CITY OF COOPER CITY
CITY COMMISSION REGULAR MEETING

Tuesday, March 12, 2024 at 6:30 PM
City Hall Auditorium | 9090 SW 50th Place

AGENDA

PLEDGE OF ALLEGIANCE

ROLL CALL

DECORUM - Jacob Horowitz, City Attorney

CHANGES TO AGENDA/EMERGENCY MATTERS

PROCLAMATIONS/PRESENTATIONS

1. Proclamation - Irish American Heritage Month - **Mayor Ross**
2. Proclamations - Recognition of Service - **Commissioner Katzman**
3. Recognition of COPs Andrew Gross and John Simpson – **Commissioner Mallozzi**
4. Pet Adoption - **Commissioner Mallozzi**
5. Cooper City City-Wide Traffic Study along Fifty-One (51) Corridor Segments Final Presentation - **The Corradino Group, Inc.**
6. Strategic Plan to Address the Water Meter Challenges

PUBLIC SPEAKING

Open Public Meeting/Agenda Concerns - *Any individual may speak for a time period of up to three (3) minutes' duration regarding any matters which are pertinent to the City, including any item listed on the meeting agenda. If a person desires to speak on an item that is designated for a public hearing, their comments should be held until the public hearing.*

BOARD/ADMINISTRATIVE REPORTS

7. Budget to actuals / City Financial Report - **Finance**

CONSENT AGENDA

Minutes

8. February 13, 2024 Regular Commission Meeting Minutes

Motion to Approve

9. Motion to approve a Municipality Candidate Financial Reporting Software Sublicense Agreement. – **Clerk's Office**
10. Motion to Approve a First Amendment to the Design, Construction and Maintenance of Bus Stop Improvements Agreement - Broward County - **Public Works**

11. Motion to approve and authorize a piggyback agreement from the Town of Jupiter Island agreement with Florida Technical Consultants, LLC., in the amount of $40,000 or as appropriated in the annual budget for Geographic Information System (GIS) consulting services, and run concurrently with the Town of Jupiter Island agreement, provided the agreement is extended by the Town of Jupiter Island with the terms and conditions acceptable to the City. - **Utilities**

12. Motion to approve and authorize the purchase of a 2024 Ford Explorer XLT 4X2 for the Utilities Department from Palmetto Ford of Miami using the Florida Sheriff's Association Contract #FSA23-VEL31.0: Pursuit, Administrative, and other vehicles in the amount not to exceed $41,183.00 - **Utilities**

13. Motion to Approve a Seventh Amendment to agreement with John M. Perez to administer programs funded by the American Rescue Plan Act (ARPA) of 2021 and approval of appropriation of funds. - **Administration**

14. Motion to approve Basketball, Volleyball, and Pickleball Court Lighting Quotation dated January 25, 2024, under Sourcewell Contract #041123-MSL for Sport Lighting Solutions with Related Technology, Equipment, and Services in the amount of $170,000.00 with Musco Sports Light, LLC. – **Public Works**

15. Discussion and possible action regarding temporary services for an interim Director of Public Works - **Administration**

16. Motion to approve and authorize an amendment to the Professional Services Agreement with Michael Aldrich for Wastewater Treatment Operation Supervisory Consulting Services, not exceeding $10,000. - **Utilities**

REGULAR AGENDA

17. Discussion and possible action on renaming Flamingo Park after Michael Riordan “City Mike” – **Commissioner Shrouder / Mallozzi**

18. Motion to approve the rest of the Utilities Department’s Job Descriptions – **Human Resources**

19. Motion to approve and authorize the award of Bid, No. ITB 2023-3-UTL, Nanofiltration Membrane Replacement, to the lowest, responsive, and responsible bidder, H2O Innovation USA, Inc., and to enter into an agreement in the amount not to exceed $1,099,480.00 and a separate project contingency in the amount of $109,948.00, representing 10% of the contract price. - **Utilities**

20. Motion to Award a three-year Co-Managed Information Technology Services contract to VC3, Inc. **IT/Finance**

REGULAR RESOLUTIONS

21. **Resolution No. 24-03 (Utilities Department)**

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF COOPER CITY, FLORIDA, APPROVING AND AUTHORIZING THE AMENDMENT TO THE GRANT AGREEMENT NO. LPA0155 WITH THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION FOR THE SW 49th STREET CULVERT REHABILITATION/REPLACEMENT, ATTACHED HERETO AS EXHIBIT "A" AND INCORPORATED HEREIN; PROVIDING FOR CONFLICTS; PROVIDING FOR; AND PROVIDING AN EFFECTIVE DATE.

22. **Resolution 24-04 (Administration)**

A RESOLUTION OF THE CITY OF COOPER CITY, FLORIDA, APPOINTING _____ TO SERVE AS THE CITY'S CODE ENFORCEMENT SPECIAL MAGISTRATE(S) PURSUANT TO SECTION 13-65 OF THE CITY'S CODE OF ORDINANCES; APPROVING THE TEMPLATE SPECIAL MAGISTRATE AGREEMENT ATTACHED HERETO AS EXHIBIT "A" AND AUTHORIZING THE APPROPRIATE CITY OFFICIALS TO EXECUTE SAID AGREEMENT WITH THE INDIVIDUALS APPOINTED TO SERVE AS SPECIAL MAGISTRATE PURSUANT TO THIS RESOLUTION; PROVIDING FOR CONFLICTS; PROVIDING FOR VALIDITY; AND PROVIDING FOR AN EFFECTIVE DATE. - **Administration**

23. **Resolution 24-05 (Administration)**

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF COOPER CITY, FLORIDA, AMENDING THE RATES FOR THE COLLECTION AND DISPOSAL OF SOLID WASTE IN THE CITY PURSUANT TO SECTION 8-22 OF THE CITY'S CODE OF ORDINANCES; PROVIDING FOR A DECREASE IN THE SOLID WASTE COLLECTION RATE, AS SET FORTH HEREIN; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

ORDINANCES ON FIRST READING

24. **Ordinance 24-02 (Administration)**

AN ORDINANCE OF THE CITY OF COOPER CITY, FLORIDA, AMENDING ORDINANCE NO. 2023-21, ADOPTED ON SEPTEMBER 26, 2023; PROVIDING FOR AN AMENDED BUDGET FOR FISCAL YEAR 2023-2024 FOR THE CITY, ATTACHED HERETO AS EXHIBIT "A" AND INCORPORATED HEREIN; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

ORDINANCES ON SECOND READING (Public Hearing)

25. **Ordinance 24-03 (Administration)**

AN ORDINANCE OF THE CITY OF COOPER CITY, FLORIDA, AMENDING THE CITY'S CODE OF ORDINANCES BY AMENDING CHAPTER 25, ENTITLED "DEVELOPMENT STANDARDS," AMENDING ARTICLE II ENTITLED, "SIGNS," BY SPECIFICALLY AMENDING SECTION 25-24, ENTITLED "TEMPORARY SIGNS;" ELIMINATING THE BOND REQUIREMENTS FOR TEMPORARY SIGNS; PROVIDING FOR CODIFICATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE. - **Administration**

26. **Ordinance 24-04 (Administration)**

AN ORDINANCE OF THE CITY OF COOPER CITY, FLORIDA, REPEALING ORDINANCE NO. 22-22, ADOPTED ON JUNE 14, 2022, IN ITS ENTIRETY; DELETING SECTION 2-131 OF THE CITY'S CODE OF ORDINANCES; PROVIDING FOR THE ELIMINATION OF THE MENTAL HEALTH AND WELLNESS ADVISORY BOARD; PROVIDING FOR CODIFICATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE. - **Administration**

CITY MANAGER REPORT

28. Budget Transfer Notification - PW Interim Director

CITY ATTORNEY REPORT

POLICE CHIEF'S REPORT

29. Police Chief Report

FIRE CHIEF'S REPORT

30. Fire Chief's Report

COMMISSIONERS' CONCERNS/REPORTS/ITEMS TO BE PLACED ON NEXT AGENDA

ADDITIONAL PUBLIC COMMENTS (3 MINUTES)

ADJOURNMENT

ADA NOTICE

This meeting is open to the public. In accordance with the Americans with Disabilities Act of 1990, all persons who are disabled and who need special accommodations to participate in this meeting because of that disability should contact the Office of the City Clerk, 954-434-4300 ext. 220, not later than two days prior to such proceeding. One or more members of the City of Cooper City Advisory Boards may be in attendance and may participate at the meeting. Anyone wishing to appeal any decision made by the Cooper City Commission with respect to any matter considered at such meeting or hearing will need a record of the proceedings and, for such purpose, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. Agenda items may be viewed online at www.coopercity.gov or at the Office of the City Clerk, City of Cooper City, 9090 SW 50 Place, Cooper City, Florida, 33328, 954-434-4300.

DECORUM

Members of the Commission, staff members, citizens, and others are required to use civil and appropriate language when addressing the Commission or anyone present at the meeting and must refrain from using profanity, cursing, or exhibiting aggressive or threatening behavior. All comments should generally be directed to the presiding officer and not to individual members of the Commission, staff, or the audience. No personal verbal attacks toward any individual by either the Commission, staff, citizens, or others shall be allowed during any meeting of the Commission.

Any persons making impertinent or slanderous remarks or personal attacks or who becomes boisterous while addressing the Commission or who otherwise violates the decorum rules set forth herein shall be barred from further audience before the Commission by the Mayor, or by request of any member of the Commission unless

permission to continue or again address the Commission be granted by a majority vote of the Commission members present.

Proclamation

WHEREAS, by 1776 nearly 300,000 Irish nationals had emigrated to the American colonies and played a crucial role in America's War for Independence; and

WHEREAS, the Irish first came to Spanish "*La Florida"* in the 1500s - first as missionaries and mercenary soldiers and then as planters, traders, businessmen, doctors and administrators; and

WHEREAS, Fr. Richard Arthur, an Irish-born priest from Limerick who was appointed parish priest for St. Augustine in 1597 and ecclesiastical judge of "*La Florida*," established the first public school in America and opened it to both boys and girls of all races; and

WHEREAS, Andrew Jackson, whose family came from Country Antrim, served as Flori-da's military governor following its acquisition by the United States; and

WHEREAS, Irish Americans since Americas' inception, have provided and continue to provide leadership and service to this nation's political, business and religious establishments; and

WHEREAS, it is fitting and proper to celebrate the rich culture heritage and many valuable contributions of Irish Americans.

NOW, THEREFORE, I, Greg Ross**,** Mayor of the City of Cooper City, Broward County, Florida, and the City Commission, do hereby extend greetings and best wishes to all observing March, 2024 as

"IRISH AMERICAN HERITAGE MONTH"

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Great Seal of the City of Cooper City, Broward County, Florida, to be affixed on this 12th day of March, 2024.

_____

Greg Ross, Mayor

Office of the City Commission

Proclamation

A proclamation expressing support and gratitude to members of the Israeli armed forces from Cooper City, Florida who have fought to defend Israel's right to exist.

WHEREAS, the State of Israel stands as a beacon of democracy, resilience, and unwavering commitment to peace in the Middle East; and

WHEREAS, the modern State of Israel was established in 1948 on the ancestral Jewish homeland, and has served as a refuge for the Jewish people following the heinous acts committed against Jews during the Holocaust; and

WHEREAS, beginning on October 7, 2023, approximately 2,000 Hamas terrorists from the Gaza Strip broke through the border fence and infiltrated Israel by land, sea, and air at several locations, advancing toward Israeli communities and population centers; and

WHEREAS, Hamas terrorists attacked the sovereign State of Israel, raping, torturing, and killing thousands of innocent people, including Israelis, Americans, and other nationals, among whom were babies, young children, and the elderly, while indiscriminately launching over 5,000 rockets at private homes, schools, and hospitals and taking more than 240 people hostage; and

WHEREAS, Hamas continues to hold hostages, attack Israelis, and call for the deaths of Israelis, Americans, Jews, and Christians around the world; and

WHEREAS, the United States of America, the State of Florida, and the City of Cooper City, Florida have formally recognized the right and obligation of the State of Israel to defend itself and to exist as a sovereign nation, with the full rights and privileges afforded to all nations under international law; and

WHEREAS, the City of Cooper City has a significant Jewish and Israeli population, many of whom have loved ones currently in harms' way; and

WHEREAS, residents of Cooper City, Florida, including Noam Kahana, have served in the Israeli armed forces as part of Operation Swords of Iron.

NOW, THEREFORE, I, GREG ROSS, Mayor of the City of Cooper City, Broward County, Florida, and the City Commission, do hereby recognize Noam Kahana for his courage, dedication, and sacrifices in safeguarding the sovereignty and well-being of the State of Israel.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the great Seal of the City of Cooper City, Broward County, Florida, to be affixed on this 12th day of March 2024.

GREG ROSS

Mayor, City of Cooper City

Office of the City Commission

CITY COMMISSION STAFF REPORT

DEPARTMENT: Commission

DATE: March 12, 2024

SUBJECT: Recognition of COPs Andrew Gross and John Simpson – **Commissioner Mallozzi**

RECOMMENDATION:
Commissioner Mallozzi would like to recognize COPs Andrew Gross and John Simpson for their outstanding performance and commitment to ensuring public safety.

BACKGROUND OF ITEM:
While on patrol near the Cascada Isles community, COPs Gross and Simpson encountered a domestic battery incident unfolding on the side of the roadway. In a commendable display of situational awareness, they immediately communicated the urgency of the situation through a clear and concise "code 3" request via radio dispatch. This swift and effective call for resources played a crucial role in facilitating a prompt response from additional units, showcasing their ability to manage high-pressure situations with precision.

CITY COMMISSION STAFF REPORT

DATE: March 12, 2024

DEPARTMENT: Public Works

SUBJECT: Cooper City City-Wide Traffic Study along Fifty-One (51) Corridor Segments Final Presentation - The Corradino Group, Inc.

BACKGROUND OF ITEM:
On December 12, 2023, Corradino Group presented a preliminary report to the City Commission regarding a Traffic Calming Study conducted along fifty-one (51) corridor segments within Cooper City. The study involved gathering 72-hour bi-directional speed and volume data at these locations between mid-May and mid-June 2023. Additionally, a 5-year crash review from August 1, 2018, to July 31, 2023, was conducted. Field reviews were carried out on corridors where the 85th Percentile Speeds exceeded posted speed limits, identifying seven (7) corridors of interest.

On February 19, 2024, Corradino Group submitted the final signed and sealed version of the Traffic Calming Study. Based on traffic volumes and 85th Percentile Speeds, the study identified 14 corridors of interest (as shown in Table 1) with recommendations for traffic calming improvements.

ANALYSIS:
Traffic calming measures can reduce the severity and frequency of accidents, enhancing road safety for pedestrians, cyclists, and all road users. Corradino Group identified 14 corridor segments where the 85th percentile speeds exceeded the posted speed limits, ranging from 6 to 15 miles per hour (mph). Among these segments, 2 may require further evaluation as their 85th Percentile Speeds exceed the posted limit by 10 mph. Recommendations for traffic calming improvements (listed in Table 7) are proposed for these locations, which may be implemented as temporary measures to assess their effectiveness, prior to installation of permeant traffic calming devices.

STRATEGIC PLAN:
This item supports the 2022-2027 Commission Strategic Plan, specifically advancing:

Priority 2, Proactive Public Safety - Provide proactive public safety through a commitment to professional services and innovative processes so the quality of life and well-being of residents is continually improved:

- **Objective 5:** Conduct and complete a city-wide traffic calming study to reduce traffic speeds and congestion in and around school zones.
- **Performance Measures 1:** Reduced traffic fatalities, traffic injuries, and property damage.
- **Performance Measures 2:** Traffic complaints by residents and commuters are reduced by 50%
- **Performance Measures 3:** City-wide installation of traffic calming devices in areas warranted by appropriate studies

Priority 4, Citywide Revitalization Priority - Maintain and improve the City's infrastructure and appearance to support and ensure a sustainable and beautiful environment:

- **Objective 7:** Create a mobility plan that includes streets, paths, trails, greenways, sidewalks, and street calming.

PROCUREMENT:

Corradino Group is one of the three (3) consultants selected through the City's RFQ 2020-1-UTL and approved by the City Commission on June 8, 2021, after meeting the requirements of Florida Statute (FS) 287.055, commonly known as the Consultants' Competitive Negotiation Act (CCNA). Pursuant to FS 287.055(2)(g), a consultant selected through the CCNA process, can be awarded a "continuing contract" for professional services where each individual study in an amount not to exceed $500,000 without any additional competition.

EXECUTIVE SUMMARY

The Corradino Group (Corradino) was retained by the City of Cooper City (City) to complete a citywide traffic calming study along fifty-one (51) corridor segments. The intent of the traffic calming study is to provide recommendations of traffic calming devices that will potentially improve speeding concerns and related problems identified by the City's local police department, residents and city staff. The traffic analysis and study is limited to public right-of-way roadway corridors. Each road segment location was reviewed to determine if traffic calming improvements are justified, based on eligibility criteria provided in the **Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways**, also known as **The Florida Greenbook**. It should be noted that ***Section 17-38 Public Roads / Article IV – Traffic Calming Devices*** of the City of Cooper City Code of ordinance was also reviewed and discussed with City staff as part of the preparation of this study.

Bi-directional speed and traffic volumes were collected along the 51 corridor segments provided by the City for three (3) consecutive days (Tuesday, Wednesday, and Thursday) during a regular week and typical traffic conditions. Typical traffic conditions are generally expected during normal school operations and outside of any holidays or special events.

The list of the fifty-one (51) corridor segments is as follow, and the approximate location where the traffic data was collected can be identified in **Figures 1 to 4** of the study:

1. SW 49th Street- Flamingo Road. to SW 118th Avenue
2. SW 118th Avenue- Griffin Road to SW 49th Street
3. SW 118th Avenue- SW 49th Street to SW 52nd Street
4. SW 118th Avenue- SW 52nd Street to Stirling Road
5. SW 122nd Avenue- SW 49th Street to SW 55th Street
6. SW 116th Avenue- SW 50th Street to SW 52nd Street
7. SW 53rd Place- SW 116th Avenue to SW 118th Avenue
8. SW 52nd Street- SW 116th Avenue to SW 120th Avenue
9. SW 59th Street- SW 116th Avenue to SW 118th Avenue
10. SW 113th Avenue- Stirling Road to SW 55th Street
11. Hiatus Road- Stirling Road to SW 55th Street
12. Hiatus Road- Sheridan Street to NE Lake Blvd
13. Hiatus Road- NE Lake Blvd to Stirling Road
14. SW 106th Avenue- Stirling Road to Griffin Road
15. SW 49th Manor- SW 104th Avenue to SW 101st Avenue

16. SW 50th Street- SW 106th Avenue to SW 102nd Avenue
17. SW 51st Street- SW 106th Avenue to SW 104th Avenue
18. SW 51st Street- SW 104th Avenue to SW 101st Avenue
19. SW 53rd Street- SW 106th Avenue to SW 103rd Avenue
20. SW 53rd Street- SW 103rd Avenue to Palm Avenue
21. SW 101st Avenue- SW 53rd Street to SW 51st Street
22. SW 95th Avenue- SW 50th Street to SW 52nd Street
23. SW 94th Avenue- SW 50th Street to SW 52nd Street
24. SW 49th Street- Palm Avenue to SW 95th Avenue
25. SW 52nd Street- Palm Avenue to SW 92nd Terrace
26. SW 92nd Terrace- SW 52nd Street to SW 50th Place
27. SW 50th Place- SW 92nd Terrace to SW 90th Avenue
28. SW 51st Street- SW 92nd Terrace to SW 90th Avenue
29. SW 90th Avenue- Griffin Road to Stirling Road
30. SW 88th Terrace- SW 59th Street to SW 57th Street
31. SW 57th Street- SW 88th Terrace to SW 88th Avenue
32. SW 58th Street/SW 88Ave- SW 57th Street to Pine Island Road
33. SW 87th Avenue- SW 51st Court to Griffin Road
34. NW 89th Way- NW 34th Street to NW 41st Street
35. SE Lake Blvd- Embassy Drive to Hiatus Road
36. SE Lake Blvd- Hiatus Road to Stonebridge Parkway
37. Stonebridge Parkway- W Lake Blvd. to NE Lake Blvd.
38. Stonebridge Parkway- NE Lake Blvd. to SE Lake Blvd.
39. Stonebridge Parkway- SE Lake Blvd. to W Lake Blvd
40. Pine Island Road- Monterra Blvd to Sheridan Street
41. Pine Island Road- Stirling Road to Monterra Blvd.
42. Stirling Road- Palm Avenue to Pine Island Road
43. Stirling Road- Hiatus Road to Palm Avenue
44. Stirling Road- Hiatus Road to Flamingo Road
45. SW 49th Street – SW 90th Avenue to SW 88th Terrace
46. SW 49th Court – SW 90th Avenue to SW 49th Place
47. SW 49th Court – SW 49th Place to SW 50th Place
48. SW 88th Terrace – SW 49th Street to SW 50th Place
49. SW 88th Terrace – SW 50th Place to SW 52nd Street

50. SW 52nd Street – SW 90th Ave to SW 88th Terrace
51. SW 52nd Street – SW 94th Avenue to SW 95th Avenue

A network screening of the crash history for the most recent five (5) years along the top locations where the 85th percentile was higher than expected was also completed from documented and available crash information as provided by Signal Four Analytics. This crash review, assisted in the process of evaluating the top corridor segments for predominant crash characteristics and patterns, with a specific emphasis on the identification of bicycle and pedestrian crashes due to speed related contributing causes.

The analysis of the collected traffic data along with the 5-year crash review was used to identify the corridors where traffic calming treatments could be installed. The following are the conclusions and recommendations of the City-Wide Traffic Calming Study.

1. Based exclusively on the traffic volume and 85th percentile speeds determined from the traffic data collection, traffic calming improvements should be considered at the following road segments:
    - SW 49th Street between Flamingo Road and 118th Avenue
    - SW 118th Avenue between SW 49th Street and SW 52nd Street
    - SW 113th Avenue between Stirling Road and SW 55th Street
    - Hiatus Road between Stirling Road and SW 55th Street
    - SW 87th Avenue between SW 51st Court and Griffin Road
    - SW 49th Street between SW 90th Avenue and SW 88th Terrace
    - SW 51st Street between SW 92nd Terrace and SW 90th Avenue
    - SW 52nd Street between SW 90th Avenue and SW 88th Terrace
    - SW 122nd Avenue between SW 49th Street and SW 55th Street
    - Stonebridge Parkway between NE Lake Boulevard and SE Lake Boulevard.
    - SW 52nd Street between SW 94th Avenue and SW 95th Avenue
    - Stonebridge Parkway between W Lake Boulevard and NE Lake Boulevard

2. The following two (2) roadway segments are City maintained corridors that have 85th percentile speeds that exceed the posted speed limit by over 10 mph on one or both travel directions and traffic volumes that exceeded the 3,000 vehicular threshold per Florida Greenbook by 56% and more. These road segments may need additional evaluation depending on the proposed safety improvements.

- SW 118th Avenue between Griffin Road and SW 49th Street
- SW 106th Avenue between Stirling Road and Griffin Road

3. It should be noted that there are more than (1) traffic calming improvement that has been identified as a potential solution along several road segment locations. The City may considered to install temporary traffic calming features at one, some or all locations within a study segment and monitor these for a period of time before installing the permanent traffic calming devices, as one of the recommended improvements may provide the desired reduction of vehicular travel speed which is unique to the traffic patterns for the specific neighborhood as a whole. The list of the proposed recommended improvements ranked by the calculated crash rate of the study segment is summarized in **Table 1.** A planning level opinion of probable costs for the proposed improvements is provided in **Table 2**. The unit cost reflects the estimate of the cost of constructing the improvement. The total cost includes a contingency of 15 % of the base unit cost and 30 % for design, permitting and mobilization of the base unit cost.

4. A public outreach meeting/workshop should be scheduled prior to implementation of any of the proposed traffic calming improvements. The workshop should include a presentation which provides details regarding the traffic data collection and analysis, preliminary recommendations and include resident feedback and dialogue among all of the key stakeholders including the impacted local residents.

5. Local police, fire departments and EMS personnel should be involved while developing the preferred design for the traffic calming improvements including speed humps and roundabouts.

6. Relocate the existing stop bar along with the stop sign that serve northbound traffic at the intersection of SW 52nd Street and 95th Avenue 10 to 15 feet closer to the intersection. Based on field measurements obtained, the existing location of this stop bar exceeds the maximum distance requirement from the intersection per Broward County Traffic Engineering Division (BCTED) Pavement Markings & Signs Details and the Manual of Uniform Traffic Control Devices (MUTCD).

Table 1 Summary of Recommended Improvements Ranked by Crash Rate of the Corridor Segment

CORRIDOR SEGMENT	RECOMMENDED IMPROVEMENTS	LOCATION	85th Percentile Over Posted Speed (MPH)	Crash Rate ****
Hiatus Road- Stirling Road to SW 55th Street	Speed Hump	Between SW 56th Ct. & SW 55th St.	15	1098
	Speed Hump	Between SW 57th Cir. & SW 59th St.		
SW 49th Street- SW 90th Avenue to SW 88th Terrace	Speed Table Through Intersection ***	SW 49th St. & SW 89 Ter.	8	836
SW 51st Street- SW 92nd Terrace to SW 90th Avenue	Speed Table w/Marked Crosswalk	At the existing pedestrian xwalk south of Cooper City Elementary School	7	626
SW 52nd Street- SW 94th Avenue to SW 95th Avenue*	Speed Hump	At approximately 9450 SW 52nd St.	9	528
	At GradeTexture Pavement at Intersection	SW 52nd St. & SW 95th Ave.		
SW 113th Avenue- Stirling Road to SW 55th Street	Speed Table Through Intersection ***	SW 113th Ave. & SW 59th St.	13	286
	Speed Hump	Between SW 56th Ct. & SW 58th St.		
SW 118th Avenue- SW 49th Street to SW 52nd Street	Speed Table Through Intersection ***	SW 118th Ave. & SW50th St.	9	208
	Speed Hump	Between SW 50th St. & SW 51st Ct.		
Stonebridge Parkway- W Lake Blvd. to NE Lake Blvd.*	Speed Table Through Intersection ***	Stonebridge Pkwy & E.Sailboat Dr.	10	191
	Texture Pavement at Intersection	Stonebridge Pkwy & N. Lake Blvd.		
	Speed Hump	Between Forest Hill Dr. & Access Rd.		
SW 106th Avenue- Stirling Road to Griffin Road*	Roundabout**	SW 106th Ave & SW 51st St.	12	170
	Texture Pavement at Intersection	SW 106th Ave & SW 49th Pl.		
		SW 106th Ave & SW 57th Pl.		
	Lane Narrowing Strategies W/ Pavement Markings	SW 106th Griffin Rd. to Stirling Rd.		
SW 49th Street- Flamingo Road to 118th Avenue	Speed Table Through Intersection ***	SW 49th St. & SW 122nd Ave.	12	170
	Speed Hump	Between SW 120th Ave. & SW 118th Ave.		
SW 118th Avenue- Griffin Road to SW 49th Street *	Roundabout **	SW 118th Ave. & SW49th St.	8	141
	At GradeTexture Pavement at Intersection	SW 118th Ave. & SW48th St.		
SW 122nd Avenue- SW 49th Street to SW 55th Street	At GradeTexture Pavement at Intersection	SW 122nd & SW 51st St.	6	133
	At GradeTexture Pavement at Intersection	SW 122nd & SW 53rd St.		
Stonebridge Parkway- NE Lake Blvd. to SE Lake Blvd.	Speed Hump	Between Anchor Wy. & Dockside Dr.	6	112
SW 52nd Street- SW 90th Ave to SW 88th Terrace	Speed Hump	Between SW 89th Ter. & SW 89th Wy.	6	87
SW 87th Avenue- SW 51st Court to Griffin Road	Speed Table Through Intersection ***	SW 87th Ave. & SW 87thTer.	8	0

*Corridors with volumes greater of 3,000 vehicles per day

** Operational Analysis and BCTED approval needed

*** See Additional Details Figures 43 & 44

**** Crash Rate per Roadway Segment in 100 MVM

Table 2 Planning Level Costs of Recommended Improvements

TRAFFIC CALMING IMPROVEMENTS	UNIT COST	CONTINGENCY (15 %)	DESIGN PERMITTING & MOBILIZATION (30 %)	TOTAL COST
Mini Roundabout *	$200,000	$30,000	$60,000	$290,000
Raised Speed Table/Intersection	$100,000	$15,000	$30,000	$145,000
Speed Hump	$35,000	$5,250	$10,500	$50,750
At Grade Texture Pavement Through Intersection	$50,000	$7,500	$15,000	$72,500
Lane Narrowing w/Pavement Markings	About $1.75 per SF, Includes 1" of Pavement Milling & Resurfacing			

* Mini Roundabout /Neighborhood Traffic Circles are subject to feasibility study

1.0 INTRODUCTION

The Corradino Group (Corradino) was retained by the City of Cooper City to complete a citywide traffic calming study along fifty (51) corridor segments. The intent of the traffic calming study is to provide recommendations of traffic calming devices that will potentially improve speeding concerns and related problems identified by the City's local police department, residents and city staff. The traffic analysis and study is limited to public right-of-way roadway corridors. Each road segment location was reviewed to determine if traffic calming improvements are justified, based on eligibility criteria provided in the **Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways**, also known as **The Florida Greenbook**. It should be noted that ***Section 17-38 Public Roads / Article IV – Traffic Calming Devices*** of the City of Cooper City Code of ordinance was also reviewed and discussed with City staff as part of the preparation of this study. Based on conversations with the City staff, it was agreed that the recommended speed and volume thresholds for the installation of traffic calming treatments, as outlined in the **Florida Greenbook,** will be utilized for the purpose of this report.

2.0 TRAFFIC DATA COLLECTION

72-hour bi-directional speed/volume tube counts were collected along fifty-one (51) identified locations within the City of Cooper City, Florida. The final traffic count locations were approved by City staff prior to the deployment of the traffic data collection equipment.

The 72-hour bi-directional speed/volume road segment counts were collected between 5/16/23 and 5/18/23 at the following locations, except for locations 12, 16, 36, 50 which were collected between 5/23/23 and 5/25/23 and locations 8, 9, 15, 21, 22, 24, 33, 46 which were collected between 6/6/23 and 6/8/23.

1. SW 49th Street- Flamingo Road. to SW 118th Avenue
2. SW 118th Avenue- Griffin Road to SW 49th Street
3. SW 118th Avenue- SW 49th Street to SW 52nd Street
4. SW 118th Avenue- SW 52nd Street to Stirling Road
5. SW 122nd Avenue- SW 49th Street to SW 55th Street
6. SW 116th Avenue- SW 50th Street to SW 52nd Street
7. SW 53rd Place- SW 116th Avenue to SW 118th Avenue
8. SW 52nd Street- SW 116th Avenue to SW 120th Avenue
9. SW 59th Street- SW 116th Avenue to SW 118th Avenue
10. SW 113th Avenue- Stirling Road to SW 55th Street
11. Hiatus Road- Stirling Road to SW 55th Street

12. Hiatus Road- Sheridan Street to NE Lake Blvd
13. Hiatus Road- NE Lake Blvd to Stirling Road
14. SW 106th Avenue- Stirling Road to Griffin Road
15. SW 49th Manor- SW 104th Avenue to SW 101st Avenue
16. SW 50th Street- SW 106th Avenue to SW 102nd Avenue
17. SW 51st Street- SW 106th Avenue to SW 104th Avenue
18. SW 51st Street- SW 104th Avenue to SW 101st Avenue
19. SW 53rd Street- SW 106th Avenue to SW 103rd Avenue
20. SW 53rd Street- SW 103rd Avenue to Palm Avenue
21. SW 101st Avenue- SW 53rd Street to SW 51st Street
22. SW 95th Avenue- SW 50th Street to SW 52nd Street
23. SW 94th Avenue- SW 50th Street to SW 52nd Street
24. SW 49th Street- Palm Avenue to SW 95th Avenue
25. SW 52nd Street- Palm Avenue to SW 92nd Terrace
26. SW 92nd Terrace- SW 52nd Street to SW 50th Place
27. SW 50th Place- SW 92nd Terrace to SW 90th Avenue
28. SW 51st Street- SW 92nd Terrace to SW 90th Avenue
29. SW 90th Avenue- Griffin Road to Stirling Road
30. SW 88th Terrace- SW 59th Street to SW 57th Street
31. SW 57th Street- SW 88th Terrace to SW 88th Avenue
32. SW 58th Street/SW 88Ave- SW 57th Street to Pine Island Road
33. SW 87th Avenue- SW 51st Court to Griffin Road
34. NW 89th Way- NW 34th Street to NW 41st Street
35. SE Lake Blvd- Embassy Drive to Hiatus Road
36. SE Lake Blvd- Hiatus Road to Stonebridge Parkway
37. Stonebridge Parkway- W Lake Blvd. to NE Lake Blvd.
38. Stonebridge Parkway- NE Lake Blvd. to SE Lake Blvd.
39. Stonebridge Parkway- SE Lake Blvd. to W Lake Blvd
40. Pine Island Road- Monterra Blvd to Sheridan Street
41. Pine Island Road- Stirling Road to Monterra Blvd.
42. Stirling Road- Palm Avenue to Pine Island Road
43. Stirling Road- Hiatus Road to Palm Avenue
44. Stirling Road- Hiatus Road to Flamingo Road
45. SW 49th Street – SW 90th Avenue to SW 88th Terrace

46. SW 49th Court – SW 90th Avenue to SW 49th Place
47. SW 49th Court – SW 49th Place to SW 50th Place
48. SW 88th Terrace – SW 49th Street to SW 50th Place
49. SW 88th Terrace – SW 50th Place to SW 52nd Street
50. SW 52nd Street – SW 90th Ave to SW 88th Terrace
51. SW 52nd Street – SW 94th Avenue to SW 95th Avenue

The locations of all fifty-one (51) three-day speed/volume roadway segment counts are depicted in **Figures 1, 2, 3 and 4**. The 72-hour speed and volume data collected at all fifty-one (51) locations is included in **Appendix A**.

3.0 TRAFFIC DATA ANALYSIS

Corradino completed a traffic analysis of the collected traffic data at each of the 51 road segment locations. This included a review of the vehicle speeds and traffic volumes for the 3-day traffic count. The objective of the traffic data analysis was to identify the need and locations for traffic calming improvements within the study segments. Each road segment location was reviewed to determine if traffic calming improvements are justified, based on eligibility criteria provided in the **Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways**, also known as **The Florida Greenbook**. It should be noted that ***Section 17-38 Public Roads / Article IV – Traffic Calming Devices*** of the City of Cooper City Code of ordinance was also reviewed and discussed with City staff as part of the preparation of this study. Based on conversations with the City staff, it was agreed that the recommended speed and volume thresholds for the installation of traffic calming treatments, as outlined in the **Florida Greenbook,** will be utilized for the purpose of this report. The analysis of the collected traffic data will be used to identify the corridors where traffic calming treatments could be installed. A copy of the City's Traffic Calming Ordinance for **Public Road Section 17-38** is included in **Appendix B**

3.1 TRAFFIC VOLUMES

Chapter 15 of the **2018 The Florida Greenbook**, recommends the installation of traffic calming devices on collectors and local roadways with traffic volumes not exceeding 3,000 vehicles per day. A summary of the daily traffic volumes collected on the study roadway segments compared to Florida Greenbook recommended threshold traffic volumes for the installation of traffic calming treatments is presented in **Table 2**. It should be noted that the traffic volumes presented in Table 2 highlight the average of 3-day 24-hour volumes collected between Tuesday to Thursday during typical traffic conditions. Typical traffic conditions are generally expected during normal school operations and outside of any holidays or special events. These volumes have been adjusted to represent peak season traffic conditions using the appropriate peak season factor category (PSCF) of 1.03, 1.04 and 1.06 for the respective collected week was obtained from the Florida Department of Transportation Online Website. A copy of the 2022 FDOT PSCF Report is provided in **Appendix C**.

DRAFT

Table 3 Traffic Volumes Comparison to Florida Greenbook Thresholds

Tube Count #	Roadway Name	Limits	Roadway Classification	Roadway Jurisdiction	Adjusted Daily Traffic	Meets Daily Volume Threshold?*

*2018 Florida Greenbook recommends less than 3,000 vehicles per day for installation of traffic calming devices.
Highlighted roadway segments in YELLOW are the road sections that meet the Florida Greenbook threshold of 3000 vehicles per day or less.

3.2 SPEED MEASUREMENTS

The purpose of collecting speed measurements was to determine the magnitude of vehicular speeds within selected City corridor segments. Speed measurements were collected along the same 51 locations where the traffic volume data were collected. The 85th percentile speed is often used as a measure of the upper limit of "reasonable" speeds for the prevailing conditions. The 85th percentile speed is the speed at or below which 85 percent of the drivers travel on a road segment. The maximum speed limits posted as the result of a study should be based primarily on the 85th percentile speed when adequate speed samples can be secured. The use of the 85th percentile speed concept is based on the theory that:

- the large majority of drivers:
  - are reasonable and prudent
  - do not want to have a crash
  - desire to reach their destination in the shortest possible time
- a speed at or below which 85 percent of people drive at any given location under good weather and visibility conditions may be considered as the maximum safe speed for that location.

The completed field reviews indicate that there are NO posted speed limit signs along the following study corridor segments:

7. SW 52nd Street- SW 116th Avenue to SW 120th Avenue
8. SW 59th Street- SW 116th Avenue to SW 118th Avenue
9. SW 113th Avenue- Stirling Road to SW 55th Street
15. SW 50th Street- SW 106th Avenue to SW 102nd Avenue
19. SW 53rd Street- SW 103rd Avenue to Palm Avenue
20. SW 101st Avenue- SW 53rd Street to SW 51st Street
23. SW 49th Street- Palm Avenue to SW 95th Avenue
26. SW 50th Place- SW 92nd Terrace to SW 90th Avenue
27. SW 51st Street- SW 92nd Terrace to SW 90th Avenue
28. SW 90th Avenue- Griffin Road to Stirling Road
31. SW 58th Street/SW 88Ave- SW 57th Street to Pine Island Road
32. SW 87th Avenue- SW 51st Court to Griffin Road
33. NW 89th Way- NW 34th Street to NW 41st Street
34. SE Lake Blvd- Embassy Drive to Hiatus Road
45. SW 49th Court – SW 90th Avenue to SW 49th Place
50. SW 52nd Street – SW 94th Avenue to SW 95th Avenue

DRAFT

For the purpose of speed data analysis and based on the multiple Area Wide speed signs observed within close proximity to the study corridor segments mentioned above, a 25-mph speed was used for the speed evaluation at the previously mentioned segments. The 85th percentile speeds and average speeds for all the study roadway segments are summarized in **Table 3**.

The speed measurements identified in Table 3 demonstrate that the **average speeds** traveled by motorists along the study corridor segments are generally as follows:

- between 17 and 35 miles per hour (mph) along segments with 25 mph posted speed limit,
- between 27 and 37 mph along segments with 30 mph posted speed limit,
- 41 mph along segments with 35 mph posted speed limit,
- 38 mph along segments with 40 mph posted speed limit, and
- between 40 and 46 mph with 45 mph posted speed limit.

The evaluation of the **85th percentile speeds** demonstrate that some motorists travel more than the posted speed limit along forty-five (45) of the fifty-one (51) study roadway segments. In general, the 85th percentile speeds of the study corridor segments are as follows:

- between 21 and 37 miles per hour (mph) along segments with 25 mph posted speed limit,
- between 31 and 45 mph along segments with 30 mph posted speed limit,
- 47 mph along segments with 35 mph posted speed limit,
- between 43 and 46 mph along segments with 40 mph posted speed limit, and
- between 47 and 51 mph along segments with 45 mph posted speed limit.

DRAFT

Table 4 Summary of Roadway Segment Speed Evaluation

Tube Count #	Roadway Name	Limits	Posted Speed Limit (MPH)	Average Operating Speed (MPH)	85th Percentile Speed (MPH)	85th Percentile Above Posted Speed Limit (MPH)

Highlighted roadway segment in YELLOW are the road sections where 85th percentile speeds exceed the posted speed limit by 6 or more as well as the 3,000 or less vehicles per day is met.

Highlighted roadway segments in GREY are the roadway sections where 85th percentiles speeds exceeded the posted speed limit by 6 or more, but the average vehicular volume of 3,000 was exceeded.

Table 4 identifies the study segments where the threshold traffic volumes and the 85th percentile exceeds the posted speed limit by 6 or more miles per hour.

Table 5 Top Roadway Segments.

3.3 5-YEAR CRASH REVIEW

A network screening of the crash history for the most recent five (5) years, **August 1st, 2018, to July 31st, 2023**, along the study corridor segments listed in **Tables 3 and 4** was completed from documented and available crash information as provided by Signal Four Analytics. Signal Four Analytics is a program which evaluates crash data from the Florida Department of Highway Safety and Motor Vehicles. Crash Data is updated nightly and are geo-located which allows them to be shown on an interactive map and be presented as a spatial distribution of crashes. Intersection and road segment crash data analysis can be performed for certain timeframes to evaluate types of crashes (vehicle/bike/pedestrian), time of day, road condition and other variables using Signal Four Analytics. This crash review, assisted in the process of evaluating each of the 14 corridor segments for predominant crash characteristics and patterns, with a specific emphasis on the identification of speed related crashes as well as bicycle and pedestrian crashes.

A heat map has been provided for the 14 reviewed corridor segments which depicts the documented crash location. A summary excel spreadsheet has been provided in the **Appendix D** There were NO reported crashes along segment # 33. SW 87th Avenue – SW 51st Court to Griffin Road for the 5-year crash review completed utilizing Signal Four Analytics, therefore no crash information has been provided for this roadway segment. A summary of the completed crash review along the 14 study corridor segments is provided.

1. SW 49th Street- Flamingo Road to SW 118th Avenue

There was a total of 4 documented crashes with 1 injury crash and zero fatalities. The predominant crash pattern was angle crashes. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

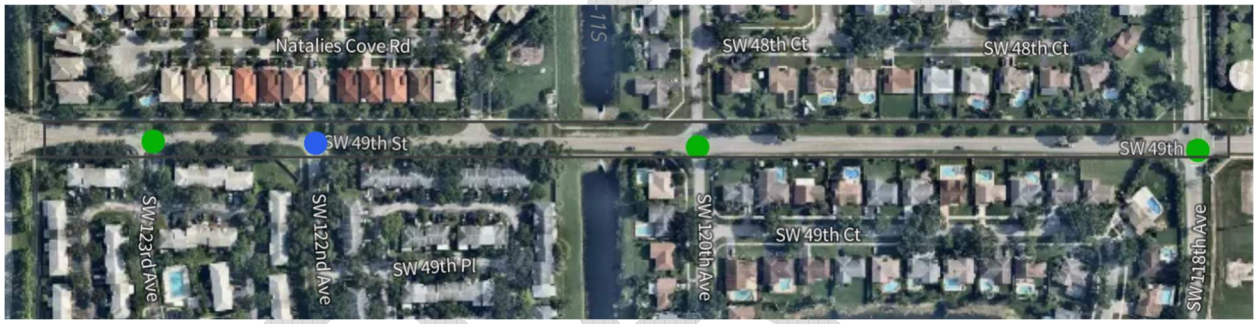

Figure 5 (1) SW 49th St. Heat Map of Crashes

3. SW 118th Avenue- SW 49th Street to SW 52nd Street

There was a total of 3 documented crashes with 1 injury crash and zero fatalities. The predominant crash pattern was angle crashes at the intersection of SW 118th Avenue and SW 51st Court. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

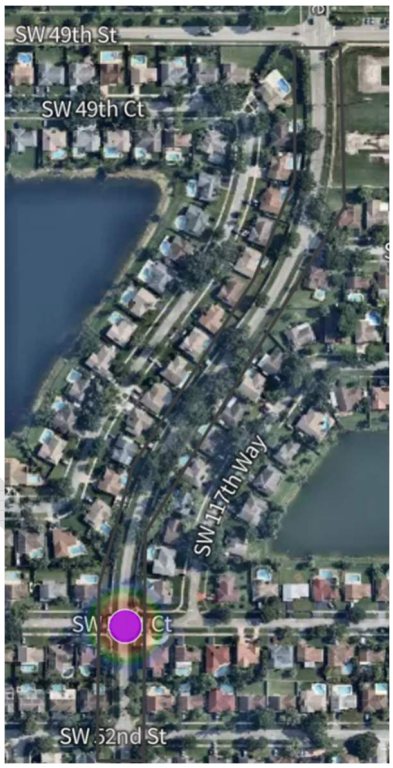

Figure 6 (3) SW 118th Ave. Heat Map of Crashes

10. SW 113th Avenue- Stirling Road to SW 55th Street

There was a total of 2 documented crashes with no injury crashes and zero fatalities. The predominant crash pattern was angle crashes. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

Figure 7 (10) SW 113th Ave. Heat Map of Crashes

DRAFT

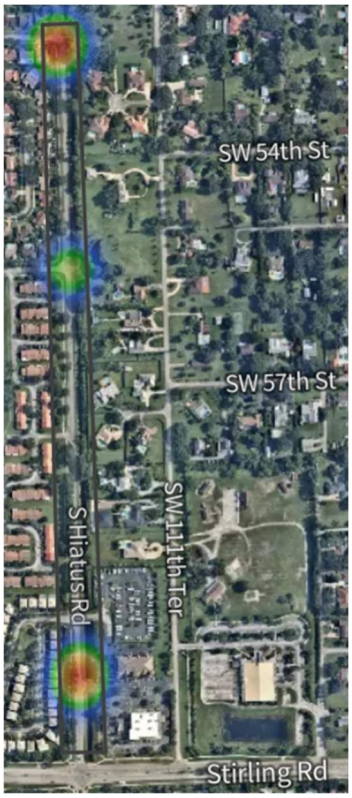

Figure 8 (11) Hiatus Rd. Heat Map of Crashes

11. Hiatus Road – Stirling Road to SW 55th Street

There was a total of 4 documented crashes with 2 injury crashes and zero fatalities. The predominant crash pattern was off the road crashes. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

33. SW 87th Avenue – SW 51st Court to Griffin Road

There were no documented crashes over the 5-year review period.

45. SW 49th Street – SW 90th Avenue to SW 88th Terrace

There was a total of 4 documented crashes with 2 injury crashes and zero fatalities. The predominant crash pattern was backed-into crashes. The predominant cause for the crashes was improper backing. There was one (1) incident involving a bicyclist and no incidents involving pedestrian over the 5- year review period.

Figure 9 (45) SW 49th St. Heat Map of Crashes

DRAFT

28. SW 51st Street- SW 92nd Terrace to SW 90th Avenue

There was a total of 9 documented crashes with 3 injury crashes and zero fatalities. The predominant crash pattern was left-turn crashes. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

Figure 10. SW 51st St. Heat Map of Crashes

50. SW 52nd Street – SW 90th Avenue and SW 88th Terrace. There was a total of 1 documented crash with no injuries and zero fatalities. The crash type was sideswipe. The predominant cause for the crash was improper backing. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

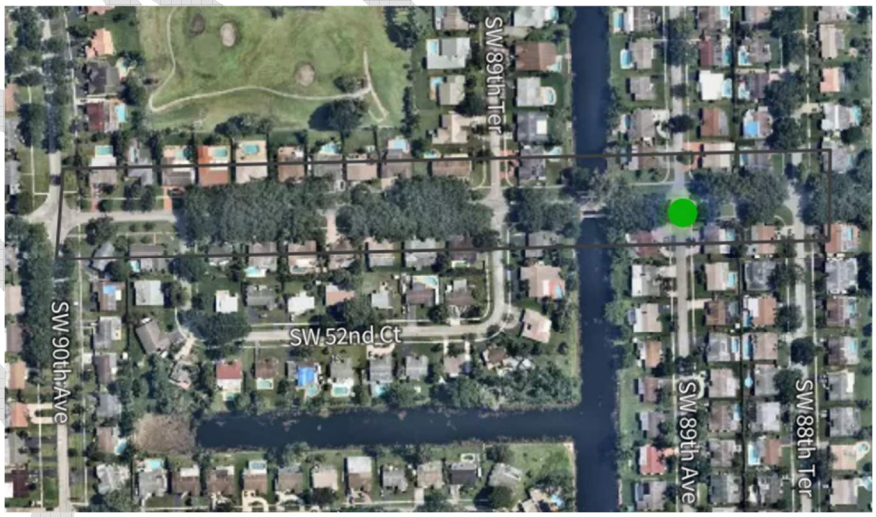

Figure 11 (50) SW 52nd St. Heat Map of Crashes

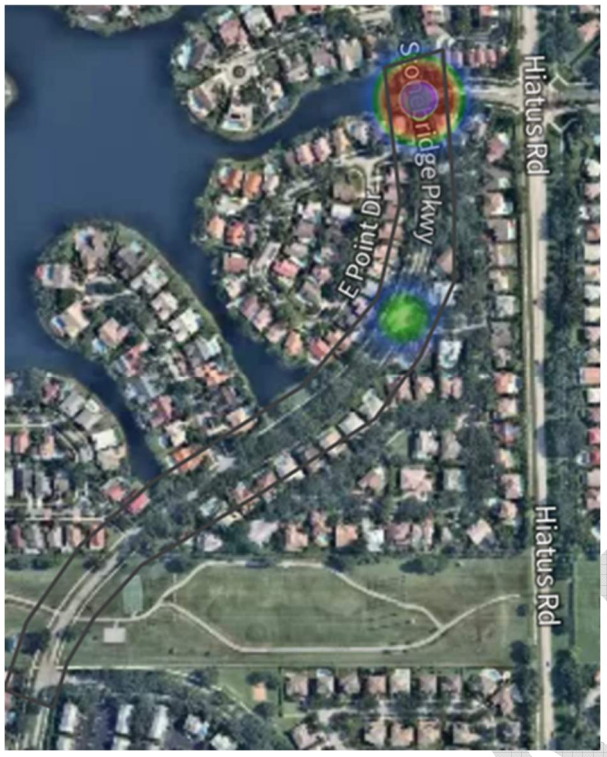

Figure 12 (38) Stonebridge Parkway Heat Map of Crashes

38. Stonebridge Parkway – NE Lake Boulevard to SE Lake Boulevard

There was a total of 6 documented crashes with 2 injury crashes and zero fatalities. The predominant crash pattern was angle crashes at the intersection of Stonebridge Parkway and NE Lake Boulevard. The predominant cause for the crashes was failure to yield. There was one (1) incident related to speeding with hit a tree. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

5. SW 122nd Avenue – SW 49th Street to SW 55th Street

There was a total of 3 documented crashes with 1 injury crashes and zero fatalities. The predominant crash pattern was angle crashes. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists or pedestrians over the 5- year review period.

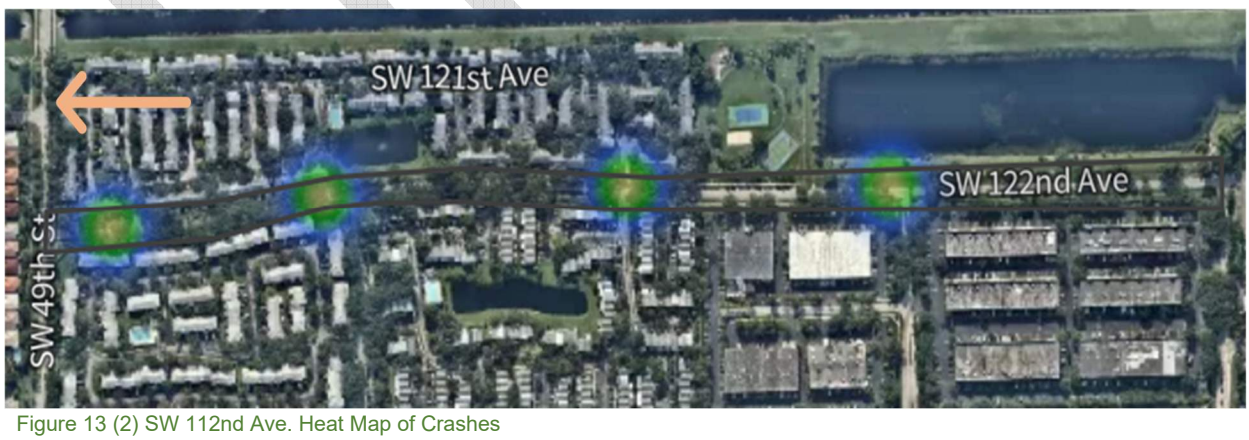

Figure 13 (2) SW 112nd Ave. Heat Map of Crashes

2. SW 118th Avenue- Griffin Road to SW 49th Street. There was a total of 4 documented crashes with 2 injury crashes and zero fatalities. The predominant crash pattern was rear end crashes. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists or pedestrians over the 5-year review period.

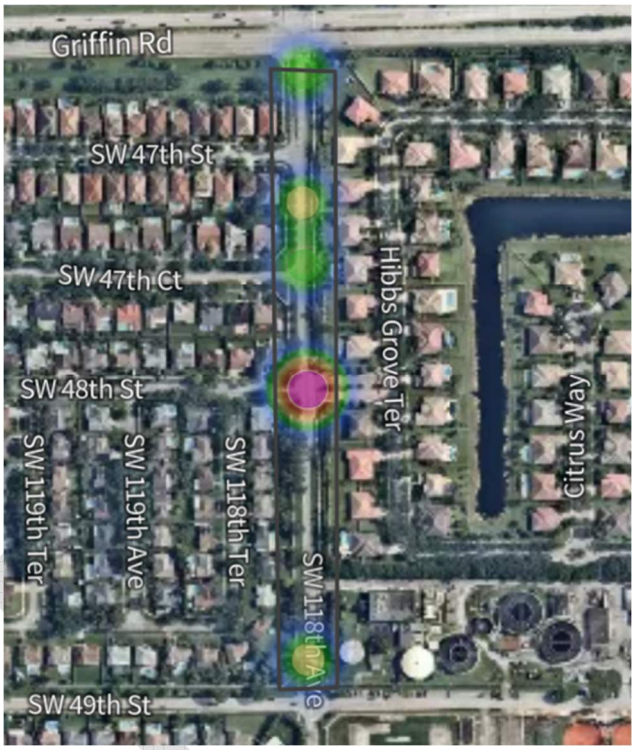

Figure 14 (2) SW 118th Ave. Heat Map of Crashes

14. SW 106th Avenue- Stirling Road to Griffin Road

There was a total of 13 documented crashes with 5 injury crashes and zero fatalities. The predominant crash pattern was rear end crashes followed by angle and sideswipe crashes. The predominant cause for the crashes was careless driving. There were no incidents involving bicyclists and one incident involving a pedestrian at the intersection SW 106th Avenue and SW 51st Street over the 5- year review period.

Figure 15 (14) SW 106th Ave Heat Map of Crashes

51. SW 52nd Street- SW 94th Avenue to SW 95th Avenue

There was a total of 8 documented crashes with 1 injury crashes and zero fatalities. The predominant crash pattern was careless driving followed by failure to yield and improper backing crashes. There were no incidents involving bicyclists and one incident involving a pedestrian at the intersection SW 52nd Street and SW 95th Avenue over the 5- year review period.

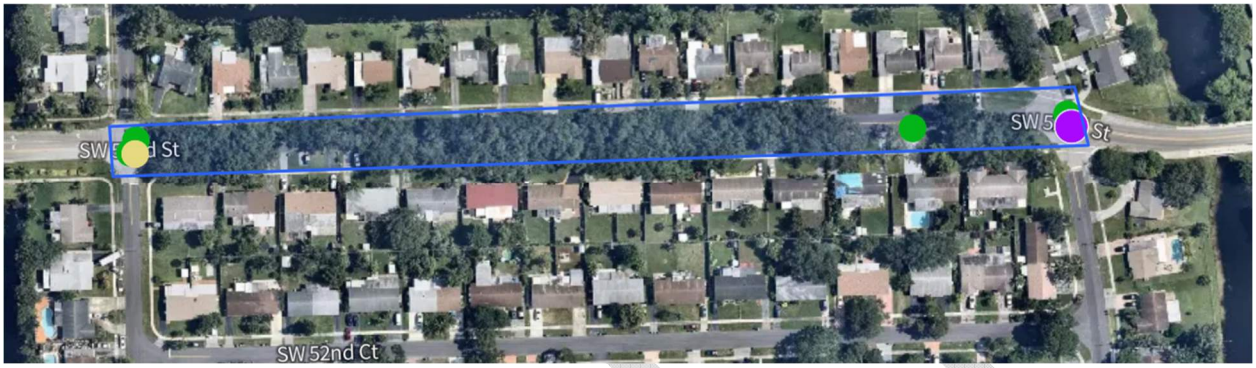

Figure 16 (51) SW 52nd St. Heat Map of Crashes

37. Stonebridge Parkway – W Lake Boulevard to NE Lake Boulevard

There was a total of 10 documented crashes with 3 injury crashes and zero fatalities. The predominant crash pattern was careless driving followed by failure to yield and improper backing crashes. There were no incidents involving bicyclists or over the 5- year review period.

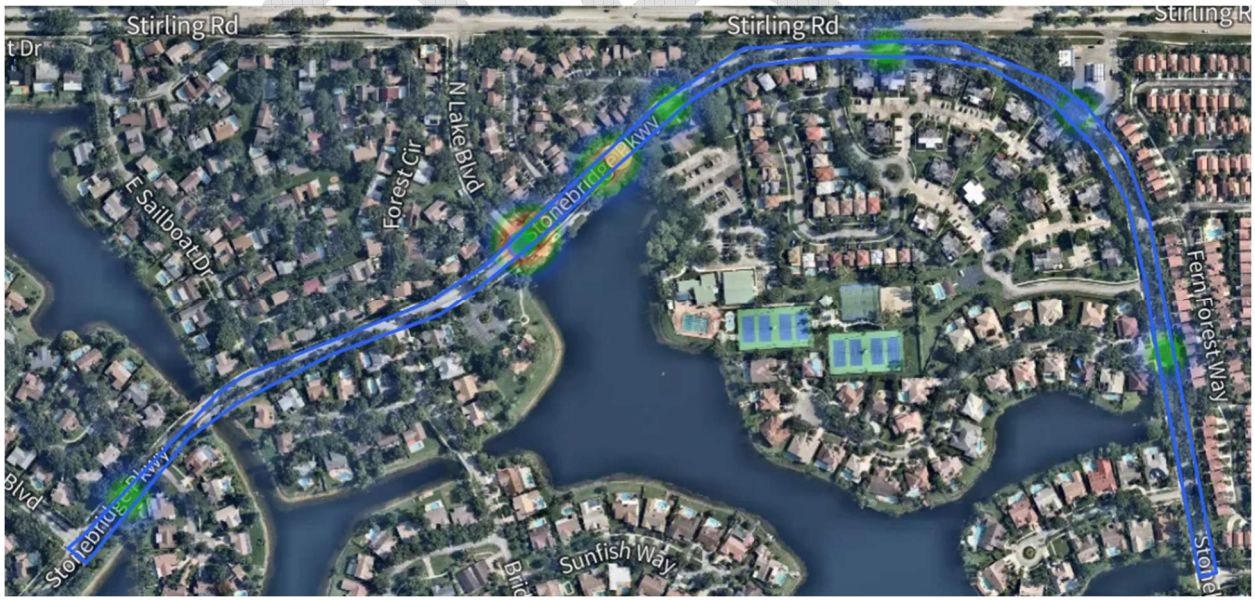

Figure 17 (37) Stonebridge Pkwy. Heat Map

Due to the excessive number of documented crashes **along the 14 corridor segments** for the 5-year review period, crash reports are not included as part of this this study; however, crash summary tables for each individual segment are included in Appendix D.

4.0 ROADWAY CHARACTERISTICS FIELD OBSERVATIONS

In conjunction with the traffic data collection and evaluation, field visits were completed on Thursday October 26th, 2023, to confirm field conditions and assess the overall traffic characteristics of the roadway segments identified in Tables 3 and 4 of this report. In general, the existing roadway facilities lack design characteristics that manage traffic calming which includes narrow travel lanes, speed tables, raised medians, splitter islands, chicanes, neighborhood traffic circles, etc. The following are some collected pictures and notes from each of the visited roadway segments.

1. SW 49th Street- Flamingo Road to SW 118th Avenue

SW 49th St. along this study corridor segment, is a two-way, two-lane undivided local City roadway that runs in the east/west direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 25 mph. There is an electronic speed radar sign just west of SW 120th Avenue facing westbound traffic.

Figures 18, and 19 are images of the SW 49th Street corridor segment.

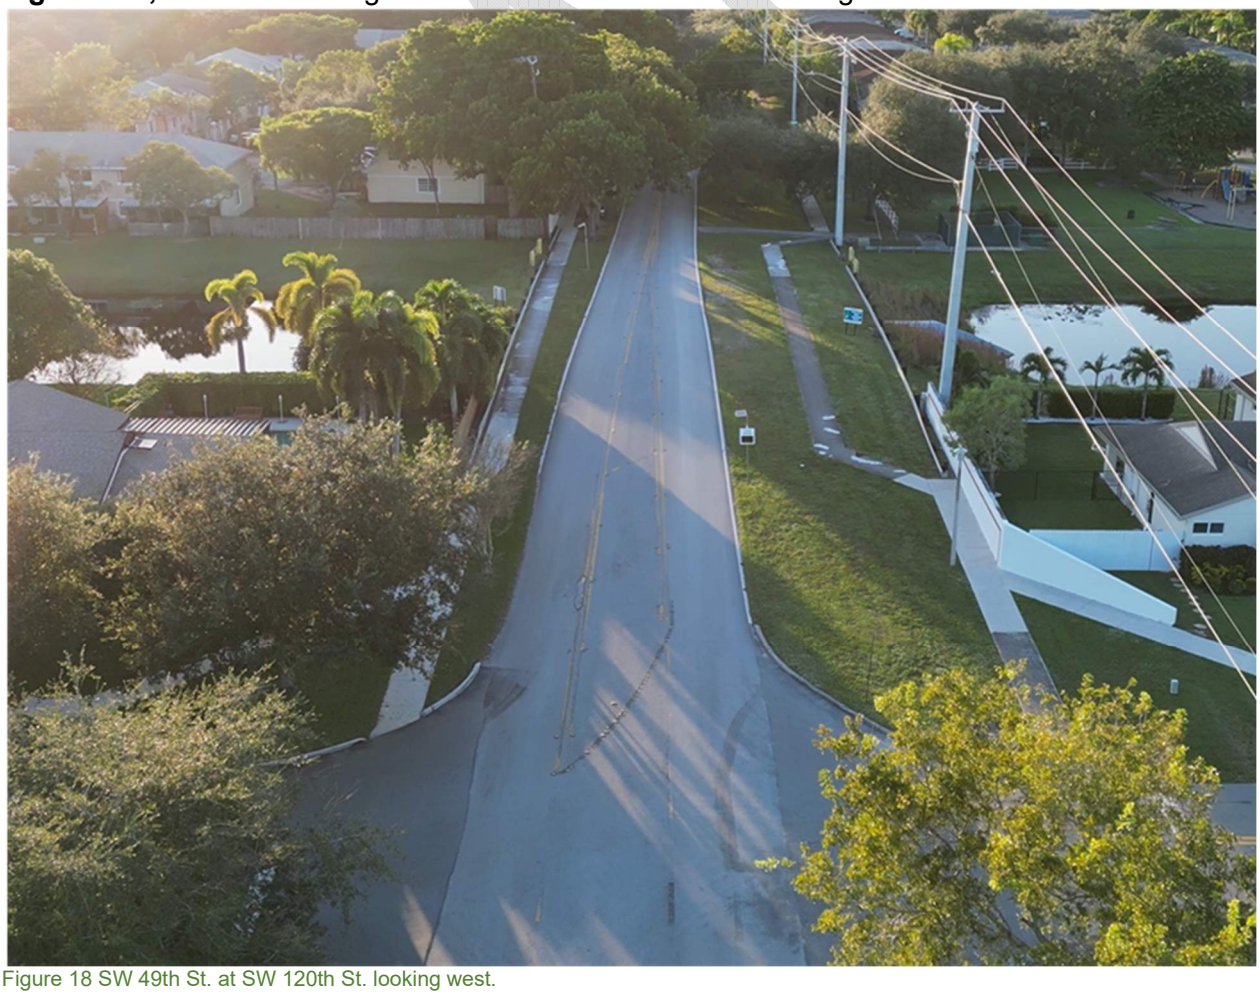

Figure 18 SW 49th St. at SW 120th St. looking west.

Figure 19 Speed radar at SW 49th St. and SW 120th Ave. And SW 49th St. and SW 122nd looking east, respectively.

3. SW 118th Avenue- SW 49th Street to SW 52nd Street

SW 118th St. is a two-way, two-lane undivided local City roadway that runs in the north/south direction with sidewalks on both sides of the road and no dedicated bicycle lanes. SW 50th St.

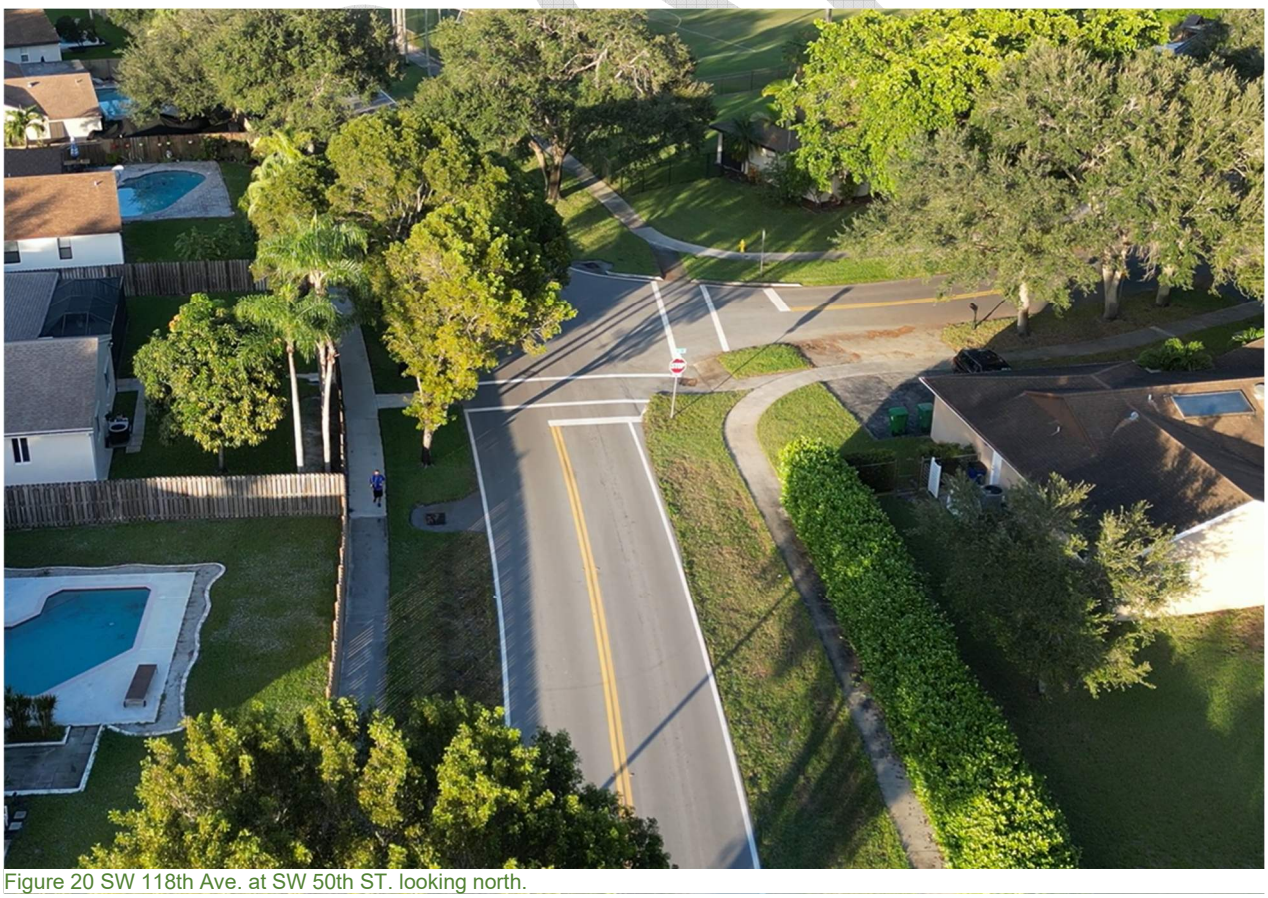

Figure 20 SW 118th Ave. at SW 50th ST. looking north.

provides access to Griffin Elementary School. The posted speed limit is 25 mph. **Figures 20 and 21** are images of SW 118th Avenue corridor.

Figure 21 SW 118th Ave. at SW 51st Ct. looking north and south, respectively.

10. SW 113th Avenue- Stirling Road to SW 55th Street

SW 113th St. is a two-way, two-lane undivided local City roadway that runs in the north/south direction with sidewalks on both sides of the road and no dedicated bicycle lanes. Forest Lake Park is located along the east side of this corridor segment between SW 56th Court and SW 58th Court. The posted speed limit is 25 mph. **Figures 22, 23** are images of SW 113th Avenue at 58th Street.

Figure 22 SW 113th Ave. at SW 58th St. looking north and south respectively.

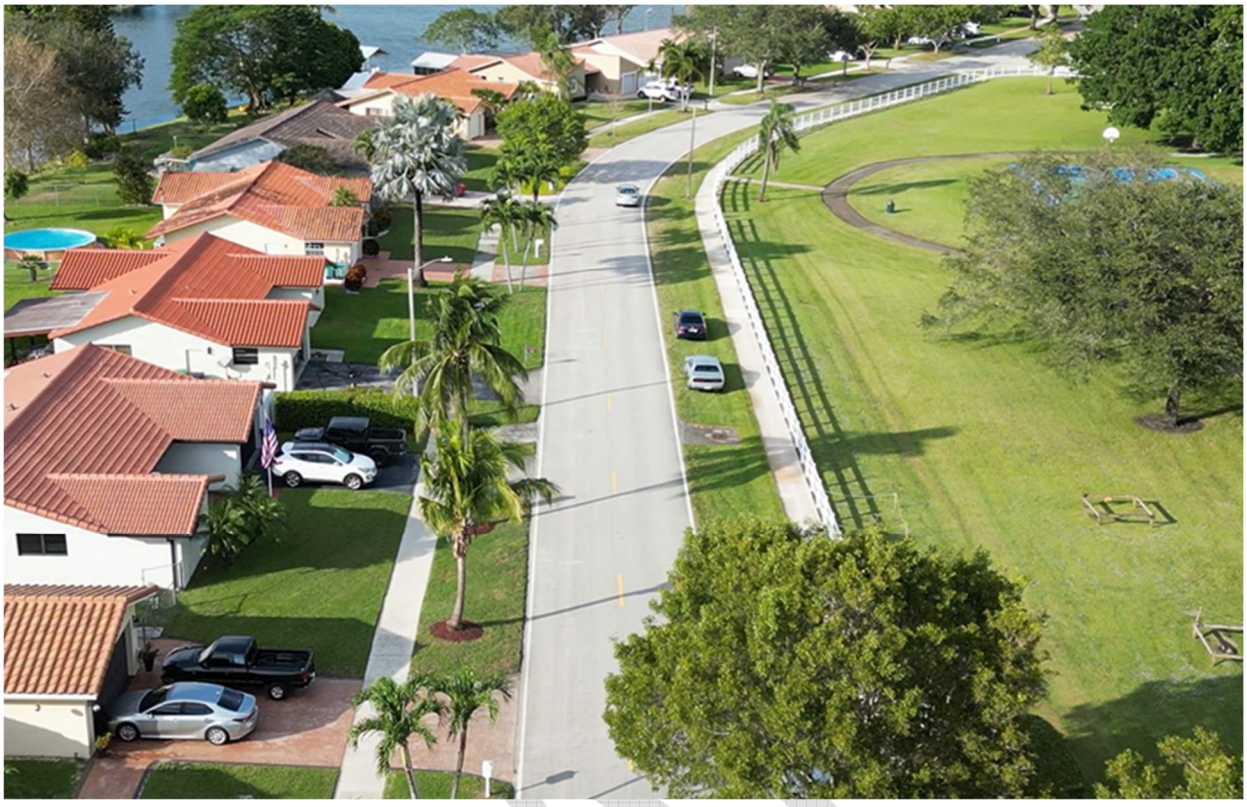

Figure 23 SW 113th Ave. adjacent to Forest Lake Park, looking north.

11. Hiatus Road – Stirling Road to SW 55th Street

Hiatus Road is a two-way, two-lane undivided collector roadway that runs in the north/south direction with sidewalks along the west side of the road only and no dedicated bicycle lanes. There is guardrail along the east side of this corridor segment. The posted speed limit is 30 mph. **Figures 24 and 25** are images of this Hiatus Road corridor.

Figure 24 Hiatus Rd. at SW 56th Ct. looking north and south respectively.

Figure 25 Hiatus Rd. at SW 57th Cir. looking north.

33. SW 87th Avenue – SW 51st Court to Griffin Road

SW 87th Avenue is a two-way, two-lane undivided local City roadway that runs in the north/south direction with sidewalks on both sides of the road and no dedicated bicycle lanes The northern portion of this study segment, provides access to Christie Schafale Park on the west side of the road. There is on-street parking along the limits of the park on the west side only, there is also an uncontrolled marked crosswalk just south of SW 50th Street. The posted speed limit is 25 mph. **Figures 26 and 27** are images of the SW 87th Avenue corridor.

Figure 26 SW 87th Ave. at SW 50th St. looking south.

Figure 27 SW 87th Ave. uncontrolled crosswalk south of 50th St. looking north. And SW 87th Ave at SW 87th Ter. looking south respectively.

45. SW 49th Street – SW 90th Avenue to SW 88th Terrace

SW 49th Street is a two-way, two-lane undivided local City roadway that runs in the east/west direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 25 mph **Figure 28** depicts images of SW 49th Street at SW 89th Terrace. No aerial photographs are shown for this corridor segment as the very robust vegetation prevented to view the main characteristics of the corridor.

Figure 28 SW 49th St. at SW 89th Ter. looking east and west respectively.

28. SW 51st Street- SW 92nd Terrace to SW 90th Avenue

SW 51st Street is a two-way, two-lane undivided local City roadway that runs in the east/west direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 25 mph. There is an established school zone with two ground mounted school zone flasher beacons (one at each end of the school zone), one located east of SW 92nd Terrace facing eastbound traffic and the second one located at about 9100 SW 51st St facing westbound traffic. Access to Cooper City Elementary School is provided through SW 92nd Avenue The City's Public Work Department is also located along this study corridor more exactly at 9070 SW 51st Street. **Figures 29 to 31** are images of the SW 51st St. corridor.

Figure 29 SW 51st St. looking west.

Figure 30 Flashing beacon at SW 92nd Ter. facing EB traffic and at 9070 SW 51st St facing WB traffic respectively.

Figure 31 SW 51st St. at SW 92nd Ave. looking east and uncontrolled marked crosswalk north of SW 91st Ave. respectively.

50.SW 52nd Street – SW 90th Avenue and SW 88th Terrace.

SW 52nd Street is a two-way, two-lane undivided local City roadway that runs in the east/west direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 25 mph. There are weight limits signs approaching the bridge between SW 89th Terrace and SW 89th Avenue. **Figure 32** depicts images of SW 52nd Street at SW 89th Terrace. No aerial photographs are shown for this corridor segment as the very robust vegetation prevented to view the main characteristics of the corridor.

Figure 32 SW 52nd Ave. at SW 89th Ter. looking east and west respectively.

38. Stonebridge Parkway – NE Lake Boulevard to SE Lake Boulevard

Stonebridge Parkway along this segment of the corridor is a two-way, two-lane City roadway divided by a landscaped median that runs in the northeast/southwest direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 30 mph.

The southern limits of the study corridor provide access to Embassy Creek Elementary School though SE Lake Boulevard. **Figures 33 and 34** are images of the Stonebridge Parkway corridor.

Figure 33 Stonebridge Pkwy. At Anchor Way looking northeast and southwest respectively.

DRAFT

Figure 34 Stonebridge Pkwy and NE Lake Blvd. looking south.

5. SW 122nd Avenue – SW 49th Street to SW 55th Street

SW 122nd Avenue is a two-way, two-lane undivided local City roadway that runs in the north/south direction with sidewalks on both sides of the road from SW 49th Street south to about 300 feet north of SW 53rd St. then it continues south on the west side of SW 122nd Ave only. There are no dedicated bicycle lanes along this study corridor. There is an existing speed hump between 51st Street and SW 52nd Place, another one between SW 52nd Place and SW 53rd Street, and another one between SW 53rd Street and SW 55th Street. The posted speed limit is 25 mph. This segment of SW 122nd Avenue provides access to Flamingo Park located at 5300 SW 122 Ave**. Figure 35 to 37** are images of the SW 122nd Ave. corridor.

Figure 35 SW 122nd Ave corridor looking north.

Figure 36 Speed humps between SW 51st St. and SW 52nd Pl, and between SW 52nd Pl. and SW 53rd St. respectively.

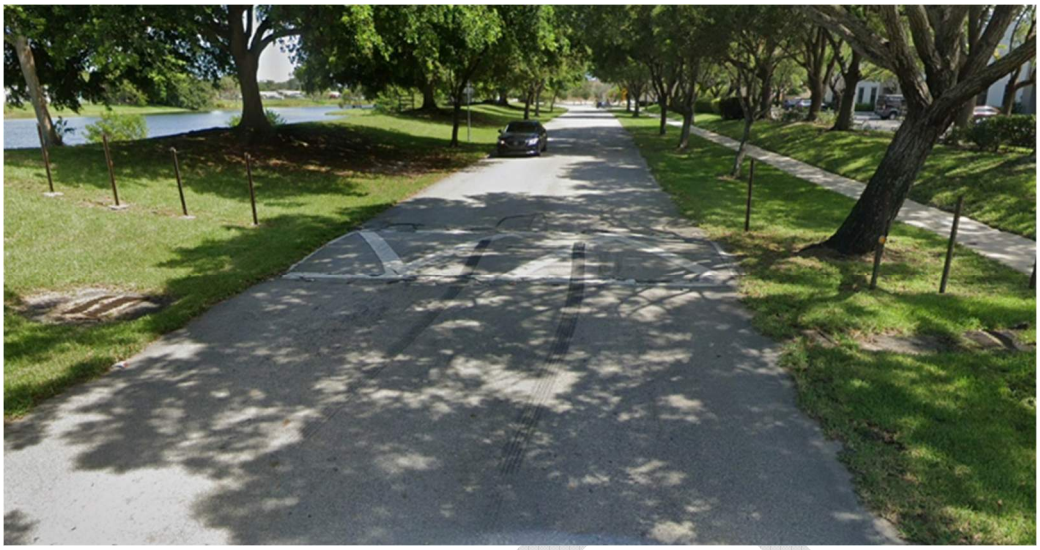

Figure 37 SW 122nd Ave. Speed hump between SW 53rd Str. And SW 55th St.

2. SW 118th Avenue- Griffin Road to SW 49th Street

SW 118th St. is a two-way, two-lane undivided local City roadway that runs in the north/south direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 25 mph. **Figure 38** is and aerial image of the study corridor segment looking north at the intersection of SW 118th Avenue and SW 49th Street.

Figure 38 aerial image of SW 118th Ave. and SW 49th St. intersection.

14. SW 106th Avenue- Stirling Road to Griffin Road

SW 106th St. is a two-way, two-lane undivided local City roadway that runs in the north/south direction with sidewalk along the east side of the roadway only, guardrail on the west side of the road and no dedicated bicycle lanes. The posted speed limit is 35 mph. **Figure 39** is an aerial image of the SW 106th Avenue corridor at SW 51st Street looking north.

Figure 39 SW 106th Ave. at SW 51st St. looking north.

51.SW 52nd Street – SW 94th Avenue and SW 95th Avenue.

SW 52nd Street is a two-way, two-lane undivided local City roadway that runs in the east/west direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 25 mph. There are weight limits signs approaching the bridge between SW 89th Terrace and SW 89th Avenue. **Figure 40** depicts images of SW 52nd Street at SW 89th Terrace. No aerial photographs are shown for this corridor segment as the very robust vegetation prevented to view the main characteristics of the corridor.

Figure 40 SW 52nd Street between SW 94th Ave and SW 95th Ave looking east and west respectively.

37. Stonebridge Parkway – W Lake Boulevard and NE Lake Boulevard.

Stonebridge Parkway along this segment of the corridor is a two-way, two-lane undivided City roadway that runs in the northeast/southwest direction with sidewalks on both sides of the road and no dedicated bicycle lanes. The posted speed limit is 30 mph. There are uncontrolled marked pedestrian crosswalks at the intersections with W Lake Boulevard and N Lake Boulevard that can be seen in **Figure 41**.

Figure 41 Stonebridge Pkwy. Uncontrolled Marked Crosswalks at W Lake Blvd. and N. Lake Blvd. looking northeast respectively.

5.0 TRAFFIC CALMING IMPROVEMENT PLAN

The analysis of traffic data demonstrated that traffic volumes on several local streets meet the guidelines provided in the 2018 Florida Greenbook and 85th percentile speeds measured exceeded the posted speed limit between 6 to 13 miles per hour along some of the study corridors.

The strategies being proposed at the locations listed in **Table 3** focus on implementing traffic calming measures to reduce travel speeds by constructing geometric elements to encourage slower speeds. These traffic calming measures enhance safety for pedestrians and bicyclists which can improve the overall quality of life for the residents. The selection of a traffic calming measure is dependent upon the type of issue being experienced at each specific location and requires location-by-location analysis. The following is a review of each of the locations where traffic calming measures/improvements are proposed that meet the criteria for installation.

SW 49th Street between Flaming Road and 118th Avenue.

The 85th percentile speed along the study segment is **13 mph** (13 mph traveling eastbound and 12 mph traveling westbound) over the posted speed limit. A raised intersection or speed table with textured pavement could be designed, permitted, and constructed at the intersection of SW 49th Street and SW 122nd Avenue. A raised intersection would allow for reduced speeds along the SW 49th Street corridor while improving pedestrian safety at the existing pedestrian crossing. A speed hump could be installed between SW 120th Avenue and SW 118th Avenue, this corridor segment is about 1,000 feet long without any driveways or significant access areas. Speed humps are a relatively low-cost solution and allows for the reduction of travel speeds. **Figure 42** is an aerial image of the SW 49th Street corridor segment identifying the recommended locations for the potential traffic calming improvements. **Figure 43** depicts some pictures of speed tables that have been installed at intersections within Broward County. **Figure 44** depicts a sample of a raised intersection per the National Association of City Transportation Officials (NACTO). **Figure 45** depicts a sample of a sample speed hump per NACTO.

Figure 42 SW 49th St. recommended locations of proposed traffic calming improvements.

Figure 43 Images of speed tables with texture pavement through intersections within Broward County.

Figure 44 NACTO Raised Intersection.

Figure 45 NACTO Speed Hump

SW 118th Avenue- SW 49th Street to SW 52nd Street

This corridor segment provides direct access to Griffin Elementary School The 85th percentile speed along the study segment is **9 mph** (8 mph traveling northbound and 10 mph traveling southbound) over the posted speed limit. A raised intersection or speed table with textured pavement could be designed, permitted, and constructed at the intersection of SW 118th Avenue and SW 50th Street, this intersection provides direct access to Griffin Elementary School. A raised intersection would allow for reduced travel speeds along the SW 118th Avenue corridor while improving pedestrian safety at the existing pedestrian crossings. The installation of a speed hump is also recommended between SW 50th Court and SW 51st Court, which is a roadway segment of about 1,000 feet in length without any driveways or significant access areas. Speed humps are a relatively low-cost solution and allow for the reduction of travel speeds. **Figure 46** is an aerial image of the SW 118th Avenue corridor segment identifying the recommended locations for the potential traffic calming improvements. Please refer to **Figures 43, 44 and 45** for additional details regarding the proposed traffic calming treatments.

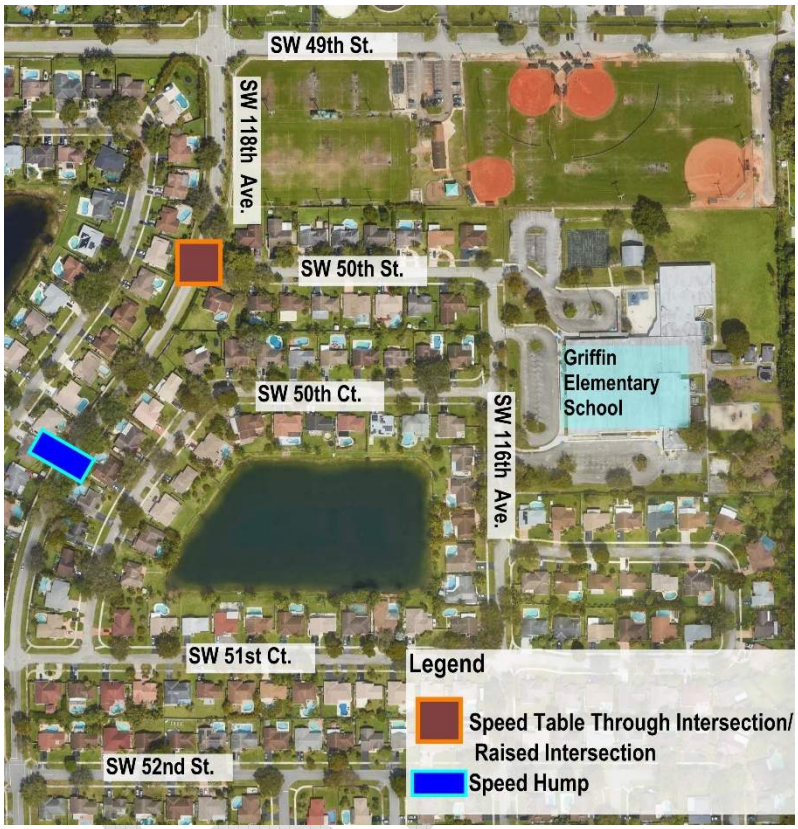

Figure 46 SW 118th Ave. Recommended Locations of Proposed Traffic Calming Improvements.

SW 113th Avenue- Stirling Road to SW 55th Street

The 85th percentile speed along the study segment is **13 mph** (12 mph traveling northbound and 14 mph traveling southbound) over the posted speed limit. A raised intersection or speed table with textured pavement could be designed, permitted, and constructed at the intersection of SW 118th Avenue and SW 50th Street. A raised intersection would allow for reduced speeds along the SW 118th Avenue corridor while improving pedestrian safety at existing pedestrian crossings. The

installation of a speed hump is also recommended between SW 56th Court and SW 58th Street. This segment of the road is about 1,000 feet long without any driveways along the east side of the road adjacent to Forest Lake Park. Speed humps are a relatively low-cost solution and allow for the reduction of travel speed. **Figure 47** is an aerial image of the SW 113th Avenue and Hiatus Road corridor segments identifying the recommended locations for the traffic calming improvements for the two studied segments due to its proximity to each other. Please refer to **Figures 43, 44 and 45** for additional details regarding the proposed traffic calming treatments.

Figure 47 SW 113th Ave. and Hiatus Rd. Corridors Recommended Locations of Proposed Traffic Calming Improvements

Hiatus Road – Stirling Road to SW 55th Street

The 85th percentile speed along the study segment is **15 mph** (15 mph traveling northbound and 14 mph traveling southbound) over the posted speed limit. Speed humps could be designed, permitted and constructed between SW 55th Street and SW 56th Court and between SW 57th Circle and SW 59 Street. The first mentioned segment of the study roadway is about 1,000 feet long without any driveways along the east side of the road, and the last-mentioned segment is about 850 feet long without any driveways or significant access areas. Speed humps are a relatively low cost solution and allow for the reduction of travel speeds. Due to the proximity between the SW 113th Avenue and Hiatus Road studies segments, **Figure 47** includes the recommended locations for the traffic calming improvements. Please refer to **Figure 45** for additional details regarding the proposed traffic calming treatments along the Hiatus Road study corridor.

SW 87th Avenue – SW 51st Court to Griffin Road

The 85th percentile speed along the study segment is **8 mph** (9 mph traveling northbound and 7 mph traveling southbound) over the posted speed limit. A raised intersection or speed table with textured pavement could be designed, permitted, and constructed at the intersection of SW 87th Avenue and SW 87th Terrace. A raised intersection would allow for reduced travel speeds along the SW 87th Avenue corridor. **Figure 48** is an aerial image of the SW 87th Avenue corridor segment identifying the recommended location of the traffic calming improvements. Please refer to **Figures 43 and 44** for additional details regarding the proposed traffic calming treatments along the study corridor.

Figure 48 SW 87th Ave. Recommended Location of Proposed Traffic Calming Improvements

SW 49th Street – SW 90th Avenue to SW 88th Terrace

The 85th percentile speed along the study segment is 8 mph (7 mph traveling eastbound and 9 mph traveling westbound) over the posted speed limit. A raised intersection or speed table with textured pavement could be designed, permitted, and constructed at the intersection of SW 49th Street and SW 89th Terrace. A raised intersection would allow for reduced speeds along the SW 49th Street corridor segment. **Figure 49** is an aerial image of the SW 49th Street corridor segment identifying the recommended locations for the traffic calming improvements. Please refer to **Figures 43 and 44** for additional details regarding the proposed traffic calming treatments along the study corridor.

Figure 49 SW 49th St. Recommended Location of Proposed Traffic Calming Improvements.

SW 51st Street- SW 92nd Terrace to SW 90th Avenue

The 85th percentile speed along the study segment is **7 mph** (6 mph traveling eastbound and 8 mph traveling westbound) over the posted speed limit.

Figure 50 SW 51st St. Recommended Locations of Proposed Traffic Calming Treatments.

The proposed improvement includes design, permitting and installation of a combination raised speed table and enhanced crosswalk. This traffic calming improvement is located at the existing crosswalk east of SW 91st Avenue which connects to the sidewalk that provides pedestrian access to Cooper City Elementary School. Speed tables are often designed using pavers or other distinctive hardscape materials. Distinctive hardscape materials may require additional maintenance responsibilities but do help to highlight and define the speed table for both bicyclists and pedestrians. **Figure 50** is an aerial image of the SW 51st Street corridor. **Figure 51** depicts a sample raised speed table at a crosswalk per NACTO.

Figure 51 NACTO Speed Table.

SW 52nd Street – SW 90th Avenue and SW 88th Terrace

The 85th percentile speed along the study segment is **7 mph** (9 mph traveling eastbound and 4 mph traveling westbound) over the posted speed limit. The installation of a speed hump is recommended between SW 89th Way and SW 89th Terrace. This roadway segment is about 650 feet long with numerous residential driveways on both sides of the corridor. Careful consideration should be given to the placement of the speed hump as to not directly interfere with vehicular traffic from the existing driveways. Speed humps are a relatively low-cost solution and allow for the reduction of travel speeds. **Figure 52** is an aerial image of the SW 52nd Street corridor segment identifying the recommended locations of the traffic calming

Figure 52 SW 52nd St. Recommended Locations of Traffic Calming Treatments

improvements. Please refer to **Figures 44** for additional details regarding the proposed traffic calming treatments along the study corridor.

SW 122nd Avenue- SW 49th Street to SW 55th Street

The 85th percentile speed along the study segment is **6 mph** (5 mph traveling in the northbound direction and 7 mph traveling in the southbound direction) over the posted speed limit.

There are three existing (3) speed humps along this segment of the corridor. The highest 85th percentile was observed traveling southbound at 7 mph over the posted speed limit of 25 mph. There are still some concerns about travel speeds which is probably due to the long corridor segments without any driveways or significant access points. The addition of textured pavement at grade level at the intersections of SW 122nd Avenue and SW 51st Street as well as SW 122nd Avenue and SW 53rd Street may assist the drivers with changes in the driving environment. **Figure 53** is an aerial image of the SW 122nd Avenue corridor segment identifying the recommended locations of the potential traffic calming improvements along with the existing speed humps along the corridor.

Figure 53. SW 122nd Ave.Recommended Locations of Traffic Calming Treatments

Stonebridge Parkway – NE Lake Boulevard to SE Lake Boulevard

The 85th percentile peed along the study segment is **7 mph** (9 mph traveling in the northeast direction and 4 mph traveling in the southwest direction) over the posted speed limit. A speed hump could be designed, permitted, and constructed between Dockside Drive and Anchor Way. This segment of the road is about 700 feet long without any driveways or significant access areas. Speed humps are a relatively low-cost solution and allow for the reduction of travel speeds. **Figure 54** is an aerial image of the Stonebridge Parkway corridor segment identifying the recommended

locations of the traffic calming improvements. Please refer to **Figure 45** for additional details regarding the proposed traffic calming treatments along the study corridor.

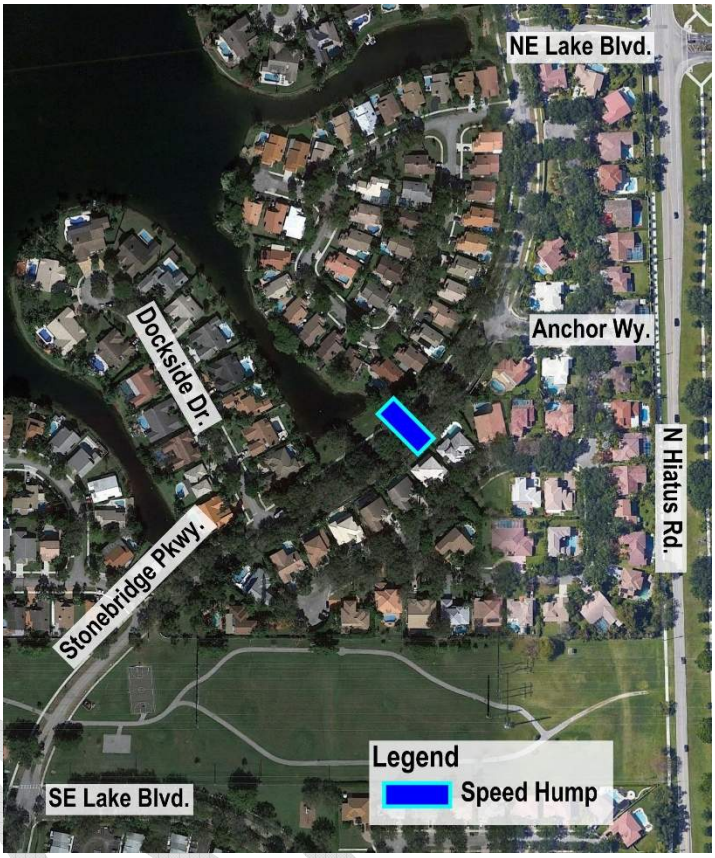

Figure 54 Stonebridge Pkwy. Recommended Locations of Proposed Traffic Calming Treatments.

SW 118th Avenue- Griffin Road to SW 49th Street

SW 118th Avenue is one of the corridor segments with higher than expected 85th percentile average speed and with average daily traffic over the 3,000 vehicular thresholds provided as a guidance by the Florida Greenbook. The 85th percentile speed along the study segment is **9 mph** (5 mph traveling in the northbound direction and 12 mph traveling in the southbound direction) over the posted speed limit. The average daily traffic was determined to be 4,592 which is over the Florida Greenbook threshold. For corridors with larger than recommended vehicular thresholds, other safety improvements may be considered in attempt to reduce the traveling speed along the corridor, such as, lane narrowing strategies with either raised landscaped medians that may require the completion of an access management studies or with pavement markings which may not be as efficient as other vertical treatments. For this corridor segment, the installation of a roundabout can be considered at the SW 49th Street and SW 118th Avenue intersection. While Roundabouts have sometimes been considered traffic calming features, they are primarily traffic control measures. The installation of a roundabout would require the

completion of an operational analysis and approval from Broward County Traffic Engineering Division. In addition to the roundabout, textured pavement at grade level at the SW 118th Avenue and SW 48th Street intersection may assist drivers with changes in the driving environment.

Figure 55 is an aerial image of the SW 118th Avenue corridor segment identifying the recommended locations of the mentioned improvements. **Figure 56** depicts the key roundabout characteristics as per NCHRP.

Figure 55 SW 118th Ave. Recommended Locations of Proposed Improvements

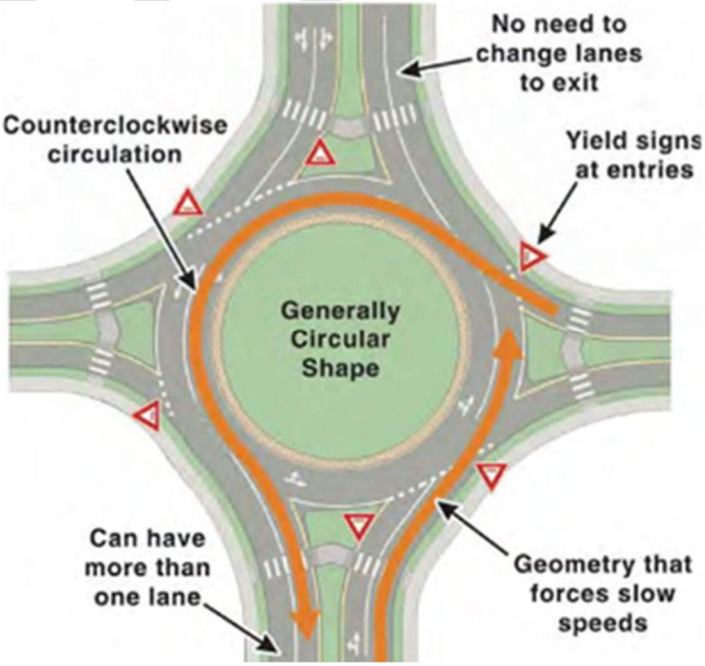

Figure 56 NCHRP Report 672 Roundabouts an Informational Guide

Figure 57 At Gade Level Texture Pavement/Stamp Asphalt through intersection

SW 106th Avenue- Stirling Road to Griffin Road

SW 106th Avenue is one of the corridor segments with higher than expected 85th percentile speed and with average daily traffic way over the 3,000 vehicular thresholds provided as a guidance by the Florida Greenbook. The 85th percentile speed along the study segment is **12 mph** (13 mph traveling in the northbound direction and 11 mph traveling in the southbound direction) over the posted speed limit. The average daily traffic was determined to be 5,175 which is over the Florida Greenbook threshold. For corridors with traffic volumes which are higher than the recommended traffic volume thresholds, other safety improvements may be considered in attempt to reduce the travel speed along the corridor. At grade Lane narrowing strategies with raised landscaped medians can be considered and would require the completion of an access management study. There also could be pavement marking treatments which may not be as efficient as other vertical treatments. The installation of a roundabout can be contemplated mid-way along the road segment at the SW 106th Avenue and SW 51st Street intersection.

While Roundabouts have sometimes been considered traffic calming features, they are primarily traffic control measures. The installation of a roundabout would require the completion of an operational analysis and approval from Broward County Traffic Engineering Division. In addition to the roundabout, textured pavement at grade level at the SW 106th Avenue and SW 57th Place, and SW 106th Avenue and SW 49th Place intersections may assist drivers with changes in the driving environment. **Figure 58** is an aerial image of the SW 106th Avenue corridor segment identifying the recommended location of the improvements. Please refer to **Figure 56 and 57** for additional details of the proposed corridor improvements.

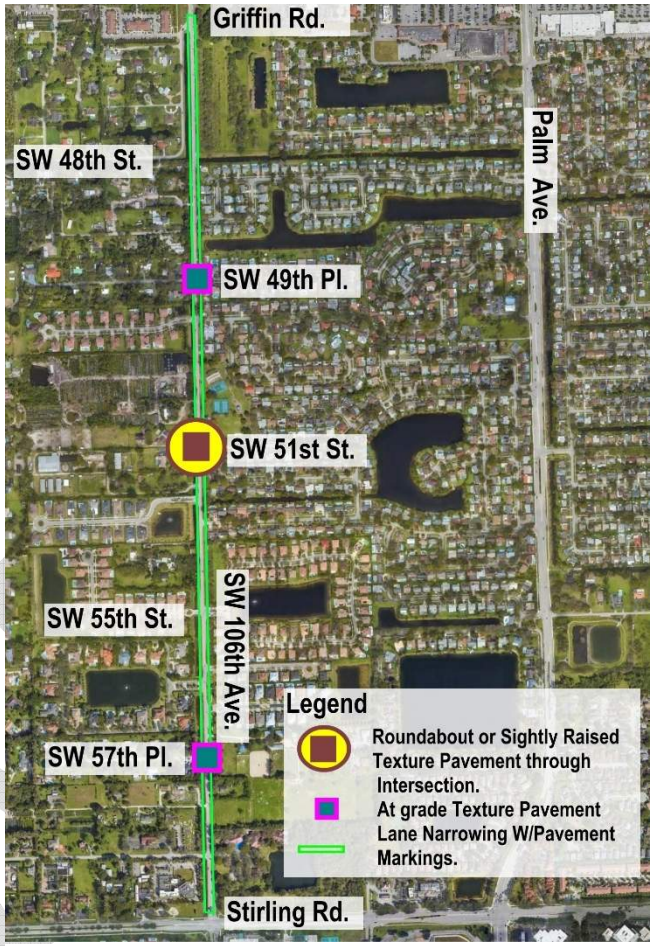

Figure 58 SW 106 Ave Proposed Location of Improvements

SW 52nd Street – SW 94th Avenue and SW 95th Avenue

SW 52nd Street is one of the corridor segments with higher than expected 85th percentile average speed and with average daily traffic a bit over the 3,000 vehicular thresholds provided as a guidance by the Florida Greenbook. The 85th percentile speed along the study segment is **9 mph** (8 mph traveling in the eastbound direction and 9 mph traveling in the westbound direction) over the posted speed limit. The average daily traffic was determined to be 3,194 which into much over the Florida Greenbook threshold. The installation of a speed hump is recommended at approximately 9450 SW. This roadway segment is about 1150 feet long with numerous residential driveways on both sides of the corridor. Careful consideration should be given to the placement of the speed hump as to not directly interfere with vehicular traffic from the existing driveways. Speed humps are a relatively low-cost solution and allow for the reduction of travel speeds. **Figure 59** is an aerial image of the SW 52nd Street corridor segment identifying the recommended location of the traffic calming improvements. Please refer to **Figures 45** for additional details regarding the proposed traffic calming treatment along the study corridor.

Figure 59 SW 52nd St. Proposed Location of Improvements

Based on field reviews completed along the corridor segment it was noticed that the stop bar that services northbound traffic at SW 95th Avenue and SW 52 Street exceed the 30 feet maximum distance requirements from the intersection as per BCTED and MUTCD requirements. It is recommended to relocate this stop bar 10 to 15 feet closer to the intersection.

Stonebridge Parkway – W Lake Boulevard to NE Lake Boulevard

Stonebridge Parkway is one of the corridor segments with higher than expected 85th percentile average speed and with average daily traffic a bit over the 3,000 vehicular thresholds provided as a guidance by the Florida Greenbook. The 85th percentile peed along the study segment is **8 mph** (7 mph traveling in the northeast direction and 8 mph traveling in the southwest direction) over the posted speed limit. For this corridor segment a few treatments are being proposed. A raised intersection or speed table with textured pavement could be designed, permitted, and constructed at the intersection of Stonebridge Parkway and E Sailboat Drive. A raised intersection would allow for reduced speeds along the Stonebridge Parkway corridor. Addition of textured pavement at grade level at the Stonebridge Parkway and N. Lake Boulevard intersection may assist drivers with changes in the driving environment A speed hump could be designed, permitted, and constructed between Forest Hill Drive and the Access Road. This segment of the road is about 800 feet long without any driveways or significant access areas. Speed humps are a relatively low-cost solution and allow for the reduction of travel speeds. **Figure 60** is an aerial image of the Stonebridge Parkway corridor segment identifying the recommended location of the traffic calming improvements. Please refer to **Figures 43, 44 and 45** for additional details regarding the proposed traffic calming treatments.

Figure 60 Stonebridge Pkwy. Proposed Location of Improvements

6.0 CONCLUSIONS & RECOMMENDATIONS

The Corradino Group (Corradino) was retained by the City of Cooper City to complete a city-wide traffic calming study along fifty-one (51) corridor segments within the City. The intent of the traffic calming study is to provide recommendations of traffic calming devices that will potentially improve speeding concerns and related problems identified by the City's local police department, residents and city staff. The traffic analysis and study is limited to public right-of-way roadway corridors. Each road segment location was reviewed to determine if traffic calming improvements are justified, based on eligibility criteria provided in the **Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways**, also known as **The Florida Greenbook**. It should be noted that ***Section 17-38 Public Roads / Article IV – Traffic Calming Devices*** of the City of Cooper City Code of ordinance was also reviewed and discussed with City staff as part of the preparation of this study. Based on conversations with the City staff, it was agreed that the recommended speed and volume thresholds for the installation of traffic calming treatments, as outlined in the **Florida Greenbook,** will be utilized for the purpose of this report.

The analysis of the collected traffic data along with the 5-year crash review was used to identify the corridors where traffic calming treatments could be installed. The following are the conclusions and recommendations of the City-Wide Traffic Calming Study.

1. Based exclusively on the traffic volume and 85th percentile speeds determined from the traffic data collection, traffic calming improvements should be considered at the following road segments:
    - SW 49th Street between Flamingo Road and 118th Avenue
    - SW 118th Avenue between SW 49th Street and SW 52nd Street
    - SW 113th Avenue between Stirling Road and SW 55th Street
    - Hiatus Road between Stirling Road and SW 55th Street
    - SW 87th Avenue between SW 51st Court and Griffin Road
    - SW 49th Street between SW 90th Avenue and SW 88th Terrace
    - SW 51st Street between SW 92nd Terrace and SW 90th Avenue
    - SW 52nd Street between SW 90th Avenue and SW 88th Terrace
    - SW 122nd Avenue between SW 49th Street and SW 55th Street
    - Stonebridge Parkway between NE Lake Boulevard and SE Lake Boulevard
    - SW 52nd Street between SW 94th Avenue and SW 95th Avenue
    - Stonebridge Parkway between W Lake Boulevard and NE Lake Boulevard.
2. The following two (2) roadway segments are City maintained corridors that have 85th percentile speeds that exceed the posted speed limit by over 10 mph on one or both travel directions and traffic volumes that exceed the 3,000 vehicular threshold per Florida Greenbook. These road segments may need additional evaluation depending on the proposed safety improvements.
    - SW 118th Avenue between Griffin Road and SW 49th Street
    - SW 106th Avenue between Stirling Road and Griffin Road
3. It should be noted that there are more than (1) traffic calming improvement that has been identified as a potential solution along several road segment locations. The City may considered to install temporary traffic calming features at one, some or all locations within a study segment and monitor these for a period of time before installing the permanent traffic calming devices, as one improvement may provide the desired reduction of vehicular travel speed which is unique to the traffic patterns for the specific neighborhood as a whole. The list of the proposed recommended improvements ranked by the calculated crash rate of the study segment are summarized in **Table 7.** A planning level opinion of probable costs for the proposed improvements is provided in **Table 8.** The unit cost reflects the estimate of the cost of constructing the improvement. The total cost includes

DRAFT

a contingency of 15 % of the base unit cost and 30 % for design, permitting and mobilization of the base unit cost.

4. A public outreach meeting/workshop should be scheduled prior to implementation of any of the proposed traffic calming improvements. The workshop should include a presentation which provides details regarding the traffic data collection and analysis, preliminary recommendations and include resident feedback and dialogue among all of the key stakeholders including the impacted local residents.

5. Local police, fire departments and EMS personnel should be involved while developing the preferred design for the traffic calming improvements including speed humps and roundabouts.

6. Relocate the existing northbound stop bar at the intersection of SW 52nd Street and 95th Avenue 10 to 15 feet closer to the intersection. Based on field measurements obtained, the existing location of this stop bar exceeds the maximum distance requirement from the intersection per Broward County Traffic Engineering Division (BCTED) Pavement Markings & Signs Details and the Manual of Uniform Traffic Control Devices (MUTCD).

DRAFT
