WORKFORCE DEVELOPMENT

The GCVCC has been awarded a new Workforce Development Grant with the County of Riverside Workforce Development for \$125,000.

• This grant will allow the GCVCC to assist local businesses in bringing on new employees with their pay covered up to \$20 per hour for the first 90 days of employment as well as workforce and grant training.

n 4.

NEW PARTNERSHIPS

- GCVCC for the first time was an in-kind sponsor of the Palm Springs International Film Festival (PSIFF) and the supporting partner of the PSIFF Family Day which was held at the Mary Pickford Theatre on January 14, 2024. GCVCC assisted the PSIFF in getting local food trucks to participate in the free event as well as marketing and promotion.
- GCVCC also for the first time is a patron sponsor of the Desert Town Hall series. This partnership supports our mission of advocacy and further education.

City Council Closed Session and Regular Meeting

Minutes Page 5

Brad Anderson was present to hear the IDD proposal, commended city council for taking care of the people in their community.

Anetha Lue, representative from South Coast AQ Management District Eastern, also a part of Coachella Valley AB 617 Environmental Justice Group. Announced that pre-residential air filters will be available on website AQMD.GOV.RAF at first come first serve basis. Residents need to fill application.

Frankie Morales has an issue with code enforcement, he received a notice of violation because he had his toy hauler/trailer parked, was charged for parking and storage of commercial motor vehicle code 17.45-010 (M). He argues that his toy hauler is not considered a vehicle.

Daniel Wong community liaison with South Coast AQMD 617 echoed Anetha Lue's comments regarding AB617 residential air filtration program.

REPORTS AND REQUESTS:

Council Comments/Report of Miscellaneous Committees.

Dr Figueroa announced he had the Mosquito Vector Control meeting this week and he invited the council and staff to attend the tour of the facilities. He attended a tour LGBTQ Legislative Caucus and toured with Palm Springs GP Health Clinic. Next week is the Rancho Las Flores public outreach and Vist Escondido grand opening.

Councilmember Delgado had no comments.

Councilmember Galarza confirmed that residents can apply online at AQMD.GOV/RAF. Sidewalks need a lot of landscaping on Ave 52 and 53, he is concerned of grass growing and that wheelchairs/strollers can't access them.

Councilmember Virgen wants to bring back item about looking for land to potentially find partners and bring an early childhood education center, to create a list to identify specific projects to do community benefit. She requested staff update on ARPA funding and allocation of monies as deadlines are coming up so they can have an idea where to allocate funds.

Mayor Hernandez requested staff update on the Dillon and Van Buren project and schedule. He also requested an update on the replacement of shade structures and tree replacements in Bagdouma Park.

City Manager's Comments.

City Manager announced Suavecito Sunday at Veterans Park on Sunday at 4:00 pm, 4th District State of the County on Monday at 7:30 at Fantasy Springs, commended Code Enforcement and entered CVAG has placed 5 unsheltered residents of Coachella into the program. Shout out to the Planning Department and Building & Safety for the successful ADU workshop. Lift to Rise asked the City to join their panel for the 2024 Planning Association California State conference.

ADJOURNMENT:

There being no further business to come before the City Council and the Agencies, Mayor Hernandez adjourned the meeting at 7:38 p.m.

Angela M. Zepeda, City Clerk

STAFF REPORT 3/27/2024

То:	Honorable Mayor and City Council Members	
FROM:	Ruben Ramirez, Controller	
SUBJECT:	Investment Report – December 31, 2023	

STAFF RECOMMENDATION:

Staff recommends that the City Council receive and file the investment report for December of 2023.

EXECUTIVE SUMMARY:

On June 28, 2023, the City of Coachella along with its component units (Sanitary District, Educational & Governmental Access Cable Corporation, Fire Protection District and Water Authority) approved and adopted the current "Statement of Investment Policy".

Pursuant to Section 16 of that policy, the City Treasurer shall provide to the City Council a monthly investment report which provides a clear picture of the status of the current investment portfolio. This report shall include, at a minimum, the following information for each type of investment held in the City's investment portfolio: the issuer; amount of investment; current market value; yield on investment; income generated from investments; dollar amount invested on all securities, investments and moneys held by the local agency; and shall additionally include a description of any of the local agency's funds, investments, or programs; and a description of unusual investment activity or developments during the month for which the report is prepared. This information shall be provided for all City and component unit pooled investments, as well as for bond accounts, which are managed by outside Fiscal Agents.

The interest rates presented are the most current rates available as of the date of these reports. The market values presented for pooled City investments are based on closing prices for the related investments as of the date of these reports. This information was obtained from the Wall Street Journal or other reliable sources of market prices.

The Market values presented for investments managed by fiscal agents are based on amounts reported by the fiscal agent on their investment statements. The purchase date and type of investment are not included for funds held by fiscal agents.

Attached is the Treasurer's Report of Investments which includes an overview on investments which provides information on investment activity, withdrawals and deposits, interest earned, payment of interest and payment of principal as of the months ended December 31, 2023. In addition, this report includes detailed information and current activity on individual investments.

All City investments are in compliance with the guidelines established for Authorized Investments as specified in the Investment Policy, Section 8.

There was no unusual investment activity to report.

The City and Districts have sufficient moneys to meet their expenditure requirements for the next six months.

FISCAL IMPACT:

None, this report is receive and file only.

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Jason Stevens, IT ManagerSUBJECT:Authorize the purchase of an Axis corporate yard video camera server for the
amount of \$30,344.60.

STAFF RECOMMENDATION:

Staff recommends that the City Council authorize the purchase of equipment and services to facilitate an upgrade and replacement to the cities private camera server and surveillance system in a phased approach from Computer Consultants estimate 6877, PO number 16990 for the amount of \$30,344.60.

BACKGROUND:

The City of Coachella's building structures currently have end of life and no longer supported stand-alone DVR/NVR (digital video recorder / network video recorder) camera systems at all of our primary facilities. While they are still functioning, there is not an ability to add additional cameras to locations where there is a current need to do so. Additionally, the recording times of these DVR's is generally no longer than 60 days. If a request for camera footage is made older than 60 days the IT department is not able to accommodate the request. The one exception to this is the City of Coachella Public Library which was installed more recently, however this unit also is no longer under support and also has the limitations of a stand-alone DVR/NVR recording times.

The primary need instigating this project is a need to add additional cameras at the Corporate Yard location in order to provide additional coverage of payment processing areas. It was attempted to add additional cameras which was not successful.

DISCUSSION/ANALYSIS:

With this need in mind, the IT department began an investigation and evaluation process in order to see what the best long-term approach and solution would be to address the immediate need of adding additional cameras to the Corporate Yard location but also to address the unsupported stand-alone state of other buildings and facilities. The first option was to simply replace the stand-alone DVR/NVR unit at the Corporate Yard location with a newer model and then add the additional cameras. The cost for a 16-channel system with cameras would be around \$4,000 not including installation. Staff does not recommend this solution as the warranty period and future supportability would remain in an insufficient level and the city would run into the same issues in the future repeating a similar solution. The performance of the cameras for this turnkey DVR/NVR solutions are also not at an adequate level as compared to more professional commercial grade solutions. These stand-alone DVR/NVR systems also have limited storage capabilities not allowing for longer period recording timeframes as other solutions.

The second option that was evaluated was transitioning to a fully cloud based camera system. Multiple vendors were contacted and one vendor responded and began engaging in demoing of their product and solutions which was Verkada. Multiple other cities in the valley are currently using Verkada as their city-wide camera solution. Multiple indoor and outdoor cameras were tested as well as their cloud platform. During the testing it was determined that Verkada only has a limited amount of physical camera solutions (6 at the time) and their performance especially under low light conditions was average to below average. Staff worked with Verkada support for beta firmware's in order to improve performance which was not effective in improving performance.

A benefit of a fully cloud based solution is there are no local servers or systems to host and support and all upgrades are handled by the cloud provider. Another benefit is AI based detection and security service features that are either currently offered or can be added to the platform in the future. A negative to a fully cloud based solution is the service and subscription costs are continual and perpetual and based on the amount of recording days video footage that should be retained. Another negative is that video footage cannot be easily archived back down on premise for a personally/city owned copy of the footage.

The city did receive an estimate from Verkada for a city-wide solution of 52 cameras and 90 days of cloud storage. The initial total projected cost was estimated at \$260,167.68 with yearly annual subscription costs at \$47,979.84. These costs are only to provide 90 days of recording footage. If a recording time frame of 6 months or 12 months is desired which can be accommodated, the costs of this project and annual subscription rates would triple if not more. Due to the average/below average performance of the cameras and costly annual subscription fees IT staff does not recommend this solution.

The third option is to deploy an on-premise local camera server that would serve the entire city and all locations. Multiple vendors were approached and one responded with an estimate for an Axis camera server solution. The vendor Computer Consultants is the cities currently contracted managed solution provider currently providing multiple IT services to the City of Coachella. A benefit of a local on-premise camera server is the city would not be limited by storage space (can be easily expanded) thus recording time will easily extend to 6 months if not a year. Usage of the system would not be subject to continual annual subscription charges. Additionally, Axis has hundreds of different camera models and solutions so the city would not be limited in the cameras scope and capabilities. In testing of different Axis camera models their performance are in the top tier especially in low light conditions as well as PTZ and specialized models. In discussions with Computer Consultants it was recommended to employ the heart or brains of the camera system that being the primary Axis camera server and then install the needed cameras at the Corporate Yard location initially. As need and budgets dictate additional locations can then have their cameras upgraded on a site by site phased approach making it more economical for the city to absorb and plan for. The estimate for the 96TB Axis camera server, three cameras and installation totals \$30,344.60.

ALTERNATIVES:

- 1. Elect to upgrade the DVR/NVR at Corporate Yard with a newer model and add cameras.
- 2. Elect to go with a cloud-based camera system such as Verkada or other.
- 3. Not authorize this upgrade at this time.

FISCAL IMPACT:

Should the City Council approve the staff recommended system the funds would be allocated from the General Fund Unreserved fund balance totaling \$30,344.60 to increase the budget in account 101-11-161-90-741-000

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Jason Stevens, IT ManagerSUBJECT:Network Server Upgrade Procurement

STAFF RECOMMENDATION:

Staff recommends that the City Council authorize the purchase of three new host servers through Computer Consultants estimate number 6962 PO number 16991 for the amount of \$32,458.61.

BACKGROUND:

The City of Coachella employs numerus physical on-premise hosting servers to host multiple virtual machine servers that are used to provide IT applications and resources for the staff to provide city services. It is important to have the proper capacity, performance and redundancy of the underlying hosting servers in order to adequately provide reliable and efficient IT resources. The IT department budgets for annual review, replacement and upgrade of our critical IT infrastructure. The cities hosting infrastructure consists of primary host servers, replication host servers and backup host servers both onsite and offsite.

Currently, the cities replication servers are about 8 years old and oversubscribed. If there was a need to perform a failover of one or more virtual servers while the process would work there would be a significant performance impact to city operations. The phased migration process is when new servers are introduced those new servers are deployed as primary host servers. Then the previous or current host servers are transitioned to be replication servers. The older replication servers are then retired and recycled accordingly. IT cannot currently guarantee in the event of a failover incident that city operations would not be impacted in terms of performance and availability.

DISCUSSION/ANALYSIS:

Upon review, monitoring and inspection the city is currently in need of three additional servers in order to provide the capacity and performance needed for full redundancy of Hyper-V replication and hosting services. The City of Coachella utilizes our contracted managed IT solution provider Computer Consultants for procurement of the cities hosting servers for about 18 years now. Typically, the process is that new servers are added to the server pool as the live primary hosts, and then those older hosts are transitioned into replication or backup servers.

ALTERNATIVES:

1. Not authorize this system at this time

FISCAL IMPACT:

Should the City Council approve the staff recommended upgrade the funds would be allocated from the General Fund Unreserved fund balance totaling \$32,458.61 to increase the budget of account 101-11-161-90-741-000.

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Jason Stevens, IT ManagerSUBJECT:Authorize the purchase of 5 Dell Precision workstations and 1 Dell Aurora R16
workstation for the amount of \$9,150.34

STAFF RECOMMENDATION:

Staff recommends that the City Council authorize the purchase of 6 additional Dell workstations which includes one high performance CAD workstation for the amount of \$9,150.34.

BACKGROUND:

The City of Coachella currently utilizes Dell workstations for city staff use. Due to recent additional staff hiring's and new positions added the IT department has depleted available on-hand and available new systems in order to be able to deploy new systems. In addition, there are multiple staff users who perform very extensive CAD and ArcGIS work requiring a higher performance workstation.

The city every 3 years typically performs a full city-wide lease purchase agreement with Dell Financial Services to recycle and upgrade all city workstations. This lease has ended and all Dell equipment is currently free and clear however it is not recommended at this time to perform another DFS lease agreement for a city-wide workstation replacement. The reason is for the majority of users their current systems are working adequately and while the IT department did budget for a city-wide replacement we would like to try to get 1 or 2 more years of service out of the existing systems for the average or general staff user. There are other more heavy and demanding users who are experiencing some slowness and performance issues in performing their day to day activities on their systems.

DISCUSSION/ANALYSIS:

Of these six systems, 5 will be put into IT stock while the 6th system will be a high-performance workstation destined for a staff user utilizing system intensive applications of CAD and ArcGIS.

ALTERNATIVES:

- 1. Submit this item for the next budget cycle
- 2. Not authorize this purchase at this time
- 3. Direct staff to perform a renewal of the full city wide DFS Lease replacement program

FISCAL IMPACT:

Should the City Council approve the staff recommended system the funds would be allocated from the General Fund Reserves totaling \$9,150.34 from account 101-11-161-90-611-000.

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Jason Stevens, IT ManagerSUBJECT:Authorize the purchase and installation of a dual language HD Swagit camera
and streaming system for the City of Coachella Council Chamber for the amount
of \$81,444.25

STAFF RECOMMENDATION:

Staff recommends that the City Council authorize the purchase of equipment and services to facilitate an upgrade and replacement of the City of Coachella Council Chamber Swagit video production system to HD and dual language streaming for the amount of \$81,444.25

BACKGROUND:

The current Granicus / Swagit video production system in the Council Chamber is going on 10 years old. It is a composite video system (480 resolution) and is of low quality. The pan tilt zoom (PTZ) cameras are no longer sold, end of life and are not in supply. If any of these cameras were to fail replacement would be very unlikely. In addition to this, current livestreaming of meetings to our website and once posted online for video on demand is only available in English. The city currently offers Spanish translation but only on Zoom during the meeting. Video production, indexing and hosting is being performed by Granicus / Swagit as has been being performed for over 10 years now.

DISCUSSION/ANALYSIS:

With this need in mind staff has worked with Granicus / Swagit to design and engineer an upgrade that will provide video in 1080P high definition resolution as well as dual language encoding and streaming. This will allow residents and others to watch meetings live in either English or Spanish but also to view meetings on our video on demand service in both English and Spanish along with the indexed agendas accordingly. Spanish translation will still be available for Zoom participants as well.

ALTERNATIVES:

1. Not authorize this upgrade at this time.

FISCAL IMPACT:

Should the City Council approve the staff recommended system the funds would be allocated from the General Fund Unreserved fund balance totaling \$63,280.00 to increase the budget in account 101-11-161-90-741-000 and 18,164.25 to increase the budget in account 101-11-161-90-612-000.

Item 13.

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Jason Stevens, IT ManagerSUBJECT:Authorize the purchase and installation of a Digital Signage System from AVIR
Technologies for the amount of 19,485.00.

STAFF RECOMMENDATION:

Staff recommends that the City Council authorize the purchase of equipment and services to facilitate an installation of a Digital Signage System for the amount of \$19,485.00.

BACKGROUND:

Currently the primary city facilities such as the Council Chamber, Corporate Yard, Civic Center and others have a physical display case where agendas, notices and other publicly posted information is placed. This is done manually by printing out paper, traveling to each site and placing the papers in these display cases. This is inefficient as well as many residents not being able to read the smaller size 8x11 papers.

DISCUSSION/ANALYSIS:

Staff is recommending the installation of three digital signage systems at the Council Chamber, Corporate Yard and Civic Center locations as a start. This will allow staff to post content to these locations remotely and in real time. In addition to normal agenda's and notices, other information content can be added as either videos or pictures for all of the different city events. Live video content can also be displayed on these screens. In the event of an emergency, live updates and information can be displayed all centrally managed and controlled by staff without the need to physically go onsite. Content will be large and easier for residents and visitors to read.

ALTERNATIVES:

1. Not authorize this upgrade at this time.

FISCAL IMPACT:

Should the City Council approve the staff recommended system the funds would be allocated from the General Fund Unreserved fund balance totaling \$19,485.00 to increase the budget in account 101-11-161-90-741-000

STAFF REPORT 3/13/2024

То:	Honorable Mayor and City Council Members
FROM:	Jaime Arroyo, Grants Manager
Subject:	Approve a Community Based Grant to the Coachella Youth Baseball and Softball Association in the Amount of \$1,000

STAFF RECOMMENDATION:

Staff recommends that the City Council consider awarding a Community Based Grant (CBG) to the Coachella Youth Baseball and Softball Association in the amount of \$1,000.00 to purchase new equipment.

BACKGROUND:

The Community Based Grant Program was established in 2010 and allows the City of Coachella to offer financial assistance to local nonprofit organizations, schools, youth-serving organizations, and other community-based organizations that provide essential services, programs and activities to residents in Coachella. Applicant organizations are only eligible to submit one application for consideration each fiscal year and must be legally established with non-profit or tax-exempt status, be based in the Coachella Valley, or provide direct service to Coachella residents. Approval of grant funds does not constitute a precedent for grant allocations in subsequent years. All CBG grants are reimbursement grants to ensure that applicants are meeting their stated goals. The FY 23-24 budget includes an allocation of \$15,000 for the Community Based Grant Program.

DISCUSSION/ANALYSIS:

The Coachella Youth Baseball and Softball Association is a 501(c)(3) nonprofit organization that is dedicated to fostering sports competition amongst youth. The Association is requesting grant funding support to purchase new equipment (see application and budget).

ALTERNATIVES:

- 1. Award a Community Based Grant in the amount of \$1,000.00.
- 2. Do not award a Community Based Grant

FISCAL IMPACT:

If the Council approves the staff recommendation, the Community Based Grant account will be reduced by \$1,000.00.

COACHELLA YOUTH BASEBALL & SOFTBALL INC C/O ASSOCIATION INC 84-076 CALENDULA AVE COACHELLA, CA 92236

Employer Identification Number: 80-0360619 DLN: 17053288310025 Contact Person: ID# 31657 MS. TRUSTY Contact Telephone Number: (877) 829-5500 Accounting Period Ending: September 30 Public Charity Status: 509(a)(2) Form 990/990-EZ/990-N Required: Yes Effective Date of Exemption: October 9, 2015 Contribution Deductibility: Yes Addendum Applies: No

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

Based on the information you submitted with your application, we approved your request for reinstatement under Revenue Procedure 2014-11. Your effective date of exemption, as listed at the top of this letter, is the postmark date of your application.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt

STAFF REPORT 3/27/2024

To: Honorable Mayor and City Council Members

FROM: Andrew Simmons, P.E., City Engineer

SUBJECT: Amendment #1 to the Professional Service Agreement with Alta Planning + Design, Inc. in the amount of \$41,785.00, and authorize appropriation of \$82,010.00 from Fund 101 (General Fund) for Professional Engineering Services for the Connect Coachella Project, City Project ST-138.

STAFF RECOMMENDATION:

- Authorize the City Manager to execute Amendment #1 with Alta Planning + Design, Inc. in an amount of \$41,785.00;
- Authorize appropriation of \$82,010.00 from Fund 101 (General Fund) for Professional Engineering Services for the Connect Coachella Project, City Project ST-138.

BACKGROUND:

On June 21, 2022 the City entered into a reimbursement agreement with the Coachella Valley Mountains Conservancy (CVMC), Agreement #38500000P680017, in the amount of \$200,000. The agreement deliverables include a preliminary engineering report (PER) and state-approved CEQA clearances with 50% design drawings and project summary report for the Connecting Coachella Project (Grapefruit Boulevard Urban Greening Phase II), project No. ST-138. This will provide a complete project approval and environmental document (PA&ED) phase package. The City is actively seeking funding to complete the construction phase, a complete PA&ED package will strengthen future grant applications.

DISCUSSION/ANALYSIS:

In March 2023, City Council awarded a Professional Service Agreement to Alta Planning + Design, Inc. (Alta) to provide the PA&ED package for the Connect Coachella Project, in the amount of \$240,225. This value was \$40,225 above the maximum grant reimbursement. The PA&ED package is currently under review and nearly complete. City Staff has been preparing for the Active Transportation Program (ATP) Cycle 7 Grant Call for Projects expected in March 2024. Based on ATP workshops and feedback from the California Transportation Committee (CTC) on previous applications, to provide the strongest and most complete package the City has requested Alta provide additional support services for the grant application.

The additional services will include community engagement workshops and outreach events to increase the public engagement. It would also provide additional maps and renderings for the grant application, as well as, extra support with the grant application in its' entirety. Alta has had success with the ATP grant and provided support services for many public agencies. City Staff recommends approving Amendment #1 to provide the additional services.

FISCAL IMPACT:

With this action, City Council authorizes the appropriation of \$82,010.00 from Fund 101 (General Fund) to Fund 182 (CIP Project Fund). This amount includes both the value of Amendment #1 of \$41,785 and the value of the non-grant reimbursable portion of the original contract totaling \$40,225.

ATTACHMENTS:

- 1. Cost Proposal
- 2. Amendment #1 Alta Planning and Design, Inc.

FIRST AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF COACHELLA AND ALTA PLANNING + DESIGN, INC.

THIS FIRST AMENDMENT ("Amendment") is made and entered into as of March 27th, 2024 by and between the City of Coachella ("City") and Alta Planning + Design, Inc. ("Consultant"). In consideration of the mutual covenants and conditions set forth herein, the parties agree as follows:

- 1. <u>**RECITALS.**</u> This Amendment is made with the respect to the following facts and purposes:
 - a. On or about March 8th, 2023 the City and Consultant entered into that certain agreement entitled "City of Coachella Professional Services Agreement" between the City and Consultant to provide engineering design, and other services for the Connect Coachella Project ST-138 in the amount of \$240,225.00.
 - b. The parties now desire to amend the Agreement as set forth in this Amendment.

2. <u>AMENDMENT.</u>

3.1 <u>General Scope of Services.</u> Section 3.1.1 of the Agreement is hereby amended to include the additional Scope of Services to be performed for the Connect Coachella Project, ST-138 under this Amendment No. 1 referenced as EXHBIIT "A".

3.2 <u>Performance Period.</u> Section 3.1.2 of the Agreement is hereby amended to go into effect on March 27, 2024 contingent upon approval by City, and Consultant shall commence work after notification to proceed by City's Agreement Administrator. The Agreement shall end on June 30, 2024, unless extended by Agreement Amendment.

3.3 <u>Allowable Costs and Payments.</u> Section 3.3.1 of the Agreement is hereby amended to increase the compensation, including authorized reimbursements, for all services rendered under this Agreement as set forth in EXHIBIT "B" attached hereto and incorporated herein by reference.

The method of payment in Sections 3.3.1.A and B of the Agreement are hereby amended to actual cost plus a ten percent (10%) fixed fee. City will reimburse Consultant for actual costs (including labor costs, employee benefits, travel, equipment rental costs, overhead and other direct costs; plus ten percent fixed fee) incurred by Consultant in performance of the work. The total authorized compensation for the <u>Amendment No. 1</u> is in the amount not to exceed <u>Forty-One Thousand Seven Hundred Eighty-Five Dollars and Zero Cents (\$41,785.00).</u>

The amended total compensation shall not exceed **Two Hundred Eighty-Two Thousand Ten Dollars and Zero Cents (\$282,010.00)** without written approval of the City's representative. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this agreement.

- 3.4 <u>Continuing Effect of Agreement.</u> Except as amended by this Amendment, all provisions of the Agreement shall remain unchanged and in full force and effect. From and after the date of this Amendment, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment.
- 3.5 <u>Adequate Consideration</u>. The parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment.
- 3.6 <u>Counterparts</u>. This Amendment may be executed in duplicate originals, each of which is deemed to be an original, but when taken together shall constitute but one and the same instrument.

IN WITNESS THEREOF, the parties have executed this Amendment as of the day and year first set forth above, which date shall be considered by the parties to be the effective date of this Amendment.

Re: Contract Amendment - ATP Cycle 7 Grant Writing, Outreach, and Graphics

Dear Mr. Simmons,

On behalf of Alta Planning + Design (Alta), I am pleased to submit this proposal to assist the City of Coachella (City), in applying for Caltrans Active Transportation Program (ATP) Cycle 7 funding, providing grant writing, public engagement support services, graphics, and additional project management. We will build on the grant application we supported the City with during the Cycle 6 call for projects. This amended scope should be regarded as an extension of the current scope and fee and not as a replacement for any agreed-upon activity.

Alta will be responsible for completing one (1) ATP application for submission to the California Transportation Commission to be eligible for statewide funding. In addition, we will lead public outreach and engagement activities and graphic design in support of the application effort. A scope of work and fee to complete this task is included with this letter.

Should you have any questions or desire additional information please do not hesitate to contact Vincent Hellens at vincenthellens@altago.com or Kristin Haukom at kristinhaukom@altago.com.

Sincerely,

Kiptin Haukom

Kristin Haukom Senior Associate

Principal

Scope of Work

Task 1. Project Management and Coordination

Alta will meet with the City via phone/video throughout the application process to coordinate information, materials, and communicate application progress. Four meetings are anticipated from kick-off through application submittal.

Task 1. Deliverables

• Up to four (4) coordination meetings

Task 2. Public Outreach and Engagement for Connect Coachella ATP Application

In an effort to document public input for the Connect Coachella project, Alta will conduct one (1) community workshop during the early evening at a location convenient to the public, such as the Coachella Library. Alta will work with the City to confirm the date and location, but it is assumed that the City will secure the location venue.

Alta will create a simple postcard flyer to advertise the workshop. The postcard flyer will be created so that it can be used for mailings (if project budget allows), handouts, and posting to social media channels. It is assumed that the City will help promote the workshop through its usual channels.

Alta will create a short video giving a project overview, showing the project location and extents, and imbedding photo simulations/renderings that can be included as attachments in the actual application. The video itself will also support public outreach efforts.

Alta will prepare up to four (4) public facing boards for the workshop. The purpose of the boards will be to illustrate the project to the public and provide opportunities for public input (such as a simple voting exercise). Alta will have up to three (3) project staff at the workshop to help answer questions. All workshop materials will be created in English and Spanish, but it is assumed that the City will provide interpreters.

In addition, Alta will create a simple survey using an online platform like Survey Monkey, to solicit input about the project. Findings from the survey will be included in the ATP application narrative.

Alta will create a short video giving a project overview, showing the project location and extents, and imbedding photo simulations/renderings (up to 6) that can be included as attachments in the actual application. The video itself will also support public outreach efforts.

Finally, we propose to table two (2) pop-up booths at community events, such as a farmers market. Our proposed pop-up outreach provides an opportunity for members of the community to learn about the project and provide input while continuing with their daily lives. This targeted outreach can capture a much wider and more representative sample of residents and allows for more informal, but often more meaningful input.

Task 2. Deliverables

• One (1) workshop and materials

- Simple survey
- Two (2) pop-up activities
- Short project overview video

Task 3. Active Transportation Program Application for Connect Coachella

Alta will assist the City in completing one (1) ATP grant application for the Connect Coachella project.

Task 3.1. Application Part A

Alta will complete Part A of the Cycle 7 application. This includes the following sections:

Section	Notes
Part A1: Applicant Information	
Part A2: General Project Information	
Part A3: Project Type	
Part A4: Project Details	
Part A5: Project Schedule	
Part A6: Project Funding	
Exhibit 22-G PPR	
Part A7: Funding Criteria	

Task 3.2. Application Part B

Alta will complete Part B of the Cycle 7 application. This includes the following sections:

Section	Notes
Part B: Narrative Question #1, Disadvantaged Communities	
Part B: Narrative Question #2, Potential for Increased Walking and Bicycling	
Part B: Narrative Question #3, Potential for Reducing Fatalities and Injuries	
Part B: Narrative Question #4, Public Participation	Alta will advise on Public Outreach to be conducted in advance of the application.
Part B: Narrative Question #5, Context Sensitive	
Part B: Narrative Question #6, Leveraging Funds	
Part B: Narrative Question #7, Scope and Plan Consistency	
Part B: Narrative Question #8, Conservation Corps Coordination	Assume City will handle, but Alta can support.

Task 3.3. Application Part C

Alta will complete Part C of the Cycle 7 application. This includes the following sections:

Section	Notes
Part C: Application Attachment A, Application Signature Page	Assume City will handle.
Part C: Application Attachment B, Engineer's Checklist	
Part C: Application Attachment C, Project Location Map	
Part C: Application Attachment D, Project Map/Plans Showing Existing and Proposed	
Part C: Application Attachment E, Photos of Existing Conditions	
Part C: Application Attachment F, Project Estimate	
Part C: Application Attachment G, Non-Infrastructure Work Plan	
Part C: Application Attachment H, Plan Scope of Work	N/A
Part C: Application Attachment I, Letters of Support	Alta to supply template. City will request these from relevant stakeholders.
Part C: Application Attachment J, Exhibit 22-F State Funding	

Task 3. Deliverables

- One (1) completed Application Part A
- One (1) completed Application Part B
- One (1) completed Application Part C

Task 4. Grant Application Compilation and Submittal

Alta will compile the above application document sections and provide to the City for final approval prior to submittal. Upon approval, Alta will submit the final application via the ATP application website.

Task 4. Deliverables

• One (1) submitted final application

<u>Total Fee = \$41,785</u>

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Jaime Arroyo, Grants ManagerSUBJECT:Award Professional Services Agreement to HR Green Pacific, Inc. for the
Development of the Broadband Master Plan for the City of Coachella in the
Amount of \$214,690

STAFF RECOMMENDATION:

Staff recommends that the City of Coachella considers awarding a professional services agreement to HR Green Pacific, Inc. for the development of the Broadband Master Plan for the City of Coachella in the amount of \$214,690.

BACKGROUND:

On July 7, 2023, the City of Coachella was awarded \$234,000 in funding from the Local Agency Technical Assistance (LATA) grant program through the California Public Utilities Commission (CPUC). The award will fund the development of a Broadband Master Plan for the planning and evaluation of a fiber optic broadband network that seeks to lower broadband costs and increase network value for all stakeholders.

This broadband infrastructure project will be designed to provide fiber optic network service throughout the City of Coachella to unserved or underserved households and businesses to reliably meet or exceed symmetrical 100 Mbps symmetrical speeds. The City of Coachella has identified the importance of encouraging the development of reliable and cost-effective next generation broadband Internet services for our residents, guests and visitors in order to provide an equitable and accessible level of digital access for everyone.

DISCUSSION/ANALYSIS:

There are two main areas that the City of Coachella is seeking to evaluate and plan for. The first is broadband access and availability on City owned property and facilities where the City may or may not have existing guest Internet access or existing fiber connectivity. Examples of these City owned sites would be parks, libraries, downtown areas and other locations where having access to high-speed Internet would be desired and under the Cities direct control. The second component is for residential and business areas outside of City property such as in rural areas, neighborhoods, business centers and currently undeveloped space.

The objective for both areas is to lower the cost of access increasing affordability for all whether through state or county Affordable Connectivity Programs (ACP), other regional services or whether or not the City should become directly involved in offering service. Providing minimum speeds of landline (copper or fiber) or wireless connectivity of 100mbps bidirectional access. Increasing coverage and service availability to underserved and non-served areas. If necessary, increasing competition and access by the City entering in to cooperative, lease, public private partnership or direct to end user broadband service offerings where existing service providers decline to service, upgrade, invest, expand and offer affordable services. Lastly to work together with other regional partners such as CVAG, the County of Riverside, CVUSD and neighboring cities in order to best utilize shared resources and access areas.

As a result, it was determined that the City solicit competitive proposals from qualified individuals, firms, or team of firms that have specific and demonstrated experience in the preparation of a broadband master plan and broadband / Internet coverage and services analysis. City staff from the Information Technology Department and the Economic Development Department collaborated to develop a comprehensive scope of services for a Broadband Maser Plan RFP to solicit proposals and identify the most qualified firm to develop this plan. The scope of services included the following:

- Current and Future Needs Assessment
- Inventory and Assessment of City-Owned Broadband Assets
- Assessment of Privately and Non-City Owned Broadband Resources
- Assessment of City Policies and Business Practices
- Assessment of City Policies and Business Practices
- Gap Analysis
- Feasibility Analysis
- Draft, Review, Refine and Adopt Broadband Master Plan
- Project Management

A review panel consisting of subject matter experts from Finance, Information Technology, and Economic Development reviewed the responses in accordance with the evaluation criteria contained within the solicitation. The following firms submitted proposals:

- HR Green Pacific, Inc.
- Bonfire Fiber, LLC

The panel selected HR Green Pacific, Inc. as the most qualified firm. In addition to providing all the items outlined in their Scope of Services (Attachment 1) in a cost-effective manner, a key factor that set HR Green Pacific, Inc. apart from the other firm included developing Broadband Master Plans for the City of Palm Desert and the City of Palm Springs. Showcasing a crucial understanding of the broadband services and needs of Coachella Valley region.

ALTERNATIVES:

- 1. Award a professional services agreement to HR Green Pacific, Inc. for the development of the Broadband Master Plan for the City of Coachella in the amount of \$214,690
- 2. Not award

FISCAL IMPACT:

Grant funds from the LATA grant have been budgeted to cover the cost of this contract for the duration of the project.

To the Coachella RFP Team,

On behalf of the entire Bonfire team, I am delighted to express our enthusiasm for the opportunity to respond to Coachella's ("City") Request for Proposal ("RFP") for the creation of a Broadband Master Plan. We are committed to leveraging our expertise in broadband deployment to develop a comprehensive framework for enhancing the broadband landscape across your community and to provide insightful recommendations for potential broadband models moving forward. Our response has been meticulously crafted to align with your requirements for each section of the RFP, including:

- <u>Approach to Services</u>
- <u>Consultant Qualifications</u>
- <u>Key Personnel</u>
- Subcontractors
- Project Organizational Chart
- Project Work Plan
- <u>Exceptions</u>
- Project Schedule
- <u>Fee Information</u>
- <u>References</u>
- Interview Availability
- <u>Required Statements</u>

We are confident that our submission will illustrate why Bonfire is the ideal partner with the necessary experience to support your critical broadband initiative. My team recognizes the transformative power of high-speed broadband and its ability to positively impact the communities we serve. We are eager to collaborate closely with the City to achieve your objectives and to contribute meaningfully to the advancement of connectivity in your community.

Thank you for considering Bonfire as a potential partner for this important project. We are eager to embark on this journey with you and contribute to the success of your community. Our submitted response will remain valid for one hundred twenty (120) days following the closing date for receipt of proposals. Should you require any further clarification or additional information, please do not hesitate to contact me at brian@bonfireig.com or by phone at 303-956-9853.

Warm regards,

B-+1+₩

Brian Hollister Co-Founder and CEO <u>Bonfire</u>

APPROACH TO SERVICES

Community leaders across the country are realizing the importance of next generation broadband services to support the future of their constituents. Broadband services have a net positive economic and social impact on communities by enhancing free enterprise, workforce development, educational opportunities and smart city deployment. When community leaders are ready to future-proof their digital infrastructure and set their residents up for success through technological advancements, they look to our team to create a Broadband Master Plan.

By using maps, presentations and historical data, our team provides community leaders with the necessary information to make informed decisions for infrastructure development. This Broadband Master Plan will act as the "headlights" to guide stakeholders through their unique broadband journey, shining a light on where the greatest digital inequalities are and providing insights on next steps to better connect residents. Our fully customized services include:

Market Assessment

- An analysis of your community's needs and unique demographics
- Map of your community's existing broadband solutions, including private internet service providers (ISPs) and public funding sources
- Real pricing data from ISPs

Competitor Analysis

- A detailed competitive profile
- Real-life, address-level speed testing
- Overview of marketed plans and service validation from ISPs

Network Design(s)

- Engineering of the entire community under aerial and underground designs
- Optimization of the network design for capital efficiency
- Market-specific labor and material costs

Financial Planning

- Real-world operating models
- Optimized build staging recommendations
- A capital prioritization plan
- Assistance with funding and grant support

Operational Support

- Assistance with workforce identification and hiring for building and operating the network
- Support for ad-hoc tasks including hiring, aligning resources, vendor diligence and selection, material procurement, etc.

The Broadband Master Plan allows you to initiate goaloriented discussions around debt tolerance, service coverage, quality, operational intensity and more. Our research will empower you to make the most informed decisions possible with the input of key stakeholders and your constituents. We are engineers at heart which allows us to provide communities with quality, actionable engineering designs that support the sustainable development of long-term broadband business plans. Above all else, we are enthusiastic about our mission to connect every American with affordable high-speed internet – and we do whatever we can to help progress this along.

ltem 17.

bonfire

Page 115

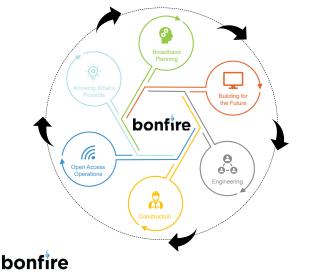

CONSULTANT QUALIFICATIONS

Bonfire was founded in 2016 in response to the growing demand and complexity of designing and deploying broadband networks across the United States. Integrating multiple engineering disciplines, technology experience and construction trades are a key aspect to our approach to being the best overall long-term partner for our customers. Our core belief is that all Americans deserve high-speed affordable internet because it makes their lives better.

At Bonfire, we are uniquely qualified to provide all the services required for the successful implementation of this project. We are a values-based team of telecommunications and technology professionals that do the work to enable economic growth and access to quality education and healthcare through broadband connectivity, one community at a time. We are headquartered in Denver, Colorado and provide broadband planning, engineering, construction, and open access operation services nationwide. Our business operates under the <u>EOS methodology</u> which allows us to deliver a six-step proven process of quality, efficiency, and transparency with our clients.

Along with our proven process, we are a value driven company that enables us to hire, retain and grow the most talented people in the broadband industry, all focused on serving our clients and our purpose. Organizationally, we are structured with a strong leadership team and a deep bench of talent across all critical disciplines including engineering, project management, construction, permitting, vendor management, central office equipment, network operations, technical customer service, and network maintenance.

We love getting the chance to work with customers who have the same drive to get broadband to those that need it most. We've worked on projects of all sizes and understand the challenges that come with each of them. We believe the only way any project is successful is when there is an open and honest line of communication. Issues can come up on every project; however, how they are handled and what is done about them is what makes our business stand apart.

OUR PROJECT MANAGEMENT PHILOSOPHY

Set Up For Success

- Emphasize relationships not transactions
- Focus on the needs of the customer
 Adapt our approach to best address the challenge

Build Strong Foundations

- Verify the details before the work begins
- Provide insight and recommendations
- Align all stakeholders on the expected outcomes

Collaborate and Listen

- Always serve up the right people and processes
- Emphasize teamwork at every opportunity
- Seek out what's possible and where possible, redefine what's possible

Be Clear and Accountable

- Provide full visibility into project process
- We put our money where our mouth is and the buck stops here

Track the Progress

- 5
 - Plan the work, work the plan
 - Benchmark KPIs
 - Be accountable at all times and in all matters

Go the Extra Mile

- See the project through to completion and remain committed beyond
- Expect the unexpected and be prepared to handle it
- Be primed for the next engagement

Page 116

KEY PERSONNEL

Please see <u>Task1</u> for Bonfire's proposed project management structure and please see below for team bios and background information on our broadband planning team:

BRIAN HOLLISTER Co-Founder & CEO

Brian's professional experience includes working for internet service providers like AT&T, Level3 and MCI, as well as networking technology companies like Calix, Aktino and Vina Technologies. Brian holds a BS, Business Management from the University of Phoenix and is passionate about building the future of open access in the United States.

Role: As CEO, Brian is responsible for the strategy, corporate culture, and investor relations activities for the organization. With over 20 years of experience in the telecommunications business, his areas of expertise include sales leadership, operations, marketing, and business management. Brian believes that all Americans should have access to high-speed, affordable internet access through creating choice for consumers and demonopolizing the internet industry.

JUSTIN ROLLER

President

Justin has over 20 years of experience in the technology sector and specializes in helping public sector clients, ranging from municipal governments to federal departments, address their challenges in modernization and digital transformation. His work has included business process automation, cloud implementations, and network/system security. Justin problem solves through leveraging creative solutions which bridges the gap between technical details and real-world outcomes. Notable career accomplishments include leading the software team running a US federal government program distributing \$1 billion monthly. He has also served on the state of Colorado's Broadband Deployment initiative which provided him first-hand experience with grants, public private partnerships, and a unique perspective on how communities and ISPs are working together to close the digital divide.

Role: As Bonfire's President, Justin is passionate about applying his technical and strategic skills, in combination with his knowledge of the public sector and grant funding, to help address broadband issues facing American communities today. He believes that we have a rare opportunity now to solve the issues related to strategically providing fast and affordable broadband to provide long-term value to underserved communities.

JOSH ORLOWITZ

Director of Corporate Strategy

In his previous role, Josh was an Engagement Manager at CMA Strategy Consulting (acquired by EY-Parthenon, the consulting arm of Ernst & Young). CMA is a Boston-based telecommunications strategy consulting firm engaging in the most complex corporate strategy and M&A deals in the telecommunications industry. Josh has worked on over 35 projects ranging from capital deployment prioritization for rural ISPs, fiber M&A commercial due diligence for private equity and developing detailed FCC auction strategic plans for large telcos. In his role as Engagement Manager, Josh was responsible for all aspects of project and client management and overall strategic direction of the projects he managed.

Role: As Director of Corporate Strategy, Josh is responsible to productizing all aspects of Bonfire as it continues its exponential growth phase. Josh is also responsible for helping develop and drive the product and corporate strategy of Bonfire's FTTH efforts. This includes developing its product and pricing, market selection, capital optimization, and go-to-market planning.

JASON WISEMAN

Principal Engineer

In his 25 years of experience in the communications industry, Jason has exhibited a strong work ethic and a wide range of leadership, technical and problem-solving skills that contribute to the success of his projects. Jason's experience allows him to be a valuable subject matter expert in every stage of the project, from budgeting through design and construction.

Role: As Principal Engineer, Jason oversees all activities related to the management, design, and construction of infrastructure projects. In his role, he also liaises with the project team and consultants to ensure project performance goals are achieved.

AMY GOLDSTEIN

Senior Engineer

Amy has over 12 years of experience in the communications industry, with deep experience across fiber network engineering, quality assurance, and field surveys. Amy also has a background in geospatial analysis for municipal utilities, where she built foundations that enhance her work in the fiber optic field today.

Role: At Bonfire Fiber, Amy serves our Network Operations teams in the role of Senior Engineer, designing networks with an eye for quality, capacity and scalability. She also supports our Broadband Planning teams with feasibility studies, greenfield fiber designs, and grant preparation.

DREW PAPPAS

Director of Business Development & Community Engagement

As Director of Business Development, Drew is responsible for building long-term relationships with municipalities, Tribes, ISPs, co-ops, and private entities within the markets Bonfire works in. He acts as a liaises with different community leaders to show the tremendous value a FTTH network can bring to a community. He believes that broadband is for all, not for some, and is a strong proponent for eradicating digital inequity with infrastructure and services that lasts for generations.

Role: Drew is crucial in working with communities to help clarify stakeholder needs, navigate corporate process, and making sure that Bonfire is bringing choice, innovation, and competition into every market we work with. His work focuses more on the community engagement aspect during any broadband planning efforts and works closely with the engineering and construction teams to make sure all customer goals are exceeded.

TYLER THREW

Program Manager

With seven years of experience managing projects and leading teams in the telecommunications industry, Tyler is proficient at bringing teams together to deliver results. His experience managing the engineering of OSP fiber and wireless networks, as well as implementing PMO software and structure to better align the project portfolio with the larger business objectives makes him a valuable asset to the Bonfire PMO. His leadership, strategic problem solving, social facilitation and project management knowledge enables him to set projects up for success by continually analyzing efficiencies and effectiveness throughout the project/program lifecycle.

Role: As Program Manager, Tyler is responsible for strategically coordinating various functional activities of the PMO simultaneously to meet key project/program goals. This includes budget, resource management, risk mitigation, stakeholder engagement and aligning the PMO with the overarching organizational initiatives.

JOSH ANDERSON

Sr. Business Strategy Analyst

As a Senior Analyst on the Corporate Strategy team, Josh is responsible for helping to drive the corporate strategy of Bonfire's FTTH efforts. This includes market analysis and selection, financial due diligence, and competitive research.

Role: Josh also helps manages engagements for Bonfire's broadband planning teams as they support clients in becoming more efficient, expanding their service capabilities, and redefining what's possible in delivering broadband to their customers. Josh is passionate about Bonfire's mission to bring broadband connectivity to every American.

JACKIE ENGLISH

Product Manager

Jackie has managed a variety of different products in her Product Management career, including budget software-as-a-service (SaaS) and various software products utilized by Bonfire Fiber. In her undergraduate studies, she learned about the economics of the telecommunications industry and researched and hypothesized policy solutions that address the shortcomings of the telecommunications market. This market knowledge, along with her technical software product management skills, allows Jackie to bring a unique and valuable perspective to Bonfire Fiber. She deeply analyzes product offerings, including non-software solutions, and identifies process, marketing, and user experience improvements viewing product management at Bonfire as "total experience" management for all stakeholders to have the best possible output.

Role: As Product Manager, Jackie is responsible for managing Bonfire's portfolio of products, including an Open Access marketplace, operations, and software. Jackie also defines and supports the go-to-market strategy for services such as broadband planning or additional broadband solutions for enterprise businesses. Her job is to truly understand the various stakeholders and produce a solution or product that serves their needs and solves their problems.

LEX GOOLGASIAN

GIS Developer

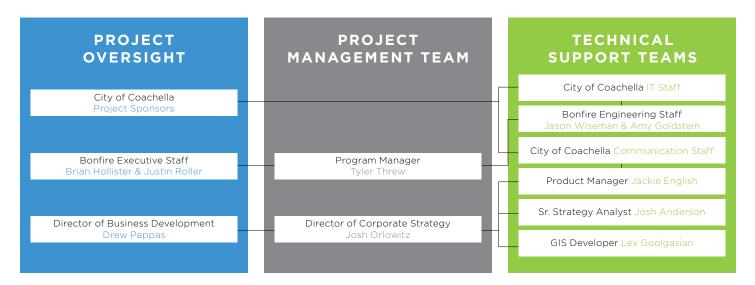

In her previous role, Lex was a Distribution Designer at Stantec. Stantec is in the design and consulting industry – they provide professional consulting services in planning, engineering, architecture, surveying, and environmental sciences. Lex has worked on multiple projects ranging from providing power to 5G small cell antennas to fiber optic cable installation for Dominion Energy. In her role as Distribution Designer, Lex was responsible for analyzing, designing, and coding in ArcMap. She also created design packages which included construction prints, fiber optic sag and tension calculations, down guy calculations, pole loading calculations, NJUNS ticket creations, bill of material coding, and permit applications.

Role: As a GIS Developer, Lex is responsible for acquiring, analyzing, and compiling geospatial information of feature and terrain data utilizing imagery analysis techniques to develop accurate cartographic representation. She is also responsible for the production of sophisticated maps, reports, imagery, and custom geoprocessing tools to achieve maximum efficiency within ArcGIS Pro and Comsof. Additionally, Lex is responsible for software design and development on assigned projects for data automation and end user applications including desktop and web.

SUBCONTRACTORS

Bonfire does not foresee the need to leverage any of our partners or subcontractors on this project. Bonfire has an in-house Broadband Planning team that focuses specifically on working with municipalities, counties, Tribal entities, etc. to become their strategic broadband advisors and assist with driving high-speed and affordable internet access throughout the community. If the need to bring on external partners arises, we will review any potential subcontractor(s) with the City for approval before any work is performed by external partners.

PROJECT ORGANIZATIONAL CHART

The Project Oversight stakeholders, including the City of Coachella and Bonfire staff, will collectively work to provide oversight, vision, and guidance and serve as project executive sponsors. The Project Management Team will execute the full scope of the project as outlined in the Broadband Master Plan.

- The Program Manager will serve as the main-pointof-contact (MPOC) and support the City of Coachella Project Oversight stakeholders. This role will also support technical engineers perform tasks related to establishing "middle mile" and "last mile" connection readiness and utilize staff to review permit application procedures and Master License Agreements to bring an in-depth understanding to the installation of broadband infrastructure in the rights-of-ways (ROW) for the City.
- The Director of Corporate Strategy will support efforts to understand the community's current coverages; evaluate needs and desires for additional products and services; and analyze financial modeling to meet the expressed needs and desires and GIS and visualization of these outputs.

The Technical Support Teams will serve as subject matter experts (SMEs) to complete the technical requirements of each project section.

Bonfire Engineering Staff will work with the City's IT or engineering staff to inventory existing City broadband infrastructure and assess the physical "middle mile" and "last mile" connection readiness from the infrastructure in the street to homes and businesses.

- City of Coachella Communication Staff and Bonfire Product Staff will work on outreach and community engagement activities, including but not limited to surveys, workshops, stakeholder interviews, and an accessible portal to communicate the output of these engagements.
- Bonfire's Senior Strategy Analyst will generate market-demand research, financial modeling, feasibility, and implementation strategies to meet the City's coverage and access goals, including providing business modeling for wireline "middle mile" and "last mile" network designs. These business case will outline methodologies, pricing and assumptions.
- Bonfire's GIS Developer will support geospatial visualization outputs to show communities lacking sufficient high-speed internet access by neighborhood and incorporate relevant information from the Federal Communications Commission (FCC) Broadband Map and/or the California Public Utilities Commission Coverage Map. GIS development will also be utilized in tandem with engineering expertise to understand the existing underground city-owned fiber infrastructure and nearest peering points to the greater Coachella Valley routes.

bonfire

Page 120

TASK 1 - PROJECT KICK-OFF MEETING

Success of a project is built on a foundation of transparency. We understand the importance of communication and we strive to understand your goals, expectations, and personal styles during project startup. In this spirit, Bonfire staff will create a draft Project Managment Plan, including proposed milestones/ deliverables and dates and will distribute this plan for reference in advance of a formal kick-off meeting.

Our kick-off efforts will be guided by principles that prioritize relationships, needs, adaptability, and accountability, ensuring a solid foundation for collaboration and achievement of the City's desired outcomes. Bonfire staff will design and facilitate an impactful kick-off session, where we will focus on aligning with all project members, including City staff, to provide clear visibility to create trust and accountability between all stakeholders. Our goal is to leave the kick-off meeting with global clarity on the project plan and approach, inputs and data required from the City, and an action plan for immediate next steps. Any feedback from City staff will be applied to the Project Management Plan within seven working days following the meeting.

The Project Manager for this project will be Bonfire's Program Manager, Tyler Threw. He is experienced managing diverse engagements and can work across a full suite of modern project management tools (Smartsheet, Jira, Asana, etc.) and frameworks (Agile, Kanban, Scrum, etc.). He will adapt the project approach to best suit the City's needs and preferences. During the kick-off meeting, the preferred management tool and project management framework will be discussed and refined.

TASK 2 - INTRODUCTORY PRESENTATION TO CITY COUNCIL

With a refined Project Management Plan, Bonfire will prepare a detailed presentation to City Council, highlighting the scope of our services and project timeline. Our goal will be to introduce ourselves to City Council and citizens, educate them on the project and the value we intend to provide, and pressure-test our objectives against what City Council feels are the most pressing issues, opportunities, and constraints for broadband development in Coachella. Bonfire will attend the scheduled City Council meeting to deliver the presentation and solicit input and feedback from the Council. We will also make ourselves available for questions from the public (with the permission of City Council) to ensure buy-in to our work extends beyond Council and to every member of the community.

TASK 3 - CURRENT AND FUTURE NEEDS ASSESSMENT

Bonfire proposes a four step process to address the requirements of this task, including understanding the met and unmet needs of various community stakeholders:

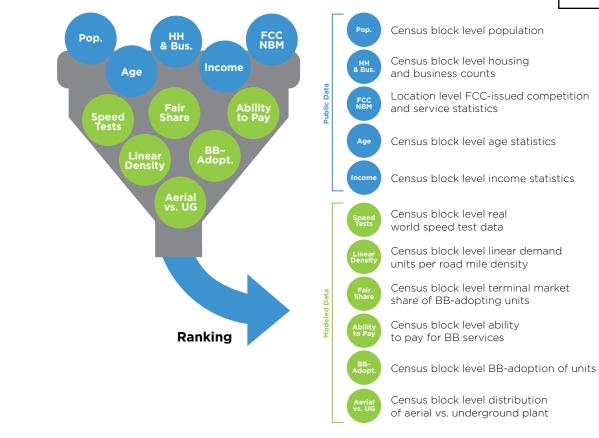

1. Qualitative Market Research:

Bonfire will leverage two approaches to gathering qualitative data to understand internet usage across different sectors and the broadband landscape of Coachella.

First, Bonfire will create and distribute a needs survey for both residential and business/institutional customers. This is one of the most effective methods for determining fiber demand. This interest and needs survey will be sent across the City to a diverse group of end users (i.e., residents, businesses, libraries, public safety buildings, and educational institutions). The survey will include a list of questions that will consider age, gender, education, daily internet activities, devices used to connect to internet, internet speeds/pricing, digital literacy levels, etc. We will work closely with the City for assistance in getting this survey sent to end users. The City shall support Bonfire in this outreach process including translating resources from English to Spanish as needed. In our experience, the more support we receive from the City and community leaders, the higher engagement rate we receive with these surveys. The information collected from these surveys can identify broadband demand in the specific area(s) we target. We also map survey results by census block to help identify areas of greatest need.

Second. Bonfire will utilize the American Community Survey (ACS) census data and publicly available data from the FCC National Broadband Map for demographic and internet access insights more broadly including statistics on internet usage and computer usage at the census-block level. For provider and broadband availability, the FCC National Broadband Map will serve as a primary data source, offering detailed coverage and technology types used by ISPs in the area. Bonfire uses this data with our proprietary analysis tool to ultimately rank areas of need. This allows our team to drill down anywhere within the City, including area-by-area or to the census block level, to visually depict the broadband landscape. Data includes total demand points, broadband adoption rates, demand points per linear mile, median income, high-speed availability, etc.

DATA ANALYTICS PROCESS

2. External Needs Assessment

Beyond surveying, Bonfire will orchestrate a series of targeted workshops with external stakeholders—spanning government officials, educational institutions, businesses, and residential communities—to gather insights on their current and future internet needs, preferences, and expectations. These interactive sessions will be planned and facilitated to delve into each group's unique broadband requirements, with a focus on identifying both immediate and long-term objectives.

To ensure inclusivity and comprehensive representation, we will collaborate with the City to invite a diverse range of participants. Our approach includes the use of structured workshop questions and open discussion formats, allowing us to capture an array of qualitative data on internet usage patterns, service expectations, and digital inclusion concerns. Insights garnered from these workshops will inform our needs assessment. Through this collaborative and community-focused approach, Bonfire aims to ensure that the broadband infrastructure development aligns closely with the articulated needs and aspirations of all stakeholder groups.

3. Coachella Internal Stakeholders Needs Assessment

Bonfire will engage various departments within the City in workshops to evaluate their current and future internet requirements. These internal stakeholder workshops will include Information Technology, Engineering, Public Safety, and other stakeholders. These assessments will allow Bonfire to clearly understand their current usage and use cases. Similarly to the external workshops, these internal stakeholder workshops will also include structured sessions to gather an understanding of the City's internal internet needs, both met and unmet, and their objectives. This dual approach ensures a comprehensive understanding of internal broadband usage and future needs throughout the area.

4. Conclusion and Output

The last step involves synthesizing findings from the assessments into a comprehensive workshop, followed by the creation of a technical memorandum. This document will encapsulate our findings from quantitative data sources, the depth of our stakeholder engagement and qualitative data and estimate current and future demand and take-rates across the City. This memorandum aims to serve as a blueprint for the City's broadband infrastructure strategy.

TASK 4 - INVENTORY AND ASSESSMENT OF CITY-OWNED BROADBAND ASSETS

Bonfire will assess the City's existing broadband infrastructure assets, both owned and leased. We will evaluate fiber assets and related facilities within the City's service area. The specific components of the task include:

 City's Fiber Assets: Bonfire will identify and document the City's existing fiber assets. This includes assessing the quality, capacity, coverage, and estimated market value of the fiber network. This inventory will be comprehensive, inclusive of capacity estimates and documentation of existing assets, within and outside of public right of way. Bonfire is prepared to conduct physical asset inspections and evaluations as required.

bonfire

- 2. City Assets Supporting Fiber Deployment: Beyond fiber-specific assets, Bonfire will explore other infrastructure elements that could support the deployment of a fiber optic network. These might include existing conduits, utility poles, underground pathways, fiber cabinets/vaults, and City-owned real estate.
- 3. Capital Improvement Plan Inventory: Bonfire will evaluate the City's existing Capital Improvement Plan as it relates to broadband deployment and maintenance. By pairing this review with our documentation of existing assets, we will create a full understanding of the City's current and anticipated asset profile.

To achieve these objectives, Bonfire will follow a systematic approach:

- Review of GIS Data: Bonfire will examine the City's GIS layers. This includes analyzing existing and planned wireless facility data. By doing so, we will establish the scope of currently inventoried assets.
- As-Built Review: Bonfire will cross-reference the City's as-built records with the GIS data. This step aims to identify any City-owned assets that are not currently reflected in the GIS maps.

The outcome of this task will be critical for subsequent phases. Bonfire will provide inventory data in a format suitable for integration into the City's GIS system and will inform network design, engineering, construction, cost estimates, and strategic decision-making.

By identifying gaps and shortcomings in the existing infrastructure, Bonfire will pave the way for a carriergrade fiber optic network that meets the City's needs.

TASK 5 - ASSESSMENT OF PRIVATELY AND NON-CITY OWNED BROADBAND RESOURCES

Bonfire recognizes that partnership and the ability to leverage non-City owned assets represents a tremendous opportunity to accelerate deployment of world-class broadband to the City's residents and businesses.

- Non-City Owned Fiber Assets: Bonfire will investigate and document the existence of private broadband infrastructure throughout the City. While public data may exist, the focus will be on understanding the availability and potential utilization of private resources, specifically dark and lit fiber and associated conduit. In conjunction with the assessment of Cityowned assets, Bonfire is prepared to conduct physical asset inspections and evaluations for these assets as required by the City and as made possible by asset owners.
- 2. Non-City Owned Assets Supporting Fiber Deployment: Bonfire agrees with the comprehensive list of supporting asset types provided by the City and will extend our assessment to include all supporting asset types available throughout the City.

3. Presentation of Findings: Bonfire will document present these findings in a technical memorandum and a presentation to project leadership. These findings will support the comprehensive Gap Analysis exercise to take place as part of <u>Task 7</u>.

To achieve these objectives, Bonfire will follow a systematic approach of reviewing GIS data. Bonfire will examine publicly available GIS layers. This includes analyzing existing and planned wireless facility data. By doing so, we will establish the scope of currently inventoried assets outside of the City's ownership to understand where partnerships with third parties could make sense in developing and deploying a network.

TASK 6 – ASSESSMENT OF CITY POLICIES AND BUSINESS PRACTICES

We will conduct a thorough examination and analysis of your policies and practices to understand how they may explicitly and implicitly be impacting broadband development.

- Mission Statements: We will collect and summarize mission statements of the City and individual departments or entities that directly or indirectly impact broadband development.
- General Plan, Master Plans, and Land Use Policies: Our team will review each item to identify how they influence broadband infrastructure development and deployment. Bonfire has extensive connections with cities leading the evolution of broadband across America and can leverage these relationships to provide comparisons and advise on best practices.
- Broadband-Specific Plans, Policies, and Ordinances: Through our deep experience in municipal broadband, Bonfire is familiar with each type of broadbandspecific plan, policy and ordinance discussed above. We will review and gather tangible insights on how existing plans and legislation are supporting or hindering broadband deployment in Coachella.
- Fiduciary Requirements, Constraints, and Procedures: We will assess the fiduciary requirements, constraints, and procedures that may be limiting the City's opportunities to develop and deploy broadband infrastructure. We primarily see these requirements related to owning and operating a municipal broadband network, or private use of municipal assets through master leases. We frequently encounter stringent fiduciary requirements when considering municipal network feasibility, so we will use our experience to provide a clear understanding of which requirements may present challenges to the City's long-term goals.
- Regulatory Policy: Our analysis will also cover the City's regulatory policies to identify where policies are helping or harming the City's goal of improving broadband in Coachella.

bonfire

• Government Operations: We will review City Government operations with a focus on ease of access to City services, products, and initiatives such as public housing.

Our goal is to provide you with a comprehensive report that highlights how these policies and practices impact broadband infrastructure development, deployment, and use in the City of Coachella. This report will help you make informed decisions regarding the future of broadband infrastructure within the City.

TASK 7 - GAP ANALYSIS

Bonfire will leverage findings from all the above tasks including survey and workshop data showing met and unmet needs; the existing asset inventory; Capital Improvement Plan; and policy review to perform a gap analysis. Our goal is to understand the current state of broadband infrastructure accessible to the City. This assessment will follow a Strengths, Weaknesses, Opportunities, and Threats (SWOT) format to identify opportunities for improvement or expansion.

In our Gap Analysis, Bonfire will undertake a detailed evaluation, juxtaposing the comprehensive broadband needs identified through our research and documentation of Coachella's current broadband landscape against the existing public and private infrastructure within the City. Bonfire will evaluate the findings in <u>Tasks 4</u> and <u>Task 5</u> to create a comprehensive Gap Analysis, taking note of where gaps in City-owned infrastructure may be filled by private assets, and where both categories still present gaps to be remediated via future deployments. From a policy standpoint, we will call out the existing policies that are creating challenges and where there are opportunities to revise existing policies, or develop new ones, to clear the way for a comprehensive broadband solution.

This analysis will prioritize unmet needs with input from the City, translating them into a clear framework for infrastructure enhancements or additions. We will outline how the City and private providers are meeting residents' and businesses' needs today and where they are falling short.

TASK 8 - MID-POINT PRESENTATION TO CITY COUNCIL

After introducing Bonfire and our scope to the City Council at project commencement, we will provide a live update on our progress at the midpoint of the project. This presentation will include major milestones reached, findings, and any issues or concerns encountered by the team to date. Likewise, we will provide an overview of remaining tasks and our next steps to complete the second half of the engagement.

Finally, we will solicit feedback from the Council on our findings and remaining scope. We will collaborate with your team to ensure precision in our messaging to City Council and the public to provide the right level of information to provide confidence in our partnership.

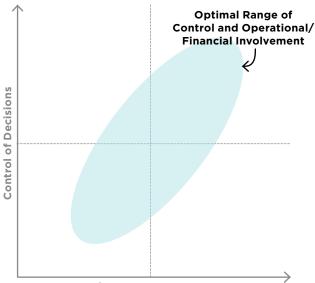

TASK 9 - FEASIBILITY ANALYSIS

Our team will dive into the details to bring a network design from conceptual to actionable, concrete solutions. Our proposed approach is as follows:

- 1. Define and Quantify Solutions: Based on the highlevel architecture from <u>Task 4</u>, we will identify and quantify specific products and solutions best suited for the network.
- Design Guidelines: Bonfire's engineering team will create design guidelines based on a future-proofed network architecture, current address point data, and existing assets to build out a robust network design. Our engineers have wide range of experience reviewing and optimizing underground fiber to the premises (FTTP) designs, ensuring the final design given to the City accurately reflects the routing and bill of materials (BOM) for the network.
- 3. Real-World Pricing: Bonfire's estimating and proposals group will collaborate with local subcontractors to gather real world data on labor prices in-market, providing accurate and up-to-date pricing for the build. We also work with multiple material and equipment vendors to secure competitive pricing. This market-specific pricing gives us the best insight into what a potential build will cost and equips the City to make strategic decisions on how best to move forward in your broadband journey.
- 4. Project Timeline and Permitting: As part of the construction estimation phase, we will design a phased project timeline based on the scale, complexity and architecture agreed upon with the City. We will also conduct permitting discovery to document all permitting requirements, timeline to obtain permits, and associated costs. A final BOM will be shared, which will provide key data points including material and labor requirements by task, total fiber mileage, underground fiber placed, and the number of addresses connected.
- 5. Operating Model Analysis: Bonfire will present a variety of operating models (public private partnership, utility owned and operated, outsourced network operations, open access, etc.) and educate the City on various pros and cons based on industry best practices and our team's robust experience.
- 6. Financial Modeling: With local construction cost estimates and selected operating models in hand, we will create detailed financial models for each operating model the City would like to consider to understand both the immediate and long-term cash flow profile. Bonfire's team has extensive experience crafting fiber-based business models that offer a wide range of feasible options for the City to improve the state of broadband throughout your service area. We benchmark every assumption against our proprietary database of fiber businesses model operational datapoints from real operators and use our hyperlocalized construction cost estimates to provide a

realistic view of not only total revenues and costs, but also the timing associated. This gives the City an accurate view of revenues, costs, and cash need by month.

Our analysis will present several business models that vary across the spectrum of control and operational/ financial involvement and risk. We ground all our analysis against this paradigm (see chart below). This gives us a common framework and language to develop and analyze business models that vary in ownership of the network, management and operations involvement, types of assets required (from our design), amount of capital investment required (from our detailed costing), what product offerings and services should be offered, and which partners are required to implement each business model.

Operational / Financial Involvement and Risk

7. Business Model Selection: Upon review of each business model and the associated financial profile, we will support you through the selection process to choose the operating model that best suits your needs and objectives. Our approach ensures a thorough evaluation and selection process, resulting in a tailored solution for the City's broadband needs.

TASK 10 - DRAFT AND FINALIZE BROADBAND MASTER PLAN AND EXECUTIVE SUMMARY

Once Tasks 1 to 9 are completed, we will compile a technical memoranda into a comprehensive Broadband Master Plan. This plan will include:

- An executive summary highlighting key findings and our recommendations.
- Final recommendations for network design and implementation of an operating model.
- An implementation roadmap outlining necessary steps and execution timeline for moving from design to construction, to steady-state operations of the network.

Our goal is to provide you with an extensive and compete Broadband Master Plan that meets your needs and clearly illuminates the path to achieving next generation connectivity for Coachella. Throughout this project, we will work alongside your team to obtain necessary approvals from the Board of Directors and other relevant stakeholders to implement the plan as proposed, or adjust where deemed necessary by the Board and other stakeholders.

TASK 11 – BROADBAND MASTER PLAN REVIEW, REFINEMENT, AND ADOPTION

We will deliver a draft report of the Broadband Master Plan to City staff for review and refinement. Based on your feedback, we will update the Broadband Master Plan and conduct a virtual workshop with appropriate stakeholders to further refine the plan. Bonfire will prepare a finalized Broadband Master Plan that incorporates all relevant feedback and meets all requirements. The report will contain all deliverables, geospatial data, and additional exhibits as deemed necessary throughout our engagement.

Bonfire will support City staff in their efforts to conduct presentations with interested citizens, businesses, and organizations. Additionally, Bonfire will be available to attend appropriate City Council meetings in the adoption of the Broadband Master Plan.

TASK 12 - PROJECT MANAGEMENT

As indicated in the Project Organizational Chart and outlined in <u>Task 1</u>, a dedicated project manager will be assigned to execute and assist with scheduling, coordinating meetings, tracking progress and milestones – in addition to always keeping an open line of communication with the City. This project manager, Tyler Threw, will act as the City's MPOC for all project status updates and will be available to provide updates and answer any questions your team may have. The six steps of our <u>Proven Process</u> will be utilized throughout the project.

Our project manager's mission goes beyond ensuring the project is completed on time and on budget; we will strive to deliver real value and clear direction to the City's broadband initiatives to exceed expectations.

bonfire

EXCEPTIONS

Bonfire will provide field resources for portions of this project, as deemed necessary. Field review work to entail visual proof of asset locations (HHs, peds, cabinets) to verify they match records, but our proposed scope of work does not cover any rod/rope or conduit verification/testing. The cost to provide that kind of service on the entire existing plant within Coachella is not something that will fall within the allotted budget. We advise the City to have the next phase of engineering (low-level design) cover that scope and have it completed with the OSP field engineering work.

12. Project Management			
Meetings & Recaps		\$12,191.83	
Task #	#12 Cost:	\$12,191.83	

Total Project Cost \$226,079.02

Project Costs

The total cost to the City of Coachella is \$226,079.02 and includes all work to be completed by Bonfire as stated in our proposal. Bonfire will bill the City in six (6) equal payments of \$37,679.84. Bonfire will bill on the last day of the month of that previous month's services. As shown in the Project Schedule, Bonfire anticipates all work to be completed and the Broadband Master Plan to be submitted to the City in six (6) months. In anticipating the work required for Task #11, Bonfire understands that there is a chance the City Staff Meetings, Public Presentations, and City Council Presentation will reuqire additional time and could go on for 1-2 months. Bonfire is prepared to work with the City throughout that process and if the Project Schedule requires an eight (8) month timeframe, Bonfire will not invoice the final \$37,679.84 until Task #11 is complete. Travel costs for team members have been budgeted and those costs are covered under Project Kick-Off Meetings, Existing Asset Review, Mid-Point City Council Presentation, and the Final Presentation of Master Plan to City Council.

SOUTHERN UTE TRIBE

Contact Person: Jeff Engman, CIO jengman@southernute.com | 970-501-0518 Project Dates: 10/2020 – Present (Planning/Grants Complete, Phase 1 Complete, and Phase 2 Ongoing)

Broadband Planning, Engineering, Material Procurement, Construction and Network Operations

Bonfire began engaging with the Southern Ute Tribe in October 2020. Initial high-level engineering work was completed soon after and Bonfire moved forward to working with the Tribe in submitting their National Telecommunications and Information Administration (NTIA) application in September 2021. Bonfire was selected to complete the low-level engineering and construction for the middle mile portion of this project (funded through \$10M in state funding). The middle mile project includes 52-miles of backbone fiber across the Reservation. Four key routes are leaving the Colorado location in Ignacio, CO placing seven-way microduct with a 144MF along those backbone routes.

The Tribe was then awarded \$42M from the NTIA to connect 1,800 Tribal homes with FTTH. The project includes placing another 275-miles of underground lateral, distribution, and drop fiber to connect all Tribalowned homes and businesses. In addition to the funding to connect all Tribal locations on the Reservation, the project will also pass another 1,500 non-Tribal homes that can connect to the network. The Tribe selected Bonfire through a RFP process to provide engineering, procurement, and construction for the rest of the NTIAfunded build, as well as selecting Bonfire Fiber as the open access network operator for the FTTH network.

In 2023, the Tribe was awarded another \$8.5M in Capital Projects Funding (CPF) from the state and will use that funding to connect another 550 homes to the network. We are currently in the process of placing drops to our initial Tribal homes and will be connecting customers to the network in 2024.

VINELAND, NEW JERSEY

Contact Person: Tony Quigley, Director of IT aquigley@vinelandcity.org | 856-794-4000 ext. 4345 Project Dates: 8/2021 - 5/2022, 10/2023-Present

Broadband Planning and Consulting

Bonfire was awarded a contract through a RFP process to conduct a broadband assessment and feasibility study for the City of Vineland, New Jersey in 2022. Project scope included discovery and research, creating a community engagement survey, evaluation of existing broadband services, grant/funding research, conduct gap analysis, planning and high-level network design, business/ financial models, and recommended next steps. Data was collected, analyzed, and put into the final Feasibility Report to be shared with city officials. Bonfire entered a new consulting agreement with the city in 2023 to assist them in creating their new broadband utility department. In 2024, the city passed an ordinance to create their broadband utility department and will continue to work with Bonfire as their broadband advisor as they begin the process of deploying a municipalowned fiber network.

FARMERS TELEPHONE COMPANY

Contact Person: Bill Blackford, General Manager bblackford@farmerstelcom.com | 970-562-4211 Project Dates: 4/2023 - 11/2023

Broadband Planning and Grant Consulting

Bonfire worked with Farmers to create a strategic broadband plan and assist with them submitting their CPF grant application. Farmers is a small, local ISP located in southwest Colorado that has been serving their community for over 100 years.

Through this \$100,000 engagement, our engineering team reviewed all existing plant to see what could be leveraged or what needed to be replaced. We also analyzed the easiest, most cost-effective opportunities for Farmers to connect more customers to fiber, which lead into our overall approach to the CPF grant. Our work with Farmers continued to complete a master plan and present the findings to their leadership. Bonfire supported Farmers through their Enhanced ACAM analysis and application, resulting in an award of over \$24 million of E-ACAM support over the next 15 years. We have recently begun working with Farmers again on their Broadband Equity, Access, and Deployment (BEAD) preparation so they can have their plan ready once that funding window opens in 2024.

RIO BLANCO COUNTY, COLORADO

Contact Person: Eric Jaquez, Operations Director eric.jaquez@rbc.us | 970-878-9583 Project Dates: 7/2023 - 9/2023

Broadband Planning and Grant Consulting

Bonfire finalized a contract with Rio Blanco County in 2023 to put together a high-level BOM project budget for their two CPF grant submissions. While Bonfire did not write the CPF grant for the County, we brought in grant partners to assist with writing and submitting the application. Bonfire put together an approach for the County to expand its existing FTTP footprint outside of the main city limit builds and expand across more of the unserved/underserved County.

Bonfire is re-engaging with the County to provide followup BEAD preparation and grant consulting services leading up to the BEAD application window opening in 2024.

LEARN, DESIGN, APPLY (LDA)

Contact Person: Megan Beresford, Director of Broadband Programs

megan.beresford@learndesignapply.com | 415-517-4090 Project Dates: 8/2021 - Present

Broadband Planning and Grant Consulting

We work closely with our partners at LDA and several customers to help identify potential grant opportunities for that service provider, municipality, or Tribe to fund necessary fiber builds. Organizations we have worked with include:

- Visionary Broadband Wyoming, Colorado and Montana
- Viaero Wireless -Nebraska and Colorado
- Southern Ute Tribe, Colorado
- Mountain Home, Idaho
- Three Forks, Montana
- Vineland, New Jersey
- Lummi Nation, Washington
- Swinomish Tribe, Washington
- Samish Indian Nation, Washington
- Grizzly Broadband, Montana

INTERVIEW AVAILABILITY

Bonfire will be available for an interview with the City as part of the final selection process and the lead members of our consulting team will be in attendance.

REQUIRED STATEMENTS _

- **A.** Bonfire agrees to all provide all services and adhere to requirements described in the RFP (except for what is listed under "Exceptions"). The City provided no addendums or updates outside of the original RFP document.
- **B.** Bonfire has no prior or pending litigation.
- C. Bonfire has not had any bankruptcy or insolvency proceedings in the last ten (10) years.
- **D.** As stated in the Cover Sheet, Bonfire's proposal will remain valid for one hundred twenty (120) days following the closing date for receipt of proposals.
- E. Bonfire and anyone performing work for us on this project is free of any conflict of interest.
- **F.** There has been no collusion in the preparation or submission of this proposal.

Grant application amounts have been between \$20,000 to \$45M. This work includes researching the various grant opportunities, the writing of the grant itself, and submitting it to the appropriate authorities for final review. Work like this has a significant impact in tough to serve areas where community leaders need state and/or federal money to help build these networks.

March 11, 2024

Celina Jimenez I Director of Economic Development City of Coachella 53990 Enterprise Way Coachella, CA 92236

Re: Broadband Master Plan

Dear Celina and Other Members of the Selection Committee,

The City of Coachella is a fast growing, culturally-diverse and young/family-oriented community noted as an entertainment hub in the Coachella Valley and service-oriented and responsive partner to businesses. The ability to connect with friends, family, and coworkers while conducting business from the road is imperative. For many cities, **broadband has become an important ingredient for economic development** and a significant component for key aspects related to quality of life, expansion of affordability and accessibility, education, business attraction, and telemedicine. As a growing community with expanding business and quality of life opportunities, **having high quality broadband is imperative to maintaining a competitive edge** and providing public services to residents and businesses.

Improving broadband takes leadership, good information, regional insight, and a proven process. Beginning with clear goals is vital to the success of the project. Because of the many factors that impact broadband, this can be a confusing process that can make it challenging to figure out the optimal path to achieving the City's vision and goals. Having a local firm with our national broadband experience can cut through this confusion, clarifying the community's viable options, and quickly eliminating irrelevant ones. HR Green's (HR Green) team members have facilitated broadband visioning and goal setting sessions in communities across the Coachella Valley and the country. Our team prides itself on providing broadband master plans that are practical so they can be the basis for preliminary and final designs of your broadband project.

Our team has been providing similar broadband master planning services to the Coachella Valley Association of Governments, the cities of Palm Springs and Palm Desert, and 50+ clients nationwide, including in the western states of California, Oregon, Arizona, Utah, and Colorado. We have helped agencies successfully deliver broadband initiatives from planning, design, through construction, and even operation.

Our Project Manager, Irena Stevens, responsible for delivering these local broadband master plan assignments, is well-versed in grant funding procurement and administration. She will oversee inventory of your existing broadband facilities and lead Coachella's team through master plan development. Our local Municipal Advisory Services Manager, Tim Jonasson, PE, a long-time Coachella Valley resident and Public Works Director with extensive community engagement and smart city experience, will coordinate the City's efforts with the regional partners to best utilize shared resources and access areas. HR Green's Principal-in-Charge, George Wentz, PE, also a Coachella Valley resident, is authorized to negotiate agreement terms and brings 30+ years of consulting experience to public agencies through the Coachella Valley. Our task leaders are well-regarded subject matter thought leaders on broadband connectivity who regularly speak nationally on next generation and smart-grid fiber backbone systems based on their hands-on, practical experience implementing successful projects. HR Green also will assign two bilingual engineers with applicable experience in the Coachella Valley to support community engagement efforts. Our in-house team will be augmented by ADVANTEC Consulting Engineers, a consulting partner who brings unparalleled knowledge of the CVAG's CV Sync project. They are supporting us on CVAG's broadband master planning assignment and already have extensive fiber data throughout the City of Coachella which will streamline your master planning efforts and provide cost savings.

Approach to Services

Local Presence and Knowledge

HR Green's case studies and experience matrix demonstrate our deep experience in successful projects containing all of the Scope of Work in your RFP. Our team's broadband master plan work in the Coachella Valley (CVAG, Palm Springs and Palm Desert) brings an unparalleled level of understanding and specific knowledge regarding broadband in and around the City. With the addition to our team of sub-consultant Advantec, with their strengths and knowledge of existing infrastructure, our team is unrivaled in the depth that we have of the City.

Our Distinguishing Process

What is equally important and often overlooked is the central role of the process that tasks in a broadband study fit into. Every city has different broadband goals, budgets, and current broadband related circumstances. There are a lot of factors that impact current and future broadband in a community. An effective broadband study process needs to be able to define and clarify the real details within those factors and have an iterative path that leads the community through a series of decisions (based on the data found) that moves towards clearly defined steps to develop the factors to meet the community's broadband goals. Our process is proven to do that.

This distinguishes HR Green. Not all consultants have a clear process and many who do have a linear path to a templated outcome. For many years, consultants have begun projects with a planned outcome in mind. They would get some information, go back to their office and build the case for the idea they had. Then, they would come back to the client with one recommendation that met what they were thinking at the beginning.

One of the reasons we entered the broadband market years ago was because we saw how that led to inferior outcomes, which was unfair to communities. We even had to build our own tools to create a different process.

We were glad to see that our tools and process are geared for exactly what we understand Coachella is looking for as is described in your RFP. At the highest level, our process can be summarized in the following graphic.

This path encompasses all of the services in the Scope of Services listed in your RFP.

VISION

To help communities develop a Vision of the broadband challenges they face and options they have to improve broadband, they need a good understanding of both the demand and supply sides of the broadband in their area. To determine the demand side, we utilize tools like GIS, a survey and stakeholder meetings which usually includes public agencies, first responders, schools, libraries, agencies who serve populations who might to define what needs there are in the community.

Studies often focus on access (having available infrastructure), which is important. We also feel it is important to address adoption (being able to take advantage of the infrastructure when it is available). Having a clear picture of adoption challenges is an important part of understanding the demand side of broadband (and will likely provide grant opportunities as the BEAD grant program rolls out).

For the supply side, we develop a GIS repository for public and private broadband related infrastructure. To bring this information together, we meet with public entities to gain knowledge of their broadband related assets and also develop relationships with the providers in the community to discuss their current assets and plans to expand.

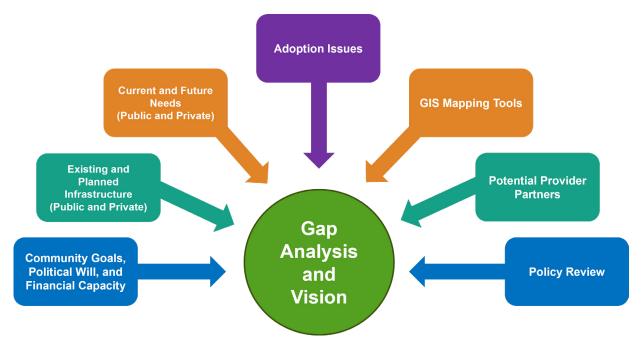

Broadband Master Plan

Pulling this information together paints a clearer picture of the broadband concerns (or gaps) in the community. We bring this data together in GIS, so have a tool within which we can perform analysis and to help paint a picture of needs and assets. This data will all be used in the Plan phase of the project.

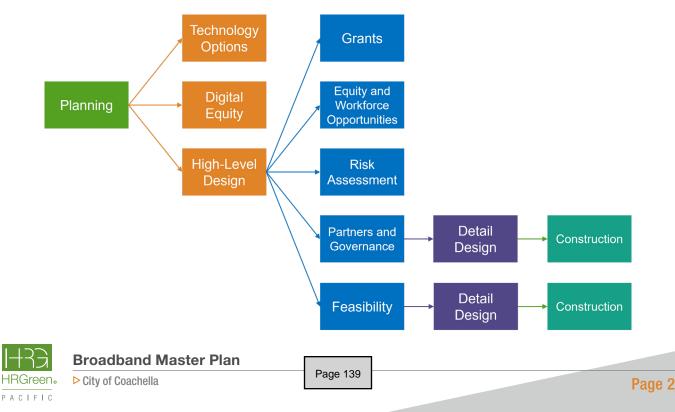

The below chart provides a graphical understanding of the Vision process. It culminates in a Gap Analysis and Visioning discussions.

With a gap analysis developed from good data, we work with the community to collaboratively formulate a Vision of what the needs are and a beginning point of thinking about options to improve broadband. This phase of our process aligns perfectly with Tasks 1 - 8 in your RFP.

PLAN

With that vision, we can begin to Plan. This process typically follows the below path of options.

We develop an action plan for all of the steps of the third tier and beyond. An action plan for either Partners and Governance (working with private providers) or Feasibility (the community possibly building infrastructure) should lead to building infrastructure from one of the two paths (or, possibly both). It can and should also lead to workforce development options to fill the needs of the path that is chosen.

This phase of the project represents Tasks 9 - 11 in your RFP.

DESIGN

If the community chooses to build their own infrastructure from the action items, then the Design phase from the broadband project life cycle path begins. This includes detail design/engineering, material and contractor selection, etc. in the services list. HR Green's strongly utilizes our thorough and effective project management system throughout the Vision and Plan phases and is also essential in construction phases of broadband projects.

From reviewing permitting processes and broadband related policies in the Plan phase, HR Green is well equipped to support permitting tasks to augment the needed capacity if needed. We have a staff augmentation group to specifically increase capacity to review permits.

BUILD

Lastly, as part of our Build phase, we also have staff experienced in compliance monitoring and reporting.

The power of this process is that each task in each phase of the process gathers the needed information to make the best decisions for the step you are in. Those decisions determine what next step you take.

We call those decision points in the process, outlined on the following page, "off ramps" because you can take a path or you can even stop the process if the numbers or chosen path are not working.

The keys to success in a process that is iterative as you proceed are:

- The right tasks to gather the information that is needed to make the best decisions.
- The right tools that provide the data and the flexibility to explore the options that you feel that you need to evaluate.
- The right process that guides the steps and tasks correctly towards the best outcomes.
- Management of the process to keep it moving forward and organized (Task 12 in your RFP).

How we have thought through, developed and manage these factors are what have led to the success that we have helped our clients achieve.

We are glad to see that the Scope of Work in your RFP very closely aligns with HR Green's established process and expertise in the best practices of the life cycle of broadband projects. Below is a list of the tasks and deliverables that we recommend for each step of this work. We are glad to perform one of these services, any mix of them or the entire life cycle.

Our company **Mission Statement** is: **Building Communities. Improving Lives.** We believe broadband is an important component of that and we are excited to work with you to bring our expertise to the City of Coachella.

Broadband Master Plan

BROADBAND

Planning and Feasibility

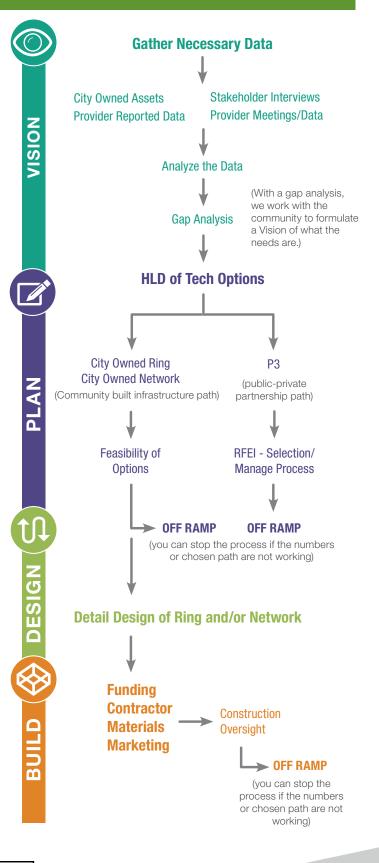

In the **Vision phase** we determine the demand and supply sides of broadband to you community. Utilizing tools like GIS, a survey (when appropriate), stakeholder meetings including public agencies, first responders, schools, etc.

HR Green's Project Management process includes a deliverable for every task, regular update meetings and work sessions with community leadership. All of these built-in milestones are designed so decision points are clear and thought through to keep intentionally moving towards the best outcomes for your community.

In the **Plan phase** a plan for either Partners and Governance (working with private providers) or Feasibility (the community possibly building infrastructure) should lead to building infrastructure from one of the two paths (or, possibly both).

In the **Design Phase** if the community chooses to build their own infrastructure, then the Design phase from the broadband project life cycle path begins. This includes detail design/engineering, material and contractor selection, etc.

In the **Build Phase** we have staff experienced in compliance monitoring and reporting.

Consultant Qualifications

Consultant Qualifications

For more than a century, HR Green has been dedicated to providing the services our clients need to achieve success. We collaborate across geographies and markets to provide engineering, technical and management solutions. With more than 650 employees and offices in eight states, HR Green provides engineering consulting services in Broadband, Water, Transportation, Governmental Services Environmental Consulting, and Construction Management. One of America's longest operating design firms, HR Green is consistently ranked among ENR's Top 500 Design Firms in the United States, standing at #168 in 2023.

Local Office

HR Green Pacific, Inc. 44651 Village Court | Suite 123 Palm Desert, CA 92260

HR Green was founded in Cedar Rapids, Iowa in 1913 and has grown to 18 offices throughout the country, including two in California (Palm Desert and Corona).

HR Green employs more than 700 people nationwide.

We have more than 60 staff members specializing in telecommunications and engineering.

HR Green serves CVAG and seven of nine Coachella Valley cities out of our local Palm Desert office. This includes broadband master planning for CVAG and the cities of Palm Desert and Palm Springs.

HR GREEN'S FIBER AND BROADBAND CAPABILITIES

HR Green's Broadband services cover more than broadband studies. We offer a full array of capabilities that cover strategic community efforts from inception to construction, and every stage between, including:

Strategic Policy Development & Implementation	Core Equipment & Architecture Design	Telecommunications Network Design
Regional Collaboration	Master Planning & Engineering	Project & Program Management
Operational Modeling	Business Model Assessment	Construction Management
Telecommunications Co-Location Consulting	Grant Writing & Administration	Smart Grid Analysis
Regulatory Compliance	Business Case Needs Assessment	Smart Grid Design & Implementation
Community Engagement	Market Assessment	Street Lighting Analysis & Design
ITS Design & Implementation	GIS Mapping	Fiber Capability Evaluation

A NATIONAL BROADBAND PLATFORM

Thought leadership + Unparalleled Knowledge of the Coachella Valley

- Broadband master planning leader in the Coachella Valley
- ► 75+ clients for master planning, design, construction management, and operations
- Broadband, fiber, wireless telecommunications facilities

Extensive delivery of services in the western United States, including in desert environments

Page 5

Sample Firm Experience

The HR Green team brings extensive broadband and fiber consulting experience throughout the United States. Below please find a representative sampling of similar projects. Detailed case studies with applicable references are included later in the proposal.

Broadband Master Plan

HR Green has a long-standing history of providing top-quality engineering and consulting services in the Coachella Valley. For many years, we have worked with local governments, organizations, and businesses to develop solutions to complex infrastructure challenges.

Our team has a deep understanding of the unique needs and challenges facing the Coachella Valley, including issues related to broadband, economic development, drainage, water, and transportation. We have worked on a variety of projects in the area, from designing and managing the construction of new water treatment facilities to developing broadband master plans that support the region's economic growth.

Our ultimate goal is open communication so we can identify and resolve any challenges that exist and cultivate a productive relationship that meets and exceeds your needs. To facilitate our relationship with Palm Springs and other Coachella Valley clients, HR Green maintains a local office in Palm Desert, and several of our key staff reside in the Coachella Valley.

We Know the Coachella Valley

- Our office and local personnel within a few short miles of Coachella
- Available bilingual team members (English/ Spanish) serving Coachella Valley agencies
- Broadband master plans for CVAG and the cities of Palm Desert and Palm Springs
- Presenters on Broadband and Smart Communities to APWA Desert Charter and ITE Conference in Palm Desert
- Multi-faceted consulting to CVAG and seven of nine Coachella Valley cities
- Staff collectively have served Coachella Valley agencies for 30+ years
- Former Interim Public Works Director, City of Palm Desert
- Former Public Works Director/City Engineer, City of La Quinta
- Two-time President of APWA's Coachella Valley Chapter, working extensively with CVAG and cities to drive regional collaboration
- Chair, CVAG's Policy Subcommittee for Regionwide Traffic Signal

Key Personnel

Key Personnel

Your primary local point of contact is **Tim Jonasson, PE**, our **QA/QC Manager**. Tim has served in this role for broadband master plan assignments with CVAG and the cities of Palm Desert and Palm Springs. As a local resident he has also served as a City Engineer/Public Works Director to various Coachella Valley cities and maintains well-established relationships with key stakeholders. **Irena Stevens**, our assigned **Project Manager**, will see that all resources are allocated to your project as needed and will be available for requested meetings. She has been instrumental in helping to deliver these local broadband master plans as well as similar broadband projects throughout the country. **Ben Lewis-Ramirez** brings extensive **community engagement and meeting facilitation experience** on broadband assignments. He will be supported locally by **Desiree Flores, PE** and **Berlyn Pimentel**, both of whom are bilingual and have supported Coachella Valley agencies on various CIP and land development coordination assignments. Resumes of our project team listed below, are found on the following pages.

Irena Stevens | Project Manager

Irena brings more than 13 years of experience with vision, planning, regulatory, and financial review of options to recommend broadband related policies and solution. She has been instrumental in delivering successful broadband master plan projects in Coachella Valley and other parts of southern California as well as in Colorado, Oregon, Texas and the Midwest.

She has evaluated agency goals to help develop broadband infrastructure solutions and helped develop plans to provide high-speed connectivity in cost-effective ways. Irena has led several public outreach campaigns to evaluate community broadband capacities, community needs, and policy options to promote equitable access and affordability of Internet service offerings. She has also led efforts to assess stakeholder needs, document current infrastructure and provider options, prepare grant applications and financial models for broadband studies and master plans with cities, counties, and economic development agencies around the country.

Irena has handled diverse project management, feasibility, and community engagement tasks on many fiber and broadband master plans. These include:

- Broadband Master Plan, Coachella Valley Association of Governments (administer LATA Grant)
- Broadband Master Plan, City of Palm Desert
- Broadband Master Plan, City of Palm Springs (administer LATA Grant)

George Wentz, PE I Principal-in-Charge

George serves as Vice President of HR Green, which offers a comprehensive suite of services to help local agencies function more effectively and efficiently. He brings more than 50 years of administrative, management, and local government related experience, focused on delivering consulting support to public agencies, including **most agencies in the Coachella Valley**. He has served as City Manager, Assistant City Manager, Public Works Director, City Engineer, Building Official, Planning Director, Traffic Engineer and Economic Development Manager.

George has directed and administered projects which range from on-call support to full city contract services. His responsibilities have ranged from accountability for day-to-day completion of activities associated with a contract to Principal-in-Charge of particular projects. His managerial experience and high level of success is well documented and recognized by the cities he has served.

A long-time resident of the Coachella Valley, George is keenly aware of the issues the region faces. He has also worked closely with the APWA on their International Affairs Committee.

Ben Lewis-Ramirez I Community and Stakeholder Engagement Coordinator

Ben has over 15 years of management experience in the broadband, outside plant engineering and construction industries. He is a vocal advocate for the open application business model and has published numerous magazine articles and blog posts on the subject, in addition to speaking about it at conferences and other events around the country. He will bring this wealth of broadband experience to his work addressing underserved residents with Coachella, so that all stakeholder groups understand the project and its implications for them and their communities.

Ben has served as a Program and Project Manager for counties, cities, and school districts associated with broadband market assessments, business plans, strategic plans, and master plans, responsible for plan development, constructability analysis, and stakeholder engagement.

Desiree Flores, PE I Community and Stakeholder Engagement Support

A multi-talented and bilingual licensed civil engineer, Desiree has 10 years of experience and brings comprehensive experience managing/delivering CIP projects, processing permits, responding to public inquiries and utility concerns, reviewing/designing various utility plans, and has utilized AutoCAD to design infrastructure plans. She has provided grading, drainage, and erosion control plans; earthwork quantities; grading crosssections; hydrology reports and calculations; designed LID BMPs, implemented SWPPPs, and rehabilitated sewer and pavement in congested downtown areas, involving traffic control plans, pipe sizing, and alignments for cities in Los Angeles, Orange, and Riverside Counties.

For the Pico Rivera fiber optic master plan, she translated community surveys from English to Spanish, performed public outreach by conducting workshops, and assisted in the analysis of data to assess broadband needs and opportunities.

Berlyn Pimentel I Community and Stakeholder Engagement Support

Berlyn is a seasoned bilingual professional with 11 years of experience working for municipal governments. She has expertise in plan review and permit processing and coordinating with applicants and contractors. In addition, She is proficient in handling public document requests and utilizing city and county GIS and records data to determine site restrictions. Berlyn has provided support to Engineering and Public Works Technicians and assisted in the annexation processes. Berlyn is proficient in customer service and translation services, and provided assistance to residents, vendors, and developers. She routinely prepares and maintains database records, and generates reports on a regular and as-needed basis, including the preparation of monthly, quarterly, and year-end financial, summary, and other technical reports in various systems.

Berlyn has provided real-time translation services to constituents coming to a City services counter to handle various transactions and coordinate, with permitting and engineering staff, etc. She has also assisted in crafting Spanish language municipal documents.

City of Coachella

Subcontractor

Subcontractor

ADVANTEC Consulting Engineers, Inc. Fiber Field Assessment

ADVANTEC Consulting Engineers, Inc., a California Corporation, is a Certified Disadvantaged Business Enterprise (DBE) and Small Business (SBE) consulting firm specializing in Intelligent Transportation Systems (ITS), Systems Engineering, Smart Cities, Broadband Communications, Connected and Automated Vehicles (CAV) Transportation Technologies, and Construction Management and Inspection. ADVANTEC's mission is to provide quality planning and engineering to the community that would result in perceptible improvements towards the quality of life, safety, and efficiency of transportation. Founded in 1998, ADVANTEC is a professional consulting firm specializing in multi-modal transportation planning, engineering, and technology services. Their name stands for our focus to capture ADVANCEMENTS in TECHNOLOGY for the benefits of their clients, thus providing innovative solutions that meet the needs of clients and the public they serve.

They have worked extensively with the Coachella Valley Association of Governments (CVAG), primarily on the multi-phase CV Sync project. Currently, they are supporting HR Green on the preparation of CVAG's Broadband Strategic Study.

Multi-Modal Smart Mobility Solutions – ADVANTEC has provided planning, design, and implementation for all aspects of Multi-Modal Smart Mobility and Intelligent Transportation Systems (ITS) programs. Our experience includes the development on Citywide and Regionwide ITS Master Plans, Connected/Automated Vehicles (CAV), Integrated Corridor Management (ICM), Bus Rapid Transit (BRT), Concept-of-Operations (ConOps), System Engineering Management Plans (SEMP), Technology Assessment, Signal Synchronization, and regional ITS architecture for local municipalities, Caltrans and FHWA.

Smart Cities/Region Program – ADVANTEC and Coachella Valley Association of Governments (CVAG) are developing a Smart Region Program implementing ITS on a valley-wide basis to maximize highway and arterial system capacity, improve operational efficiency, improve safety, and improve

KEY TECHNICAL LEAD / CONTACT PERSON

Carlos Ortiz, PE, TE, PTOE P: 949.861.4999 E: cortiz@advantec-usa.com

the environment. In addition, other smart cities solutions are integrated in the program including Big Data, Smart Government, Internet-of-Things (IoT), Open Data, and Broadband Communications. Also, other non-transportation technologies are planned to the included under the program including Smart Weather Sensors, Smart Parking, and Smart Lighting System. Led by Carlos Ortiz and a team of over 10 engineers, ADVANTEC began with the Regionwide ITS Master Plan identifying emerging transportation technologies (i.e., connected and automated vehicles, ICM, Mobility-as-a-Service, Mobility-on-Demand, and Smart Cities initiatives), and continued through the project development process involving SEMP, ConOps, and System Requirements, Environmental, Preliminary Engineering, Systems Integrator Procurement and Design, System Implementation, Construction Management and Inspection, and Traffic Signal Synchronization. This includes coordination and approvals from Caltrans District 8, County of Riverside, and eight local agencies. ADVANTEC worked with CVAG in the development of the Cooperative Agreement at the initial phase of the program.

Broadband Communications - As part of CVAG's Smart Region Program, broadband communications will be installed along 21 Corridors in the Coachella Valley. As a result of our ITS planning and design efforts recognized by the state, Highway 111 was selected for funding by California's Middle-Mile Broadband Initiative, which CVAG is the only agency that received funding other than Caltrans. ADVANTEC is working with CVAG, the local agencies, and the state for other funding opportunities to advance middle-mile broadband across the remaining corridors with connectivity to major and local educational institutions with access to disadvantaged communities to increase the quality of life throughout the region. In addition, ADVANTEC is working with CVAG and the local cities to provide Public-Private broadband communications within their communities.

Broadband Master Plan

▷ City of Coachella

Connected Vehicle to Everything (C-V2X) **Technologies** – As part of **CVAG's** Smart Region Program, ADVANTEC provided planning and design services for the implementation of C-V2X technologies across the Coachella Valley. ADVANTEC developed over 500 performance requirements for the selection of the Roadside Units (RSUs) and conducted a Pilot Project so the selected technologies met the performance requirements. The goal is to provide Signal Phasing and Timing (SPaT) messages and Basic Safety Messages (BSMs), including programmed messages for construction zones, advisory messages, wrong way driving, etc. to motorists via their vehicles On-Board Units (OBUs). The selected RSU will also provide WiFi/ Bluetooth Arterial Management Data and can integrate 5G communications to provide C-V2X via cellular communications. In 2022 and 2023. ADVANTEC will be conducting additional Pilot Projects that includes Vehicle-to-Pedestrian (V2P) and Vehicle to Bicyclists (V2B) communications. In addition, ADVANTEC is working with various Automated Vehicles/Shuttles manufacturers to bring automated vehicles to the Coachella Valley during the 2023 Coachella Music Festival and other events.

Regional ITS Architecture – ADVANTEC served as Prime Consultant to METRO for updating the Los Angeles County Regional ITS Architecture in 2018-2021, working with all 88 cities, Ports of Los Angeles and Long Beach, Los Angeles World Airports (LAWA), transit agencies, and other stakeholders. ADVANTEC also served as subconsultant on the SCAG Regional ITS Architecture Update project in 2017-2019. An update to the County Regional ITS Architectures was long overdue with a need to reflect new ITS services and interfaces found in the current National ITS Architecture. The County Regional ITS Architecture needed to reflect the many existing ITS deployments and planned ITS developments since 2004. This project presented a forward-looking opportunity for regional stakeholders to revisit the architecture as a planning framework to support the next wave of ITS investments and Smart City initiatives that will shape mobility in LA County in the years to come. The Los Angeles County Regional ITS Architecture Update considered AV/CV Deployments and addressed the needs of non-motorized users. Their expertise is paramount to assist local municipalities and Metro to adopt ITS design architectures that fit the regional requirements.

Project Organizational Chart

Project Organizational Chart

Irena Stevens, our assigned **Project Manager,** will coordinate the day-to-day tasks of our team, review project deliverables at key milestones with city staff, and be available for requested meetings with your staff and stakeholders. Your primary local point of contact is **Tim Jonasson, PE**, our **QA/QC Manager** and a long-time Coachella Valley resident. He has served in this role for broadband master plan assignments with CVAG and the cities of Palm Desert and Palm Springs and can quickly interface with City and local stakeholders, as needed. **Ben Lewis-Ramirez** will handle **community engagement and meeting facilitation** and will be supported locally by **Desiree Flores, PE** and **Berlyn Pimentel**, both of whom are bilingual and bring knowledge of the Coachella Valley area.

Broadband Master Plan

City of Coachella

We understand that staffing levels are critical to the success of any project. Our team is composed of highly qualified professionals with the experience and expertise needed so your project is completed on time and within budget.

Our staffing levels are carefully calibrated to meet the specific needs of each project. We start by conducting a thorough analysis of your project requirements, including the scope of work, timeline, and budget. Based on this analysis, we develop a staffing plan that outlines the roles and responsibilities of each team member and the required qualifications and experience.

All of our proposed staff have worked together on broadband master plan projects throughout the western United States and nationally. Moreover, our core staff bring extensive Coachella Valley experience with senior leadership who have been long-time Coachella Valley residents and have served the majority of agencies in the region.

Our team members bring a specific blend of skills, experience, and ability to work collaboratively to achieve broadband project goals. We believe that diversity is key to success, and our team includes professionals with a range of backgrounds and perspectives. This diversity allows us to approach problems from different angles and develop innovative solutions that meet your project's unique challenges.

Once the staffing plan is approved by the City, we work closely with you so that our team is aligned with your project's goals and objectives. We provide ongoing communication and support so everyone is on the same page and working toward a common goal.

Our staffing levels are designed to provide flexibility and scalability. We can quickly ramp up or down the team size based on changing project needs or unexpected challenges. We believe that this flexibility is critical to the success of any project and allows us to adapt to changing circumstances quickly.

In addition to our team's technical expertise, we also place a strong emphasis on soft skills such as communication, problem-solving, and collaboration. We believe that these skills are just as important as technical expertise to promote project success. Our commitment to community engagement is centered around assigning a core team of staff not only familiar with the Coachella Valley, but also with the bilingual skills to facilitate outreach efforts.

We are committed to providing staffing levels that meet the highest standards of quality and excellence.

Our Fiber and Broadband Capabilities

Item 17.

Knowledge Of:

- Broadband Master Planning Across the United States
- Local, State, and Federal Laws
- Inventory and Infrastructure Identification and Needs Assessment
- Best Practices and Latest Techniques and Technology
- Conceptual Network Routes and Final Design Documents

Our Core Staff

- Know and Understand Fiber and Broadband
- Local Knowledge of the Coachella Valley

Keys to Success

- Experience Providing Similar Broadband Services from Conception to Construction
- Proactive Community Outreach and Managemer
- Nationally Demonstrated Ability Across Various Markets
- Locally-based and Knowledgeable Staff Members
- Quality Project Records
- Clear Communication
- Sound and Defensible Decisions/Recommendations
- Bilingual Staff with Experience in the Coachella Valley

Broadband Master Plan

Project Work Plan

PROJECT MANAGEMENT (RFP TASK 12)

HR Green has been in business for 110 years. One of the main reasons for our success over so many years is our dedication to and development of a proven project management process. Our Project Managers are charged with the pivotal role of bringing our company's efforts together with your expectations, budget and schedule.

Our Project Management system is another factor that distinguishes us in the industry. Within the process discussed in the Approach section, we have built in project management tools that keep the process flowing and on track.

Deliverables at Every Task

In our experience, an intermediate deliverable approach is the best way to accomplish this. In the specific tasks below, there are deliverables at every task. The provides an important way to monitor the progress of the project and to make sure the HR Green team and Coachella's leadership stay in alignment regarding project schedule, directions and outcomes. We often provide a deliverable from which our client realizes a need to make an alteration in the path of the project (building in the decision points mentioned in the Approach). At a deliverable level, that can be done. This process makes for a better project with better outcomes.

Proven Project Managers

HR Green Project Managers will be accessible and responsive to you at all junctures in the project. Specifically, HR Green proposes the following methods to guide our overall project communication for this short-fuse project:

PROACTIVE PROJECT COORDINATOR AND PROJECT MANAGEMENT: To promote continuity your Project Manager will serve as your main point of contact and oversee all aspects of efficient project management, on-time and within budget service.

PROJECT REPORTING: MS Project will be utilized as the primary tool to create and manage the project milestones and deliverables. This will be modified based on community needs throughout the project.

WEEKLY UPDATES/BI-WEEKLY MEETINGS: We will provide weekly, written updates on project status, complete with percent complete on major milestones, issue logs and risk management logs. These tools will be managed and updated by HR Green and will be reviewed on a bi-weekly basis in person with your assigned project lead.

PROJECT COORDINATION: As we approach the deliverable milestones, update meetings will provide a focused opportunity to sit down together and review progress in the deliverables and on the project. This approach requires careful listening from the Project Manager to client input. It also requires the Project Manager to closely monitor the project schedule and budget to know when these milestones are approaching. Please note, finally, that it invites active participation with City leadership as part of one team. The voice of the community is crucial to the success of this management approach.

RISK MANAGEMENT: Our project management experience is a direct result of our client's need to accommodate demands for transparency, accountability, and good stewardship of tax dollars. Risk assessment and mitigation is an important part of the team's responsibilities. The first step is to develop a Risk Matrix, where specific and general risks can be noted and scored, along with action plans and status tracking. Each "risk" is evaluated for its potential impact on the project's cost and/or schedule. A risk mitigation action plan can be developed in collaboration with the project team.

History validates the effectiveness of this approach to client satisfaction. Some of HR Green's current clients have been with us for more than 70 years. The paths to successfully define and implement the actionable steps in the Plan phase are detailed in a Broadband Master/Strategic Plan. This Plan provides the details to implement the strategies and tasks, real recommendations with actionable next steps.

DELIVERABLES

- Project schedule with updates
- Meeting Agendas and Meeting Minutes for update meetings
- > Deliverables for each task (detailed in the tasks below)

Broadband Master Plan

▷ City of Coachella

VISION

TASK 1 - KICKOFF MEETING

With every community, we begin the process with a kickoff meeting to make sure everyone is on the same page about the goals and tasks of the project, who will be doing what, how those tasks will be done and when they will be worked on and completed. We also discuss any information that needs to be exchanged

DELIVERABLES

- > Agenda for the kickoff meeting (including information request)
- ► One meeting
- Minutes of kickoff meeting

TASK 2: FIRST PRESENTATION TO COUNCIL

HR Green will prepare for and participate in a project introduction meeting with City Council to discuss the Scope of Services of the broadband master plan, including the anticipated timeline for the project. We will seek and listen for input from the Council and guidance for the project.

DELIVERABLES

- Presentation for the meeting (coordinated with staff)
- ► Notes from City Council (to discuss further with staff)

TASK 3: CURRENT AND FUTURE NEEDS ASSESSMENT

As you describe in your RFP, part of gaining a clear understanding of the current broadband strengths and weaknesses in the City involves a well-planned and orchestrated engagement with the key stakeholders involved in broadband in the City. Below we break out our approach and typical tasks in gathering the needed data to assess the current and future broadband needs.

TASK 3A: COMMUNITY ENGAGEMENT – ENGAGEMENT PLAN

As you point out in your RFP, there are many stakeholders who can provide an important array of different perspectives regarding broadband in Coachella. We agree with the list of stakeholders in your RFP on page 7 (and the subsequent paragraph) and would suggest adding the library on Sixth Street (you may have considered that included within the government agencies) and regional organizations .

We plan and organize those interactions (survey and meetings) in the Engagement Plan. This is an incredibly important document in the process, because we provide drafts of survey questions, ways the survey will be promoted, lists of stakeholders, draft questions we will ask them, etc. It is a working document that we provide in draft form to be reviewed, edited and filled in as we progress through the stakeholder process. The Engagement Plan process helps keep the steps organized and provides the level of involvement you desire in everything that is done.

Engaging in a dialogue with community residents, businesses, public sector staff across departments, internet service providers (ISPs) and other stakeholders, individually and in small groups, helps determine the issues that the community, businesses and residents face when it comes to broadband access and utilization. We also ask for and verify data in these discussions.

Resident and business owner surveys can be effective ways to help decision makers better understand community needs. They can also confirm or challenge grant eligibility maps and information gathered in the Market Assessment. One-on-one and peer meetings with policymakers, anchor institutions and key influencers can also drive visibility into community needs and the goals that department leaders have.

Broadband Master Plan

City of Coachella

These surveys and meetings will help determine the community's desire for improved levels of broadband service, current market conditions and deficiencies, stakeholder needs, and insights on what role local government should take in providing the service. In stakeholder meetings we also ask what needs are anticipated to help tailor any recommended steps to address current and future needs. For later planning phases, this information helps predict take rate and the optimum monthly cost users would be willing to pay for new services, if those data points are needed.

We have bilingual staff assigned to this project to help in discussions and the process of developing documents.

DELIVERABLE

Engagement Plan

TASK 3B: COMMUNITY SURVEY

As mentioned in the Engagement Plan section, surveys are important to gather specific information like actual upload and download speeds, customer satisfaction, provider locations, etc. Also, questions can be asked to determine customer satisfaction and what role citizens and businesses would like the City to play in broadband improvement. Surveys can also help clarify revenue possibilities in infrastructure that might be built (help in defining take rate possibilities). HR Green has recommendations for questions that will provide the information that will be needed in the study, but feel it is important to collaborate with City leaders to finalize the survey.

Here are other uses the data in the survey can provide:

- **Real data:** The information in the Market Assessment is reported by the providers and goes through several steps to get to the maps we see. There are several opportunities in that process for the data to be incorrect. We have worked with providers who had mistakes in their reports. We have also found where the data was entered incorrectly at some point in the process. Survey data is a concrete, ground-truthed source of information to check the other data sources that are used in broadband decisions.
- Refute maps: Survey data can, then, be used to challenge the maps, if they are incorrect. To improve the maps if
 they are wrong, there needs to be actual, good data. The survey, if done correctly, can provide that information. Most
 Federal and State processes will include an opportunity to supply data to improve or correct maps a survey is one
 of the strongest ways to do that.
- **High-level Design (HLD):** Once a Gap Analysis has been completed (within which the survey results will be an important data source), there may be an opportunity to do a high-level design of ways to improve broadband. An HLD requires addresses to design to. Survey addresses are some of the most accurate points to design to.
- **Providers:** Survey information is important to providers. Having a clear picture of broadband needs and what potential clients are looking for is valuable information for providers. Also, if they are considering installing broadband infrastructure to help solve broadband issues, a detail design will have to be done. The addresses in the survey information help them know that their designs will be accurate. Both the potential customer information and a confirmation of accurate addresses are valuable enough to be part of the conversation with providers.

In addition to gathering statistical data, the survey serves another, very important civic role. Several opportunities are given for citizens to share anecdotal evidence of their experience with broadband services and attitudes about possible solutions. Citizens thus feel that their concerns are being listened to, increasing the chances that they will buy into any solutions that meet those concerns.

HR Green utilizes a GIS based survey platform. Once the survey questions are ready, we load them into our survey tool and produce two links: One is for citizens and local businesses to take the survey and the other is given to staff through which they can see the progress of survey responses.

To gain both the quantitative (statistically valid) and qualitative (geographically and demographic) number of surveys desired, the survey will need to be promoted through all available channels. The different ways the survey will be promoted will be detailed in the Engagement Plan, but we highlight this topic because it is crucial to the success of the

survey and will require participation from City leaders and staff. The City's relationship with your citizens and businesses through your website, social media channels, newsletters, email blasts, events, stakeholders, etc. are key ingredients in letting people know to take the survey.

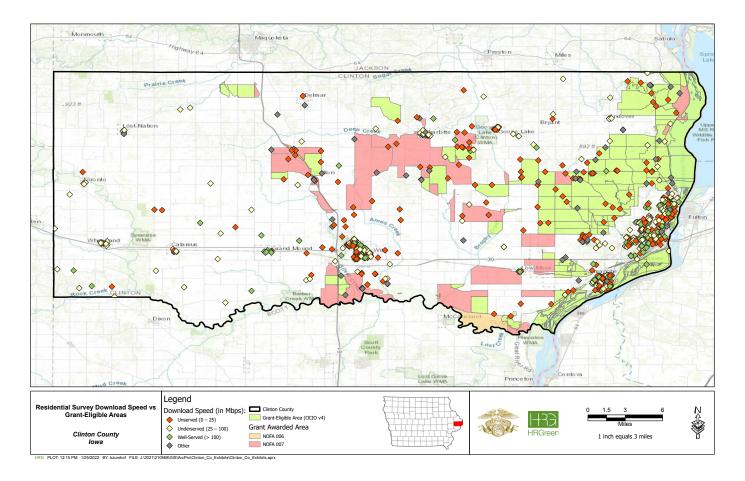

HR Green provides samples of wording for press releases, social media posts, emails, etc. (which will be in the Engagement Plan), but the degree to which the community has and uses channels to reach the citizens and businesses will have a significant impact on results. This is, truly, a collaborative effort.

Your RFP mentions in person survey promotion. It can be challenging to define costs for in-person promotion and for printed materials. We will provide costs that show our logic in how they were formulated. If other options are desired, we can easily change the inputs into those formulas to provide what is needed.

DELIVERABLES

- GIS based survey
- Link to survey results
- Report of findings of survey results

The map below contains several pieces of data that were helpful to one of our clients. It contains survey results for that particular community, areas that are considered eligible in the current eligibility map for that state and areas that had received previous grants.

Broadband Master Plan

▷ City of Coachella

TASK 3C: STAKEHOLDER MEETINGS

HR Green begins the stakeholder meeting process in the development of the Engagement Plan discussed above. We work with staff to clarify three things:

- The list of stakeholders
- The meeting schedule (how many meetings and who will be included in which meetings)
- What questions to ask stakeholders. We typically want to determine current and future internet service needs and whether current connectivity meets those needs

As stated in the Engagement Plan section, we agree with the list in your RFP. Coachella contains a part of the City not found in all other cities – the large open areas to the East and Northeast. Defining stakeholders in those areas and what to discuss seems important. Also, discussions with regional entities (like CVAG) will be relevant to the study.

We also feel it is important to utilize the stakeholder meeting process as a way to build relationships with ISPs. They will likely play an important role in the final plans, so multiple meetings with them can be beneficial. As those relationships build, we can ask them to verify their coverage, encourage their input and let us know their future plans.

We will work with staff to finalize a list of organizations, determine meeting times and whether meetings will be virtual or in person. If in person, it is important to define available meeting locations and how meetings will be grouped to maximize on-site time. We will want to have a definitive number of businesses and resident group that fit within the agreed upon budget.

DELIVERABLES

- Meetings with identified stakeholders
- Report of findings of input from stakeholders

TASK 3D – DIGITAL EQUITY NEEDS AND PARTNERS

We were glad to see digital equity topics mentioned in your RFP. It can be an important community issue and there will be grants focused on digital equity. Not everyone has the same access to good broadband and some who have access can have difficulty using the services. Barriers to digital equity can be poverty, language challenges, age, etc.

Those who do not have access or who are not utilizing what is available are often not part of surveys and meetings. Working with agencies who can help bring those voices to the table can improve survey results and can help address digital equity issues.

Work on digital equity will be part of the Engagement Plan and work on addressing issues will begin when the preliminary Engagement Plan is adopted. Particular attention will be focused on:

- Trying to have representation in the survey.
- Working with agencies for paths to improving digital equity in action plans.

Addressing digital equity is important to help everyone participate in the digital world and digital economy. It is also a particularly relevant focus right now because a portion of the upcoming BEAD grants will focus on digital equity (the "E" in "BEAD").

DELIVERABLES

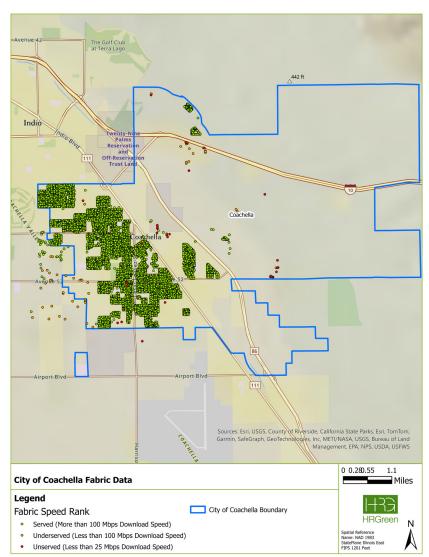

- Development of a list of agencies who might be able to help with digital equity outreach (as part of the Engagement Plan)
- Data in the survey to monitor participation of those who might have broadband adoptions challenges (as compared to census statistics)
- Meeting agendas and minutes of meeting with potential digital equity partners
- Report of findings of meetings with digital equity partners

TASK 4: INVENTORY AND ASSESSMENT OF CITY-OWNED BROADBAND ASSETS

Very early in the project, we begin to build the asset inventory. This starts with gathering available GIS data. In our kickoff (or before), we will discuss what information we might need from the community to document broadband related assets in the community. These can help inform options for connecting and possible negotiation with potential partners. This part of the inventory is a GIS exchange.

There are several opportunities in the study process to gain information about City-owned broadband assets:

- In the kickoff meeting, we will provide an Information Request detailing lists of assets that are helpful to include in our map.
- In the stakeholder meetings, we will ask for information on any broadband related infrastructure they have (conduit, wireless assets, fiber, etc.). Often, these questions are for City Department leaders so any information they have is included.
- Field verification. HR Green has staff who provide field data collection and broadband infrastructure assessment. This can be challenging to define in scope and costs. For HR Green, these costs are based on hours and expenses. We will provide a number of hours and related costs that we think will be appropriate for collecting data on City-owned broadband assets. Through our sub-consultant Advantec, we anticipate having some information already from their work on the CV Sync project.

Broadband Master Plan

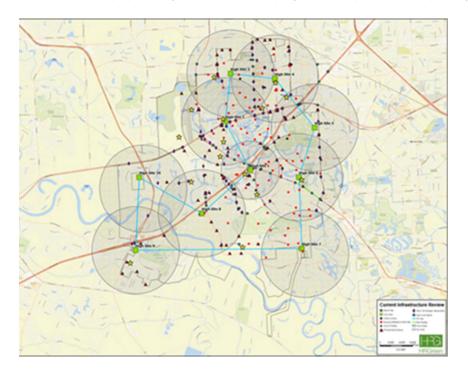

▷ City of Coachella

The inspection, verifications and inventories in the Scope of Work section on Page 15 of your RFP is a well thought out plan for developing a good understanding and documentation of City-owned broadband assets and capacity. We acknowledge this list and include it in our Scope.

We want to reiterate that HR Green is a 110 year old civil engineering firm that includes a business line devoted to Broadband. That combination fits very well with this section of your study. Documenting pavement project plans, CIP, real estate that could apply to broadband and vertical assets are all very typical components of civil engineering. HR Green has staff who work with those components for our municipal clients all day, every day. Utilizing their expertise and efficiency in these areas in collaboration with our broadband team adds depth, productivity and effectiveness.

HR Green will bring the data we receive into GIS (providing a map of existing infrastructure and related assets) and a technical memorandum of our findings. This can be a powerful process. For the City of Sugar Land, TX, we worked with their departments to bring together their broadband related assets and developed the below map.

When we showed this map in a meeting of the City leadership, one of the top leaders in the City commented, "I have never seen this before." It also played a significant role in helping us develop plans for improving their broadband.

DELIVERABLE

► GIS map of current community assets

Broadband Master Plan

▷ City of Coachella

TASK 5: ASSESSMENT OF PRIVATELY AND NON-CITY OWNED BROADBAND RESOURCES

Task 5 contains several important steps.

Market Assessment: The FCC collects data from providers. HR Green accesses that information to determine what broadband services providers report they offer in community, what coverage and speeds they report, what technology they use, pricing plans, etc. This is important information because many grants base their eligibility on this data. It is known to have flaws and inaccuracies, so it needs to be checked.

Subsequent tasks provide the opportunity to get "ground-truthed" data that can be used to check the accuracy of this FCC data. HR Green will provide these data sources and our analysis to confirm or challenge the FCC information.

In the Market Assessment development, we identify the providers in the community, and we include them in the Community Engagement task to begin discussions with them to develop relationships and better understand their infrastructure and plans.

This task fulfills the beginning of the assessment of what providers offer in the community. This part of the provider assessment is early in the project flow for HR Green because it establishes a baseline that will be confirmed or challenged in subsequent tasks of the project.

Provider Relationships: As mentioned in the Engagement Plan and Stakeholder Meetings sections, building a relationship with the providers is important for their input, information they can provide and their role in final plans. In meetings with them, we will discuss their coverage and gain as much information as they will provide. They can be guarded in the information that they share, so we cannot guarantee what they will provide, but in comparing Market Assessment information, survey data, permit records and discussions with them, we will work towards as full a picture as possible..

Stakeholder Discussions: In talking with organizations like schools, libraries, healthcare, businesses, etc. in stakeholder meetings, we will ask what broadband related infrastructure they might have available. We will document any infrastructure that could be used in broadband improvement and include it in any plans that might develop.

Pole Owners: Pole owners and pole conditions determine the availability of aerial broadband construction (if aerial is needed). Given the City's desire for underground utilities, we anticipate exploring aerial construction only when necessary (if at all). HR Green will talk with pole owners to see their willingness to allow attachment and their assessment of make ready costs. As attractive as aerial might appear in lowering broadband improvement costs, there are factors that might make that impossible or cost prohibitive. We will work to make an assessment of those issues and gain whatever pole data can be shared.

Wireless: There are different technologies in wireless communications and different levels of assessment of those options. HR Green has deep project experience in all aspects of broadband including cellular, WiFi, fixed wireless, CBRS, etc. Typically, fixed wireless providers are included in the provider meetings.

We will do a high-level assessment of cellular coverage and existing tower sites. Deeper study is possible, and we will offer that as an alternative. HR Green has some of the best and nationally recognized people for these evaluations.

HR Green will also do an analysis of WiFi and CBRS alternatives. We are doing very similar analysis in several cities across the country.

CV Sync: It will be important to understand and catalogue the infrastructure related to CVAG. With our sub-consultant Advantec, we will have the best data possible. This is a significant connection that will significantly help with information and coordination.

DELIVERABLES

- Market Assessment report
- ▶ Report of technology options and their applicability to the City of Coachella
- GIS layer of findings
- ▶ Technical Memorandum of non-City owned broadband assets

TASK 6: POLICY AND PERMIT PROCEDURE REVIEW AND RECOMMENDATIONS

City policies and permitting procedures can often help or hinder broadband investment. HR Green will review the City's policies and permit procedures related to broadband to see if they are typical and if they promote broadband expansion or could be problematic for private investment.

Communities can have different goals related to broadband expansion. Some communities want to attract broadband investment from private providers. Others have urban areas within which the Right of Way (ROW) is in jeopardy of being fully utilized. Some policies and procedures can be used to incentivize broadband investment to meet City goals. Others can be utilized to protect ROW segments that are running out of available space but can be done in ways that encourage private investment and collaboration for improving broadband where needed.

DELIVERABLES

> Report of findings of broadband related policies and permitting procedures and recommended changes

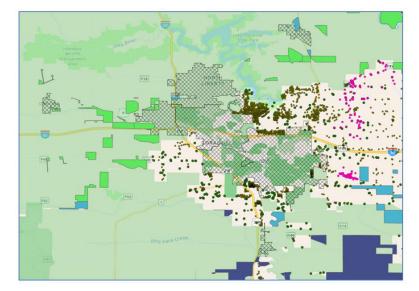

TASK 7: GAP ANALYSIS

The information that details the needs will already be in place from the Market Analysis, Survey and Stakeholder meetings. With that information, HR Green will perform an analysis to determine where there are broadband concerns. These gaps could be lack of adequate connectivity, redundancy, insufficient capacity, future needs that current infrastructure will not be adequate for, economic development concerns, etc. We will analyze the findings to point out connectivity issues. The results of this analysis will be shown in report and map form.

DELIVERABLES

- ▶ Report of findings of current and future connectivity concerns
- ► GIS map depicting broadband concerns
- SWOT analysis

Below is one example of bringing together data sources to form one type of gap analysis.

City of Coachella

TASK 8: MID-POINT PRESENTATION TO CITY COUNCIL - VISION MEETING/WORK SESSION

The data, gaps and gap analysis will tell a story. We have found it important to stop at this point and make sure community leadership see and understand the data and are clear on what gaps and concerns exist – we are also glad that you recognize that in your RFP also. We present this information in a work session (coordinated with City staff) and facilitate the development of broadband related goals as they flow from the real data and clear understanding of gaps.

These goals can consist of what broadband coverage the community leaders want residents, businesses and public sector entities to have; what forms of solutions they want to explore to fill gaps and address present and future concerns, the role they think the community should have in solutions, etc. These are important to understand as options for solutions are explored.

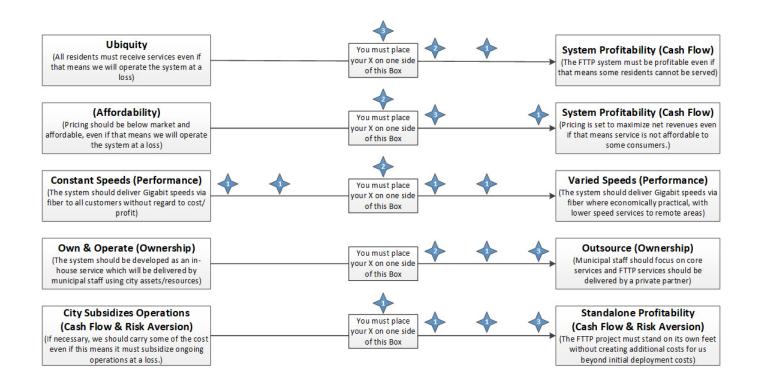

If City staff want to pursue a different approach or presentation of information, we are glad to do that.

DELIVERABLES

- Presentation for City Council (to be coordinated with staff)
- > One work session to present data and develop goals
- ► Notes from City Council session (to be discussed with staff)

Below is an example of one visioning tool:

Council Competing Values Framework for Broadband Networks

Broadband Master Plan

City of Coachella

TASK 9: FEASIBILITY ANALYSIS - OPTIONS TO IMPROVE FIBER AND BROADBAND CONNECTIVITY (HIGH-LEVEL DESIGN)

"Feasibility" is a term that can have several meanings in broadband.

Typically, feasibility is a step that is taken if the City decides to build and own infrastructure. That would include the longer list of bullet points on Page 18 in your RFP. The thought process is that this level of feasibility is needed to help the City determine if building and owning will pay for itself and if it can be financed. To have that full picture, you have to know revenue, capital costs, operational costs, debt service, etc. Those will tell you if the project is sustainable and if financing institutions will provide the capital needed to build and own it.

This is one option to be considered and evaluated against the other options the City has. To be able to compare your options, we gather all of the information needed for the different possibilities you have. For example, in the survey, we ask questions about how likely a customer is to switch and how much they are paying. That data informs the revenue side of the City owned option.

The important thing to know is that you will probably not need to do a full feasibility on other options. If a provider offers an option that the City thinks is worth pursuing, then a higher-level cost/benefit analysis is all you would need.

Applying that understanding to the business models discussed on Page 18 of your RFP (which is a good picture of your options), a full feasibility would only be needed for dark fiber, possibly open access and the municipality-owned and controlled options. Status quo, policy change and P3 would likely only need a cost/benefit analysis.

Whatever options you choose to explore, with a clearer vision of the needs and opportunities for broadband in the City, HR Green will use GIS tools to develop a high-level design of potential options to improve those connectivity issues. We will provide a preliminary design of the options that make the most sense in the community.

The design for broadband expansion will be informed by community leadership and decisions that were made in the Vision phase of the project. At this point, we will provide industry level costing for the options to improve those connectivity concerns.

It is important to note that we can provide analysis on more options and can also provide a high-level desktop design for those options – these both just require more hours. If the community desires to see other options, HR Green's tools can be utilized to explore other possibilities. Those could require additional scope and fee – we can discuss that if that is needed.

To be clear, the high-level design and costing are not constructable plans. They are full paths for broadband improvements but are not field verified or given final detail design (HR Green can provide those services in subsequent scope if needed).

Broadband Master Plan

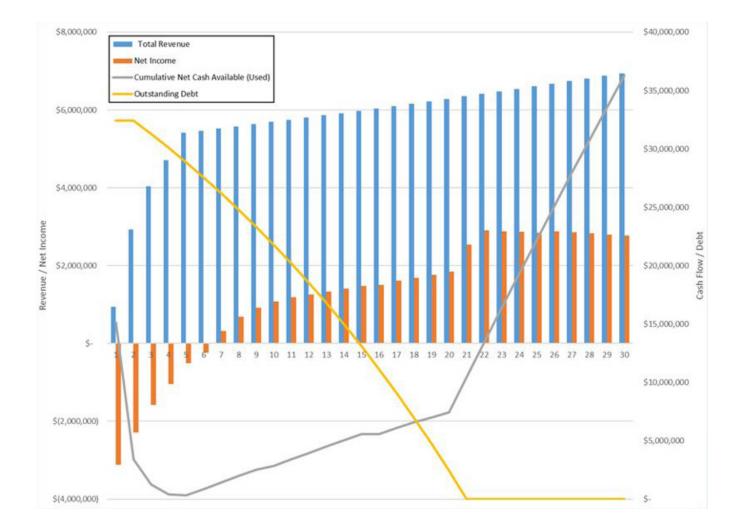

▷ City of Coachella

These high-level plans and high-level costs can be used explore options with different providers, evaluate if the City wants to further explore building your own dark fiber, ring or network (for open access or municipality owned and operated), etc.

If the City does decide to explore building infrastructure you will own in any of the possible options (dark fiber, middle mile, open access, a municipal ring or a municipal network), a full feasibility would probably be necessary.

HR Green's feasibility includes all of the topics in your deliverables list on Page 18. To make the decisions of what to build, the leaders need a clear picture of anticipated revenue, capital costs, operating costs, debt service, etc. HR Green's feasibility is a full analysis of whether a network should be financially sustainable. Our feasibility is based off of real-world experience of building and running networks.

HR Green does not have a pre-set result – the data and numbers speak for themselves. If a project is not feasible on its own, we report the real results. As part of the feasibility project, we can also determine what level of grant dollars (if any are needed and available) the project would need to help make it feasible (if the grant dollars can lead to that result).

Broadband Master Plan

City of Coachella

DELIVERABLES

- ▶ High level design and costing to meet community broadband improvement needs for the scenarios identified by the City
- Full feasibility of up to two options (we are glad to perform feasibility for more options, we just needed a basis for calculating fees)

TASK 10: DRAFT FIBER AND BROADBAND MASTER PLAN

HR Green combines all of the deliverables from the tasks completed during this project to form the basis of the final master plan. This is a full document containing all of the data collected, gap analysis, options to improve broadband and other information developed during the course of the project.

This document will also include HR Green's recommendations and actionable next steps. These are significant. HR Green provides real recommendations based on the data and the City's goals that can lead to broadband improvements. Additionally, our actionable next steps provide real and impactful steps the City can take to improve broadband challenges. The Master Plan will include the "road map" of recommendations and options for community.

Our Broadband Master Plan includes the bullet points on Pages 19 and 20 of your RFP, including the vision statement, infrastructure analysis, strategy and recommendations for initiatives and next steps, public access options and next steps, policy recommendations, financing options and overall implementation and action plan with specific steps over time.

For an example of a HR Green final broadband master plan, please follow this link: <u>https://epc-assets.elpasoco.com/</u><u>wp-content/uploads/sites/2/EI-Paso-County-Broadband-Strategy-Final-20190308.pdf</u>.

DELIVERABLE

Community Fiber and Broadband Master Plan

TASK 11: BROADBAND MASTER PLAN REVIEW, REFINEMENT, AND ADOPTION

To finalize the draft Broadband Master Plan, as per your RFP, in collaboration with staff, HR Green will prepare agendas, record minutes and make revisions to the draft plan according to the meeting list:

- Agendas, minutes, revisions to plan
- Two meetings with City staff
- Three public presentations
- One City Council meeting/workshop

Based on the feedback from these meetings, HR Green will finalize the Broadband Master Plan.

Then, we will participate in up to two Council meetings to adopt the Broadband Master Plan (and any policies that the Council might put on the agenda).

DELIVERABLES

- Agendas for meetings
- Notes from meetings
- Final Broadband Master Plan

OPTIONAL TASK 13: EVALUATE OPPORTUNITIES FOR PUBLIC-PRIVATE PARTNERSHIPS

With the data and information developed in the previous tasks, the City will have a decision to make: Do you pursue working with private providers to improve broadband or does the City build some or all of a network. There is a separate task for governance that can go into more detail on the spectrum of options between build vs collaborate, but this task works through the process of how to evaluate opportunities with private providers.

We will provide examples of the most common partnerships (including what is being done within State laws) and help you identify potential partners. HR Green is not a law firm, so we cannot provide legal advice, but we can provide general industry norms for how these arrangements can work.

Your community can play a central role in collaborating with and organizing the efforts of private providers to improve broadband. For example, the community controls the Right-of-Way ROW). The community also has several options with policy and permitting procedures through which you can help a provider get to market more quickly and possibly less expensively. And, you can support private providers in grant efforts.

Request for Expressions of Interest Development and Advising

One mechanism to help coordinate the effort to organize options for private providers is through HR Green's Request for Expressions of Interest (RFEI). Starting with the community's goals and with the data collected in this process, HR Green will help the community through the formal RFEI process.

Basically, the goal in the RFEI is to let the providers know what the City hopes to achieve and asking them to propose how they can either solve those broadband issues or be part of a larger solution. The impacts of this process can be powerful. As the providers communicate and express their goals, a plan can be formed to achieve concrete solutions to broadband problems. HR Green will work with City staff to publish the RFEI, proactively reach out to vendors (building on the relationships developed in previous tasks) and advise staff through the RFEI process.

The timing of this task will be important. HR Green will work with staff to have the high-level design correspond with the RFEI. This will provide the City the opportunity to explore high-level design options and high-level costing based on the requests of the potential partners who express interest. Rather than having one option (as is the case in most broadband studies), HR Green's process and tools provide the opportunity to evaluate the costs and benefits of the options the providers offer.

DELIVERABLES

- ▶ Up to 16 hours of meetings with Providers to explore interest in partnership models
- ▶ Report of current partnership model and list of possible partners and interview findings
- ► Develop RFEI for private partners
- ► Manage RFEI process (submission to potential partners, advising the City)

OPTIONAL TASK 14: GOVERNANCE OPTIONS

As options to improve broadband are defined, the different possibilities could have differing governance models. It is important to understand the benefits and risks of different ways of arranging ownership and support for infrastructure investment. HR Green has expertise, tools and a process to walk community leadership through those options to be the best stewards of public money and balance control of outcomes for community stakeholders.

HR Green will provide information on and lead a work session about what the differing governance options are and what the impacts of those would be to the community.

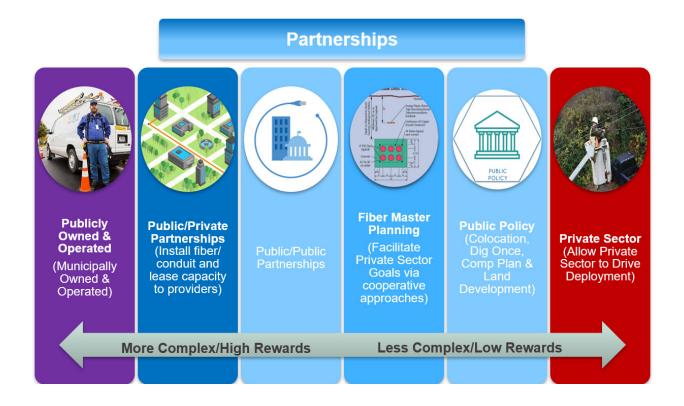

DELIVERABLE

▶ Work session on business models and infrastructure governance.

Broadband Master Plan

City of Coachella

OPTIONAL TASK 15: DETAIL DESIGN

If a project is feasible and moves forward to detail design, HR Green has a nation leading design/engineering team. They can design both Outside Plant (OSP) and Inside Plan (ISP – network access equipment). Again, you will not need detail design unless the City decides to build infrastructure that you will own (for example a ring or a network).

OSP NETWORK DESIGN: The HR Green design team utilizes the high-level design to refine it to a mid-level design, then a final detail design. As a contiguous area is surveyed and posted, the actual fiber network is designed. The designer will optimize the network design by assessing the service points and all possible fiber routing options and existing infrastructures.

HR Green's field personnel do field data collection to verify (or change) the routes determined in high-level design and collect all of the data on the final route that is needed for construction level designs. As the future service areas are established for a FTTH project, each fiber segment design, fiber assignment, and splice documents are completed. A comprehensive bill of materials (BOM) will then be generated for purposes of material requirements for construction of the network. This BOM will become part of a construction document set. HR Green's detailed designs are used across the Country to build world class networks.

PERMITTING PROCESS: By submitting data in a format that is manageable in size and easily understandable, we have been able to quickly obtain permits and signoffs where others have struggled. Often times we will use the permitting agencies' own data to support our case; and by providing detailed GIS maps of the project areas and potential impacts, we can focus on only potential problem areas not the entire route. If needed, HR Green also has staff augmentation personnel to help manage community permit volumes. If the City does decide to build a ring or network, permits will be necessary at least with the City and likely with other agencies.

Broadband Master Plan

City of Coachella

CONSTRUCTION DOCUMENTS: A CD set will be printed for each fiber service area under the oversight of a licensed professional engineer. Included: one printed set of documents and a set in PDF digital form for reproduction. On project closeout, we will transfer to the community all geodatabase files, map documents and other files in their original format.

DELIVERABLES

- Construction grade specifications and drawings of the complete outside plant network
- Inside plant equipment design when needed
- Permit drawings

OPTIONAL TASK 16: CONSTRUCTION OVERSIGHT/CONSTRUCTION PHASE SERVICES

Our in-house Construction Services team will work as an owner's representative to provide a contractor selection process and that the construction meets the engineered specifications of the project. Field inspectors will act as a liaison between the contractor and design engineers to minimize impacts on the construction timeline. Services may include:

- Attend a project kick-off meeting and facilitate regular project status conference calls with the Contractor.
- Review and approve Contractor's project timelines for engineering and construction.
- Review of contractor construction management and safety plans.
- Develop quality assurance inspection checklists to facilitate construction oversight.
- · Perform on-site inspection during construction for safety and workmanship.
- Perform on-site post-construction inspection for compliance with the approved designs and workmanship, to include a detailed review of accuracy and completeness for a sampling of as-built documentation provided by the Contractor. This may include verifying pole attachment clearances; confirming slack loop cable lengths; verifying proper bonding/ grounding; and verifying location of outside plant assets (splice enclosures, slack loops, handholes, etc.) using precision GPS receivers.
- Review Contractor construction invoices for consistency with design and observed construction progress.
- Review all Contractor-provided fiber optic performance test data, and perform independent testing (OTDR and power meter) for a suitable sampling to validate Contractor-provided test data.
- Prepare a comprehensive report documenting the results of our test data review, independent testing, and post-construction inspection to provide verification that the network, as installed, is suitable for your purposes and conforms to the approved final design.

DELIVERABLES

- Meeting agenda and minutes
- Inspection reports
- ► Correspondence
- Photography and video logs
- ▶ Requests for Information and Clarification
- Comprehensive report of construction phase activities

Project Schedule

Project Schedule

The duration of this schedule is mainly dependent on the scope of the City-owned asset inventory (as is the budget). If we can streamline the asset inventory, then this schedule should be able to be significantly reduced. This could easily be a six month project, but we wanted to reflect the amount of time it could take.

	TOTAL In-Scope Tasks	\$194,950

Optional Tasks

RFP Scope Number / Task		Cost
13	Partnership Identification and Discussions	\$12,500
14	Governance Options	\$7,240
15	Detail Design	TBD
16	Construction Oversight	TBD

HR Green's pricing shall remain firm for one hundred twenty (120) days following the closing date for the receipt of proposals.

The fees for this project have some important assumptions to consider. The way these assumptions are decided will have significant impacts on the budgets. Our hope would be to work together to save dollars in some categories to either be saved by the City or to be used in other ways to improve broadband in Coachella.

Assumptions:

- Travel is built into tasks 2, 8 and 11 at \$2,500 per trip. We propose two people who will travel from out of state and two who will be local. One of the HR Green team will be bilingual.
- The survey includes translation for Spanish of promotional materials but does not include printing of surveys or
 promotional materials. Without knowing what needs to be printed, there is no way to quote those numbers. The City may
 prefer to print outreach materials or HR Green can develop a budget once outreach efforts and needs are better defined.
- Stakeholder meetings and digital equity meetings are planned to be virtual, but local HR Green staff can be available with 48 hours' notice. This budget is based on six stakeholder meetings (usually stakeholders grouped together).
- The largest budget item is inventory of City owned assets. This is a challenging budget to define we based our number on 120 hours. This is a task in which dollars could be saved. The factors that will go into how the costs work on this task will be:
 - The data Advantec has.
 - The data we have from other projects.
 - The number of facilities to be inspected.
 - The level of inspection.
 - The number of trips needed by inspectors.
 - The data the City has.
 - The level of documentation/digitization required.

Very early in the project, it will be important to clarify each of these factors to verify they fit into 120 hours. It is possible that budget dollars can be saved in this task – that will depend on how the factors are defined. We propose a process of working together to define what data is available and what level of inspection will be needed – all with an eye to meeting or reducing the budget.

- Privately owned assets can be a challenge to collect. We start with provider relationships to help them understand what we are working on to see if they can provide information in a way that is acceptable to them and yet provides what we need. Sometimes NDAs can help (which we often sign) and a discussion of the level of information we need (which is not their competitive information) can help them provide what they can. Some providers do not give any data. Also, with our Market Assessment, other maps and survey data, we can often piece together data that providers might not offer (if needed).
- In our fees, we also want to point out that not all of the feasibility budget might be needed. For example, if the City does
 not choose to build a network for external use, you should not need a full feasibility. The difference between a cost/benefit
 analysis and a full feasibility that justifies funding is significant in costs and time.
- We also included some Optional Tasks that might be needed. For example, if you choose to work with providers instead of building a network that provides services to citizens and businesses, you very likely will not need a full feasibility, but you might need a partnership identification and discussions framework to help guide the provider selection/coordination process. A task for governance options can be included in that to work through what the ramifications of ownership models and investment mean and the impacts they can have. In that scenario, you would save a significant amount of the Feasibility budget and might need a Partnership task and Governance task spending less in total. Detail design is only needed if you decide to build a revenue generating network and it is shown to be feasible. Then, if you decide to move forward, the next step would be detail design, but the cost for it would be rolled into the network building costs.

HR GREEN

Billing Rate Schedule Effective January 1, 2024

Professional Services	Billing Rate Range
Principal	\$250- \$370
Senior Professional	\$250- \$370
Professional	\$170- \$250
Junior Professional	\$100- \$175
Senior Technician	\$130- \$180
Technician	\$75- \$145
Senior Field Personnel	\$140- \$225
Field Personnel	\$100- \$170
Junior Field Personnel	\$75- \$125
Administrative Coordinator	\$75-\$130
Administrative	\$75- \$130
Corporate Admin	\$100- \$160
Operators/Interns	\$75- \$150

Reimbursable Expenses

- 1. All materials and supplies used in the performance of work on this project will be billed at cost plus 10%.
- 2. Auto mileage will be charged per the standard mileage reimbursement rate established by the Internal Revenue Service. Survey and construction vehicle mileage will be charged on the basis of \$0.90 per mile or \$85.00 per day.
- 3. Charges for sub-consultants will be billed at their invoice cost plus 15%.
- 4. All other direct expenses will be invoiced at cost plus 10%.

Broadband Feasibility and Master Plan Study

City of Palm Desert, California

CHALLENGE: The City of Palm Desert understood that the recent pandemic has drawn an even sharper focus of the impact that lack of internet access has on communities. No longer is broadband a luxury for video-on-demand and streaming services. Instead, it is a crucial part of how residents work, gain access to medical treatment, and how children learn, as well as a determining factor for businesses considering relocation. Effective broadband solutions are now critical to all phases of life. Based upon this understanding, a broadband master plan had been part of Palm Desert's strategic plan for many years.

Palm Desert, like many communities, wanted to take increasing control of their broadband future by creating an active strategy to serve its constituents and attract new businesses with meaningful broadband access. In addition, City staff expressed concerns about the challenges faced by the businesses and residents of Palm Desert in their broadband availability, capacity, and investment.

As part of their planning effort, the City wanted to leverage regional planning and investment efforts to create a series of prioritized programs that drive maximum impact. While the technology may vary, our team's efforts established a defined path forward that is crucial to closing the all too frequent broadband gap.

SOLUTION: In October of 2022, City leaders selected HR Green to complete a Broadband Feasibility and Master Plan Study that provides a broadband strategy to create the greatest opportunity and value to implement a network that is capable of meeting current and long-term community needs. The strategic plan also needed to provide recommended approaches to broadband implementation.

HR Green's approach was guided by a belief that the City must clearly articulate key issues and desired goals through a measured process that shepherds the process from study to action. Our team provided work products and deliverables in a framework that enabled the City to move quickly from visioning to planning and onward into deployment of facilitative solutions to drive availability and adoption of true broadband services.

Broadband Master Plan

City of Coachella

Our Study development process included conducting stakeholder meetings to identify how best to position and future-proof Palm Desert to maximize economic development, including retaining current businesses and attracting new businesses. Implementing a community engagement program that included the use of surveys of residents and business owners helped decision makers better understand community needs. HR Green team members also evaluated existing fiber-optic network and its architecture in order to understand its capability and how best to leverage this asset in the extension to the rest of the City. All the data and information gathered by our team was shared with City Council during a vision and goal setting workshop.

Based on the outcomes from a vision and goal setting workshop with the Palm Desert City Council, our engineers utilized GIS to prepare a system level design and cost estimate for developing a next generation network. Additionally, we evaluated federal and state programs that fund community networks. As part of the Study effort, our team then performed a cost-benefit assessment of various infrastructure and smart application options and identified a prioritized list of Smart Community technologies. We also helped the City identify one or more potential for-profit partners who were interested in leasing the core network assets, and in building and managing last-mile connectivity by build a list of potential partners and other interested parties, using a request for expressions of interest (RFEI).

Additionally, our team coordinated the City's efforts with the Coachella Valley Association of Government's (CVAG) valley-wide signal synchronization and Middle-Mile projects, as well as other regional broadband initiatives, including the initiatives of the local school districts, higher education institutions, Caltrans, and economic development organizations.

At the conclusion of the project, our team provided a Broadband Feasibility and Master Plan Study that is practical so it could be the basis for preliminary and final designs of Palm Desert's broadband project. Currently, the City is exploring the implementation of the recommended next steps included in the Study.

BENEFIT: The result was a comprehensive and practical Broadband Feasibility and Master Plan Study that can be the basis for preliminary and final designs of Palm Desert's broadband project. HR Green's work products and deliverables provided a framework that enabled the City to move quickly from visioning to planning and onward into deployment of facilitative solutions to drive availability and adoption of true broadband services.

HR Green's expertise and comprehensive approach helped Palm Desert to create an active strategy to serve its constituents and attract new businesses with meaningful broadband access. With HR Green's guidance, Palm Desert is well-positioned to achieve its broadband goals and support its residents, businesses, and institutions.

Broadband Master Plan

▷ City of Coachella

Broadband Master Plan

City of Palm Springs, California

CHALLENGE: The City of Palm Springs recognized the importance of encouraging the development of reliable and cost-effective next generation broadband services. As such, the City wanted to evaluate and develop strategies for the short-term and long-term development of advanced broadband services within the City. Palm Springs anticipated that "next generation" broadband services would have a net positive economic and social impact to the local economy, while enhancing the community's quality of life through expanded innovation opportunities, workforce development training, the narrowing of the digital and/or economic divide, and improved organizational operation efficiencies.

SOLUTION: In July of 2023, City leaders selected HR Green to complete a Broadband Master Plan. Our team is currently completing various tasks and subtasks associated with the development of the Palm Springs Broadband Master Plan. Once those tasks are completed, the HR Green team will deliver to the City of Palm Springs a Broadband Master Plan that will:

- Develop a greater understanding with residents, businesses, and other governmental entities regarding the need and value of next generation high-speed broadband service.
- Engage and educate specific and general members of the public regarding the technology of delivering broadband.
- > Determine the community's needs and desires regarding broadband.
- Research and evaluate the current supply of broadband communications assets, products, and services.
- Create a structured evaluation of the wide range of strategies available to the City to facilitate the availability of "Next Generation" broadband service in Palm Springs. This will include inventory of assets, objective market demand research, financial modeling, and feasibility including a cost benefit analysis for the City being a service provider to underserved communities.
- Analyze implementation scenarios evaluated through modeling and fiscal analysis, as well as strategies for policies and business practices.

"Your (HR Green's) group has been very helpful with us through the process."

Larry Klingaman Director of Information Technology

Broadband Master Plan

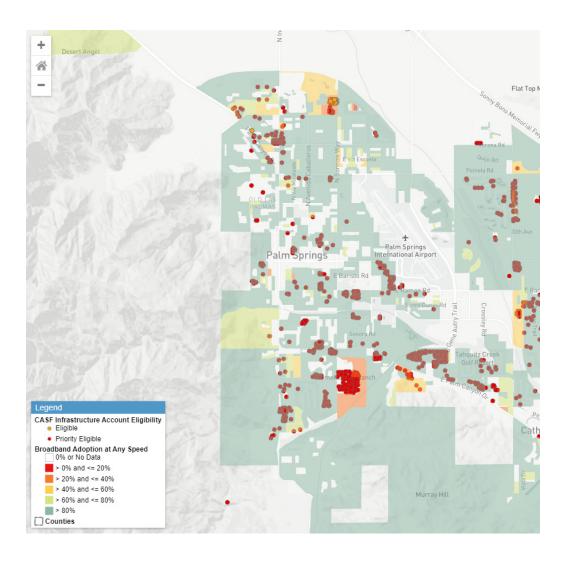

City of Coachella

Our approach is broken into various tasks, and subtasks, with deliverables at the completion of each task. All the deliverables will be compiled into the final comprehensive Broadband Master Plan.

Some of the tasks and subtasks are focusing on:

- ► Identifying, Inventorying, Mapping, and Analyzing Assets
- Assessing Needs and Goal Setting (including engaging stakeholders, surveying residents and businesses, assessing market conditions, and facilitating vision and goal setting workshops)
- > Developing Preliminary Fiber Optic Network Designs, Cost Estimates, and Financial Analysis
- Evaluating Funding Alternatives (included state and federal grant programs, and more traditional funding opportunities such as loans and bonds) and Performing Capital Project Analysis (included exploring shovel ready capital projects where conduit and fiber could potentially be installed during the implementation of the capital project)
- Assessing City Policies

BENEFIT: Our team is developing a Broadband Master Plan that will include strategies for the short-term and long-term development of advanced broadband services within the City. It is anticipated that these strategies will help the City meet its goal of improving communitywide broadband services, which will have a net positive economic and social impact on the local economy, enhance the community's quality of life through expanded innovation opportunities, provide workforce development training, narrow the digital and/or economic divide, and improve the efficiency of organizational operations.

Broadband Master Plan

Fiber Master Planning

City of Pico Rivera, California

CHALLENGE: The City of Pico Rivera's new leadership team identified multiple projects underway in the city that were only loosely tied together but which represented a significant opportunity to create a smart platform for future development.

The City was pursuing the municipalization of its street lights through a Community Choice Aggregation initiative with Southern California Edison. As a significant commuter community with major transit routes, it also recognized that the coordination of signals was a crucial next step for the community.

SOLUTION: HR Green worked with Pico Rivera to develop a Fiber Optic Master Plan to help the City control its destiny by deploying a converged network and connected infrastructure model for future development. The proposed core network model chosen by the City will provide a platform for community needs, while creating capacity for a private sector ISP to increase broadband competition in the community. Pico Rivera subsequently selected SiFi Networks as its broadband provider and construction is underway. HR Green provided technical review of SiFi's proposed microtrenching deployment specifications and coordination of initial planned colocation builds.

BENEFIT: The master plan provided a basis for discussions with SiFi and helped the City to deploy fiber for its own use to City-owned infrastructure. Residents will have access to improved, gigabit internet options and the City has access to fibers necessary for current and future uses.

Lightwave IGA Broadband Assessment and Feasibility Study

Tillamook County, Oregon

CHALLENGE: Tillamook Lightwave (TLW) a consortium of Tillamook County, Tillamook People's Utility District, and the Port of Tillamook Bay, initiated a discovery study to gain a clearer understanding of broadband needs in the county. TLW contracted with HR Green, to complete this initial discovery phase.

With 21 miles of deployed fiber serving as a middle mile for providers and recognizing the increased demand for high-quality, fast broadband in its service area, TLW sought to answer key strategic questions:

- · What role should Tillamook Lightwave play in expanding broadband services?
- How can this important asset expand to provide services outside of those provided to carriers and anchor institutions?
- What role should TLW play and should it consider becoming a direct service provider?

SOLUTION: HR Green is studying the issues outlined above, focusing initially on documenting current conditions and services in this coastal and rural county. TLW's board of directors and owner-partners will review the information collected in Phase I in order to formally develop its Vision for the future role of TLW in expanding broadband services. Once the Vision is established, HR Green will develop preliminary engineering designs based on the service model selected by TLW and develop robust financial feasibility studies to guide future development and deployment of fiber optic infrastructure.

BENEFIT: By establishing a clear path forward - supported by a strong understanding of technical and financial deployment issues – TLW will be in a position to leverage its current assets and improve broadband service to more than 25,000 residents who are generally underserved. This will mean improved access to telemedicine, improved work from home for its full-time and seasonal residents, and access to remote learning for its youth.

Broadband Master Plan

City of Coachella

Broadband Regranting

Yamhill County, Oregon

CHALLENGE: Yamhill County faces challenges common to many rural areas in the country, dealing with poor internet service quality, particularly in unincorporated regions beyond densely populated towns. The County government had no intention of offering broadband as a utility, and the private sector could not justify serving sparsely populated rural areas due to high costs divided among a small number of potential subscribers spread over a large area.

SOLUTION: HR Green initiated a regranting program to enable the County to subsidize the deployment of advanced broadband services using federal funds. Citizen outreach and surveys were conducted, and our GIS and Design Engineering teams collaborated with data from the FCC to map areas most in need and estimate the cost of constructing a fiber-to-the-home network.

We engaged a nationally renowned consultant to help create and implement a Regranting Program using the County's American Rescue Plan Act (ARPA) funds. This involved analyzing Targeted Improvement Zones defined by our engineers. Our team developed a Notice Of Funding Opportunity (NOFO), scoring rubric, public webinars, and various guidance materials to assist the County in selecting grant awardees and managing ongoing agreements. Around \$3 million in grant funds will be distributed to awardees in the summer and fall of 2024, with close coordination with the Oregon Broadband Office for success.

BENEFIT: The Regranting Program allows the County to proactively address residents' subpar connectivity without delving into operating its own broadband infrastructure. It strengthens the working relationship between the County and private sector companies, fostering a positive dynamic different from the adversarial relations often seen in service territories. Politically, it is a win for the County and sets the stage for future successful programs.

Broadband Master Plan

City of Coachella

Broadband Infrastructure Analysis

Greater Des Moines Partnership, Des Moines, Iowa

CHALLENGE: Broadband coverage can be problematic, particularly in rural areas. Without specific connectivity data, municipal leaders do not know what options they might have to improve broadband, providers do not know where needs are and maps that are used to determine grants can be inaccurate to the point where grants might not be available where they are needed.

The Greater Des Moines Partnership developed this project to bring the different levels of government together to collaborate on real steps to improve broadband in this eleven county area. Through working together to identify access needs (where good broadband is not available) and where there is access but adoption issues (financial, language, ethnicity, age, etc.) and creating real, actionable steps to address those needs and issues, The Partnership identified an opportunity to help Central Iowa improve on an already great place to live and work.

SOLUTION: HR Green provided a survey of residents and businesses and meeting with other key stakeholders within the 11 county project area. The data received was used to inform leaders of where specific broadband issues exist, challenge any federal and state map inaccuracies (ensuring grant eligibility) and also provide a central collaboration tool to bring the needs, municipal leaders, providers and funding sources together to develop real solutions. This central collaboration tool is of particular note because it is a ground-breaking, an original creation by HR Green to develop solutions, rather than simply display issues.

BENEFIT: In thinking through how to develop processes and data building to lead to specific opportunities for solutions, this project not only provided valuable data to the 11 counties, but it also put them in a position to be eligible for grants and have tools and relationships to solve broadband issues. To maximize transparency, during the project all our final work-products were posted on the agency's website.

Broadband Market Analysis and Cost Study

Houston-Galveston Area Council, Texas

CHALLENGE: The Houston-Galveston Area Council (H-GAC) is a regional organization that is working to improve broadband in their thirteen counties. Knowing how important broadband is for students, citizens, businesses, economic development, telemedicine and many other areas of life, H-GAC has made better broadband a priority in the many functions they perform throughout the region.

SOLUTION: Given the complexity of determining and addressing broadband issues in such a large and diverse area, H-GAC engaged HR Green to institute the steps and processes needed to form action plans for better broadband.

Tasks to better understand connectivity in the thirteen counties include:

- A survey of citizens and businesses, including a portal to identify needs and digital equity response levels.
- ▶ Research on providers across the region and steps to include them in the process.
- ▶ Meetings with key public and private stakeholders.
- > Digital equity research, improvement opportunities and grant options.
- ► A gap analysis.
- ▶ High-level design of options to improve broadband.
- ▶ Recommendations of ways to improve broadband.
- Work sessions to address smart applications of broadband, policy options, governance options and rural technology possibilities.
- Preparation for BEAD grant funding.

BENEFIT: The goals of the project are to provide clarity on broadband concerns across the region, coordination of efforts of the different agencies working on broadband improvement, identification of digital equity issues, an understanding of policy options, actionable next steps to improve broadband and preparation for BEAD grants in 2024.

Sample Agreement Comments

Sample Agreement Comments

The sample contract provided contains language that should be modified or clarified to be more specific to the services being delivered. Based on our review, we believe revisions will provide greater clarity as to contractual obligations as well as compliance with state law requirements, which will benefit both parties. If selected, HR Green would like the opportunity to work with the City to develop the proposed agreement and address very specific issues. We would be prepared to discuss these matters immediately upon selection so no time is lost and that the proposed work can be carried out in a timely manner. Following, we have provided our suggested exceptions and considerations:

▲ 3.3.10.5 <u>Water Quality Management and Compliance</u>. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq.*); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

Reason: This special damages clause creates professional liability insurance challenges. We would ask that we review for alternative language and/or strike.

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the <u>negligent</u> performance of the <u>services under the</u> Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

Reason: The endorsements on our Commercial General Liability does not include these additional limitations. We request modification as noted.

(C) Professional Liability (Errors & Omissions): [***INCLUDE ONLY IF APPLICABLE; DELETE OTHERWISE***](1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Contractual Liability Exclusion Deleted: This insurance shall include contractual liability applicable to this Agreement. The policy must "pay on behalf of" the insured and include a provision establishing the insurer's duty to defend.

Reason: Our Professional Liability insurance does not include contractual liability.

Broadband Master Plan

City of Coachella

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, to the extent caused by the negligent in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and reasonable attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

Reason: The "defend/indemnification" clause is problematic and we would request deletion and further modification as noted in this section.

STAFF REPORT 2/28/2024

To:Honorable Mayor and City Council MembersFROM:Maritza Martinez, Public Works DirectorSUBJECT:Approve City Manager to process sponsorship request received from
Celebration Nation Inc for the 2024 Farmchella event, in the amount of
\$12,000.

STAFF RECOMMENDATION:

Approve City Manager to process the sponsorship request received from Celebration Nation Inc for the 2024 Farmchella event, in the amount of \$12,000.

EXECUTIVE SUMMARY:

On February 7, 2024, staff received the attached \$30,000.00 sponsorship request from Celebration Nation Inc. for the 2024 Farmchella Event. This year's event will be held at Veterans' Memorial Park and is a free event. The Farmchella Festival event is focused at recognizing and celebrating the many contributions of farm workers to our local, state and federal economy and culture.

After further review of the sponsorship request budget line items Celebration Nation Inc was agreeable to reduce the sponsorship amount to \$12,000. The line items reduced or removed were items Celebration Nation Inc identified it could be provided for by another donor or reduced without impacting the overall event. The \$12,000 sponsorship will help to cover costs corresponding to event staging, primarily tenting needs, to allow for the shade and various vendor activities/distribution of free household products and local produce. The sponsorship amount requested of \$12,000 would will include on-stage acknowledgements, media advertisement, and logo displays.

ALTERNATIVES:

- 1. Approve City Manager to process sponsorship request of \$30,000 and authorize allocation of \$30,000 from undesignated City General Fund reserves for sponsorship request.
- 2. Decline sponsorship request submitted by Celebration Nation Inc.
- 3. Provide alternate direction to staff.

FISCAL IMPACT:

If Council approves staff recommendation, an allocation of \$12,000 from undesignated General Fund reserves will be required to allow for sponsorship award in the requested amount of \$12,000 to the General Fund Government Fund.

Attachment: Sponsorship Request

THE HUE

The Hue is an all-day, youth-led music festival held in the Eastern Coachella Valley every spring. Members of Alianza's Youth Organizing Council are responsible for all aspects of the event, from selecting the performance line-up, to promotion, venue setup, and MCing. It serves as a community-driven alternative to the Coachella music festival that takes place in the area around the same time each year. The Hue emphasizes and nurtures creativity, public speaking, and leadership skills - giving young people the tools needed to secure the necessary permits for large-scale events, the ability to map event plans with City and County officials, and work on bringing local artists to the space.

SPONSORSHIP LEVEL BREAKDOWN

SUPER STAR: \$10,000

- Main stage Formal Recognition (Day of event)
- Showcase Business Logo on Event Video and all Event Materials
- Main Stage Signage Recognition (Day of event)
- Including all of the benefits below

TOUR MANAGER: \$5,000

- Mention in all Advertisements, Press Releases and Flyers
- Signage recognition throughout the event venue.
- Including all of the benefits below

SONGWRITER: \$3,000

- Business logo printed on event program
- Free booth space to display your business' products and/or service
- Including all of the benefits below

FAN: \$1,000

- Listed in Alianza's email newsletter
- Mention on a social media announcement (i.e. Facebook/Twitter)
- Name included in The Hue 2024 program (Day of event)

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Jaime Arroyo, Grants ManagerSUBJECT:Authorize the City of Coachella to Sponsor Alianza Coachella Valley's The
Hue Music and Arts Festival in the Amount of \$3,000

STAFF RECOMMENDATION:

Staff recommends that the City Council consider authorizing the City of Coachella to sponsor Alianza Coachella Valley's The Hue Music and Arts Festival in the amount of \$3,000.

BACKGROUND:

The Hue is an all-day, youth-led music festival held in the Eastern Coachella Valley every spring. Members of Alianza's Youth Organizing Council (YO-C) are responsible for all aspects of the event, from selecting the performance line-up, to promotion, venue setup, and MCing. It serves as a community-driven alternative to the Coachella music festival that takes place in the area around the same time each year. The Hue emphasizes and nurtures creativity, public speaking, and leadership skills - giving young people the tools needed to secure the necessary permits for large-scale events, the ability to map event plans with City and County officials, and work on bringing local artists to the space.

DISCUSSION/ANALYSIS:

Sponsorship of the Hue Music and Arts Festival demonstrates the City's commitment to the empowerment of its community, particularly its youth. It also strengthens the City's support of Alianza Coachella Valley and their advocacy efforts in empowering Coachella's residents through civic engagement. The Hue Music and Arts Festival is just another example of Alianza's community-minded efforts that benefits the public at no cost and showcases the leadership and organizing skills the youth have learned through their Youth Organizing Council.

The \$3,000 sponsorship level includes:

- Business logo printed on event program
- Free booth space to display products and/service
- Listed in Alianza's email newsletter
- Mention on a social media announcement

• Name included in the Hue 2024 program

ALTERNATIVES:

- 1. Authorize the City of Coachella to sponsor Alianza Coachella Valley's The Hue Music and Arts Festival in the amount of \$3,000
- 2. Not authorize the sponsorship request

FISCAL IMPACT:

Funding for this sponsorship will be through the General Fund.

EXPERIENCE**MOBIUS**2024

To be a part of Mobius 2024 email us at job.huerta@themobiusconference.com

STAFF REPORT 3/27/2024

То:	Honorable Mayor and City Council Members
FROM:	Jaime Arroyo, Grants Manager
SUBJECT:	Authorize the City of Coachella to Sponsor The Mobius Conference in the Amount of \$2,500

STAFF RECOMMENDATION:

Staff recommends that the City Council consider authorizing the City of Coachella to sponsor The Mobius Conference in the Amount of \$2,500.

BACKGROUND:

Mobius is a nonprofit organization based in the Coachella Valley dedicated to engaging, connecting, and sharing evolving topics in art, politics, and culture. The Mobius Conference brings together a select group of talented leaders, educators, students, and activists who are working to positively affect the collective community.

DISCUSSION/ANALYSIS:

Mobius is requesting sponsorship to help offset the expense of a two-day conference in the Coachella Valley, which will be held at Coachella's very own Container Park on April 19-20, 2023. The event will be filled with exciting guest speakers, including Fiona Ma, the current California State Treasurer; Lauren Sanchez, Senior Advisor for Climate Affairs of the Office of Governor Gavin Newson; members from the Golden Voice team, and many other writers, artists, and educators. Local sponsors and partners include the office of Assemblymember Eduardo Garcia of the 36th Assembly District, the Riverside County Board of Supervisors, the Coachella Valley Unified School District, and many more.

ALTERNATIVES:

- 1. Authorize the City of Coachella to sponsor The Mobius Conference in the Amount of \$2,500
- 2. Not authorize the sponsorship request

FISCAL IMPACT:

Funding for this sponsorship will be through the General Fund.

1. Conference Flyer

STAFF REPORT March 27, 2024

To: Honorable Mayor and City Council Members

FROM: Castulo R. Estrada, Utilities Manager

SUBJECT: Authorize the City Manager to Execute a Professional Services Agreement with Gallagher Benefit Services, Inc. in the Amount of \$36,600 to conduct a Utility Operations Salary Study.

STAFF RECOMMENDATION:

Staff recommends that Council authorize the City Manager to enter into a Professional Services Agreement with Gallagher Benefit Services, Inc. in the amount of \$36,600 to conduct a Utility Operations Salary Study.

BACKGROUND:

The City agreed to conduct a Manpower Study and Salary Study for the Water and Sanitary Utility Operations as part of the 2021-2023 Memorandum of Understandings with the Sanitary and Miscellaneous Employees and Confidential Mid-Management Employees bargaining units. The Manpower Study was to be completed first, followed by the Salary Study.

The City published a Request for Proposal for the Manpower Study on July 6, 2022 and received one proposal from Raftelis. On September 14, 2022, Council approved Resolution No. 2022-84 authorizing Raftelis to conduct the Manpower Study. Raftelis presented the completed Manpower Study to Council on September 13, 2023.

On November 8, 2023, the City published a Request for Proposal for the Salary Study and received responses from Baker Tilly, CPS HR Consulting, Gallagher Benefit Services, Inc., JER HR Group, and unComplicate HR Inc. Staff reviewed the five proposals and scored them based on the following categories identified in the Request for Proposal: Understanding of Work to be Performed, Demonstrated quality of firm, Familiarity with City, County and State Procedures, References, Completeness of the Proposal, and Cost. Based upon this review, staff is recommending that Council award the project to Gallagher.

DISCUSSION/ANALYSIS:

Gallagher Benefit Services, Inc., formerly known as Koff & Associates, is an experienced publicsector human resources and recruitment services firm providing human resources services to cities, counties, special districts, courts, educational institutions, and other public agencies for over 40 years. The City has utilized their services in the past for compensation and classification studies. Per the Memorandum of Understandings, upon completion of the Salary Study, the City will then meet and confer with the unions regarding implementation of and position and/or salary recommendations based on both studies. The results of the Salary Study would be incorporated into the next City-wide salary study without update, provided a City-wide study is conducted within two years of the report date of the Salary Study.

ALTERNATIVES:

- 1. Authorize the City Manager to enter into a Professional Services Agreement with Gallagher Benefit Services, Inc. in the amount of \$36,600 to conduct a Utility Operations Salary Study.
- 2. Do not authorize this request.

FISCAL IMPACT:

Funds would be appropriated from the FY 24/25 budget and be paid from Water (50%) and Sanitary (50%).

Attachments: Professional Services Agreement Gallagher Benefit Services, Inc. Proposal

CITY OF COACHELLA PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered into this ____day of _____ 2024, by and between the City of Coachella, a municipal corporation organized under the laws of the State of California with its principal place of business at 53990 Enterprise Way, Coachella, California 92236, County of Riverside, State of California ("City") and Gallagher, a California corporation, with its principal place of business at 2835 Seventh Street, Berkeley, CA 94710 ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 **Consultant.**

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing human resources management consulting services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 **Project.**

City desires to engage Consultant to render such professional services for the **Utility Operations Compensation Study** project ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 <u>General Scope of Services</u>. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional human resources management consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference and federal laws, rules and regulations.

3.1.2 <u>Term</u>. The term of this Agreement shall be from July 1, 2024 to December 31, 2024, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 **Compensation.**

3.2.1 Compensation. Consultant shall receive compensation, including

BB&K (2021)
80237.00000\34369632.1

-1-

PROFESSIONAL SERVICES AGREEMENT

authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **thirty-six thousand six hundred dollars (\$36,600.00)** without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 <u>Reimbursement for Expenses</u>. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 <u>Extra Work</u>. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 **Responsibilities of Consultant.**

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 <u>Schedule of Services</u>. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 <u>Conformance to Applicable Requirements</u>. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 <u>Substitution of Key Personnel</u>. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: Georg Krammer, Managing Director.

3.3.5 <u>City's Representative</u>. The City hereby designates the City Manager, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 <u>Consultant's Representative</u>. Consultant hereby designates Georg Krammer, Managing Director, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 <u>Coordination of Services</u>. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 <u>Standard of Care; Performance of Employees</u>. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall

-3-

be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

Neither City nor Consultant shall be considered in default of this 3.3.9.2 Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 <u>Compliance with Laws</u>. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 <u>Employment Eligibility; Consultant</u>. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and

Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 <u>Equal Opportunity Employment</u>. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 <u>Air Quality</u>. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 <u>Water Quality Management and Compliance</u>. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq.*); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 <u>Safety</u>. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 <u>Time for Compliance</u>. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 <u>Types of Insurance Required</u>. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than \$1,000,000 per occurrence and no less than \$2,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than \$1,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than \$1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than \$1,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 <u>Insurance Endorsements</u>. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10

-6-

10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability. (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Contractual Liability Exclusion Deleted: This insurance shall include contractual liability applicable to this Agreement. The policy must "pay on behalf of" the insured and include a provision establishing the insurer's duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 <u>Primary and Non-Contributing Insurance</u>. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 <u>Waiver of Subrogation</u>. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 <u>Deductibles and Self-Insured Retentions</u>. Any deductible or selfinsured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 <u>Evidence of Insurance</u>. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy

-7-

shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 <u>Acceptability of Insurers</u>. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 <u>Enforcement of Agreement Provisions (non estoppel)</u>. Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 <u>Requirements Not Limiting</u>. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations

to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is \$1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 <u>Registration/DIR Compliance</u>. If the Services are being performed on a public works project of over \$25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over \$15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

-9-

3.4.3 <u>Compliance Monitoring</u>. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 <u>Labor Certification</u>. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 **Termination of Agreement.**

3.5.1.1 <u>Grounds for Termination</u>. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 <u>Effect of Termination</u>. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 <u>Additional Services</u>. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by

the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 **General Provisions.**

3.7.1 <u>Accounting Records</u>. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 <u>Use of Consultants</u>. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and <u>Dynamex Operations West</u>, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 <u>Prior Approval Required</u>. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 <u>Delivery of Notices</u>. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant:	Gallagher 2835 Seventh Street Berkeley, CA 94710 ATTN: Georg S. Krammer, Managing Director, Compensation and Rewards Consulting
City:	City of Coachella 53990 Enterprise Way Coachella, CA 92236 ATTN: Dr. Gabriel D. Martin, City Manager

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 <u>Subconsultants</u>. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

-12-

3.7.4.3 <u>Right to Use</u>. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 <u>Indemnification</u>. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 <u>Confidentiality</u>. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 <u>Confidential Information</u>. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

-13-

3.7.5 <u>Cooperation; Further Acts</u>. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 <u>Entire Agreement</u>. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 <u>Attorneys' Fees</u>. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 <u>Governing Law</u>. This Agreement shall be governed by the laws of the State of California. Venue shall be in Riverside County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 <u>et seq</u>. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 <u>Time of Essence</u>. Time is of the essence for each and every provision of this Agreement.

3.7.10 <u>City's Right to Employ Other Consultants</u>. City reserves right to employ other consultants in connection with this Project.

3.7.11 <u>Successors and Assigns</u>. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 <u>Assignment or Transfer</u>. Consultant shall not assign, sublet, or transfer this Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 <u>Construction; References; Captions</u>. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease

Page 227

of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 <u>Amendment; Modification</u>. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 <u>Waiver</u>. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 <u>No Third-Party Beneficiaries</u>. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 <u>Invalidity</u>; <u>Severability</u>. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 <u>Authority to Enter Agreement.</u> Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 <u>Counterparts</u>. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 <u>Survival.</u> All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

3.8 Federal Provisions. When funding for the services is provided, in whole or in part, by an agency of the federal government, Consultant shall also fully and adequately comply with the provisions included in Exhibit "A-1" (Federal Requirements) attached hereto and incorporated herein by reference ("Federal Requirements"). With respect to any conflict between such Federal Requirements and the terms of this Agreement and/or the provisions of state law, the more

-15-

stringent requirement shall control.

STUDY OBJECTIVES

Compensation Objectives:

- To make recommendations regarding a list of appropriate, logical and defensible comparator agencies, benchmark classifications, and benefits to be collected prior to beginning the compensation portion of the study;
- To collect accurate salary and benefit data from the approved group of comparator agencies and to ensure that the information is analyzed in a manner that is clear and comprehensible to the Study Project Team, Human Resources, management, employees, union representation, and the Council;
- To carefully analyze the scope and level of duties and responsibilities, requirements for successful work performance, and other factors for survey classes, according to generally accepted compensation practices;
- To review the City's compensation structure and practices and develop compensation recommendations, including appropriate internal salary relationships, that will assist the City in recruiting, motivating, and retaining competent staff;
- To develop solutions that address pay equity issues and create a market adjustment implementation strategy supporting the City's goals, objectives, and budget considerations;
- To evaluate benefit offerings in the labor market and make recommendations for better alignment and/or different benefit offerings as indicated by the analysis;
- To create a comprehensive final report summarizing the compensation study approach and methodology, analytical tools, findings, and recommended compensation structure; and;
- To ensure sufficient documentation and training throughout the study, on methods used to determine appropriate salary ranges, methods for logical progression within the salary scale for each classification, and other practices, so that our recommendations can be implemented and maintained in a competent and fair manner.

Exhibit "A"-1

EXHIBIT "B" SCHEDULE OF SERVICES

The following is a suggested timeline (which can be modified based on the City's needs):

MILESTONES	TOTAL COMPENSATION STUDY	COMPLETION BY
A.	Project Kickoff Meetings, Initial Documentation Review, and Determination of Survey Elements	Weeks 1-2

January 8, 2024

Ms. Yoland Lopez Human Resources Management Analyst 53990 Enterprise Way Coachella, CA 92236

Dear Ms. Lopez:

Thank you for the opportunity to respond to your Request for Proposals for a Total Compensation Study for the City of Coachella ("City"). We are most interested in assisting the City with this important study and feel that we are uniquely qualified to provide value to your organization based on our experience working with other cities, counties, special districts, joint-powers associations, other public agencies, and the City itself on a number of occasions.

Gallagher, formerly known as Koff & Associates, ("Gallagher/K&A") is an experienced Human Resources and Recruitment Services firm providing human resources services to cities, counties, special districts, courts, educational institutions, and other public agencies for over 40 years. Our team has achieved a reputation for working successfully with management, employees, employee representation, and governing bodies. We believe in a high level of dialogue and input from study stakeholders and our proposal speaks to that level of effort. Our team's extra effort has resulted in close to *100% implementation* of all our classification and compensation studies.

Gallagher/K&A ensures that each of our projects is given the appropriate resources and attention, resulting in a high level of quality control, excellent communication between clients and our office, commitment to meeting timelines and budgets, and a consistently high-caliber work product.

As a Managing Director of Gallagher/K&A, I would assume the role of Project Director and be responsible for the successful completion of project. I can be reached at our Berkeley address and the phone number listed on the cover page. My email is georg_krammer@ajg.com.

This proposal will remain valid for at least 90 days from the date of submittal. Please call if you have any questions or wish additional information. We look forward to the opportunity to provide professional services to the <u>City of Coachella</u>.

Sincerely,

for S. Braumen

Georg S. Krammer Managing Director, Compensation and Rewards Consulting

Firm Qualifications

Gallagher, formerly known as Koff & Associates, ("Gallagher/K&A") is a full-spectrum, public-sector human resources and recruitment services firm; Gallagher/K&A has been assisting cities, counties, special districts, joint powers associations, courts, educational institutions, and other public agencies with their human resources needs for over 40 years and we have offices all throughout California, the Western Region, as well as across the nation.

We are familiar with the various public sector organizational structures, agency missions, operational and budgetary requirements, and staffing expectations. We have extensive experience working in both union and non-union environments, working with City Councils, County Commissions, Boards of Directors, Boards of Supervisors, Boards of Trustees, Boards of Education, Merit Boards, and Joint Power Authorities.

The firm's areas of focus are classification and compensation studies (approximately 70% of our workload); executive search and staff recruitments; and organizational development/assessment studies.

Without exception, all our classification and compensation studies have successfully met all our intended commitments; communications were successful with employees, supervisors, management, and union representatives; and we were able to assist each agency in successfully implementing our recommendations. All studies were brought to completion within stipulated time limits and proposed budgets.

Our long list of clients (please see <u>https://koffassociates.com/our-clients/</u>) is indicative of our firm's reputation as being a quality organization that can be relied on for producing comprehensive, sound, and cost-effective recommendations and solutions. Gallagher/K&A has a reputation for being "hands on" with the ability and expertise to implement its ideas and recommendations through completion in both union and non-union environments.

Gallagher/K&A relies on our stellar reputation and the recommendations and referrals of past clients to attract new clients. Our work speaks for itself and our primary goal is to provide professional and technical consulting assistance with integrity, honesty and a commitment to excellence. We are very proud of the fact that in working with hundreds of public agency clients and completing hundreds of classification and/or compensation and other types of studies, we have only had a handful of formal appeals in our entire history.

Especially when it comes to compensation, we know we are dealing with people's livelihoods and we take that very seriously. We are human resources professionals by trade and at heart and always keep the human aspect at the forefront of our problem solving methodologies. Our guiding principle of assisting public agencies for the greater good of their people and the communities they serve has been the backbone of our culture of integrity and ethics. Our values of being public-spirited, resourceful, curious, and courageous help us succeed in being very client- centric, fully invested in our work and finding the best solutions for our clients, and in applying a synergistic approach to all of our projects.

About the Larger Gallagher

Value Proposition: The ability deliver to comprehensively structured human capital solutions to clients is Gallagher's signature in the marketplace. At Gallagher, we want to know what makes your organization unique. We listen intently to learn about your culture and priorities and delve deeply into all the details that matter when balancing human capital needs with financial sustainability. This single-minded focus on excellence — characterized by innovation and creativity — is the driving force behind every Gallagher engagement.

Company History: Arthur J. Gallagher & Co. opened its doors for business in 1927 and is still "growing strong" because of a practiced ability to help clients think ahead. Founded by its namesake who was previously the leading producer for Chicago's largest insurance brokerage, Gallagher is now one of the world's largest human capital, insurance brokerage and risk management services firms. Headquartered in Rolling Meadows, IL, we have operations in 33 countries, and extend our client-service capabilities to more than 90 countries through a global network of correspondent brokers and consultants.

Since 1961, we've been helping clients overcome business barriers and create new opportunities to costeffectively attract, retain and productively engage the best performers in their field. Gallagher started trading on the NYSE under the symbol AJG in 1984.

Company Culture and Philosophy: The ideals, principles and values embodied by the founder whose name still appears on our door are part of our corporate DNA.

Gallagher's approach to business, cultivated through three generations of family leadership, has always centered on creating relationship value as true partners to our clients.

Gallagher's interactions with you will be straightforward and candid. By earning the trust of our clients, we've sustained a reputation for ethics and a commitment to transparency that continue to contribute to our growth. In fact, Gallagher was the first insurance broker named to the Ethisphere® Institute's annual list of the World's Most Ethical Companies in 2012 — and has earned this recognition for twelve consecutive years, through 2023. This is a tremendous achievement: annually, less than 150 companies based in 24 countries and

Page 239

representing 57 industry categories received this honor. Gallagher is the only insurance broker to have ever been recognized (World's Most Ethical Release).

The high standards of conduct we've set for our external professional relationships are the same rules we follow internally. The Gallagher Way, a one-page document that outlines our 25 shared values, was written in 1984 but is just as culturally relevant today. It speaks to the value of relationships and several tenets set guidelines for ethical behavior. Gallagher combines innovative solutions, thoughtful advice, and honest business practices to minimize risk and help fuel your success.

Human Resource and Compensation Consulting Practice: Gallagher's Human Resources & Compensation Consulting practice, of which the former K&A team is now a part, empowers clients to attract talent, manage staff, develop leaders, and reward success—leveraging the power of Gallagher and wisdom of experience to produce an engaged and productive workforce. Tapping into expertise that spans the spectrum of human resources at every level, we can assemble flexible compensation and consulting solutions that improve efficiency and fiscal sustainability.

Our practice is a combination of some of the most respected names in human resources and compensation consulting. Bringing together experts from compensation, performance, search, survey, and leadership fields, Gallagher empowers clients with tools for the entire lifecycle of employment management.

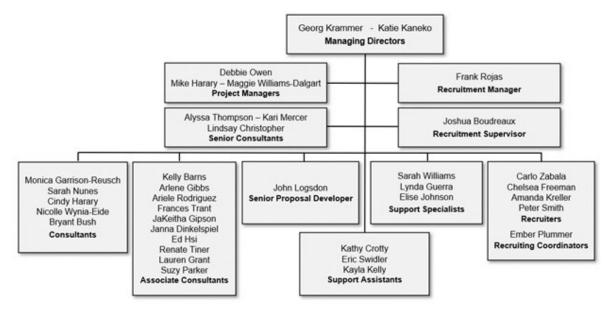

With an experienced team of 185 consultants located in 13 offices across the United States and Canada, our services include:

- Compensation
- Employee Engagement
- Executive Compensation
- Organizational Development
- HR Management
- Search and Interim Placement
- Custom Salary and Benefit Surveys
- Governance Consulting

Team Member Qualifications

Our team consists of 37 employees as shown below in our organizational chart.

No subcontractors will be assigned to this study.

All members of our team have worked on multiple comprehensive compensation studies and are well acquainted with the wide array of public sector organizational structures, compensation structures, classification plans, as well as the challenges and issues that arise when conducting studies such as this one for the City.

KEY PERSONNEL

Our project team will be led by Co-Project Directors Georg Krammer (Managing Director) and Mike Harary (Project Manager). They will coordinate all of Gallagher/K&A's efforts, attend all meetings with the City, and be responsible for all work products and deliverables.

CONSULTANTS

Monica Garrison-Reusch (Consultant), Janna Dinkelspiel (Associate Consultant), Kelly Barns (Associate Consultant), Cindy Harary (Consultant) and Renate Tiner (Associate Consultant) will conduct classification analysis and interviews with employees and management, compensation data collection and analysis, internal job analysis, and develop recommendations and implementation strategies.

WORKLOAD

We currently have a team of 25 HR consultants and five administrative support staff – resources that we are able to pool based on each project's needs, to execute projects and to meet clients' needs and expectations. Each time we are selected as the successful bidder on a project, we strategize to determine project timelines, deliverable deadlines, and the resources that are required to produce the deliverables as promised. We are poised to accommodate the City's classification and compensation study and plan to devote the necessary resources for the successful execution of the project.

Biographies of the specific staff who will be assigned to this study can be found in the Appendix.

Executive Summary, Approach, Methodology

The City desires human resources assistance to conduct a Utility Operations Compensation Study for classifications in its Sanitary and Miscellaneous and Confidential Mid-Management bargaining units.

The Utilities Department is managed by the Utilities Manager who oversees the Coachella Water Authority and Coachella Sanitary District. The Department is organized into three key functions: Administration, a Water Division (Water), and Sanitation Division (Sanitation). The Department's staffing level is 18.0 full-time equivalents (FTEs), including 3.0 Administration FTEs, 7.5 Water FTEs, and 7.5 Sanitary FTEs. The Water Division consists of one Water Superintendent who acts as a Supervisor and provides direction to a team of six water operators and reports to the Utilities Manager. The Sanitation Division consists of one Sanitary Superintendent who acts as a Supervisor and provides direction to a team of six wastewater operators and reports to the Utilities Manager.

The City employs approximately 79 fulltime employees and contracts for police and fire. The City has two (2) labor unions, Sanitary and Miscellaneous and Confidential Mid-management (represented by Teamsters Local 1932).

Classification Title	Division
Assistant Engineer	Water Authority
Environmental/Special Programs Manager	Water Authority
Senior Water Service Worker III	Water Authority
Senior Water Service Worker IV	Water Authority
Water Service Worker I	Water Authority
Water Service Worker II	Water Authority
Water Superintendent	Water Authority
Chief Treatment/Collections System Oper	Sanitary District
Sanitary Superintendent	Sanitary District
Treatment/Collection Operator Trainee	Sanitary District
Treatment/Collection System Operator	Sanitary District
Treatment/Collection System Operator I	Sanitary District
Treatment/Collection System Operator II	Sanitary District
Treatment/Collection System Operator III	Sanitary District
Heavy Equipment Operator	Water Authority & Sanitary District

The Classifications to be studied include:

Recommended Positions	Division
Chief Treatment/Distribution Operator	Water Authority
Water Treatment/Distribution Operator I	Water Authority

Water Treatment/Distribution Operator II	Water Authority
Water Treatment/Collection Operator I	Water Authority
Water Treatment/Collection Operator II	Water Authority
Water Treatment/Collection Operator III	Water Authority
SCADA/Instrumentation Technician	Water Authority & Sanitary District

The goal of the study will be to review the City's compensation structure for the studied classifications and to conduct a compensation market survey (salaries plus benefits) using a set of appropriate comparator agencies. The identification of comparator agencies, benchmark classifications, and benefits to be collected is an iterative process that includes all stakeholders. We have found this open discussion philosophy to be critical to our success for organizational buy-in. Once the external data development is completed, we will make specific recommendations for internal equity for non-benchmarked classifications and classifications without a large enough market sampling.

The compensation study will contain specific recommendations regarding the integration of all study classifications into the City's compensation structure, with the goal of developing a clearly designed, internally equitable format that is flexible for career opportunity and future growth. Our study will make recommendations regarding a salary structure that takes the City's compensation preferences into consideration as well as the appropriate placement of each classification on the City's salary schedule.

The study includes a significant number of meetings with the Study Project Team, Human Resources, employees, union representation, and the City Council, as desired. We have expertise in labor/management relations and understand the importance of active participation by all stakeholders to ensure a successful outcome. The meetings and "stakeholder touch-points" that we recommend ensure understanding of the project parameters, enhance accurate intake and output of information, and create a collaborative and interactive approach resulting in greater buy-in for study recommendations. This interactive approach has resulted in almost 100% implementation success of Gallagher/K&A's studies.

The majority of our clients are unionized and our larger city, county, and special district clients typically have multiple unions. Due to the multitude of stakeholder groups who are affected by any compensation study Gallagher/K&A conducts, our team understands the importance of accurate and validated data that withstands any scrutiny, effective and ongoing communication throughout each effort, and collaboration with the various stakeholder groups to ensure organizational buy-in to our findings and recommendations. We have developed a unique methodology of stakeholder "touchpoints" and collaboration that has made us highly successful and effective and has earned our team respect, agreement, and understanding from all stakeholders. In addition, we adjust and customize our methodology based on each individual client's unique needs and circumstances.

We also recognize that both the City and union representatives have obligations to employees and members to ensure that any study is conducted in a fair and equitable manner. Our project work plans are designed for transparency and we strongly encourage dialog with all stakeholders on study deliverables so they in turn can express their concerns; we all have a shared goal of ensuring the process followed is fair and equitable.

This intense and comprehensive stakeholder engagement and our transparent study processes are also a mechanism of quality control. The fact that our information, data, and recommendations have to be able to withstand utmost scrutiny by diverse stakeholders requires an in-depth multi-step quality control process for deliverables. This involves Gallagher/K&A team member validation of compensation data, Gallagher/K&A Project Manager review of all compensation analyses, recommendations and deliverables, and finally Gallagher/K&A Principal (Project Director) review of deliverables before submittal to the client.

STUDY OBJECTIVES

Compensation Objectives:

- To make recommendations regarding a list of appropriate, logical and defensible comparator agencies, benchmark classifications, and benefits to be collected prior to beginning the compensation portion of the study;
- To collect accurate salary and benefit data from the approved group of comparator agencies and to ensure that the information is analyzed in a manner that is clear and comprehensible to the Study Project Team, Human Resources, management, employees, union representation, and the Council;
- To carefully analyze the scope and level of duties and responsibilities, requirements for successful work performance, and other factors for survey classes, according to generally accepted compensation practices;
- To review the City's compensation structure and practices and develop compensation recommendations, including appropriate internal salary relationships, that will assist the City in recruiting, motivating, and retaining competent staff;
- To develop solutions that address pay equity issues and create a market adjustment implementation strategy supporting the City's goals, objectives, and budget considerations;
- To evaluate benefit offerings in the labor market and make recommendations for better alignment and/or different benefit offerings as indicated by the analysis;
- To create a comprehensive final report summarizing the compensation study approach and methodology, analytical tools, findings, and recommended compensation structure; and;
- To ensure sufficient documentation and training throughout the study, on methods used to determine appropriate salary ranges, methods for logical progression within the salary scale for each classification, and other practices, so that our recommendations can be implemented and maintained in a competent and fair manner.

Overall Objectives:

- To review and understand all current documentation, rules, regulations, policies, budgets, procedures, class descriptions, organizational charts, memoranda of understanding, personnel policies, wage and salary schedules, and related information so that our recommendations can be operationally incorporated with a minimum of disruption;
- To conduct project start-up meetings with study stakeholders to discuss any specific concerns with respect to the development of compensation recommendations; finalize study plans and timetables; conduct orientation sessions with management, union leadership, and staff in order to educate and explain the scope of the study and describe what are and are not reasonable study expectations and goals;
- To work collaboratively and effectively with the City and its stakeholders while at the same time maintaining control and objectivity in the conduct of the study; and

• To provide effective ongoing communications throughout the duration of the project and continued support after implementation.

METHODOLOGY / WORKPLAN / DELIVERABLES

This section of the proposal identifies the actual work plan. We believe that our detailed explanation of methodology and work tasks clearly distinguishes our approach and comprehensiveness.

TOTAL COMPENSATION STUDY:

Milestone A: Project Kickoff Meetings, Initial Documentation Review, and Determination of Survey Elements

This phase includes identifying the City's Study Project Team (Human Resources, management, employee representation, etc.), contract administrator, and reporting relationships. Our team of Project Managers and Consultants will conduct a briefing session with the Study Project Team to explain process and methodology; create the specific work plan and work schedule; identify subsequent tasks to be accomplished; reaffirm the primary objectives and specific end products; determine deadline dates for satisfactory completion of the overall assignment; determine who will be responsible for coordinating/scheduling communications with employees, management, union representation, and the Council; and develop a timetable for conducting the same.

Included in this task will be the gathering of written documentation, current class descriptions, organizational charts, salary schedules, budgets, employment contracts, personnel policies, previous compensation studies, and any other relevant documentation to gain a general understanding of City operations.

City terminology and methods of current compensation procedures will be reviewed and agreed to. We will discuss methodology, agree to formats for compensation results, identify/confirm appropriate comparator agencies, benchmark classifications, and benefits to be surveyed. We will respond to any questions that may arise from the various stakeholders.

List of Comparator Agencies, Benchmark Classifications, and Benefits to be Collected

During the initial meeting with the Study Project Team, we will discuss and agree to the compensation study factors. We will confirm appropriate, logical and defensible comparator agencies that will be included in the external market survey, which will be the foundation for ensuring that the City's compensation plan is competitively aligned with the external labor market. We will also confirm those classifications that will be surveyed in the market (i.e., benchmark classifications), with the intention of internally aligning the remaining classifications with those that were surveyed. Finally, we will determine the list of benefits that the City wants to include in the total compensation data gathering process.

1. Determination of Comparator Agencies

The determination of comparator agencies is a critical step in the study process. Per the RFP, the City has a current list of 17 comparator agencies that we will survey. The list includes:

- City of Palm Springs
- City of Redlands
- City of San Bernardino
- Coachella Valley Water District

- Desert Water Agency
- Eastern Municipal Water District
- Elsinore Valley Municipal Water District
- Hi-Desert Water District
- Imperial Irrigation District
- Indio Water Authority
- Inland Empire Utilities Agency
- Irvine Ranch Water District
- Long Beach Water Authority
- Mission Springs Water District
- Rancho California Water District
- Valley Sanitary District
- Western Municipal Water District

Should the City be interested in additional consultant recommendations regarding comparator agencies, we typically use the following factors to identify appropriate comparators and would receive approval before proceeding with the compensation study.

Our recommended methodology is that we involve management, Human Resources, employee representation, and the Council, in the decision-making process of selecting which comparable agencies are included, **PRIOR** to beginning the study. Our experience has shown that this is the most successful approach. The factors that we typically review when selecting and recommending appropriate comparator agencies include:

- Organizational type and structure While various organizations may provide overlapping services and employ some staff having similar duties and responsibilities, the role of each organization is unique, particularly in regard to its relationship to the citizens it serves and level of service expectation. During this iterative process, the City's current/ previous list of comparators, if any, and the advantages/disadvantages of including them and/or others would be discussed.
- Similarity of population served, City demographics, City staff, and operational budgets – These elements provide guidelines in relation to resources required (staff and funding) and available for the provision of services.
- Scope of services provided While having an organization that provides all of the services at the same level of citizen expectation is ideal for comparators, as long as the *majority* of services are provided in a similar manner, sufficient data should be available for analysis. When reviewing this factor, the City's unique services would be evaluated in order to ensure that the majority of comparators provide the same services. This ensures that each comparator yields a sufficient number of matches for the City's jobs.
- Labor market The reality of today's labor market is that many agencies are in competition for the same pool of qualified employees, because large portions of the workforce don't live in the communities they serve, are accustomed to lengthy commutes, and are more likely to consider changing jobs in a larger geographic area than in the past. In addition, working-from-home opportunities and hybrid work schedules have further changed the landscape of supply and demand of talent. Therefore, the geographic labor market area (where the City is competing for talent) is taken into consideration.
- **Cost of living and cost of labor** The price of housing and other cost-of-living related issues are some of the biggest factors in determining labor markets and the

appropriateness of comparator agencies. When the identified survey market includes comparators that are located outside of the City's geographic area, we analyze cost of labor to ascertain whether there are significant differences and, if so, we are able to apply geographic cost-of-labor adjustments factors to the market data to ensure and apples-to-apples comparison.

We typically recommend using 10-12 comparator agencies for all survey benchmarks in order to achieve statistical significance but are flexible and can easily use a different approach based on the City's preferences.

2. Determination of Benchmark Classifications

In the same collaborative manner as described in Step 1 above, we will work with the City's stakeholders to select those classifications that will be surveyed.

"Benchmark classes" are ordinarily chosen to reflect a broad spectrum of class levels. In addition, those that are selected normally include classes that are most likely to be found in other similar agencies, and therefore provide a sufficient valid data sample for analysis. Internal relationships will be determined between the benchmarked and nonbenchmarked classifications and internal equity alignments will be made for salary recommendation purposes.

Due to this study's size and the number of classifications, we will most likely survey majority of them. The exception may be those classifications that have multiple levels, such as I/II/III/Senior etc., for which we would typically only survey the journey-level and internally align the other levels of the class series.

3. Determination of Salary and Benefits Data to Be Collected

In addition to base salaries, benefit data elements for a total compensation study normally include at least the following (which are generally available to all staff in a specific job classification):

- Monthly Salary The top of the published salary range. All figures are presented on a monthly or annual basis. We normalize the salary data to reflect number of hours in the work week and/or roll-up of retirement or other benefits in base salaries.
- **Employee Retirement** This includes two figures: the amount of the employee's State or other public or private retirement contribution that is contributed by the agency and the amount of the agency's Social Security contribution.
- **Insurance** This typically includes Health, Dental, Vision, and other insurance coverage.
- Leave Other than sick leave, which is usage-based, leave is the amount of days
 off for which the agency is obligated. We will discuss with the City whether leave
 days/hours should be converted to direct salary cost in dollars or represented in
 days/hours.
 - Vacation: The number of vacation days after five years of employment.
 - **Holidays:** The number of holidays (including floating).
 - Administrative/Personal Leave: Administrative leave is normally the number of days available to management staff in lieu of overtime. Personal leave may be available to other groups of employees to augment vacation or other paid time off.
- **Deferred Compensation** We report any employer contribution made on the employee's behalf, whether an employee-matching contribution is required or not.

• **Other** – This category includes any other benefits that are available to all employees within a classification and not already specifically detailed.

Milestone B. Market Survey Delivery

Gallagher/K&A does not collect market compensation data by merely sending out a written questionnaire. Our experienced compensation analysts conduct all of the data collection and analysis to ensure validity of the data and quality control. We collect classification descriptions, organization charts, salary schedules, personnel policies, budgets, MOUs, and other information via website, by telephone, or email directly from each comparator agency. We then compare job description to job description and not just job titles, therefore ensuring true "matches" of at least 70%, which is the threshold we use to determine whether to include a comparator classification or not. As mentioned above in the classification methodology above, our job analysis method is the whole position analysis approach, which we apply here as well.

We also schedule appointments with knowledgeable individuals at each comparator to answer specific questions. We find that information collected using these methods has a very high validity rate and allows us to substantiate the data for employees, management, and governing bodies.

Data will be entered into spreadsheet format designed for ease of interpretation and use. Information will be calculated based upon average and median figures allowing the City to make informed compensation decisions. Other elements of the compensation survey report are agencies surveyed; comparable class titles; salary range maximum/control point; number of observations; and percent of the City's salary range above/below the market values.

In addition, we will include any type of statistical representation and analysis that the City desires such as 60th, 70th, or any other percentiles per the City's compensation philosophy.

Benefits data will be displayed in an easy-to-read format. You will receive three sets of spreadsheets per classification, one with base pay, one with the benefits detail, and one with total compensation statistical data. In addition, we are often asked to collect "additional" benefits, which we typically report on a separate spreadsheet.

Milestone C. Draft Compensation Findings/Stakeholder Review and Feedback

As part of our transparent approach and communication strategy to ensure organizational buy-in to the study, we share the market survey with the organization. We first distribute our draft findings to the Study Project Team. After their preliminary review, we will meet with the Study Project Team and other stakeholders (including Human Resources, management, employees, and/or employee representation) to clarify data, to receive requests for reanalysis of certain comparators, and to answer questions and address concerns. This provides an opportunity for our team to engage with study stakeholders in a collaborative manner. If questions arise, we conduct follow-up analysis to reconfirm our original analysis and/or make corrections, as appropriate.

Milestone D. Development of Recommendations, Final Reports, and Presentations

Analysis of Internal Relationships and Alignment

To determine internal equity for all studied positions, considerable attention is given to this phase of the project. It is necessary to develop an internal position hierarchy based on the

organizational value of each classification. Again, we utilize the whole position analysis methodology as described earlier.

By reviewing those factors, we will make recommendations regarding vertical salary differentials between classes in a class series, for example, as well as across departments. This analysis will be integrated with the results of the compensation survey and the City's existing compensation plan.

The ultimate goal of this critical step in the process is to address any potential internal equity issues and concerns with the current compensation system, including compaction issues between certain classifications. We will create a sound and logical compensation structure for the various levels within each class series, so that career ladders are not only reflected in the classification system but also in the compensation system, with pay differentials between levels that allow employees to progress on a clear path of career growth and development. Career ladders will be looked at vertically as well as horizontally.

Compensation Structure Development

We will review and make recommendations regarding the City's salary structure (set of salary ranges, salary differentials, steps within ranges, and/or alternative compensation plans) within which the classes are allocated, based upon the City's preferred compensation model. We will also assist the City in developing a compensation philosophy and practices relative to the surveyed public jurisdictions, if desired. This analysis will result in external pay equity, solutions to address any pay equity issues, and an implementation strategy supporting City goals, objectives, and budget considerations.

In addition, we will develop externally competitive benefit comparisons and recommendations for adjustments to the City's benefits package.

Draft recommendations will be discussed with the Study Project Team and management for discussions and decisions on overall pay philosophy and the practicality of acceptance and prior to developing an Interim Report.

Final Report

Volume II (Draft Interim Report of the Compensation Study) will be completed and submitted to the Study Project Team for review and comment. The report will include:

- An executive summary of the compensation study results;
- A set of all market data spreadsheets;
- A proposed compensation structure;
- A proposed salary range placement document;
- A procedure to address employees whose current base pay either falls below the minimum of or exceeds the maximum of their newly assigned pay range;
- Implementation options surrounding our recommendations; and
- A guide for implementing, managing and maintaining the compensation system.

Once all of the City's questions/concerns are addressed and discussed, a Final Classification and Compensation Report will be created and submitted in the City's preferred format. The Final Report will incorporate any appropriate revisions identified and submitted during the review process.

Insurance | Risk Management | Consulting

Final Presentation

Our proposal includes multiple meetings and weekly oral and written status/progress updates to the Study Project Team. Regarding the involvement of the City Council, we recommend at least one initial meeting to confirm the comparator agencies to be included in the study, one interim study session (to discuss the initial findings of the compensation study), and one final presentation of our Final Report. Of course, we are flexible regarding having more or less interaction with the Council, based on the City's preferences.

EXPECTATIONS OF CITY SUPPORT:

In order to conduct this study in the most timely and cost-effective manner, we ask for support in the following areas:

- Timely provision of written documentation, such as current class specifications, union contracts, organizational charts, budget documents, salary schedules, past studies, etc.;
- Assistance in the notification and scheduling of initial kickoff and other meetings and the provision of adequate interview tools and resources;
- Meeting agreed-upon timelines.

In terms of time commitment for City staff, we understand that the City hires an outside consultant to conduct and coordinate the entire effort. Therefore, it is our goal to reduce the time commitment of City staff as much as possible and to only request assistance in the coordination of some of the steps in the process, such as scheduling meetings, disseminating information, and in general, being a channel of communication between our firm and employees.

COMMUNICATION WITH THE CITY:

Our typical communication model includes at least weekly or biweekly written status updates, or virtual meetings, to keep the City informed on where we are during each phase of the project.

In addition, the study includes a significant number of meetings with the Study Project Team, human resources, management, employees, employee representation, and the Council, as desired. The meetings and "stakeholder touch-points" that we recommend ensure understanding of the project parameters, enhance accurate intake and output of information, and foster a collaborative and interactive approach that will result in greater buy-in for study recommendations. This interactive approach, although time-consuming, has resulted in almost 100% implementation success of Gallagher/K&A's studies.

POST-STUDY CONSULTATION AND SUPPORT:

We are committed to providing the City with the highest-quality product and service. Providing ongoing consultation and support after study completion is a service that is included in our professional fees and a continued relationship-building aspect of our client relationship that we highly value.

We often find that clients will call or email with follow-up questions and to discuss certain aspects of the study, ask why decisions and recommendations were made, and other important components of the study. We consider post-implementation support as part of our customer service.

Should the City request any additional meetings and/or training after completion of the study and/or other specific, identifiable work efforts, such as single-position compensation reviews

Page 253

or conducting annual surveys, we would honor our composite hourly rate for actual hours worked. However, from experience, we expect that most follow-up support will be conducted via telephone and email and this is absolutely included in our project fee for this project.

STAKEHOLDER ENGAGEMENT:

We believe in an interactive and collaborative process with the whole organization and in a high level of stakeholder contact and interaction to ensure organizational buy-in to the study throughout the entire process. Following are the major milestones at which we touch base with Human Resources, employees, managers, employee representation, and other stakeholders, as appropriate:

- Initial study kick-off meetings with stakeholders;
- Stakeholder input regarding a list of appropriate comparator agencies, benchmark classifications, and benefits to be collected;
- City stakeholder review of compensation study data and contact with them to address any challenges to the market comparables we identified;
- Stakeholder input on internal salary relationship analysis and recommendations; and
- Stakeholder input regarding final compensation plans and structure recommendations.

These steps will ensure that the study results in a product that is accepted and trusted by all levels within the organization. Beyond sound mechanics, our approach includes sufficient communication steps to ensure that the study methodology is understood and the results are regarded as expert, impartial, and fair.

Time Requirements

Our professional experience is that compensation studies of this scope and for this size organization take approximately four months to complete, allowing for adequate compensation data collection and analysis, review steps by the City, the development of final reports, any appeals, and presentations.

Due to the unprecedented demand on our services, we are currently experiencing an unusually high volume of projects. Therefore, and if the City is able to be flexible, we propose commencing the project in July 2024 and anticipate completion by October 2024, assuming a contract is executed within 2 months of the submittal date of our proposal.

The following is a suggested timeline (which can be modified based on the City's needs):

MILESTONES	TOTAL COMPENSATION STUDY	COMPLETION BY
A.	Project Kickoff Meetings, Initial Documentation Review, and Determination of Survey Elements	Weeks 1-2
В.	Market Survey Delivery	Week 3-12
C.	Draft Compensation Findings/Stakeholder Review and Feedback	Week 13-14
D.	Development of Recommendations, Final Reports, and Presentations	Week 15-16

Cost Proposal

We have often found our process requires a very high level of time commitment, which sometimes results in a higher proposal cost. We believe that our methodology and implementation success rate is attributable to the significantly greater level of contact we have with employees, employee representation, management, and the governing body. The time we commit to working with employees (orientations and briefings, meetings with employees via personal interviews, sharing of compensation survey data, etc.) results in significantly greater buy-in throughout the process.

In fact, our firm has only had a handful of formal appeals to any of our studies in over 40 years in business. It has been our experience that the money and time invested in stakeholder communication throughout the study are money and time saved during implementation. Our goal is to conduct each study the right way the first time. Numerous times our firm has been hired after an agency has gone through an unsuccessful study whose results were rejected or appealed and whose implementation was very controversial. Whenever our firm was hired after such an unfortunate experience, study stakeholders were amazed at our open and inclusive process, our efforts to elicit equal stakeholder input, and our development of recommendations that were accepted as fair and reasonable and understood by management, employees, and the governing body. Our clients always provide feedback that our process is professional, comprehensive, understandable, timely, and inclusive.

Due to a shift in our industry to conducting studies virtually and our own efforts to be as green a business as possible (which our public agency clients always appreciate), our cost proposal assumes that all meetings and presentations will be conducted virtually/remotely and no onsite travel to City offices will occur. Should the City desire onsite meetings, we will be happy to provide our per diem cost for onsite meetings based on travel time and market rate travel cost at the time.

MILESTONES	COMPENSATION STUDY	AMOUNT	BILLING STRUCTURE	
Ongoing Project Status Meetings throughout the Study		\$1,560	Invoice #1: One third of Project Fee upon Contract Execution - \$12,220	
А.	Project Kickoff Meetings, Orientations, and Determination of Survey Elements	\$3,900		
B. Market Survey Delivery (this assumes up to 12 benchmarks and up to 17 comparators)		\$22,425	Invoice #2 - \$12,220	
C. Draft Compensation Findings/Stakeholder Review and Feedback		\$3,900	N/A	
D. Development of Recommendations, Final Reports, and Presentations		\$4,875	Remaining Project Fee: Invoice #3 - \$12,220	
Total Fee for Ph	ase II: Compensation Study	\$36,660	\$36,660	
Expenses are inc	cluded in the project fee	N/A	N/A	
Expenses include but are not limited to duplicating documents, binding reports, phone, supplies, postage, etc.				
TOTAL PROJECT COST \$36,660 \$36,660				

Our cost proposal does not include time to support the City during any labor negotiations that may follow this study. If we are needed for this work, our composite hourly rate will apply and we will charge on a time-and-materials basis.

Contractual Considerations

We will be pleased to sign the City's professional services agreement for a Total Compensation Study. We respectfully request that the City will allow for a period of negotiation of certain terms in the professional services contract related to liability, indemnity, insurance, and other terms. We have found that we have always come to an agreement with all our clients in the past and appreciate the City's flexibility in reviewing certain terms in a collaborative fashion between our legal counsels.

The following are terms we would like to review with the City if we are fortunate to be selected for this project:

- Gallagher is pleased to submit this proposal to the City. While this proposal is not meant to constitute a formal offer, acceptance, or contract, notwithstanding anything to the contrary contained in the proposal, Gallagher is submitting this proposal with the understanding the parties would negotiate and sign a contract containing terms and conditions that are mutually acceptable to both parties.
- Gallagher is not a federal contractor or subcontractor. Therefore, Gallagher cannot agree to federal contracting provisions contained within the RFP.
- Section IX (e) (PDF page 8) and Section 3.5.6 (PDF pages 26-27) Indemnification should be limited to grossly negligent acts and omissions, breaches of the contract, intentional misconduct, or violations of law.
- Section IX (e) (PDF page 8) and Section 3.5.6 (PDF pages 26-27) A limitation of liability of fees paid needs to be added to the indemnification provision.
- Section 3.2.4 (PDF page 19) This section needs modified so that no prior approval of
 personnel is required from the City. Gallagher will provide notice of substitutions after
 they occur. Gallagher can agree to a reasonable time period to provide such notice and
 will use good faith efforts to ensure that the City is satisfied with any replacement
 personnel assigned.
- Section 3.2.10 (PDF page 21-23) Below are Gallagher's insurance representations based on AJG Risk Management policies. These are not changed on a client by client basis.
- Section 3.4 (PDF page 25) Unless otherwise required by applicable law, Gallagher cannot agree to permit City to audit for 3 years after the agreement ends.
- Section 3.5.1.2 (PDF page 25) Gallagher may retain copies of its work product that contain Confidential Information for archival purposes or to defend its work product, and in accordance with legal disaster recovery and records retention requirements, store such copies and derivative works in an archival format (e.g. tape backups), provided that the information will remain Confidential as long as it is retained.
- Section 3.5.3.1 (PDF page 26) This section should make clear that the City shall own all final deliverables provided to the City by Gallagher as part of the services provided under this Agreement, provided however, Gallagher shall retain sole and exclusive ownership of all right, title, and interest in, and to, its intellectual property and derivatives thereof which no data or Confidential Information of the City was used to create and which was developed entirely using Gallagher's own resources, including any and all preexisting or independently developed know-how, methods, processes and other materials

prepared by Gallagher. To the extent Gallagher's intellectual property is necessary for the City to use the deliverables provided under this Agreement, Gallagher grants to the City a non-exclusive, royalty-free license to Gallagher's intellectual property solely for the City's use of such deliverables.

It is our practice to provide the coverage below in lieu of the City contract insurance language. We therefore propose to replace the insurance language in the RFP's sample agreement with coverage language provided by Gallagher as follows (we attach our Memorandum of Insurance for your review as well):

Gallagher shall at all times during the term of this Agreement and for a period of two (2) years thereafter, obtain and maintain in force the following minimum insurance coverages and limits at its own expense:

- Commercial General Liability (CGL) insurance on an ISO form number CG 00 01 (or equivalent) covering claims for bodily injury, death, personal injury, or property damage occurring or arising out of the performance of this Agreement, including coverage for premises, products, and completed operations, on an occurrence basis, with limits no less than \$2,000,000 per occurrence;
- Workers Compensation insurance with statutory limits, as required by the state in which the work takes place, and Employer's Liability insurance with limits no less than \$1,000,000 per accident for bodily injury or disease. Insurer will be licensed to do business in the state in which the work takes place;
- Automobile Liability insurance on an ISO form number CA 00 01 covering all hired and nonowned automobiles with limit of \$1,000,000 per accident for bodily injury and property damage;
- Umbrella Liability insurance providing excess coverage over all limits and coverages with a limits no less than \$10,000,000 per occurrence or in the aggregate;
- Errors & Omissions Liability insurance, including extended reporting conditions of two (2) years with limits of no less than \$5,000,000 per claim, or \$10,000,000 in the aggregate;
- Cyber Liability, Technology Errors & Omissions, and Network Security & Privacy Liability insurance, including extended reporting conditions of two (2) years with limits no less than \$2,000,000 per claim and in the aggregate, inclusive of defense cost; and
- Crime insurance covering third-party crime and employee dishonesty with limits of no less than \$1,000,000 per claim and in the aggregate.
- All commercial insurance policies shall be written with insurers that have a minimum AM Best rating of no less than A-VI, and licensed to do business in the state of operation. Any cancelled or non-renewed policy will be replaced with no coverage gap, and a Certificate of Insurance evidencing the coverages set forth in this section shall be provided to Client upon request.

ARTHUR J. GALLAGHER & CO. MEMORANDUM OF INSURANCE

ADDITIONAL INFORMATION

GENERAL LIABILITY POLICY

ADDITIONAL INSURED – MANAGERS OR LESSORS OF PREMISES * Endorsement Form # CG 20 11 04 13 modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

 Designation of Premises (Part Leased to You): ANY PREMISES OR PART THEREOF LEASED TO YOU.
 Name of Person or Organization (Additional Insured): ANY AND ALL PERSONS OR ORGANIZATIONS CONTRACTUALLY REQUIRING ADDITIONAL INSURED STATUS AS THE MANAGER OR LESSOR OF PREMISES TO YOU.

3. Additional Premium: INCLUDED

(If no entry appears above, the information required to complete this endorsement will be shown in the Declarations as applicable to this endorsement.)

WHO IS AN INSURED (Section II) is amended to include as an insured the person or organization shown in the Schedule but only with respect to liability arising out of the ownership, maintenance or use of that part of the premises leased to you and shown in the Schedule and subject to the following additional exclusions:

This insurance does not apply to:

1. Any "occurrence" which takes place after you cease to be a tenant in that premises.

2. Structural alterations, new construction or demolition operations performed by or on behalf of the person or organization shown in the Schedule.

WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US - WORKERS COMENPENSATION, GENERAL LIABILITY AND AUTOMOBILE LIABILITY

We waive any right of recovery we may have against the person or organization where required by written contract because of payments we make for injury or damage arising out of your ongoing operations or "your work" done under a contract with that person or organization and included in the "products-completed operations hazard". This waiver applies only where required by written contract as specified and approved per contract.

PROPERTY

This policy insures against "All Risks" of physical loss or damage, except as excluded, to covered property while on Described Premises, provided such physical loss or damage occurs during the term of this policy. Coverage is subject to policy deductibles, terms, conditions and exclusions. Loss Payable clause included for whom Insured has agreed to per written contract.

*All other Additional Insureds requests requires Legal approval and issuance of a Certificate of Insurance.

*For special requests, such as a WET SIGNATURE, please contact the appropriate team: P&C – Doreen Morris or Renata Grzeskowiak; E&O – Frederick Arkin or Mari Maceri; Cyber – Jeremy Gillespie or Ariel Magrini.

This Memorandum of Insurance serves solely to list insurance policies, limits and dates of coverage. Any modifications hereto are not authorized by Gallagher or the Insurance Page 260 s.

Gallagher, formerly known as Koff & Associates, intends to adhere to all of the provisions described above.

This proposal is valid for 90 days.

Respectfully submitted,

By: GALLAGHER, FORMERLY KNOWN AS KOFF & ASSOCIATES, State of California

200pS. Mraumen

Georg S. Krammer Managing Director, Compensation and Rewards Consulting

January 8, 2024

Appendix

Page 263

Project Team Biographies

Georg S. Krammer, M.B.A., S.P.H.R. Managing Director

Georg brings over 22 years of management-level human resources experience to Koff & Associates with an emphasis in classification and compensation design; market salary studies; organizational development; executive recruitment; performance management; and employee relations, in the public sector and in large corporations as well as small, minority-owned businesses.

After obtaining a Master of Arts in English and Russian and teaching credentials at the University of Vienna, Austria, Georg came to the United States to further his education and experience and attained his Master of Business Administration from the University of San Francisco. After starting his HR career in Wells Fargo's college recruiting department, he moved on to HR management positions in the banking and high-tech consulting industries. He had five years in the private sector where he served as an HR Manager, and Administrative Officer, and then HR Director before entering the public sector. With his wide-ranging and deep experience as a well-rounded senior HR generalist, his education in business and teaching, his depth and breadth of experience with public sector HR needs, programs, and functions, Georg's contribution to K&A's variety of projects greatly complements the Koff & Associates Human Resources and Recruitment Services team.

He has spearheaded several hundred classification, compensation, organizational, strategic planning, etc., studies for hundreds of cities, towns, counties, and special districts throughout the State of California and has contributed to more than quadrupling the size of Koff & Associates as a result of the success of his projects and the subsequent expansion of the business through referrals from satisfied clients. Georg joined K&A in 2003 and has been the firm's Chief Executive Officer since 2005.

In the last few years, Georg has been the Project Director/Key Personnel for classification and/or compensation studies, organizational assessments, and other HR projects, at the following agencies:

- <u>Cities/Towns:</u> Alameda, American Canyon, Anaheim, Arroyo Grande, Bellflower, Campbell, Citrus Heights, Coachella, Concord, Cotati, Gilroy, La Cañada Flintridge, Lomita, Los Altos, Los Altos Hills, Menifee, Menlo Park, Morro Bay, Murrieta, National City, Newport Beach, Oakland, Oxnard, Palm Desert, Perris, Pleasant Hill, Port Hueneme, Redlands, Redwood City, Sacramento, San Diego, San Jose, San Marino, Santa Ana, Santa Barbara, Santa Clara, Saratoga, Sausalito, Seal Beach, Spokane (Washington), Vallejo, West Sacramento, Westminster, Yucca Valley, Yreka
- <u>Counties</u>: Bernalillo (New Mexico), Fresno, Monterey, Orange, Placer, San Joaquin, Sonoma, and Trinity.

View Sanitary District, Oakwood Lake Water District, Paradise Irrigation District, Rancho California Water District, San Bernardino Valley Water Conservation District, Santa Clarita Valley Water Agency, Sonoma County Water Agency, South Coast Water District, State Water Contractors, Sweetwater Authority, Trabuco Canyon Water District, Vallecitos Water District, Valley County Water District, West Basin Municipal Water District, Western Municipal Water District, Zone 7 Water Agency
- Other: Cooperative Agricultural Support Services Authority, Los Angeles County Employees Retirement Agency, Orange County Mosquito & Vector Control District

Mike Harary, B.B.A., M.B.A. Project Manager

Mike Harary possesses over 33 years of municipal HR management experience including serving as a Human Resources Director for two municipalities in Southern California. He has been involved in all aspects of Human Resources for the cities of La Mirada, Orange, Westminster, and Downey, including serving as Chief Labor Negotiator, managing recruitment and selection processes for all types of municipal government positions, handling employee benefits functions, responding to labor and employee relations issues, complying with labor laws, conducting personnel investigations, and

©2023 Arthur J. Gallagher & Co. All rights reserved.

managing a variety of general human resources functions. He has also served as a consultant with Koff and Associates for the last 2½ years managing numerous classification and compensation studies for multiple cities, counties, and special districts throughout California.

Mike has a bachelor's degree in Business Administration emphasizing in Human Resources Management from California State University, Long Beach, and a Master of Business Administration, also from Cal State Long Beach.

Some of the K&A classification and compensation projects Mike has worked on include but are not limited to:

- <u>Cities:</u> Bellflower, Corona, Davis, Duarte, East Palo Alto, El Monte, Fullerton, Gardena, Glendora, Newport Beach, Orange, Rohnert Park, San Marino, Spokane (WA), Westminster
- <u>Special Districts</u>: Altadena Library District, Banning Library District, Big Bear Lake Department of Water & Power, Buena Park Library District, Camrosa Water District, Chino Basin Water Conservation District, Cucamonga Valley Water District, Garfield County Public Library District (Colorado), Greater Los Angeles County Vector Control District, Housing Authority of the City of Santa Barbara, Housing Authority of the County of Santa Barbara, Jurupa Community Services District, Los Angeles County Employees Retirement Agency (LACERA), Orange County Water District, Tri-City Mental Health Authority, and Victor Valley College

Mike will provide managerial project support throughout this effort, including classification analysis, interviews with employees and management, compensation data collection and analysis, internal job analysis, development of recommendations, and implementation strategies.

Monica Garrison-Reusch, B.A., M.B.A. Consultant

Monica has over 15 years of human resource program experience, all of which have been spent serving as either a team consultant or project manager on projects working with public sector agencies. Monica's primary professional focus over the last several years has been on classification and compensation practices.

Prior to joining K&A in 2016, Monica performed classification and compensation consulting services as either a team member or project manager on varied projects including large scale studies done for the Counties of Madera, Sacramento, Bernalillo (in New Mexico), and the California State Department of Personnel Administration. Monica also developed and served as a Co-Trainer for a two-day course on Classification and Compensation.

Monica's depth of experience allows her to provide a broad range of human resources services to public agencies. She specializes in compensation projects focusing on both base salary and total compensation analysis studies. Monica has also worked on project teams conducting classification studies and organizational analysis, including performing the full range of classification analysis and conducting in-depth survey and analysis of organizational structures and past organizational practices.

Since joining K&A, Monica has worked on studies for the following clients:

- <u>Cities:</u> Cotati, Crescent City, Pleasant Hill, Sacramento, Vallejo
- Counties: El Dorado, Mendocino, Monterey, Trinity
- <u>State</u>: California State Auditor's Office

Insurance | Risk Management | Consulting

Special Districts: AC Transit, Cosumnes Community Services District, East Bay Municipal Utility District, Eastern Municipal Water District, El Dorado County Transit Authority, First 5 Contra Costa County, First 5 Santa Clara County, Hayward Area Recreation and Park District, Livermore Amador Valley Transit Authority, Mendocino Coast Rec and Park District, Mojave Water Agency, North Tahoe Public Utility District, Orange County Transportation Authority, State Water Contractors, Trabuco Canyon Water District

She earned an MBA with an emphasis in Marketing at Golden Gate University and a Bachelor of Science in Business Administration from the University of Southern California.

Monica will provide Senior H.R. Associate support for this project, including classification analysis, interviews with employees and management, compensation data collection and analysis, internal job analysis, development of recommendations, and implementation strategies.

Janna Dinkelspiel Associate Consultant

Janna Dinkelspiel came to Koff & Associates in August 2022 with over 15 years' experience in private and public sector human resources. Most recently Janna was a Senior Employee Relations Analyst in a municipality where she gained well rounded experience in recruitment and retention, employee relations, labor relations, policy development, performance management, training and development and classification and compensation. Janna was the City's subject matter expert for classification and compensation while conducting and implementing three large-scale compensation studies for the City, as well as assisting the executive team with creation of a compensation policy.

Janna has a degree in Business Administration from the University of Washington and holds a Senior Professional Human Resources Certificate from HRCI.

Kelly Barns Associate Consultant

Kelly Barns has over 17 years of experience in a variety of leadership and technical public-sector human resources and risk management roles, from analyst to, Risk Manager to, Assistant Director and Director of Human Resources in municipal government. While a well-rounded practitioner and generalist with experience in talent acquisition, labor relations, classification and compensation, policy and contract development, performance management, employee engagement, Leaves and ADA administration and management, training and development, workplace investigations, health and safety, workers' compensation, employee benefits, liability administration and management, and general Human Resources and Risk Management administration. Kelly joined Koff & Associates in March 2022.

Kelly has a degree in Business Administration and Management, is a Human Resources Certified Professional through International Public Management Association of Human Resources (IPMA-CP) and has a Senior Professional Human Resources Certificate (SPHR).

Kelly will provide Human Resources Associate support throughout each project role, primarily consist of project and technical support in, classification analysis, interviews with employees and management, compensation data collection and analysis, internal job analysis, and development of recommendations. Kelly has a passion for engaging, collaborating with, and supporting clients, strengthening employee relations and community partnerships.

Cindy Harary, B.A. Consultant

Cindy's professional qualifications include over 32 years of experience in the Human Resources field, primarily in classification and compensation. She spent the first 11 years in the public sector working for the City of Whittier, California, where she started out in their Public Works Department before moving to the Human Resources Department. She gained experience in classification and compensation, recruitment and selection, employee training and development, labor relations, and general human resources administration.

For the next 16 years, Cindy worked as a Human Resources Consultant for a consulting firm where she specialized in conducting classification and compensation studies for multiple public sector agencies including cities, counties, and special districts as well as several private sector clients. Some of the Orange County Cities she worked on in partnership with other consultants at that firm were: Cities of Brea, Laguna Beach, Lake Forest, La Palma, Los Alamitos, Placentia, San Clemente, Stanton and Tustin. In Los Angeles County, her work includes: Cities of Corona, Downey, El Monte, Manhattan Beach, and Upland. Finally, in San Bernardino County she has worked on the City of Rancho Cucamonga.

Since joining Koff & Associates in 2015, Cindy has worked on Classification and/or Compensation studies for:

- <u>Cities/Towns</u>: Anaheim, Big Bear Lake, Campbell, Carmel, Corona, Danville, Davis, Indian Wells, Laguna Niguel, Los Altos, Manteca, Menifee, Murrieta, National City, San Diego, Santa Ana, Santa Barbara, Seal Beach, Tracy, Yucca Valley
- <u>Counties</u>: Orange
- Education: Compton College
- <u>Special Districts</u>: Alameda Housing Authority, Altadena Library District, Bay Area Water Supply and Conservation Agency, Cosumnes Community Services District, Eastern Municipal Water District, Encina Wastewater Authority, Housing Authority of Alameda County, Housing Authority County of San Bernardino, Housing Authority for the County of Santa Barbara, Humboldt Waste Management Authority, Inland Empire Utilities Agency, Monte Vista Water District, North Coast County Water District, Orange County Fire Authority, Orange County Mosquito & Vector Control District, Oro Loma Sanitary District, Port of Hueneme, Rincon del Diablo Municipal Water District, Riverside County Transportation Commission, Santa Clarita Valley Water Agency, South Coast Air Quality Management District, Water Replenishment District of Southern California, Western Municipal Water District

Cindy earned her B.A. degree in Broadcast Journalism at California State University, Long Beach.

Cindy will provide H.R. Associate support throughout this effort, including classification analysis, interviews with employees and management, compensation data collection and analysis, internal job analysis, development of recommendations, and implementation strategies.

Renate Tiner, B.Sc. Associate Consultant

Renate's professional qualifications include five years of both non-profit and private sector Human Resources experience. Starting in Human Resources administration and rising into Human Resources

management, she gained experience in full-cycle recruitment, orientation and on-boarding, Health and Safety, Worker's Compensation, licensing and accreditation, policy development, and general Human Resources administration. Renate has a total of 10 years' experience.

Since joining Koff & Associates in 2017, Renate has worked on Classification and Compensation Studies for the following agencies:

- <u>Cities</u>: Bellflower, Concord, Cupertino, El Monte, Hillsborough, Los Altos, Mt. Shasta, Piedmont, Rohnert Park, San Diego, Sausalito, West Sacramento, Calistoga, Foster City, Pittsburg, Perris, Santa Crus, Town of Truckee, Hayward, Rio Dell, County of Butte
- <u>Special Districts:</u> Alameda County Transportation Commission, Bay Area Water Supply and Conservation Agency, Eastern Municipal Water District, Dublin-San Ramon Services District, Foothill-De Anza Community College District, Groveland Community Services District, Los Angeles County Employees Retirement Association, Metropolitan Transportation Commission, Midpeninsula Regional Open Space District, Port of Long Beach, Riverside Community College District, and San Joaquin County Superior Court, Truckee Donner Public Utility District, Monterey Peninsula Regional Open Space District, Santa Clara Valley Open Space Authority, Triunfo Water & Sanitation District, Port of Stockton, Antelope Valley-East Kern Water Agency, Coachella Valley Water District, Foothill Municipal Water District, Orange County Sanitation District, Los Angeles Unified School District, Tahoe Transportation District, San Luis & Delta Mendota Water Authority, Habeas Corpus Resource Center

Renate earned her B.Sc. degree in Psychology from the University of Northern British Columbia, in Prince George BC, Canada. She was a Canadian Human Resource Professional (CHRP) Candidate before moving to the United States.

She will provide H.R. Associate support throughout this effort, including classification analysis, interviews with employees and management, compensation data collection and analysis, internal job analysis, development of recommendations, and implementation strategies.

STAFF REPORT 3/27/2024

То:	Honorable Mayor and City Council Members
FROM:	Gabriel Perez, Development Services Director
	Anahi Fernandez, Management Analyst
Subject:	Adopt Resolution No. 2024-10 accepting the City of Coachella Annual Progress Report (APR) and direct staff to submit to the California Department of Housing Community Development

Staff Recommendation:

Staff recommends that the City Council:

- 1. Adopt Resolution 2024-10, accepting the General Plan 2023 Annual Progress Report; and
- 2. Direct staff to submit the 2023 APR to the California Department of Housing and Community Development as required by law.

Background:

California Government Code Section 65400 requires the City to prepare an annual status report on City of Coachella 2035 General Plan implementation. The annual status report must be presented to Council for review and acceptance, and then submitted to the Governor's Office of Planning and Research (OPR) and the Housing and Community Development (HCD) by April 1st of each year pursuant to State guidelines. The purpose of the progress report is to provide information to Council to assess how the General Plan is being implemented. Also, the report provides State required information regarding the City's progress in meeting its share of regional housing needs.

Discussion/Analysis:

General Plan Implementation Actions

The General Plan 2023 APR describes the status of General Plan implementation measures and housing activity and programs. The City of Coachella General Plan 2035 serves as a blueprint for the future growth of the City of Coachella and includes goals and policies within various General Plan elements that include land use, housing, mobility, health and wellness, sustainability, safety, infrastructure and public services, and noise. The General Plan Implementation Actions describes actions that the City shall undertake to implement the General Plan, the level of priority of the

action, timeframe, the responsible party and the relevant General Plan goals for the action. The status of the General Plan Implementation Actions is provided in Attachment 1.

A status of notable general plan implementation actions are provided in the table below:

Element	Action	Responsibility	Update
Land Use	Update Zoning Code and Zoning Map to comply with General Plan	Planning	Approved by Council Summer 2023
	Historic Preservation Study	Planning	Staff will propose to Council a historic resource study and historical context statement in the FY24-25 budget
	Community engagement process protocols Design Guidelines Update	Planning and City Manager Planning	Resident Engagement Academy was implemented Fall '23. Planning Objective Design
		0	Standards approved
Mobility	Transit Supportive environments	Engineering and Sunline	City and Sunline partnered on design for Coachella Transit Hub planned for completion 2024.
Health and Wellness	Fund additional library facilities, equipment and programs	City Manager, Finance, Riverside County Library System	City is developing Library Annex plans to expand library services with support of State Grant to break ground 2024.
	 Multi-use facilities Emergency Food Gardening tools and resources Community garden and composting education Edible landscaped 	Council, City Manager and Planning	City purchased Hidden Harvest site and applied for SGC Community Resilience Center funding to support a multi-use facility and regenerative gardens.
	Workplace Wellness Team	City Manager	Establish a workplace wellness team for wellness programs in 2024
	Healthy Budget Items	City Manager, Finance	Establish a line item in Annual budget for Health and Equity objectives.
	Plaza vendors – create a healthy food truck permit program to operate around parks and plazas	Planning and Economic Development	To be studies with implementation of the sidewalk vendor ordinance 2024.

There are numerous general plan implementation actions in Attachment 1 that have not occurred and this is likely a result of a lack of reporting to the Planning Commission (Commission) and the City Council (Council) on these actions in previous years. Development Services Department staff plans to provide the status of these General Plan actions to the Commission and Council annually to order to assess the City's progress with General Plan implementation and the priority level of these actions.

Housing Activity Reporting 2023

For the 2023 calendar year, the City Permitted 75 Accessory Dwelling Units (ADUs) that count towards the City's Residential Housing Need Allocation (RHNA) for low-income units. The City also permitted 133 Single Family Detached Units that are above the moderate-income affordability level, 75 moderate, 65 low-income, and 43 very low-income units. A total of 108 multifamily units were issued building permits by the City, 43 of those units are categorized as very-low income and 65 units are categorized as low-income based on affordability. These multifamily units have not been certificates of occupancy. The City currently has a 6th Cycle RHNA of 7,886 residential units across four income categories: Very Low, Low, Moderate, and Above Moderate and the City has currently permitted 601 residential units toward the 7,886 residential unit RHNA goal. The Housing Activity Report for calendar year 2023 is provided as Attachment 2.

RESOLUTION NO. <u>2024-10</u>

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COACHELLA, CALIFORNIA, ACCEPTING THE GENERAL PLAN 2023 ANNUAL PROGRESS REPORT.

WHEREAS the State of California requires cities to have an adopted General Plan to provide guidance on land use decisions; and,

WHEREAS on April 22, 2015, the City Council of the City of Coachella approved the General Plan 2035 document along with the Program EIR and Climate Action Plan; and

WHEREAS the City of Coachella General Plan 2035 is the City's comprehensive long-term policy document comprised of goals and policies for achieving Coachella's vision. The plan guides land use and physical development of the geographic area of the incorporated City limits; and

WHEREAS the General Plan contains the seven State-required elements and four additional elements, as follows: 1) Land Use; 2) Circulation; 3) Housing; 4) Conservation; 5) Open Space; 6) Noise; 7) Safety; 8) Mobility, 9) Health and Wellness; 10) Sustainability; 11) Infrastructure and Public Services; and

WHEREAS each element of the General Plan has a set of goals and policies that are intended to achieve specific objectives. The City's General Plan Implementation Action Matrix lists and prioritizes specific projects and ongoing programs or "Implementation Measures" that align with goals and policies in General Plan Elements, excluding Housing. For the Housing Element, implementation measures are included in a Housing Action Plan certified by the California Department of Housing and Community Development (HCD) with the Housing Element; and

WHEREAS California Code of Regulations, Title 25, Division 1, Chapter 6, Sections 6200, *et seq.*, requires the City to use in the report forms and definitions adopted by the California Department of Housing and Community Development (HCD) to report on the status and progress implementing the City's Housing Element; and,

WHEREAS California Government Code Section 65400(a)(2)(B) requires the City to include in the APR the City's progress in meeting its share of regional housing needs; and,

WHEREAS, California Code of Regulations, Title 25, Division 1, Chapter 6, Section 6200, *et seq.*, requires the City to use in the report forms and definitions adopted by the California Department of Housing and Community Development (HCD) to report on the status and progress implementing the City's Housing Element; and,

WHEREAS California Government Code Section 65400(a)(2)(F) requires the City

Page 274

to include in the report an assessment of the degree to which the General Plan complies with the guidelines developed and adopted pursuant to Section 65040.2 and the date of the last revision to the General Plan; and,

WHEREAS California Government Code Section 65400(a)(2) requires the City to submit the report to the Governor's Office of Planning and Research (OPR) and HCD by April of each year; and,

WHEREAS, the Planning Division has determined in accordance with the California Environmental Quality Act (CEQA) that the General Plan 2023 Annual Progress Report (2023 APR) is not a project under the California Environmental Quality Act (CEQA). The APR is an informational report documenting progress towards implementing the General Plan and does not make decisions for City actions; and,

WHEREAS, on March 27, 2024, the City Council of the City of Coachella held a public meeting on the 2023 APR, considered written and oral comments, and facts and evidence presented by City staff, and other interested parties. The 2023 APR is Attachment 3 of the March 27, 2024 City Council staff report, incorporated herein by reference.

NOW, THEREFORE, BE IT RESOLVED, BY THE CITY COUNCIL OF THE CITY OF COACHELLA AS FOLLOWS:

<u>Section 1.</u> Incorporation of Recitals.

The City Council hereby finds that all of the facts in the Recitals are true and correct and are incorporated and adopted as findings of the City Council as if fully set forth in this resolution.

Section 2. CEQA Findings.

The Progress Report is not a project under the California Environmental Quality (CEQA) because the report is an informational report documenting progress towards implementing the General Plan and does not make decisions for City actions.

Section 3. Acceptance of 2023 APR.

Based on the foregoing recitals and findings above, and the written and oral comments, facts, and evidence presented, the City of Coachella City Council, pursuant to Section 65400(a)(2) of the Government Code, has reviewed the 2023 APR that is Attachment 2 and 3 to the March 13, 2024 City Council staff report, incorporated herein by reference. The City Council accepts and finds the 2023 APR:

- A. Adequately assesses the status of the General Plan and Housing Element and its implementation;
- B. Provides information regarding the City's progress in meeting its share of

regional housing needs;

- C. Uses the forms and definitions adopted by HCD to report on the status and progress in implementing the City's Housing Element;
- D. Adequately assesses the degree to which the General Plan complies with the General Plan Guidelines; and

E. Accurately documents the date of the last revision to the General Plan.

Section 4. Submission of Progress Report.

Pursuant to the California Government Code Section 65400(a)(2), the City shall submit the Progress Report to OPR and HCD.

Section 5. Certification.

The City Clerk shall certify to the passage and adoption of this resolution and enter it into the book of original resolutions.

PASSED APPROVED and ADOPTED this 27th day of March 2024 by the following vote:

Zipcode	92236					

Optional: Click here to import last year's data. This is best used when the workbook is new and empty. You will be prompted to pick an old workbook to import from. Project and program data will be copied exactly how it was entered in last year's form and must be updated. If a project is no longer has any reportable activity, you may delete the project by selecting a cell in the row and typing ctrl + d.

Click here to download APR Instructions

Click here to add rows to a table. If you add too many rows, you may select a cell in the row you wish to remove and type ctrl + d.

Optional: This runs a macro which checks to ensure all required fields are filled out. The macro will create two files saved in the same directory this APR file is saved in. One file will be a copy of the APR with highlighted cells which require information. The other file will be its of the problematic cells, along with a description of the nature of the error.

Optional: Save before running. This copies data on Table A2, and creates another workbook with the table split across 4 tabs, each of which can fit onto a single page for easier printing. Running this macro will remove the comments on the column headers, which contain the instructions. Do not save the APR file after running in order to preserve comments once it is reopened.

Optional: This macro identifies dates entered that occurred outside of the reporting year. RHNA credit is only given for building permits issued during the reporting year.

Link to the online system: <u>https://apr.hcd.ca.gov/APR/login.do</u>

Submittal Instructions

Please save your file as Jurisdictionname2022 (no spaces). Example: the city of San Luis Obispo would save their file as SanLuisObispo2022

Housing Element Annual Progress Reports (APRs) forms and tables must be submitted to HCD and the Governor's Office of Planning and Research (OPR) on or before April 1 of each year for the prior calendar year; submit separate reports directly to both HCD and OPR pursuant to Government Code section 65400. There are two options for submitting APRs:

1. Online Annual Progress Reporting System - Please see the link to the online system to the left. This allows you to upload the completed APR form into directly into HCD's database limiting the risk of errors. If you would like to use the online system, email <u>APR@hcd.ca.gov</u> and HCD will send you the login informatior for your jurisdiction. *Please note: Using the online system only provides the information to HCD. The APR must still be submitted to OPR. Their email address is opr.apr@opr.ca.gov.*

 Email - If you prefer to submit via email, you can complete the excel Annual Progress Report forms and submit to HCD at <u>APR@hcd.ca.gov</u> and to OPR at <u>opr.apr@opr.ca.gov</u>. Please send the Excel workbook, not a scanned or PDF copy of the tables.

		5											6	7
		Extremely low-Income Need		2021	2022	2023	2024	2025	2026	2027	2028	2029	Total Units to Date	Total Units Remaining
Extremely Low-Incon	ne Units*	517		-	-	-	-	-	-	-	-	-	-	517

*Extremely low-income houising need determined pursuant to Government Code 65583(a)(1). Value in Section 5 is default value, assumed to be half of the very low-income RHNA. May be overwritten.

Please Note: Table B does not currently contain data from Table F or Table F2 for prior years. You may login to the APR system to see Table B that contains this data.

Note: units serving extremely low-income households are included in the very low-income RHNA progress and must be reported as very low-income units in section 7 of Table A2. They must also be reported in the extremely low-income category (section 13) in Table A2 to be counted as progress toward meeting the extremely low-income housing need determined pursuant to Government Code 65583(a)(1).

Please note: For the last year of the 5th cycle, Table B will only include units that were permitted during the portion of the year that was in the 5th cycle. For the first year of the 6th

cycle, Table B will only include units that were permitted since the start of the planning period. Projection Period units are in a separate column.

Please note: The APR form can only display data for one planning period. To view progress for a different planning period, you may login to HCD's online APR system, or contact HCD staff at apr@hcd.ca.gov.

 Tenent Preference Policy

 Local governments are required to inform HCD about any local tenant preference ordinance the local government maintains when the jurisdiction submits their annual progress report on housing approvals and production, per Government Code 7061 (SB 649, 2022, Cortese). Effective January 1, 2023, local governments adopting a tenant preference are required to create a webpage on their internet website containing authorizing local ordinance and supporting materials, no more than 90 days after the ordinance becomes operational.

 Does the Jurisdiction have a local tenant preference policy?
 No

If the jurisdiction has a local tenant preference policy, provide a link to the jurisdiction's webpage on their internet website containing authorizing local ordinance and supporting materials.

General Plan Implementation Actions Update for 2023 Calendar Year

#	ACTION DESCRIPTION	PRIORITY	TIME FRAME	RESPONSIBILITY	RELEVANT GOALS
Each action is numbered as a comprehensive list for each element	An actionable description of the implementation action. Some actions include end-note references to supportive background material or example projects.	 Action items are marked as "High", "Medium", or "Low" depending on community and staff input throughout the process. Some of the criteria that helped determine priority included: Cost. Feasibility. Whether the action would help engage and empower residents. Whether action could improve or enhance existing programs/infrastructure (instead of create something new). 	 A broad timeframe that refers to when the action should be implemented. The timeframes are as follows: <u>Immediate</u> - Current/ongoing projects or within one year of Plan adoption. <u>Short</u> - Within 2 to 4 years of Plan adoption. <u>Medium</u> - Between approximately 5 and 7 years of Plan adoption. <u>Long</u> - 10+ years after Plan adoption. <u>Ongoing</u> - Reoccurring or immediate action. 	Identification of the agency or department responsible for implementing the action.	List of goal(s) that the action item will help implement. Goals will be listed with the Element title acronym and the goal number. For example an action that implements Goal 3 from the Land Use + Community Design Element and Goal 2 from the Community Health + Wellness Element, this column would contain "LU-3, CHW-2".

Land Use + Community character (LU)

#	Action description	Priority	Time frame		Relevant Goals	2023 Update
	 Zoning ordinance update. Following the adoption of the General Plan, update Coachella's Zoning Ordinance. The City Council and planning staff should explore and/or modify the following items in addition to others in line with the Plan's vision. The zoning consistency analysis can be found in Appendix C. Update the zoning code and official Zoning Map to comply with and implement the General Plan Designations and General Plan Designation Map. Update the zoning code to encourage creative leisure and recreational uses in transit accessible and walkable areas. Create a park once district. Establish climate-appropriate, design guidelines that recommend best practices for passive heating and cooling in Coachella's climate. Develop an incentive program that will assist developers in revitalizing existing structures. Create bicycle parking and storage requirements for all new development (or remodeling/rebuilding to the extent feasible) to cover a broad range of bike parking needs, including parking in multi-family residential dwellings, employee parking for commuters and general purpose parking in commercial areas, civic facilities and parks. Collaborate with the School Districts to provide adequate bicycle parking facilities for students and staff. Require a certain proportion or number of units in each residential development to include universal design elements, ensuring easy modifications to accommodate 	,		ibility	LU-1 LU-2 LU-3 LU-5 M-1 M-4 M-7 CHW-5	-Zoning Consistency -Objective Design Sta -Park once district to -Not started. Somew -incentive program n -Commercial facader -bicycle and storage
	 Establish community gardens in appropriate locations and set forth basic regulations for community gardens, such as creation, maintenance, and operating rules. Allow food gardening by right in residential open space areas, including front, back, and side yard space. Prevent schools and other sensitive receptors from locating near known or expected new sources of air pollution and vice versa. The specific "safe" distance from a 				CHW-8 CHW-9 SNE-1	-universal design ele -community gardens -not prohibited toda
1.	 pollution source is dependent on the source and amount of pollution releases; however, a good rule of thumb is at least 500 feet from busy roadways, highways, and stationary sources. When permitting new child-care facilities, require them to submit a customized, or adopt a standard, wellness policy plan to address physical activity programs, interdisciplinary nutrition education and provide meals and snacks that are consistent with current guidelines established by the US Department of Agriculture. Allow physicians and other medical providers to convert foreclosed or other vacant residential structures into neighborhood health clinics. The City may set restriction (such as hours of operation, parking, signage, and services offered) to ensure the clinic is not a burden to the neighborhood. Strive for and encourage all new health and social service facilities to be transit-accessible and pedestrian-friendly. Work with Sun Line to improve transit routes and Sun Dial (Dial a Ride) access to service related facilities. Encourage the co-location of medical healthcare, mental/behavioral health and social services to increase access to care. 	S High	Short	Planning	SNE-2 SNE-4 SNE-5 SNE-9 SNE-11	
	 Update development standards and/or create a development checklist to incorporate climate change adaption techniques into the development process. Establish minimum tree planting requirements and guidelines for different sub areas, development types, street trees and parking lot landscaping to ensure the City's urban forest/tree canopy is extensive and well maintained. These requirements should also address drought tolerant and native plants and landscaping to reduce overall water usage. Allow and encourage the creation of legal accessory dwelling units (ADUs) to enhance the diversity of housing options in existing residential neighborhoods. ADUs may be detached or attached to the principal structure. Require below market rate units to come in a mix of sizes/number of bedrooms to address the need for affordable housing for different household types. 					City adopted pre-app
	 Require developers/contractors to recycle at least 50 percent of all construction and demolition waste. Allow and incentivize renewable energy and energy efficiency technologies. Identify and remove regulatory or procedural barriers to implementing green building practices within the City, such as updating codes, guidelines and zoning, and ensure that all plan review and building inspection staff are trained in green building design practices and techniques. Identify appropriate buffers between agricultural and urban uses. Develop standards to provide for cluster development and conservation design to minimize the impacts of urban development on areas where sensitive species are identified. Identify standards for green roofs. 					
	 Create guidelines/requirements for permeable paving. Expand allowances for home occupations/businesses in residential areas. Reduce parking minimum requirements in projects where the developer conducts a traffic study to determine that unbundled parking and other measures will reduce the number of spaces required per unit. 					-Parking standards a

Mobility (M)

	aCTION Description	Priority	Time FRame	Responsibili ty	Relevant
	Complete streets manual. Develop a complete streets manual to ensure new roadway construction addresses all modes of travel to implement complete street principles. This manual should include the following components, which the City can write as stand-alone chapters over time:			Engineering	
	Multi-modal street guidelines			Public Works	
	• Review, identify and implement - Review existing roadways in the City to identify what enhancements are appropriate for specific facilities to better accommodate additional modes of travel and increase connectivity. Implement guidelines within the Complete Streets Design Manual that can be constructed in lieu of roadway and intersection widening.			Planning	
	• Create standards – Design and document standards for typical roadway right-of-way widths and types that include specifications for bicycle facilities, sidewalks, turn lanes, intersections, crosswalks, transit facilities and other details.			Grants Manager	
	 <u>Multi-modal level of service</u> – Develop traffic study guidelines that address the impact on all users including automobile drivers and passengers, bicyclists, pedestrians, persons with disabilities and transit riders. Consider revising traditional vehicle level of service (LOS) with methodologies more inclusive of other modes such as the multi-modal level of service (MMLOS). The City should update these guidelines on an ongoing basis as Coachella continues to grow and as new research and technology becomes available. 			Public Works	
	Pedestrian and bicycle action plan	High	Ongoing		LU
	o <u>Pedestrian and bicycle design guidelines</u> – Develop pedestrian and bicycle design guidelines that identify pedestrian requirements such as sidewalk width, offset from the curb and other criteria for sidewalks along roadways. Bicycle guidelines and requirements should ensure that bicycle facilities connect all areas of the city including new and existing developments, regardless whether these areas have gates, sound walls or other barriers. The guidelines should also contain design specifications for on- and off-street bike paths and bike lanes,, street markings, dimensions, intersections, turning lanes, signage and bicycle parking standards. The guidelines should also consider installing drinking water fountains along key bicycle and pedestrian routes.				
	 Prioritization plan – Prepare a prioritization plan for the creation and improvement of sidewalks in existing neighborhoods and bicycle facilities throughout the City. 				
	 Subdivision retrofits program – Review existing subdivisions to identify those neighborhoods that can be retrofitted to accommodate additional pedestrian and bicyclist connections. 				
	o Active transportation requirements – Develop guidelines that require future residential and commercial developments in the City enhance and connect to external bicycle and pedestrian networks.				
	• Pedestrian and bicycle network map update – Create and update Citywide map (or two maps) of pedestrian and bicycle facilities on a recurring interval of no less than two years and ensure the map(s) is/are accessible to the public.				
	 <u>Active transportation programs</u> – In addition to design and policy, the plan should contain programs to complement infrastructure improvements such as safety education or a bike sharing programs. Complete streets funding - On an ongoing basis, pursue grants to implement the multi-modal streets in Coachella, including but not limited to funding from federal and state agencies, philanthropic organizations and corporate giving programs. 				
	Traffic calming program. Develop a citywide program that implements a mechanism to apply traffic calming features to neighborhood roadways in a systematic fashion. This program should incorporate a strong element of public involvement to obtain resident feedback and input to identify appropriate improvements from each neighborhood.	High	Medium	Public Works	
	Temporary car-free zones program. Develop a program with a simple application process for community event organizers to apply for temporary street closure permits necessary to create car-free events that allow people to safety walk, bike, socialize and exercise in the streets.	Medium	Short	Public Works	
	Signage program. Implement a signage program for bicycle facilities that documents connections to regional facilities, bicycle parking and community facilities along existing and future bicycle facilities.	Medium	Short	Public Works	
Sig				Engineering	
	Walking, cycling and public transit education. Develop an active transportation awareness and safety education program in partnership with community groups, schools, other public agencies; employers to educate residents, workers,	Low	Medium	School District	
	drivers, businesses and other organizations about the benefits of walking, bicycling, and/or using public transit.			County Health Department	
				Engineering Planning	
	Transit supportive environments. Collaborate with Sun Line Transit Agency to identify and enhance those existing areas of the City where the land uses, development intensity and the pedestrian environment are conducive to higher			Sun Line	_
	levels of transit service and usage.			Cull Line

2023 Update ant Goals complete street program with public facing web LU-3 M-1 portal completed in 23/24. ATP Plan provides addditional info. LU-3 Okay to report. There are grant funds obtained to develop a LU-5 multimodal plan Will work with the Engineering Division in getting these standards developed Okay to report. We have an ATP Plan No subdivision retrofit program Citywide input is incoporated through LLMD M-2 community meetings and see fix it reporting software. This can be achieved through the city's special event permit - city has permitted several block M-3 parties using this application process. RWLM is another example of the City supported car-free zone program Partnering with CVAG in the Go Human Campaign installed various street banners and other educational material with Sunline to promote M-4 walking, cycling, and other modes of transportation. CV Link and Art and Music Line will inlcude a signage program Partnering with CVAG in the Go Human Campaign installed various street banners and other educational material with Sunline to promote walking, cycling, and other modes of M-3 transportation. Transit Hub effort both existing and future facilities

Bus stop location review. Review existing bus stop locations to determine their accessibility to key destinations such as schools, residential areas, retail centers and civic facilities. Work with Sun Line to relocate existing bus stop locations as needed to provide greater access to key community destinations. Bus stop prioritization. Prioritize those bus stop locations that are connected to bicycle and pedestrian facilities to help meet users' last mile travel needs. Transit service prioritization. Work with Sun Line to prioritize future transit service in those areas where the greatest level of transit ridership will occur based on the supportive land use and transportation patterns. Development incentives. Explore and develop incentives to encourage higher-density, transit-friendly development along these transit routes.	High	Short	Engineering	M-5	Sunline does the review of bus stop location and submits new stations for review by the City. City has also requested stops previously. City staff reviewed all sun line routes for missing shade structures and 1 bus stop missing to be addressed by June '24 City and Sunline partnered to design Coachella Transite Hub for completion June 2024.
Transit service improvements for seniors. Meet with Sun Line Transit and community groups annually to identify transit service changes and improvements to accommodate the mobility needs of seniors.	Medium	Ongoing	Engineering Sun Line	M-5	bus stops must be ADA accessible. Senior Center - bus transport M-F. Cal Vans for Sunline.
Travel survey. Implement a regular travel survey in association with Sun Line Transit for Coachella residents to identify their commute patterns every two to five years.	Low	Medium	Planning Engineering Sun Line	M-5	This is information compiled by Sunline.
Operations and maintenance annual reports. Prepare annual reports disclosing incremental operations and maintenance costs associated with new transportation infrastructure built in the City over the past year.	Medium	Short	Engineering Public Works	M-6	Okay to report. Track bike lane striping separetly.
Transportation infrastructure maintenance funding. Investigate funding mechanisms to maintain existing transportation infrastructure based on existing development such as assessment districts. Citywide traffic fee programs should also be updated on a recurring interval of not less than every five years.	High	Short	Engineering	M-6	No plans for a new funding mechansim. Priority and timeframe medium
Traffic data collection program. Implement a traffic data collection program on a recurring interval of no less than two years. The program should collect data on peak and non-peak traffic counts, bicycling and pedestrian counts for key intersections, transit ridership and automobile collision locations, especially ones that involved a pedestrian cyclist, or alcohol usage.	Medium	Medium	Engineering Sun Line	M-7	Engineering suggests 2 year collection of data not financially feasible and that such multimodal studies are typically conducted once every ten years.
Driver education programs. Work with community groups or other public agencies to educate motorists about safely sharing the road with bicyclists, pedestrians, and transit vehicles; child restraint laws; fuel efficient driving; and common causes of preventable collisions to promote overall safety of multi-modal streets users.	Low	Medium	Engineering	M-3	Recommend with Police. Engineering identified that they would not have a role in this.
Improve traffic flow. Implement traffic features such as roundabouts or the use of integrated signalization to improve traffic flow and reduce emissions from vehicle idling and stop and start.	Medium	Medium	Engineering Public Works	SNE-11	Participating in CVAGs synchronization projects. Continue to look at opportunities to incorporate these features in new construction and grants. Timeframe - ongoing

Sustainability + Natural Environment (SNE)

#	aCTION Description	Priority	Time FRame	Responsibili ty	Relevant Goals	2023 Update
	Heat island mitigation plan. Write and adopt a Heat Island Mitigation Plan that requires new commercial and residential developments to incorporate cool roofs, cool pavements and strategically placed shade trees. The plan should outline how the City will actively inspect and enforce state requirements for cool roofs on non-residential re-roofing projects.	High	Short	Engineering	SNE-1	priority - short - timefra plan. Grant needed
	Sustainable landscape management plan. Create and update a landscape management plan that includes a consistent and sustainable landscaping and streetscape palette to apply to all roadways throughout the City. Different pallets and designs should apply to different districts and street types. Should specify different landscape designs for different districts and street types and prioritize shade, ease of maintenance and water conservation. The plan should also contain an urban forest management strategy. The effect should seek to optimize shade, ease of maintenance, water conservation climate benefits.	High	Medium	Planning Building Engineering Public Works	SNE-1 SNE-3 SNE-11	consolidate with above
	Vulnerability/resiliency assessment and climate adaptation strategy. Work with the regional government associations to conduct a community-wide assessment of the potential health impact, cumulative impact, and risk resiliency factors of climate change on Coachella residents. The assessment should identify the geographic areas, groups and individuals most vulnerable to climate change and specific opportunities for the City to improve its response. Vulnerable groups typically include infants and young children, the elderly, outdoor workers, people with preexisting health conditions such as asthma, and communities already affected by other social, economic, or other environmental injustices. With this information, develop a climate adaptation strategy to protect the public from heat waves and vector control, increased threats of wildfire, changing precipitation patterns, reduced water supply and increased peak energy demand.	Medium	Medium	Planning Emergency Coordinator CVAG HARC Public Health	SNE-1	
	Energy efficiently education. Organize workshops on how to increase energy efficiency of homes and businesses through topics such as home weatherization, building envelope design, smart lighting systems and conducting a self-audit of energy usage.	High	Ongoing	Building Imperial Irrigation District	SNE-2	
	Water efficient buildings. Establish or adopt a checklist to ensure developers and contractors plan and install water-efficient infrastructure and technology, including low-flow toilets and showerheads, moisture-sensing irrigation and other advances.	High	Short	Planning Building	SNE-3	This will require adoption
	Grey water ordinance. Write and adopt a grey water ordinance establishing criteria and standards to permit the safe and effective use of grey water (also known as on-site water recycling). Review and revise, without compromising health and safety, other building code requirements that might otherwise prohibit such systems.	High	Short	Planning Building	SNE-3	Will begin in 2023.
	Agriculture education park. Acquire a working agricultural site to manage as an educational and cultural park.	Low	Long	Public Works	SNE-5	
	Right-to-Farm Ordinance. Work with the Riverside County Agriculture Commissioner to write and adopt a right-to-farm ordinance. (See this model ordinance: http://www.smartgrowthamerica.org/smartgrowthusa/wp-content/uploads/2011/01/modelrtfordinance.pdf)	High	Short	Planning	SNE-5	This has not been done
	Habitat impacts. Develop a set of guidelines for evaluating project impacts to habitat, as well as for requiring specific mitigations for those that are identified.	Low	Medium	Planning	SNE-9	This has not been done long-term goal.
	Vehicle idling ordinance. Establish a local ordinance that exceeds the state vehicle idling restrictions where appropriate, including restrictions for bus layovers, delivery vehicles, trucks at warehouses and distribution facilities and taxis, particularly when these activities take place close to sensitive land uses (schools, senior centers, medical facilities and residences).	Medium	Ongoing	City Manager Public Works Engineering	SNE-11	Not yet achieved Difficult to implement o
	Eco-contractor policy. Consider the creation and adoption of a policy that gives preference to contractors that use reduced emissions equipment for City construction projects as well as for City contracts for services (e.g., garbage collection). The preference policy could also include other aspects of environmentally friendly business and operations practices.	Low	Ongoing	City Manager Public Works Engineering	SNE-11	The Existing Park Maste an appropriation to brir
	Parks Master Plan. Revise and adopt the parks master plan, which shall address current deficiencies in park space, specific sites, accessibility, funding sources and fees. The new Parks Master Plan shall also provide for physical activity amenities in selected parks and recreation centers. The City shall install and maintain indoor or outdoor exercise equipment in selected park and recreation centers and signage to encourage exercise (i.e., mile markers on existing and new paths, health and safety tips, and stretching/ strengthening exercise suggestions, etc.). The City shall also incorporate improvements, such as water fountains and restroom facilities, in parks to allow people to spend more time outdoors.	High	Immediate	Public Works Planning	SNE-13	The Existing Park Maste an appropriation to brir
	Developer park guidelines. Create "Developer Guidelines for Coachella Park Standards and Requirements" to set standards, requirements, definitions, and procedures to assist developers in creating parks that contribute to the City's parks system. STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Dr. Gabriel Martin, City Manager

SUBJECT: Approval of the 2024 City Council Meetings Calendar

STAFF Recommendation:

Staff recommends the approval of the 2024 City Council meetings calendar.

BACKGROUND:

Per the City of Coachella Municipal Code, Title 2 (Administration and Personnel), Chapter 2.04 (City Council), Section 2.04.040 - The City Council shall meet regularly on the second and fourth Wednesdays of each month at six p.m. at the Coachella City Council Chambers, City Hall located at 1515 Sixth Street, Coachella, California.

DISCUSSION/ANALYSIS:

Staff recommends that the following 2024 City Council meetings be cancelled:

Date:	Reason:
January 10, 2024	New Year's Day Holiday
April 10, 2024	Spring Break
August 14, 2024	Dark
August 28, 2024	Dark
September 25, 2024	League of California Cities – Annual Conference
October 23, 2024	Dark
November 27, 2024	Thanksgiving Holiday
December 25, 2024	Christmas Holiday

Under Resolution No. 2001-10 – The Coachella Council Policies, Rules, and Procedures, Section 7 and 8 – the Mayor or the majority of the City Council can call a special or emergency meeting at any time and place.

ALTERNATIVES:

1. City Council may recommend additional cancellation dates or reduced the proposed

cancellation dates

2. City Council not approve the recommended 2024 City Council meetings calendar

FISCAL IMPACT:

No fiscal impact to the budget

Council Meetings

ltem 23.

STAFF REPORT 3/27/2024

To:Honorable Mayor and City Council MembersFROM:Ruben Ramirez, ControllerSUBJECT:Authorize the City Manager to execute a contract to Conduct a Comprehensive
User Fee Study and Cost Allocation Plan and appropriate \$38,210 from General
Fund Unreserved fund balance.

STAFF RECOMMENDATION:

Authorize the City Manager to execute a contract to Conduct a Comprehensive User Fee Study and Cost Allocation Plan with Willdan Financial Services in the amount of \$38,210

BACKGROUND:

The City of Coachella continues to experience operational changes that generate a variety of challenges. These challenges include: the adequate provision of facilities and services; managing growth and development in progressive ways; and ensuring that revenues sources keep up with new demands for services. In order to ensure that revenues sources keep up with service demands it is necessary to periodically complete a comprehensive cost allocation program and to up-date the calculation for establishing a user fee and rate schedule. The last time the City completed these studies was in 2010 and the method of cost allocation and most of the amount of user fees charged have remained constant ever since.

DISCUSSION/ANALYSIS:

Willdan Financial Services has submitted a proposal that will provide a Comprehensive User Fee Study and Cost Allocation Plan that will enhance fiscal sustainability and equitable distribution of financial resources within the community, align fees and charges with the cost of providing the services, while promoting transparency, fairness, and responsible financial management.

Key City issues and objectives that are addressed within the scope of services include the following:

• Meeting with City Staff to review existing fee schedules, conduct interviews and gather information necessary to understand the processes, operations, structure and staffing necessary for the City to provide services for which fees are charged;

- Conducting analysis that clearly identifies the full (100%) cost of providing services for which fees are charged, and ensuring that there is a reasonable relationship between these costs, the services being provided, and the recipients of these services – all to support compliance with Prop 26 and Prop 218;
- Developing a well-documented Cost Allocation Plan for both full and OMB compliant purposes, which is flexible and able to accommodate changes in City structure, staffing and processes going forward, and which allows for inflation adjustments;
- Comparing costs of providing services with current cost recovery levels and evaluating and adjusting fees and charges to ensure they align with the cost of the services being provided by the City;
- Identifying and evaluating opportunities to develop and implement fees for services being provided for which fees don't currently exist;
- Identifying the amount of revenue being recovered based on current fee levels and activity levels, and projecting future estimates so that recommended fees recover appropriate amounts of revenue;
- Working with City Staff to develop meaningful recommendations for fee setting and subsidies where charging fees that represent full cost recovery may not be reasonable for policy or political reasons;
- Providing meaningful 'apples to apples' comparisons of key fees charged by the City of Coachella to other similar, and/or nearby cities chosen in discussions between Willdan and City Staff. The comparisons will involve applicable fees for sample representative projects which the City could anticipate encountering;
- Providing the City with models that incorporate data and information used in developing updated fees, and allows for updates for CPI, new added personnel, updated time estimates and volumes, or other factors as necessary; and
- Preparing a report that clearly identifies services for which fees are charged, the cost of those services, current and recommended cost recovery levels, and fee amounts, and presenting the results in a way that is readily understood by decision makers.

The end products will include user-friendly Excel-based models, which City staff will retain, and which can be easily updated to add or remove services and/or costs, update budgets in future years, determine the proper allocation of expenditures, and on-going full cost of services provided by the

City. Most importantly, we will ensure that the results and recommendations are clear and understandable, defensible, and easily implementable.

#4: User-friendly Model in Microsoft Excel

#5: Time Surveys and Draft Full Cost Recovery Fees

- #9: Revised Draft Report/Final Report
- #10: Final Report Hard and Electronic Copies

ALTERNATIVES:

1. Authorize the User Fee Study and Cost Allocation Plan to update the current User Fee and Cost allocation.

2. Do no authorize the User Fee Study and Cost Allocation Plan and keep using the current User fee and Cost Allocation. This decision will have a negative impact in the revenues collected to recover the cost of the City of Coachella to provide services resulting in a loss for the City and using other revenues to complement the cost of services provided.

FISCAL IMPACT:

The User Fee Study and Cost Allocation Plan is not included in the approved budget 2023-24 and it will need funding from the General Fund unassigned fund balance (101) in the amount of 338,210 to increase the budget in account E - 101-11-160-10-334-000.

Attachment 1:

Willdan Financial Services Proposal

City of Coachella

Comprehensive User Fee Study and Cost Allocation Plan

February 27, 2024

submitted via email: ruben.ramirez@coachella.org

Mr. Ruben Ramirez Controller City of Coachella 567 El Camino Real Coachella, CA 94066

Re: Proposal to Conduct a Comprehensive User Fee Study and Cost Allocation Plan for the City of Coachella

Dear Mr. Ramirez,

As you know, cities throughout California consistently contend with limited financial resources to address competing priorities and objectives, while striving to maintain high standards of service to their communities. Processes and staffing often evolve as staff seek efficiencies and more cost-effective service models; or sometimes practices change out of necessity in response to events such as the recent pandemic. Considering this, *it is critical that the City of Coachella ("City") confirm that its fees for requested services are updated to reflect current practices, account for the true cost of providing City services, incorporate provision for overhead rates and costs related to indirect support, and maximize appropriate cost recovery. This will help ensure that the revenues generated by fees cover the cost of those services to the greatest extent possible, ensure effective use of the City's financial resources and enhance fiscal sustainability. City Staff, and ultimately the City Council, need a clear understanding of standards, service levels and the associated costs. Recognizing this, the City has responded by soliciting proposals for a Comprehensive User Fee Study and Cost Allocation Plan.*

Willdan Financial Services ("Willdan") is uniquely qualified to assist the City of Coachella with this update, following are specific advantages that Willdan brings to the City for these studies:

Experience with the City of Coachella — Willdan is privileged to have previous history of working successfully with the City of Coachella. We will bring the same level of professionalism and expertise, and understanding of the City, to this proposed engagement, and take advantage of our knowledge of the City and relationships with staff to quickly and effectively initiate the study, gather data and information, and clarify questions. Where possible, we will leverage our knowledge of the City's operations and key staff to facilitate this study in a cost-effective and efficient manner; focusing less time on data gathering, and more on analysis and providing meaningful results, resulting in lower project cost and a higher value.

Extensive Local Experience with Similar Projects for Southern California Cities — Willdan has worked with cities near Coachella, and throughout Southern California, on Cost Allocation and User Fee projects with objectives very similar to those for this study. *Our unique local knowledge will help us bring valuable perspective and knowledge of other local cities' approach to fees and their policies on fee setting and subsidies and assist us in conducting meaningful and efficient fee comparisons to Coachella.* Recent and ongoing studies include the Cities of Indian Wells, Palm Desert, Twentynine Palms, Murrieta, Canyon Lake, Eastvale, Claremont, Chino Hills, Chino, Fontana, West Hollywood, Burbank, El Monte, Los Alamitos, Lynwood, Stanton, Montebello, Arcadia, and Pomona.

Collaborative Approach, Proven Results and User-friendly Models and Reports — Willdan prides itself on working closely with City staff to develop an approach that is targeted toward your specific objectives and reality, and then working together with you to gather first-hand information regarding the processes and tasks required to provide services to those requesting them. This is a distinct advantage we will bring in our approach with the City of Coachella. A collaborative approach ensures we clearly understand your goals and challenges and just as importantly we

Our Cost Allocation methodologies and models have been reviewed and approved by Cognizant Agencies such as the US Army and recently, the US Department of Housing and Urban Development, providing evidence of our thorough and defensible approach to the development of Cost Allocation strategies.

understand your goals and challenges, and just as importantly, you understand the process and the results.

We create user-friendly Excel-based models that the City can retain and conduct our analysis and develop the model collaboratively with City staff. Rather than using an inflexible proprietary software program, we construct our models from the ground up, mirroring the City's budget format wherever possible.

Created directly from the models, our reports clearly and graphically illustrate full and recommended levels of cost recovery and projections of revenue for fee programs, break down the costs into direct and indirect overhead categories, and present the fee methodologies.

Our approach is geared toward delivering work on schedule and presenting results at public meetings and council workshops to stakeholders and elected officials who typically do not want or need to see the deep detailed analysis. The Willdan Team is experienced at communicating complex analytical results in a manner that is easy to understand by non-finance-oriented individuals. We have coordinated or participated in numerous public and staff workshops regarding fees and cost of service-based charges.

Unique Combination of Services and Expertise/Public Engagement — Established in 1988, Willdan is a team of over 80 professionals who provide essential financial consulting services throughout California, and the United States. Willdan has provided the requested services to municipal clients for over two decades; and is the only firm providing these types of consulting services that also has a long history of providing contract staff support to public agencies for the delivery of municipal services. This direct experience as "agency staff" provides us with firsthand understanding of City operations and is uniquely useful in determining the full effort associated with service delivery and in developing a fee schedule that is easy to communicate and implement.

We are excited about this opportunity to serve the City of Coachella. To discuss any aspect of our proposal, please contact me; my contact information is provided in the table below.

Project Understanding

Willdan Financial Services ("Willdan") understands that the City of Coachella ("City") is seeking a Comprehensive User Fee Study and Cost Allocation Plan that will enhance fiscal sustainability and equitable distribution of financial resources within the community, align fees and charges with the cost of providing the services, while promoting transparency, fairness, and responsible financial management.

Given our experience, we have a clear understanding of the issues and concerns that are encountered with this type of project, and more importantly, how to address and overcome them and meet the City's objectives.

Key City issues and objectives that are addressed within our scope of services include the following:

- Meeting with City Staff to review existing fee schedules, conduct interviews and gather information necessary to
 understand the processes, operations, structure and staffing necessary for the City to provide services for which fees
 are charged;
- Conducting analysis that clearly identifies the full (100%) cost of providing services for which fees are charged, and ensuring that there is a reasonable relationship between these costs, the services being provided, and the recipients of these services – *all to support compliance with Prop 26 and Prop 218*;
- Developing a well-documented Cost Allocation Plan for both full and OMB compliant purposes, which is flexible and able to accommodate changes in City structure, staffing and processes going forward, and which allows for inflation adjustments;
- Comparing costs of providing services with current cost recovery levels and evaluating and adjusting fees and charges to ensure they align with the cost of the services being provided by the City;
- Identifying and evaluating opportunities to develop and implement fees for services being provided for which fees don't currently exist;
- Identifying the amount of revenue being recovered based on current fee levels and activity levels, and projecting future estimates so that recommended fees recover appropriate amounts of revenue;
- Working with City Staff to develop meaningful recommendations for fee setting and subsidies where charging fees
 that represent full cost recovery may not be reasonable for policy or political reasons;
- Providing meaningful 'apples to apples' comparisons of key fees charged by the City of Coachella to other similar and/or nearby cities chosen in discussions between Willdan and City Staff. The comparisons will involve applicable fees for sample representative projects which the City could anticipate encountering;
- Providing the City with models that incorporate data and information used in developing updated fees, and allows for updates for CPI, new added personnel, updated time estimates and volumes, or other factors as necessary; and
- Preparing a report that clearly identifies services for which fees are charged, the cost of those services, current and
 recommended cost recovery levels, and fee amounts, and presenting the results in a way that is readily understood
 by decision makers.

The end products will include user-friendly Excel-based models, which City staff will retain, and which can be easily updated to add or remove services and/or costs, update budgets in future years, determine the proper allocation of expenditures, and on-going full cost of services provided by the City. Most importantly, we will ensure that the results and recommendations are clear and understandable, defensible, and easily implementable. Rather than a costly and inflexible proprietary software, which can require expensive licensing fees, Willdan builds models utilizing Excel, from the ground up, employing the City's budget as the gauge. This model, which is then the City's to retain, gives City staff the control to make onthe-fly adjustments and updates.

We will meet directly with departmental representatives at the City at the beginning of the project, to discuss the approach and process for the studies. Discussions will include ways to combine tasks and efforts among the cost allocation plan and user fee study components to maximize efficiencies and ensure adherence to specified timelines.

The completion of a CAP is a key component and first step in the analysis necessary to calculate the cost of providing services. A well thought out CAP ensures that indirect costs associated with central overhead services, such as finance, human resources, or city clerk, are appropriately allocated to operating departments, and ultimately included as a cost component of fees for services. We will work collaboratively with City staff to identify the overhead support services that are provided to operating departments in the City and develop a fair and defensible means of allocating these costs.

Our unique model allows us to provide a CAP that will also be compliant with 2 CFR Part 200 Federal regulations related to cost reimbursement and grant funding, formerly known as OMB A-87 and 2 CFR Part 225 guidelines, which have now been superseded by the Omni Circular. The new circular did not completely overhaul the guidelines, and the intent is still the same, but it did add new limitations to consider and incorporate into a compliant CAP.

For the Comprehensive User Fee Study, we will work directly with personnel at the City who provide services and interact directly with residents and customers, to understand the personnel and procedures involved. By carefully examining these processes, we will be able to identify associated costs such as direct staff costs (salaries and benefits) associated with personnel involved in the activities, and appropriate overhead allocations from both the department and city levels.

For a successful and effective engagement, it is important to have a thorough understanding of specific City policies and objectives, the structure and organization of the City, and the relationships between the central and operating departments. We bring years of successful experience working directly with hundreds of cities throughout California.

Willdan possesses the resources, practical experience, creative thinking, and collaborative consulting skills necessary to complete this important project. *Key distinct advantages that Willdan brings to the City include the following:*

On-site Data Gathering

Our experience has taught us that working together, via face-to-face discussions, is the most efficient and thorough way to ensure that results are accurate, and that studies are completed in a timely manner, which again, is critical in this proposed engagement.

Consequently, through on-site interviews with your staff, Willdan will collect the majority of required data for studies. This method is better than the typical "time and motion surveys" that are provided to agency staff when studies like these are conducted. This process ensures that we gather the data we need in one coordinated step, rather than having to go through repeated follow-up and clarification.

This approach and the dedication of our staff will help ensure we meet the City's timeline and objectives and provide important information to City staff and the Council as soon as possible.

Public Engagement

Our models and project approach are geared toward delivering our work on schedule and presenting our analysis results at public meetings and Council workshops. While we understand that the City Council and local business community may be generally supportive of increasing fees where necessary, it will be important to present recommendations to them in a way that clearly demonstrates the rationale and supporting analysis.

The Willdan Team is experienced at communicating complex analytical results in a manner that is easy to understand by non-finance-oriented individuals and facilitates discussion. Our proposed principal-in-charge for this engagement has coordinated or participated in numerous public and staff workshops regarding fees and cost of service-based charges. As previously mentioned, our objective is to provide useful, detailed information, and present recommendations to the City Council and public in a way that clearly demonstrates the rationale and supporting analysis. Our experience ensures that we can meet this objective.

User-friendly Models and Reports

Willdan prides itself on creating user-friendly Excel-based models that the City can retain and *conducting our analysis and developing the models collaboratively with City staff*. With City staff's immediate input and collaboration, Willdan will design extremely flexible, intuitive Excel-based models. In the future, as the City assumes new responsibilities, modifies existing processes, and/or eliminates unnecessary services or programs, the models will be capable of adding or deleting funds, objects,

The model will be developed to allow the City to run "whatif" scenarios to address possible changes in staffing levels, working hours, etc.

departments, programs, staff positions, and activities. Willdan understands that issues facing the City are unique; consequently, we design our models to match your immediate and desired needs to ensure that end-results exceed staff expectations rather than using an inflexible proprietary software.

These models are then the City's to retain, after our services are completed, and allows for the creation of revenue projections, highlighting potential new revenues, and levels of subsidy.

A key element of these studies is presenting results and recommendations in a straightforward manner, which allows Council and staff to confidently make fee setting policy decisions and understand the impacts of those decisions. Rather than using an inflexible proprietary software program, we construct our models from the ground up, as previously discussed, mirroring the City's budget format wherever possible. As a result, the information contained in our models are easy for City staff to interpret, and the familiar software ensures ease of navigation.

As the models are being designed and constructed, we will work together with City staff to determine the best and most effective features to include.

After the project is completed, we will provide training, so that staff can independently and efficiently evaluate the effects of changes in certain factors. Created directly from the models, our reports clearly and graphically illustrate the full cost recovery level of fee programs and provide projections of revenue from fee programs.

Project Methodologies

The following describes our proposed approach, and work plan to prepare a Cost Allocation Plan and Comprehensive User Fee Study.

Cost Allocation Plan Methodology

The purpose of this cost allocation plan engagement is to ensure that the City of Coachella is maximizing the recovery of indirect costs from identified operating departments, as well as enterprise and other chargeable funds and capital projects. *Furthermore, a sound cost allocation plan is a foundational element of a user fee study, ensuring that the full cost of providing services that is calculated for setting fees includes provision for internal overhead support.*

The Cost Allocation Plan is also integral in the development of internal hourly rates, including CIP billing rates. We will work closely with staff in identifying the proper balance of allocation factors appropriate for the City.

To achieve the maximum cost recovery objective, the City must have a method of identifying and distributing administrative costs that is fair, comprehensive, well documented, and fully defensible. A cost allocation plan coupled with comprehensive overhead rates will enable the City to achieve this goal.

The allocation models utilize an iterative method which is the most accurate allocation methodology. Unlike a direct or "step-down" methodology, an iterative method uses the chosen distribution bases and allocates central service costs iteratively until all allocable costs have been distributed. Using this method, the model can detail the allocation for each central function individually for complete transparency and accountability, while removing bias that might result from the order in which allocations occur in a step-down approach.

A direct methodology is essentially a one-iteration methodology, while a step-down method is typically only two iterations and is less precise and unable to accurately track the allocations from start to finish.

Approach for Managing the Project

Willdan's "hands-on" supervision of Cost Allocation Plan studies, include the following methods:

- Effective Project Management Principal-in-Charge Chris Fisher will manage the entire project with an eye toward high responsiveness, while ensuring that all stakeholders are "on board" with the direction of the project, as well as with the final results. Mr. Fisher will ensure that regular status updates are provided to City staff, conference calls are scheduled, and that in-person meetings are conducted (as necessary).
- Adherence to Time Schedule Willdan recognizes that the use of "timelines" is highly effective in meeting all
 required deadlines. To keep the project on schedule, there are several tasks that must be completed in a timely manner.
 Therefore, we will present a project timeline at the kick-off meeting that should be closely followed.

Although the establishment of an experienced project team and a detailed project timeline work extremely well in general, Willdan understands that outside influences can create uncontainable situations for everyone involved in the project. In rare circumstances like these, our team quickly adapts to changes, and communicates our recommended schedule adjustments to the City.

Approach in Communicating with the City

Willdan staff is accustomed to interfacing with local government councils, boards, staff, community organizations, and the public in general in a friendly and helpful manner; we are always mindful that we represent the public agency. We are sensitive to the need of delivering a quality product, with the highest level of service and professionalism.

Therefore, as the work on the project progresses, we understand that it will be necessary for our staff to work closely with you and City personnel. To accomplish this, we employ a variety of tools, including monitoring project status and budget costs; and ensuring effective communication through several options that are based on the City's preferences.

Experience with Development Service Processes

A unique aspect of our firm is our relationship with our Engineering Division. For many agencies throughout California and other Western states, this division provides contracted services in planning, engineering, and building and safety. When conducting cost recovery studies, we regularly consult with our engineering and land-development staff of experts on development-related issues. By working with our planners, engineers, and building officials, we understand development-related agency service procedures and workflow functions, which often make the entire user fee study process smoother for your staff.

Comprehensive User Fee Study Methodology

To comprehensively update fees, the City should develop a comprehensive user fee schedule that accurately accounts for the true cost of providing services. Once the study is complete, the fee study model must be flexible so that the City can add, delete, and revise fees in the future. To meet this goal, we will bring our expertise and unique perspectives to your fee study by approaching the project with these three principles:

1) Defensibility

Our user fee projects have not been legally challenged since the inception of this practice area in our firm. We have accomplished this by closely working with legal counsel familiar with user fee studies, our engineering division and with agency staff. In this way, we can tailor the correct approach to ensure full cost recovery combined with a sound and reasonable basis for each user fee you implement.

While Proposition 218 does not directly apply to non-property-related fees, we employ principles from this important constitutional article to make certain that your user fee schedule is developed with fairness, equity, and proportionate cost recovery principles in mind. With the addition of Proposition 26, Willdan will review each analyzed user fee for compliance and appropriateness to ensure continued defensibility.

2) Project and Staff Time

The City must have a sound and technically defensible fee schedule to ensure costs are appropriately recovered, as applicants approach the City for its services. Our standards and approaches serve to get to the issues of your fee study quickly.

Starting with the project kick-off, we will make certain that your staff understands the purpose and scope of the study and its corresponding on-site departmental interview. As Willdan is able to communicate directly with the service providers, this face-to-face interaction provides valuable time estimates.

3) Responsiveness

We take great pride in providing responsive service to our client agencies. Frequent communication is critical to a successful user fee study experience. We will provide a list of data requirements in advance of the project kick-off. Due to this simple step, the introductory meeting can focus on the survey input process, answering questions, determining policy goals, and defining next steps in the project. We will follow up weekly with you at each step in the fee study process to make sure that staff "buys in" to the fee study approach and results.

Comprehensive User Fee Study Approach

Our approach to preparing the user fee study and documentation for Coachella includes:

 Close coordination with your staff to devise a consensus approach. Different programs and/or different service delivery methods will necessitate different approaches.

We will discuss specific pros and cons with City staff as we determine which methods work best for each fee category;

- Strict adherence to key legal and policy issues with regard to user fees, including the percent of cost recovery that the City seeks to achieve. A user fee shall not be set higher than the reasonable cost of providing a fee-generating service. Our approach provides you with a fee schedule that achieves maximum legal cost recovery while ensuring that each fee is supported by technically defensible documentation; and
- Technical analysis necessary to ensure State compliance, and to anticipate and resolve potential policy issues using a combination of industry standards as well as City specific methods.

As described below, there are two basic approaches to calculating user fees:

Approach 1: Case Study Method

This is also sometimes referred to as a cost build-up approach. Using a time and materials approach, the "Case Study Method" examines the tasks, steps and City staff involved in providing a particular 'unit' of service, such as a permit review, and then uses that information to develop estimates of the actual labor and material costs associated with providing a unit of service to a single user. It is often used when a service is provided on a regular basis, and staff and other costs associated with the service can be segregated from available budget data.

A typical case study fee model should comprise the following three general cost layers:

WILLDAN

1) Central Services Overhead: This category may involve such costs as labor, services, and supplies that benefit more than one department, division, or project. The exact benefits to specific areas are impossible to ascribe to a single activity. Examples are purchasing, human resources, and liability insurance. As part of the user fee study, these costs are calculated in the overhead cost review.

2) Department Overhead: This category may include expenses related to such items as office supplies, outside consultants, and membership dues. It may include management, supervision, and administrative support that are not provided to a direct fee-generating service. Typically, these items are charged, on an itemby-item basis, directly to the department, division, or project.

3) Personnel Costs: This category refers to direct salary and benefit costs of staff hours spent on providing a fee-generating service (e.g., on-site building inspector).

Approach 2: Average Cost Method

This is also sometimes referred to as a programmatic approach, because it looks at costs at a program level, and then allocates them to participants on an occurrence basis. By taking total service costs across a substantial sample period (a year) and dividing by the total number of service units delivered over that same period, costs per unit of service is estimated. This approach is useful when services or programs are provided in a more aggregate manner, where it might be difficult to identify a specific sequence of steps associated with one user or participant; or where it is not feasible to cost-effectively segregate costs associated with specific activities.

Scope of Work

Our proposed work plans, described in detail by task, are provided below. We will maximize efficiency and costeffectiveness by combining meetings and data gathering efforts between the user fee study and cost allocation plan wherever possible. We explain how each task will be accomplished and identify associated meetings and deliverables. We will work in concert with the City to adjust scopes as needed during the course of the studies.

Cost Allocation Plan

This proposed scope of services addresses the completion of both the full and OMB compliant versions of the Cost Allocation Plan (CAP). We have noted where activities specific to the OMB compliant plan occur.

Task 1:	Initial Document Request
Objective:	Initial due diligence.
Description:	Prior to the kick-off call, relevant documentation will be obtained and reviewed in order to enhance our understanding of the City's current cost allocation plan and internal structure of the agency. A written request for specific data will be sent to the City. The data provided in this task will provide the building blocks for later model development.
	Our request may include (but is not limited to):
	 Detailed budget and accounting data;
	 Prior year's financial data, salary, position, and staffing data;
	 Organizational structure;
	 Prior cost allocation plan and/or user fee documentation and models; and
	 Data related to various allocation bases that may be incorporated as part of the methodology, i.e., City Council agenda frequencies by department, AP/AR transactions by department, IT equipment distribution by department, etc.
Deliverables:	Willdan: Submit information request to City.
	City: Provide requested data to Willdan (prior to Task 2, Kick-off Call/Refine Scope). We will follow up with the City to confirm in writing the data that we have received, or which is still outstanding.
Task 2:	Kick-off / Confirm Project Strategy / Refine Scope
Objective:	Confirm project goals and objectives and develop overall project strategy. Identify and discuss policy considerations related to the study and determine appropriate fee categories.
Description:	Willdan will identify and discuss policy matters typically associated with these studies and address data gaps in order to gain a full understanding of the City's goals for the cost allocation plan.
Description:	Willdan will identify and discuss policy matters typically associated with these studies and address data
Description:	Willdan will identify and discuss policy matters typically associated with these studies and address data gaps in order to gain a full understanding of the City's goals for the cost allocation plan. We will establish effective lines of communication and processes for information gathering and review, and

The objective of this review is to determine specific areas of focus as they relate to the City's objectives, and to discuss
	 Willdan will identify and discuss policy matters typically associated with these studies and address data gaps in order to gain a full understanding of the City's goals for the cost allocation plan. We will establish effective lines of communication and processes for information gathering and review, and conduct discussions with City staff to verify the scope, purposes, and objectives for the CAP. We will also discuss costs that may not be allocable for OMB purposes, and the potential impact on the OMB version of the CAP. During this call, we will ask that the City assign a project manager to serve as its primary contact. The selected City project manager will ensure that available data is provided to Willdan in a timely manner, thereby maintaining adherence to the project's schedule. We will obtain and review the current cost allocation methodology and discuss with City staff. The objective of this review is to determine specific areas of focus as they relate to the City's objectives, and to discuss and evaluate current and potential allocation factors. One (1) project kick-off meeting or call to initiate the project, discuss data needs and methodologies, and to address policy issues. We would propose to conduct the user fee study kick-off during this same

Task 3:	Gather Staffing Information and Develop Cost Allocation Plan Model
Description:	This task involves the gathering of specific information, directly from City staff, through interviews and discussion, related to the functions served by indirect staff and the departments served by their activities.
	This task also focuses on the development of, and/or adjustment of existing, allocation bases, and the development and testing of a model that will ultimately be used to calculate the proper cost allocations derived from data gathered in prior tasks.
	The model will be developed to incorporate any recent changes in the provision of City services, identify the total cost of providing indirect overhead support services, fully allocate central service costs to operating groups such as Development Services, and will include provision for appropriate inflationary adjustments going forward. The model will also be developed to allocate only those costs eligible under 2 CFR Part 200. This is accomplished by loading relevant data into the model, identifying which costs are not allocable under the OMB guidelines. The OMB Super Circular compliant model is valuable as the City may receive Federal or State grant funding that mandates compliance with Federal OMB regulations.
	The model will include flexibility to add or delete support service and/or operating groups as changes occur and also the ability to adjust the model and the results annually for inflation, salary, and benefit increases, as well as contract rates.
	We will utilize budget and organizational information, and other required information gathered from City staff to complete the work in this task. Specific discussions will be held to discuss allocation bases, services provided by indirect groups, how central overhead services are provided to and utilized by other departments, cost categories and allocation criteria, and how these will factor into the overall cost allocation methodology.
	The model and methodology will produce indirect cost rates and overhead percentages which support the development of fully-burdened hourly City staff rates. These hourly rates can be used for a variety of purposes including incorporation into the User Fee Study's fully burdened personnel rates, billing to Capital Improvement projects work orders, recovery of costs for services provided to City customers working with various City departments, and in the OMB Super Circular compliant CAP, to Federal grants.
Meetings:	Online meetings with staff to understand structure and operations as model and allocation bases are developed. Key staff will be interviewed to best understand central overhead staffing and functions and the departments served.
Deliverables:	Willdan: One (1) user-friendly model in Microsoft Excel format that provides both a full cost allocation plan and an OMB Super Circular compliant cost allocation plan.
Task 4:	Test and Review Cost Allocation Methodology
Objective:	Test and review model and results with City.
Description:	The draft cost allocation plan model will be reviewed with City staff, and adjusted as necessary, to ensure that preliminary allocations provide an accurate depiction of how the central overhead costs should be borne by the operating programs and funds. Over the past several years, we have successfully integrated online meetings by using WebEx [™] as an element to our approach.
	This allows us to remotely guide staff through the model review and allows you the opportunity to interactively change inputs and test approaches.
Meetings:	One (1) online meeting and demonstration with City staff to review the model.
Deliverables:	Willdan and City: Draft cost allocation plan model review.
Task 5:	Prepare and Present Draft Report
Objective:	Prepare the draft cost allocation report.
Description:	This task involves the draft report preparation. The cost allocation plan's background, model methodologies, and results will be discussed; calculations and supporting data will be presented textually and in easily understood tables and provided to the City.
Meetings:	One (1) online meeting to present the draft report to City staff.
Deliverables:	Willdan: Draft report for City review and input.
	City: Review of draft report, with com
	Page 329

Task 6:	Discuss and Revise Report							
Objective:	Review of draft report, cost distribution methods, and model.							
Description:	An in-depth review of the draft report and model will be conducted to arrive at an optimum allocation method for each expenditure type.							
	Often, through the course of an engagement, comments usually revolve around issues of understandability; appropriate levels of enterprise funds' cost recovery, etc.; ease of calculation; and overhead costs' distribution methods.							
	Our reports are structured to include both the overhead and OMB compliant plan, but in the course of review if a separate report is desired for each or just one of the plans, they will be split.							
	Following a round of comments from City staff concerning the draft report, the final report will be prepared for presentation to the Council.							
Meetings:	One (1) conference call with City staff to review the report with changes and revisions.							
Deliverables:	les: Draft report, and revised draft/final report.							
Task 7:	Prepare and Present Final Report and Model							
Objective:	Prepare and present the final report to City Council. Educate City staff on the operation and use of the model for future modifications.							
Description:	This task is the culmination of the cost allocation plan project. Based on staff comments on the draft report, Willdan will prepare the final report for presentation to City Council.							
Meetings:	One (1) meeting with the City Council to present the final plan if necessary. This meeting would be held in conjunction with the presentation of the user fee study results.							
	We will also provide staff training on the operation and use of the model, and consult with the City as needed to respond to challenges or questions related to the CAP.							
Deliverables:	Willdan: Provide one (1) electronic PDF file copy of the final report and models (full and OMB Super Circular compliant); and five (5) bound copies, and one (1) unbound copy to the City, if requested. Using Microsoft Word and Excel, an updateable electronic copy of the study and models, as well as related schedules, will be provided on CD.							

Comprehensive User Fee Study

Task 1:	Initial Document Request							
Objective:	Initial due diligence; obtain study-related data.							
Description:	Prior to the kick-off meeting, we will obtain and review relevant documentation to further enhance ou understanding of the services, fees, and rates to be studied. A written request for data will be sent to the City. Please note that Time Survey data is not part of this request and will be gathered during the on-site interviews described in Task 5.							
	We will request information and documentation on current fees and fee programs, activity levels, and budget and staffing information (to the extent not already available) related specifically to programs and activities which have associated fees, and for which the City has this level of detail.							
Deliverables:	Villdan: Submit information request to City.							
	City: Provide requested data to Willdan (prior to Task 3, Kick-off Meeting/Refine Scope). As with the co allocation plan, we will follow up with the City to confirm receipt of requested data and information an highlight data elements that are outstanding.							
Task 2:	Compile Inventory of Current and Potential Fees							
Objective:	Willdan will identify a schedule of fees and methodology for calculating the fees.							
Description:	Based on the results of the initial document request and independent research, incorporate into our model the existing fees, provided by the City, to comprise the parameters of the fee study.							
Meetings:	It is possible that a conference call with the City may be necessary to discuss new fees to implement or existing fees that may no longer be required.							
Deliverables:	Willdan: One (1) draft list of current fees based on initial data provided (to be discussed and finalized during the kick-off call).							
	City: Review completed fee schedule nts/revisions to be discussed during the kick-off meeting.							

prehensive User Fee Study and Cost Allocation Plan 8

Task 3:	Kick-off Conference Call / Refine Scope
Objective:	Confirm goals and objectives for the Comprehensive User Fee Study. Identify and discuss policy considerations typically associated with a User Fee Study, for instance cost recovery/subsidy policies, address gaps in data, and refine appropriate existing or new fee categories (based on Task 2).
Description:	Verify our understanding of the City's goals, the City's cost-recovery policy for user fees, and to fill any gaps in data/information necessary for the project. It is important for the City and Willdan to identify and address any foreseeable problems and maintain open communication throughout the process.
	During this call, we will ask that the City identify a project manager who will serve as the primary contact for the project. The project manager shall have responsibility for ensuring that all available data is provided in a timely manner, thereby maintaining adherence to the project's schedule.
Meetings:	One (1) project kick-off call to initiate the entire project, discuss data needs, and address policy objectives. As mentioned in the cost allocation plan work plan, we suggest combining the kick-off calls to increase efficiency.
Deliverables:	Willdan: 1) Revised project scope and schedule (if needed); and 2) brief summary of policy decisions (if needed).
	City: 1) Provide further data needs; and 2) determine/introduce City's project manager.
Task 4:	Develop User Fee Model
Objective:	Develop and test model.
Description:	This task involves the development of the model ultimately used to calculate the departmental fees, based on data and information gathered in previous tasks and in the Time Survey Interviews.
	Key model inputs will include staff and allocated overhead costs per position, and relevant budget data on salaries and benefits.
	Most of this information will be developed during the cost allocation plan phase of this project and will be incorporated directly into the user fee model. We will request clarification and/or additional data if necessary.
	The model will build upon the cost allocation plan results, to provide an allocation of administrative and overhead costs to fee related activities and departments providing services to customers, so that fees and billable rate schedules incorporate applicable costs.
	Furthermore, the fees and rates charged to customers will also reflect the cost of the services being provided, to the extent possible given policy and/or political considerations.
Deliverables:	Willdan: One (1) user-friendly model in Microsoft Excel format, which, when finalized, City staff can use to calculate fee changes annually, or as often as deemed appropriate by the City Council.
Task 5:	Staff Interviews and On-site Information Gathering
Objective:	Meet with City staff to complete Time Surveys and understand service delivery processes.
Description:	In order to assist staff with the completion of the survey worksheets, we will schedule one (1) day of meetings with staff; however, the number of meetings needed may vary depending on the number of staff and departments involved.
	The Willdan Team will conduct interviews with supervisors/managers, as well as other staff, as deemed appropriate and/or necessary, from each department involved in the user fee study to determine the average time required by City staff to provide each of the services for which a fee is collected.
	The fee model is designed so that full cost recovery fees are calculated immediately upon input of staff time. These full costs are also compared to current cost recovery levels.
	This will allow Willdan and City staff to conclude with a final meeting to review the draft full cost recovery fees and adjust any times as necessary once all information has been compiled and input into the fee model. We will schedule the interviews with staff to minimize any disruption to their normal workflow.
Meetings:	One (1) business day of meetings/staff interviews. These may be either in person, or virtual using Zoom or WebEx, or a combination depending on City Staff availability. We have received feedback that many cities find virtual meetings to be more efficient as they allow for more flexible scheduling and more focused conversation. We will discuss options with City Staff and proceed accordingly.
	Over the past three years we have used these tools very successfully and found them to be highly effective and efficient, particularly for follow-up questions and/or discussions.
Deliverables:	Willdan and City: Time surveys and the first recovery fees.

Task 6:	Data Analysis and Final User Fee Schedule
Objective:	Incorporate information obtained from interviews and surveys to fully develop model.
Description:	We will update the model, based on information received during the surveys and interviews with City Staff, to generate a comprehensive user fee schedule. In addition, it is very common that a supplemental data request may be necessary, based on new fees identified that the City is not currently collecting.
	Where appropriate, we will suggest and discuss with staff alternate approaches to existing fee programs (i.e., building fees) and suggest potential areas where fees could be collected where they are not currently.
	We will calculate and present the full cost recovery level for fees, both current and projected under the new fees, and revenue projections, given certain assumptions about the levels of subsidy for different fees.
	Current levels of cost recovery will be compared to actual full costs calculated during the course of this study. Cost will be calculated at reasonable activity levels and include all appropriate direct and indirect costs and overhead. We will review fee programs for compliance with Propositions 218 and 26.
	In developing the fee schedules for each division, we will make recommendations for new fees where appropriate, based on our experience with other cities. Some areas for new fees may be due to changes in law (legalized cannabis), or for activities that the City finds itself performing regularly, but for which no fee is collected.
	Where possible, we will incorporate discussion of the City's economic development policies, and where these may intersect with fee programs, for instance setting fees in a manner that encourages certain activities.
	The user fee data analysis and model development may take three (3) to four (4) weeks with frequent correspondence with City staff to discuss current cost recovery amounts, necessary to recover full cost and frequency activity.
Meetings:	Virtual meetings, as necessary, to gather additional input, complete analysis and finalize fee schedule.
Deliverables:	Final user fee model for City Council presentation and discussion.
Tack 7	
Task 7:	Common Fees Comparison
Dbjective:	Common Fees Comparison Examine selected user fees charged by up to five (5) comparable cities in Riverside County or other jurisdictions that are close in proximity or similar to the City of Coachella.
	Examine selected user fees charged by up to five (5) comparable cities in Riverside County or other
Objective:	Examine selected user fees charged by up to five (5) comparable cities in Riverside County or other jurisdictions that are close in proximity or similar to the City of Coachella. We will access and use our knowledge of other jurisdictions to benchmark the City's five (5) most common
Objective:	 Examine selected user fees charged by up to five (5) comparable cities in Riverside County or other jurisdictions that are close in proximity or similar to the City of Coachella. We will access and use our knowledge of other jurisdictions to benchmark the City's five (5) most common visible fees or highest yielding fees with comparable jurisdictions. Fee schedules are rarely readily or directly comparable from agency to agency due to definitional and operational differences. For example, a grading permit in one jurisdiction may include the plan check service, while the same permit in another jurisdiction may not, resulting in similar sounding services with widely varying costs. For this reason, Willdan takes a selection of the City's most commonly used and/or

Willdan: Recommendations provided in Task 8 will incorporate the data gathered during our examination.

- I ne draft report will include the following:
- Key results and findings;
- Basic descriptions of each service;
- The full cost of each service at low

able activity level and current cost recovery levels;

	 Costs broken down graphically into indirect and direct components, with a graphic display of the level of cost recovery; Fee recommendations with associate levels of cost recovery; Projections of potential fee revenue; Assessment of reasonableness of each City's costs; Review of reasonableness of current consultant cost structure (for Building Division services); As appropriate, recommend alternative methodologies for building permit fee calculation; and Summary and recommendations. The objective of the report is to communicate the recommendation of appropriate fees, which include the appropriate subsidy percentage for those fees where full cost recovery may be unrealistic.
Meetings:	One (1) conference call with City staff, to present draft results address questions and receive feedback.
Deliverables:	Willdan: Draft report for City review and comment.
	City: Review of draft report, with comments and edits.
Task 9:	Revise Draft Report/Determine Cost Recovery Levels for Recommended Adoption
Objective:	Review of draft report and fee model.
Description:	The goal of this task is to conduct an in-depth review of the draft report and model, incorporate feedback and changes as a result of previous discussions, and arrive at an optimum fee structure.
	Often through the course of an engagement, City staff will volunteer insightful likes and dislikes regarding the existing fee structure. We listen to this feedback carefully because your staff members know the community best. Comments usually revolve around issues of:
	 Understandability; Fairness to applicants; Ease of calculation; Appropriate levels of cost recovery; and Full cost recovery hourly rates.
	When adjusting fee recovery levels, we believe it is important to address these concerns.
	Following one (1) round of comments from City staff on the draft report and feedback from City staff, we will prepare the final report for presentation to the City Council.
Meetings:	One (1) online demonstration (WebEx) to review the report and model, with any revisions.
Deliverables:	Draft report, revised draft /final report.
Task 10:	Prepare and Present Final Report/Instruct Staff on Model
Objective:	Prepare and present final report to City Council. Instruct staff on the operation and use of the model for future modifications.
Description:	This task is the culmination of the entire project. Based on staff comments received regarding the draft report, we will prepare the final report for presentation.
Meetings:	One (1) meeting with City Council to present the results and adopt the updated fee schedule. We will also provide staff training on the operation and use of the model on the same day, during regular business hours.
Deliverables:	Provide one (1) electronic PDF file copy of the final report and models; and, if requested, provide five (5) bound copies, and one (1) unbound copy to the City. Using Microsoft Word and Excel, an updateable electronic copy of the study and models, as well as related schedules, will also be provided on CD.

City Staff Support

To complete our tasks, we will need the cooperation of City Staff. We suggest that the City of Coachella assign a key individual to represent the City as the project manager who can function as our primary contact. We anticipate that the City's project manager will: 1) Coordinate responses to requests for information; 2) Coordinate review of work products; and 3) Help resolve policy issues. Willdan will endeavor to minimize the impact on City Staff in the completion of this project.

We will ask for responses to initial information requests in a timely manner. If there are delays on the part of the City, we will contact the City's project manager to steer the project back on track. We will keep the City's project manager informed of data or feedback we need to keep the project on schedule.

Project Schedules

Willdan understands time is of the essence for the City of Coachella to begin this engagement. The schedules can only be met with the cooperation of City staff. Delays in responding to our requests for data and review will result in corresponding delays to the project schedule. If that is the case, we will notify the City immediately of the possible impact on the schedule.

Quality Control Procedures

Project Management Approach

At Willdan, we utilize a Project Management Process/Approach that ensures projects are completed on time, within budget and most importantly yield results that match our clients' expectations. We will document discussions leading to important policy decisions and/or the choice of critical assumptions used in constructing the analysis and model.

Following key stakeholder discussions, we will schedule a call to summarize findings and direction with City staff, to make certain that we are in agreement with stated objectives, and that feedback is incorporated as appropriate.

Through the process of providing regular updates and conducting status conference calls, potential issues will be highlighted, discussed, and resolved. Any deviances from the project timeline will be identified and plans will be developed for course corrections.

Project Management											
S	X S S	***		<u></u> Ŀ							
Define the Project	Plan the Project	Manage the Project	Review the Project	Communicate the Project							
 Identify the project scope, set objectives, list potential constraints, document assumptions. Define a course of action and develop an effective communication plan. Provide a forum for applying the team's collective expertise to solving difficult analytical issues that arise in complex projects. 	 Collaborate with the project team and client staff and agree upon timeline to meet the estimated project timeline. Assign workload functions to appropriately qualified staff to ensure milestones are met, on time. Pre-schedule quality control meetings with the project team to maintain the progressive motion of the project. 	 Manage the execution of the project. Direct existing and upcoming project tasks. Control and monitor work in progress. Provide feedback to client and project team. Identify and resolve deviances from project timeline. 	 Review all work products and deliverables. Utilize structured quality assurance process involving up to three levels of review at the peer level, project manager level. Procure executive officer level review. 	 Communicate with the client regarding work status and progress. Ensure client is in receipt of regular status updates. Schedule regular conference calls to touch base. Inform client of roadblocks, work outside of projected scope. 							

Quality Assurance / Quality Control Process

Our quality control program is incorporated as a required element of Willdan's day-to-day activities. There are three levels of reviews incorporated for our deliverables:

- 1) Peer review;
- 2) Project Manager review; and
- 3) Final quality assurance manager review.

Peer reviews involve one analyst reviewing the work of another, while project manager reviews are conducted prior to delivery to the quality assurance manager. The quality assurance manager then performs a final review. This assures that our final product has been thoroughly evaluated for potential

errors; thus, providing quality client deliverables, and high levels of integrity and outcomes.

The primary mission of our quality control plan is to provide staff with the technical and managerial expertise to plan, organize, implement, and control the overall quality effort, thereby ensuring the completion of a quality project within the time and budget established.

Quality Assurance Goals										
Goal	Lead	Task								
Quality Assurance / Control Process	Chris Fisher	 Establish a set of planned and systematic actions for maintaining a high level of quality in the professional services performed; Emphasize quality in every phase of work; Ensure efficient use of resources; Establish a consistent and uniform approach to the services performed; and Implement appropriate quality control measures for each work task of the project. 								
Quality Control Plan	Chris Fisher, Tony Thrasher, & Robert Quaid	 Contract deliverables; Specific quality control procedures; Special quality control emphasis; Budget and manpower requirements; Overall project schedule and budget; and Project documentation requirements; 								

Key Personnel

Our management and supervision of the project team is very simple: staff every position with experienced, capable personnel in sufficient numbers to deliver a superior product to the City, on time and on budget. With that philosophy in mind, we have selected experienced professionals for this engagement. We are confident that our team possesses the depth of experience that will successfully fulfill your desired work performance.

Project Team

City of Coachella Project Team											
Key Team Member	Project Role	Responsibility to the Engagement									
Chris Fisher Vice President/Director	Principal-in-Charge	 Ensure client satisfaction, flow of communication, and oversight of the project Technical guidance; Project oversight; Quality assurance & control; and Meeting and presentation attendance.

Project Team Stability

Mr. Fisher has been assigned to serve as the City's representative; he has been selected for this role due to his vast experience, which includes the preparation and supervision of numerous fee studies, as well as his experience presenting to governing bodies, stakeholders, and industry groups.

It is important to note that Mr. Fisher has been with Willdan for 24 years, ensuring the City of Coachella of continuity and dedication in staffing during the completion of the project.

Resumes

Resumes for Willdan's project team are presented on the following pages.

ltem 24.

Chris Fisher

Principal-in-Charge

Education Mr. Chris Fisher, Vice President / Director of Willdan's Financial Consulting Services group, will serve San Francisco State as Principal-in-Charge for the City of Coachella project. He will also share his extensive knowledge University, Bachelor of related to cost-of-service principles with members of the project team. Science, Finance Mr. Fisher joined Willdan in April of 1999, and during that time has managed an array of financial consulting projects for public agencies in California, Colorado, Texas, Arizona, and Florida, Areas of Expertise coordinating the activities of resources within Willdan, as well as those from other firms working on Cost of Service these projects. He is one of the firm's leading experts for special district financing related to public Analyses infrastructure, maintenance, and services, including public safety. Multi-disciplinary Team **Related Experience** Management City of Palm Desert, CA — Cost Allocation Plan and Comprehensive User Fee Study: Special District Mr. Fisher is the principal-in-charge for the ongoing full cost allocation plan and user fee study. Formations Willdan's work includes the gathering of necessary data and information, interviews with City Staff to identify overhead support services and how they are used and interviews to gather information related Client Presentations to fee-based services. We are also developing financial models to calculate overhead allocations and personnel rates and the full cost of services for which fees are charged. We are working with Staff to Proposition 218 finalize cost recovery targets, prepare reports and present the results. City of Murrieta, CA — Cost Allocation & OMB Compliant Plan and Comprehensive User Fee Affiliations Study: Mr. Fisher served as the project manager on the City's fee study. The primary objective for the California Society of cost allocation study was to ensure that general government costs were fairly and equitably allocated Municipal Finance to appropriate programs and funds. The City recently re-engaged Willdan to conduct an update to Officers both studies. Municipal Management City of West Hollywood, CA — Comprehensive User Fee Study and Cost Allocation Plan: Association of Mr. Fisher is the principal-in-charge for the City's Comprehensive User Fee Study and Cost Allocation Northern California Plan engagement, managing the overall execution of the project, providing technical guidance and quality control. California Municipal Treasurers Association City of Burbank, CA — Comprehensive Citywide User Fees and Charges Study: Mr. Fisher oversaw the City's recently completed Citywide User Fees and Charges Study. 24 Years' Experience City of Pomona, CA - Master Fee Schedule Update: Mr. Fisher was the principal-in-charge for the City's master fee schedule update and update of the development impact fees. Mr. Fisher provided quality control and served as the primary contact with the City. City of Laguna Hills, CA — Comprehensive Cost Allocation Plan and Comprehensive User Fee Study: Mr. Fisher oversaw the update of the City's general overhead allocation plan and cost-ofservice user fees. City of Irvine, CA — OMB Cost Allocation Plan and Comprehensive User Fee Study: Willdan completed a cost allocation plan and user fee study for the City of Irvine. Mr. Fisher managed and provided quality assurance to this project, ensuring the accuracy of the models, as well as the final reports. He also presented the results to the City's Finance Commission and to the City Council. City of Signal Hill, CA — Cost Allocation Plan and User Fee Study: As principal-in-charge, Mr. Fisher oversaw the development and review of a Full and OMB compliant cost allocation study and a comprehensive user fee and rate study for the City's master list of fees. City of West Covina, CA — Comprehensive Cost Allocation Plan and User Fee Study: Mr. Fisher served in the role of project manager for the City's engagement. The cost allocation plan developed will aid the City in the recovery of overhead costs related to central service activities. Housing Authority of the County of San Bernardino - Cost Allocation Plan: Mr. Fisher is the principal-in-charge for the Authority's full and OMB cost allocation plan engagement, and the ongoing update. Willdan was brought in and worked with the Housing Authority and HUD to respond to

unfavorable OIG audit findings related to the Authority's' approach to the allocation of overhead costs. We developed a new Cost Allocation Plan and are currently working on an update to that plan. The initial work resulted in the clearance of the HUD findings with no penalty to the Housing Authority.

Tony Thrasher

Project Manager

Education

Bachelor of Science in Economics; California State Polytechnic University, Pomona

Areas of Expertise Cost Allocation Plans

Fiscal Analysis for User Fees and Rates

District Administration Services

Utility Rate Studies

14 Years' Experience

Due to his cost allocation and user fee analyses experience, Mr. Tony Thrasher has been selected to serve as Project Manager for the City's engagement. Mr. Thrasher is a Principal Consultant within the Financial Consulting Services group, whereby his responsibilities include managing projects and conducting fiscal analyses for cost allocation plans, user fees, and utility rate studies.

Mr. Thrasher's prior employment was as a financial analyst working in bond, equity, and mortgagebacked security markets for Wells Fargo Bank, Bank of New York Mellon, and Deutsche Bank. His experience includes portfolio accounting, differential analysis, and forecasting.

Related Experience

City of Indian Wells, CA — User Fee Study: Mr. Thrasher served as the technical project manager for the City's Administrative, Building, Planning and Public Works Departments. The study involved the identification of existing and potential new fees, fee schedule restructuring, data collection and analysis, orientation and consultation, quality control, communication and presentations, and calculation of individual service costs cost recovery levels.

City of Palm Desert, CA — **Cost Allocation Plan and Comprehensive User Fee Study:** Mr. Thrasher is currently serving as the technical project manager for the City's full cost allocation plan and user fee study. He is directly responsible for the creation of both models for the study, gathering and verification of the data, managing the analysts working to support him and presenting results to the City.

City of Chino Hills, CA — Cost Allocation Plan and Comprehensive User Fee Study: Mr. Thrasher is the project manager for the City's Cost Allocation Plan and Comprehensive User Fee Study. He is working directly with the City contact throughout the engagement.

City of West Hollywood, CA — **Comprehensive User Fee Study and Cost Allocation Plan**: As the project manager for City's Comprehensive User Fee Study and Cost Allocation Plan engagement, Mr. Thrasher is overseeing the project analysts and is heavily involved in the analysis, development of models, preparation of reports and delivery of results.

City of Burbank, CA — Comprehensive Citywide User Fees and Charges Study: Mr. Thrasher was the project manager for the City's recently completed study, He directed the preparation of the model and reports and was responsible for the delivery of results to the City.

City of Pomona, CA – Master Fee Schedule Update: Mr. Thrasher served as the project manager for the master fee schedule update portion of the City of Pomona's engagement, which also included an update of the development impact fees. Mr. Thrasher was responsible for the development of models and reports and coordinating analytical support.

City of Irvine, CA — OMB Cost Allocation Plan and Comprehensive User Fee Study: Serving as the project's analyst, Mr. Thrasher provided analytical support; and designed micro-level allocation models to ensure full-cost recovery for public safety, public works, community development, community services, and administrative departments.

City of San Marcos, CA — **Cost Allocation Plan, Indirect Cost Rate Proposals and Comprehensive User Fee Study:** Mr. Thrasher is the project manager for the City of San Marcos' full and OMB compliant cost allocation plan, preparation of Indirect Cost Rate proposals, and Comprehensive User Fee Study engagement. He is the primary in developing the model, which contains all City personnel and expenditures broken down into the ICRP tables. The project is ongoing, and the User Fee Study is now underway.

City of San Fernando, CA — **Cost Allocation Plan and Comprehensive User Fee Study:** Mr. Thrasher was the project manager for the City's cost allocation plan, OMB compliant plan and comprehensive user fee study engagement. *Willdan has recently, through a competitive bid, been re-selected to update the cost allocation plan.*

City of Mission Viejo, CA — Cost Allocation Plan and User Fee Study: Mr. Thrasher was assigned to work with the City on this project, providing analytical support, gathering data, working with staff to make refinements, and developing cost allocation and fee models to ensure full-cost recovery for building and safety, planning, community development, and public works departments.

Priti Patel

Senior Analyst

Education Bachelor of Arts; Business Management, Information Systems and International Business, University of Cincinnati

Areas of Expertise

Cost Allocation Plans

User Fee Studies

Proposition 218

9 Years' Experience

Ms. Priti Patel is a Senior Analyst within the Financial Consulting Services group, whereby she supports project managers in conducting utility rate analyses, fee studies, cost allocation plans, monitoring Proposition 218 compliance, and forming special districts. Coordinating and conducting activities associated with Cost Allocation Plans and User Fee Studies, including database integration and manipulation, revenue and expenditure analyses, and documentation preparation are just some of Ms. Patel's duties. With these duties, she interacts with clients on a regular basis.

Ms. Patel joined Willdan as an analyst with the District Administration Group, while with DAS she performed research and analysis needed for local government financial issues related to district administration, including document data entry and updating, database management, research and report preparation. She also provided general information on questions pertaining to Assessment Districts and special taxes (such as Mello-Roo's Pools), as well as the status of property delinguencies.

Related Experience

City of Chino Hills, CA — **Cost Allocation Plan and Comprehensive User Fee Study:** Providing analytical support in the preparation of a cost allocation plan and comprehensive fee study, Ms. Patel worked to identify and take into account direct and indirect costs, along with changes in staffing, structure, and service delivery methods. She is also assisting in the preparation of user-friendly Excelbased models that City staff can easily update in the future to determine the proper allocation of expenditures and ongoing full cost of City-provided services.

City of West Hollywood, CA — **Comprehensive User Fee Study and Cost Allocation Plan**: Ms. Patel is serving as the primary financial analyst for City of West Hollywood's Fee Study engagement. Ms. Patel has been instrumental in collecting the necessary data and collaborating with the City and Willdan senior project team members in conducting the study, including development of the model, researching similar fees in comparable cities and preparation of reports.

City of Burbank, CA — **Comprehensive Citywide User Fees and Charges Study:** Ms. Patel provided analytical support and gathered budget and allocation basis data for this engagement. She also assisted in the development of the financial model.

City of Laguna Hills, CA — Cost Allocation Plan and Comprehensive User Fee Study: Ms. Patel provided analytical support in the preparation of a full cost allocation plan and fee study for the development of a master list of fees.

City of Fillmore, CA — Full Cost Allocation Plan and User Fee Study: Ms. Patel helped develop a cost allocation plan and model that fully allocated central overhead costs to appropriate operating departments, funds, and/or programs. She assisted in the completion of the model and report and worked directly with senior staff on their feedback and revisions.

City of San Fernando, CA — Cost Allocation Plan and Comprehensive User Fee Study: Ms. Patel provided support to senior team members in the preparation of the cost allocation plan, OMB compliant plan and comprehensive user fee study engagement.

City of National City, CA — **Cost Allocation Plan, OMB Compliant Cost Allocation Plan, User Fee Study, and ISF Allocation Study:** Ms. Patel provided analytical support in the preparation of this study, her primary duties included development of the models, finalizing model figures and results, and generating reports.

City of Yucaipa, CA — **Cost Allocation Plan and Comprehensive User Fee Study:** Provided analytical support in the preparation of a Cost Allocation Plan and OMB compliant cost allocation plan and comprehensive fee study for the development of a master list of fees. Ms. Patel worked to identify and take into account direct and indirect costs, along with changes in staffing, structure, and service delivery methods.

City of Pittsburg, CA — **Cost Allocation Plan and User Fee Study:** Ms. Patel was assigned to provide assistance to senior project team members on the City of Pittsburg Cost Allocation Plan and User Fee Study engagement. She will be a technical lead for the gathering of data, creation of the models and preparation of study reports and presentations. *The City hired Willdan for the original study, and for two subsequent updates.*

Education University of California, Santa Barbara

> Bachelor of Arts, Mathematics

Areas of Expertise Cost Allocation Plans

User Fee Studies

Benefit/Maintenance Assessment Districts

Community Facilities Districts

Local Improvement Districts

7 Years' Experience

Ms. Samantha Labitan is Senior Analyst within Willdan's Financial Consulting and District Administration Services groups. Ms. Labitan provides analytical support under the guidance of the project team. Her primary function is to support project managers and senior analysts with cost allocation plans and user fee studies. She specializes in analysis for a variety of clients, including cities, water districts, public utilities, and school districts.

She regularly speaks with individuals representing title companies, real estate agencies, and appraisal firms, together with staff from cities and counties. Willdan's proprietary computer system allows him to readily access the owner's name, the Assessor's Parcel Number, existing and future taxes or assessments, and more; thus, enabling expedient service. Community Facilities Districts, Local Improvement Districts, Landscape and Lighting Districts, and County Service Areas are some of the special districts she administers.

Select Relevant Experience

City of West Hollywood, CA — Cost Allocation Plan and Comprehensive User Fee Study: For this project, Ms. Labitan provides analytical support. Primary duties include gathering and verifying necessary data, finalizing model figures and generating reports.

City of Lynwood, CA — Cost Allocation Plan & OMB Compliant Cost Allocation Plan and User Fee Study: Ms. Labitan provided support to the project team specific to the preparation of a comprehensive fee study, full and OMB compliant cost allocation plan. Ms. Labitan worked in tandem with the project managers to identify and account for direct and indirect costs, along with changes in staffing, structure, and service delivery methods.

City of San Fernando, CA — Cost Allocation Plan and Comprehensive User Fee Study: Ms. Labitan is currently providing support to senior team members in the preparation of a cost allocation plan, OMB compliant plan and comprehensive user fee study.

City of Richmond, CA — Cost Allocation Plan & User Fee Study: As analytical support, Ms. Labitan provided assistance to the project team. Primary duties included gathering and verifying necessary data, finalizing model figures and generating reports.

City of Gilroy, CA — **Cost Allocation Plan and Comprehensive User Fee Study:** Ms. Labitan worked on the team for the City's fee study project, providing analytical support, gathering data, working with staff to make refinements, and developing cost allocation and fee models to ensure full-cost recovery for building and safety, planning, community development, and public works departments.

City of El Centro, CA — Full & OMB Compliant Cost Allocation Plan and User Fee Study: Ms. Labitan served as the analyst in the preparation of a full & OMB compliant Cost Allocation Plan and Comprehensive User Fee Study, for the City of El Centro engagement.

City of Goleta, CA — **Cost Allocation Plan, OMB Compliant Plan, and Comprehensive User Fee Study:** Ms. Labitan provided analytical support to the project team for the City's comprehensive fee study, full and OMB compliant cost allocation plan.

City of Los Banos, CA — Full & OMB Compliant Cost Allocation Plan and Comprehensive User Fee Study: Ms. Labitan provided analytical support to the project team for the City's comprehensive fee study, full and OMB compliant cost allocation plan.

City of Blythe, CA — Full and OMB Compliant Cost Allocation Plan: Ms. Labitan served as the analyst in the preparation of a full and OMB compliant cost allocation plan, for the City of Blythe engagement.

City of Pismo Beach, CA — Comprehensive User Fee Study: Ms. Labitan served in the capacity of assistant analyst for the City's comprehensive fee study.

City of Brighton, CO — Cost Allocation & OMB Compliant Plan: Ms. Labitan is providing analytical support for the City's cost allocation plan.

35 Years' Experience

With his 35 years of extensive experience in public financing, Mr. Robert Quaid has been selected to provide quality assurance/quality control in the role of technical advisor. In his position as a Principal Consultant at Willdan, Mr. Quaid provides project management, procedural support, technical support, and quality review for Willdan's District Administration group, as well as the Financial Services Consulting group specific to cost allocation plans, user fee studies, and special financial analysis.

Prior to joining Willdan, Mr. Quaid worked in the private industry of real estate accounting and finance. He began his career with the public accounting firm formerly known as Haskins & Sells (currently known as "Deloitte & Touche"). His experience includes financial statement analyses, asset administration, computer conversion, and reporting to the Securities and Exchange Commission for several public real estate partnerships. In 1979, Mr. Quaid became a licensed California CPA.

Related Experience

City of Thousand Oaks, CA — Cost Allocation Plan: Mr. Quaid served as project manager for the development of an OMB A-87 compliant cost allocation plan model using fiscal year actual costs as the basis for the allocations. He was responsible for the preparation of the Cost Allocation Plan report and provided cost allocation model training to City staff.

The objective of this project was to determine the appropriate allocation of indirect costs from City General Fund central service departments to the General Fund operating departments/programs and the non-General Fund departments/programs. The plan model included 16 allocation bases allocating costs to over 100 departments and divisions. Both full and OMB A-87 cost allocation models were delivered to the City. Willdan was awarded a four-year contract.

Cities of Fontana, Gardena and Hawthorne, CA — **Cost Allocation Plan Projects:** For each of these cities, Mr. Quaid served in the role of task manager for the development of an OMB A-87 compliant cost allocation plan model using Microsoft Excel. He was responsible for the preparation of the cost allocation plan report and trained City staff on how to use the cost allocation model.

City of Cathedral City, CA — Comprehensive User Fee Study: Mr. Quaid served as project manager for a user fee study that required updating fees for Planning, Engineering, Building, Police, Fire, City Clerk, and Finance.

nce Mr. Quaid has provided Quality Assurance and Quality Control to multiple clients throughout California. Provided below are a few examples of clients for which services have been provided in the previous five years.

Firm Qualifications

Firm Profile

Willdan Financial Services is an operating division within Willdan Group, Inc. (WGI), which was founded in 1964 as an engineering firm working with local governments. Today, WGI is a publicly traded company (WLDN). WGI, through its divisions, provides professional technical and consulting services that ensure the quality, value and security of our nation's infrastructure, systems, facilities, and environment. The firm has pursued two primary service objectives since its inception-ensuring the success of its clients and enhancing its surrounding communities.

A financially stable company, Willdan has approximately 1,500 employees working in more than a dozen states across the U.S. Our employees include a number of nationally recognized Subject Matter Experts for all areas related to the broadest definition of connected communities-five of whom are committed to contributing their expertise throughout the duration of the City of Coachella's Comprehensive User Fee Study and Cost Allocation Plan engagement.

Willdan has solved economic, engineering and energy

challenges for local communities and delivered industry-leading solutions that have transformed government and commerce. Today, we are leading our clients into a future accelerated by changes in resources, infrastructure, technology, regulations, and industry trends.

Willdan Financial Services

Established on June 24, 1988, Willdan Financial Services, is a national firm and is one of the largest public sector economic and financial analysis consulting firms in the United States. Since that time, we have helped over 800 public agencies successfully address a broad range of infrastructure challenges.

Our staff of over 80 professionals support our clients by conducting year-round workshops and on-site training to assist them in keeping current with the latest developments in our areas of expertise.

Willdan assists local public agencies by providing the following services:

Willdan Financial Services					
Services					
 User fee studies; 	 Development impact fee establishment and analysis; 				
 Cost allocation studies; 	 District administration services; 				
 Utility rate and cost of service studies; 	 Property tax audits; 				
 Real estate economic analysis; 	 Tax increment finance district formation and 				
 Feasibility studies; 	amendment;				
 Municipal Advisory; 	 Housing development and implementation strategies; 				
 Arbitrage and continuing disclosure services; 	 Debt issuance support; and 				
 Economic development strategic plans; 	 Long-term financial plans and cash flow modeling. 				

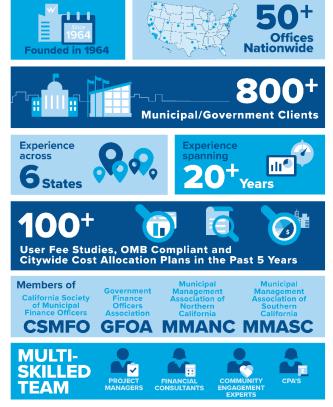

- Economic development strategic plans;

Willdan Financial Services has provided User Fee Study and Cost Allocation Plan services to municipal clients for 26 years; and has prepared comprehensive user fee studies as well as cost allocation plans, and OMB compliant cost allocation plans for clients throughout California, and the United States. Since 1998, we have developed the expertise to successfully integrate this service into the Financial Consulting Services group's primary functions.

Willdan's Financial Consulting Services staff has assisted well over 100 California government agencies with the development and/or update of all fee types. Each project has required defensible documentation and thorough coordination of fee program changes for different agency departments and stakeholders within the business community. In some cases, Willdan has been required to negotiate fees with stakeholders and, on occasion, defend them in meetings and public forums.

We are particularly strong in advising our clients on the advantages and disadvantages of different fee schedule structures (Citywide versus multiple-fee districts/zones; more versus fewer land-use categories; etc.) and methods of fee calculation that are based on the City's and stakeholder priorities and applicable regulations that comply with Proposition 26 and Proposition 218. Our record of success within the industry provides assurance of the professionalism and capability we will bring to this engagement. A team composed of project managers and analysts develop and/or update user fee studies and cost allocation plans. Willdan has extensive experience with the range of fees charged

in the region and the state, and the typical pros, cons, and challenges of each, both in implementation and management. Willdan will bring its expertise to the City's process of considering financial, practical and policy issues in deciding on its future fee program.

Extensive Public Sector Experience

Willdan has delivered industry-leading financial, energy and engineering solutions that have transformed government and commerce for 60 years. Willdan Financial Services advises governments throughout the United States and abroad about financial and economic consulting. We serve all levels of government and collaborate with government staff, constituents, developers, officials, and other professional services firms.

Project Dedication

Willdan has assembled a project team of five subject matter experts within the Financial Consulting Services group, to conduct the City of Coachella Fee Study engagement. This team has coordinated or participated in numerous public stakeholder and staff workshops regarding fees and cost of service-based charges.

Experienced Team

Our employees know and understand the problems facing local government under the current economic climate, and we have oriented our practice to support an agency's modified budget policies and public service priorities.

Page 344

Financial Stability

Willdan Group, Inc. (WGI) has sustained a healthy financial performance record due to the outstanding performance of our operating divisions and a strong, dependable reputation in municipal consulting. Detailed financial statements and annual reports are included on our webpage (<u>http://ir.willdangroup.com/</u>). As a publicly traded company (WLDN), Willdan must provide public financial information as required by the SEC. Furthermore, Willdan Financial Services is not currently involved in any condition (e.g., bankruptcy, pending litigation, planned office closures, impending merger) that may impede our ability to complete this engagement.

Financial Stability

- In business for 60 years
- Over 1,500 employees
- Fiscal Year 2023 Consolidated Contract Revenue of \$354M
- Market capitalization of \$231M (January 2023)
- \$50 million Line of Credit with the ability to increase up to \$60 million

References

Below are recent project descriptions, including client contact information, which are similar in nature to those requested by the City of Coachella engagement. We are proud of our reputation for customer service and encourage you to contact these clients regarding our commitment to completing the projects within budget and agreed upon timelines.

City of Indian Wells, CA

User Fee Study and Cost Allocation Plan

The City of Indian Wells sought an outside consultant to prepare a comprehensive study of the City's user fees for the Administrative, Building, Planning and Public Works Departments. Willdan completed this study in a manner that would fully identify and consider all direct/indirect costs.

Willdan reviewed and analyzed existing user fee programs, and based upon conversations and meetings with staff, made suggestions, as necessary, for fees that may need to be added to the City's fee schedule for which fees were not currently being charged. We developed a comprehensive cost of service analysis and model that included allocation of indirect overhead costs, updated existing fees, and incorporated new fees, and used it to create an updated comprehensive fee schedule. We also assisted the City by attending a meeting with local building industry officials to describe the approach to the analysis, and address questions and concerns.

We recently conducted a Cost Allocation Plan for the City, which was completed in December 2023.

Client Contact:	Kevin McCarthy, Finance Director
	44-950 Eldorado Drive, Indian Wells, CA 92210-7497
	Tel. #: (760) 346-2489 Email: kmccarthy@indianwells.com

City of Eastvale, CA

Comprehensive User Fee Study and Full & OMB Cost Allocation Plan

Through a competitive bid, the City of Eastvale engaged Willdan Financial Services to conduct a comprehensive study of the City's user fees, as well as the preparation of a Full and OMB compliant Cost Allocation Plan.

Our primary objective for the cost allocation study was to ensure that general government costs are fairly and equitably allocated to appropriate programs and funds, based on tailored and well thought out allocation factors. The Cost Allocation Plan was also created to develop OMB compliant overhead allocations and indirect rates.

Willdan developed the Cost Allocation Plan and model, reviewed and analyzed existing user fee programs, and working collaboratively with staff, made suggestions as necessary for additions to the City's fee schedule for activities for which fees were not currently being charged. The Cost Allocation Plan and Comprehensive User Fee Study were completed and the Willdan team worked with the City to incorporate some minor adjustments and conduct meetings with local stakeholder groups.

Client Contact: Amanda Wells, Finance Director / City Treasurer 12363 Limonite Ave. Suite 910, Eastvale, CA 91752 Tel #: (951) 703-4430 | Email: <u>finance@eastvaleca.gov</u>

City of Claremont, CA

Comprehensive User Fee Study and Full Cost Allocation Plan

Willdan was engaged to prepare for the City of Claremont a Cost Allocation Plan and Comprehensive User Fee Study. Willdan developed a cost allocation plan and model that fully allocated central overhead costs to appropriate operating departments, funds, and/or programs. Our primary objective for the cost allocation study was to ensure that general government costs are fairly and equitably allocated to appropriate programs and funds, based on tailored and well thought out allocation factors.

Willdan reviewed and analyzed existing user fee programs, and based upon conversations with staff, made suggestions, as necessary, for fees that may need to be added to the City's fee schedule for which fees were not currently being charged. Utilizing the full CAP, the comprehensive user fee study phase was completed with full interviews and being conducted on site, and a comprehensive fee model developed.

Willdan has recently been re-selected to provide an update to the User Fee Study and Cost Allocation Plan.

Client Contact: Adam Pirrie, City Manager 207 Harvard Avenue, Claremont CA 91711 Tel #: (909) 399-5328 | Email: <u>APirrie@ci.Claremont.ca.us</u>

WILLDAN

City of Murrieta, CA

Cost Allocation and OMB Compliant Plan and Comprehensive User Fee Study

Willdan was engaged by the City of Murrieta to complete a full and OMB compliant cost allocation plan and the preparation of a comprehensive user fee study. Our primary objective for the cost allocation study was to ensure that general government costs were fairly and equitably allocated to appropriate programs and funds, which are based on tailored and well thought out allocation factors.

For the comprehensive user fee study, the primary objective was to ensure that fees for requested services were calculated to account for the full cost of providing the services, and set appropriately, given City policy and financial objectives. A concerted focus was put on achieving near or full cost recovery for the Building & Safety, Planning, Fire, and Public Works fees. The analysis also justified measured increases in some of the fees associated with the other departments. We also supported the City in answering questions from, and participating in several meetings with, the local Building Industry Association representative, to explain the approach to the study, the data used, and the analytical methodology.

Willdan was re-selected to provide an update to the User Fee Study and Cost Allocation Plan.

Client Contact: Stacey Stevenson, Administrative Services Director 1 Town Square, Murrieta, CA 92562 Tel #: (951) 461-6004 | Email: <u>SStevenson@Murrietaca.gov</u>

City of Chino Hills, CA

Full Cost Allocation Plan and Comprehensive User Fee Study

The City of Chino Hills engaged Willdan to complete a comprehensive Cost Allocation Plan and Comprehensive User Fee Study. Willdan staff met with City staff to verify the City's objectives for the study, independently gathered most of the necessary data for the development of the CAP model and methodology and worked directly with City staff to gather additional detail or clarify information where necessary. We worked City staff to understand the various functions served by indirect staff in various City departments, and which operating departments or funds they served. We worked directly with City staff to develop and verify allocation bases and make adjustments through several iterations of the CAP model, as necessary.

We developed a cost-of-service analysis and model that updated existing fees and incorporated new fees and used it to create an updated comprehensive fee schedule.

Willdan is currently providing an update to the User Fee Study and Cost Allocation Plan.

Client Contact: Christa Buhagiar, Finance Director 14000 City Center Drive, Chino Hills, CA 91709 Tel. #: (909) 364-2642 | Email: <u>cbuhagiar@chinohills.org</u>

City of West Hollywood, CA

Comprehensive User Fee Study and Full Cost Allocation Plan

Willdan was engaged to prepare for the City of West Hollywood a Cost Allocation Plan and Comprehensive User Fee Study. Willdan developed a cost allocation plan and model that fully allocated central overhead costs to appropriate operating departments, funds, and/or programs. Our primary objective for the cost allocation study was to ensure that general government costs are fairly and equitably allocated to appropriate programs and funds, based on tailored and well thought out allocation factors.

Willdan reviewed and analyzed existing user fee programs, and based upon conversations with staff, made suggestions, as necessary, for fees that may need to be added to the City's fee schedule for which fees were not currently being charged. Utilizing the full CAP, the comprehensive user fee study initial phase is complete with full interviews concluded and a comprehensive fee model developed. The study is currently wrapping up with additional analysis and updates requested by the City.

Notes

- Our fee includes all direct expenses associated with the project.
- We will invoice the City monthly based on percentage of project completed.
- Additional services may be authorized by the City and will be billed at our then-current hourly overhead consulting rates.
- City shall reimburse Willdan for any costs Willdan incurs, including without limitation, copying costs, digitizing costs, travel expenses, employee time and attorneys' fees, to respond to the legal process of any governmental agency relating to City or relating to the project. Reimbursement shall be at Willdan's rates in effect at the time of such response.
- The cost of preparing the user fee study can be included in the resulting new user fee schedule. Therefore, over time, the City can recover the initial outlay of funds that was required to complete the studies.
- Willdan will rely on the validity and accuracy of the City's data and documentation to complete the analysis. Willdan
 will rely on the data as being accurate without performing an independent verification of accuracy and will not be
 responsible for any errors that result from inaccurate data provided by the client or a third party.
