Mr. Jeremy Brown, PE Dougherty County Board of Commissioners Public Works Engineering Department 2038 Newton Rd Albany, GA 31701

RE: Proposal for Engineering Services Inspection of Existing Structure Radium Springs Water Tower

Dear Mr. Brown:

TAE appreciates the opportunity to submit this proposal to provide engineering services for the above referenced site. We understand you are requesting an assessment of the structural integrity of the existing water tower structure.

We propose a two phase approach. The first phase is an overall condition assessment of the structure to quantify the extents of deterioration. This phase will focus on how many areas have corrosion. How severe is the corrosion? Are any of these areas critical load path members or connections? And so forth. These questions will help determine if it is cost effective to repair the structure. The second phase, if requested, will focus on designing repairs to bring the structure up to current code requirements.

Depending on our findings of the condition of the tank, you may or may not want to proceed further with repairing the tank to current code requirements, which would be Phase 2 of our scope. As such, we will limit this proposal to the Phase 1 scope of services. We can discuss Phase 2 scope of services at the conclusion of Phase 1.

We propose the following Phase 1 Scope of Services:

- Perform a site visit at which time we will climb the tower to observe the overall condition of the water tower structure.
- We assume the existing tank climb ladder is accessible and available for use. We will use this ladder to climb to the top of the tank so that we can observe the condition of the structure and tank for the entire height in at least one location. We will not be able to get to all areas of the tank during this visit due to the limited reach from the climb ladder, but should be able to visually observe the majority of the structural members.
- We understand from the previous reports provided by you there are existing corrosion issues throughout the structure.
- During our climb we will note the general and overall condition of the main structural components of the tower. Our observations will help quantify the extent of deterioration that has occurred.
- Provide a Report summarizing our findings with field notes and photographs from our visit.

Item 4c.

We propose to provide the above Phase 1 Scope of Services for a lump sum fee of \$5,000. We estimate approximately 10 business days from your notice to proceed to complete the site visit with the report of our findings following soon after.

If you agree with this proposal please sign below and email this signed proposal back to our office.

We appreciate the opportunity to provide this quote to you. Should you have any questions, or need additional information, please do not hesitate to contact me at your earliest convenience.

The applicant requests Special Approval to operate a church (Religious Institution). The parcel zoned CR allows for a Religious Institution (church) by Special Approval provided that the site is not less than one (1) acre, required parking has direct access from an arterial or collector street, and no parking is located in the front yard. The proposed site meets the acreage requirements. A variance application for access requirements and parking in the front yard will be submitted pending approval of this application.

SPECIAL APPROVAL CRITERIA

The Albany Dougherty Zoning Ordinance recommends that the Planning Commission consider the following factors for Special Approval requests:

1. The effect of the proposed activity on the adjacent transportation network.

Trip Generation: Dunbar Lane sees an Average Annual Daily Traffic intake of 50 trips per day. A church is expected to generate between 3 to 13 trips per week day and between 13 to 78 on Sunday's. There are no current traffic volumes reported for Dunbar Lane.

Road Improvements: According to the **FY 2018-2021 Transportation Improvement Program,** and the **Dougherty Area Regional Transportation Study:** (**DARTS 2045**) for the Albany/Dougherty metro area, no state or federally funded projects are proposed for the area.

Road Classifications: Street that provides access to the subject property is classified accordingly:

Dunbar Lane is considered a Local Road.

Accident Information: The Albany/Dougherty Traffic Engineering Division indicates that the property **is not** near a high-accident location.

Analysis: No adverse impact to the surrounding transportation network should result from the proposed use.

2. The location of off-street parking facilities.

According to applicant sufficient parking is provided in the front yard. Upon redevelopment to use as a church, additional parking may be required depending on the facility seating capacity. Applicant will submit for variance to Title II Article 2: General District Regulations Section 2.01 Permitted Uses (5) Requirements for religious institutions, upon approval of this application. Vehicular access to all required parking directly from a minor/local street and to all parking in the front yard area.

3. The number, size and type of signs proposed for the site.

Signs must comply with the City of Albany Sign Ordinance. The applicant does intend to provide signage. The existing sign is 4'x8' and located in front of the property.

4. The amount and location of open space.

The property is 5.95 acres. 4.5 is open space and has adequate space to preserve the character of the area and to reduce environmental impact according to the applicant.

5. Protective Screening.

The applicant states there is adequate screening to protect from negative impacts.

6. Hours and manner of operation of the proposed use.

The applicant states that the church will operate Monday thru Thursday 9 am to 5 pm office hours and Sundays 9 am to 2 pm church services and Wednesday 5 pm to 9 pm church services.

7. Outdoor lighting.

According to the applicant, outdoor lighting will be provided by the already existing light poles located within the property and four(4) flood lights on building.

8. Ingress and egress to the property.

According to the applicant, there will be no on-street parking. Access to the property will be from Dunbar Lane.

9. Compatibility with surrounding land use.

The proposed use is suitable with adjacent land uses. The adjacent properties are all zoned CR and C-1c residential and commercial use. The intent is to provide church services.

10. Consistency with the Comprehensive Plan.

The **Future Land Use Map** recommends high-density residential. The proposed use would not conflict with this recommendation.
