal Recovery Funds to Non-Entitlement Units of Government (NEU) Pursuant to the Federal *American Rescue Plan Act* (ARPA)

What you need to know about your ARPA funds – in short

- The Commonwealth has received funding for towns designated by the federal government as NEUs but needs your help to distribute your allocation as soon as possible. A preliminary estimate of the amount available to your town is shown in Appendix A.
- You will need a DUNS number to obtain your funds and meet your federal reporting requirements. Guidance on obtaining a DUNS number is provided in Appendix B. Your first federal report on the use of these funds is required to be submitted to the U.S. Department of Treasury (Treasury) by October 31, 2021. A summary of your federal reporting requirements is also provided in Appendix B. You should be aware that federal guidelines permit towns to use a portion of ARPA funds for administrative costs associated with managing this grant program.
- Towns have broad flexibility to spend these funds to respond to the COVID-19 pandemic. Specific federal requirements and reference links on the use of these funds are provided in Appendices C, D, and E.
- Pursuant to federal law, the amount you receive cannot exceed 75% of the town operating budget that was in effect as of January 27, 2020. In order to confirm the amount you will

receive, you and your fiscal representative will need to provide your town's operating budget amount and sign the certification form provided in Appendix F.

- If you decide to decline your allocation, you will need to sign and return the certification in Appendix G.

Background

As most of you are aware, Congress passed and the President recently signed the ARPA Act of 2021. This Act provides funding for a number of different programs to address the COVID-19 pandemic. A primary component of the ARPA is \$350 billion in assistance for eligible state, local, territorial, and Tribal governments for the direct impact of the COVID-19 pandemic through the establishment of the Coronavirus State and Local Fiscal Recovery Fund (CSLFRF).

The CSLFRF provides for \$19.53 billion to support tens of thousands of non-entitlement units of government (NEUs), which are local governments typically serving a population under 50,000. Allocations for NEUs were sent to states based on population. Localities with populations greater than 50,000 could apply to receive funds directly from Treasury. All other CSLFRF funds were distributed to the states to disburse to the NEUs.

Virginia received approximately \$316.9 million on May 28, 2021, which is half of the Commonwealth's allocated \$633.8 million of NEU CSLFRF. Virginia must now distribute these funds to its NEUs within 30 days or seek a waiver from Treasury. The remaining fifty percent of the NEU allocation will not be sent to Virginia until approximately this time next year.

NEU CSLFRF provides eligible governments with a substantial infusion of resources to meet pandemic response needs and rebuild a stronger, and more equitable, economy as the country recovers. See Appendix E for descriptions of the categories of expenditures for which recipients may use these funds. Within these overall categories, recipients have broad flexibility to decide how best to use this funding to meet the needs of their communities.

Allocation of CSLFRF Funds to NEUs

NEUs are local governments typically serving populations of less than 50,000. NEUs include cities, villages, towns, townships, or other types of local governments. NEUs will receive CSLFRF payments through the Commonwealth. The Commonwealth has received a specific allocation of these funds from Treasury for this purpose and is responsible for distributing these funds to NEUs within the state.

Award amounts are based on the population of the NEU. Fifty (50) percent of the NEU allocations will be distributed to NEUs as soon as possible by the Department of Accounts (DOA) after receipt of a signed certification from the NEU (Appendix E). This distribution will

be made to you electronically in accordance with current State Electronic Data Interchange (EDI) protocol or by check if you are not enrolled in EDI.

Each NEU's allocation will be based on the proportion that the NEU's population represents of the total statewide NEU population, up to 75 percent of the most recent NEU operating budget as of January 27, 2020. Appendix A reflects the preliminary calculation of funding based on population used by Treasury to allocate CSLFRF funds to the states for NEUs. This population data is the preliminary basis for determining the allocations to each NEU but is subject to change if necessary to ensure the state is distributing funds in accordance with Treasury guidelines.

This table also includes your NEU Recipient Number, as required by Treasury. Although guidance documents have been issued, states are raising a number of questions that may result in answers that could impact these preliminary allocations.

Requirements for Use of Funds and Certifications

The amounts listed in Appendix A are preliminary estimates of the amount from the first tranche of CSLFRF funds that will be transferred to each NEU after receipt of the required certification (Appendix F) from the NEU, which is required to be signed by an authorized representative (Town Manager, Mayor, etc.) and a fiscal contact person (Treasurer, Finance Director, Finance Officer, etc.). Before signing the documents, please read and understand the most recent federal guidance and the frequently asked questions, which can be obtained at:

<https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-fund/non-entitlement-units>.

Please note that the certification statement includes an acknowledgment that you may be required to return funds to the federal government if it is determined that those funds were spent for purposes that do not qualify. Since these funds are being provided to you "up front" rather than on a reimbursement basis, it is important for you to understand that the burden of ensuring that all CSLFRF funds are spent for qualifying purposes falls on you, the NEU. Pursuant to the ARPA, your locality is designated as a recipient; therefore, you are responsible for maintaining all necessary documentation to ensure compliance with the federal requirements and you will be responsible for all federal reporting (see Appendix B).

If the federal government determines that you have used CSLFRF funds for purposes that do not qualify, you must return those funds to the federal government. **If** the federal government issues guidance that the funds must be returned to the state before being returned to the federal government, you are responsible for returning funds to the Commonwealth. If you do not return the funds as directed, the Commonwealth can use state aid intercept to recover funds that are not returned in a timely manner.

The required certification encompasses the federal requirements outlined in this memorandum and provided in Appendices C, D, and E. **In order to receive your NEU's allocation, the**

CERTIFICATION FORM TO BE SUBMITTED FOR PAYMENT OF CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUNDS, ASSISTANCE LISTING NUMBER 21.027 (Appendix F) must be submitted no later than **June 15, 2021, to the Department of Accounts in electronic form to GACCT@DOA.Virginia.gov.**

In order to decline your NEU allocation, the CERTIFICATION FORM TO BE SUBMITTED FOR DECLINE OF CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUNDS, ASSISTANCE LISTING NUMBER 21.027 (Appendix G) must be submitted no later than **June 15, 2021, to the Department of Accounts in electronic form to GACCT@DOA.Virginia.gov.**

If you have any questions about this process, you may contact my office at (804) 786-1148. If you have technical questions about the forms or the distribution of the funds, please contact Melinda Pearson, Director, General Accounting, Department of Accounts, at Melinda.Pearson@DOA.Virginia.gov or by phone at 804-225-2376.

APPENDIX A: PRELIMINARY Estimates of the First Tranche of CSLFRF Allocations

Name	Total Population of the NEU	First Tranche of NEU Funds to Distribute (Rounded)	NEU Recipient Number
Abingdon	7,867	\$4,081,072	VA0001
Accomac	485	\$251,598	VA0002
Alberta	270	\$140,065	VA0003
Altavista	3,406	\$1,766,891	VA0004
Amherst	2,180	\$1,130,893	VA0005
Appalachia	1,533	\$795,257	VA0006
Appomattox	1,794	\$930,652	VA0007
Ashland	7,875	\$4,085,222	VA0008
Bedford	6,597	\$3,422,249	VA0009
Belle Haven	502	\$260,417	VA0010
Berryville	4,371	\$2,267,493	VA0011
Big Stone Gap	5,132	\$2,662,268	VA0012
Blackstone	3,329	\$1,726,946	VA0013
Bloxom	366	\$189,866	VA0014

APPENDIX B: FEDERAL REPORTING REQUIREMENTS

Your entity will need a DUNS number to meet your federal reporting requirements related to CSLFRF.

If your entity already has a DUNS number, and you need to verify it, please visit <https://fedgov.dnb.com/webform/CCRSearch.do> and follow the prompts under the Company Lookup tab to obtain your entity's registered DUNS number.

If your entity does not have a DUNS number, and you need to establish one, please visit <https://www.dnb.com/duns-number/get-a-duns.html> and follow the prompts to request a DUNS number.

Once you receive a valid DUNS number, your entity must also register in SAM.gov as soon as possible after receiving the award, to support efficient reporting to Treasury.

NEUs are considered prime recipients of CSLFRF funding distributed from the Commonwealth and are required to file an annual project and expenditure report. Per Treasury guidance, *“Non-entitlement units of local government will be required to submit the project and expenditure report annually. The initial annual Project and Expenditure report for non-entitlement units of local government will cover activity from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year.”*

Treasury has indicated that additional reporting instructions should be forthcoming.

APPENDIX C: AWARD TERMS AND CONDITIONS

U.S. DEPARTMENT OF THE TREASURY
CORONAVIRUS LOCAL FISCAL RECOVERY FUND
AWARD TERMS AND CONDITIONS

1. Use of Funds.

a. Recipient understands and agrees that the funds disbursed under this award may only be used in compliance with section 603(c) of the Social Security Act (the Act), Treasury's regulations implementing that section, and guidance issued by Treasury regarding the foregoing.

b. Recipient will determine prior to engaging in any project using this assistance that it has the institutional, managerial, and financial capability to ensure proper planning, management, and completion of such project.

2. Period of Performance.

The period of performance for this award begins on the date hereof and ends on December 31, 2026. As set forth in Treasury's implementing regulations, Recipient may use award funds to cover eligible costs incurred during the period that begins on March 3, 2021, and ends on December 31, 2024.

3. Reporting.

Recipient agrees to comply with any reporting obligations established by Treasury as they relate to this award.

4. Maintenance of and Access to Records

a. Recipient shall maintain records and financial documents sufficient to evidence compliance with section 603(c) of the Act, Treasury's regulations implementing that section, and guidance issued by Treasury regarding the foregoing.

b. The Treasury Office of Inspector General and the Government Accountability Office, or their authorized representatives, shall have the right of access to records (electronic and otherwise) of Recipient in order to conduct audits or other investigations.

c. Records shall be maintained by Recipient for a period of five (5) years after all funds have been expended or returned to Treasury, whichever is later.

5. Pre-award Costs.

Pre-award costs, as defined in 2 C.F.R. § 200.458, may not be paid with funding from this award.

6. Administrative Costs.

Recipient may use funds provided under this award to cover both direct and indirect costs.

7. Cost Sharing.

Cost sharing or matching funds are not required to be provided by Recipient.

8. Conflicts of Interest.

Recipient understands and agrees it must maintain a conflict of interest policy consistent with 2 C.F.R. § 200.318(c) and that such conflict of interest policy is applicable to each activity funded under this award. Recipient and subrecipients must disclose in writing to Treasury or the pass-through entity, as appropriate, any potential conflict of interest affecting the awarded funds in accordance with 2 C.F.R. § 200.112.

9. Compliance with Applicable Law and Regulations.

a. Recipient agrees to comply with the requirements of section 603 of the Act, regulations adopted by Treasury pursuant to section 603(f) of the Act, and guidance issued by Treasury regarding the foregoing. Recipient also agrees to comply with all other applicable federal statutes, regulations, and executive orders, and Recipient shall provide for such compliance by other parties in any agreements it enters into with other parties relating to this award.

b. Federal regulations applicable to this award include, without limitation, the following:

- i. Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, 2 C.F.R. Part 200, other than such provisions as Treasury may determine are inapplicable to this Award and subject to such exceptions as may be otherwise provided by Treasury. Subpart F – Audit Requirements of the Uniform Guidance, implementing the Single Audit Act, shall apply to this award.
- ii. Universal Identifier and System for Award Management (SAM), 2 C.F.R. Part 25, pursuant to which the award term set forth in Appendix A to 2 C.F.R. Part 25 is hereby incorporated by reference.
- iii. Reporting Subaward and Executive Compensation Information, 2 C.F.R. Part 170, pursuant to which the award term set forth in Appendix A to 2 C.F.R. Part 170 is hereby incorporated by reference.
- iv. OMB Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement), 2 C.F.R. Part 180, including the requirement to include a term or condition in all lower tier covered transactions (contracts and subcontracts described in 2 C.F.R. Part 180, subpart B) that the award is subject to 2 C.F.R. Part 180 and Treasury's implementing regulation at 31 C.F.R. Part 19.
- v. Recipient Integrity and Performance Matters, pursuant to which the award term set forth in 2 C.F.R. Part 200, Appendix XII to Part 200 is hereby incorporated by reference.
- vi. Governmentwide Requirements for Drug-Free Workplace, 31 C.F.R. Part 20.
- vii. New Restrictions on Lobbying, 31 C.F.R. Part 21.
- viii. Uniform Relocation Assistance and Real Property Acquisitions Act of 1970 (42 U.S.C. §§ 4601-4655) and implementing regulations.
- ix. Generally applicable federal environmental laws and regulations.

ix. Generally applicable federal environmental laws and regulations.

c. Statutes and regulations prohibiting discrimination applicable to this award include, without limitation, the following:

- i. Title VI of the Civil Rights Act of 1964 (42 U.S.C. §§ 2000d et seq.) and Treasury's implementing regulations at 31 C.F.R. Part 22, which prohibit discrimination on the basis of race, color, or national origin under programs or activities receiving federal financial assistance;
- ii. The Fair Housing Act, Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§ 3601 et seq.), which prohibits discrimination in housing on the basis of race, color, religion, national origin, sex, familial status, or disability;
- iii. Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of disability under any program or activity receiving federal financial assistance;
- iv. The Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101 et seq.), and Treasury's implementing regulations at 31 C.F.R. Part 23, which prohibit discrimination on the basis of age in programs or activities receiving federal financial assistance; and
- v. Title II of the Americans with Disabilities Act of 1990, as amended (42 U.S.C. §§ 12101 et seq.), which prohibits discrimination on the basis of disability under programs, activities, and services provided or made available by state and local governments or instrumentalities or agencies thereto.

10. Remedial Actions.

In the event of Recipient's noncompliance with section 603 of the Act, other applicable laws, Treasury's implementing regulations, guidance, or any reporting or other program requirements, Treasury may impose additional conditions on the receipt of a subsequent tranche of future award funds, if any, or take other available remedies as set forth in 2 C.F.R. § 200.339. In the case of a violation of section 603(c) of the Act regarding the use of funds, previous payments shall be subject to recoupment as provided in section 603(e) of the Act.

11. Hatch Act.

Recipient agrees to comply, as applicable, with requirements of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328), which limit certain political activities of State or local government employees whose principal employment is in connection with an activity financed in whole or in part by this federal assistance.

12. False Statements.

Recipient understands that making false statements or claims in connection with this award is a violation of federal law and may result in criminal, civil, or administrative sanctions, including fines, imprisonment, civil damages and penalties, debarment from participating in federal awards or contracts, and/or any other remedy available by law.

13. Publications.

Any publications produced with funds from this award must display the following language: "This project [is being] [was] supported, in whole or in part, by federal award number [enter project FAIN] awarded to [name of Recipient] by the U.S. Department of the Treasury."

14. Debts Owed the Federal Government.

a. Any funds paid to Recipient (1) in excess of the amount to which Recipient is finally determined to be authorized to retain under the terms of this award; (2) that are determined by the Treasury Office of Inspector General to have been misused; or (3) that are determined by Treasury to be subject to a repayment obligation pursuant to section 603(e) of the Act and have not been repaid by Recipient shall constitute a debt to the federal government.

b. Any debts determined to be owed the federal government must be paid promptly by Recipient. A debt is delinquent if it has not been paid by the date specified in Treasury's initial written demand for payment, unless other satisfactory arrangements have been made or if the Recipient knowingly or improperly retains funds that are a debt as defined in paragraph 14(a). Treasury will take any actions available to it to collect such a debt.

15. Disclaimer.

a. The United States expressly disclaims any and all responsibility or liability to Recipient or third persons for the actions of Recipient or third persons resulting in death, bodily injury, property damages, or any other losses resulting in any way from the performance of this award or any other losses resulting in any way from the performance of this award or any contract, or subcontract under this award.

b. The acceptance of this award by Recipient does not in any way establish an agency relationship between the United States and Recipient.

16. Protections for Whistleblowers.

a. In accordance with 41 U.S.C. § 4712, Recipient may not discharge, demote, or otherwise discriminate against an employee in reprisal for disclosing to any of the list of persons or entities provided below, information that the employee reasonably believes is evidence of gross mismanagement of a federal contract or grant, a gross waste of federal funds, an abuse of authority relating to a federal contract or grant, a substantial and specific danger to public health or safety, or a violation of law, rule, or regulation related to a federal contract (including the competition for or negotiation of a contract) or grant.

b. The list of persons and entities referenced in the paragraph above includes the following:

- i. A member of Congress or a representative of a committee of Congress;
- ii. An Inspector General;
- iii. The Government Accountability Office;
- iv. A Treasury employee responsible for contract or grant oversight or management;
- v. An authorized official of the Department of Justice or other law enforcement agency;

vi. A court or grand jury; or

vii. A management official or other employee of Recipient, contractor, or subcontractor who has the responsibility to investigate, discover, or address misconduct.

c. Recipient shall inform its employees in writing of the rights and remedies provided under this section, in the predominant native language of the workforce.

17. Increasing Seat Belt Use in the United States.

Pursuant to Executive Order 13043, 62 FR 19217 (Apr. 18, 1997), Recipient should encourage its contractors to adopt and enforce on-the job seat belt policies and programs for their employees when operating company-owned, rented or personally owned vehicles.

18. Reducing Text Messaging While Driving.

Pursuant to Executive Order 13513, 74 FR 51225 (Oct. 6, 2009), Recipient should encourage its employees, subrecipients, and contractors to adopt and enforce policies that ban text messaging while driving, and Recipient should establish workplace safety policies to decrease accidents caused by distracted drivers.

APPENDIX D: ASSURANCES OF COMPLIANCE WITH CIVIL RIGHTS REQUIREMENTSASSURANCES OF COMPLIANCE WITH TITLE VI OF THE
CIVIL RIGHTS ACT OF 1964

As a condition of receipt of federal financial assistance from the Department of the Treasury, the recipient named below (hereinafter referred to as the "Recipient") provides the assurances stated herein. The federal financial assistance may include federal grants, loans and contracts to provide assistance to the Recipient's beneficiaries, the use or rent of Federal land or property at below market value, Federal training, a loan of Federal personnel, subsidies, and other arrangements with the intention of providing assistance. Federal financial assistance does not encompass contracts of guarantee or insurance, regulated programs, licenses, procurement contracts by the Federal government at market value, or programs that provide direct benefits.

The assurances apply to all federal financial assistance from or funds made available through the Department of the Treasury, including any assistance that the Recipient may request in the future.

The Civil Rights Restoration Act of 1987 provides that the provisions of the assurances apply to all of the operations of the Recipient's program(s) and activity(ies), so long as any portion of the Recipient's program(s) or activity(ies) is federally assisted in the manner prescribed above.

1. Recipient ensures its current and future compliance with Title VI of the Civil Rights Act of 1964, as amended, which prohibits exclusion from participation, denial of the benefits of, or subjection to discrimination under programs and activities receiving federal financial assistance, of any person in the United States on the ground of race, color, or national origin (42 U.S.C. § 2000d et seq.), as implemented by the Department of the Treasury Title VI regulations at 31 CFR Part 22 and other pertinent executive orders such as Executive Order 13166, directives, circulars, policies, memoranda, and/or guidance documents.
2. Recipient acknowledges that Executive Order 13166, "Improving Access to Services for Persons with Limited English Proficiency," seeks to improve access to federally assisted programs and activities for individuals who, because of national origin, have Limited English proficiency (LEP). Recipient understands that denying a person access to its programs, services, and activities because of LEP is a form of national origin discrimination prohibited under Title VI of the Civil Rights Act of 1964 and the Department of the Treasury's implementing regulations. Accordingly, Recipient shall initiate reasonable steps, or comply with the Department of the Treasury's directives, to ensure that LEP persons have meaningful access to its programs, services, and activities. Recipient understands and agrees that meaningful access may entail providing language assistance services, including oral interpretation and written translation where necessary, to ensure effective communication in the Recipient's programs, services, and activities.
3. Recipient agrees to consider the need for language services for LEP persons when Recipient develops applicable budgets and conducts programs, services, and activities. As a resource, the Department of the Treasury has published its LEP guidance at 70 FR 6067. For more information on taking reasonable steps to provide meaningful access for LEP persons, please visit <http://www.lep.gov>.
4. Recipient acknowledges and agrees that compliance with the assurances constitutes a condition of continued receipt of federal financial assistance and is binding upon Recipient and Recipient's successors, transferees, and assignees for the period in which such assistance is provided.

5. Recipient acknowledges and agrees that it must require any sub-grantees, contractors, subcontractors, successors, transferees, and assignees to comply with assurances 1-4 above, and agrees to incorporate the following language in every contract or agreement subject to Title VI and its regulations between the Recipient and the Recipient's sub-grantees, contractors, subcontractors, successors, transferees, and assignees:

The sub-grantee, contractor, subcontractor, successor, transferee, and assignee shall comply with Title VI of the Civil Rights Act of 1964, which prohibits recipients of federal financial assistance from excluding from a program or activity, denying benefits of, or otherwise discriminating against a person on the basis of race, color, or national origin (42 U.S.C. § 2000d et seq.), as implemented by the Department of the Treasury's Title VI regulations, 31 CFR Part 22, which are herein incorporated by reference and made a part of this contract (or agreement). Title VI also includes protection to persons with "Limited English Proficiency" in any program or activity receiving federal financial assistance, 42 U.S.C. § 2000d et seq., as implemented by the Department of the Treasury's Title VI regulations, 31 CFR Part 22, and herein incorporated by reference and made a part of this contract or agreement.

6. Recipient understands and agrees that if any real property or structure is provided or improved with the aid of federal financial assistance by the Department of the Treasury, this assurance obligates the Recipient, or in the case of a subsequent transfer, the transferee, for the period during which the real property or structure is used for a purpose for which the federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. If any personal property is provided, this assurance obligates the Recipient for the period during which it retains ownership or possession of the property.

7. Recipient shall cooperate in any enforcement or compliance review activities by the Department of the Treasury of the aforementioned obligations. Enforcement may include investigation, arbitration, mediation, litigation, and monitoring of any settlement agreements that may result from these actions. The Recipient shall comply with information requests, on-site compliance reviews and reporting requirements.

8. Recipient shall maintain a complaint log and inform the Department of the Treasury of any complaints of discrimination on the grounds of race, color, or national origin, and limited English proficiency covered by Title VI of the Civil Rights Act of 1964 and implementing regulations and provide, upon request, a list of all such reviews or proceedings based on the complaint, pending or completed, including outcome. Recipient also must inform the Department of the Treasury if Recipient has received no complaints under Title VI.

9. Recipient must provide documentation of an administrative agency's or court's findings of non-compliance of Title VI and efforts to address the non-compliance, including any voluntary compliance or other agreements between the Recipient and the administrative agency that made the finding. If the Recipient settles a case or matter alleging such discrimination, the Recipient must provide documentation of the settlement. If Recipient has not been the subject of any court or administrative agency finding of discrimination, please so state.

10. If the Recipient makes sub-awards to other agencies or other entities, the Recipient is responsible for ensuring that sub-recipients also comply with Title VI and other applicable authorities covered in this document. State agencies that make sub-awards must have in place standard grant assurances and review procedures to demonstrate that they are effectively monitoring the civil rights compliance of subrecipients.

The United States of America has the right to seek judicial enforcement of the terms of this assurances document and nothing in this document alters or limits the federal enforcement measures that the United States may take in order to address violations of this document or applicable federal law.

Under penalty of perjury, the undersigned official(s) certifies that official(s) has read and understood the Recipient's obligations as herein described, that any information submitted in conjunction with this assurances document is accurate and complete, and that the Recipient is in compliance with the aforementioned nondiscrimination requirements.

PAPERWORK REDUCTION ACT NOTICE

The information collected will be used for the U.S. Government to process requests for support. The estimated burden associated with this collection of information is 30 minutes per response. Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Office of Privacy, Transparency and Records, Department of the Treasury, 1500 Pennsylvania Ave., N.W., Washington, D.C. 20220. DO NOT send the form to this address. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB.

APPENDIX E: CERTIFICATION FOR USE OF CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUND

CERTIFICATION for RECEIPT of CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUND PAYMENTS

We the undersigned certify that:

1. we have the authority to request direct payment on behalf of the locality from the Commonwealth of Virginia of revenues from the Coronavirus State and Local Fiscal Recovery Fund (CSLFRF) pursuant to sections 602 and 603 of the Social Security Act, as added by section 9901 of the American Rescue Plan Act of 2021.
2. we understand that the Commonwealth of Virginia will rely on this certification as a material representation in making a direct payment to the locality.
3. the locality 's proposed uses of the funds received as direct payment from the Commonwealth of Virginia under section 601(b) of the Social Security Act will be used only to cover those costs that:
 - **Support public health expenditures**, by, for example, funding COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff
 - **Address negative economic impacts caused by the public health emergency**, including economic harms to workers, households, small businesses, impacted industries, and the public sector
 - **Replace lost public sector revenue**, using this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic
 - **Provide premium pay for essential workers**, offering additional support to those who have and will bear the greatest health risks because of their service in critical infrastructure sectors
 - **Invest in water, sewer, and broadband infrastructure**, making necessary investments to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet
4. any funds that are not expended or that will not be expended on necessary expenditures incurred by December 31, 2024, by the locality or its grantee(s), must be returned to the federal government in accordance with applicable current and future federal directives.
5. we understand that the locality will receive two separate distributions of CSLFRF payments from the Commonwealth, adhering to an approved timeframe of the Commonwealth receiving the funds from Treasury.
6. funds received from the Commonwealth of Virginia pursuant to this certification must adhere to official federal guidance issued or to be issued regarding what constitutes a necessary expenditure.

7. any CSLFRF funds expended by the locality or its grantee(s) in any manner that does not adhere to official federal guidance must be returned to the federal government in accordance with applicable current and future federal directives.
8. as a condition of receiving the CSLFRF funds pursuant to this certification, the locality shall retain copies of all signed certifications and actual budget documents validating the top-line budget provided to the Commonwealth.
9. the NEU must maintain proper accounting records to segregate these expenditures from those supported by other fund sources and that all such records will be subject to audit.
10. any CSLFRF funds received pursuant to this certification will not be used for expenditures for which the locality has received funds from any other emergency COVID-19 supplemental funding (whether state, federal, or private in nature) for that same expense nor may CSLFRF funds be used for purposes of matching other federal funds unless specifically authorized by federal statute, regulation, or guideline.
11. our entity is not considered a subrecipient of the Commonwealth of Virginia, and no monitoring process by the Commonwealth is required under this Act.

APPENDIX F: CERTIFICATION FORM TO BE SUBMITTED FOR PAYMENT OF CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUNDS, ASSISTANCE LISTING NUMBER 21.027

We certify that we have received, read and understand the Memorandum dated June 9, 2021 from Secretary Aubrey L. Layne, Jr. re: Allocations of Coronavirus State and Local Fiscal Recovery Funds to Non-Entitlement Units of Government Pursuant to the Federal American Rescue Plan Act.

Further, we certify that we have received, read, and agree to:

- Appendix C: AWARD TERMS AND CONDITIONS
- Appendix D: ASSURANCES OF COMPLIANCE WITH CIVIL RIGHTS REQUIREMENTS
- Appendix E: CERTIFICATION FOR USE OF CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUND

The below certification is complete, and our statements contained herein are true and correct to the best of our knowledge.

_____	_____
Local Government Name	Local Government Street Address

	Local Government City, State, Zip

**CORONAVIRUS LOCAL FISCAL RECOVERY FUND:
GUIDANCE ON DISTRIBUTION OF FUNDS TO NON-ENTITLEMENT UNITS OF LOCAL GOVERNMENT**

U.S. DEPARTMENT OF THE TREASURY

The American Rescue Plan Act of 2021 (ARPA) appropriates \$19.53 billion to States for distribution to tens of thousands of “non-entitlement units of local government” (NEUs). ARPA directs the Department of the Treasury (Treasury) to make payments to each State for distribution to NEUs within the State. Treasury is providing the following guidance to assist States with their distribution of these funds to NEUs.

Statutory Overview

Sections 602 and 603 of the Social Security Act (the Act), as added by section 9901 of ARPA, establish the Coronavirus State Fiscal Recovery Fund (State Fiscal Recovery Fund) and Coronavirus Local Fiscal Recovery Fund (Local Fiscal Recovery Fund), respectively, which provide significant funding to help states and localities address the economic and health consequences of the pandemic. Sections 602 and 603 of the Act provide for Treasury to make payments directly to States, territories, Tribal governments, and various local governments, including counties and cities designated as metropolitan cities. In recognition of the significant differences across States in the ways that local governments are organized and the extent of the services they provide to their populations, Congress also provided for Treasury to make payments to the States to allocate and make this funding available to smaller units of general local governments, NEUs.

A State is required to allocate and distribute the Local Fiscal Recovery Fund payment received from Treasury to each NEU in the State an amount that bears the same proportion to the amount of such payment as the population of the NEU bears to the total population of all the NEUs in the State.¹ However, the total amount to be distributed to an NEU may not exceed the amount equal to 75 percent of its most recent budget as of January 27, 2020.² Each State has 30 days to distribute these funds to NEUs, but Treasury may provide extensions of this deadline, as outlined below.

Treasury will make payments to States from the Local Fiscal Recovery Fund for distribution to NEUs in two tranches, with the Second Tranche payment to be made no earlier than 12 months after the date on which the First Tranche payment is paid to the State.³

Prior to Distribution

Before distributing funds to NEUs, States will need to request payment from Treasury, identify eligible NEUs within their State, calculate allocations, and collect certain documents from NEUs.

- Request the State’s payment from Treasury. A State’s submission of a request for payment from the State Fiscal Recovery Fund under section 602 of the Act will suffice for Treasury to initiate payment to the State from the Local Fiscal Recovery Fund for distribution to the State’s NEUs. Payment of this amount will be made to the bank account designated by the State with respect to the State Fiscal Recovery Fund.

¹ See Section 603(b)(2)(C)(i) of the Act.

² See Section 603(b)(2)(C)(iii) of the Act.

³ See Section 603(b)(7) of the Act.

Aggregate NEU allocations to each State can be found on treasury.gov/SLFRP, along with the allocation methodology.

- Identify eligible NEUs. States should identify eligible NEUs by following these guidelines:
 - Treasury has provided on its website a list with names and population estimates for each local government (List), categorized by State, based on data from the Bureau of the Census (Census Bureau) with some clarifications by Treasury.⁴
 - The List includes both “incorporated places” and “minor civil divisions” (MCDs).
 - All incorporated places on the List are eligible for payment.
 - MCDs serve as the primary subdivisions of a county in some States and are commonly known as towns (in New England, New York, and Wisconsin), townships, and districts.⁵ In 12 States—referred to by the Census Bureau as “strong-MCD” States—these MCDs generally perform a wide set of general purpose local government functions. In eight other States—referred to by the Census Bureau as “weak-MCD” States—the MCDs generally play less of a governmental role but are still active governmental units. The other 30 States do not have governmentally functioning MCDs.
 - States should approach the eligibility of their incorporated places and MCDs on the List as follows:
 - For the 12 strong-MCD States⁶ and 30 States without governmentally functioning MCDs, a State should consider all the local governments on the List as eligible for payment.
 - For the eight weak-MCD States,⁷ a State should consider all incorporated places on the List as eligible for payment.

In order to determine the eligibility of its MCDs, the State should undertake a facts-and-circumstances test to determine whether the MCD has the legal and operational capacity to accept ARPA funds and provides a broad range of services that would constitute eligible uses under ARPA. States should consider specific authorities and the size and composition of the budgets of these MCDs in making

⁴ Treasury’s compilation of the List, along with its broader definitional and data methodology, can be found on the Treasury website. For ease of use, Treasury is also providing a list of local governments excluding weak MCDs for the eight weak-MCD States.

⁵ The MCDs function as active governmentally functioning units in all or part of 20 States: Connecticut, Illinois, Indiana, Kansas, Maine, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, and Wisconsin.

⁶ These States are Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

⁷ These States are Illinois, Indiana, Kansas, Missouri, Nebraska, North Dakota, Ohio, and South Dakota.

this determination. MCDs in these States that lack the capacity or do not provide the broad range of services that would constitute eligible uses under ARPA should not be eligible for a NEU distribution. States may categorically exclude all weak MCDs if none of them provide the relevant types of services. Treasury will defer to the States' determination in this regard given their superior understanding of the particularities of their local governments' authorities and operations.

Before making initial distributions to NEUs, each weak-MCD State should identify on the State's website the names of MCDs that the State removed, accompanied by an explanation of the State's determination.

As stated above, strong-MCD States and States without governmentally functioning MCDs should not undergo this facts-and-circumstance test. In addition, weak-MCD States should not undergo a facts-and-circumstances test with respect to their incorporated places.

- Calculate initial allocations.
 - As stated above, ARPA requires States' allocations to NEUs to be based on the proportion of the population in the NEU as a share of the total population of all NEUs in the State. This requirement can be represented by the following formula:

$$\frac{\text{Total population of the NEU}}{\text{Total population of all eligible NEUs}} \times \text{Aggregate state NEU payment}$$

- States must use the population counts in the List, since these reflect the most recent data available from the Census Bureau.⁸
- In some States, the boundaries of some NEUs overlap with or encompass other NEUs within the State, typically resulting in overlapping populations between the larger "parent" NEU and the subsidiary NEU.⁹ An example is a township that encompasses a city. States have the discretion to divide the population of overlapping NEUs in a number of ways for the purpose of the allocation, but Treasury suggests consideration of the following:
 - The default approach is for the subsidiary NEU's population to be subtracted from the larger "parent" NEU for purposes of this allocation. For ease of use, the

⁸ See Section 603(b)(6) of the Act. For the few entities with no population data provided by the Census Bureau, States should use data as a State determines appropriate.

⁹ These overlapping jurisdictions generally occur in the 20 States with active governmentally functioning incorporated places and MCDs.

List reflects this default approach by providing the net population of the “parent” NEU excluding the population of all its subsidiary components.¹⁰

- Alternatively, States may decide to allocate a different split of the overlapping population between NEUs (e.g., 50-50 split for two overlapping NEUs). This decision should be made based on a facts-and-circumstances test that considers the extent to which the NEU provides services that would constitute eligible uses under the Local Fiscal Recovery Fund, including considering the size and composition of the NEU’s budget. States should not allocate the entire overlapping population to the larger “parent” NEU.¹¹
- Double counting when determining NEU allocations is inadvisable.
- Establish a process for NEUs to submit requests for payment. States should establish a process that will allow NEUs to provide information and documentation necessary to disburse funds to NEUs. The information and documentation collected by the State prior to initiating payment must include the following:
 - Local government name, Entity’s Taxpayer Identification Number, DUNS number, and address
 - Authorized representative name, title, and email
 - Contact person name, title, phone, and email
 - Financial institution information (e.g., routing and account number, financial institution name and contact information)
 - Total NEU budget (defined as the annual total operating budget, including general fund and other funds, in effect as of January 27, 2020) or top-line expenditure total (in exceptional cases in which the NEU does not adopt a formal budget)
 - Award terms and conditions agreement (as provided by Treasury to be signed)
 - Assurances of compliance with Title VI of the Civil Rights Act of 1964 (as provided by Treasury to be signed)
- Receive requests for payment from NEUs. States should receive and process requests for distribution from NEUs that include the information and documentation indicated above. The State must confirm the NEU is not excluded or disqualified in compliance with 2 C.F.R. Part 180 and Treasury’s implementing regulation at 31 C.F.R. Part 19. States should advise the NEU to retain a copy of its award agreements for upload with the NEU’s first report to Treasury due October 31, 2021. Pursuant to 2 C.F.R. Part 25, States should advise the NEU to register in SAM.gov as soon as possible after receiving the award if the NEU is not already registered.

¹⁰ For consolidated NEU governments, the full populations of the local government may be listed twice. However, States are advised not to double count the population but rather to allocate a split between the two governments based on the facts-and-circumstances test outlined. For consolidated NEU-metropolitan city governments, States similarly may exercise discretion with respect to the population to allocate to the NEU. As a reminder, metropolitan cities are paid directly by Treasury through a different allocation.

¹¹ See section 603(b)(4) of the Act.

As part of this process, States should assign each NEU a unique “NEU Recipient Number” starting with the two letter State abbreviation followed by four numeric digits (e.g., AZ0231). States should advise the NEU to retain this NEU Recipient Number as an identifying number for the lifecycle of the program, including for reporting purposes.

- Determine whether the “75 percent cap” applies. Section 603(b)(2)(C)(iii) of the Act and the Interim Final Rule (IFR) provide that each NEU’s total award (i.e., the total of distributions under both the First and Second Tranche) is capped at 75 percent of its annual total operating budget, including the general fund and other funds, in effect as of January 27, 2020 (“reference budget”). This involves several steps:
 - Receive a budget total. As part of the request for payment, NEUs should submit a top-line total of the NEU’s reference budget, certified by an authorized representative of the NEU. If a NEU does not adopt a formal budget, States should allow the NEU to certify its most recent annual total expenditures as of January 27, 2020 in lieu of the NEU’s budget total. States should advise the NEU that these numbers may be verified against a copy of the appropriate budget documents submitted in the NEU’s first report to Treasury.
 - Compare budget total with allocation. States should compare the total allocation to the NEU (across distributions under both the First and Second Tranches) against the NEU’s reference budget.
 - Return funds to Treasury, if applicable. If an NEU’s total allocation is found to be more than 75 percent of the NEU’s reference budget, the State must return the amount of the allocation in excess of the NEU’s reference budget to Treasury. For example, if Town A is allocated \$100,000 and its reference budget totaled \$100,000, Town A would be entitled to a total distribution of \$75,000. ARPA requires the State to return \$25,000 in total to Treasury. Because payments are made by Treasury in two tranches and distributed by States in at least two distributions, the State would pay \$37,500 to Town A in the first distribution and the State would return \$12,500 to Treasury from the First Tranche amount. States should wait to return these funds to Treasury until after submitting their interim report due August 31, 2021 (detailed below).
- Process requests to transfer to the State. If a State receives notification from an NEU that it would like to decline its funding allocation and transfer funds to the State under Section 603(c)(4) of the Act, Treasury will consider this action as a cancellation of the award on the part of the eligible NEU and a modification of the award to the State. A State will not be required to transfer the amount of the payment to the NEU just for the NEU to transfer it back to the State. As part of this process, the NEU must provide a signed notice to the State, which the State must transmit to Treasury as part of its interim report due August 31, 2021 (or as part of a subsequent report, if applicable). If the NEU does not provide such notice, it will remain legally obligated under the award with respect to accounting for the uses of the funds and the reporting on such uses. Treasury will provide a standard notice form that will be required for this use.

Initial Distribution from First Tranche Amount

ARPA provides that States must make an initial distribution of funds to NEUs no later than 30 days after receiving a payment from Treasury for purpose of distribution to NEUs, unless the State requests and receives an extension. There are several steps that States should take in this phase:

- Disburse the initial distribution of payments. States should disburse the initial distribution of payments to the NEUs based on the allocations calculated in accordance with the process outlined above.

Under the IFR, States may not impose additional conditions or requirements on distributions to NEUs, beyond those permitted by ARPA, the IFR, and Treasury’s guidance. For example, States may not impose stricter limitations than permitted by statute or Treasury regulations or guidance on an NEU’s use of funds based on the NEU’s proposed spending plan or other policies. States are also not permitted to offset any debt owed by the NEU against the NEU’s distribution. Further, States may not provide funding to NEUs on a reimbursement basis.

- Record key information for reporting purposes. States should keep records of amounts allocated and, separately, amounts paid to each NEU. States will be required to submit information on their NEU disbursements with their interim report on the State Fiscal Recovery Fund program.
- Provide guidance to NEUs on their requirements to Treasury. States should direct NEUs to section 603 of the Act, the IFR, and this guidance, along with documents on the Treasury website, which include fact sheets and regularly updated FAQs.
- Apply for extensions, if necessary. If a State submits a certification in writing that it faces an excessive administrative burden in distributing funds to an NEU and requests an extension, in accordance with Section 603(b)(2)(C)(ii)(I) of the Act, Treasury will grant the State a 30-day extension of the deadline for distributing funds. Treasury may grant requests from States for further extensions. More information will be forthcoming on the extensions process.

Subsequent Distribution from First Tranche Amount

If a State has made reasonable efforts to contact an NEU that remains unresponsive (i.e., the NEU has neither requested funding nor declined its allocation and requested a transfer to the State), the State may issue a subsequent distribution of the funds that had been allocated to such non-responsive NEUs among the NEUs that have requested funding. If a State provides for such a subsequent distribution, the State should follow the steps below:

- Gather required information. States should identify the amount of remaining funds, which is the amounts allocated to NEUs that have been non-responsive (“remaining funds”). States should also identify NEUs that have received an initial distribution and whose initial allocation was below the 75 percent cap (“residual NEUs”).
- Allocate remaining funds. States should allocate remaining funds among residual NEUs according to the formula below.

$$\frac{\text{Total population of the residual NEU}}{\text{Total population of all residual NEUs}} \times \text{Remaining state aggregate NEU allocation}$$

- Apply the 75 percent budget cap. Residual NEUs may only receive payments (across both First and Second Tranches, inclusive of distributions from remaining funds) up to the 75 percent budget cap, as described above. Amounts allocated to residual NEUs in excess of their 75 percent budget cap must be returned to Treasury. The excess amounts from the First Tranche should be returned in the post-distribution phase (as detailed below).
- Disburse the subsequent distribution. States should make the subsequent distribution to NEUs after allocating the remaining funds. As discussed above, States are prohibited from putting conditions or requirements on these distributions beyond those permitted by ARPA, the IFR, and Treasury's guidance.
- Record key information for reporting purposes. States should keep records of which residual NEUs received a subsequent allocation and distribution, and the amount of the subsequent allocation and distribution. States will be required to submit information on their subsequent distribution with their periodic reports to Treasury on the State Fiscal Recovery Fund program.

Post-Distribution

States will be asked to submit information on their allocations and distributions to NEUs with their periodic reports to Treasury under the State Fiscal Recovery Fund program, including the interim report on August 31, 2021. NEUs are also required to submit periodic reports to Treasury on their use of funds.

- Submit an interim report (August 2021). As part of the interim report required to be submitted to Treasury by August 31, 2021, which is a requirement under ARPA and the IFR, each State will be asked to provide an update on distributions to individual NEUs, including whether the NEU has (1) received funding; (2) declined funding and requested a transfer to the State under Section 603(c)(4) of the Act; and (3) not taken action on its funding. States should be prepared to report on their information, including the following:
 - NEU name
 - NEU DUNS number
 - NEU address
 - NEU email address
 - NEU Recipient Number (a unique identification code for each NEU assigned by the State to the NEU as part of the request for funding)
 - Initial allocation and, if applicable, subsequent allocation to the NEU (before application of the 75 percent cap)
 - Total NEU budget, defined as the annual total operating budget, including general fund and other funds, in effect as of January 27, 2020 (as submitted by the NEU to the State as part of the request for funding)
 - Amount of the initial and, if applicable, subsequent allocation above 75 percent of the NEU's reference budget which will be returned to Treasury
 - Payment amount(s)
 - Payment date(s)

For each eligible NEU that declined funding and requested a transfer to the State under Section 603(c)(4) of the Act, the State must also attach a form signed by the NEU, as detailed above.

Weak-MCD States should also list NEUs that the State deemed ineligible.

- Submit a first quarterly report (October 2021). As part of the first quarterly report required to be submitted to Treasury by October 31, 2021, which is a requirement under ARPA and the IFR, each State will be asked to provide information on subsequent distributions to NEUs, if applicable.
- Return excess amounts (August-October 2021). States should arrange with Treasury to return excess amounts that were not distributed to the NEUs. Treasury will provide instructions to States on the return of funds.
- Provide guidance to NEUs on their reporting requirements to Treasury (October 2021). As prime recipients of a Federal award, NEUs are required to report to Treasury on the use of funds. States should ensure each NEU has the reporting guidance provided by Treasury, which is forthcoming. NEUs' first report is due to Treasury by October 31, 2021. In addition to other reporting requirements, NEUs will be asked to provide:
 - NEU Recipient Number (a unique identification code for each NEU assigned by the State to the NEU as part of the request for funding)
 - Copy of signed award terms and conditions agreement
 - Copy of signed assurances of compliance with Title VI of the Civil Rights Act of 1964
 - Copy of actual budget documents validating the top-line budget total provided to the State as part of the request for funding
- Await Second Tranche amount (Spring-Summer 2022). Treasury will distribute the Second Tranche of payments to States for distribution to NEUs no earlier than 12 months after the date on which the First Tranche of payments is paid to the State. More information will be forthcoming closer to the date.

Additionally, States may be asked to facilitate Treasury's communications with NEUs, particularly distributing information on NEUs' use of funds and reporting requirements.

Coronavirus State and Local Fiscal Recovery Funds

Frequently Asked Questions

AS OF JULY 19, 2021

This document contains answers to frequently asked questions regarding the Coronavirus State and Local Fiscal Recovery Funds (CSFRF / CLFRF, or Fiscal Recovery Funds). Treasury will be updating this document periodically in response to questions received from stakeholders. Recipients and stakeholders should consult the [Interim Final Rule](#) for additional information.

- For overall information about the program, including information on requesting funding, please see <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments>
- For general questions about CSFRF / CLFRF, please email SLFRP@treasury.gov
- Treasury is seeking comment on all aspects of the Interim Final Rule. Stakeholders are encouraged to submit comments electronically through the Federal eRulemaking Portal (<https://www.regulations.gov/document/TREAS-DO-2021-0008-0002>) on or before July 16, 2021. Please be advised that comments received will be part of the public record and subject to public disclosure. Do not disclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Questions added 5/27/21: 1.5, 1.6, 2.13, 2.14, 2.15, 3.9, 4.5, 4.6, 10.3, 10.4 (noted with “[5/27]”)

Questions added 6/23/21: 1.7, 2.17, 2.18, 2.19, 2.20, 3.1 (appendix), 3.13, 4.8, 6.12 (noted with “[6/23]”)

Question added 6/24/21: 2.21 (noted with “[6/24]”)

Questions added 7/14/21: 1.8, 3.14, 3.15, 4.9, 4.10, 4.11, 4.12, 6.13, 6.14, 6.15, 6.16, 6.17, 10.3 updated (noted with “[7/14]”)

Answers to frequently asked questions on distribution of funds to non-entitlement units of local government (NEUs) can be found in this [FAQ supplement](#), which is regularly updated.

1. Eligibility and Allocations

1.1. Which governments are eligible for funds?

The following governments are eligible:

- States and the District of Columbia
- Territories
- Tribal governments
- Counties
- Metropolitan cities
- Non-entitlement units, or smaller local governments

1.2. Which governments receive funds directly from Treasury?

Treasury will distribute funds directly to each eligible state, territory, metropolitan city, county, or Tribal government. Smaller local governments that are classified as non-entitlement units will receive funds through their applicable state government.

1.3. Are special-purpose units of government eligible to receive funds?

Special-purpose units of local government will not receive funding allocations; however, a state, territory, local, or Tribal government may transfer funds to a special-purpose unit of government. Special-purpose districts perform specific functions in the community, such as fire, water, sewer or mosquito abatement districts.

1.4. How are funds being allocated to Tribal governments, and how will Tribal governments find out their allocation amounts?¹

\$20 billion of Fiscal Recovery Funds was reserved for Tribal governments. The American Rescue Plan Act specifies that \$1 billion will be allocated evenly to all eligible Tribal governments. The remaining \$19 billion will be distributed using an allocation methodology based on enrollment and employment.

There will be two payments to Tribal governments. Each Tribal government's first payment will include (i) an amount in respect of the \$1 billion allocation that is to be divided equally among eligible Tribal governments and (ii) each Tribal government's pro rata share of the Enrollment Allocation. Tribal governments will be notified of their allocation amount and delivery of payment 4-5 days after completing request for funds in the Treasury Submission Portal. The deadline to make the initial request for funds is June 21, 2021.

The second payment will include a Tribal government's pro rata share of the Employment Allocation. There is a \$1,000,000 minimum employment allocation for Tribal governments. In late-June, Tribal governments will receive an email notification to re-enter the Treasury Submission Portal to confirm or amend their 2019 employment numbers that were submitted to the Department of the Treasury for the CARES Act's Coronavirus Relief Fund. To receive an Employment Allocation, including the minimum employment allocation, Tribal governments must confirm employment numbers by July

¹ The answer to this question was updated on July 19, 2021.

23, 2021. Treasury will calculate employment allocations for those Tribal governments that confirmed or submitted amended employment numbers by the deadline. In August, Treasury will communicate to Tribal governments the amount of their portion of the Employment Allocation and the anticipated date for the second payment.

1.5. My county is a unit of general local government with population under 50,000. Will my county receive funds directly from Treasury? [5/27]

Yes. All counties that are units of general local government will receive funds directly from Treasury and should apply via the [online portal](#). The list of county allocations is available [here](#).

1.6. My local government expected to be classified as a non-entitlement unit. Instead, it was classified as a metropolitan city. Why? [5/27]

The American Rescue Plan Act defines, for purposes of the Coronavirus Local Fiscal Recovery Fund (CLFRF), metropolitan cities to include those that are currently metropolitan cities under the Community Development Block Grant (CDBG) program but also those cities that relinquish or defer their status as a metropolitan city for purposes of the CDBG program. This would include, by way of example, cities that are principal cities of their metropolitan statistical area, even if their population is less than 50,000. In other words, a city that is eligible to be a metropolitan city under the CDBG program is eligible as a metropolitan city under the CLFRF, regardless of how that city has elected to participate in the CDBG program.

Unofficial allocation estimates produced by other organizations may have classified certain local governments as non-entitlement units of local government. However, based on the statutory definitions, some of these local governments should have been classified as metropolitan cities.

1.7. In order to receive and use Fiscal Recovery Funds, must a recipient government maintain a declaration of emergency relating to COVID-19? [6/23]

No. Neither the statute establishing the CSFRF/CLFRF nor the Interim Final Rule requires recipients to maintain a local declaration of emergency relating to COVID-19.

1.8. Can non-profit or private organizations receive funds? If so, how? [7/14]

Yes. Under section 602(c)(3) of the Social Security Act, a State, territory, or Tribal government may transfer funds to a “private nonprofit organization . . . , a Tribal organization . . . , a public benefit corporation involved in the transportation of passengers or cargo, or a special-purpose unit of State or local government.” Similarly, section 603(c)(3) authorizes a local government to transfer funds to the same entities (other than Tribal organizations). The Interim Final Rule clarifies that the lists of transferees in sections 602(c)(3) and 603(c)(3) are not exclusive, and recipients may transfer funds to constituent units of government or private entities beyond those

specified in the statute. A transferee receiving a transfer from a recipient under sections 602(c)(3) and 603(c)(3) will be considered to be a subrecipient and will be expected to comply with all subrecipient reporting requirements.

The ARPA does not authorize Treasury to provide CSFRF/CLFRF funds directly to non-profit or private organizations. Thus, non-profit or private organizations should seek funds from CSFRF/CLFRF recipient(s) in their jurisdiction (e.g., a State, local, territorial, or Tribal government).

2. Eligible Uses – Responding to the Public Health Emergency / Negative Economic Impacts

2.1. What types of COVID-19 response, mitigation, and prevention activities are eligible?

A broad range of services are needed to contain COVID-19 and are eligible uses, including vaccination programs; medical care; testing; contact tracing; support for isolation or quarantine; supports for vulnerable populations to access medical or public health services; public health surveillance (e.g., monitoring case trends, genomic sequencing for variants); enforcement of public health orders; public communication efforts; enhancement to health care capacity, including through alternative care facilities; purchases of personal protective equipment; support for prevention, mitigation, or other services in congregate living facilities (e.g., nursing homes, incarceration settings, homeless shelters, group living facilities) and other key settings like schools; ventilation improvements in congregate settings, health care settings, or other key locations; enhancement of public health data systems; and other public health responses. Capital investments in public facilities to meet pandemic operational needs are also eligible, such as physical plant improvements to public hospitals and health clinics or adaptations to public buildings to implement COVID-19 mitigation tactics.

2.2. If a use of funds was allowable under the Coronavirus Relief Fund (CRF) to respond to the public health emergency, may recipients presume it is also allowable under CSFRF/CLFRF?

Generally, funding uses eligible under CRF as a response to the direct public health impacts of COVID-19 will continue to be eligible under CSFRF/CLFRF, with the following two exceptions: (1) the standard for eligibility of public health and safety payrolls has been updated; and (2) expenses related to the issuance of tax-anticipation notes are not an eligible funding use.

2.3. If a use of funds is not explicitly permitted in the Interim Final Rule as a response to the public health emergency and its negative economic impacts, does that mean it is prohibited?

The Interim Final Rule contains a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of Fiscal Recovery Funds not explicitly listed. The Interim Final Rule also provides flexibility for recipients to use Fiscal Recovery Funds for programs or services that are not identified on these non-exclusive lists but which meet the objectives of section 602(c)(1)(A) or 603(c)(1)(A) by responding to the COVID-19 public health emergency with respect to COVID-19 or its negative economic impacts.

2.4. May recipients use funds to respond to the public health emergency and its negative economic impacts by replenishing state unemployment funds?

Consistent with the approach taken in the CRF, recipients may make deposits into the state account of the Unemployment Trust Fund up to the level needed to restore the pre-pandemic balances of such account as of January 27, 2020, or to pay back advances received for the payment of benefits between January 27, 2020 and the date when the Interim Final Rule is published in the Federal Register.

2.5. What types of services are eligible as responses to the negative economic impacts of the pandemic?

Eligible uses in this category include assistance to households; small businesses and non-profits; and aid to impacted industries.

Assistance to households includes, but is not limited to: food assistance; rent, mortgage, or utility assistance; counseling and legal aid to prevent eviction or homelessness; cash assistance; emergency assistance for burials, home repairs, weatherization, or other needs; internet access or digital literacy assistance; or job training to address negative economic or public health impacts experienced due to a worker's occupation or level of training.

Assistance to small business and non-profits includes, but is not limited to:

- loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure, for example by supporting payroll and benefits costs, costs to retain employees, mortgage, rent, or utilities costs, and other operating costs;
- Loans, grants, or in-kind assistance to implement COVID-19 prevention or mitigation tactics, such as physical plant changes to enable social distancing, enhanced cleaning efforts, barriers or partitions, or COVID-19 vaccination, testing, or contact tracing programs; and
- Technical assistance, counseling, or other services to assist with business planning needs

2.6. May recipients use funds to respond to the public health emergency and its negative economic impacts by providing direct cash transfers to households?

Yes, provided the recipient considers whether, and the extent to which, the household has experienced a negative economic impact from the pandemic. Additionally, cash transfers must be reasonably proportional to the negative economic impact they are intended to address. Cash transfers grossly in excess of the amount needed to address the negative economic impact identified by the recipient would not be considered to be a response to the COVID-19 public health emergency or its negative impacts. In particular, when considering appropriate size of permissible cash transfers made in response to the COVID-19 public health emergency, state, local, territorial, and Tribal governments may consider and take guidance from the per person amounts previously provided by the federal government in response to the COVID crisis.

2.7. May funds be used to reimburse recipients for costs incurred by state and local governments in responding to the public health emergency and its negative economic impacts prior to passage of the American Rescue Plan?

Use of Fiscal Recovery Funds is generally forward looking. The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021.

2.8. May recipients use funds for general economic development or workforce development?

Generally, not. Recipients must demonstrate that funding uses directly address a negative economic impact of the COVID-19 public health emergency, including funds used for economic or workforce development. For example, job training for unemployed workers may be used to address negative economic impacts of the public health emergency and be eligible.

2.9. How can recipients use funds to assist the travel, tourism, and hospitality industries?

Aid provided to tourism, travel, and hospitality industries should respond to the negative economic impacts of the pandemic. For example, a recipient may provide aid to support safe reopening of businesses in the tourism, travel and hospitality industries and to districts that were closed during the COVID-19 public health emergency, as well as aid a planned expansion or upgrade of tourism, travel and hospitality facilities delayed due to the pandemic.

Tribal development districts are considered the commercial centers for tribal hospitality, gaming, tourism and entertainment industries.

2.10. May recipients use funds to assist impacted industries other than travel, tourism, and hospitality?

Yes, provided that recipients consider the extent of the impact in such industries as compared to tourism, travel, and hospitality, the industries enumerated in the statute. For example, nationwide the leisure and hospitality industry has experienced an

approximately 17 percent decline in employment and 24 percent decline in revenue, on net, due to the COVID-19 public health emergency. Recipients should also consider whether impacts were due to the COVID-19 pandemic, as opposed to longer-term economic or industrial trends unrelated to the pandemic.

Recipients should maintain records to support their assessment of how businesses or business districts receiving assistance were affected by the negative economic impacts of the pandemic and how the aid provided responds to these impacts.

2.11. How does the Interim Final Rule help address the disparate impact of COVID-19 on certain populations and geographies?

In recognition of the disproportionate impacts of the COVID-19 virus on health and economic outcomes in low-income and Native American communities, the Interim Final Rule identifies a broader range of services and programs that are considered to be in response to the public health emergency when provided in these communities. Specifically, Treasury will presume that certain types of services are eligible uses when provided in a Qualified Census Tract (QCT), to families living in QCTs, or when these services are provided by Tribal governments.

Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic. In identifying these disproportionately-impacted communities, recipients should be able to support their determination for how the pandemic disproportionately impacted the populations, households, or geographic areas to be served.

Eligible services include:

- Addressing health disparities and the social determinants of health, including: community health workers, public benefits navigators, remediation of lead paint or other lead hazards, and community violence intervention programs;
- Building stronger neighborhoods and communities, including: supportive housing and other services for individuals experiencing homelessness, development of affordable housing, and housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity;
- Addressing educational disparities exacerbated by COVID-19, including: early learning services, increasing resources for high-poverty school districts, educational services like tutoring or afterschool programs, and supports for students' social, emotional, and mental health needs; and
- Promoting healthy childhood environments, including: child care, home visiting programs for families with young children, and enhanced services for child welfare-involved families and foster youth.

2.12. May recipients use funds to pay for vaccine incentive programs (e.g., cash or in-kind transfers, lottery programs, or other incentives for individuals who get vaccinated)?

Yes. Under the Interim Final Rule, recipients may use Coronavirus State and Local Fiscal Recovery Funds to respond to the COVID-19 public health emergency, including expenses related to COVID-19 vaccination programs. See 31 CFR 35.6(b)(1)(i). Programs that provide incentives reasonably expected to increase the number of people who choose to get vaccinated, or that motivate people to get vaccinated sooner than they otherwise would have, are an allowable use of funds so long as such costs are reasonably proportional to the expected public health benefit.

2.13. May recipients use funds to pay “back to work incentives” (e.g., cash payments for newly employed workers after a certain period of time on the job)? [5/27]

Yes. Under the Interim Final Rule, recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to unemployed workers. See 31 CFR 35.6(b)(4). This assistance can include job training or other efforts to accelerate rehiring and thus reduce unemployment, such as childcare assistance, assistance with transportation to and from a jobsite or interview, and incentives for newly employed workers.

2.14. The Coronavirus Relief Fund (CRF) included as an eligible use: "Payroll expenses for public safety, public health, health care, human services, and similar employees whose services are substantially dedicated to mitigating or responding to the COVID-19 public health emergency." What has changed in CSFRF/CLFRF, and what type of documentation is required under CSFRF/CLFRF? [5/27]

Many of the expenses authorized under the Coronavirus Relief Fund are also eligible uses under the CSFRF/CLFRF. However, in the case of payroll expenses for public safety, public health, health care, human services, and similar employees (hereafter, public health and safety staff), the CSFRF/CLFRF does differ from the CRF. This change reflects the differences between the ARPA and CARES Act and recognizes that the response to the COVID-19 public health emergency has changed and will continue to change over time. In particular, funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, including first responders, to the extent that the employee's time that is dedicated to responding to the COVID-19 public health emergency.

For administrative convenience, the recipient may consider a public health and safety employee to be entirely devoted to mitigating or responding to the COVID-19 public health emergency, and therefore fully covered, if the employee, or his or her operating unit or division, is primarily dedicated (e.g., more than half of the employee's time is dedicated) to responding to the COVID-19 public health emergency.

Recipients may use presumptions for assessing whether an employee, division, or operating unit is primarily dedicated to COVID-19 response. The recipient should

maintain records to support its assessment, such as payroll records, attestations from supervisors or staff, or regular work product or correspondence demonstrating work on the COVID-19 response. Recipients need not routinely track staff hours. Recipients should periodically reassess their determinations.

2.15. What staff are included in “public safety, public health, health care, human services, and similar employees”? Would this include, for example, 911 operators, morgue staff, medical examiner staff, or EMS staff? [5/27]

As discussed in the Interim Final Rule, funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, for the portion of the employee’s time that is dedicated to responding to the COVID-19 public health emergency.

Public safety employees would include police officers (including state police officers), sheriffs and deputy sheriffs, firefighters, emergency medical responders, correctional and detention officers, and those who directly support such employees such as dispatchers and supervisory personnel. Public health employees would include employees involved in providing medical and other health services to patients and supervisory personnel, including medical staff assigned to schools, prisons, and other such institutions, and other support services essential for patient care (e.g., laboratory technicians, medical examiner or morgue staff) as well as employees of public health departments directly engaged in matters related to public health and related supervisory personnel. Human services staff include employees providing or administering social services; public benefits; child welfare services; and child, elder, or family care, as well as others.

2.16. May recipients use funds to establish a public jobs program? [6/8]

Yes. The Interim Final Rule permits a broad range of services to unemployed or underemployed workers and other individuals that suffered negative economic impacts from the pandemic. That can include public jobs programs, subsidized employment, combined education and on-the-job training programs, or job training to accelerate rehiring or address negative economic or public health impacts experienced due to a worker’s occupation or level of training. The broad range of permitted services can also include other employment supports, such as childcare assistance or assistance with transportation to and from a jobsite or interview.

The Interim Final Rule includes as an eligible use re-hiring public sector staff up to the government’s level of pre-pandemic employment. “Public sector staff” would not include individuals participating in a job training or subsidized employment program administered by the recipient.

2.17. The Interim Final Rule states that “assistance or aid to individuals or businesses that did not experience a negative economic impact from the public health emergency would not be an eligible use under this category.” Are recipients

required to demonstrate that each individual or business experienced a negative economic impact for that individual or business to receive assistance? [6/23]

Not necessarily. The Interim Final Rule allows recipients to demonstrate a negative economic impact on a population or group and to provide assistance to households or businesses that fall within that population or group. In such cases, the recipient need only demonstrate that the household or business is within the population or group that experienced a negative economic impact.

For assistance to households, the Interim Final Rule states, “In assessing whether a household or population experienced economic harm as a result of the pandemic, a recipient may presume that a household or population that experienced unemployment or increased food or housing insecurity or is low- or moderate-income experienced negative economic impacts resulting from the pandemic.” This would allow, for example, an internet access assistance program for all low- or moderate-income households, but would not require the recipient to demonstrate or document that each individual low- or moderate income household experienced a negative economic impact from the COVID-19 public health emergency apart from being low- or moderate income.

For assistance to small businesses, the Interim Final Rule states that assistance may be provided to small businesses, including loans, grants, in-kind assistance, technical assistance or other services, to respond to the negative economic impacts of the COVID-19 public health emergency. In providing assistance to small businesses, recipients must design a program that responds to the negative economic impacts of the COVID-19 public health emergency, including by identifying how the program addresses the identified need or impact faced by small businesses. This can include assistance to adopt safer operating procedures, weather periods of closure, or mitigate financial hardship resulting from the COVID-19 public health emergency.

As part of program design and to ensure that the program responds to the identified need, recipients may consider additional criteria to target assistance to businesses in need, including to small businesses. Assistance may be targeted to businesses facing financial insecurity, with substantial declines in gross receipts (e.g., comparable to measures used to assess eligibility for the Paycheck Protection Program), or facing other economic harm due to the pandemic, as well as businesses with less capacity to weather financial hardship, such as the smallest businesses, those with less access to credit, or those serving disadvantaged communities. For example, a recipient could find based on local data or research that the smallest businesses faced sharply increased risk of bankruptcy and develop a program to respond; such a program would only need to document a population or group-level negative economic impact, and eligibility criteria to limit access to the program to that population or group (in this case, the smallest businesses).

In addition, recognizing the disproportionate impact of the pandemic on disadvantaged communities, the Interim Final Rule also identifies a set of services that are presumptively eligible when provided in a Qualified Census Tract (QCT); to families and individuals living in QCTs; to other populations, households, or geographic areas

identified by the recipient as disproportionately impacted by the pandemic; or when these services are provided by Tribal governments. For more information on the set of presumptively eligible services, see the Interim Final Rule section on *Building Stronger Communities through Investments in Housing and Neighborhoods* and FAQ 2.11.

2.18. Would investments in improving outdoor spaces (e.g. parks) be an eligible use of funds as a response to the public health emergency and/or its negative economic impacts? [6/23]

There are multiple ways that investments in improving outdoor spaces could qualify as eligible uses; several are highlighted below, though there may be other ways that a specific investment in outdoor spaces would meet eligible use criteria.

First, in recognition of the disproportionate negative economic impacts on certain communities and populations, the Interim Final Rule identifies certain types of services that are eligible uses when provided in a Qualified Census Tract (QCT), to families and individuals living in QCTs, or when these services are provided by Tribal governments. Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic.

These programs and services include services designed to build stronger neighborhoods and communities and to address health disparities and the social determinants of health. The Interim Final Rule provides a non-exhaustive list of eligible services to respond to the needs of communities disproportionately impacted by the pandemic, and recipients may identify other uses of funds that do so, consistent with the Rule’s framework. For example, investments in parks, public plazas, and other public outdoor recreation spaces may be responsive to the needs of disproportionately impacted communities by promoting healthier living environments and outdoor recreation and socialization to mitigate the spread of COVID-19.

Second, recipients may provide assistance to small businesses in all communities. Assistance to small businesses could include support to enhance outdoor spaces for COVID-19 mitigation (e.g., restaurant patios) or to improve the built environment of the neighborhood (e.g., façade improvements).

Third, many governments saw significantly increased use of parks during the pandemic that resulted in damage or increased maintenance needs. The Interim Final Rule recognizes that “decrease[s to] a state or local government’s ability to effectively administer services” can constitute a negative economic impact of the pandemic.

2.19. Would expenses to address a COVID-related backlog in court cases be an eligible use of funds as a response to the public health emergency? [6/23]

The Interim Final Rule recognizes that “decrease[s to] a state or local government’s ability to effectively administer services,” such as cuts to public sector staffing levels, can constitute a negative economic impact of the pandemic. During the COVID-19 public

health emergency, many courts were unable to operate safely during the pandemic and, as a result, now face significant backlogs. Court backlogs resulting from inability of courts to safely operate during the COVID-19 pandemic decreased the government's ability to administer services. Therefore, steps to reduce these backlogs, such as implementing COVID-19 safety measures to facilitate court operations, hiring additional court staff or attorneys to increase speed of case resolution, and other expenses to expedite case resolution are eligible uses.

2.20. Can funds be used to assist small business startups as a response to the negative economic impact of COVID-19? [6/23]

As discussed in the Interim Final Rule, recipients may provide assistance to small businesses that responds to the negative economic impacts of COVID-19. The Interim Final Rule provides a non-exclusive list of potential assistance mechanisms, as well as considerations for ensuring that such assistance is responsive to the negative economic impacts of COVID-19.

Treasury acknowledges a range of potential circumstances in which assisting small business startups could be responsive to the negative economic impacts of COVID-19, including for small businesses and individuals seeking to start small businesses after the start of the COVID-19 public health emergency. For example:

- A recipient could assist small business startups with additional costs associated with COVID-19 mitigation tactics (e.g., barriers or partitions; enhanced cleaning; or physical plant changes to enable greater use of outdoor space).
- A recipient could identify and respond to a negative economic impact of COVID-19 on new small business startups; for example, if it could be shown that small business startups in a locality were facing greater difficulty accessing credit than prior to the pandemic, faced increased costs to starting the business due to the pandemic, or that the small business had lost expected startup capital due to the pandemic.
- The Interim Final Rule also discusses eligible uses that provide support for individuals who have experienced a negative economic impact from the COVID-19 public health emergency, including uses that provide job training for unemployed individuals. These initiatives also may support small business startups and individuals seeking to start small businesses.

2.21. Can funds be used for eviction prevention efforts or housing stability services? [6/24]

Yes. Responses to the negative economic impacts of the pandemic include “rent, mortgage, or utility assistance [and] counseling and legal aid to prevent eviction or homelessness.” This includes housing stability services that enable eligible households to maintain or obtain housing, such as housing counseling, fair housing counseling, case management related to housing stability, outreach to households at risk of eviction or promotion of housing support programs, housing related services for survivors of

domestic abuse or human trafficking, and specialized services for individuals with disabilities or seniors that supports their ability to access or maintain housing.

This also includes legal aid such as legal services or attorney's fees related to eviction proceedings and maintaining housing stability, court-based eviction prevention or eviction diversion programs, and other legal services that help households maintain or obtain housing.

Recipients may transfer funds to, or execute grants or contracts with, court systems, non-profits, and a wide range of other organizations to implement these strategies.

3. Eligible Uses – Revenue Loss

3.1. How is revenue defined for the purpose of this provision? [appendix added 6/23]

The Interim Final Rule adopts a definition of “General Revenue” that is based on, but not identical, to the Census Bureau’s concept of “General Revenue from Own Sources” in the Annual Survey of State and Local Government Finances.

General Revenue includes revenue from taxes, current charges, and miscellaneous general revenue. It excludes refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, agency or private trust transactions, and revenue generated by utilities and insurance trusts. General revenue also includes intergovernmental transfers between state and local governments, but excludes intergovernmental transfers from the Federal government, including Federal transfers made via a state to a locality pursuant to the CRF or the Fiscal Recovery Funds.

Tribal governments may include all revenue from Tribal enterprises and gaming operations in the definition of General Revenue.

Please see the appendix for a diagram of the Interim Final Rule’s definition of General Revenue within the Census Bureau’s revenue classification structure.

3.2. Will revenue be calculated on an entity-wide basis or on a source-by-source basis (e.g. property tax, income tax, sales tax, etc.)?

Recipients should calculate revenue on an entity-wide basis. This approach minimizes the administrative burden for recipients, provides for greater consistency across recipients, and presents a more accurate representation of the net impact of the COVID-19 public health emergency on a recipient’s revenue, rather than relying on financial reporting prepared by each recipient, which vary in methodology used and which generally aggregates revenue by purpose rather than by source.

3.3. Does the definition of revenue include outside concessions that contract with a state or local government?

Recipients should classify revenue sources as they would if responding to the U.S. Census Bureau’s Annual Survey of State and Local Government Finances. According to the Census Bureau’s [Government Finance and Employment Classification manual](#), the following is an example of current charges that would be included in a state or local government’s general revenue from own sources: “Gross revenue of facilities operated by a government (swimming pools, recreational marinas and piers, golf courses, skating rinks, museums, zoos, etc.); auxiliary facilities in public recreation areas (camping areas, refreshment stands, gift shops, etc.); lease or use fees from stadiums, auditoriums, and community and convention centers; and rentals from concessions at such facilities.”

3.4. What is the time period for estimating revenue loss? Will revenue losses experienced prior to the passage of the Act be considered?

Recipients are permitted to calculate the extent of reduction in revenue as of four points in time: December 31, 2020; December 31, 2021; December 31, 2022; and December 31, 2023. This approach recognizes that some recipients may experience lagged effects of the pandemic on revenues.

Upon receiving Fiscal Recovery Fund payments, recipients may immediately calculate revenue loss for the period ending December 31, 2020.

3.5. What is the formula for calculating the reduction in revenue?

A reduction in a recipient’s General Revenue equals:

$$\text{Max} \{ [\text{Base Year Revenue} * (1 + \text{Growth Adjustment})^{\left(\frac{n_t}{12}\right)}] - \text{Actual General Revenue}_t ; 0 \}$$

Where:

Base Year Revenue is General Revenue collected in the most recent full fiscal year prior to the COVID-19 public health emergency.

Growth Adjustment is equal to the greater of 4.1 percent (or 0.041) and the recipient’s average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency.

n equals the number of months elapsed from the end of the base year to the calculation date.

Actual General Revenue is a recipient’s actual general revenue collected during 12-month period ending on each calculation date.

Subscript *t* denotes the calculation date.

3.6. Are recipients expected to demonstrate that reduction in revenue is due to the COVID-19 public health emergency?

In the Interim Final Rule, any diminution in actual revenue calculated using the formula above would be presumed to have been “due to” the COVID-19 public health emergency. This presumption is made for administrative ease and in recognition of the broad-based economic damage that the pandemic has wrought.

3.7. May recipients use pre-pandemic projections as a basis to estimate the reduction in revenue?

No. Treasury is disallowing the use of projections to ensure consistency and comparability across recipients and to streamline verification. However, in estimating the revenue shortfall using the formula above, recipients may incorporate their average annual revenue growth rate in the three full fiscal years prior to the public health emergency.

3.8. Once a recipient has identified a reduction in revenue, are there any restrictions on how recipients use funds up to the amount of the reduction?

The Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. Government services can include, but are not limited to, maintenance of infrastructure or pay-go spending for building new infrastructure, including roads; modernization of cybersecurity, including hardware, software, and protection of critical infrastructure; health services; environmental remediation; school or educational services; and the provision of police, fire, and other public safety services.

However, paying interest or principal on outstanding debt, replenishing rainy day or other reserve funds, or paying settlements or judgments would not be considered provision of a government service, since these uses of funds do not entail direct provision of services to citizens. This restriction on paying interest or principal on any outstanding debt instrument, includes, for example, short-term revenue or tax anticipation notes, or paying fees or issuance costs associated with the issuance of new debt. In addition, the overarching restrictions on all program funds (e.g., restriction on pension deposits, restriction on using funds for non-federal match where barred by regulation or statute) would apply.

3.9. How do I know if a certain type of revenue should be counted for the purpose of computing revenue loss? [5/27]

As discussed in FAQ #3.1, the Interim Final Rule adopts a definition of “General Revenue” that is based on, but not identical, to the Census Bureau’s concept of “General Revenue from Own Sources” in the Annual Survey of State and Local Government Finances.

Recipients should refer to the definition of “General Revenue” included in the Interim Final Rule. See 31 CFR 35.3. If a recipient is unsure whether a particular revenue source is included in the Interim Final Rule’s definition of “General Revenue,” the recipient may consider the classification and instructions used to complete the Census Bureau’s Annual Survey.

For example, parking fees would be classified as a Current Charge for the purpose of the Census Bureau’s Annual Survey, and the Interim Final Rule’s concept of “General Revenue” includes all Current Charges. Therefore, parking fees would be included in the Interim Final Rule’s concept of “General Revenue.”

The Census Bureau’s Government Finance and Employment Classification manual is available [here](#).

3.10. In calculating revenue loss, are recipients required to use audited financials? [6/8]

Where audited data is not available, recipients are not required to obtain audited data. Treasury expects all information submitted to be complete and accurate. See 31 CFR 35.4(c).

3.11. In calculating revenue loss, should recipients use their own data, or Census data? [6/8]

Recipients should use their own data sources to calculate general revenue, and do not need to rely on published revenue data from the Census Bureau. Treasury acknowledges that due to differences in timing, data sources, and definitions, recipients’ self-reported general revenue figures may differ somewhat from those published by the Census Bureau.

3.12. Should recipients calculate revenue loss on a cash basis or an accrual basis? [6/8]

Recipients may provide data on a cash, accrual, or modified accrual basis, provided that recipients are consistent in their choice of methodology throughout the covered period and until reporting is no longer required.

3.13. In identifying intergovernmental revenue for the purpose of calculating General Revenue, should recipients exclude all federal funding, or just federal funding related to the COVID-19 response? How should local governments treat federal funds that are passed through states or other entities, or federal funds that are intermingled with other funds? [6/23]

In calculating General Revenue, recipients should exclude all intergovernmental transfers from the federal government. This includes, but is not limited to, federal transfers made via a state to a locality pursuant to the Coronavirus Relief Fund or Fiscal Recovery Funds. To the extent federal funds are passed through states or other entities or intermingled with other funds, recipients should attempt to identify and exclude the

federal portion of those funds from the calculation of General Revenue on a best-efforts basis.

3.14. What entities constitute a government for the purpose of calculating revenue loss? [7/14]

In determining whether a particular entity is part of a recipient's government for purposes of measuring a recipient's government revenue, recipients should identify all the entities included in their government and the general revenue attributable to these entities on a best-efforts basis. Recipients are encouraged to consider how their administrative structure is organized under state and local statutes. In cases in which the autonomy of certain authorities, commissions, boards, districts, or other entities is not readily distinguishable from the recipient's government, recipients may adopt the Census Bureau's criteria for judging whether an entity is independent from, or a constituent of, a given government. For an entity to be independent, it generally meets all four of the following conditions:

- The entity is an organized entity and possesses corporate powers, such as perpetual succession, the right to sue and be sued, having a name, the ability to make contracts, and the ability to acquire and dispose of property.
- The entity has governmental character, meaning that it provides public services, or wields authority through a popularly elected governing body or officers appointed by public officials. A high degree of responsibility to the public, demonstrated by public reporting requirements or by accessibility of records for public inspection, also evidences governmental character.
- The entity has substantial fiscal independence, meaning it can determine its budget without review and modification by other governments. For instance, the entity can determine its own taxes, charges, and debt issuance without another government's supervision.
- The entity has substantial administrative independence, meaning it has a popularly elected governing body, or has a governing body representing two or more governments, or, in the event its governing body is appointed by another government, the entity performs functions that are essentially different from those of, and are not subject to specification by, its creating government.

If an entity does not meet all four of these conditions, a recipient may classify the entity as part of the recipient's government and assign the portion of General Revenue that corresponds to the entity.

To further assist recipients in applying the forgoing criteria, recipients may refer to the Census Bureau's [*Individual State Descriptions: 2017 Census of Governments*](#) publication, which lists specific entities and classes of entities classified as either independent (defined by Census as "special purpose governments") or constituent (defined by Census as "dependent agencies") on a state-by-state basis. Recipients should note that the Census Bureau's lists are not exhaustive and that Census classifications are based on an analysis of state and local statutes as of 2017 and subject to the Census Bureau's judgement. Though not included in the Census Bureau's publication, state

colleges and universities are generally classified as dependent agencies of state governments by the Census Bureau.

If an entity is determined to be part of the recipient's government, the recipient must also determine whether the entity's revenue is covered by the Interim Final Rule's definition of "general revenue." For example, some cash flows may be outside the definition of "general revenue." In addition, note that the definition of general revenue includes Tribal enterprises in the case of Tribal governments. Refer to FAQ 3.1 (and the Appendix) for the components included in General Revenue.

3.15. The Interim Final Rule's definition of General Revenue excludes revenue generated by utilities. Can you please clarify the definition of utility revenue? [7/14]

As noted in FAQs 3.1 and 3.9, the Interim Final Rule adopts a definition of "general revenue" that is based on, but not identical to, the Census Bureau's concept of "General Revenue from Own Sources" in the Annual Survey of State and Local Government Finances. Recipients should refer to the definition of "general revenue" included in the Interim Final Rule. See 31 CFR 35.3. If a recipient is unsure whether a particular revenue source is included in the Interim Final Rule's definition of "general revenue," the recipient may consider the classification and instructions used to complete the Census Bureau's Annual Survey.

According to the Census Bureau's [Government Finance and Employment Classification manual](#), utility revenue is defined as "[g]ross receipts from sale of utility commodities or services to the public or other governments by publicly-owned and controlled utilities." This includes revenue from operations of publicly-owned and controlled water supply systems, electric power systems, gas supply systems, and public mass transit systems (see pages 4-45 and 4-46 of the manual for more detail).

Except for these four types of utilities, revenues from all commercial-type activities of a recipient's government (e.g., airports, educational institutions, lotteries, public hospitals, public housing, parking facilities, port facilities, sewer or solid waste systems, and toll roads and bridges) are covered by the Interim Final Rule's definition of "general revenue." If a recipient is unsure whether a particular entity performing one of these commercial-type activities can be considered part of the recipient's government, please see FAQ 3.14.

4. Eligible Uses – General

4.1. May recipients use funds to replenish a budget stabilization fund, rainy day fund, or similar reserve account?

No. Funds made available to respond to the public health emergency and its negative economic impacts are intended to help meet pandemic response needs and provide immediate stabilization for households and businesses. Contributions to rainy day funds

and similar reserves funds would not address these needs or respond to the COVID-19 public health emergency, but would rather be savings for future spending needs. Similarly, funds made available for the provision of governmental services (to the extent of reduction in revenue) are intended to support direct provision of services to citizens. Contributions to rainy day funds are not considered provision of government services, since such expenses do not directly relate to the provision of government services.

4.2. May recipients use funds to invest in infrastructure other than water, sewer, and broadband projects (e.g. roads, public facilities)?

Under 602(c)(1)(C) or 603(c)(1)(C), recipients may use funds for maintenance of infrastructure or pay-go spending for building of new infrastructure as part of the general provision of government services, to the extent of the estimated reduction in revenue due to the public health emergency.

Under 602(c)(1)(A) or 603(c)(1)(A), a general infrastructure project typically would not be considered a response to the public health emergency and its negative economic impacts unless the project responds to a specific pandemic-related public health need (e.g., investments in facilities for the delivery of vaccines) or a specific negative economic impact of the pandemic (e.g., affordable housing in a Qualified Census Tract).

4.3. May recipients use funds to pay interest or principal on outstanding debt?

No. Expenses related to financing, including servicing or redeeming notes, would not address the needs of pandemic response or its negative economic impacts. Such expenses would also not be considered provision of government services, as these financing expenses do not directly provide services or aid to citizens.

This applies to paying interest or principal on any outstanding debt instrument, including, for example, short-term revenue or tax anticipation notes, or paying fees or issuance costs associated with the issuance of new debt.

4.4. May recipients use funds to satisfy nonfederal matching requirements under the Stafford Act? May recipients use funds to satisfy nonfederal matching requirements generally?

Fiscal Recovery Funds are subject to pre-existing limitations in other federal statutes and regulations and may not be used as non-federal match for other Federal programs whose statute or regulations bar the use of Federal funds to meet matching requirements. For example, expenses for the state share of Medicaid are not an eligible use. For information on FEMA programs, please [see here](#).

4.5. Are governments required to submit proposed expenditures to Treasury for approval? [5/27]

No. Recipients are not required to submit planned expenditures for prior approval by Treasury. Recipients are subject to the requirements and guidelines for eligible uses contained in the Interim Final Rule.

4.6. How do I know if a specific use is eligible? [5/27]

Fiscal Recovery Funds must be used in one of the four eligible use categories specified in the American Rescue Plan Act and implemented in the Interim Final Rule:

- a) To respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality;
- b) To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers;
- c) For the provision of government services to the extent of the reduction in revenue due to the COVID-19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency; and
- d) To make necessary investments in water, sewer, or broadband infrastructure.

Recipients should consult Section II of the Interim Final Rule for additional information on eligible uses. For recipients evaluating potential uses under (a), the Interim Final Rule contains a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of Fiscal Recovery Funds not explicitly listed. See Section II of the Interim Final Rule for additional discussion.

For recipients evaluating potential uses under (c), the Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. See FAQ #3.8 for additional discussion.

For recipients evaluating potential uses under (b) and (d), see Sections 5 and 6.

4.7. Do restrictions on using Coronavirus State and Local Fiscal Recovery Funds to cover costs incurred beginning on March 3, 2021 apply to costs incurred by the recipient (e.g., a State, local, territorial, or Tribal government) or to costs incurred by households, businesses, and individuals benefiting from assistance provided using Coronavirus State and Local Fiscal Recovery Funds? [6/8]

The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021. This limitation applies to costs incurred by the recipient (i.e., the state, local, territorial, or Tribal government receiving funds). However, recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to households, businesses, and individuals within the eligible use categories described in the Interim

Final Rule for economic harms experienced by those households, businesses, and individuals prior to March 3, 2021. For example,

- Public Health/Negative Economic Impacts – Recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to households – such as rent, mortgage, or utility assistance – for economic harms experienced or costs incurred by the household prior to March 3, 2021 (e.g., rental arrears from preceding months), provided that the cost of providing assistance to the household was not incurred by the recipient prior to March 3, 2021.
- Premium Pay – Recipients may provide premium pay retrospectively for work performed at any time since the start of the COVID-19 public health emergency. Such premium pay must be “in addition to” wages and remuneration already received and the obligation to provide such pay must not have been incurred by the recipient prior to March 3, 2021.
- Revenue Loss – The Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. The calculation of lost revenue begins with the recipient’s revenue in the last full fiscal year prior to the COVID-19 public health emergency and includes the 12-month period ending December 31, 2020. However, use of funds for government services must be forward looking for costs incurred by the recipient after March 3, 2021.
- Investments in Water, Sewer, and Broadband – Recipients may use Coronavirus State and Local Fiscal Recovery Funds to make necessary investments in water, sewer, and broadband. See FAQ Section 6. Recipients may use Coronavirus State and Local Fiscal Recovery Funds to cover costs incurred for eligible projects planned or started prior to March 3, 2021, provided that the project costs covered by the Coronavirus State and Local Fiscal Recovery Funds were incurred after March 3, 2021.

4.8. How can I use CSFRF/CLFRF funds to prevent and respond to crime, and support public safety in my community? [6/23]

Under Treasury’s Interim Final Rule, there are many ways in which the State and Local Fiscal Recovery Funds (“Funds”) under the American Rescue Plan Act can support communities working to reduce and respond to increased violence due to the pandemic. Among the eligible uses of the Funds are restoring of public sector staff to their pre-pandemic levels and responses to the public health crisis and negative economic impacts resulting from the pandemic. The Interim Final Rule provides several ways for recipients to “respond to” this pandemic-related gun violence, ranging from community violence intervention programs to mental health services to hiring of public safety personnel.

Below are some examples of how Fiscal Recovery Funds can be used to address public safety:

- In all communities, recipients may use resources to rehire police officers and other public servants to restore law enforcement and courts to their pre-pandemic levels.

Additionally, Funds can be used for expenses to address COVID-related court backlogs, including hiring above pre-pandemic levels, as a response to the public health emergency. See FAQ 2.19.

- In communities where an increase in violence or increased difficulty in accessing or providing services to respond to or mitigate the effects of violence, is a result of the pandemic they may use funds to address that harm. This spending may include:
 - Hiring law enforcement officials – even above pre-pandemic levels – or paying overtime where the funds are directly focused on advancing community policing strategies in those communities experiencing an increase in gun violence associated with the pandemic
 - Community Violence Intervention (CVI) programs, including capacity building efforts at CVI programs like funding and training additional intervention workers
 - Additional enforcement efforts to reduce gun violence exacerbated by the pandemic, including prosecuting gun traffickers, dealers, and other parties contributing to the supply of crime guns, as well as collaborative federal, state, and local efforts to identify and address gun trafficking channels
 - Investing in technology and equipment to allow law enforcement to more efficiently and effectively respond to the rise in gun violence resulting from the pandemic

As discussed in the Interim Final Rule, uses of CSFRF/CLFRF funds that respond to an identified harm must be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses.

- Recipients may also use funds up to the level of revenue loss for government services, including those outlined above.

Recognizing that the pandemic exacerbated mental health and substance use disorder needs in many communities, eligible public health services include mental health and other behavioral health services, which are a critical component of a holistic public safety approach. This could include:

- Mental health services and substance use disorder services, including for individuals experiencing trauma exacerbated by the pandemic, such as:
 - Community-based mental health and substance use disorder programs that deliver evidence-based psychotherapy, crisis support services, medications for opioid use disorder, and/or recovery support
 - School-based social-emotional support and other mental health services
- Referrals to trauma recovery services for crime victims.

Recipients also may use Funds to respond to the negative economic impacts of the public health emergency, including:

- Assistance programs to households or populations facing negative economic impacts of the public health emergency, including:

- Assistance to support economic security, including for the victims of crime;
 - Housing assistance, including rent, utilities, and relocation assistance;
 - Assistance with food, including Summer EBT and nutrition programs; and
 - Employment or job training services to address negative economic or public health impacts experienced due to a worker's occupation or level of training.
- Assistance to unemployed workers, including:
 - Subsidized jobs, including for young people. Summer youth employment programs directly address the negative economic impacts of the pandemic on young people and their families and communities;
 - Programs that provide paid training and/or work experience targeted primarily to (1) formerly incarcerated individuals, and/or (2) communities experiencing high levels of violence exacerbated by the pandemic;
 - Programs that provide workforce readiness training, apprenticeship or pre-apprenticeship opportunities, skills development, placement services, and/or coaching and mentoring; and
 - Associated wraparound services, including for housing, health care, and food.

Recognizing the disproportionate impact of the pandemic on certain communities, a broader range of services are eligible in those communities than would otherwise be available in communities not experiencing a pandemic-related increase in crime or gun violence. These eligible uses aim to address the pandemic's exacerbation of public health and economic disparities and include services to address health and educational disparities, support neighborhoods and affordable housing, and promote healthy childhood environments. The Interim Final Rule provides a non-exhaustive list of eligible services in these categories.

These services automatically qualify as eligible uses when provided in Qualified Census Tracts (QCTs), low-income areas designated by HUD; to families in QCTs; or by Tribal governments. Outside of these areas, recipient governments can also identify and serve households, populations, and geographic areas disproportionately impacted by the pandemic.

Services under this category could include:

- Programs or services that address or mitigate the impacts of the COVID-19 public health emergency on education, childhood health and welfare, including:
 - Summer education and enrichment programs in these communities, which include many communities currently struggling with high levels of violence;
 - Programs that address learning loss and keep students productively engaged;
 - Enhanced services for foster youths and home visiting programs; and
 - Summer camps and recreation.
- Programs or services that provide or facilitate access to health and social services and address health disparities exacerbated by the pandemic. This includes Community Violence Intervention (CVI) programs, such as:
 - Evidence-based practices like focused deterrence, street outreach, violence interrupters, and hospital-based violence intervention models, complete with

- wraparound services such as behavioral therapy, trauma recovery, job training, education, housing and relocation services, and financial assistance; and,
- Capacity-building efforts at CVI programs like funding more intervention workers; increasing their pay; providing training and professional development for intervention workers; and hiring and training workers to administer the programs.

Please refer to Treasury's Interim Final Rule for additional information.

4.9. May recipients pool funds for regional projects? [7/14]

Yes, provided that the project is itself an eligible use of funds and that recipients can track the use of funds in line with the reporting and compliance requirements of the CSFRF/CLFRF. In general, when pooling funds for regional projects, recipients may expend funds directly on the project or transfer funds to another government that is undertaking the project on behalf of multiple recipients. To the extent recipients undertake regional projects via transfer to another government, recipients would need to comply with the rules on transfers specified in the Interim Final Rule, Section V. A recipient may transfer funds to a government outside its boundaries (e.g., county transfers to a neighboring county), provided that the recipient can document that its jurisdiction receives a benefit proportionate to the amount contributed.

4.10. May recipients fund a project with both ARP funds and other sources of funding (e.g., blending, braiding, or other pairing funding sources), including in conjunction with financing provided through a debt issuance? [7/14]

Cost sharing or matching funds are not required under CSFRF/CLFRF. Funds may be used in conjunction with other funding sources, provided that the costs are eligible costs under each source program and are compliant with all other related statutory and regulatory requirements and policies. The recipient must comply with applicable reporting requirements for all sources of funds supporting the CSFRF/CLFRF projects, and with any requirements and restrictions on the use of funds from the supplemental funding sources and the CSFRF/CLFRF program. Specifically,

- All funds provided under the CSFRF/CLFRF program must be used for projects, investments, or services that are eligible under the CSFRF/CLFRF statute, Treasury's Interim Final Rule, and guidance. See 31 CFR 35.6-8; FAQ 4.6. CSFRF/CLFRF funds may not be used to fund an activity that is not, in its entirety, an eligible use under the CSFRF/CLFRF statute, Treasury's Interim Final Rule, and guidance. For example,
 - CSFRF/CLFRF funds may be used in conjunction with other sources of funds to make an investment in water infrastructure, which is eligible under the CSLFRF statute, and Treasury's Interim Final Rule.
 - CSFRF/CLFRF funds could not be used to fund the entirety of a water infrastructure project that was partially, although not entirely, an eligible use under Treasury's Interim Final Rule. However, the recipient could use CSFRF/CLFRF funds only for a smaller component project that does

constitute an eligible use, while using other funds for the remaining portions of the larger planned water infrastructure project that do not constitute an eligible use. In this case, the “project” under this program would be only the eligible use component of the larger project.

- In addition, because CSFRF/CLFRF funds must be obligated by December 31, 2024, and expended by December 31, 2026, recipients must be able to, at a minimum, determine and report to Treasury on the amount of CSFRF/CLFRF funds obligated and expended and when such funds were obligated and expended.

**4.11. May Coronavirus State and Local Fiscal Recovery Funds be used to make loans or other extensions of credit (“loans”), including loans to small businesses and loans to finance necessary investments in water, sewer, and broadband infrastructure?
[7/14]**

Yes. Coronavirus State and Local Fiscal Recovery Funds (“Funds”) may be used to make loans, provided that the loan is an eligible use and the cost of the loan is tracked and reported in accordance with the points below. See 31 CFR 35.6. For example, a recipient may use Coronavirus State and Local Fiscal Recovery Funds to make loans to small businesses. See 31 CFR 35.6(b)(6). In addition, a recipient may use Funds to finance a necessary investment in water, sewer or broadband, as described in the Interim Final Rule. See 31 CFR 35.6(e).

Funds must be used to cover “costs incurred” by the recipient between March 3, 2021, and December 31, 2024, and Funds must be expended by December 31, 2026. See Section III.D of the Interim Final Rule; 31 CFR 35.5. Accordingly, recipients must be able to determine the amount of Funds used to make a loan.

- For loans that mature or are forgiven on or before December 31, 2026, the recipient must account for the use of funds on a cash flow basis, consistent with the approach to loans taken in the Coronavirus Relief Fund.
 - Recipients may use Fiscal Recovery Funds to fund the principal of the loan and in that case must track repayment of principal and interest (i.e., “program income,” as defined under 2 CFR 200).
 - When the loan is made, recipients must report the principal of the loan as an expense.
 - Repayment of principal may be re-used only for eligible uses, and subject to restrictions on timing of use of funds. Interest payments received prior to the end of the period of performance will be considered an addition to the total award and may be used for any purpose that is an eligible use of funds under the statute and IFR. Recipients are not subject to restrictions under 2 CFR 200.307(e)(1) with respect to such payments.
- For loans with maturities longer than December 31, 2026, the recipient may use Fiscal Recovery Funds for only the projected cost of the loan. Recipients may estimate the subsidy cost of the loan, which equals the expected cash flows associated

with the loan discounted at the recipient's cost of funding. A recipient's cost of funding can be determined based on the interest rates of securities with a similar maturity to the cash flow being discounted that were either (i) recently issued by the recipient or (ii) recently issued by a unit of state, local, or Tribal government similar to the recipient. Recipients that have adopted the Current Expected Credit Loss (CECL) standard may also treat the cost of the loan as equal to the CECL-based expected credit losses over the life of the loan. Recipients may measure projected losses either once, at the time the loan is extended, or annually over the covered period.

Under either approach for measuring the amount of funds used to make loans with maturities longer than December 31, 2026, recipients would not be subject to restrictions under 2 CFR 200.307(e)(1) and need not separately track repayment of principal or interest.

Any contribution of Fiscal Recovery Funds to a revolving loan fund must follow the approach described above for loans with maturities longer than December 31, 2026. In other words, a recipient could contribute Fiscal Recovery Funds to a revolving loan fund, provided that the revolving loan fund makes loans that are eligible uses and the Fiscal Recovery Funds contributed represent the projected cost of loans made over the life of the revolving loan fund.

4.12. May funds be used for outreach to increase uptake of federal assistance like the Child Tax Credit or federal programs like SNAP? [7/14]

Yes. Eligible uses to address negative economic impacts include work “to improve efficacy of programs addressing negative economic impacts, including through use of data analysis, targeted consumer outreach, improvements to data or technology infrastructure, and impact evaluations.” See 31 CFR 35.6(b)(10). Of note, per the CSFRF/CLFRF [Reporting Guidance](#), allowable use of funds for evaluations may also include other types of program evaluations focused on program improvement and evidence building. In addition, recipients may use funds to facilitate access to health and social services in populations and communities disproportionately impacted by the COVID-19 pandemic, including benefits navigators or marketing efforts to increase consumer uptake of federal tax credits, benefits, or assistance programs that respond to negative economic impacts of the pandemic. See 31 CFR 35.6(b)(12).

5. Eligible Uses – Premium Pay

5.1. What criteria should recipients use in identifying essential workers to receive premium pay?

Essential workers are those in critical infrastructure sectors who regularly perform in-person work, interact with others at work, or physically handle items handled by others.

Critical infrastructure sectors include healthcare, education and childcare, transportation, sanitation, grocery and food production, and public health and safety, among others, as provided in the Interim Final Rule. Governments receiving Fiscal Recovery Funds have the discretion to add additional sectors to this list, so long as the sectors are considered critical to protect the health and well-being of residents.

The Interim Final Rule emphasizes the need for recipients to prioritize premium pay for lower income workers. Premium pay that would increase a worker's total pay above 150% of the greater of the state or county average annual wage requires specific justification for how it responds to the needs of these workers.

5.2. What criteria should recipients use in identifying third-party employers to receive grants for the purpose of providing premium pay to essential workers?

Any third-party employers of essential workers are eligible. Third-party contractors who employ essential workers in eligible sectors are also eligible for grants to provide premium pay. Selection of third-party employers and contractors who receive grants is at the discretion of recipients.

To ensure any grants respond to the needs of essential workers and are made in a fair and transparent manner, the rule imposes some additional reporting requirements for grants to third-party employers, including the public disclosure of grants provided.

5.3. May recipients provide premium pay retroactively for work already performed?

Yes. Treasury encourages recipients to consider providing premium pay retroactively for work performed during the pandemic, recognizing that many essential workers have not yet received additional compensation for their service during the pandemic.

6. Eligible Uses – Water, Sewer, and Broadband Infrastructure

6.1. What types of water and sewer projects are eligible uses of funds?

The Interim Final Rule generally aligns eligible uses of the Funds with the wide range of types or categories of projects that would be eligible to receive financial assistance through the Environmental Protection Agency's Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF).

Under the DWSRF, categories of [eligible projects](#) include: treatment, transmission and distribution (including lead service line replacement), source rehabilitation and decontamination, storage, consolidation, and new systems development.

Under the CWSRF, categories of [eligible projects](#) include: construction of publicly-owned treatment works, nonpoint source pollution management, national estuary program projects, decentralized wastewater treatment systems, stormwater systems, water

conservation, efficiency, and reuse measures, watershed pilot projects, energy efficiency measures for publicly-owned treatment works, water reuse projects, security measures at publicly-owned treatment works, and technical assistance to ensure compliance with the Clean Water Act.

As mentioned in the Interim Final Rule, eligible projects under the DWSRF and CWSRF support efforts to address climate change, as well as to meet cybersecurity needs to protect water and sewer infrastructure. Given the lifelong impacts of lead exposure for children, and the widespread nature of lead service lines, Treasury also encourages recipients to consider projects to replace lead service lines.

6.2. May construction on eligible water, sewer, or broadband infrastructure projects continue past December 31, 2024, assuming funds have been obligated prior to that date?

Yes. Treasury is interpreting the requirement that costs be incurred by December 31, 2024 to only require that recipients have obligated the funds by such date. The period of performance will run until December 31, 2026, which will provide recipients a reasonable amount of time to complete projects funded with Fiscal Recovery Funds.

6.3. May recipients use funds as a non-federal match for the Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF)?

Recipients may not use funds as a state match for the CWSRF and DWSRF due to prohibitions in utilizing federal funds as a state match in the authorizing statutes and regulations of the CWSRF and DWSRF.

6.4. Does the National Environmental Policy Act (NEPA) apply to eligible infrastructure projects?

NEPA does not apply to Treasury's administration of the Funds. Projects supported with payments from the Funds may still be subject to NEPA review if they are also funded by other federal financial assistance programs.

6.5. What types of broadband projects are eligible?

The Interim Final Rule requires eligible projects to reliably deliver minimum speeds of 100 Mbps download and 100 Mbps upload. In cases where it is impracticable due to geography, topography, or financial cost to meet those standards, projects must reliably deliver at least 100 Mbps download speed, at least 20 Mbps upload speed, and be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed.

Projects must also be designed to serve unserved or underserved households and businesses, defined as those that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed.

6.6. For broadband investments, may recipients use funds for related programs such as cybersecurity or digital literacy training?

Yes. Recipients may use funds to provide assistance to households facing negative economic impacts due to Covid-19, including digital literacy training and other programs that promote access to the Internet. Recipients may also use funds for modernization of cybersecurity, including hardware, software, and protection of critical infrastructure, as part of provision of government services up to the amount of revenue lost due to the public health emergency.

6.7. How do I know if a water, sewer, or broadband project is an eligible use of funds? Do I need pre-approval? [6/8]

Recipients do not need approval from Treasury to determine whether an investment in a water, sewer, or broadband project is eligible under CSFRF/CLFRF. Each recipient should review the Interim Final Rule (IFR), along with the preamble to the Interim Final Rule, in order to make its own assessment of whether its intended project meets the eligibility criteria in the IFR. A recipient that makes its own determination that a project meets the eligibility criteria as outlined in the IFR may pursue the project as a CSFRF/CLFRF project without pre-approval from Treasury. Local government recipients similarly do not need state approval to determine that a project is eligible under CSFRF/CLFRF. However, recipients should be cognizant of other federal or state laws or regulations that may apply to construction projects independent of CSFRF/CLFRF funding conditions and that may require pre-approval.

For water and sewer projects, the IFR refers to the EPA [Drinking Water](#) and [Clean Water](#) State Revolving Funds (SRFs) for the categories of projects and activities that are eligible for funding. Recipients should look at the relevant federal statutes, regulations, and guidance issued by the EPA to determine whether a water or sewer project is eligible. Of note, the IFR does not incorporate any other requirements contained in the federal statutes governing the SRFs or any conditions or requirements that individual states may place on their use of SRFs.

6.8. For broadband infrastructure investments, what does the requirement that infrastructure “be designed to” provide service to unserved or underserved households and businesses mean? [6/17]

Designing infrastructure investments to provide service to unserved or underserved households or businesses means prioritizing deployment of infrastructure that will bring service to households or businesses that are not currently serviced by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed. To meet this requirement, states and localities should use funds to deploy broadband infrastructure projects whose objective is to provide service to unserved or underserved households or businesses. These unserved or underserved households or businesses do not need to be the only ones in the service area funded by the project.

6.9. For broadband infrastructure to provide service to “unserved or underserved households or businesses,” must every house or business in the service area be unserved or underserved? [6/17]

No. It suffices that an objective of the project is to provide service to unserved or underserved households or businesses. Doing so may involve a holistic approach that provides service to a wider area in order, for example, to make the ongoing service of unserved or underserved households or businesses within the service area economical. Unserved or underserved households or businesses need not be the *only* households or businesses in the service area receiving funds.

6.10. May recipients use payments from the Funds for “middle mile” broadband projects? [6/17]

Yes. Under the Interim Final Rule, recipients may use payments from the Funds for “middle-mile projects,” but Treasury encourages recipients to focus on projects that will achieve last-mile connections—whether by focusing on funding last-mile projects or by ensuring that funded middle-mile projects have potential or partnered last-mile networks that could or would leverage the middle-mile network.

6.11. For broadband infrastructure investments, what does the requirement to “reliably” meet or exceed a broadband speed threshold mean? [6/17]

In the Interim Final Rule, the term “reliably” is used in two places: to identify areas that are eligible to be the subject of broadband infrastructure investments and to identify expectations for acceptable service levels for broadband investments funded by the Coronavirus State and Local Fiscal Recovery Funds. In particular:

- The IFR defines “unserved or underserved households or businesses” to mean one or more households or businesses that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speeds and 3 Mbps of upload speeds.
- The IFR provides that a recipient may use Coronavirus State and Local Fiscal Recovery Funds to make investments in broadband infrastructure that are designed to provide service to unserved or underserved households or businesses and that are designed to, upon completion: (i) reliably meet or exceed symmetrical 100 Mbps download speed and upload speeds; or (ii) in limited cases, reliably meet or exceed 100 Mbps download speed and between 20 Mbps and 100 Mbps upload speed and be scalable to a minimum of 100 Mbps download and upload speeds.

The use of “reliably” in the IFR provides recipients with significant discretion to assess whether the households and businesses in the area to be served by a project have access to wireline broadband service that can actually and consistently meet the specified thresholds of at least 25Mbps/3Mbps—i.e., to consider the actual experience of current

wireline broadband customers that subscribe to services at or above the 25 Mbps/3 Mbps threshold. Whether there is a provider serving the area that advertises or otherwise claims to offer speeds that meet the 25 Mbps download and 3 Mbps upload speed thresholds is not dispositive.

When making these assessments, recipients may choose to consider any available data, including but not limited to documentation of existing service performance, federal and/or state-collected broadband data, user speed test results, interviews with residents and business owners, and any other information they deem relevant. In evaluating such data, recipients may take into account a variety of factors, including whether users actually receive service at or above the speed thresholds at all hours of the day, whether factors other than speed such as latency or jitter, or deterioration of the existing connections make the user experience unreliable, and whether the existing service is being delivered by legacy technologies, such as copper telephone lines (typically using Digital Subscriber Line technology) or early versions of cable system technology (DOCSIS 2.0 or earlier).

The IFR also provides recipients with significant discretion as to how they will assess whether the project itself has been designed to provide households and businesses with broadband services that meet, or even exceed, the speed thresholds provided in the rule.

6.12. May recipients use Funds for pre-project development for eligible water, sewer, and broadband projects? [6/23]

Yes. To determine whether Funds can be used on pre-project development for an eligible water or sewer project, recipients should consult whether the pre-project development use or cost is eligible under the Drinking Water and Clean Water State Revolving Funds (CWSRF and DWSRF, respectively). Generally, the CWSRF and DWSRF often allow for pre-project development costs that are tied to an eligible project, as well as those that are reasonably expected to lead to a project. For example, the DWSRF [allows](#) for planning and evaluations uses, as well as numerous pre-project development costs, including costs associated with obtaining project authorization, planning and design, and project start-up like training and warranty for equipment. Likewise, the CWSRF [allows](#) for broad pre-project development, including planning and assessment activities, such as cost and effectiveness analyses, water/energy audits and conservation plans, and capital improvement plans.

Similarly, pre-project development uses and costs for broadband projects should be tied to an eligible broadband project or reasonably expected to lead to such a project. For example, pre-project costs associated with planning and engineering for an eligible broadband infrastructure build-out is considered an eligible use of funds, as well as technical assistance and evaluations that would reasonably be expected to lead to commencement of an eligible project (e.g., broadband mapping for the purposes of finding an eligible area for investment).

All funds must be obligated within the statutory period between March 3, 2021 and December 31, 2024, and expended to cover such obligations by December 31, 2026.

6.13. May State and Local Fiscal Recovery Funds be used to support energy or electrification infrastructure that would be used to power new water treatment plants and wastewater systems? [7/14]

The EPA’s [Overview of Clean Water State Revolving Fund Eligibilities](#) describes eligible energy-related projects. This includes a “[p]ro rata share of capital costs of offsite clean energy facilities that provide power to a treatment works.” Thus, State and Local Fiscal Recovery Funds may be used to finance the generation and delivery of clean power to a wastewater system or a water treatment plant on a pro-rata basis. If the wastewater system or water treatment plant is the sole user of the clean energy, the full cost would be considered an eligible use of funds. If the clean energy provider provides power to other entities, only the proportionate share used by the water treatment plant or wastewater system would be an eligible use of State and Local Fiscal Recovery Funds.

6.14. How should states and local governments assess whether a stormwater management project, such as a culvert replacement, is an eligible project for State and Local Fiscal Recovery Funds? [7/14]

FAQ 6.7 describes the overall approach that recipients may take to evaluate the eligibility of water or sewer projects. For stormwater management projects specifically, as noted in the EPA’s [Overview of Clean Water State Revolving Fund Eligibilities](#), “Stormwater projects must have a water quality benefit.” Thus, to be eligible under CSFRF/CLFRF, stormwater management projects should be designed to incorporate water quality benefits consistent with the goals of the Clean Water Act. [Summary of the Clean Water Act.](#)

6.15. May recipients use Funds for road repairs and upgrades that occur in connection with an eligible water or sewer project? [7/14]

Yes, recipients may use State and Local Fiscal Recovery Funds for road repairs and upgrades directly related to an eligible water or sewer project. For example, a recipient could use Funds to repair or re-pave a road following eligible sewer repair work beneath it. However, use of Funds for general infrastructure projects is subject to the limitations described in FAQ 4.2. Water and sewer infrastructure projects are often a single component of a broader transportation infrastructure project, for example, the implementation of stormwater infrastructure to meet Clean Water Act established water quality standards. In this example, the components of the infrastructure project that interact directly with the stormwater infrastructure project may be funded by Fiscal Recovery Funds.

6.16. May Funds be used to build or upgrade broadband connections to schools or libraries? [7/14]

As outlined in the IFR, recipients may use Fiscal Recovery Funds to invest in broadband infrastructure that, wherever it is practicable to do so, is designed to deliver service that reliably meets or exceeds symmetrical upload and download speeds of 100 Mbps to households or businesses that are not currently serviced by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed. Treasury interprets “businesses” in this context broadly to include non-residential users of broadband, including private businesses and institutions that serve the public, such as schools, libraries, healthcare facilities, and public safety organizations.

6.17. Are eligible infrastructure projects subject to the Davis-Bacon Act? [7/14]

The Davis-Bacon Act requirements (prevailing wage rates) do not apply to projects funded solely with award funds from the CSFRF/CLFRF program, except for CSFRF/CLFRF-funded construction projects undertaken by the District of Columbia. The Davis-Bacon Act specifically applies to the District of Columbia when it uses federal funds (CSFRF/CLFRF funds or otherwise) to enter into contracts over \$2,000 for the construction, alteration, or repair (including painting and decorating) of public buildings or public works. Recipients may be otherwise subject to the requirements of the Davis-Bacon Act, when CSFRF/CLFRF award funds are used on a construction project in conjunction with funds from another federal program that requires enforcement of the Davis-Bacon Act. Additionally, corollary state prevailing-wage-in-construction laws (commonly known as “baby Davis-Bacon Acts”) may apply to projects. Please refer to FAQ 4.10 concerning projects funded with both CSFRF/CLFRF funds and other sources of funding.

Treasury has indicated in its Interim Final Rule that it is important that necessary investments in water, sewer, or broadband infrastructure be carried out in ways that produce high-quality infrastructure, avert disruptive and costly delays, and promote efficiency. Treasury encourages recipients to ensure that water, sewer, and broadband projects use strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions, not only to promote effective and efficient delivery of high-quality infrastructure projects, but also to support the economic recovery through strong employment opportunities for workers. Using these practices in construction projects may help to ensure a reliable supply of skilled labor that would minimize disruptions, such as those associated with labor disputes or workplace injuries.

Treasury has also indicated in its reporting guidance that recipients will need to provide documentation of wages and labor standards for infrastructure projects over \$10 million, and that these requirements can be met with certifications that the project is in compliance with the Davis-Bacon Act (or related state laws, commonly known as “baby Davis-Bacon Acts”) and subject to a project labor agreement. Please refer to the Reporting and Compliance Guidance, page 21, for more detailed information on the reporting requirement.

7. Non-Entitlement Units (NEUs)

Answers to frequently asked questions on distribution of funds to NEUs can be found in this [FAQ supplement](#), which is regularly updated.

8. Ineligible Uses

8.1. What is meant by a pension “deposit”? Can governments use funds for routine pension contributions for employees whose payroll and covered benefits are eligible expenses?

Treasury interprets “deposit” in this context to refer to an extraordinary payment into a pension fund for the purpose of reducing an accrued, unfunded liability. More specifically, the interim final rule does not permit this assistance to be used to make a payment into a pension fund if both: (1) the payment reduces a liability incurred prior to the start of the COVID-19 public health emergency, and (2) the payment occurs outside the recipient’s regular timing for making such payments.

Under this interpretation, a “deposit” is distinct from a “payroll contribution,” which occurs when employers make payments into pension funds on regular intervals, with contribution amounts based on a pre-determined percentage of employees’ wages and salaries. In general, if an employee’s wages and salaries are an eligible use of Fiscal Recovery Funds, recipients may treat the employee’s covered benefits as an eligible use of Fiscal Recovery Funds.

8.2. May recipients use Fiscal Recovery Funds to fund Other Post-Employment Benefits (OPEB)? [6/8]

OPEB refers to benefits other than pensions (see, e.g., [Governmental Accounting Standards Board, “Other Post-Employment Benefits”](#)). Treasury has determined that Sections 602(c)(2)(B) and 603(c)(2), which refer only to pensions, do not prohibit CSFRF/CLFRF recipients from funding OPEB. Recipients of either the CSFRF/CLFRF may use funds for eligible uses, and a recipient seeking to use CSFRF/CLFRF funds for OPEB contributions would need to justify those contributions under one of the four eligible use categories.

9. Reporting

On June 17, 2021, Treasury released [Guidance on Recipient Compliance and Reporting Responsibilities for the Coronavirus State and Local Fiscal Recovery Funds](#). Recipients should consult this guidance for additional detail and clarification on recipients’ compliance and reporting responsibilities. A users’ guide will be provided with additional information on how and where to submit required reports.

9.1. What records must be kept by governments receiving funds?

Financial records and supporting documents related to the award must be retained for a period of five years after all funds have been expended or returned to Treasury, whichever is later. This includes those which demonstrate the award funds were used for eligible purposes in accordance with the ARPA, Treasury's regulations implementing those sections, and Treasury's guidance on eligible uses of funds.

9.2. What reporting will be required, and when will the first report be due?

Recipients will be required to submit an interim report, quarterly project and expenditure reports, and annual Recovery Plan Performance Reports as specified below, regarding their utilization of Coronavirus State and Local Fiscal Recovery Funds.

Interim reports: States (defined to include the District of Columbia), territories, metropolitan cities, counties, and Tribal governments will be required to submit one interim report. The interim report will include a recipient's expenditures by category at the summary level and for states, information related to distributions to non-entitlement units of local government must also be included in the interim report. The interim report will cover activity from the date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Non-entitlement units of local government are not required to submit an interim report.

Quarterly Project and Expenditure reports: State (defined to include the District of Columbia), territorial, metropolitan city, county, and Tribal governments will be required to submit quarterly project and expenditure reports. This report will include financial data, information on contracts and subawards over \$50,000, types of projects funded, and other information regarding a recipient's utilization of award funds. Reports will be required quarterly with the exception of non-entitlement units, which will report annually. An interim report is due on August 31, 2021. The reports will include the same general data as those submitted by recipients of the Coronavirus Relief Fund, with some modifications to expenditure categories and the addition of data elements related to specific eligible uses. The initial quarterly Project and Expenditure report will cover two calendar quarters from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent quarterly reports will cover one calendar quarter and must be submitted to Treasury within 30 days after the end of each calendar quarter.

Non-entitlement units of local government will be required to submit the project and expenditure report annually. The initial annual Project and Expenditure report for non-entitlement units of local government will cover activity from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year.

Recovery Plan Performance Reports: States (defined to include the District of Columbia), territories, metropolitan cities, and counties with a population that exceeds 250,000

residents will also be required to submit an annual Recovery Plan Performance Report to Treasury. This report will include descriptions of the projects funded and information on the performance indicators and objectives of each award, helping local residents understand how their governments are using the substantial resources provided by Coronavirus State and Local Fiscal Recovery Funds program. The initial Recovery Plan Performance Report will cover activity from date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Thereafter, the Recovery Plan Performance Reports will cover a 12-month period and recipients will be required to submit the report to Treasury within 30 days after the end of the 12-month period. The second Recovery Plan Performance Report will cover the period from July 1, 2021 to June 30, 2022 and must be submitted to Treasury by July 31, 2022. Each annual Recovery Plan Performance Report must be posted on the public-facing website of the recipient. Local governments with fewer than 250,000 residents, Tribal governments, and non-entitlement units of local government are not required to develop a Recovery Plan Performance Report.

Please see the [Guidance on Recipient Compliance and Reporting Responsibilities](#) for more information.

9.3. What provisions of the Uniform Guidance for grants apply to these funds? Will the Single Audit requirements apply?

Most of the provisions of the Uniform Guidance (2 CFR Part 200) apply to this program, including the Cost Principles and Single Audit Act requirements. Recipients should refer to the Assistance Listing for detail on the specific provisions of the Uniform Guidance that do not apply to this program. The Assistance Listing will be available on beta.SAM.gov.

9.4. Once a recipient has identified a reduction in revenue, how will Treasury track use of funds for the provision of government services? [6/8]

The ARPA establishes four categories of eligible uses and further restrictions on the use of funds to ensure that Fiscal Recovery Funds are used within the four eligible use categories. The Interim Final Rule implements these restrictions, including the scope of the eligible use categories and further restrictions on tax cuts and deposits into pensions. Reporting requirements will align with this structure.

Consistent with the broad latitude provided to recipients to use funds for government services to the extent of the reduction in revenue, recipients will be required to submit a description of services provided. As discussed in IFR, these services can include a broad range of services but may not be used directly for pension deposits, contributions to reserve funds, or debt service. Recipients may use sources of funding other than Fiscal Recovery Funds to make deposits to pension funds, contribute to reserve funds, and pay debt service, including during the period of performance for the Fiscal Recovery Fund award.

For recipients using Fiscal Recovery Funds to provide government services to the extent of reduction in revenue, the description of government services reported to Treasury may be narrative or in another form, and recipients are encouraged to report based on their existing budget processes and to minimize administrative burden. For example, a recipient with \$100 in revenue replacement funds available could indicate that \$50 were used for personnel costs and \$50 were used for pay-go building of sidewalk infrastructure.

In addition to describing the government services provided to the extent of reduction in revenue, all recipients will also be required to indicate that Fiscal Recovery Funds are not used directly to make a deposit in a pension fund. Further, recipients subject to the tax offset provision will be required to provide information necessary to implement the Interim Final Rule, as described in the Interim Final Rule. Treasury does not anticipate requiring other types of reporting or recordkeeping on spending in pensions, debt service, or contributions to reserve funds.

These requirements are further detailed in the guidance on reporting requirements for the Fiscal Recovery Funds available [here](#).

9.5. What is the Assistance Listing and Catalog of Federal Domestic Assistance (CFDA) number for the program? [6/8]

The [Assistance Listing](#) for the Coronavirus State and Local Fiscal Recovery Funds (CSLFRF) was published May 28, 2021 on SAM.gov. This includes the final CFDA Number for the program, 21.027.

The assistance listing includes helpful information including program purpose, statutory authority, eligibility requirements, and compliance requirements for recipients. The CFDA number is the unique 5-digit code for each type of federal assistance, and can be used to search for program information, including funding opportunities, spending on usaspending.gov, or audit results through the Federal Audit Clearinghouse.

To expedite payments and meet statutory timelines, Treasury issued initial payments under an existing CFDA number. If you have already received funds or captured the initial CFDA number in your records, please update your systems and reporting to reflect the final CFDA number 21.027. **Recipients must use the final CFDA number for all financial accounting, audits, subawards, and associated program reporting requirements.**

To ensure public trust, Treasury expects all recipients to serve as strong stewards of these funds. This includes ensuring funds are used for intended purposes and recipients have in place effective financial management, internal controls, and reporting for transparency and accountability.

Please see [Treasury's Interim Final Rule](#) and the [Guidance on Recipient Compliance and Reporting Responsibilities](#) for more information.

10. Miscellaneous

10.1. May governments retain assets purchased with Fiscal Recovery Funds? If so, what rules apply to the proceeds of disposition or sale of such assets?

Yes, if the purchase of the asset was consistent with the limitations on the eligible use of funds. If such assets are disposed of prior to December 31, 2024, the proceeds would be subject to the restrictions on the eligible use of payments.

10.2. Can recipients use funds for administrative purposes?

Recipients may use funds to cover the portion of payroll and benefits of employees corresponding to time spent on administrative work necessary due to the COVID-19 public health emergency and its negative economic impacts. This includes, but is not limited to, costs related to disbursing payments of Fiscal Recovery Funds and managing new grant programs established using Fiscal Recovery Funds.

10.3. Are recipients required to remit interest earned on CSFRF/CLFRF payments made by Treasury? [5/27, updated 7/14]

No. CSFRF/CLFRF payments made by Treasury to states, territories, and the District of Columbia are not subject to the requirement of the Cash Management Improvement Act and Treasury's implementing regulations at 31 CFR part 205 to remit interest to Treasury. CSFRF/CLFRF payments made by Treasury to local governments and Tribes are not subject to the requirement of 2 CFR 200.305(b)(8)-(9) to maintain balances in an interest-bearing account and remit payments to Treasury. Moreover, interest earned on CSFRF/CLFRF payments is not subject to program restrictions. Finally, States may retain interest on payments made by Treasury to the State for distribution to NEUs that is earned before funds are distributed to NEUs, provided that the State adheres to the statutory requirements and Treasury's guidance regarding the distribution of funds to NEUs. Such interest is also not subject to program restrictions.

Among other things, States and other recipients may use earned income to defray the administrative expenses of the program, including with respect to NEUs.

10.4. Is there a deadline to apply for funds? [5/27]

The Interim Final Rule requires that costs be incurred by December 31, 2024. Direct recipients are encouraged to apply as soon as possible. For direct recipients other than Tribal governments, there is not a specific application deadline.

Tribal governments do have deadlines to complete the application process and should visit www.treasury.gov/SLFRPTribal for guidance on applicable deadlines.

Non-entitlement units of local government should contact their state government for information on applicable deadlines.

10.5. May recipients use funds to cover the costs of consultants to assist with managing and administering the funds? [6/8]

Yes. Recipients may use funds for administering the CSFRF/CLFRF program, including costs of consultants to support effective management and oversight, including consultation for ensuring compliance with legal, regulatory, and other requirements.

11. Operations

11.1. How do I know if my entity is eligible?

The Coronavirus State and Local Fiscal Recovery Funds American Rescue Plan Act of 2021 set forth the jurisdictions eligible to receive funds under the program, which are:

- States and the District of Columbia
- Territories
- Tribal governments
- Counties
- Metropolitan cities (typically, but not always, those with populations over 50,000)
- Non-entitlement units of local government, or smaller local governments (typically, but not always, those with populations under 50,000)

11.2. How does an eligible entity request payment?

Eligible entities (other than non-entitlement units) must submit their information to the [Treasury Submission Portal](#). Please visit the [Coronavirus State and Local Fiscal Recovery Fund website](#) for more information on the submission process.

11.3. I cannot log into the Treasury Submission Portal or am having trouble navigating it. Who can help me?

If you have questions about the Treasury Submission Portal or for technical support, please email covidreliefitsupport@treasury.gov.

11.4. What do I need to do to receive my payment?

All eligible payees are required to have a DUNS Number previously issued by Dun & Bradstreet (<https://www.dnb.com/>).

All eligible payees are also required to have an active registration with the System for Award Management (SAM) (<https://www.sam.gov>).

And eligible payees must have a bank account enabled for Automated Clearing House (ACH) direct deposit. Payees with a Wire account are encouraged to provide that information as well.

More information on these and all program pre-submission requirements can be found on the [Coronavirus State and Local Fiscal Recovery Fund website](#).

11.5. Why is Treasury employing id.me for the Treasury Submission Portal?

ID.me is a trusted technology partner to multiple government agencies and healthcare providers. It provides secure digital identity verification to those government agencies and healthcare providers to make sure you're you – and not someone pretending to be you – when you request access to online services. All personally identifiable information provided to ID.me is encrypted and disclosed only with the express consent of the user. Please refer to ID.me Contact Support for assistance with your ID.me account. Their support website is <https://help.id.me>.

11.6. Why is an entity not on the list of eligible entities in Treasury Submission Portal?

The ARPA statute lays out which governments are eligible for payments. The list of entities within the Treasury Submission Portal includes entities eligible to receive a direct payment of funds from Treasury, which include states (defined to include the District of Columbia), territories, Tribal governments, counties, and metropolitan cities.

Eligible non-entitlement units of local government will receive a distribution of funds from their respective state government and should not submit information to the Treasury Submission Portal.

If you believe an entity has been mistakenly left off the eligible entity list, please email SLFRP@treasury.gov.

11.7. What is an Authorized Representative?

An Authorized Representative is an individual with legal authority to bind the government entity (e.g., the Chief Executive Officer of the government entity). An Authorized Representative must sign the Acceptance of Award terms for it to be valid.

11.8. How does a Tribal government determine their allocation?

Tribal governments will receive information about their allocation when the submission to the Treasury Submission Portal is confirmed to be complete and accurate.

11.9. How do I know the status of my request for funds (submission)?

Entities can check the status of their submission at any time by logging into [Treasury Submission Portal](#).

11.10. My Treasury Submission Portal submission requires additional information/correction. What is the process for that?

If your Authorized Representative has not yet signed the award terms, you can edit your submission with in the into [Treasury Submission Portal](#). If your Authorized Representative has signed the award terms, please email SLFRP@treasury.gov to request assistance with updating your information.

11.11. My request for funds was denied. How do I find out why it was denied or appeal the decision?

Please check to ensure that no one else from your entity has applied, causing a duplicate submission. Please also review the list of all eligible entities on the [Coronavirus State and Local Fiscal Recovery Fund website](#).

If you still have questions regarding your submission, please email SLFRP@treasury.gov.

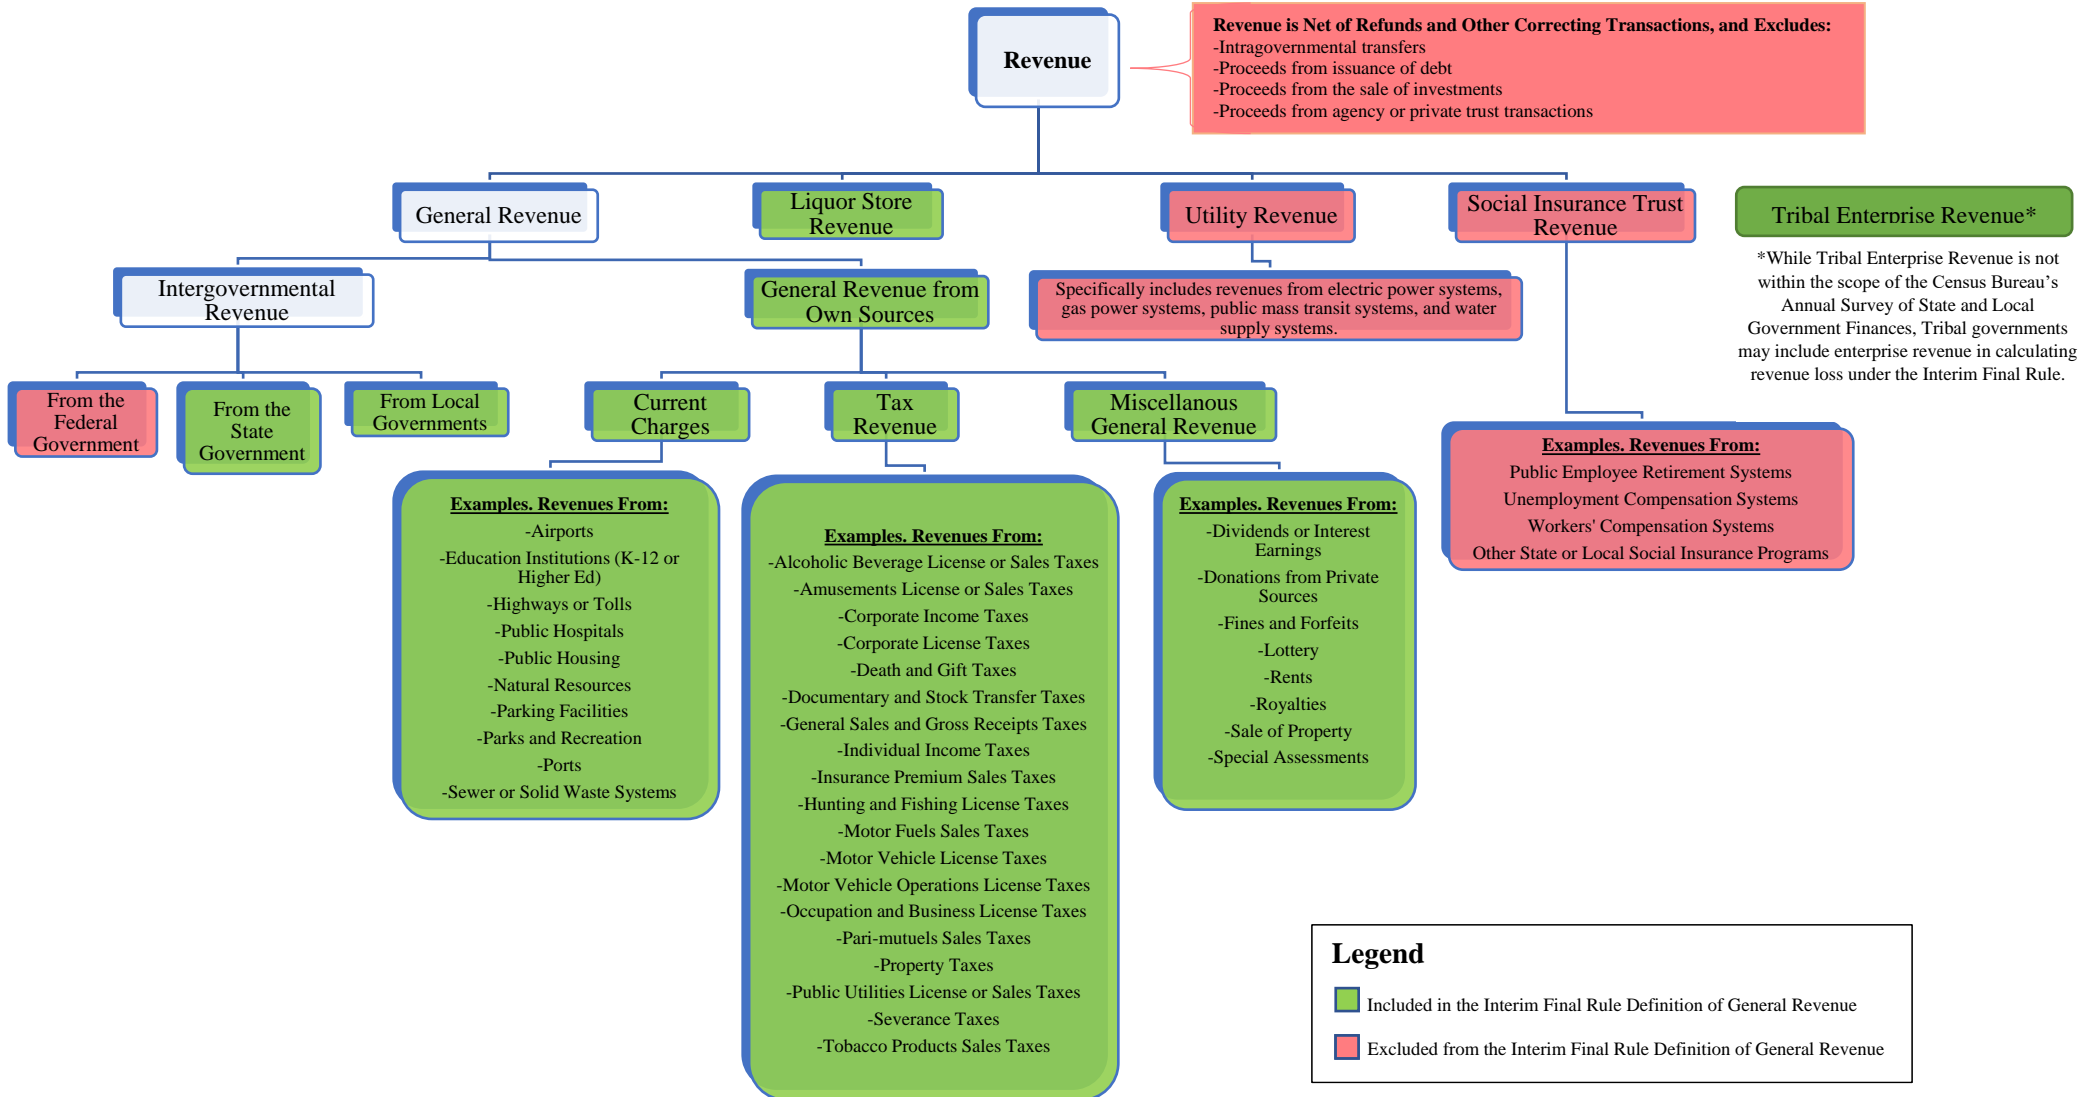

11.12. When will entities get their money?

Before Treasury is able to execute a payment, a representative of an eligible government must submit the government's information for verification through the [Treasury Submission Portal](#). The verification process takes approximately four business days. If any errors are identified, the designated point of contact for the government will be contacted via email to correct the information before the payment can proceed. Once verification is complete, the designated point of contact of the eligible government will receive an email notifying them that their submission has been verified. Payments are generally scheduled for the next business day after this verification email, though funds may not be available immediately due to processing time of their financial institution.

11.13. How does a local government entity provide Treasury with a notice of transfer of funds to its State?

For more information on how to provide Treasury with notice of transfer to a state, please email SLRedirectFunds@treasury.gov.

Appendix: Interim Final Rule Definition of General Revenue Within the Census Bureau Classification Structure of Revenue

Coronavirus State and Local Fiscal Recovery Funds

Frequently Asked Questions

AS OF JULY 19, 2021

This document contains answers to frequently asked questions regarding the Coronavirus State and Local Fiscal Recovery Funds (CSFRF / CLFRF, or Fiscal Recovery Funds). Treasury will be updating this document periodically in response to questions received from stakeholders. Recipients and stakeholders should consult the [Interim Final Rule](#) for additional information.

- For overall information about the program, including information on requesting funding, please see <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments>
- For general questions about CSFRF / CLFRF, please email SLFRP@treasury.gov
- Treasury is seeking comment on all aspects of the Interim Final Rule. Stakeholders are encouraged to submit comments electronically through the Federal eRulemaking Portal (<https://www.regulations.gov/document/TREAS-DO-2021-0008-0002>) on or before July 16, 2021. Please be advised that comments received will be part of the public record and subject to public disclosure. Do not disclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Questions added 5/27/21: 1.5, 1.6, 2.13, 2.14, 2.15, 3.9, 4.5, 4.6, 10.3, 10.4 (noted with “[5/27]”)

Questions added 6/8/21: 2.16, 3.10, 3.11, 3.12, 4.7, 6.7, 8.2, 9.4, 9.5, 10.5 (noted with “[6/8]”)

Questions added 6/17/21: 6.8, 6.9, 6.10, 6.11 (noted with “[6/17]”)

Questions added 6/23/21: 1.7, 2.17, 2.18, 2.19, 2.20, 3.1 (appendix), 3.13, 4.8, 6.12 (noted with “[6/23]”)

Question added 6/24/21: 2.21 (noted with “[6/24]”)

Questions added 7/14/21: 1.8, 3.14, 3.15, 4.9, 4.10, 4.11, 4.12, 6.13, 6.14, 6.15, 6.16, 6.17, 10.3 updated (noted with “[7/14]”)

Answers to frequently asked questions on distribution of funds to non-entitlement units of local government (NEUs) can be found in this [FAQ supplement](#), which is regularly updated.

1. Eligibility and Allocations

1.1. Which governments are eligible for funds?

The following governments are eligible:

- States and the District of Columbia
- Territories
- Tribal governments
- Counties
- Metropolitan cities
- Non-entitlement units, or smaller local governments

1.2. Which governments receive funds directly from Treasury?

Treasury will distribute funds directly to each eligible state, territory, metropolitan city, county, or Tribal government. Smaller local governments that are classified as non-entitlement units will receive funds through their applicable state government.

1.3. Are special-purpose units of government eligible to receive funds?

Special-purpose units of local government will not receive funding allocations; however, a state, territory, local, or Tribal government may transfer funds to a special-purpose unit of government. Special-purpose districts perform specific functions in the community, such as fire, water, sewer or mosquito abatement districts.

1.4. How are funds being allocated to Tribal governments, and how will Tribal governments find out their allocation amounts?¹

\$20 billion of Fiscal Recovery Funds was reserved for Tribal governments. The American Rescue Plan Act specifies that \$1 billion will be allocated evenly to all eligible Tribal governments. The remaining \$19 billion will be distributed using an allocation methodology based on enrollment and employment.

There will be two payments to Tribal governments. Each Tribal government's first payment will include (i) an amount in respect of the \$1 billion allocation that is to be divided equally among eligible Tribal governments and (ii) each Tribal government's pro rata share of the Enrollment Allocation. Tribal governments will be notified of their allocation amount and delivery of payment 4-5 days after completing request for funds in the Treasury Submission Portal. The deadline to make the initial request for funds is June 21, 2021.

The second payment will include a Tribal government's pro rata share of the Employment Allocation. There is a \$1,000,000 minimum employment allocation for Tribal governments. In late-June, Tribal governments will receive an email notification to re-enter the Treasury Submission Portal to confirm or amend their 2019 employment numbers that were submitted to the Department of the Treasury for the CARES Act's Coronavirus Relief Fund. To receive an Employment Allocation, including the minimum employment allocation, Tribal governments must confirm employment numbers by July

¹ The answer to this question was updated on July 19, 2021.

23, 2021. Treasury will calculate employment allocations for those Tribal governments that confirmed or submitted amended employment numbers by the deadline. In August, Treasury will communicate to Tribal governments the amount of their portion of the Employment Allocation and the anticipated date for the second payment.

1.5. My county is a unit of general local government with population under 50,000. Will my county receive funds directly from Treasury? [5/27]

Yes. All counties that are units of general local government will receive funds directly from Treasury and should apply via the [online portal](#). The list of county allocations is available [here](#).

1.6. My local government expected to be classified as a non-entitlement unit. Instead, it was classified as a metropolitan city. Why? [5/27]

The American Rescue Plan Act defines, for purposes of the Coronavirus Local Fiscal Recovery Fund (CLFRF), metropolitan cities to include those that are currently metropolitan cities under the Community Development Block Grant (CDBG) program but also those cities that relinquish or defer their status as a metropolitan city for purposes of the CDBG program. This would include, by way of example, cities that are principal cities of their metropolitan statistical area, even if their population is less than 50,000. In other words, a city that is eligible to be a metropolitan city under the CDBG program is eligible as a metropolitan city under the CLFRF, regardless of how that city has elected to participate in the CDBG program.

Unofficial allocation estimates produced by other organizations may have classified certain local governments as non-entitlement units of local government. However, based on the statutory definitions, some of these local governments should have been classified as metropolitan cities.

1.7. In order to receive and use Fiscal Recovery Funds, must a recipient government maintain a declaration of emergency relating to COVID-19? [6/23]

No. Neither the statute establishing the CSFRF/CLFRF nor the Interim Final Rule requires recipients to maintain a local declaration of emergency relating to COVID-19.

1.8. Can non-profit or private organizations receive funds? If so, how? [7/14]

Yes. Under section 602(c)(3) of the Social Security Act, a State, territory, or Tribal government may transfer funds to a “private nonprofit organization . . . , a Tribal organization . . . , a public benefit corporation involved in the transportation of passengers or cargo, or a special-purpose unit of State or local government.” Similarly, section 603(c)(3) authorizes a local government to transfer funds to the same entities (other than Tribal organizations). The Interim Final Rule clarifies that the lists of transferees in sections 602(c)(3) and 603(c)(3) are not exclusive, and recipients may transfer funds to constituent units of government or private entities beyond those

specified in the statute. A transferee receiving a transfer from a recipient under sections 602(c)(3) and 603(c)(3) will be considered to be a subrecipient and will be expected to comply with all subrecipient reporting requirements.

The ARPA does not authorize Treasury to provide CSFRF/CLFRF funds directly to non-profit or private organizations. Thus, non-profit or private organizations should seek funds from CSFRF/CLFRF recipient(s) in their jurisdiction (e.g., a State, local, territorial, or Tribal government).

2. Eligible Uses – Responding to the Public Health Emergency / Negative Economic Impacts

2.1. What types of COVID-19 response, mitigation, and prevention activities are eligible?

A broad range of services are needed to contain COVID-19 and are eligible uses, including vaccination programs; medical care; testing; contact tracing; support for isolation or quarantine; supports for vulnerable populations to access medical or public health services; public health surveillance (e.g., monitoring case trends, genomic sequencing for variants); enforcement of public health orders; public communication efforts; enhancement to health care capacity, including through alternative care facilities; purchases of personal protective equipment; support for prevention, mitigation, or other services in congregate living facilities (e.g., nursing homes, incarceration settings, homeless shelters, group living facilities) and other key settings like schools; ventilation improvements in congregate settings, health care settings, or other key locations; enhancement of public health data systems; and other public health responses. Capital investments in public facilities to meet pandemic operational needs are also eligible, such as physical plant improvements to public hospitals and health clinics or adaptations to public buildings to implement COVID-19 mitigation tactics.

2.2. If a use of funds was allowable under the Coronavirus Relief Fund (CRF) to respond to the public health emergency, may recipients presume it is also allowable under CSFRF/CLFRF?

Generally, funding uses eligible under CRF as a response to the direct public health impacts of COVID-19 will continue to be eligible under CSFRF/CLFRF, with the following two exceptions: (1) the standard for eligibility of public health and safety payrolls has been updated; and (2) expenses related to the issuance of tax-anticipation notes are not an eligible funding use.

2.3. If a use of funds is not explicitly permitted in the Interim Final Rule as a response to the public health emergency and its negative economic impacts, does that mean it is prohibited?

The Interim Final Rule contains a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of Fiscal Recovery Funds not explicitly listed. The Interim Final Rule also provides flexibility for recipients to use Fiscal Recovery Funds for programs or services that are not identified on these non-exclusive lists but which meet the objectives of section 602(c)(1)(A) or 603(c)(1)(A) by responding to the COVID-19 public health emergency with respect to COVID-19 or its negative economic impacts.

2.4. May recipients use funds to respond to the public health emergency and its negative economic impacts by replenishing state unemployment funds?

Consistent with the approach taken in the CRF, recipients may make deposits into the state account of the Unemployment Trust Fund up to the level needed to restore the pre-pandemic balances of such account as of January 27, 2020, or to pay back advances received for the payment of benefits between January 27, 2020 and the date when the Interim Final Rule is published in the Federal Register.

2.5. What types of services are eligible as responses to the negative economic impacts of the pandemic?

Eligible uses in this category include assistance to households; small businesses and non-profits; and aid to impacted industries.

Assistance to households includes, but is not limited to: food assistance; rent, mortgage, or utility assistance; counseling and legal aid to prevent eviction or homelessness; cash assistance; emergency assistance for burials, home repairs, weatherization, or other needs; internet access or digital literacy assistance; or job training to address negative economic or public health impacts experienced due to a worker's occupation or level of training.

Assistance to small business and non-profits includes, but is not limited to:

- loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure, for example by supporting payroll and benefits costs, costs to retain employees, mortgage, rent, or utilities costs, and other operating costs;
- Loans, grants, or in-kind assistance to implement COVID-19 prevention or mitigation tactics, such as physical plant changes to enable social distancing, enhanced cleaning efforts, barriers or partitions, or COVID-19 vaccination, testing, or contact tracing programs; and
- Technical assistance, counseling, or other services to assist with business planning needs

2.6. May recipients use funds to respond to the public health emergency and its negative economic impacts by providing direct cash transfers to households?

Yes, provided the recipient considers whether, and the extent to which, the household has experienced a negative economic impact from the pandemic. Additionally, cash transfers must be reasonably proportional to the negative economic impact they are intended to address. Cash transfers grossly in excess of the amount needed to address the negative economic impact identified by the recipient would not be considered to be a response to the COVID-19 public health emergency or its negative impacts. In particular, when considering appropriate size of permissible cash transfers made in response to the COVID-19 public health emergency, state, local, territorial, and Tribal governments may consider and take guidance from the per person amounts previously provided by the federal government in response to the COVID crisis.

2.7. May funds be used to reimburse recipients for costs incurred by state and local governments in responding to the public health emergency and its negative economic impacts prior to passage of the American Rescue Plan?

Use of Fiscal Recovery Funds is generally forward looking. The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021.

2.8. May recipients use funds for general economic development or workforce development?

Generally, not. Recipients must demonstrate that funding uses directly address a negative economic impact of the COVID-19 public health emergency, including funds used for economic or workforce development. For example, job training for unemployed workers may be used to address negative economic impacts of the public health emergency and be eligible.

2.9. How can recipients use funds to assist the travel, tourism, and hospitality industries?

Aid provided to tourism, travel, and hospitality industries should respond to the negative economic impacts of the pandemic. For example, a recipient may provide aid to support safe reopening of businesses in the tourism, travel and hospitality industries and to districts that were closed during the COVID-19 public health emergency, as well as aid a planned expansion or upgrade of tourism, travel and hospitality facilities delayed due to the pandemic.

Tribal development districts are considered the commercial centers for tribal hospitality, gaming, tourism and entertainment industries.

2.10. May recipients use funds to assist impacted industries other than travel, tourism, and hospitality?

Yes, provided that recipients consider the extent of the impact in such industries as compared to tourism, travel, and hospitality, the industries enumerated in the statute. For example, nationwide the leisure and hospitality industry has experienced an

approximately 17 percent decline in employment and 24 percent decline in revenue, on net, due to the COVID-19 public health emergency. Recipients should also consider whether impacts were due to the COVID-19 pandemic, as opposed to longer-term economic or industrial trends unrelated to the pandemic.

Recipients should maintain records to support their assessment of how businesses or business districts receiving assistance were affected by the negative economic impacts of the pandemic and how the aid provided responds to these impacts.

2.11. How does the Interim Final Rule help address the disparate impact of COVID-19 on certain populations and geographies?

In recognition of the disproportionate impacts of the COVID-19 virus on health and economic outcomes in low-income and Native American communities, the Interim Final Rule identifies a broader range of services and programs that are considered to be in response to the public health emergency when provided in these communities. Specifically, Treasury will presume that certain types of services are eligible uses when provided in a Qualified Census Tract (QCT), to families living in QCTs, or when these services are provided by Tribal governments.

Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic. In identifying these disproportionately-impacted communities, recipients should be able to support their determination for how the pandemic disproportionately impacted the populations, households, or geographic areas to be served.

Eligible services include:

- Addressing health disparities and the social determinants of health, including: community health workers, public benefits navigators, remediation of lead paint or other lead hazards, and community violence intervention programs;
- Building stronger neighborhoods and communities, including: supportive housing and other services for individuals experiencing homelessness, development of affordable housing, and housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity;
- Addressing educational disparities exacerbated by COVID-19, including: early learning services, increasing resources for high-poverty school districts, educational services like tutoring or afterschool programs, and supports for students' social, emotional, and mental health needs; and
- Promoting healthy childhood environments, including: child care, home visiting programs for families with young children, and enhanced services for child welfare-involved families and foster youth.

2.12. May recipients use funds to pay for vaccine incentive programs (e.g., cash or in-kind transfers, lottery programs, or other incentives for individuals who get vaccinated)?

Yes. Under the Interim Final Rule, recipients may use Coronavirus State and Local Fiscal Recovery Funds to respond to the COVID-19 public health emergency, including expenses related to COVID-19 vaccination programs. See 31 CFR 35.6(b)(1)(i). Programs that provide incentives reasonably expected to increase the number of people who choose to get vaccinated, or that motivate people to get vaccinated sooner than they otherwise would have, are an allowable use of funds so long as such costs are reasonably proportional to the expected public health benefit.

2.13. May recipients use funds to pay “back to work incentives” (e.g., cash payments for newly employed workers after a certain period of time on the job)? [5/27]

Yes. Under the Interim Final Rule, recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to unemployed workers. See 31 CFR 35.6(b)(4). This assistance can include job training or other efforts to accelerate rehiring and thus reduce unemployment, such as childcare assistance, assistance with transportation to and from a jobsite or interview, and incentives for newly employed workers.

2.14. The Coronavirus Relief Fund (CRF) included as an eligible use: "Payroll expenses for public safety, public health, health care, human services, and similar employees whose services are substantially dedicated to mitigating or responding to the COVID-19 public health emergency." What has changed in CSFRF/CLFRF, and what type of documentation is required under CSFRF/CLFRF? [5/27]

Many of the expenses authorized under the Coronavirus Relief Fund are also eligible uses under the CSFRF/CLFRF. However, in the case of payroll expenses for public safety, public health, health care, human services, and similar employees (hereafter, public health and safety staff), the CSFRF/CLFRF does differ from the CRF. This change reflects the differences between the ARPA and CARES Act and recognizes that the response to the COVID-19 public health emergency has changed and will continue to change over time. In particular, funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, including first responders, to the extent that the employee's time that is dedicated to responding to the COVID-19 public health emergency.

For administrative convenience, the recipient may consider a public health and safety employee to be entirely devoted to mitigating or responding to the COVID-19 public health emergency, and therefore fully covered, if the employee, or his or her operating unit or division, is primarily dedicated (e.g., more than half of the employee's time is dedicated) to responding to the COVID-19 public health emergency.

Recipients may use presumptions for assessing whether an employee, division, or operating unit is primarily dedicated to COVID-19 response. The recipient should

maintain records to support its assessment, such as payroll records, attestations from supervisors or staff, or regular work product or correspondence demonstrating work on the COVID-19 response. Recipients need not routinely track staff hours. Recipients should periodically reassess their determinations.

2.15. What staff are included in “public safety, public health, health care, human services, and similar employees”? Would this include, for example, 911 operators, morgue staff, medical examiner staff, or EMS staff? [5/27]

As discussed in the Interim Final Rule, funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, for the portion of the employee’s time that is dedicated to responding to the COVID-19 public health emergency.

Public safety employees would include police officers (including state police officers), sheriffs and deputy sheriffs, firefighters, emergency medical responders, correctional and detention officers, and those who directly support such employees such as dispatchers and supervisory personnel. Public health employees would include employees involved in providing medical and other health services to patients and supervisory personnel, including medical staff assigned to schools, prisons, and other such institutions, and other support services essential for patient care (e.g., laboratory technicians, medical examiner or morgue staff) as well as employees of public health departments directly engaged in matters related to public health and related supervisory personnel. Human services staff include employees providing or administering social services; public benefits; child welfare services; and child, elder, or family care, as well as others.

2.16. May recipients use funds to establish a public jobs program? [6/8]

Yes. The Interim Final Rule permits a broad range of services to unemployed or underemployed workers and other individuals that suffered negative economic impacts from the pandemic. That can include public jobs programs, subsidized employment, combined education and on-the-job training programs, or job training to accelerate rehiring or address negative economic or public health impacts experienced due to a worker’s occupation or level of training. The broad range of permitted services can also include other employment supports, such as childcare assistance or assistance with transportation to and from a jobsite or interview.

The Interim Final Rule includes as an eligible use re-hiring public sector staff up to the government’s level of pre-pandemic employment. “Public sector staff” would not include individuals participating in a job training or subsidized employment program administered by the recipient.

2.17. The Interim Final Rule states that “assistance or aid to individuals or businesses that did not experience a negative economic impact from the public health emergency would not be an eligible use under this category.” Are recipients

required to demonstrate that each individual or business experienced a negative economic impact for that individual or business to receive assistance? [6/23]

Not necessarily. The Interim Final Rule allows recipients to demonstrate a negative economic impact on a population or group and to provide assistance to households or businesses that fall within that population or group. In such cases, the recipient need only demonstrate that the household or business is within the population or group that experienced a negative economic impact.

For assistance to households, the Interim Final Rule states, “In assessing whether a household or population experienced economic harm as a result of the pandemic, a recipient may presume that a household or population that experienced unemployment or increased food or housing insecurity or is low- or moderate-income experienced negative economic impacts resulting from the pandemic.” This would allow, for example, an internet access assistance program for all low- or moderate-income households, but would not require the recipient to demonstrate or document that each individual low- or moderate income household experienced a negative economic impact from the COVID-19 public health emergency apart from being low- or moderate income.

For assistance to small businesses, the Interim Final Rule states that assistance may be provided to small businesses, including loans, grants, in-kind assistance, technical assistance or other services, to respond to the negative economic impacts of the COVID-19 public health emergency. In providing assistance to small businesses, recipients must design a program that responds to the negative economic impacts of the COVID-19 public health emergency, including by identifying how the program addresses the identified need or impact faced by small businesses. This can include assistance to adopt safer operating procedures, weather periods of closure, or mitigate financial hardship resulting from the COVID-19 public health emergency.

As part of program design and to ensure that the program responds to the identified need, recipients may consider additional criteria to target assistance to businesses in need, including to small businesses. Assistance may be targeted to businesses facing financial insecurity, with substantial declines in gross receipts (e.g., comparable to measures used to assess eligibility for the Paycheck Protection Program), or facing other economic harm due to the pandemic, as well as businesses with less capacity to weather financial hardship, such as the smallest businesses, those with less access to credit, or those serving disadvantaged communities. For example, a recipient could find based on local data or research that the smallest businesses faced sharply increased risk of bankruptcy and develop a program to respond; such a program would only need to document a population or group-level negative economic impact, and eligibility criteria to limit access to the program to that population or group (in this case, the smallest businesses).

In addition, recognizing the disproportionate impact of the pandemic on disadvantaged communities, the Interim Final Rule also identifies a set of services that are presumptively eligible when provided in a Qualified Census Tract (QCT); to families and individuals living in QCTs; to other populations, households, or geographic areas

identified by the recipient as disproportionately impacted by the pandemic; or when these services are provided by Tribal governments. For more information on the set of presumptively eligible services, see the Interim Final Rule section on *Building Stronger Communities through Investments in Housing and Neighborhoods* and FAQ 2.11.

2.18. Would investments in improving outdoor spaces (e.g. parks) be an eligible use of funds as a response to the public health emergency and/or its negative economic impacts? [6/23]

There are multiple ways that investments in improving outdoor spaces could qualify as eligible uses; several are highlighted below, though there may be other ways that a specific investment in outdoor spaces would meet eligible use criteria.

First, in recognition of the disproportionate negative economic impacts on certain communities and populations, the Interim Final Rule identifies certain types of services that are eligible uses when provided in a Qualified Census Tract (QCT), to families and individuals living in QCTs, or when these services are provided by Tribal governments. Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic.

These programs and services include services designed to build stronger neighborhoods and communities and to address health disparities and the social determinants of health. The Interim Final Rule provides a non-exhaustive list of eligible services to respond to the needs of communities disproportionately impacted by the pandemic, and recipients may identify other uses of funds that do so, consistent with the Rule’s framework. For example, investments in parks, public plazas, and other public outdoor recreation spaces may be responsive to the needs of disproportionately impacted communities by promoting healthier living environments and outdoor recreation and socialization to mitigate the spread of COVID-19.

Second, recipients may provide assistance to small businesses in all communities. Assistance to small businesses could include support to enhance outdoor spaces for COVID-19 mitigation (e.g., restaurant patios) or to improve the built environment of the neighborhood (e.g., façade improvements).

Third, many governments saw significantly increased use of parks during the pandemic that resulted in damage or increased maintenance needs. The Interim Final Rule recognizes that “decrease[s to] a state or local government’s ability to effectively administer services” can constitute a negative economic impact of the pandemic.

2.19. Would expenses to address a COVID-related backlog in court cases be an eligible use of funds as a response to the public health emergency? [6/23]

The Interim Final Rule recognizes that “decrease[s to] a state or local government’s ability to effectively administer services,” such as cuts to public sector staffing levels, can constitute a negative economic impact of the pandemic. During the COVID-19 public

health emergency, many courts were unable to operate safely during the pandemic and, as a result, now face significant backlogs. Court backlogs resulting from inability of courts to safely operate during the COVID-19 pandemic decreased the government's ability to administer services. Therefore, steps to reduce these backlogs, such as implementing COVID-19 safety measures to facilitate court operations, hiring additional court staff or attorneys to increase speed of case resolution, and other expenses to expedite case resolution are eligible uses.

2.20. Can funds be used to assist small business startups as a response to the negative economic impact of COVID-19? [6/23]

As discussed in the Interim Final Rule, recipients may provide assistance to small businesses that responds to the negative economic impacts of COVID-19. The Interim Final Rule provides a non-exclusive list of potential assistance mechanisms, as well as considerations for ensuring that such assistance is responsive to the negative economic impacts of COVID-19.

Treasury acknowledges a range of potential circumstances in which assisting small business startups could be responsive to the negative economic impacts of COVID-19, including for small businesses and individuals seeking to start small businesses after the start of the COVID-19 public health emergency. For example:

- A recipient could assist small business startups with additional costs associated with COVID-19 mitigation tactics (e.g., barriers or partitions; enhanced cleaning; or physical plant changes to enable greater use of outdoor space).
- A recipient could identify and respond to a negative economic impact of COVID-19 on new small business startups; for example, if it could be shown that small business startups in a locality were facing greater difficulty accessing credit than prior to the pandemic, faced increased costs to starting the business due to the pandemic, or that the small business had lost expected startup capital due to the pandemic.
- The Interim Final Rule also discusses eligible uses that provide support for individuals who have experienced a negative economic impact from the COVID-19 public health emergency, including uses that provide job training for unemployed individuals. These initiatives also may support small business startups and individuals seeking to start small businesses.

2.21. Can funds be used for eviction prevention efforts or housing stability services? [6/24]

Yes. Responses to the negative economic impacts of the pandemic include “rent, mortgage, or utility assistance [and] counseling and legal aid to prevent eviction or homelessness.” This includes housing stability services that enable eligible households to maintain or obtain housing, such as housing counseling, fair housing counseling, case management related to housing stability, outreach to households at risk of eviction or promotion of housing support programs, housing related services for survivors of

domestic abuse or human trafficking, and specialized services for individuals with disabilities or seniors that supports their ability to access or maintain housing.

This also includes legal aid such as legal services or attorney's fees related to eviction proceedings and maintaining housing stability, court-based eviction prevention or eviction diversion programs, and other legal services that help households maintain or obtain housing.

Recipients may transfer funds to, or execute grants or contracts with, court systems, non-profits, and a wide range of other organizations to implement these strategies.

3. Eligible Uses – Revenue Loss

3.1. How is revenue defined for the purpose of this provision? [appendix added 6/23]

The Interim Final Rule adopts a definition of “General Revenue” that is based on, but not identical, to the Census Bureau’s concept of “General Revenue from Own Sources” in the Annual Survey of State and Local Government Finances.

General Revenue includes revenue from taxes, current charges, and miscellaneous general revenue. It excludes refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, agency or private trust transactions, and revenue generated by utilities and insurance trusts. General revenue also includes intergovernmental transfers between state and local governments, but excludes intergovernmental transfers from the Federal government, including Federal transfers made via a state to a locality pursuant to the CRF or the Fiscal Recovery Funds.

Tribal governments may include all revenue from Tribal enterprises and gaming operations in the definition of General Revenue.

Please see the appendix for a diagram of the Interim Final Rule’s definition of General Revenue within the Census Bureau’s revenue classification structure.

3.2. Will revenue be calculated on an entity-wide basis or on a source-by-source basis (e.g. property tax, income tax, sales tax, etc.)?

Recipients should calculate revenue on an entity-wide basis. This approach minimizes the administrative burden for recipients, provides for greater consistency across recipients, and presents a more accurate representation of the net impact of the COVID-19 public health emergency on a recipient’s revenue, rather than relying on financial reporting prepared by each recipient, which vary in methodology used and which generally aggregates revenue by purpose rather than by source.

3.3. Does the definition of revenue include outside concessions that contract with a state or local government?

Recipients should classify revenue sources as they would if responding to the U.S. Census Bureau’s Annual Survey of State and Local Government Finances. According to the Census Bureau’s [Government Finance and Employment Classification manual](#), the following is an example of current charges that would be included in a state or local government’s general revenue from own sources: “Gross revenue of facilities operated by a government (swimming pools, recreational marinas and piers, golf courses, skating rinks, museums, zoos, etc.); auxiliary facilities in public recreation areas (camping areas, refreshment stands, gift shops, etc.); lease or use fees from stadiums, auditoriums, and community and convention centers; and rentals from concessions at such facilities.”

3.4. What is the time period for estimating revenue loss? Will revenue losses experienced prior to the passage of the Act be considered?

Recipients are permitted to calculate the extent of reduction in revenue as of four points in time: December 31, 2020; December 31, 2021; December 31, 2022; and December 31, 2023. This approach recognizes that some recipients may experience lagged effects of the pandemic on revenues.

Upon receiving Fiscal Recovery Fund payments, recipients may immediately calculate revenue loss for the period ending December 31, 2020.

3.5. What is the formula for calculating the reduction in revenue?

A reduction in a recipient’s General Revenue equals:

$$\text{Max} \{ [\text{Base Year Revenue} * (1 + \text{Growth Adjustment})^{\left(\frac{n_t}{12}\right)}] - \text{Actual General Revenue}_t ; 0 \}$$

Where:

Base Year Revenue is General Revenue collected in the most recent full fiscal year prior to the COVID-19 public health emergency.

Growth Adjustment is equal to the greater of 4.1 percent (or 0.041) and the recipient’s average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency.

n equals the number of months elapsed from the end of the base year to the calculation date.

Actual General Revenue is a recipient’s actual general revenue collected during 12-month period ending on each calculation date.

Subscript *t* denotes the calculation date.

3.6. Are recipients expected to demonstrate that reduction in revenue is due to the COVID-19 public health emergency?

In the Interim Final Rule, any diminution in actual revenue calculated using the formula above would be presumed to have been “due to” the COVID-19 public health emergency. This presumption is made for administrative ease and in recognition of the broad-based economic damage that the pandemic has wrought.

3.7. May recipients use pre-pandemic projections as a basis to estimate the reduction in revenue?

No. Treasury is disallowing the use of projections to ensure consistency and comparability across recipients and to streamline verification. However, in estimating the revenue shortfall using the formula above, recipients may incorporate their average annual revenue growth rate in the three full fiscal years prior to the public health emergency.

3.8. Once a recipient has identified a reduction in revenue, are there any restrictions on how recipients use funds up to the amount of the reduction?

The Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. Government services can include, but are not limited to, maintenance of infrastructure or pay-go spending for building new infrastructure, including roads; modernization of cybersecurity, including hardware, software, and protection of critical infrastructure; health services; environmental remediation; school or educational services; and the provision of police, fire, and other public safety services.

However, paying interest or principal on outstanding debt, replenishing rainy day or other reserve funds, or paying settlements or judgments would not be considered provision of a government service, since these uses of funds do not entail direct provision of services to citizens. This restriction on paying interest or principal on any outstanding debt instrument, includes, for example, short-term revenue or tax anticipation notes, or paying fees or issuance costs associated with the issuance of new debt. In addition, the overarching restrictions on all program funds (e.g., restriction on pension deposits, restriction on using funds for non-federal match where barred by regulation or statute) would apply.

3.9. How do I know if a certain type of revenue should be counted for the purpose of computing revenue loss? [5/27]

As discussed in FAQ #3.1, the Interim Final Rule adopts a definition of “General Revenue” that is based on, but not identical, to the Census Bureau’s concept of “General Revenue from Own Sources” in the Annual Survey of State and Local Government Finances.

Recipients should refer to the definition of “General Revenue” included in the Interim Final Rule. See 31 CFR 35.3. If a recipient is unsure whether a particular revenue source is included in the Interim Final Rule’s definition of “General Revenue,” the recipient may consider the classification and instructions used to complete the Census Bureau’s Annual Survey.

For example, parking fees would be classified as a Current Charge for the purpose of the Census Bureau’s Annual Survey, and the Interim Final Rule’s concept of “General Revenue” includes all Current Charges. Therefore, parking fees would be included in the Interim Final Rule’s concept of “General Revenue.”

The Census Bureau’s Government Finance and Employment Classification manual is available [here](#).

3.10. In calculating revenue loss, are recipients required to use audited financials? [6/8]

Where audited data is not available, recipients are not required to obtain audited data. Treasury expects all information submitted to be complete and accurate. See 31 CFR 35.4(c).

3.11. In calculating revenue loss, should recipients use their own data, or Census data? [6/8]

Recipients should use their own data sources to calculate general revenue, and do not need to rely on published revenue data from the Census Bureau. Treasury acknowledges that due to differences in timing, data sources, and definitions, recipients’ self-reported general revenue figures may differ somewhat from those published by the Census Bureau.

3.12. Should recipients calculate revenue loss on a cash basis or an accrual basis? [6/8]

Recipients may provide data on a cash, accrual, or modified accrual basis, provided that recipients are consistent in their choice of methodology throughout the covered period and until reporting is no longer required.

3.13. In identifying intergovernmental revenue for the purpose of calculating General Revenue, should recipients exclude all federal funding, or just federal funding related to the COVID-19 response? How should local governments treat federal funds that are passed through states or other entities, or federal funds that are intermingled with other funds? [6/23]

In calculating General Revenue, recipients should exclude all intergovernmental transfers from the federal government. This includes, but is not limited to, federal transfers made via a state to a locality pursuant to the Coronavirus Relief Fund or Fiscal Recovery Funds. To the extent federal funds are passed through states or other entities or intermingled with other funds, recipients should attempt to identify and exclude the

federal portion of those funds from the calculation of General Revenue on a best-efforts basis.

3.14. What entities constitute a government for the purpose of calculating revenue loss? [7/14]

In determining whether a particular entity is part of a recipient's government for purposes of measuring a recipient's government revenue, recipients should identify all the entities included in their government and the general revenue attributable to these entities on a best-efforts basis. Recipients are encouraged to consider how their administrative structure is organized under state and local statutes. In cases in which the autonomy of certain authorities, commissions, boards, districts, or other entities is not readily distinguishable from the recipient's government, recipients may adopt the Census Bureau's criteria for judging whether an entity is independent from, or a constituent of, a given government. For an entity to be independent, it generally meets all four of the following conditions:

- The entity is an organized entity and possesses corporate powers, such as perpetual succession, the right to sue and be sued, having a name, the ability to make contracts, and the ability to acquire and dispose of property.
- The entity has governmental character, meaning that it provides public services, or wields authority through a popularly elected governing body or officers appointed by public officials. A high degree of responsibility to the public, demonstrated by public reporting requirements or by accessibility of records for public inspection, also evidences governmental character.
- The entity has substantial fiscal independence, meaning it can determine its budget without review and modification by other governments. For instance, the entity can determine its own taxes, charges, and debt issuance without another government's supervision.
- The entity has substantial administrative independence, meaning it has a popularly elected governing body, or has a governing body representing two or more governments, or, in the event its governing body is appointed by another government, the entity performs functions that are essentially different from those of, and are not subject to specification by, its creating government.

If an entity does not meet all four of these conditions, a recipient may classify the entity as part of the recipient's government and assign the portion of General Revenue that corresponds to the entity.

To further assist recipients in applying the forgoing criteria, recipients may refer to the Census Bureau's [*Individual State Descriptions: 2017 Census of Governments*](#) publication, which lists specific entities and classes of entities classified as either independent (defined by Census as "special purpose governments") or constituent (defined by Census as "dependent agencies") on a state-by-state basis. Recipients should note that the Census Bureau's lists are not exhaustive and that Census classifications are based on an analysis of state and local statutes as of 2017 and subject to the Census Bureau's judgement. Though not included in the Census Bureau's publication, state

colleges and universities are generally classified as dependent agencies of state governments by the Census Bureau.

If an entity is determined to be part of the recipient’s government, the recipient must also determine whether the entity’s revenue is covered by the Interim Final Rule’s definition of “general revenue.” For example, some cash flows may be outside the definition of “general revenue.” In addition, note that the definition of general revenue includes Tribal enterprises in the case of Tribal governments. Refer to FAQ 3.1 (and the Appendix) for the components included in General Revenue.

3.15. The Interim Final Rule’s definition of General Revenue excludes revenue generated by utilities. Can you please clarify the definition of utility revenue? [7/14]

As noted in FAQs 3.1 and 3.9, the Interim Final Rule adopts a definition of “general revenue” that is based on, but not identical to, the Census Bureau’s concept of “General Revenue from Own Sources” in the Annual Survey of State and Local Government Finances. Recipients should refer to the definition of “general revenue” included in the Interim Final Rule. See 31 CFR 35.3. If a recipient is unsure whether a particular revenue source is included in the Interim Final Rule’s definition of “general revenue,” the recipient may consider the classification and instructions used to complete the Census Bureau’s Annual Survey.

According to the Census Bureau’s [Government Finance and Employment Classification manual](#), utility revenue is defined as “[g]ross receipts from sale of utility commodities or services to the public or other governments by publicly-owned and controlled utilities.” This includes revenue from operations of publicly-owned and controlled water supply systems, electric power systems, gas supply systems, and public mass transit systems (see pages 4-45 and 4-46 of the manual for more detail).

Except for these four types of utilities, revenues from all commercial-type activities of a recipient’s government (e.g., airports, educational institutions, lotteries, public hospitals, public housing, parking facilities, port facilities, sewer or solid waste systems, and toll roads and bridges) are covered by the Interim Final Rule’s definition of “general revenue.” If a recipient is unsure whether a particular entity performing one of these commercial-type activities can be considered part of the recipient’s government, please see FAQ 3.14.

4. Eligible Uses – General

4.1. May recipients use funds to replenish a budget stabilization fund, rainy day fund, or similar reserve account?

No. Funds made available to respond to the public health emergency and its negative economic impacts are intended to help meet pandemic response needs and provide immediate stabilization for households and businesses. Contributions to rainy day funds

and similar reserves funds would not address these needs or respond to the COVID-19 public health emergency, but would rather be savings for future spending needs. Similarly, funds made available for the provision of governmental services (to the extent of reduction in revenue) are intended to support direct provision of services to citizens. Contributions to rainy day funds are not considered provision of government services, since such expenses do not directly relate to the provision of government services.

4.2. May recipients use funds to invest in infrastructure other than water, sewer, and broadband projects (e.g. roads, public facilities)?

Under 602(c)(1)(C) or 603(c)(1)(C), recipients may use funds for maintenance of infrastructure or pay-go spending for building of new infrastructure as part of the general provision of government services, to the extent of the estimated reduction in revenue due to the public health emergency.

Under 602(c)(1)(A) or 603(c)(1)(A), a general infrastructure project typically would not be considered a response to the public health emergency and its negative economic impacts unless the project responds to a specific pandemic-related public health need (e.g., investments in facilities for the delivery of vaccines) or a specific negative economic impact of the pandemic (e.g., affordable housing in a Qualified Census Tract).

4.3. May recipients use funds to pay interest or principal on outstanding debt?

No. Expenses related to financing, including servicing or redeeming notes, would not address the needs of pandemic response or its negative economic impacts. Such expenses would also not be considered provision of government services, as these financing expenses do not directly provide services or aid to citizens.

This applies to paying interest or principal on any outstanding debt instrument, including, for example, short-term revenue or tax anticipation notes, or paying fees or issuance costs associated with the issuance of new debt.

4.4. May recipients use funds to satisfy nonfederal matching requirements under the Stafford Act? May recipients use funds to satisfy nonfederal matching requirements generally?

Fiscal Recovery Funds are subject to pre-existing limitations in other federal statutes and regulations and may not be used as non-federal match for other Federal programs whose statute or regulations bar the use of Federal funds to meet matching requirements. For example, expenses for the state share of Medicaid are not an eligible use. For information on FEMA programs, please [see here](#).

4.5. Are governments required to submit proposed expenditures to Treasury for approval? [5/27]

No. Recipients are not required to submit planned expenditures for prior approval by Treasury. Recipients are subject to the requirements and guidelines for eligible uses contained in the Interim Final Rule.

4.6. How do I know if a specific use is eligible? [5/27]

Fiscal Recovery Funds must be used in one of the four eligible use categories specified in the American Rescue Plan Act and implemented in the Interim Final Rule:

- a) To respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality;
- b) To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers;
- c) For the provision of government services to the extent of the reduction in revenue due to the COVID-19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency; and
- d) To make necessary investments in water, sewer, or broadband infrastructure.

Recipients should consult Section II of the Interim Final Rule for additional information on eligible uses. For recipients evaluating potential uses under (a), the Interim Final Rule contains a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of Fiscal Recovery Funds not explicitly listed. See Section II of the Interim Final Rule for additional discussion.

For recipients evaluating potential uses under (c), the Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. See FAQ #3.8 for additional discussion.

For recipients evaluating potential uses under (b) and (d), see Sections 5 and 6.

4.7. Do restrictions on using Coronavirus State and Local Fiscal Recovery Funds to cover costs incurred beginning on March 3, 2021 apply to costs incurred by the recipient (e.g., a State, local, territorial, or Tribal government) or to costs incurred by households, businesses, and individuals benefiting from assistance provided using Coronavirus State and Local Fiscal Recovery Funds? [6/8]

The Interim Final Rule permits funds to be used to cover costs incurred beginning on March 3, 2021. This limitation applies to costs incurred by the recipient (i.e., the state, local, territorial, or Tribal government receiving funds). However, recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to households, businesses, and individuals within the eligible use categories described in the Interim

Final Rule for economic harms experienced by those households, businesses, and individuals prior to March 3, 2021. For example,

- Public Health/Negative Economic Impacts – Recipients may use Coronavirus State and Local Fiscal Recovery Funds to provide assistance to households – such as rent, mortgage, or utility assistance – for economic harms experienced or costs incurred by the household prior to March 3, 2021 (e.g., rental arrears from preceding months), provided that the cost of providing assistance to the household was not incurred by the recipient prior to March 3, 2021.
- Premium Pay – Recipients may provide premium pay retrospectively for work performed at any time since the start of the COVID-19 public health emergency. Such premium pay must be “in addition to” wages and remuneration already received and the obligation to provide such pay must not have been incurred by the recipient prior to March 3, 2021.
- Revenue Loss – The Interim Final Rule gives recipients broad latitude to use funds for the provision of government services to the extent of reduction in revenue. The calculation of lost revenue begins with the recipient’s revenue in the last full fiscal year prior to the COVID-19 public health emergency and includes the 12-month period ending December 31, 2020. However, use of funds for government services must be forward looking for costs incurred by the recipient after March 3, 2021.
- Investments in Water, Sewer, and Broadband – Recipients may use Coronavirus State and Local Fiscal Recovery Funds to make necessary investments in water, sewer, and broadband. See FAQ Section 6. Recipients may use Coronavirus State and Local Fiscal Recovery Funds to cover costs incurred for eligible projects planned or started prior to March 3, 2021, provided that the project costs covered by the Coronavirus State and Local Fiscal Recovery Funds were incurred after March 3, 2021.

4.8. How can I use CSFRF/CLFRF funds to prevent and respond to crime, and support public safety in my community? [6/23]

Under Treasury’s Interim Final Rule, there are many ways in which the State and Local Fiscal Recovery Funds (“Funds”) under the American Rescue Plan Act can support communities working to reduce and respond to increased violence due to the pandemic. Among the eligible uses of the Funds are restoring of public sector staff to their pre-pandemic levels and responses to the public health crisis and negative economic impacts resulting from the pandemic. The Interim Final Rule provides several ways for recipients to “respond to” this pandemic-related gun violence, ranging from community violence intervention programs to mental health services to hiring of public safety personnel.

Below are some examples of how Fiscal Recovery Funds can be used to address public safety:

- In all communities, recipients may use resources to rehire police officers and other public servants to restore law enforcement and courts to their pre-pandemic levels.

Additionally, Funds can be used for expenses to address COVID-related court backlogs, including hiring above pre-pandemic levels, as a response to the public health emergency. See FAQ 2.19.

- In communities where an increase in violence or increased difficulty in accessing or providing services to respond to or mitigate the effects of violence, is a result of the pandemic they may use funds to address that harm. This spending may include:
 - Hiring law enforcement officials – even above pre-pandemic levels – or paying overtime where the funds are directly focused on advancing community policing strategies in those communities experiencing an increase in gun violence associated with the pandemic
 - Community Violence Intervention (CVI) programs, including capacity building efforts at CVI programs like funding and training additional intervention workers
 - Additional enforcement efforts to reduce gun violence exacerbated by the pandemic, including prosecuting gun traffickers, dealers, and other parties contributing to the supply of crime guns, as well as collaborative federal, state, and local efforts to identify and address gun trafficking channels
 - Investing in technology and equipment to allow law enforcement to more efficiently and effectively respond to the rise in gun violence resulting from the pandemic

As discussed in the Interim Final Rule, uses of CSFRF/CLFRF funds that respond to an identified harm must be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses.

- Recipients may also use funds up to the level of revenue loss for government services, including those outlined above.

Recognizing that the pandemic exacerbated mental health and substance use disorder needs in many communities, eligible public health services include mental health and other behavioral health services, which are a critical component of a holistic public safety approach. This could include:

- Mental health services and substance use disorder services, including for individuals experiencing trauma exacerbated by the pandemic, such as:
 - Community-based mental health and substance use disorder programs that deliver evidence-based psychotherapy, crisis support services, medications for opioid use disorder, and/or recovery support
 - School-based social-emotional support and other mental health services
- Referrals to trauma recovery services for crime victims.

Recipients also may use Funds to respond to the negative economic impacts of the public health emergency, including:

- Assistance programs to households or populations facing negative economic impacts of the public health emergency, including:

- Assistance to support economic security, including for the victims of crime;
 - Housing assistance, including rent, utilities, and relocation assistance;
 - Assistance with food, including Summer EBT and nutrition programs; and
 - Employment or job training services to address negative economic or public health impacts experienced due to a worker's occupation or level of training.
- Assistance to unemployed workers, including:
 - Subsidized jobs, including for young people. Summer youth employment programs directly address the negative economic impacts of the pandemic on young people and their families and communities;
 - Programs that provide paid training and/or work experience targeted primarily to (1) formerly incarcerated individuals, and/or (2) communities experiencing high levels of violence exacerbated by the pandemic;
 - Programs that provide workforce readiness training, apprenticeship or pre-apprenticeship opportunities, skills development, placement services, and/or coaching and mentoring; and
 - Associated wraparound services, including for housing, health care, and food.

Recognizing the disproportionate impact of the pandemic on certain communities, a broader range of services are eligible in those communities than would otherwise be available in communities not experiencing a pandemic-related increase in crime or gun violence. These eligible uses aim to address the pandemic's exacerbation of public health and economic disparities and include services to address health and educational disparities, support neighborhoods and affordable housing, and promote healthy childhood environments. The Interim Final Rule provides a non-exhaustive list of eligible services in these categories.

These services automatically qualify as eligible uses when provided in Qualified Census Tracts (QCTs), low-income areas designated by HUD; to families in QCTs; or by Tribal governments. Outside of these areas, recipient governments can also identify and serve households, populations, and geographic areas disproportionately impacted by the pandemic.

Services under this category could include:

- Programs or services that address or mitigate the impacts of the COVID-19 public health emergency on education, childhood health and welfare, including:
 - Summer education and enrichment programs in these communities, which include many communities currently struggling with high levels of violence;
 - Programs that address learning loss and keep students productively engaged;
 - Enhanced services for foster youths and home visiting programs; and
 - Summer camps and recreation.
- Programs or services that provide or facilitate access to health and social services and address health disparities exacerbated by the pandemic. This includes Community Violence Intervention (CVI) programs, such as:
 - Evidence-based practices like focused deterrence, street outreach, violence interrupters, and hospital-based violence intervention models, complete with

- wraparound services such as behavioral therapy, trauma recovery, job training, education, housing and relocation services, and financial assistance; and,
- Capacity-building efforts at CVI programs like funding more intervention workers; increasing their pay; providing training and professional development for intervention workers; and hiring and training workers to administer the programs.

Please refer to Treasury's Interim Final Rule for additional information.

4.9. May recipients pool funds for regional projects? [7/14]

Yes, provided that the project is itself an eligible use of funds and that recipients can track the use of funds in line with the reporting and compliance requirements of the CSFRF/CLFRF. In general, when pooling funds for regional projects, recipients may expend funds directly on the project or transfer funds to another government that is undertaking the project on behalf of multiple recipients. To the extent recipients undertake regional projects via transfer to another government, recipients would need to comply with the rules on transfers specified in the Interim Final Rule, Section V. A recipient may transfer funds to a government outside its boundaries (e.g., county transfers to a neighboring county), provided that the recipient can document that its jurisdiction receives a benefit proportionate to the amount contributed.

4.10. May recipients fund a project with both ARP funds and other sources of funding (e.g., blending, braiding, or other pairing funding sources), including in conjunction with financing provided through a debt issuance? [7/14]

Cost sharing or matching funds are not required under CSFRF/CLFRF. Funds may be used in conjunction with other funding sources, provided that the costs are eligible costs under each source program and are compliant with all other related statutory and regulatory requirements and policies. The recipient must comply with applicable reporting requirements for all sources of funds supporting the CSFRF/CLFRF projects, and with any requirements and restrictions on the use of funds from the supplemental funding sources and the CSFRF/CLFRF program. Specifically,

- All funds provided under the CSFRF/CLFRF program must be used for projects, investments, or services that are eligible under the CSFRF/CLFRF statute, Treasury's Interim Final Rule, and guidance. See 31 CFR 35.6-8; FAQ 4.6. CSFRF/CLFRF funds may not be used to fund an activity that is not, in its entirety, an eligible use under the CSFRF/CLFRF statute, Treasury's Interim Final Rule, and guidance. For example,
 - CSFRF/CLFRF funds may be used in conjunction with other sources of funds to make an investment in water infrastructure, which is eligible under the CSLFRF statute, and Treasury's Interim Final Rule.
 - CSFRF/CLFRF funds could not be used to fund the entirety of a water infrastructure project that was partially, although not entirely, an eligible use under Treasury's Interim Final Rule. However, the recipient could use CSFRF/CLFRF funds only for a smaller component project that does

constitute an eligible use, while using other funds for the remaining portions of the larger planned water infrastructure project that do not constitute an eligible use. In this case, the “project” under this program would be only the eligible use component of the larger project.

- In addition, because CSFRF/CLFRF funds must be obligated by December 31, 2024, and expended by December 31, 2026, recipients must be able to, at a minimum, determine and report to Treasury on the amount of CSFRF/CLFRF funds obligated and expended and when such funds were obligated and expended.

**4.11. May Coronavirus State and Local Fiscal Recovery Funds be used to make loans or other extensions of credit (“loans”), including loans to small businesses and loans to finance necessary investments in water, sewer, and broadband infrastructure?
[7/14]**

Yes. Coronavirus State and Local Fiscal Recovery Funds (“Funds”) may be used to make loans, provided that the loan is an eligible use and the cost of the loan is tracked and reported in accordance with the points below. See 31 CFR 35.6. For example, a recipient may use Coronavirus State and Local Fiscal Recovery Funds to make loans to small businesses. See 31 CFR 35.6(b)(6). In addition, a recipient may use Funds to finance a necessary investment in water, sewer or broadband, as described in the Interim Final Rule. See 31 CFR 35.6(e).

Funds must be used to cover “costs incurred” by the recipient between March 3, 2021, and December 31, 2024, and Funds must be expended by December 31, 2026. See Section III.D of the Interim Final Rule; 31 CFR 35.5. Accordingly, recipients must be able to determine the amount of Funds used to make a loan.

- For loans that mature or are forgiven on or before December 31, 2026, the recipient must account for the use of funds on a cash flow basis, consistent with the approach to loans taken in the Coronavirus Relief Fund.
 - Recipients may use Fiscal Recovery Funds to fund the principal of the loan and in that case must track repayment of principal and interest (i.e., “program income,” as defined under 2 CFR 200).
 - When the loan is made, recipients must report the principal of the loan as an expense.
 - Repayment of principal may be re-used only for eligible uses, and subject to restrictions on timing of use of funds. Interest payments received prior to the end of the period of performance will be considered an addition to the total award and may be used for any purpose that is an eligible use of funds under the statute and IFR. Recipients are not subject to restrictions under 2 CFR 200.307(e)(1) with respect to such payments.
- For loans with maturities longer than December 31, 2026, the recipient may use Fiscal Recovery Funds for only the projected cost of the loan. Recipients may estimate the subsidy cost of the loan, which equals the expected cash flows associated

with the loan discounted at the recipient's cost of funding. A recipient's cost of funding can be determined based on the interest rates of securities with a similar maturity to the cash flow being discounted that were either (i) recently issued by the recipient or (ii) recently issued by a unit of state, local, or Tribal government similar to the recipient. Recipients that have adopted the Current Expected Credit Loss (CECL) standard may also treat the cost of the loan as equal to the CECL-based expected credit losses over the life of the loan. Recipients may measure projected losses either once, at the time the loan is extended, or annually over the covered period.

Under either approach for measuring the amount of funds used to make loans with maturities longer than December 31, 2026, recipients would not be subject to restrictions under 2 CFR 200.307(e)(1) and need not separately track repayment of principal or interest.

Any contribution of Fiscal Recovery Funds to a revolving loan fund must follow the approach described above for loans with maturities longer than December 31, 2026. In other words, a recipient could contribute Fiscal Recovery Funds to a revolving loan fund, provided that the revolving loan fund makes loans that are eligible uses and the Fiscal Recovery Funds contributed represent the projected cost of loans made over the life of the revolving loan fund.

4.12. May funds be used for outreach to increase uptake of federal assistance like the Child Tax Credit or federal programs like SNAP? [7/14]

Yes. Eligible uses to address negative economic impacts include work “to improve efficacy of programs addressing negative economic impacts, including through use of data analysis, targeted consumer outreach, improvements to data or technology infrastructure, and impact evaluations.” See 31 CFR 35.6(b)(10). Of note, per the CSFRF/CLFRF [Reporting Guidance](#), allowable use of funds for evaluations may also include other types of program evaluations focused on program improvement and evidence building. In addition, recipients may use funds to facilitate access to health and social services in populations and communities disproportionately impacted by the COVID-19 pandemic, including benefits navigators or marketing efforts to increase consumer uptake of federal tax credits, benefits, or assistance programs that respond to negative economic impacts of the pandemic. See 31 CFR 35.6(b)(12).

5. Eligible Uses – Premium Pay

5.1. What criteria should recipients use in identifying essential workers to receive premium pay?

Essential workers are those in critical infrastructure sectors who regularly perform in-person work, interact with others at work, or physically handle items handled by others.

Critical infrastructure sectors include healthcare, education and childcare, transportation, sanitation, grocery and food production, and public health and safety, among others, as provided in the Interim Final Rule. Governments receiving Fiscal Recovery Funds have the discretion to add additional sectors to this list, so long as the sectors are considered critical to protect the health and well-being of residents.

The Interim Final Rule emphasizes the need for recipients to prioritize premium pay for lower income workers. Premium pay that would increase a worker's total pay above 150% of the greater of the state or county average annual wage requires specific justification for how it responds to the needs of these workers.

5.2. What criteria should recipients use in identifying third-party employers to receive grants for the purpose of providing premium pay to essential workers?

Any third-party employers of essential workers are eligible. Third-party contractors who employ essential workers in eligible sectors are also eligible for grants to provide premium pay. Selection of third-party employers and contractors who receive grants is at the discretion of recipients.

To ensure any grants respond to the needs of essential workers and are made in a fair and transparent manner, the rule imposes some additional reporting requirements for grants to third-party employers, including the public disclosure of grants provided.

5.3. May recipients provide premium pay retroactively for work already performed?

Yes. Treasury encourages recipients to consider providing premium pay retroactively for work performed during the pandemic, recognizing that many essential workers have not yet received additional compensation for their service during the pandemic.

6. Eligible Uses – Water, Sewer, and Broadband Infrastructure

6.1. What types of water and sewer projects are eligible uses of funds?

The Interim Final Rule generally aligns eligible uses of the Funds with the wide range of types or categories of projects that would be eligible to receive financial assistance through the Environmental Protection Agency's Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF).

Under the DWSRF, categories of [eligible projects](#) include: treatment, transmission and distribution (including lead service line replacement), source rehabilitation and decontamination, storage, consolidation, and new systems development.

Under the CWSRF, categories of [eligible projects](#) include: construction of publicly-owned treatment works, nonpoint source pollution management, national estuary program projects, decentralized wastewater treatment systems, stormwater systems, water

conservation, efficiency, and reuse measures, watershed pilot projects, energy efficiency measures for publicly-owned treatment works, water reuse projects, security measures at publicly-owned treatment works, and technical assistance to ensure compliance with the Clean Water Act.

As mentioned in the Interim Final Rule, eligible projects under the DWSRF and CWSRF support efforts to address climate change, as well as to meet cybersecurity needs to protect water and sewer infrastructure. Given the lifelong impacts of lead exposure for children, and the widespread nature of lead service lines, Treasury also encourages recipients to consider projects to replace lead service lines.

6.2. May construction on eligible water, sewer, or broadband infrastructure projects continue past December 31, 2024, assuming funds have been obligated prior to that date?

Yes. Treasury is interpreting the requirement that costs be incurred by December 31, 2024 to only require that recipients have obligated the funds by such date. The period of performance will run until December 31, 2026, which will provide recipients a reasonable amount of time to complete projects funded with Fiscal Recovery Funds.

6.3. May recipients use funds as a non-federal match for the Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF)?

Recipients may not use funds as a state match for the CWSRF and DWSRF due to prohibitions in utilizing federal funds as a state match in the authorizing statutes and regulations of the CWSRF and DWSRF.

6.4. Does the National Environmental Policy Act (NEPA) apply to eligible infrastructure projects?

NEPA does not apply to Treasury's administration of the Funds. Projects supported with payments from the Funds may still be subject to NEPA review if they are also funded by other federal financial assistance programs.

6.5. What types of broadband projects are eligible?

The Interim Final Rule requires eligible projects to reliably deliver minimum speeds of 100 Mbps download and 100 Mbps upload. In cases where it is impracticable due to geography, topography, or financial cost to meet those standards, projects must reliably deliver at least 100 Mbps download speed, at least 20 Mbps upload speed, and be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed.

Projects must also be designed to serve unserved or underserved households and businesses, defined as those that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed.

6.6. For broadband investments, may recipients use funds for related programs such as cybersecurity or digital literacy training?

Yes. Recipients may use funds to provide assistance to households facing negative economic impacts due to Covid-19, including digital literacy training and other programs that promote access to the Internet. Recipients may also use funds for modernization of cybersecurity, including hardware, software, and protection of critical infrastructure, as part of provision of government services up to the amount of revenue lost due to the public health emergency.

6.7. How do I know if a water, sewer, or broadband project is an eligible use of funds? Do I need pre-approval? [6/8]

Recipients do not need approval from Treasury to determine whether an investment in a water, sewer, or broadband project is eligible under CSFRF/CLFRF. Each recipient should review the Interim Final Rule (IFR), along with the preamble to the Interim Final Rule, in order to make its own assessment of whether its intended project meets the eligibility criteria in the IFR. A recipient that makes its own determination that a project meets the eligibility criteria as outlined in the IFR may pursue the project as a CSFRF/CLFRF project without pre-approval from Treasury. Local government recipients similarly do not need state approval to determine that a project is eligible under CSFRF/CLFRF. However, recipients should be cognizant of other federal or state laws or regulations that may apply to construction projects independent of CSFRF/CLFRF funding conditions and that may require pre-approval.

For water and sewer projects, the IFR refers to the EPA [Drinking Water](#) and [Clean Water](#) State Revolving Funds (SRFs) for the categories of projects and activities that are eligible for funding. Recipients should look at the relevant federal statutes, regulations, and guidance issued by the EPA to determine whether a water or sewer project is eligible. Of note, the IFR does not incorporate any other requirements contained in the federal statutes governing the SRFs or any conditions or requirements that individual states may place on their use of SRFs.

6.8. For broadband infrastructure investments, what does the requirement that infrastructure “be designed to” provide service to unserved or underserved households and businesses mean? [6/17]

Designing infrastructure investments to provide service to unserved or underserved households or businesses means prioritizing deployment of infrastructure that will bring service to households or businesses that are not currently serviced by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed. To meet this requirement, states and localities should use funds to deploy broadband infrastructure projects whose objective is to provide service to unserved or underserved households or businesses. These unserved or underserved households or businesses do not need to be the only ones in the service area funded by the project.

6.9. For broadband infrastructure to provide service to “unserved or underserved households or businesses,” must every house or business in the service area be unserved or underserved? [6/17]

No. It suffices that an objective of the project is to provide service to unserved or underserved households or businesses. Doing so may involve a holistic approach that provides service to a wider area in order, for example, to make the ongoing service of unserved or underserved households or businesses within the service area economical. Unserved or underserved households or businesses need not be the *only* households or businesses in the service area receiving funds.

6.10. May recipients use payments from the Funds for “middle mile” broadband projects? [6/17]

Yes. Under the Interim Final Rule, recipients may use payments from the Funds for “middle-mile projects,” but Treasury encourages recipients to focus on projects that will achieve last-mile connections—whether by focusing on funding last-mile projects or by ensuring that funded middle-mile projects have potential or partnered last-mile networks that could or would leverage the middle-mile network.

6.11. For broadband infrastructure investments, what does the requirement to “reliably” meet or exceed a broadband speed threshold mean? [6/17]

In the Interim Final Rule, the term “reliably” is used in two places: to identify areas that are eligible to be the subject of broadband infrastructure investments and to identify expectations for acceptable service levels for broadband investments funded by the Coronavirus State and Local Fiscal Recovery Funds. In particular:

- The IFR defines “unserved or underserved households or businesses” to mean one or more households or businesses that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speeds and 3 Mbps of upload speeds.
- The IFR provides that a recipient may use Coronavirus State and Local Fiscal Recovery Funds to make investments in broadband infrastructure that are designed to provide service to unserved or underserved households or businesses and that are designed to, upon completion: (i) reliably meet or exceed symmetrical 100 Mbps download speed and upload speeds; or (ii) in limited cases, reliably meet or exceed 100 Mbps download speed and between 20 Mbps and 100 Mbps upload speed and be scalable to a minimum of 100 Mbps download and upload speeds.

The use of “reliably” in the IFR provides recipients with significant discretion to assess whether the households and businesses in the area to be served by a project have access to wireline broadband service that can actually and consistently meet the specified thresholds of at least 25Mbps/3Mbps—i.e., to consider the actual experience of current

wireline broadband customers that subscribe to services at or above the 25 Mbps/3 Mbps threshold. Whether there is a provider serving the area that advertises or otherwise claims to offer speeds that meet the 25 Mbps download and 3 Mbps upload speed thresholds is not dispositive.

When making these assessments, recipients may choose to consider any available data, including but not limited to documentation of existing service performance, federal and/or state-collected broadband data, user speed test results, interviews with residents and business owners, and any other information they deem relevant. In evaluating such data, recipients may take into account a variety of factors, including whether users actually receive service at or above the speed thresholds at all hours of the day, whether factors other than speed such as latency or jitter, or deterioration of the existing connections make the user experience unreliable, and whether the existing service is being delivered by legacy technologies, such as copper telephone lines (typically using Digital Subscriber Line technology) or early versions of cable system technology (DOCSIS 2.0 or earlier).

The IFR also provides recipients with significant discretion as to how they will assess whether the project itself has been designed to provide households and businesses with broadband services that meet, or even exceed, the speed thresholds provided in the rule.

6.12. May recipients use Funds for pre-project development for eligible water, sewer, and broadband projects? [6/23]

Yes. To determine whether Funds can be used on pre-project development for an eligible water or sewer project, recipients should consult whether the pre-project development use or cost is eligible under the Drinking Water and Clean Water State Revolving Funds (CWSRF and DWSRF, respectively). Generally, the CWSRF and DWSRF often allow for pre-project development costs that are tied to an eligible project, as well as those that are reasonably expected to lead to a project. For example, the DWSRF [allows](#) for planning and evaluations uses, as well as numerous pre-project development costs, including costs associated with obtaining project authorization, planning and design, and project start-up like training and warranty for equipment. Likewise, the CWSRF [allows](#) for broad pre-project development, including planning and assessment activities, such as cost and effectiveness analyses, water/energy audits and conservation plans, and capital improvement plans.

Similarly, pre-project development uses and costs for broadband projects should be tied to an eligible broadband project or reasonably expected to lead to such a project. For example, pre-project costs associated with planning and engineering for an eligible broadband infrastructure build-out is considered an eligible use of funds, as well as technical assistance and evaluations that would reasonably be expected to lead to commencement of an eligible project (e.g., broadband mapping for the purposes of finding an eligible area for investment).

All funds must be obligated within the statutory period between March 3, 2021 and December 31, 2024, and expended to cover such obligations by December 31, 2026.

6.13. May State and Local Fiscal Recovery Funds be used to support energy or electrification infrastructure that would be used to power new water treatment plants and wastewater systems? [7/14]

The EPA’s [Overview of Clean Water State Revolving Fund Eligibilities](#) describes eligible energy-related projects. This includes a “[p]ro rata share of capital costs of offsite clean energy facilities that provide power to a treatment works.” Thus, State and Local Fiscal Recovery Funds may be used to finance the generation and delivery of clean power to a wastewater system or a water treatment plant on a pro-rata basis. If the wastewater system or water treatment plant is the sole user of the clean energy, the full cost would be considered an eligible use of funds. If the clean energy provider provides power to other entities, only the proportionate share used by the water treatment plant or wastewater system would be an eligible use of State and Local Fiscal Recovery Funds.

6.14. How should states and local governments assess whether a stormwater management project, such as a culvert replacement, is an eligible project for State and Local Fiscal Recovery Funds? [7/14]

FAQ 6.7 describes the overall approach that recipients may take to evaluate the eligibility of water or sewer projects. For stormwater management projects specifically, as noted in the EPA’s [Overview of Clean Water State Revolving Fund Eligibilities](#), “Stormwater projects must have a water quality benefit.” Thus, to be eligible under CSFRF/CLFRF, stormwater management projects should be designed to incorporate water quality benefits consistent with the goals of the Clean Water Act. [Summary of the Clean Water Act.](#)

6.15. May recipients use Funds for road repairs and upgrades that occur in connection with an eligible water or sewer project? [7/14]

Yes, recipients may use State and Local Fiscal Recovery Funds for road repairs and upgrades directly related to an eligible water or sewer project. For example, a recipient could use Funds to repair or re-pave a road following eligible sewer repair work beneath it. However, use of Funds for general infrastructure projects is subject to the limitations described in FAQ 4.2. Water and sewer infrastructure projects are often a single component of a broader transportation infrastructure project, for example, the implementation of stormwater infrastructure to meet Clean Water Act established water quality standards. In this example, the components of the infrastructure project that interact directly with the stormwater infrastructure project may be funded by Fiscal Recovery Funds.

6.16. May Funds be used to build or upgrade broadband connections to schools or libraries? [7/14]

As outlined in the IFR, recipients may use Fiscal Recovery Funds to invest in broadband infrastructure that, wherever it is practicable to do so, is designed to deliver service that reliably meets or exceeds symmetrical upload and download speeds of 100 Mbps to households or businesses that are not currently serviced by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed. Treasury interprets “businesses” in this context broadly to include non-residential users of broadband, including private businesses and institutions that serve the public, such as schools, libraries, healthcare facilities, and public safety organizations.

6.17. Are eligible infrastructure projects subject to the Davis-Bacon Act? [7/14]

The Davis-Bacon Act requirements (prevailing wage rates) do not apply to projects funded solely with award funds from the CSFRF/CLFRF program, except for CSFRF/CLFRF-funded construction projects undertaken by the District of Columbia. The Davis-Bacon Act specifically applies to the District of Columbia when it uses federal funds (CSFRF/CLFRF funds or otherwise) to enter into contracts over \$2,000 for the construction, alteration, or repair (including painting and decorating) of public buildings or public works. Recipients may be otherwise subject to the requirements of the Davis-Bacon Act, when CSFRF/CLFRF award funds are used on a construction project in conjunction with funds from another federal program that requires enforcement of the Davis-Bacon Act. Additionally, corollary state prevailing-wage-in-construction laws (commonly known as “baby Davis-Bacon Acts”) may apply to projects. Please refer to FAQ 4.10 concerning projects funded with both CSFRF/CLFRF funds and other sources of funding.

Treasury has indicated in its Interim Final Rule that it is important that necessary investments in water, sewer, or broadband infrastructure be carried out in ways that produce high-quality infrastructure, avert disruptive and costly delays, and promote efficiency. Treasury encourages recipients to ensure that water, sewer, and broadband projects use strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions, not only to promote effective and efficient delivery of high-quality infrastructure projects, but also to support the economic recovery through strong employment opportunities for workers. Using these practices in construction projects may help to ensure a reliable supply of skilled labor that would minimize disruptions, such as those associated with labor disputes or workplace injuries.

Treasury has also indicated in its reporting guidance that recipients will need to provide documentation of wages and labor standards for infrastructure projects over \$10 million, and that these requirements can be met with certifications that the project is in compliance with the Davis-Bacon Act (or related state laws, commonly known as “baby Davis-Bacon Acts”) and subject to a project labor agreement. Please refer to the Reporting and Compliance Guidance, page 21, for more detailed information on the reporting requirement.

7. Non-Entitlement Units (NEUs)

Answers to frequently asked questions on distribution of funds to NEUs can be found in this [FAQ supplement](#), which is regularly updated.

8. Ineligible Uses

8.1. What is meant by a pension “deposit”? Can governments use funds for routine pension contributions for employees whose payroll and covered benefits are eligible expenses?

Treasury interprets “deposit” in this context to refer to an extraordinary payment into a pension fund for the purpose of reducing an accrued, unfunded liability. More specifically, the interim final rule does not permit this assistance to be used to make a payment into a pension fund if both: (1) the payment reduces a liability incurred prior to the start of the COVID-19 public health emergency, and (2) the payment occurs outside the recipient’s regular timing for making such payments.

Under this interpretation, a “deposit” is distinct from a “payroll contribution,” which occurs when employers make payments into pension funds on regular intervals, with contribution amounts based on a pre-determined percentage of employees’ wages and salaries. In general, if an employee’s wages and salaries are an eligible use of Fiscal Recovery Funds, recipients may treat the employee’s covered benefits as an eligible use of Fiscal Recovery Funds.

8.2. May recipients use Fiscal Recovery Funds to fund Other Post-Employment Benefits (OPEB)? [6/8]

OPEB refers to benefits other than pensions (see, e.g., [Governmental Accounting Standards Board, “Other Post-Employment Benefits”](#)). Treasury has determined that Sections 602(c)(2)(B) and 603(c)(2), which refer only to pensions, do not prohibit CSFRF/CLFRF recipients from funding OPEB. Recipients of either the CSFRF/CLFRF may use funds for eligible uses, and a recipient seeking to use CSFRF/CLFRF funds for OPEB contributions would need to justify those contributions under one of the four eligible use categories.

9. Reporting

On June 17, 2021, Treasury released [Guidance on Recipient Compliance and Reporting Responsibilities for the Coronavirus State and Local Fiscal Recovery Funds](#). Recipients should consult this guidance for additional detail and clarification on recipients’ compliance and reporting responsibilities. A users’ guide will be provided with additional information on how and where to submit required reports.

9.1. What records must be kept by governments receiving funds?

Financial records and supporting documents related to the award must be retained for a period of five years after all funds have been expended or returned to Treasury, whichever is later. This includes those which demonstrate the award funds were used for eligible purposes in accordance with the ARPA, Treasury's regulations implementing those sections, and Treasury's guidance on eligible uses of funds.

9.2. What reporting will be required, and when will the first report be due?

Recipients will be required to submit an interim report, quarterly project and expenditure reports, and annual Recovery Plan Performance Reports as specified below, regarding their utilization of Coronavirus State and Local Fiscal Recovery Funds.

Interim reports: States (defined to include the District of Columbia), territories, metropolitan cities, counties, and Tribal governments will be required to submit one interim report. The interim report will include a recipient's expenditures by category at the summary level and for states, information related to distributions to non-entitlement units of local government must also be included in the interim report. The interim report will cover activity from the date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Non-entitlement units of local government are not required to submit an interim report.

Quarterly Project and Expenditure reports: State (defined to include the District of Columbia), territorial, metropolitan city, county, and Tribal governments will be required to submit quarterly project and expenditure reports. This report will include financial data, information on contracts and subawards over \$50,000, types of projects funded, and other information regarding a recipient's utilization of award funds. Reports will be required quarterly with the exception of non-entitlement units, which will report annually. An interim report is due on August 31, 2021. The reports will include the same general data as those submitted by recipients of the Coronavirus Relief Fund, with some modifications to expenditure categories and the addition of data elements related to specific eligible uses. The initial quarterly Project and Expenditure report will cover two calendar quarters from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent quarterly reports will cover one calendar quarter and must be submitted to Treasury within 30 days after the end of each calendar quarter.

Non-entitlement units of local government will be required to submit the project and expenditure report annually. The initial annual Project and Expenditure report for non-entitlement units of local government will cover activity from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year.

Recovery Plan Performance Reports: States (defined to include the District of Columbia), territories, metropolitan cities, and counties with a population that exceeds 250,000

residents will also be required to submit an annual Recovery Plan Performance Report to Treasury. This report will include descriptions of the projects funded and information on the performance indicators and objectives of each award, helping local residents understand how their governments are using the substantial resources provided by Coronavirus State and Local Fiscal Recovery Funds program. The initial Recovery Plan Performance Report will cover activity from date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Thereafter, the Recovery Plan Performance Reports will cover a 12-month period and recipients will be required to submit the report to Treasury within 30 days after the end of the 12-month period. The second Recovery Plan Performance Report will cover the period from July 1, 2021 to June 30, 2022 and must be submitted to Treasury by July 31, 2022. Each annual Recovery Plan Performance Report must be posted on the public-facing website of the recipient. Local governments with fewer than 250,000 residents, Tribal governments, and non-entitlement units of local government are not required to develop a Recovery Plan Performance Report.

Please see the [Guidance on Recipient Compliance and Reporting Responsibilities](#) for more information.

9.3. What provisions of the Uniform Guidance for grants apply to these funds? Will the Single Audit requirements apply?

Most of the provisions of the Uniform Guidance (2 CFR Part 200) apply to this program, including the Cost Principles and Single Audit Act requirements. Recipients should refer to the Assistance Listing for detail on the specific provisions of the Uniform Guidance that do not apply to this program. The Assistance Listing will be available on beta.SAM.gov.

9.4. Once a recipient has identified a reduction in revenue, how will Treasury track use of funds for the provision of government services? [6/8]

The ARPA establishes four categories of eligible uses and further restrictions on the use of funds to ensure that Fiscal Recovery Funds are used within the four eligible use categories. The Interim Final Rule implements these restrictions, including the scope of the eligible use categories and further restrictions on tax cuts and deposits into pensions. Reporting requirements will align with this structure.

Consistent with the broad latitude provided to recipients to use funds for government services to the extent of the reduction in revenue, recipients will be required to submit a description of services provided. As discussed in IFR, these services can include a broad range of services but may not be used directly for pension deposits, contributions to reserve funds, or debt service. Recipients may use sources of funding other than Fiscal Recovery Funds to make deposits to pension funds, contribute to reserve funds, and pay debt service, including during the period of performance for the Fiscal Recovery Fund award.

For recipients using Fiscal Recovery Funds to provide government services to the extent of reduction in revenue, the description of government services reported to Treasury may be narrative or in another form, and recipients are encouraged to report based on their existing budget processes and to minimize administrative burden. For example, a recipient with \$100 in revenue replacement funds available could indicate that \$50 were used for personnel costs and \$50 were used for pay-go building of sidewalk infrastructure.

In addition to describing the government services provided to the extent of reduction in revenue, all recipients will also be required to indicate that Fiscal Recovery Funds are not used directly to make a deposit in a pension fund. Further, recipients subject to the tax offset provision will be required to provide information necessary to implement the Interim Final Rule, as described in the Interim Final Rule. Treasury does not anticipate requiring other types of reporting or recordkeeping on spending in pensions, debt service, or contributions to reserve funds.

These requirements are further detailed in the guidance on reporting requirements for the Fiscal Recovery Funds available [here](#).

9.5. What is the Assistance Listing and Catalog of Federal Domestic Assistance (CFDA) number for the program? [6/8]

The [Assistance Listing](#) for the Coronavirus State and Local Fiscal Recovery Funds (CSLFRF) was published May 28, 2021 on SAM.gov. This includes the final CFDA Number for the program, 21.027.

The assistance listing includes helpful information including program purpose, statutory authority, eligibility requirements, and compliance requirements for recipients. The CFDA number is the unique 5-digit code for each type of federal assistance, and can be used to search for program information, including funding opportunities, spending on [usaspending.gov](#), or audit results through the Federal Audit Clearinghouse.

To expedite payments and meet statutory timelines, Treasury issued initial payments under an existing CFDA number. If you have already received funds or captured the initial CFDA number in your records, please update your systems and reporting to reflect the final CFDA number 21.027. **Recipients must use the final CFDA number for all financial accounting, audits, subawards, and associated program reporting requirements.**

To ensure public trust, Treasury expects all recipients to serve as strong stewards of these funds. This includes ensuring funds are used for intended purposes and recipients have in place effective financial management, internal controls, and reporting for transparency and accountability.

Please see [Treasury's Interim Final Rule](#) and the [Guidance on Recipient Compliance and Reporting Responsibilities](#) for more information.

10. Miscellaneous

10.1. May governments retain assets purchased with Fiscal Recovery Funds? If so, what rules apply to the proceeds of disposition or sale of such assets?

Yes, if the purchase of the asset was consistent with the limitations on the eligible use of funds. If such assets are disposed of prior to December 31, 2024, the proceeds would be subject to the restrictions on the eligible use of payments.

10.2. Can recipients use funds for administrative purposes?

Recipients may use funds to cover the portion of payroll and benefits of employees corresponding to time spent on administrative work necessary due to the COVID-19 public health emergency and its negative economic impacts. This includes, but is not limited to, costs related to disbursing payments of Fiscal Recovery Funds and managing new grant programs established using Fiscal Recovery Funds.

10.3. Are recipients required to remit interest earned on CSFRF/CLFRF payments made by Treasury? [5/27, updated 7/14]

No. CSFRF/CLFRF payments made by Treasury to states, territories, and the District of Columbia are not subject to the requirement of the Cash Management Improvement Act and Treasury's implementing regulations at 31 CFR part 205 to remit interest to Treasury. CSFRF/CLFRF payments made by Treasury to local governments and Tribes are not subject to the requirement of 2 CFR 200.305(b)(8)-(9) to maintain balances in an interest-bearing account and remit payments to Treasury. Moreover, interest earned on CSFRF/CLFRF payments is not subject to program restrictions. Finally, States may retain interest on payments made by Treasury to the State for distribution to NEUs that is earned before funds are distributed to NEUs, provided that the State adheres to the statutory requirements and Treasury's guidance regarding the distribution of funds to NEUs. Such interest is also not subject to program restrictions.

Among other things, States and other recipients may use earned income to defray the administrative expenses of the program, including with respect to NEUs.

10.4. Is there a deadline to apply for funds? [5/27]

The Interim Final Rule requires that costs be incurred by December 31, 2024. Direct recipients are encouraged to apply as soon as possible. For direct recipients other than Tribal governments, there is not a specific application deadline.

Tribal governments do have deadlines to complete the application process and should visit www.treasury.gov/SLFRPTribal for guidance on applicable deadlines.

Non-entitlement units of local government should contact their state government for information on applicable deadlines.

10.5. May recipients use funds to cover the costs of consultants to assist with managing and administering the funds? [6/8]

Yes. Recipients may use funds for administering the CSFRF/CLFRF program, including costs of consultants to support effective management and oversight, including consultation for ensuring compliance with legal, regulatory, and other requirements.

11. Operations

11.1. How do I know if my entity is eligible?

The Coronavirus State and Local Fiscal Recovery Funds American Rescue Plan Act of 2021 set forth the jurisdictions eligible to receive funds under the program, which are:

- States and the District of Columbia
- Territories
- Tribal governments
- Counties
- Metropolitan cities (typically, but not always, those with populations over 50,000)
- Non-entitlement units of local government, or smaller local governments (typically, but not always, those with populations under 50,000)

11.2. How does an eligible entity request payment?

Eligible entities (other than non-entitlement units) must submit their information to the [Treasury Submission Portal](#). Please visit the [Coronavirus State and Local Fiscal Recovery Fund website](#) for more information on the submission process.

11.3. I cannot log into the Treasury Submission Portal or am having trouble navigating it. Who can help me?

If you have questions about the Treasury Submission Portal or for technical support, please email covidreliefitsupport@treasury.gov.

11.4. What do I need to do to receive my payment?

All eligible payees are required to have a DUNS Number previously issued by Dun & Bradstreet (<https://www.dnb.com/>).

All eligible payees are also required to have an active registration with the System for Award Management (SAM) (<https://www.sam.gov>).

And eligible payees must have a bank account enabled for Automated Clearing House (ACH) direct deposit. Payees with a Wire account are encouraged to provide that information as well.

More information on these and all program pre-submission requirements can be found on the [Coronavirus State and Local Fiscal Recovery Fund website](#).

11.5. Why is Treasury employing id.me for the Treasury Submission Portal?

ID.me is a trusted technology partner to multiple government agencies and healthcare providers. It provides secure digital identity verification to those government agencies and healthcare providers to make sure you're you – and not someone pretending to be you – when you request access to online services. All personally identifiable information provided to ID.me is encrypted and disclosed only with the express consent of the user. Please refer to ID.me Contact Support for assistance with your ID.me account. Their support website is <https://help.id.me>.

11.6. Why is an entity not on the list of eligible entities in Treasury Submission Portal?

The ARPA statute lays out which governments are eligible for payments. The list of entities within the Treasury Submission Portal includes entities eligible to receive a direct payment of funds from Treasury, which include states (defined to include the District of Columbia), territories, Tribal governments, counties, and metropolitan cities.

Eligible non-entitlement units of local government will receive a distribution of funds from their respective state government and should not submit information to the Treasury Submission Portal.

If you believe an entity has been mistakenly left off the eligible entity list, please email SLFRP@treasury.gov.

11.7. What is an Authorized Representative?

An Authorized Representative is an individual with legal authority to bind the government entity (e.g., the Chief Executive Officer of the government entity). An Authorized Representative must sign the Acceptance of Award terms for it to be valid.

11.8. How does a Tribal government determine their allocation?

Tribal governments will receive information about their allocation when the submission to the Treasury Submission Portal is confirmed to be complete and accurate.

11.9. How do I know the status of my request for funds (submission)?

Entities can check the status of their submission at any time by logging into [Treasury Submission Portal](#).

11.10. My Treasury Submission Portal submission requires additional information/correction. What is the process for that?

If your Authorized Representative has not yet signed the award terms, you can edit your submission with in the into [Treasury Submission Portal](#). If your Authorized Representative has signed the award terms, please email SLFRP@treasury.gov to request assistance with updating your information.

11.11. My request for funds was denied. How do I find out why it was denied or appeal the decision?

Please check to ensure that no one else from your entity has applied, causing a duplicate submission. Please also review the list of all eligible entities on the [Coronavirus State and Local Fiscal Recovery Fund website](#).

If you still have questions regarding your submission, please email SLFRP@treasury.gov.

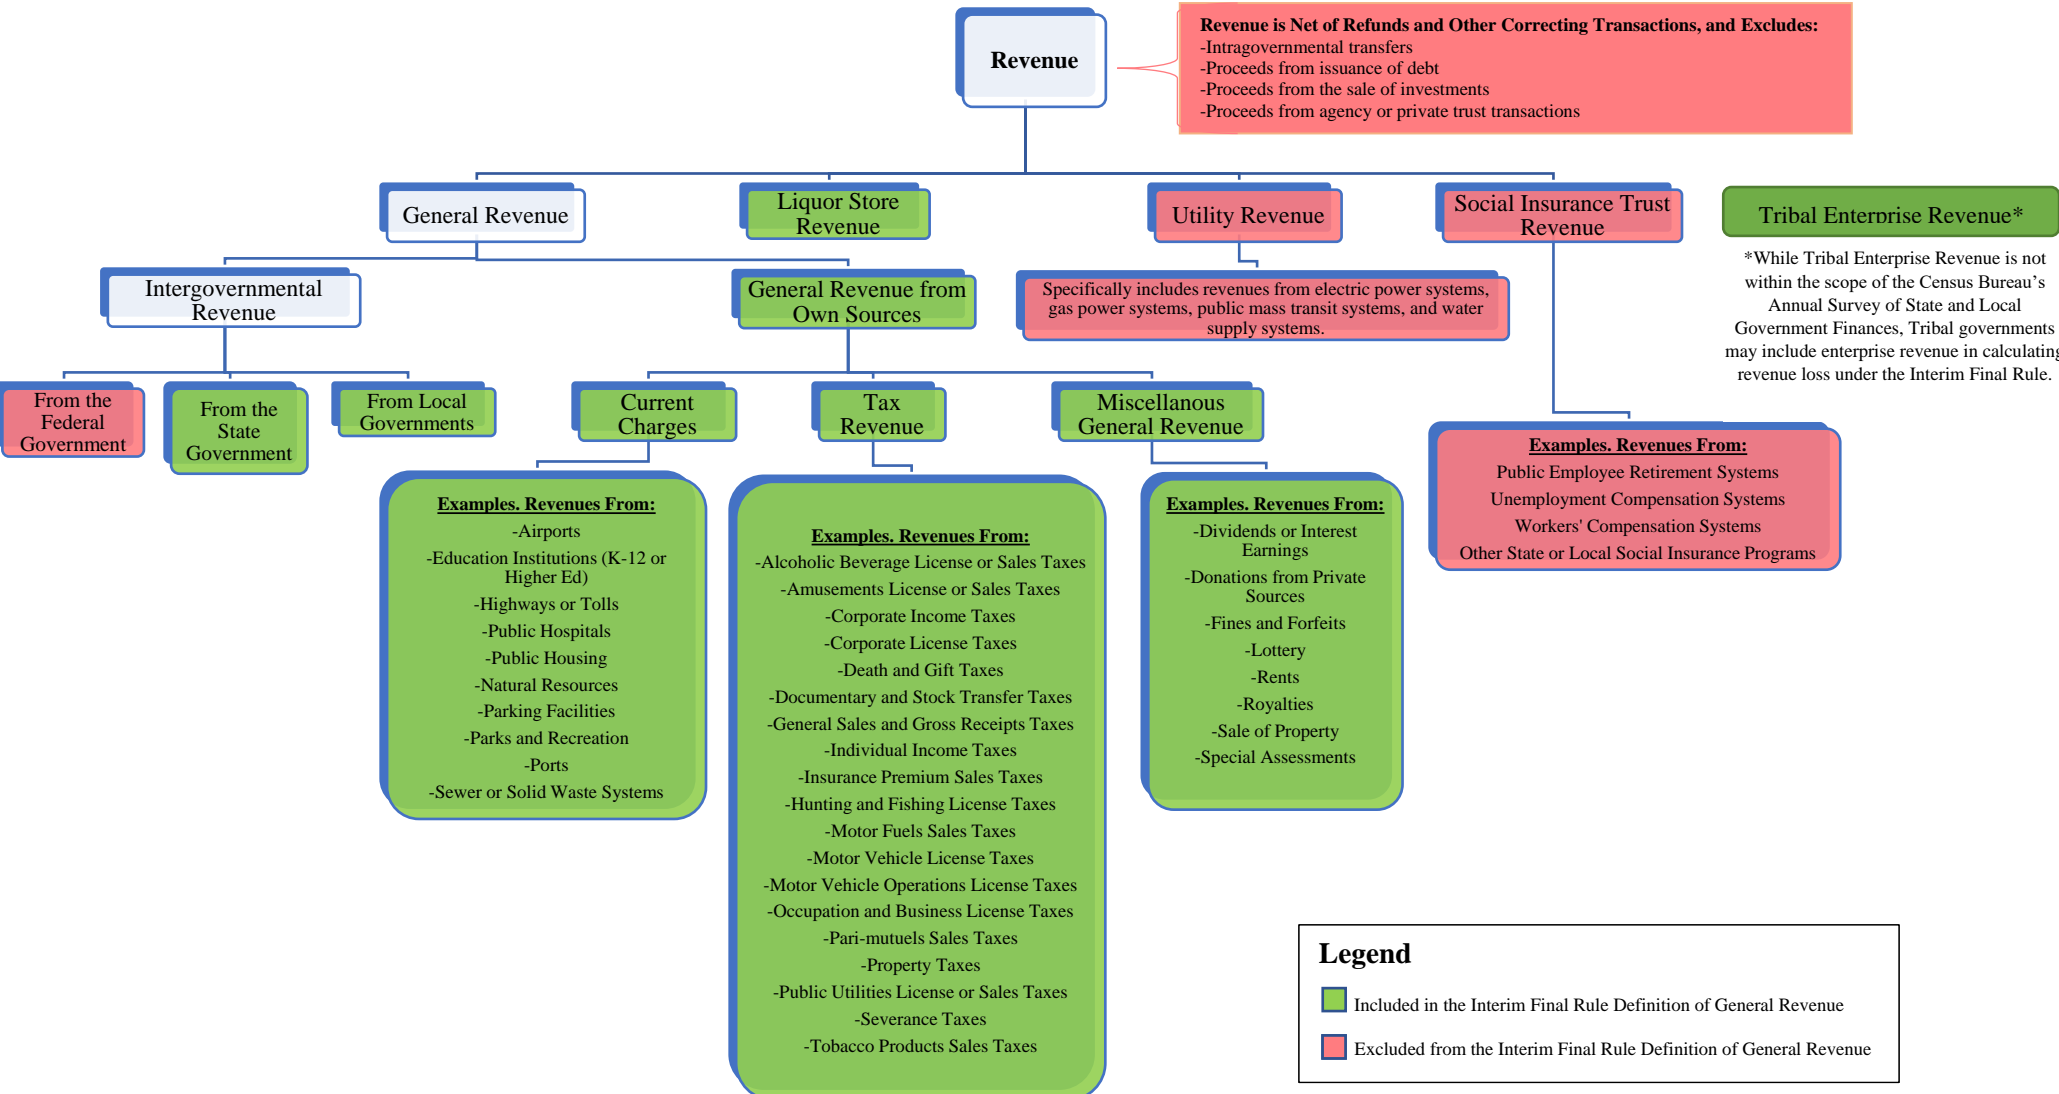

11.12. When will entities get their money?

Before Treasury is able to execute a payment, a representative of an eligible government must submit the government's information for verification through the [Treasury Submission Portal](#). The verification process takes approximately four business days. If any errors are identified, the designated point of contact for the government will be contacted via email to correct the information before the payment can proceed. Once verification is complete, the designated point of contact of the eligible government will receive an email notifying them that their submission has been verified. Payments are generally scheduled for the next business day after this verification email, though funds may not be available immediately due to processing time of their financial institution.

11.13. How does a local government entity provide Treasury with a notice of transfer of funds to its State?

For more information on how to provide Treasury with notice of transfer to a state, please email SLRedirectFunds@treasury.gov.

Appendix: Interim Final Rule Definition of General Revenue Within the Census Bureau Classification Structure of Revenue

Source: [U.S. Bureau of the Census Government Finance and Employment Classification Manual, 2006](#); [Annual Survey of State and Local Government Finances](#)

I would like to start by thanking the mayor and town council for letting me speak on behalf of the Chincoteague Vol. Fire Co. today. As most of you know I am Bobby Lappin, the Fire Chief of the Chincoteague Vol. Fire Co. We are a 501C3 nonprofit organization. We provide fire, rescue, and EMS service to our community along with providing mutual aid to our surrounding neighbors. We also provide coverage to the Chincoteague Wildlife Refuge on Assateague Island. I am here today requesting approval from the Town of Chincoteague for funds from the ARPA federal program.

I am going to talk about some recent events that has affected our fire department. For starters, due to the pandemic of Covid 19, The Chincoteague Vol. Fire Co. was forced to cancel two years of our traditional annual fireman's carnival and pony swim. This is one of our biggest fund raisers for our department. The money raised helps supply our community with the lifesaving equipment to protect our local citizens and the visitors that come to our island. The loss of revenue by not having the carnival and pony swim is approximately a half a million dollars. This is a big loss to our department. But we still have to respond to all emergencies and provide the best care and equipment to our community. With this said, we have applied for many more grants to make up the shortfall for our department. Many grants have been denied for many more request by fire and EMS departments due to the shortage of funds caused from the pandemic.

We have recently applied for multiple Virginia Office of EMS grants for an ambulance. After the third cycle we were finally awarded an 80/20 grant to

purchase a new ambulance. The final price of the new ambulance will be \$269,987.00. Unfortunately, with the rise of cost from the awarded date and the time the paperwork was submitted the price had risen. The state will be paying 64.5% of the cost and not the 80% mentioned above. Leaving a remaining balance of \$95,587.00. We are asking the town to approve a request from the newly appropriated ARPA federal funds to assist in paying the remainder of the balance. I would also like to cover some added expenditures that we have accrued this year for the EMS side of the department. We recently had to purchase two new Life pack 15 AEDs with price of \$40,000. A lot of equipment for fire and EMS has a shelf life. The prior life pack AEDs had come to the end of their shelf life and Visio Controls, the manufacturer, could not perform anymore maintenance our upgrades to the defibrillators. We also had purchased 2 new stair chairs which enable our EMS personnel to remove patients from residents such as town houses which have limited area for stretchers. The price of the stair chairs was \$12,000. On average we also spend approximately \$21,000 a year to restock the ambulances with advanced and basic life support equipment that we are not able to restock from the hospital.

The second item that we are requesting funds for is a new Self-Contained Breathing Apparatus compressor. We recently had applied for an AFG federal grant for new SCBA packs and compressor which was denied at a cost of \$250,000. If everyone does not know what an SCBA pack is, it is the pack a firefighter uses when entering a burning structure or hazardous environment. This gives the firefighter safe air to breathe. Without the air to breathe a firefighter cannot advance into a burning structure and possibly save another life and risk more harm to more structures or property. So, this is a very important

tool to the fire service. In the past year we have had to start transitioning our air packs to a high-pressure system to meet NFPA standards with an approximate cost of \$30,000. Our current air compressor is not able to fill the upgraded packs because we have a compressor that will only fill low-pressure bottles. Currently, we have to rely on our neighboring companies to fill the void until we have the funds to purchase the compressor. We are requesting funds for a new SCBA compressor in the amount of \$53,750. Our department had planned on purchasing the compressor earlier this year but had to prioritize another critical purchase. Recently the fire department had to purchase a new set of Hurst Edraulic tools in the amount of \$43,000. This was due to the recent amount of motor vehicle accidents on the causeway leading to the island. The department was worried about the trajectory of a vehicle and its location if involved in an accident. The current hydraulic tools that we had before the purchase, has a motor with hoses which limits your length to reach the vehicle involved and the number of tools used at one time. Another problem was the capabilities around the water. The new Edraulic tools are battery operated, waterproof, and had the capabilities of using all the tools at the same time. So, if we had a vehicle involved in an accident that happened to be in one of the waterways along the causeway, we would be able to extricate the patient and perform the rescue needed. Also, in the last year we have expended approximately \$50,000 to \$60,000 in just vehicle maintenance. This is a necessity that is always there, and you never know when you are going to have a breakdown and there is always annual maintenance that is required. And I cannot forget to add that 2 years ago we moved into a new fire station. We still have a payment to pay despite the loss of a half of a million dollars.

In closing the Chincoteague Vol. Fire Co. is asking the Mayor and Town Council to approve the request for funds from the ARPA federal program. We are not asking for a lot just the two items listed. Which would be the remaining balance of the new ambulance at \$95,587 and the SCBA compressor in the amount of \$53,750 for a total of \$149,337. By approving our request, this will enable the fire department to move forward in protecting the citizens of Chincoteague, its visitors, and our surrounding neighbors. Again, thank you for your time and letting me speak on behalf of the Chincoteague Vol. Fire Co.

Robert Lappin
Fire Chief
Chincoteague Vol. Fire Co.
757-894-3586
Lap2585@hotmail.com

Mr. Mayor, Council Members and Fellow Citizens,

My name is Scott Chesson. I am one of the owners of the Best Western Chincoteague Island and have been a resident of Chincoteague Island for the past 30 years.

I am here to share my thoughts about the lethargic action by the Town of Chincoteague to address the demonstrated need for a Central Wastewater Treatment Plan. Allow me to recall a little bit of history.

Along about 2011__, I was asked by the Mayor of Chincoteague, the Honorable Jack Tarr, to serve on the Towns newly established Wastewater Advisory Committee. The other members of the Committee consisted of:

Spiro Papadopoulos, Chairman

Mike Tolbert, Vice Chairman

Tommy Clark

Kelly Conklin

Jack Tarr, Mayor

The Committee goals were:

1. To complete a 2-year study / workplan by June 2013
2. Review the Preliminary Engineering Report for a Phase 1 Sanitary Sewer system dated March 2011, along with other studies or alternatives and to present recommendations for action to the Town Council.
3. Review and make recommendations on alternatives for wastewater treatment and disposal, a collection system and force main routing.
4. Provide ideas and suggestions to the Town Council on areas to be provided with wastewater Sewer service.
5. Provide suggestions for acquisition of new properties for possible treatment plant or pump station sight.
6. Serve as a liaison to the public and Town Council.

Through the course of the next 2 years and under the exceptional leadership of the Chairman, Mr. Papadopoulos, the Committee spent countless hours meeting

together, visiting other wastewater treatment facilities, and meeting with professional Engineers in the field of wastewater management.

~~This is the~~ Preliminary Engineering Report Sanitary Sewer System Phase 1 Chincoteague Virginia prepared by the Clark - Nexsen Architecture and Engineering firm, dated March 2011.

The following are excerpts contained in this document.

“ In 1976, a Sewage Treatment plan was prepared for the Town of Chincoteague by Shore Engineering Co., Inc. The purpose of that study was to investigate and document alternatives to conventional wastewater collection and treatment methods. At the time of the study, many of the Islands individual lot wastewater disposal systems were experiencing problems or completely failed. The study recommended that the sewage be collected and pumped to a renovated sewage plant at the NASA Wallops Flight Facility on the mainland”.

I've heard rumors that the federal government would have paid for 95% of the cost the project and the Town leaders said “NO THANK YOU”!

That was 45 years ago!

In another study titled **Proposed Sewer System Preliminary Engineering Study for the Town of Chincoteague** dated April 1998 and Prepared by the engineering firm Bradbury and Denning had this to say about septic solutions:

“Since the Town relies on individual septic systems and private wastewater plants to treat the existing wastewater on the Island, the Town has identified the need for a central sewer system for ecological and health reasons. The 1998 Sewer study and the Va. Dept of Health shellfish condemnation documents have identified, due to high groundwater tables and saturated soils many drain fields are ineffective making septic tanks into holding tanks where many of the residents rely on pumping and hauling the sewage off the Island for a fee or are leaching into the surrounding water causing a potential pollution issue for shellfish beds and fishing. The Va Dept of Health has recognized the possible threat of untreated waste contamination to the surrounding waters and has condemned shellfish harvesting in several areas adjacent to the Island”.

In the wastewater Management Plan for Chincoteague Island prepared by the Wastewater Advisory Committee it points out that Infrastructure improvements such as streets, drinking water and parks that support the lives and businesses of Town residents are one of the basic functions of Town government. A Phase 1 public wastewater utility service area has been proposed as an important idea to promote Chincoteague's main economic development engine – Tourism

“The adoption of a Wastewater Management Plan with recommended actions by Town Council, would be proactive and smart “protection” from future EPA enforcement action and would support the preparation of grant request. Research completed by the Wastewater Advisory Committee forms the basis for a wastewater management plan with a deliberate approach to improve wastewater treatment options for the Town of Chincoteague”. After countless hours put into this project by intelligent, forward looking professionals, and the expenditure of thousands of taxpayer money, the adoption of the Wastewater Advisory Committee recommendations by the Town Council has never happened. We've been waiting 8 years for Council to do SOMETHING.... Things are happening despite the inaction by our Town Council.

The Hampton Rhodes Sanitary District (HRSD) was established by the Virginia State Legislature to operate and maintain the wastewater treatment facilities in Hampton Rhodes. The Authorities service area includes Norfolk, Suffolk, Portsmouth, Chesapeake, Va Beach and surrounding areas serving millions of customers. Their service area extends up the western side of the Chesapeake Bay past the Town of Gloucester.

The HRSD petitioned the Circuit Court to include Northampton and Accomack Counties as part of their service area because of other failing septic systems on the Eastern Shore. Their request was granted in October of 2020. Chincoteague Island is now part of the service area of the HRSD. This presents new opportunities for the Town of Chincoteague.

I believe a large portion of this “free” money the Town has received should be earmarked for the development of a relationship with the Hampton Rhodes Sanitation District. A new Wastewater Advisory Committee should be established to help the Town move forward with the provision of a safe and affordable central wastewater disposal system for our Town. The sewage issue for the Island

has been studied, researched, and discussed over and over for years. It has cost the Town a large sum of money too. It's been way too long since the former Wastewater Advisory Committee made their recommendations to the Town Council with nothing being done to address this demonstrated need we have on this Island. It's time to get moving again. Sounds like the Federal Government is going to be handing out millions of dollars for infrastructure work and we need to get in line!

Who knows, the next Covid virus, and I believe there will be another, could be designed to be highly contagious, deadly, and easily transmitted by human waste. Did you ever think a virus could do the damage to our country and our economy that it has? Terrorists everywhere have taken notice! As it stands now, whenever we get 2 to 3 inches of rain we'd all be afraid to go outside! Think about it! I would bet, when we get that kind of rain, half the septic systems on this Island are not working and those contaminates are right on top of the ground. This Town deserves better.

Thank you for the opportunity to speak out about this vital utility and the need for it on our Island.

It's time to move forward.

Public Comments on use of ARPA Funds July 15, 2021

Thanks to our Town Manager Mr. Tolbert for recommending this public hearing and to Councilwoman Bowden and Councilman McComb for urging residents to share their ideas.

\$2.9M is a lot of money for our small town, and it can disappear quickly with many small projects without great impact on the quality of life on Chincoteague. I urge Council members to think boldly and into the future when they decide how this money should be spent.

There are some small projects that deserve consideration, entities not eligible for previous Covid related funds. First, the Town itself should reimburse itself for lost revenue, as small as it might have been. Take it. If that can include the Chincoteague Center in some way, include that too. They have been without revenue for months. Also many of the non-profits have had significantly reduced revenue in the past year: Manna Café without their lunches, CIAO with the theater closed, CCA without the Farmer's Market and still without the Artful Flea, the Museum without their Road Scholar program, and of course, the Chincoteague Volunteer Fire Department without the Carnival for 2 years. These and other Island non-profits not only attract visitors, they also positively improve the quality of life for those of us who live here.

There are only 3 qualifying projects that don't have to be related to Covid: Broadband, Water, and Sewage. We have pretty good internet service although expensive, our water is safe and plentiful, but our sewage continues to be an expensive private dump of waste into the ground, for most businesses and all residences. This is the proverbial can that has been kicked down the road since I first came here 35 years ago, and the ARPA funds should be used to start the process. It is an inevitable expense that will be forced upon us by health requirements, or we can plan for the future and use this windfall to start the process of developing Central Sewage. In some ways, we have already reached capacity. I had a fancy, expensive system installed 10 years ago at my home, but within 4 years of installing it, the well-known company told me they couldn't provide the Health Department required semi-annual servicing, nor could anyone else.

This is what the the Council has approved in the 2020 Comprehensive Plan regarding waste water:

Continue studying the feasibility of developing public or private sewer collection and treatment facilities. Identify a potential Maddox Boulevard Corridor wastewater treatment service area and encourage the next phase of engineering studies, permit applications, and grant requests to determine its feasibility for operation as a publicly or privately owned wastewater treatment facility similar to the private Sunset Bay Utilities facility.

The Town cannot continue to kick this can down the road. I know the fear is that central sewage will cause overdevelopment. No, bad zoning laws that are not enforced and approval by Commissions and Council for projects that exceed the limits of our environment, physically and esthetically are what cause overdevelopment. We have the zoning laws, and we have the

enforcement. It's time to let go of this false roadblock and use this ARPA money for Central Sewage.

One more thing. This may not qualify for ARPA funds, but it is time to find the money to recreate the position of Town Planner and hire a trained planner to work on projects like central sewage, overdevelopment (I see almost every vacant lot in town is for sale), and just how many tourists and new residents can we accommodate and how. For those who don't know, the position of Town Planner was eliminated from the budget about 4 years ago in a closed session because it also involved personnel decisions. We are no longer a little simple town where everything is taken care of as it has been in the past. Our population, both part and full-time is growing, our tourists are here not just in July and August, adding to a much larger population than any census will show. It is, as everyone who works for the Town and participates in Government knows, a sophisticated resort municipality with many moving parts. I think highly of the government we have, but it is very busy dealing with immediate and short term issues and projects. It is time to hire a Planner who can look to the future and prepare us for what is coming, and also, find the funds to do future projects. And who can study and answer the questions like the one last week brought to Council by a resident, a question about zoning that no one seems to be able to answer.

Thank you

Patricia Farley
3243 Lisa's Lane
Chincoteague

CHINCOTEAGUE CHAMBER OF COMMERCE & CERTIFIED VISITOR CENTER

Town of Chincoteague Public Hearing on ARPA Funding
July 15, 2021

Request for Public Restrooms on Maddox Boulevard

- ❖ In 2019 the chamber documented approximately 30% of visitors to the office requested restrooms and are frustrated that we do not have one for public use.
- ❖ It is 3 miles from the Public Restrooms on Main Street to Herbert H. Bateman Educational Center restrooms on CNWR which has been closed until recently for COVID-19. Nearest Romtech is at Wildlife Loop. For people walking or biking from other streets, they may not see or even know about the restrooms on Main Street.
- ❖ More people are biking and walking with the addition of the John H. Tarr Bay to Beach Trail and map.
- ❖ Visitation continues to increase as verified by increased Meals Tax and TOT revenues.
- ❖ Retail shops and gas stations do not offer public restrooms.
- ❖ McDonald's has been closed since early 2020. Chamber had permission to offer that location in the past.
- ❖ Health & Public Safety guidelines for frequent handwashing is another added need and concern for many visitors.
- ❖ With close to 10,000 visitors frequenting the chamber office yearly, our proximity to the bike trail, bike repair station, and our midway location between other restrooms, the Chincoteague Chamber of Commerce property would be an ideal location for public restrooms on Maddox Boulevard.

ARPA PROJECT REQUEST

PROJECT: PURCHASE REPLACEMENT BACKHOE

\$110,000

PROJECT OVERVIEW JUSTIFICATION

Backhoes are critical to Public Works Operations. They are used for waterworks distribution repairs/installation, road repairs, stormwater drainage maintenance and bulk trash pickup. The Town currently owns two backhoes. A 2004 Case 580M and a 2002 Cat 420D. Both machines are currently in service however both show significant wear most notably in the hydraulic control systems. Excessive play in these systems makes precise control extremely difficult thus affecting safety. This project would not easily qualify for ARPA funds based on the basic criteria however funds recovered as lost income could be used.

Project Scope

- Purchase a new Caterpillar 420 Backhoe, or equivalent, with attachments. Estimated cost is \$110,000.

Specific Exclusions from Scope

- N/A

Affected Parties

Public Works operations in its entirety.

Schedule

Based on machine availability

APPROVAL AND AUTHORITY TO PROCEED

The expenditure of ARPA funds is authorized for this project

ARPA PROJECT REQUEST

PROJECT: FILTER BACKWASH PIT REHAB

\$25,000

PROJECT OVERVIEW JUSTIFICATION

The iron removal plant at the Willow Street waterworks houses two low pressure filter units, a backwash controller, flow meters, gauges, rate-of-flow controllers, piping and valving. Filter construction includes multi-media filter materials (sand covered with a layer of anthracite coal), underdrains, backwash piping and rate-of-flow controllers. The multi-media material in the low pressure filters is particularly effective in the removal of metals such as iron, manganese and arsenic that are oxidized by chlorine in the raw water pre-treatment and transmission process. Inlet and discharge gauges indicate any head loss through the filters that will ultimately determine when the filters are to be cleaned. The filters are backwashed (with water from the adjacent elevated storage tank through an 8" pipe with low gravity-flow rates controlled by a pressure reducing flow control valve. The frequency of backwashing the filters varies from once per week during the period of Labor Day to Memorial Day (off season) and twice per week between Memorial Day and Labor Day (summer season). The backwash water is discharged to a concrete storage basin for the settling of suspended solids prior to release. The floor of the basin has failed in multiple locations allowing ground water infiltration. This project is maintenance of drinking water infrastructure and would therefore qualify for ARPA funding.

Project Scope

Reconstruct the concrete floor of the Willow Street filter backwash pit. Estimated cost is \$25,000.

Specific Exclusions from Scope

N/A

Affected Parties

Chincoteague Waterworks Customers

Schedule

Seasonally driven based on backwash frequency and ambient temperatures

ARPA PROJECT REQUEST

PROJECT: INSTALL POURED SAFETY SURFACE AT BRIANNA'S KINDNESS PARK PLAYGROUND

\$35,000

PROJECT OVERVIEW JUSTIFICATION

The installed safety surface at Brianna's Kindness Park playground is a wood fiber mat. This material, although highly effective, limits accessibility to individuals with limited mobility. Poured rubber playground flooring is ADA-compliant, meaning it's wheelchair accessible and safe for those with physical disabilities. Childcare experts agree that youngsters with special needs (and their non-disabled peers!) greatly benefit from inclusive playgrounds and pour-in-place rubber is widely viewed as the best surfacing option to allow safe and easy play among those with physical limitations. This project increases use of an outdoor facility providing outdoor recreation and could possibly be considered as mitigation of COVID 19.

Project Scope

Install poured in place rubber surface at the primary entrance paths. Estimated cost is \$35,000. Note – materials required for this project are currently unavailable. A significant cost escalation is anticipated.

Specific Exclusions from Scope

ARPA PROJECT REQUEST

PROJECT: BRIANNA'S KINDNESS PARK CONSTRUCTION REIMBURSEMENT

PROJECT OVERVIEW JUSTIFICATION

As of August 24th, the Town has invested \$468,062 in the construction of Brianna's Kindness Park. These funds were allocated from the General Fund, specifically Public Works Capital Improvements. Significant work completed to date includes engineering, sitework to include the stormwater management system and soccer field construction, parking lot construction/pavement, pavilion purchase and playground construction to include drainage base preparation, equipment purchase/installation, mulch placement, fence installation. Estimated cost to complete is \$52,560, \$46,950 of which is for construction of the restrooms. Parts of this project could be considered as providing increased outdoor recreation and may qualify for ARPA funding.

Project Scope

. Allocate ARPA funding to pay project costs in lieu of Public Works Capital Improvement Funds.

Specific Exclusions from Scope

N/A

Affected Parties

Town of Chincoteague tax payers, Brianna's Kindness Park guests.

ARPA PROJECT REQUEST

PROJECT: CONSTRUCT DESALINATION TEST WELL

\$150,000

PROJECT OVERVIEW JUSTIFICATION

■ The Town’s raw water supply wells are located adjacent to SR 175 immediately west of the causeway. The wells are located on property owned by NASA. NASA desires to have our wells removed from their property. One approach to accomplishing well relocation is to utilize water from the deep aquifer under Chincoteague Island. This approach would also eliminate the need for a potable water pipeline connecting the Island with the Mainland wells.

Desalinization is not economically feasible if the chloride content is above given limits. The chloride content, and quantity of the deep-water aquifer is currently unknow. The only method to determine these levels, and therefore the feasibility of providing the Island’s potable water demands utilizing desalinization, is by the installation of a test well. This project would be considered drinking water infrastructure and would qualify for ARPA funding.

Project Scope

■ Install a test well to a depth of 1,500 to 1,800 feet. Estimated cost is \$150,000.

Specific Exclusions from Scope

■ N/A

Affected Parties

ARPA PROJECT REQUEST

PROJECT: REPAIRS TO THE DONALD J. AMRIEN ACTIVITY CENTER

\$60,000

PROJECT OVERVIEW JUSTIFICATION

■ The Donald J. Amrien Activity Center is used for recreation purposes by numerous groups. Namely: basketball, pickleball, base/softball and cheerleading. Accomack County donated the gym to the Town in 2011. Approximately \$30,000 was spent on renovations following the donation. No significant investment has been made since that time.

The restrooms are original to the facility built in the mid-1980s. The fixtures are not compliant with today's water conservation standards. A cosmetic upgrade is highly desirable.

The gym floor is covered with vinyl composite tile (VCT). The tiles routinely come up presenting a tripping hazard. The patchwork effect of replacement tiles also makes seeing lines used for play difficult.

The rain guttering has deteriorated to the point it is no longer functional. This project would have to be funded using ARPA recovered revenue due to its lack of any other qualifications.

Project Scope

■ Reconstruct restrooms to include new fixtures, stall partitions and floor/wall treatments. Estimated cost is \$15,000

Replace VCT gym flooring with a composite material. Estimated cost is \$35,000.

Guttering/siding repairs. Estimated cost is \$10,000.

ARPA PROJECT REQUEST

PROJECT: AMRIEN CENTER PARKING/OUTDOOR PICKLEBALL COURT PAVING

\$34,000

PROJECT OVERVIEW JUSTIFICATION

■ The Donald J. Amrien Activity Center is used for recreation purposes by numerous groups. Namely: basketball, pickleball, base/softball, the YMCA and cheerleading, Accomack County gave the gym to the Town in 2011.

The parking lot, constructed of asphaltic cement is original to the facility. The pavement has failed as evidenced by numerous fissures and holes. A pavement overlay is required to minimize additional deterioration.

The outdoor pickleball courts are immediately adjacent to the center. The play surface is uneven as the courts were not all paved at the same time. The configuration of the perimeter fence is such that the court area is thirteen feet wider on the south than the north. This difference limits the number of courts to two. Realignment of the fence will enable the construction of four courts. This project provides maintenance of outdoor recreation thus qualifying for ARPA funds.

Project Scope

■ Remove existing fence on the west side of the pickleball courts.

Overlay courts and parking lot with 1.5" of SM-9.5A asphaltic concrete. All paving operations will comply with the current version of the VDOT Road and Bridge Standards.

Replace fence.

Estimated cost is \$34,000. Note: the cost of pickleball court striping is included in the tennis court resurfacing project.

Specific Exclusions from Scope

N/A

Affected Parties

Center users.

Schedule

ARPA PROJECT REQUEST

PROJECT: PAINT GROUND WATER STORAGE TANK

\$39,080

PROJECT OVERVIEW JUSTIFICATION

- Although \$80,000 was budgeted to paint the Ground Water Storage tank in FY21, the project was postponed due to the uncertainty surrounding the COVID 19 pandemic. Near the end of FY21, a very attractive quote was received from the elevated tank contractor that was less than half the budgeted value. The project was accomplished by the end of May 2021 and the funds have been dispersed. This project qualifies for ARPA funding because it is maintenance of water infrastructure and it was accomplished after the March 3, 2021 acceptance date. This project provides maintenance on existing drinking water infrastructure.

Project Scope

- Prep, prime and paint the ground water storage tank at the water plant to match the elevated tank

Specific Exclusions from Scope

- N/A

Affected Parties

- Town of Chincoteague Water Customers and Taxpayers

Schedule

- This work was completed after the March 3, 2021 inclusion date and prior to May 31, 2021.

ARPA PROJECT REQUEST

PROJECT: REPLACE LIFT PUMPS ADDING VFD CONTROLLERS

\$30,000

PROJECT OVERVIEW JUSTIFICATION

Grid pressurization is achieved primarily by utilizing four centrifugal pumps to lift water from the ground water storage tank to the high rise tank. A variable frequency drive (VFD) was installed on one pump to maintain grid pressure when the high rise tank was taken offline for maintenance. This pump, rated at 25 hp is relatively new and does not require replacement. The remaining lift pumps consume the vast majority of energy used at the Willow Street location. Electric billing varies based on consumption. Total cost for August of 2021 was \$1,909.96. Energy consumption could be greatly reduced by installing new pumps with VFDs., Please see attached documentation for a complete economic analysis. This project provides additional drinking water infrastructure efficiencies.

Project Scope

Replace three lift pump with high efficiency pumps and motors rated for VFD Operation. Install three VFD controllers. Estimated cost is \$30,000.

Specific Exclusions from Scope

N/A

Affected Parties

- Chincoteague Waterworks Customers

ARPA PROJECT REQUEST

PROJECT: PARKS VIDEO SYSTEM

\$13,600

PROJECT OVERVIEW JUSTIFICATION

Chincoteague's parks are located across the Island making constant patrol impractical. Budgetary constraints make the use of attendants unfeasible. Remote video surveillance is the most efficient way of overcoming these barriers to providing security at our parks. Video surveillance is highly effective in providing evidence for crime investigations but more importantly as a crime deterrent. Web enabled camera systems at the parks will permit CPD dispatcher's to continuously monitor the parks. This project may have to be funded with recovered revenue.

Project Scope

Install five (5) each web enabled video surveillance cameras at Robert Reed Park, Veteran's Memorial Park and Brianna's Kindness Park. Estimated costs are:

Veteran's Memorial Park - \$5,300;

Brianna's Kindness Park - \$4,300;

Robert Reed Park - \$4,000;
Total \$13,600.
Enable 24/7 remote monitoring by CPD dispatch.

ARPA PROJECT REQUEST

PROJECT: WATERWORKS FILTER PLANT MEDIA REPLACEMENT

PROJECT OVERVIEW JUSTIFICATION

The filter plant building houses two low pressure filter units, a backwash controller, flow meters, gauges, rate-of-flow controllers, piping and valving. Filter construction includes multi-media filter materials (sand covered with a layer of anthracite coal), underdrains, backwash piping and rate-of-flow controllers. The multi-media material in the low-pressure filters is particularly effective in the removal of metals such as iron, manganese and arsenic that are oxidized by chlorine in the raw water pre-treatment and transmission process.

- Media breaks down over time, finer particles migrate to top during backwash
- Replace:
 - Lost media
 - Excessively broken-down media

The filter sand/anthracite media has not been changed for approximately twenty years. Backwash frequency is increasing however filter back pressures remain elevated. This project qualifies for ARPA funding due to its maintenance of drinking water infrastructure.

Project Scope

- *Backwash filter and take out of service*
 - *Skim fines off top and dispose*
 - *Add media in "lifts"*
 - *Backwash with water to level out media and wash out fines*

- *Skim fines again and dispose*
- *Backwash with air scour then water*
- *Fill filter with water, add hypochlorite to disinfect, give contact time*
- *Drain filter to 1-ft above media, then air scour to agitate media*
- *Backwash*
- *Put filter into normal operation*

ARPA PROJECT REQUEST

PROJECT: TENNIS AND BASKETBALL COURTS RESURFACING MP.

\$62,000

PROJECT OVERVIEW JUSTIFICATION

- The court surface is demonstrating extensive cracking and the existing applied playing surface is beginning to wear away. The courts are used daily by the tennis association and tourists. Resurfacing of the courts will eliminate the existing safety issues and prolong the court's viability as well as add to the overall appearance and player experience. This project will counter the effects of COVID 19 by providing an outdoor activity which allows assembly and association of individuals while lowering the threat of spreading or contracting the virus.

Project Scope

- Pressure wash courts, clean, fill and repair cracks, apply crack repair membrane system, apply acrylic resurfacer, apply 2 coats of acrylic color, layout and apply new playing lines to 3 tennis Courts and existing basketball courts. Furnish and install 3 sets of tournament net posts with internal wind systems and 3 nets with center straps.

Specific Exclusions from Scope

- N/A

Affected Parties

■ Chincoteague Tennis Association, Memorial Park visitors and all Chincoteague Island residents.

Schedule

■ The nature of this work requires moderate temperatures and would be planned for the first spring following approval by the committee.

ARPA PROJECT REQUEST

PROJECT: VETERAN'S MEMORIAL PARK KAYAK LAUNCH

\$30,000

PROJECT OVERVIEW JUSTIFICATION

■ Kayaking has become an ever increasingly sport on Chincoteague. There are several businesses that specialize in kayak rentals/tours. The increased launch/retrieval of kayaks at Town boat ramps created excessive congestion at the ramps interfering with the launch/retrieval of other vessels. A dedicated kayak launch was constructed in Veteran's Memorial Park in response to mitigate this congestion. This kayak ramp failed due to undermining. A floating kayak launch was ordered from Ravens Marine to replace the failed ramp. This project mitigates the effects of COVID 19 by providing outdoor recreational activities.

Project Scope

■ Purchase a floating kayak launch and associated gangway from Ravens Marine.

Engage the services of Fisher Marine Construction to install the launch adjacent to the northernmost fishing pier gazebo at Veteran's Memorial Park.

Total estimated cost is \$30,000.

Specific Exclusions from Scope

■ N/A

Affected Parties

- Residents and visitors to the Island

Schedule

- Spring of 2022

ARPA PROJECT REQUEST

PROJECT: VETERANS'S MEMORIAL PARK PAVING

\$75,000

PROJECT OVERVIEW JUSTIFICATION

- The asphaltic concrete on the section of the Veteran's Memorial Park parking lot, from a point just east of the outfield parking lot to the end, has deteriorated to the point it requires an overlay. This portion of the lot is used extensively by fishing pier and boat ramp users. Failure is evidenced by numerous fissures and pavement "alligatoring". An overlay will prevent further degradation. This project mitigates the effects of COVID 19 by providing maintenance to an existing park and thus outdoor recreation for citizens.

Project Scope

- Overlay the damaged portion of the parking lot with 1.5 inches of SM-12.5D asphaltic concrete. All paving operations will comply with the current version of the VDOT Road and Bridge Standards.

Estimated cost is \$75,000.

Specific Exclusions from Scope

- N/A

Affected Parties

- Veteran's Memorial Park guests.

Schedule

- Based on materials availability.

ARPA PROJECT REQUEST

PROJECT: MEMORIAL PARK PLAYGROUND EQUIPMENT

\$15,000

PROJECT OVERVIEW JUSTIFICATION

- The wooden pirate ship has been removed from Veteran’s Memorial Park as it had become unsafe. The removal has left a void in the playground. In order to maintain capacity of the playground a replacement piece of equipment must be purchased. This project qualifies for ARPA funding because it provides maintenance to existing outdoor recreation.

Project Scope

- Purchase and install an ASTM – F1487 compliant piece of playground equipment .
Estimated material cost is \$15,000. Installation to be performed by Public Works.

Specific Exclusions from Scope

- N/A

Affected Parties

- Playground users.

Schedule

■ Based on materials availability.

APPROVAL AND AUTHORITY TO PROCEED

The expenditure of ARPA funds is authorized for this project

ARPA PROJECT REQUEST

PROJECT: MEMORIAL PARK SMALL ROOF REPLACEMENT

\$10,000

PROJECT OVERVIEW JUSTIFICATION

- There are six accessory structures in Veteran's Memorial Park; two baseball field dugouts, two small picnic pavilions and two dock gazebos. The existing roofs were constructed with asphalt shingles. All six roofs have deteriorated to the point structural damage is occurring. This project consists of materials purchase only. Labor will be provided by the Public Works Department. This project provides maintenance to outdoor recreation facility.

Project Scope

- Strip existing shingles and replace with ribbed metal roofing panels.
Estimated cost is \$10,000.

Specific Exclusions from Scope

- N/A

Affected Parties

- Center users.

Schedule

■ Based on materials availability.

APPROVAL AND AUTHORITY TO PROCEED

ARPA PROJECT REQUEST

PROJECT: REPLACE WATER MAINS

\$112,000

PROJECT OVERVIEW JUSTIFICATION

A portion of the Island’s water distribution mains are both undersized and constructed of obsolete materials. Replacement of these mains, as determined by the Waterworks Master Plan, would both improve water flow and remove the obsolete materials from service. This project is classified as drinking water infrastructure and therefore qualifies for ARPA funds.

Project Scope

- Replace selected water mains based on findings of the Waterworks Master Plan update. Project would include the installation of properly sized C-900 mains and ancillary equipment to include pavement repairs/replacement Project cost determined by allocated funding. Work to be performed utilizing a contract vehicle. All work to be performed in accordance with AWWA and VDOT standards.

Preliminary phase of this project would be the replacement of the Cropper Street main, water services and storm drainage. Estimated cost of this work is \$112,000 given the work is performed in house. Sidewalks would be replaced at the same time utilizing VDOT Urban Maintenance funding.

Specific Exclusions from Scope

N/A

Affected Parties

Chincoteague Waterworks Customers

Schedule

Based on contract development, procurement and award. Also driven by materials availability. Planned for Spring of 2022.

ARPA PROJECT REQUEST

PROJECT: UPDATE WATER WORKS MASTER PLAN

\$15,000

PROJECT OVERVIEW JUSTIFICATION

- Whitman Requardt & Associates has been the Town's Water Engineer for a number of years. Periodically, Whitman Requardt updates the Town water works master plan. This work was last accomplished in 2015 and is in need of updating again. This project qualifies for ARPA funding as water system infrastructure planning.

Project Scope

- Evaluate the system configuration and current condition and make long term recommendations as to the replacement of equipment and modification of processes to maintain the current high quality and highly reliable water system.

Specific Exclusions from Scope

- N/A

Affected Parties

- All Town of Chincoteague water works customers

Schedule

■ The work is already proceeding with an expected completion of October 2021.

APPROVAL AND AUTHORITY TO PROCEED

The expenditure of ARPA funds is authorized for this project

ARPA PROJECT REQUEST

PROJECT: REPLACE WELL SUBMERSIBLE PUMPS ADDING VFD CONTROLLERS

PROJECT OVERVIEW JUSTIFICATION

Chincoteague waterworks is currently operating four deep and three shallow wells. One of the deep wells (Well 6) has recently been retrofitted with an inverter rated pump motor and a VFD controller. This work was done to allow variable flow rates. The pump was also replaced. Two of the remaining three deep wells (Wells 4 and 8) have fixed flow rates. Well 5, which is used infrequently utilizes a turbine pump. Replacement of the motors/pumps in Wells 4 and 8 with inverter rated motors and VFD controllers will greatly enhance the system operator's ability to accommodate seasonally fluctuating demands. This configuration change will also result in significant energy cost savings.

Project Scope

Replace two well submersible pumps with inverter rated motors adding VFD controllers. New pumps also to be installed. This projects qualifies for ARPA funds as drinking water infrastructure.

Specific Exclusions from Scope

N/A

Affected Parties

- Chincoteague Waterworks Customers

Schedule

- Seasonally driven based on consumption.

APPROVAL AND AUTHORITY TO PROCEED

The expenditure of ARPA funds is authorized for this project
