

## REGULAR CITY COUNCIL MEETING

April 19, 2022 at 5:30 PM

Council Meeting Room, 101 North State Street,  
Abbeville, Louisiana 70510

---

### AGENDA

**NOTICE POSTED:** April 18, 2022 at 4:00 P.M.

#### REGULAR ORDER OF BUSINESS

Call to Order by Mayor  
Roll Call by Kathy Faulk  
Prayer  
Pledge

#### PERSONNEL

#### PUBLIC COMMENTS

(To allow comments on any of the following items prior to action.)

#### NEW BUSINESS

1. To announce a Community Planning Event for the purpose of visioning the reuse of City Hall to be held on May 5, 2022 - Councilwoman Roslyn White.
2. To adopt a resolution to create a Communications Advisory Committee to assist the Mayor for the purpose of finding Abbeville's bright spots and narrating the story of our community - Councilwoman Roslyn White.
3. To approve payment of estimate for partial payment #4(final) in the amount of \$18,264.18 payable to Patriot Construction & Industrial, LLC for the LaFlitte Drive-In Park Walking Trail Project.
4. To ratify the purchase of transformers for stock from Techline Utility Supply in the amount of \$27,383.00.
5. To approve the purchase of a multi-tool from Delta Fire in the amount of \$12,217.00 for the Fire Department. A portion of this will be paid by the Abbeville Rotary Club - Chief Jude Mire.

#### OLD BUSINESS

1. None.

#### TOPICS FOR DISCUSSION

1. Council Members

#### ADJOURN

In accordance with the Americans with Disabilities Act,  
if you need special assistance, please contact  
Mayor Mark Piazza's office at 337-893-8550,  
describing the assistance that is necessary.

**ESTIMATE FOR PARTIAL PAYMENT NO. 4 (Final)**

Attn: Abbeville Fire Department

Please be advised that AMKUS Rescue Systems operates through a dealer network to provide our customers with the best and most efficient service. Each dealer is assigned a specific territory. That dealer is responsible for the customers in the given territory for all AMKUS sales and service.

The dealer is responsible for maintaining an inventory of spare parts to provide quick service to the customers in their territory. The dealer is responsible for installation, service, repair, maintenance and upgrading of the products in their territory using only genuine AMKUS parts.

Please be advised that Louisiana Emergency Equipment (DBA Delta Fire & Safety) (888-944-4911), is presently our representative for the sales and service of AMKUS Rescue Systems for Abbeville Fire Department. Please set them up as your authorized sales and service location.

If I may be of further assistance, please do not hesitate to call, 1-800-592-6587.

Best regards,

*Jennifer Lemmon*

## AMKUS ION ICT716 Battery Combi Tool

### Technical Specifications

The vendor shall be responsible for all labor, materials, training, coordination, shipping, transportation and inessentials necessary to deliver battery powered hydraulic cutters, combi's, and spreaders, on an as needed basis, to be used in rescue extrication in accordance with the specifications listed below for each tool.

### Battery Powered Hydraulic Combi Tool Specifications

The tool consists of a hydraulically operated piston that symmetrically drives mechanical linkages to open or close two cutter blades/spreader arms. Hydraulic power for the tool is generated internal to the tool via a 4- stage hydraulic pump that is operated by a brushless 2200-watt, 60-volt electric DC motor. The DC motor is powered by a 60-volt (maximum initial voltage) DEWALT® lithium ion battery. Batteries shall be interchangeable between rescue tool and over 200 DEWALT FLEXVOLT™ and 20V Max cordless tools.

- The tool shall be equipped with two LED lights integrated into the forward handle to facilitate work under low light conditions. The lights shall have 3 intensity levels (low, medium, high). The lights shall be fully isolated from the rescue tool battery and be powered using 2 commonly available AA batteries.
- The LED lights shall be controlled by a single switch located on the rotating handle.
- The lights shall be designed to automatically turn off after 15 minutes of inactivity.
- The forward handle shall rotate 360 degrees to allow the operator to easily reposition the tool during use and to allow the handle to be moved out of the way during use.
- The cylinder, body and housing of the tool shall be made of aluminum alloy for its lightweight, strength, and durability.
- The housing that encloses the motor and pump shall not be constructed of plastic or other non-metallic materials due to the inferior durability and heat dissipation properties of these materials.
- The tool electric motor shall be a minimum of 2hp to maximize durability during extended use/rescues.
- The combi shall automatically turn off after no less than 20 minutes of inactivity.
- The battery shall be located on the top of the tool between the forward and rear handles for easy installation/removal and to protect the battery during operation. Batteries mounted at rear of tool are unacceptable.
- The combi will include blades that are constructed of solid machined tool steel.
- Blade linkages shall be covered by rubber guard for safety.

- The tool shall include the following safety features:
  - The combination tool will have removable spreading tips for enhanced cutting performance.
  - Center bolt heads are flush with tool allowing to fit into tight spaces during operation.
  - A pilot check valve to prevent accidental movement of the spreader arms in the event of power loss.
  - A "dead man" actuator, whereby the unit stops functioning when the operator releases hand or thumb pressure from the actuator.
  - A pressure relief valve preventing over pressurization.
  - A pressure port that allows a technician to check the output pressure of the pump during routine maintenance.
- The maximum nominal operating pressure of the tool shall be 10,500 psi (725 bar).
- The tool shall have Highest Spreading Force (HSF) of 7,830 lbs. (34.8 kN).
- The tool shall have Lowest Spreading Force (LSF) of 6,460 lbs. (28.7 kN).
- The tool shall have a maximum spreading force of 320,000 lbs. (1423 kN).
- The tool shall have a maximum spreading distance of 15.6 inches (396 mm).
- Cutting classification should be no less than A7/B8/C7/D9/E8/F5 as defined in NFPA 1936:2020.
- The preferred independent third party for certifying the tools as compliant to NFPA 1936 is Underwriters Laboratory "UL".
- The tool dimensions with the battery shall not be any longer than 36 inches (914 mm), wider than 9 inches (229 mm) or higher than 12 inches (305 mm).
- Weight on the tool shall not exceed 59 lbs. (26.8 kg) excluding battery.

#### Battery and Charger Specifications

- The battery shall be a Lithium Ion type battery.
- Due to availability and versatility over a wide range of tools such as, but not limited to, saws, drills, air compressors, etc. Only non-proprietary battery platforms shall be accepted.
- The battery shall be readily available at retail stores within 50 miles (80 km) of Fire Department.
- The nominal electrical voltage supplied by the lithium ion battery shall not be less than 60.0 volt (maximum initial voltage).
- Though a 12 Ah battery is desired, each of the tools shall be capable of utilizing a DEWALT FLEXVOLT 60 volt 6, 9- or 12-amp hour battery.
- Using an adapter to enable connection of a DEWALT FLEXVOLT battery to another battery manufacturer's mounting platform is unacceptable.
- The battery shall have a display to illustrate the level of charge.
- Combined, the battery and charger shall recharge the battery without causing harm from excess charging.
- The battery shall have a warranty of no less than 3 years from date of purchase.
