Agenda

City Council Regular Meeting

City Council Chambers | 50 Natoma Street, Folsom CA 95630

May 10, 2022

6:30 PM

Welcome to Your City Council Meeting

We welcome your interest and involvement in the city’s legislative process. This agenda includes information about topics coming before the City Council and the action recommended by city staff. You can read about each topic in the staff reports, which are available on the city website and in the Office of the City Clerk. The City Clerk is also available to answer any questions you have about City Council meeting procedures.

Participation

If you would like to provide comments to the City Council, please:

- Fill out a blue speaker request form, located at the back table.
- Submit the form to the City Clerk before the item begins.
- When it’s your turn, the City Clerk will call your name and invite you to the podium.
- Speakers have three minutes, unless the presiding officer (usually the mayor) changes that time.

Reasonable Accommodations

In compliance with the Americans with Disabilities Act, if you are a person with a disability and you need a disability-related modification or accommodation to participate in this meeting, please contact the City Clerk’s Office at (916) 461-6035, (916) 355-7328 (fax) or CityClerkDept@folsom.ca.us. Requests must be made as early as possible and at least two full business days before the start of the meeting.

How to Watch

The City of Folsom provides three ways to watch a City Council meeting:

In Person	Online	On TV
		
City Council meetings take place at City Hall, 50 Natoma Street	Watch the livestream and replay past meetings on the city website, www.folsom.ca.us	Watch live and replays of meetings on Sac Metro Cable TV, Channel 14

More information about City Council meetings is available at the end of this agenda

CITY MANAGER REPORTS:

COUNCIL COMMENTS:

ADJOURNMENT

NOTICE: Members of the public are entitled to directly address the City Council concerning any item that is described in the notice of this meeting, before or during consideration of that item. If you wish to address Council on an issue, which is on this agenda, please complete a blue speaker request card, and deliver it to a staff member at the table on the left side of the Council Chambers prior to discussion of the item. When your name is called, stand to be recognized by the Mayor and then proceed to the podium. If you wish to address the City Council on any other item of interest to the public, when the Mayor asks if there is any "Business from the Floor," follow the same procedure described above. Please limit your comments to three minutes or less.

NOTICE REGARDING CHALLENGES TO DECISIONS: Pursuant to all applicable laws and regulations, including without limitation, California Government Code Section 65009 and or California Public Resources Code Section 21177, if you wish to challenge in court any of the above decisions (regarding planning, zoning and/or environmental decisions), you may be limited to raising only those issues you or someone else raised at the public hearing(s) described in this notice/agenda, or in written correspondence delivered to the City at, or prior to, the public hearing.

As presiding officer, the Mayor has the authority to preserve order at all City Council meetings, to remove or cause the removal of any person from any such meeting for disorderly conduct, or for making personal, impertinent, or slanderous remarks, using profanity, or becoming boisterous, threatening or personally abusive while addressing said Council, and to enforce the rules of the Council.

PERSONS INTERESTED IN PROPOSING AN ITEM FOR THE CITY COUNCIL AGENDA SHOULD CONTACT A MEMBER OF THE CITY COUNCIL.

The meeting of the Folsom City Council is being telecast on Metro Cable TV, Channel 14, the Government Affairs Channel, and will be shown in its entirety on the Friday and Saturday following the meeting, both at 9 a.m. The City does not control scheduling of this telecast and persons interested in watching the televised meeting should confirm this schedule with Metro Cable TV, Channel 14. The City of Folsom provides live and archived webcasts of regular City Council meetings. The webcasts can be found on the online services page of the City's website www.folsom.ca.us.

In compliance with the Americans with Disabilities Act, if you are a person with a disability and you need a disability-related modification or accommodation to participate in this meeting, please contact the City

Clerk's Office at (916) 461-6035, (916) 355-7328 (fax) or CityClerkDept@folsom.ca.us. Requests must be made as early as possible and at least two full business days before the start of the meeting.

Any documents produced by the City and distributed to the City Council regarding any item on this agenda will be made available at the City Clerk's Counter at City Hall located at 50 Natoma Street, Folsom, California and at the Folsom Public Library located at 411 Stafford Street, Folsom, California during normal business hours.

PROCLAMATION
OF THE MAYOR OF THE CITY OF FOLSOM
PROCLAIMING MAY 15 – 21, 2022
as
NATIONAL POLICE OFFICERS MEMORIAL WEEK
in the City of Folsom

WHEREAS, in 1962, President Kennedy proclaimed May 15 as National Peace Officers Memorial Day National Police Week pays special recognition to those law enforcement officers who have lost their lives in the line of duty for the safety and protection of others; and

WHEREAS, there are more than 800,000 law enforcement officers serving in communities across the United States, including 79 sworn members of the City of Folsom Police Department who work devotedly and selflessly on behalf of the citizens of the City of Folsom, regardless of the peril or hazard to themselves; and

WHEREAS, since the first known line of duty death in 1786, more than 23,000 law enforcement officers in the United States have made the ultimate sacrifice; and

WHEREAS, the names of these dedicated public servants are engraved on the walls of the National Law Enforcement Officers Memorial, which was dedicated in 1991 in Washington, D.C.; and

WHEREAS, in 2021 458 federal, state, tribal and local law enforcement officers died in the line-of-duty. This was an increase of 55% from the 295 officers killed in 2020, and is the highest total line-of-duty officer deaths since 1930 when there were 312 fatalities; and

WHEREAS, the service and sacrifice of all officers killed in the line of duty will be honored, and the names of 619 officers newly engraved on the Memorial will be formally dedicated, during the National Law Enforcement Officers Memorial Fund's 34th Annual Candlelight Vigil, to be held on the evening of Friday, May 13, 2022; and

WHEREAS, May 15, 2022 is designated as Peace Officers Memorial Day, in honor of all the fallen officers and their families.

NOW, THEREFORE, I, Kerri M. Howell, Mayor of the City of Folsom, on behalf of the Folsom City Council, do hereby proclaim the week of May 15- 21, 2022 as **National Police Week** in the City of Folsom and publicly salute the service of law enforcement officers in our community and communities across the nation.

PROCLAIMED this 10th day of May 2022.

Attest:

 Kerri M. Howell, MAYOR

 Lydia Konopka, DEPUTY CITY CLERK

PROCLAMATION

OF THE MAYOR OF THE CITY OF FOLSOM PROCLAIMING May 15 through May 21, 2022

as

“National Public Works Week” and May 18, 2022 as “City Works Day” in the City of Folsom

WHEREAS, public works services provided in the Folsom community are an integral part of our residents’ everyday lives; and

WHEREAS, informed residents are vital to the efficient operation of public works systems and programs such as traffic engineering, street maintenance, storm drainage, solid waste collection, recycling, and hazardous materials; and

WHEREAS, the health, safety, and comfort of this community greatly depends on these operational services; and

WHEREAS, the quality of these programs combined with their planning, design, and construction, are vitally dependent on the skills of City of Folsom staff and officials; and

WHEREAS, the Folsom City Charter and Folsom Municipal Code encourages broad, informed public participation in civic affairs; and

WHEREAS, the City of Folsom seeks and encourages advice and input from the public on matters related to the City; and

WHEREAS, the City of Folsom desires to provide information to the public about municipal operations; and

WHEREAS, City Works Day is designed to inspire residents to discover the City of Folsom’s wide variety of services and programs, and community members are invited to attend the event:

NOW, THEREFORE, I, Kerri M. Howell, Mayor of the City of Folsom, on behalf of the Folsom City Council, do hereby proclaim the week of May 15 through May 21, 2022 as “National Public Works Week” and May 18, 2022 as “City Works Day” in the City of Folsom, and call upon community members to acquaint themselves with the complexities of providing public works and to recognize the contribution that Public Works and other City departments make daily to the health, safety and comfort of our residents.

PROCLAIMED this 10th day of May 2022.

Kerri M. Howell, MAYOR

Attest:

Lydia Konopka, DEPUTY CITY CLERK

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Scheduled Presentations
SUBJECT:	City Manager’s Fiscal Year 2021-22 Third Quarter Financial Report
FROM:	Finance Department

RECOMMENDATION / CITY COUNCIL ACTION

It is recommended that the City Council receive and file the City Manager’s Fiscal Year 2021-22 Third Quarter Financial Report.

BACKGROUND / ISSUE

Section 5.05R of the Charter of the City of Folsom requires the City Manager submit to the City Council a financial and management report showing the relationship between budgeted and actual revenues, and expenditures and encumbrances on a quarterly basis.

The Financial Report for the third quarter of Fiscal Year (FY) 2021-22 is an analysis of the unaudited financial status of the City’s major funds, covering the nine-month period from July 2021 through March 2022. Please refer to the Appendices of the report for detailed schedules of the City’s key funds for the period ended March 31, 2022.

POLICY / RULE

Section 5.05R of the Charter of the City of Folsom requires the City Manager submit to the City Council a financial and management report showing the relationship between budgeted and actual revenues, and expenditures and encumbrances on a quarterly basis.

Section 3.02.050 (b) of the Folsom Municipal Code states “... within 30 days after the end of each quarter during the fiscal year, and more often if required by the City Council, the City Manager shall submit to the City Council a financial and management report.”

ANALYSIS

Economic Update:

As of March 2022, unemployment was 4.2% and 4.0% in California and Sacramento County respectively and in Folsom, the unemployment rate was 2.7%. As a comparison, in March 2021, the unemployment rates were 8.2% in California, 7.3% in Sacramento County and 4.5% in Folsom. A comparison of home sales during the third quarter of FY 2021-22 and FY 2020-21 shows the number of homes sold decreased by 141 or 18.26%. The average median sales price through the third quarter of FY 2021-22 was \$762,500 which is an increase of 23.11% over FY 2020-21. The number of home sales continue to decline, most likely due to increasing interest rates.

General Fund:

Fiscal Year 2021-22 is currently projected to end the year with a General Fund unassigned fund balance of \$22.98 million. As a comparison, the unassigned fund balance in FY 2020-21 was \$19.20 million. The unassigned fund balance as a percentage of expenditures is projected at 23.38% for FY 2021-22 and for FY 2020-21, it was 21.38%. It is important to note that the 23.38% for FY 2021-22 is inflated when it is compared to the artificially low level of expenditures related to cuts due to COVID-19.

Fiscal Year 2021-22 total projected revenues of \$102.77 million is an increase of \$7.18 million, or 7.51% over the prior fiscal year, and a projected increase of \$7.83 million, or 8.25% over FY 2021-22 budgeted revenues of \$94.94 million. The increase is seen mostly in charges for services and sales tax and is due to continued recovery from the COVID-19 related impacts. The budgeted revenues were projected prior to the reopening of services and venues due to the pandemic and the reopening occurred sooner than anticipated.

Property tax received through the third quarter of the fiscal year was \$16.25 million and compared to the prior fiscal year is an increase of \$594,000 or 3.79%. The current projection is for property tax to end the fiscal year with a slight increase of \$500,000 over the budgeted amount of \$32.49 million, for \$33.01 million. Compared to the prior fiscal year this would be an increase of \$1.76 million or 5.62%.

Sales tax is projected to end the fiscal year at \$27.01 million, an increase of \$2.46 million over the budgeted amount of \$24.55 million or 10.00%. This is due to a better than expected recovery from the impacts of COVID-19. However, when compared to the results for FY 2020-21 sales tax revenues of \$25.85 million, this is only a 4.49% increase year over year.

Through the third quarter, charges for services were \$11.84 million and the current projection for the end of FY 2021-22 is \$16.05 million. The projection of \$16.05 million is an increase from the \$9.84 million budgeted and an increase from the \$13.87 million received in the prior year. The increase over the budgeted amount is mostly related to better than expected Parks and Recreation revenues, up \$2.92 million over the budgeted amount, due to increased program

activity after the re-opening of programs that were discontinued or limited due to COVID-19. Also, development charges are projected to be up \$2.29 million over the budgeted amount due to a faster pace of development in the Folsom Plan Area than projected and charges in Police and Fire are up \$749,000. Charges in the Public Safety Departments include estimated reimbursements from the California Office of Emergency Services (CalOES) for wildfire strike teams. The year over year comparison of charges for services show the Parks and Recreation fees are projected to increase by \$2.06 million from the \$1.93 million received in FY 2020-21. Development charges are projected to increase by \$887,000 when compared to the prior year and Public Safety charges are projected to decrease by approximately \$300,000 mainly due to reduced reimbursements from CalOES.

Fiscal Year 2021-22 total projected General Fund expenditures are \$98.29 million, \$3.35 million (3.53%) more than the appropriated amount of \$94.94 million. The projected expenditure total includes increases in overtime of \$2.00 million in public safety, contracts of \$1.76 million, an increase in services and supplies of \$938,500 and an increase in capital outlay of \$648,600. The increase in overtime in public safety is partially offset by reimbursements from CalOES. The projected increase in all contracts is primarily in the Community Development Department (\$1.96 million) and is mostly due to contract services related to the processing of permits and inspections of new development mostly in the Folsom Plan Area. As a comparison, in FY 2020-21 820 building permits were issued in the Plan Area. Through the third quarter of FY 2021-22, 733 building permits have already been issued. Increases in capital outlay include ambulances, and vehicles for the Police Department and Parks and Recreation. The increase in capital outlay is due to additional vehicles purchased for the Police Department with funding from the American Rescue Plan Act. Services and supplies are continuing to increase as costs increase for most consumables like fuel and parts.

Utility Enterprise Funds:

All three Utility Operating Funds are projected to end the fiscal year with operating revenues exceeding operating expenses. After capital expenses are included and comparing to Fiscal Year 2020-21 the unrestricted net assets are projected to decrease in Water by approximately \$7.06 million, decrease in Solid Waste by approximately \$1.2 million and in Wastewater the change in unrestricted net assets is projected to be flat. In the case of Water and Wastewater, the capital outlay is for capital projects and in Solid Waste, it is the purchase of replacement vehicles.

A year over year comparison of the fiscal year-end projection of expenses and revenues in the combined operating and capital funds shows charges for service revenues in Water are currently projected to decrease by \$329,000 (1.80%) and operating expenses are projected to increase by \$3.11 million (24.68%). The increase in operating expenses is mostly seen in maintenance and contract costs. Wastewater Operating charges for services revenues are projected to increase by \$150,000 (1.77%) and operating expenses are projected to increase by \$328,000 (6.47%). The increase in expenses in Wastewater is seen mostly in contract services. Solid Waste Operating charges for services revenues are projected to increase by \$3.80 million (25.02%) and operating expenses are projected to increase by \$1.52 million (10.92%).

Increases in expenses are mainly due to employee and contract costs and the increase in the projected revenues is due to the recent increase in service rates. The increase in expenses and revenues in Solid Waste are both directly attributable to the regulations regarding food waste and the change in recyclables.

Third Quarter Financial Report

Fiscal Year 2021-22

Introduction

This financial report provides an overview of the City’s unaudited financial position through the third quarter of fiscal year (FY) 2021-22 (July 1, 2021, through March 31, 2022) for (1) the General Fund, (2) Housing Special Revenue Fund and L&L Districts, (3) the major enterprise operating funds, and (4) the Risk Management Internal Service Fund. Notable cumulative third quarter to third quarter and budget to actual comparisons are included in this report in addition to year-end projections.

Executive Summary

During first three quarters of FY 2021-22, while still under the COVID-19 public health emergency, most restrictions have been lifted and the economy has started to rebound. Additional influences are causing economic changes. The rise in interest rates and the continued supply chain issues have started to cause costs to increase. The Parks and Recreation Department has continued to rebound with revenues exceeding the budget amount as programming increases to provide services to the community. Parks and Recreation programming revenues are now projected to end FY 2021-22 with an increase of \$2.92 million when compared to the budget and \$2.06 million when compared to the prior fiscal year. The City has received \$4.19 million in American Rescue Plan Act (ARPA) funding of which approximately \$2.2 million has been approved to be used for public safety, facilities and health and welfare, within the category of Provision of Government Services. The current projected year-end General Fund revenues are \$102.77 million and projected expenditures are \$98.29 million.

We project the General Fund’s unassigned fund balance will increase from \$19.20 million to \$22.98 million at the fiscal year end. Below is a chart of the unassigned fund balance over the last ten years and displays the projected change from FY 2020-21 to FY 2021-22.

General Fund: Operating Revenues

The following table includes cumulative revenue comparisons through the third quarter of FY 2020-21 and FY 2021-22 and a revenue budget comparison for FY 2021-22 with year-end projections.

	FY 20-21 Actual Mar. 31, 2021	FY 21-22 Actual Mar. 31, 2022	FY 21-22 Budget	FY 21-22 Projected	Over/Under Budget	% of Budget
Property Tax	\$ 15,656,038	\$ 16,249,998	\$ 32,491,949	\$ 33,010,662	\$ 518,713	102%
Sales Tax	14,763,739	15,921,650	24,551,790	27,008,127	2,456,337	110%
Transient Occupancy Tax	718,276	1,368,351	2,000,000	1,900,000	(100,000)	95%
Charges for Services	8,520,013	11,844,469	9,839,240	16,048,997	6,209,757	163%
License, Permits & VLF	7,411,697	7,752,394	11,916,184	12,959,504	1,043,320	109%
Transfers In	4,083,086	4,214,980	8,393,178	6,008,753	(2,384,425)	72%
All Other	1,886,940	2,024,958	3,550,200	3,635,327	85,127	102%
Subtotal Revenue	\$ 53,039,790	\$ 59,376,801	\$ 92,742,541	\$ 100,571,370	\$ 7,828,829	108.44%
CARES Act / ARPA	1,007,649	2,195,500	2,195,500	2,195,500	-	
Total Revenue	\$ 54,047,439	\$ 61,572,301	\$ 94,938,041	\$ 102,766,870	\$ 7,828,829	108.25%

General Fund operating revenues through the third quarter are \$61.57 million, and 13.92% above the same period in FY 2020-21. Revenues are at 64.86% of the budget through the third quarter of the current year, primarily due to the timing associated with receiving some of the larger revenue sources. For instance, property tax is the largest General Fund revenue source, but funding is received in two installments, of which one has been received. The second installment will be received during the fourth quarter of the fiscal year.

The following is an explanation of the notable variances:

- Property tax revenues exceeded last year's cumulative third quarter by 3.79% or \$594,000. The number of home sales from July through March was 631 and a decrease from the prior year of 141 sales (18.26%). The median sales price has increased by approximately 21.72%. The property tax revenue projection for Fiscal Year 2021-22 year-end is \$519,000 greater than the budgeted amount of \$32.49 million, which would exceed the prior year by \$1.76 million or 5.62%.
- Sales tax revenues also exceeded last year's cumulative third quarter by 7.84% or \$1.16 million. During the time frame of July through December 2021, the categories of construction, business to business and the countywide pool show a decrease, all other categories show an increase when compared to the same quarter in the prior year. The categories of apparel stores, restaurants and department stores show increases due to relaxing of pandemic restrictions as consumers return to more normal spending patterns. The threat of a recession now looms in the future due to rising interest rates and higher costs.

Based on the latest sales tax forecast, sales tax is trending to end the year slightly above the budget at \$27.01 million, an increase from the prior year of \$1.16 million or 4.49%. Below is a graph showing sales tax revenue for the current fiscal year and the past five fiscal years. This illustrates the trend of sales tax revenues leveling off.

Sales Tax

- Transient Occupancy Tax (TOT) collections are at \$1.37 million through the third quarter and are projected to end the fiscal year at \$1.90 million, an increase of \$542,500, 39.96% when compared to the FY 2021 amount. The increase is attributed to reduced travel restrictions and the desire to travel.
- Charges for services, including Building and Engineering fees, Parks and Recreation user fees, and Ambulance fees are at \$11.84 million through the third quarter and are projected to end the fiscal year at \$16.05 million. The current projection is \$2.17 million more than the prior year amount of \$13.87 million. The Parks and Recreation charges through the third quarter were \$2.86 million and a comparison to the same quarter in the prior fiscal year shows an increase of \$2.05 million. Ambulance fees through the third quarter were \$2.82 million and compared to the prior fiscal year this is a slight increase of \$9,500 or 0.34%. The projection for Ambulance Fees at fiscal year-end is \$4.40 million, which will be an increase from the prior year by \$111,000 or 2.58%. Community Development charges are at \$4.29 million through the third quarter and are currently projected to end the fiscal year at \$5.18 million. Compared to the prior fiscal year this would be an increase of \$887,000 or 20.65%. The projected increase in Community Development charges is due to an increase in engineering activity, mostly in the plan area, through the third quarter.
- License and permit fees and Vehicle License Fees (VLF) quarter to quarter increased \$448,000 and are projected to end the fiscal year at \$12.33 million which would be an increase of \$818,000 compared to the budget and an increase of \$322,000 when compared to the prior year. The year over year increase is due to increased building permit activity mostly in the Folsom Plan Area, and a corresponding increase in VLF received. To provide a perspective of the building activity currently seen in the Folsom Plan Area, through the third quarter of FY 2021-22 there have been 733 building permits issued, compared to the prior fiscal year when there were 498 building permits issued through the third quarter. Also, business certificates are projected to decrease due to an approved business certificate suspension for small business in the current fiscal year.
- Other revenues decreased 33.19% or \$290,000, through the third quarter when compared to the prior fiscal year.

General Fund: Department Operating Expenditures

The following table includes cumulative third quarter actual expenditure comparisons for FY 2020-21 and FY 2021-22 and an expenditure budget-to-actual comparison for FY 2021-22.

	FY 20-21 Actual Mar. 31, 2021	FY 21-22 Actual Mar. 31, 2022	FY 21-22 Budget	FY 21-22 Projected	Over/Under Budget	Budget
Salaries	\$ 29,361,782	\$ 30,793,804	\$ 40,241,757	\$ 41,235,757	\$ 994,000	102.5%
Benefits	19,995,493	19,672,941	27,569,671	26,472,971	(1,096,700)	96.0%
O&M	13,578,298	17,378,492	23,263,237	26,069,836	2,806,599	112.1%
Capital Outlay	1,559,730	1,195,832	3,080,227	3,728,859	648,632	121.1%
Debt Service	901,381	496,305	783,149	783,149	-	100.0%
Total Expenditures	\$ 65,396,684	\$ 69,537,373	\$ 94,938,041	\$ 98,290,572	\$ 3,352,531	103.5%

Overall, cumulative third quarter General Fund expenditures increased 6.33% compared to the prior year. This is in part due to the increased appropriation from the ARPA funding and an increase in temporary salaries in Parks and Recreation due to programs resuming. General Fund expenditures are coming in at 73.25% percent of the budget through the third quarter of FY 2021-22. The projection for the end of the fiscal year is for expenditures to be at \$98.29 million which would be \$3.35 million more than the budgeted amount or 103.53% of budget. The projected increase to expenditures is primarily due to an increase in services and supplies, contracts and capital outlay.

The table below shows a comparison for FY 2020-21 and FY 2021-22 for each General Fund Department.

	FY 20-21 Actual Mar. 31, 2021	FY 21-22 Actual Mar. 31, 2022	FY 21-22 Budget	FY 21-22 Projected	Over/Under Budget	% of Budget
City Council	\$ 77,414	\$ 79,063	\$ 116,141	\$ 107,241	\$ (8,900)	92.3%
City Manager	851,330	855,075	1,303,034	1,183,034	(120,000)	90.8%
City Clerk	505,666	445,519	596,133	601,633	5,500	100.9%
City Attorney	717,258	735,706	1,058,985	1,001,985	(57,000)	94.6%
Mgmt & Budget	3,808,555	3,717,337	5,399,728	5,262,527	(137,201)	97.5%

Police	17,726,982	17,954,661	25,313,486	24,754,986	(558,500)	97.8%
Fire	17,378,597	17,879,688	22,526,257	24,893,757	2,367,500	110.5%
Community Dev	4,832,403	5,359,856	5,629,217	7,572,217	1,943,000	134.5%
Parks & Recreation	9,929,582	11,098,354	15,688,345	15,053,977	(634,368)	96.0%
Library	1,329,431	1,276,043	1,930,397	1,758,397	(172,000)	91.1%
Public Works	5,194,412	5,626,462	8,355,071	7,870,571	(484,500)	94.2%
Non-Departmental	2,590,711	4,051,919	6,174,753	7,604,753	1,430,000	123.2%
Total Expenditures	\$ 65,396,684	\$ 69,537,373	\$ 94,938,041	\$ 98,290,572	\$ 3,352,531	103.5%

The following is an explanation of the department specific variances of year-end projections as compared to the budget:

- Community Development department is projected to end the fiscal year \$1.94 million (34.52%) over the budgeted amount, which is mostly due to increases in contract costs that are mostly offset by increased revenues.
- Fire department is projected to end the fiscal year \$2.37 million (10.51%) over the budgeted amount, which is mainly seen in overtime costs, vehicle maintenance and capital outlay. Overtime costs have been impacted by employees out after an exposure to COVID-19, wildfire strike teams, retirements and multiple long term vacancies. Capital outlay costs are due to the purchase of an additional two ambulances and will depend on if those ambulances are completed during the current fiscal year. Due to shortages of parts and computer chips, these costs may not materialize until next fiscal year.
- Non-Departmental is projected to end the fiscal year \$1.43 million over the budget amount, which is mainly due to an increase in contract costs and the approval of replacement of the fuel tank at the corporation yard.

Overall General Fund departments' expenditures are trending at budget (in line with the 75% expectation) at this point in the fiscal year.

Enterprise Funds:

Water Fund

The Water Fund is reported on a combined basis and includes the following funds: Water Impact, Water Operating, Water Capital and Water Meters.

The table below includes cumulative third quarter actual revenue and expense comparisons for FY 2020-21 and FY 2021-22 and a budget to actual comparison for FY 2021-22 for the Water Operating Fund.

	FY 20-21 Actual Mar. 31, 2021	FY 21-22 Actual Mar. 31, 2022	FY 21-22 Budget	FY 21-22 Projected	Over/Under Budget	% of Budget
Program Revenues	\$ 12,105,211	\$ 12,036,043	\$ 17,865,000	\$ 17,915,000	\$ 50,000	100.3%
Salaries	2,212,931	2,273,681	3,215,801	3,208,801	(7,000)	99.8%
Benefits	1,651,683	1,622,651	2,273,758	2,268,758	(5,000)	99.8%
Operating Expenses	3,500,621	3,901,037	7,971,887	6,623,887	(1,348,000)	83.1%
Transfers Out	668,248	676,248	1,705,800	1,705,800	-	100.0%
Debt Service	11,175	7,623	1,892,985	1,892,985	-	100.0%
	<u>\$ 8,044,658</u>	<u>\$ 8,481,240</u>	<u>\$ 17,060,231</u>	<u>\$ 15,700,231</u>	<u>\$ (1,360,000)</u>	<u>92.0%</u>
Capital Expenses	\$ 2,005,874	\$ 1,784,082	\$ 16,311,634	\$ 3,993,634	\$ (12,318,000)	24.5%
Working Capital			\$ 21,046,468	\$ 19,267,603		

The Water Fund is projected to end the year with program revenues of \$17.92 million. Total operating expenses, including transfers out and debt service are projected to end the year at \$15.70 million, or 92.0% of budget. This reduction from budgeted amounts is mostly due to savings from budgeted contracts not anticipated to be fully needed this fiscal year. Total expenditures for capital projects are estimated to be \$3.99 million at year-end. The fund will end the year with projected working capital of \$19.27 million.

Wastewater Fund

The Wastewater Fund is reported on a combined basis and includes the Wastewater and Wastewater Capital Funds.

	FY 20-21 Actual Mar. 31, 2021	FY 21-22 Actual Mar. 31, 2022	FY 21-22 Budget	FY 21-22 Projected	Over/Under Budget	% of Budget

Capital Expenses	\$ 289,064	\$ 1,021,131	\$ 16,951,123	\$ 2,036,123	\$ (14,915,000)	12.01%
Working Capital			\$ 16,696,316	\$ 17,891,467		

The Wastewater Fund is projected to end the year with program revenues of \$8.63 million. Total operating expenses, including transfers out, are projected to end the year at \$5.39 million, or 90.70% of budget. This reduction from budgeted

amounts is mostly due to savings in supply and maintenance costs. Total expenditures for capital projects are estimated to be \$2.04 million at year-end. The fund will end the year with projected working capital of \$17.89 million.

Solid Waste Fund

The Solid Waste Fund is reported on a combined basis and includes the Solid Waste Operating, Solid Waste Capital, and Solid Waste Plan Area Capital.

	FY 20-21 Actual Mar. 31, 2021	FY 21-22 Actual Mar. 31, 2022	FY 21-22 Budget	FY 21-22 Projected	Over/Under Budget	% of Budget
Program Revenues	\$ 11,221,276	\$ 15,689,748	\$ 16,241,410	\$ 19,011,410	\$ 2,770,000	117.1%

Debt Service	-	-	-	-	-	0.0%
	<u>\$ 9,900,402</u>	<u>\$ 10,804,939</u>	<u>\$ 15,377,430</u>	<u>\$ 15,420,430</u>	<u>\$ 43,000</u>	<u>100.3%</u>
Capital Expenses	\$ 1,490,261	\$ 799,495	\$ 3,943,709	\$ 2,093,709	\$ (1,850,000)	53.1%
Working Capital			\$ 6,576,585	\$ 8,073,856		

The Solid Waste Fund is projected to end the year with program revenues of \$19.01 million. Total operating expenses, including transfers out, are projected to end the year at \$15.42 million, or 100.3% of budget. The fund is currently projected to be slightly over budget mainly due to the increase in contract costs related to recycling and organics changes. Total expenditures for capital outlay costs are estimated to be \$2.09 million at year-end. The fund will end the year with projected working capital of \$8.07 million.

Other Funds

City Housing Fund

The City Housing Fund as of March 31, 2022 had a cash balance of \$6,180,270. The City Council had also previously approved housing project loans in an amount up to \$3.5 million for the Scholar Way project of which \$2.75 million has now been disbursed.

Risk Management Internal Service Fund

The Risk Management Fund captures the activity associated with employee and retiree health, dental and vision insurance, workers' compensation, and liability insurance expense.

As of March 31, 2022, the City has paid \$5.58 million for health, vision, and dental insurance for active employees and \$3.46 million for retired employees and \$1.97 million for workers' compensation. Liability insurance payments were \$2.45 million with an additional \$760,000 for property premium. The total expenditures for FY 2022 are projected at \$19.43 million, which is an increase from the prior fiscal year of \$1.29 million, which is mostly seen in health insurance, workers compensation, and liability costs.

The projected ending unrestricted net position is \$5.33 million, a \$1.55 decrease from FY 2020-21.

Lighting and Landscape Funds

There are 29 Lighting and Landscape (L&L) Districts in the City of Folsom. Each District has its own budget and maintenance requirements to maintain various types of assets ranging from shrub beds, mini parks, walls, fences, monument signs, streetlights, bollards, landscape lighting, irrigation systems, artwork, a waterfall, walkways/trails, open space, trees, and electrical services.

Some activities that have taken place in the L&L's during this time period include:

District	Project	Date	Cost
American River Canyon North	Kinglet Ct retaining wall and swale repair.	March	\$3,870
Willow Creek Estates East	Entry Sign Replacement	February	\$5,643
Natoma Valley	Quigley Ct. plant replacement and arbor mulch	February	\$390
Willow Creek Estates South	Silberhorn Plant Infill Project	January	\$6,225

Plan Area Impact Fees

Total Plan Area Impact Fees received through the 3rd Quarter of FY 2022 was \$14.33 million. Expenditures during the third quarter total approximately \$712,000 in all Plan Area Impact Fee funds. Expenditures were for the final payment on the Corporation Yard property, ½ of a garbage truck, ½ of a streetsweeper, and design costs for trails, parks and the fire station.

NEW BUSINESS:

7. Ordinance No. 1326 - An Uncodified Ordinance of the City of Folsom Approving the Folsom Police Department's Military Equipment Use Policy in Compliance with Assembly Bill 481 (Introduction and First Reading)

Lieutenant Brian Lockhart made a presentation and responded to questions from the City Council.

Motion by Vice Mayor Rosario Rodriguez second by Councilmember YK Chalamcherla, to introduce and hold the first reading of Ordinance No. 1326.

Motion carried with the following roll call vote:

AYES: Councilmember(s): Rodriguez, Aquino, Chalamcherla, Kozlowski, Howell
NOES: Councilmember(s): None
ABSENT: Councilmember(s): None
ABSTAIN: Councilmember(s): None

Mayor Kerri Howell called for a 15-minute recess at 6:58 pm while staff attempted to connect with Webex. She readjourned the meeting at 7:13 pm and explained that staff had connected with Webex and provided the new meeting information for the public to connect.

Mayor Howell explained that the City Council would proceed with Public Hearing Item 8 but would also continue the item to the regular meeting on May 10th in order to ensure everyone unable to participate at this meeting would be able to at the next meeting.

PUBLIC HEARING:

8. Appeal by Igor Semenyuk of a Decision by the Historic District Commission Denying a Conditional Use Permit for the Lakeside Memorial Lawn Crematorium project (PN 19-182) located at 1201 Forrest Street

Mayor Kerri Howell opened the public hearing.

Assistant Planner Josh Kinkade made a presentation and responded to questions from the City Council. Consultant Lisa Westwood from ECORP Consulting provided information regarding the cultural resources study and Community Development Director Pam Johns provided additional clarification.

The following speakers addressed the City Council:

1. Laura Allbaugh
2. Anita Claney
3. Wendy Schneider
4. Megan McClure
5. Terry Sorensen
6. Dave Hibbins
7. Nancy Oldham

8. Sean Gates
9. Joy Hays
10. Mary Johnson
11. Deborah Grassl
12. Peter Lucyga
13. Helen Walsh
14. Lorin Claney
15. Steve Walsh
16. Andrey Semenyuk
17. Victoria Foster
18. Jennifer Lane
19. June Chan

Hearing no more comments the public hearing was closed.

Motion by Councilmember YK Chalamcherla, second by Vice Mayor Rosario Rodriguez to continue the item to the May 10, 2022 regular City Council meeting.

AYES: Councilmember(s): Rodriguez, Aquino, Chalamcherla, Kozlowski, Howell
NOES: Councilmember(s): None
ABSENT: Councilmember(s): None
ABSTAIN: Councilmember(s): None

CITY MANAGER REPORTS:

City Manager Elaine Andersen spoke of upcoming events: the Prescription Drug Takeback Day, the Sacramento Metropolitan Air Quality Management District open house, and the 9th Annual Community Service Day. She announced that the City is conducting a targeted multi-family and mixed-use housing study and is seeking public input.

CITY COUNCIL COMMENTS:

Councilmember Sarah Aquino commented regarding the Wye property and proposed a future agenda item at an upcoming City Council meeting.

Councilmember Mike Kozlowski spoke of the recent SACOG meeting he attended.

Councilmember YK Chalamcherla thanked staff and the appellant for their work on the Lakeside Memorial Lawn crematorium appeal.

Vice Mayor Rosario Rodriguez commented regarding status of hiring an executive director for the Sacramento Transportation Authority, attending the upcoming Cap to Cap trip and upcoming concerts at the Zittel Farm Amphitheater.

Mayor Kerri Howell commented about traffic in Folsom and encouraged everyone to drive safely. She spoke of a recent issue for Regional Transit and announced an upcoming meeting for Sacramento-Placerville Rail JPA.

ADJOURNMENT

There being no further business to come before the Folsom City Council, Mayor Kerri Howell adjourned the meeting at 9:16 pm.

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10839 – A Resolution of the City Council Ratifying the City Manager’s Authorization for Emergency Replacement of the On-Site Fuel Tanks at the City of Folsom Corporation Yard, Determining the Project is Exempt from CEQA, and Appropriation of Funds
FROM:	Public Works Department

RECOMMENDATION / CITY COUNCIL ACTION

The Public Works Department recommends that the City council pass and adopt Resolution No. 10839 – A Resolution of the City Council Ratifying the City Manager’s Authorization for Emergency Replacement of the On-Site Fuel Tanks at the City of Folsom Corporation Yard, Determining the Project is Exempt from CEQA, and Appropriation of Funds.

BACKGROUND / ISSUE

The current Corporation Yard fuel tanks are over 30 years old and have exceeded their useful life. The diesel tank has a slow leak and is unrepairable. Emergency operations planning typically recommends keeping two weeks’ worth of fuel in reserve; the diesel tank allows for less than 12 hours reserve, and the unleaded tank is approximately 75% undersized compared to current industry best practices.

POLICY / RULE

Folsom Municipal Code Section 2.36.150, Emergency Procurement, provides that the City Manager shall make, or authorize others to make, emergency procurement of supplies, equipment, services, or construction items when there exists a threat to public health, welfare, or safety, provided that such emergency procurement shall be made with sufficient competition as is practicable under the circumstances.

ANALYSIS

Current industry best practices and emergency operations planning guidelines recommend keeping a minimum two week fuel reserve. Obtaining the best pricing on fuel requires purchasing a full truck and tanker load (roughly 9,000 gallons) of product. Tanks may only be filled to 80% of their rated capacity to allow for product expansion due to thermal changes. These factors, combined with the City’s average fuel usage over the last five years, result in recommended tank sizes of 18,000 gallons for unleaded gasoline and 23,000 gallons for diesel fuel. Depending on the pricing of prefabricated tanks, purchasing slightly larger capacity tanks may be more cost effective.

The City Corporation Yard’s current fuel station consists of a 4,000 gallon unleaded gasoline tank and a 2,000 gallon diesel tank. Both tanks are repurposed, single-walled former underground storage tanks, mounted above ground, and co-located within a secondary containment structure along with a central tank product fill station and four product dispensing pumps.

Modern, purpose-built aboveground storage tanks are double-walled, with their required secondary containment built into the tank itself. Modern tanks typically do not require an additional secondary containment structure.

The current secondary containment structure and infrastructure can be reused with new equipment but will only accommodate one of the new tanks, most likely the unleaded gasoline tank. The new diesel tank will need to be installed at a different location within the Corporation Yard.

The City Manager authorized the emergency procurement for construction services under the existence of threat to public health, welfare, and safety, pursuant to Folsom Municipal Code Section 2.36.150, Emergency Procurement.

While not required by the Municipal Code, this matter is being presented to the City Council for the Council’s awareness and ratification. Staff is recommending that the City Council ratify the City Manager’s authorization for the emergency work and appropriation of funds with a determination that the current condition of the tanks poses an immediate threat to the public’s health, safety and welfare pursuant to Folsom Municipal Code Section 2.36.150. Staff is recommending that this emergency procurement be used to select a contractor through a competitive bidding process.

FINANCIAL IMPACT

The emergency procurement was not anticipated in the FY 2021-22 General Fund (Fund 010) Operating Budget, therefore staff is requesting an additional appropriation in the General Fund in an amount not-to-exceed \$1,000,000. The additional appropriation will come from the General Funds current fund balance, which is currently available for this procurement.

Given the immediate lower per-gallon cost of fuel that will be purchased less frequently but in greater quantities, the projected return on investment is less than 10 years.

No significant revenue is anticipated from the sale of the existing equipment.

ENVIRONMENTAL REVIEW

This emergency replacement project is exempt from the requirements of the California Environmental Quality Act per Section 15269(b) and (c), Emergency Projects.

ATTACHMENT

Resolution No 10839 - A Resolution of the City Council Ratifying the City Manager's Authorization for Emergency Replacement of the On-Site Fuel Tanks at the City Corporation Yard, Determining the Project is Exempt from CEQA, and Appropriation of Funds

Submitted,

Mark Rackovan, PUBLIC WORKS DIRECTOR

RESOLUTION NO. 10839

A RESOLUTION OF THE CITY COUNCIL RATIFYING THE CITY MANAGER’S AUTHORIZATION FOR EMERGENCY REPLACEMENT OF THE ON-SITE FUEL TANKS AT THE CITY OF FOLSOM CORPORATION YARD, DETERMINING THE PROJECT IS EXEMPT FROM CEQA, AND APPROPRIATION OF FUNDS

WHEREAS, the Corporation Yard fuel tanks are over 30 years old and have exceed their useful life; and

WHEREAS, the diesel fuel tank located at the Corporation Yard has an unreparable slow leak; and

WHEREAS, both of the fuel storage tanks at the Corporation Yard are undersized compared to current industry best practices and emergency operations planning guidelines; and

WHEREAS, the City Manager made a determination for emergency procurement for construction services under the existence of threat to public health, welfare and safety, pursuant to Folsom Municipal Code Section 2.36.150, Emergency Procurement; and

WHEREAS, staff will conduct a competitive bidding process prior to awarding the contract for this project; and

WHEREAS, the project is exempt from CEQA; and

WHEREAS, sufficient funds are available in the General Fund (Fund 010); and

WHEREAS, the agreement will be in a form acceptable to the City Attorney.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom hereby ratify the City Manager’s emergency procurement of construction services for the emergency replacement of the Corporation Yard fuel tanks.

NOW, THEREFORE, BE IT FURTHER RESOLVED that the Finance Director is authorized to appropriate the amount bid by the successful contractor in the competitive bidding process, not to exceed \$1,000,000 from the General Fund (Fund 010), from current available fund balance for the Corporation Yard fuel tank emergency replacement procurement.

PASSED AND ADOPTED this 10th day of May 2022, by the following roll-call vote:

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10840 – A Resolution Authorizing the City Manager to Execute a Subdivision Improvement Agreement and Accept Offers of Dedication for the Mangini Ranch Phase 2 Village No. 3 Subdivision, and Approval of the Final Map for the Mangini Ranch Phase 2 Village No. 3 Subdivision
FROM:	Community Development Department

RECOMMENDATION / CITY COUNCIL ACTION

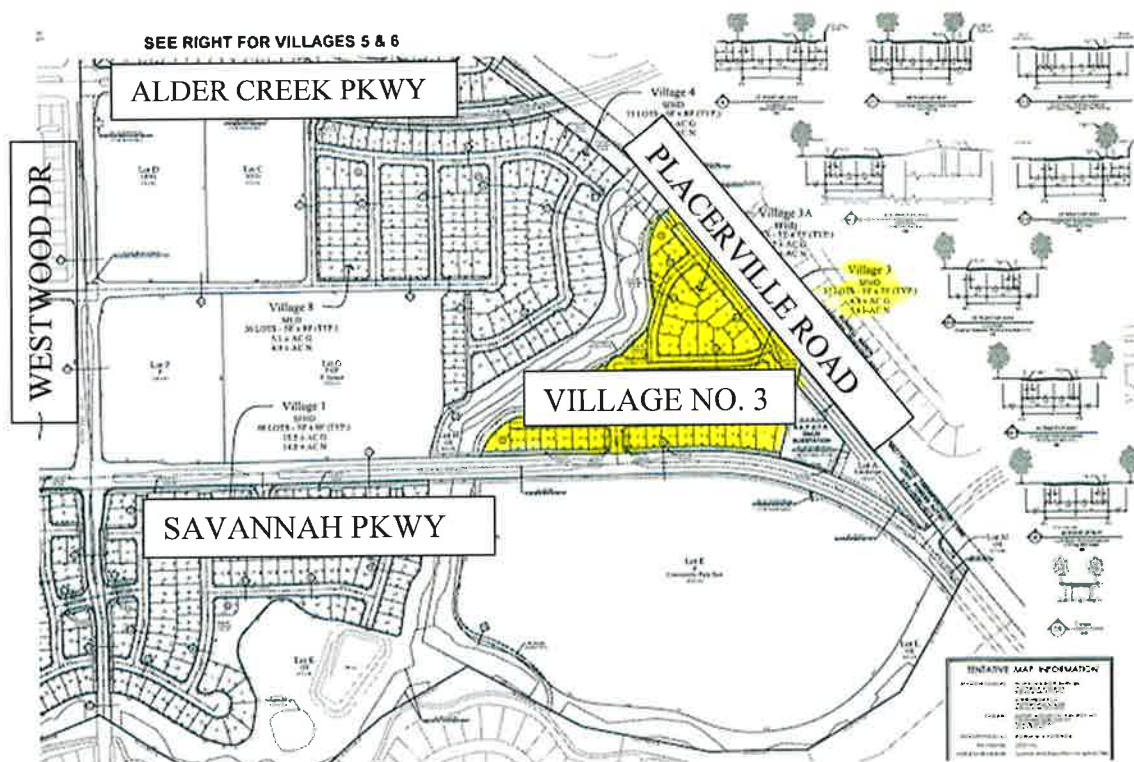

Staff recommends that the City Council move to adopt:

Resolution No. 10840 – A Resolution Authorizing the City Manager to Execute a Subdivision Improvement Agreement and Accept Offers of Dedication for the Mangini Ranch Phase 2 Village No. 3 Subdivision, and Approval of the Final Map for the Mangini Ranch Phase 2 Village No. 3 Subdivision.

BACKGROUND / ISSUE

The Vesting Tentative Subdivision Map (VTSM) for the Mangini Ranch Phase 2 Village No. 3 Subdivision was approved by the City Council on February 13, 2018.

The action for consideration by the City Council is the approval of the Final Map and Subdivision Improvement Agreement for the Mangini Ranch Phase 2 Village No. 3 Subdivision. The Final Map for the Mangini Ranch Phase 2 Village No. 3 Subdivision will create a total of 53 single-family high density (SFHD) residential lots. With the approval of the Final Map, the subdivision process for this project will be complete.

The Mangini Ranch Phase 2 Village No. 3 Subdivision is located on the north side of Savannah Parkway east of Westwood Drive and west of Placerville Road in the Folsom Plan Area (FPA) (see above).

POLICY / RULE

The Subdivision Map Act of the State of California and the City’s Subdivision Ordinance require that the City Council approve Final Maps and Subdivision Improvement Agreements.

ANALYSIS

The Final Map and conditions of approval for the Mangini Ranch Phase 2 Village No. 3 Subdivision have been reviewed by the Community Development Department and other City departments. The Final Map has been found to be in substantial compliance with the approved Vesting Tentative Subdivision Map, and all conditions pertaining to the map have been satisfied.

Attached is a table which includes the conditions of approval for the Mangini Ranch Phase 2 Village No. 3 Vesting Tentative Subdivision Map. The tables include information concerning when the condition is required to be satisfied (e.g. at Final Map, building permit, etc.), which City department is responsible to verify that it has been satisfied, and comments or an explanation on how the condition was satisfied. This subdivision is consistent with the Folsom Plan Area Specific Plan (FPASP) in regards to zoning and unit count.

ENVIRONMENTAL REVIEW

On February 13, 2018, the City Council approved the Mangini Ranch Phase 2 Vesting Tentative Subdivision Map and determined that the Mangini Ranch Phase 2 Subdivision project is entirely consistent with the Folsom Plan Area Specific Plan (FPASP) and Westland Eagle Specific Plan Amendment and therefore exempt from review under the California Environmental Quality Act (CEQA) provided by Government Code section 65457 and CEQA Guidelines sections 15182. No additional environmental review is required.

RESOLUTION NO. 10840 - A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SUBDIVISION IMPROVEMENT AGREEMENT AND ACCEPT OFFERS OF DEDICATION FOR THE MANGINI RANCH PHASE 2 VILLAGE NO. 3 SUBDIVISION, AND APPROVAL OF THE FINAL MAP FOR THE MANGINI RANCH PHASE 2 VILLAGE NO. 3 SUBDIVISION

RESOLUTION NO. 10840

A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SUBDIVISION IMPROVEMENT AGREEMENT AND ACCEPT OFFERS OF DEDICATION FOR THE MANGINI RANCH PHASE 2 VILLAGE NO. 3 SUBDIVISION, AND APPROVAL OF THE FINAL MAP FOR THE MANGINI RANCH PHASE 2 VILLAGE NO. 3 SUBDIVISION

WHEREAS, the Final Map for the Mangini Ranch Phase 2 Village No. 3 subdivision has been reviewed and approved by the City Engineer as complying with the approved or conditionally approved Vesting Tentative Subdivision Map for the subdivision; and

WHEREAS, the City Council has reviewed the Final Map for the Mangini Ranch Phase 2 Village No. 3 subdivision; and

WHEREAS, the City Council agrees to accept, subject to improvement, any and all offers of dedication as shown on the Final Map for the Mangini Ranch Phase 2 Village No. 3 subdivision.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Folsom that the Final Map for the Mangini Ranch Phase 2 Village No. 3 subdivision is hereby approved.

BE IT FURTHER RESOLVED that the City Manager is hereby authorized to execute the Subdivision Improvement Agreement with Beazer Home Holdings, L.L.C. in a form acceptable to the City Attorney and accept the offers of dedication for the Mangini Ranch Phase 2 Village No. 3 subdivision.

CITY OF FOLSOM

SUBDIVISION IMPROVEMENT AGREEMENT

This Agreement is made and entered into this _____ day of _____, 2022, by and between the City of Folsom, hereinafter referred to as "City", and Beazer Homes Holdings, L.L.C., a Delaware Limited Liability Company hereinafter referred to as "Subdivider".

RECITALS

- A. Subdivider has presented to the City a certain Final Map of a proposed subdivision of land located within the corporate limits of the City that has been prepared in accordance with the Subdivision Map Act of the State of California, the subdivision ordinances of the City, and the Tentative Subdivision Map, if any, of the subdivision previously approved by the City Council of the City.
- B. The proposed subdivision of land is commonly known and described as Mangini Ranch Phase 2 Village. No. 3, and is herein referred to as the "subdivision".
- C. Subdivider has requested approval of the Final Map prior to the construction and completion of the public improvements (as shown on the approved improvement plans and listed in Exhibit A), including, but not limited to streets, highways, public ways, sidewalks, curbs, gutters, bikeways, storm drainage facilities, sanitary sewer facilities, domestic water facilities, public utility facilities, landscaping, public lighting facilities, park or recreational improvements and appurtenances thereto, in or required by the Subdivision Map Act, the subdivision ordinances of the City, the Tentative Subdivision Map and development agreement, if any, approved by the City. The foregoing improvements, more specifically listed on Exhibit A attached hereto, are hereinafter referred to as "the required improvements".

D. City Council has required as a condition precedent to the approval of the Final Map, the Subdivider first enters into and executes this subdivision improvement agreement with the City.

NOW, THEREFORE, the parties agree as follows:

1. Performance of Work. Subdivider agrees to furnish, construct, and install at his own expense the required improvements as shown on the approved plans and specifications of the subdivision, a copy of which is on file in the Community Development Department, and is incorporated herein by reference, along with any changes or modifications as may be required by the City Engineer due to errors, omissions, changes in conditions, or changes in facilities as required by the City Engineer. The approved plans and specifications of the required improvements may be modified by the Subdivider as the development progresses, provided that any modification is approved in writing by the City Engineer. The total estimated cost of the required improvements, as shown on Exhibit A, is **ONE MILLION FIVE HUNDRED FIFTY-SIX THOUSAND ONE HUNDRED THIRTY-TWO AND 00/100 DOLLARS (\$1,556,132.00).**
2. Work; Satisfaction of City Engineer. All of the work on the required improvements is to be done at the places, of the materials, and in the manner and at the grades, all as shown upon the approved plans and specifications and as required by the City's Improvement Standards and Standard Construction Specifications and any applicable City ordinances or state and federal laws, and to the satisfaction of the City Engineer.
3. Work; Time for Commencement and Performance. Work on the required improvements shall be completed by the Subdivider on or before twelve (12) months from the date of this Agreement. At least fifteen (15) calendar days prior to the commencement of such work, the Subdivider shall notify the City Engineer in writing of the date fixed by Subdivider for commencement of the work.
4. Time of Essence; Extension.
 - a. Time is of the essence of this Agreement. The date for completion of the work of construction may not be extended, except as provided in Section 16.36.110 of the Folsom Municipal Code.
5. Improvement Security. Concurrently with the execution of this Agreement, the Subdivider shall furnish the City:
 - a. Improvement security in the sum of **ONE MILLION FIVE HUNDRED FIFTY-SIX THOUSAND ONE HUNDRED THIRTY-TWO AND 00/100 DOLLARS (\$1,556,132.00)**, which sum is equal to one hundred percent of the total estimated cost of constructing the required improvements and the cost of any other obligation to be performed by Subdivider under this Agreement, conditioned upon the faithful performance of this Agreement; and

- b. Separate improvement security in the sum of **ONE MILLION FIVE HUNDRED FIFTY-SIX THOUSAND ONE HUNDRED THIRTY-TWO AND 00/100 DOLLARS (\$1,556,132.00)**, which sum is equal to one hundred percent of the estimated cost of constructing the required improvements, securing payment to the contractor, subcontractor and to persons furnishing labor, materials, or equipment to them for the construction of the required improvements.
- c. The Subdivider shall deposit with the City **THREE THOUSAND AND NO/100 DOLLARS (\$3,000.00)** for the Final Map. The deposit may be used at the discretion of the City to correct deficiencies and conditions caused by the Subdivider, contractor, or subcontractors that may arise during or after the construction of the subdivision.
- d. The estimated total cost of required improvements includes a ten percent (10%) construction cost contingency, the cost of the installation of survey monuments in the Subdivision to guarantee and secure the placement of such monuments as provided by Section 66496 of the Government Code of the State of California, and an estimated utility cost in addition to ensure installation of public utilities. In lieu of providing the estimate of total utility costs, the Subdivider may submit, in a form acceptable to the City Engineer, certification from the utility companies that adequate security has been deposited to ensure installation.
6. Plan Checking and Inspection Fees. The Subdivider shall pay to the City fees for the checking, filing, and processing of improvement plans and specifications, and for inspecting the construction of the required improvements in the amounts and at the times established by the City.
7. Indemnification and Hold Harmless. The Subdivider shall indemnify, protect, defend, save and hold the City harmless from any and all claims or causes of action for death or injury to persons, or damage to property resulting from intentional or negligent acts, errors, or omissions of Subdivider or Subdivider's officers, employees, volunteers, and agents during performance of this Agreement, or in connection with Subdivider's work, or from any violation of any federal, state, or municipal law or ordinance, to the extent caused, in whole or in part, by the willful misconduct, negligent acts, or omissions of Subdivider or its employees, subcontractors, or agents, or by the quality or character of Subdivider's work. It is understood that the duty of Subdivider to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Subdivider from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply, and shall further survive the expiration or termination of this Agreement. By execution of this Agreement, Subdivider acknowledges and agrees to the provisions of this Section and that it is a material element of consideration. Subdivider shall, at his own cost and expense, defend any and all actions, suits, or legal proceedings that may be brought or instituted against the City, its officers and employees, on any such claim or demand, and pay or satisfy any judgement that may be

rendered against the City in any such actions, suits or legal proceedings, or result thereof.

8. Insurance. Subdivider and any contractors hired by Subdivider to perform any of the Required Improvements shall, at their expense, maintain in effect for the duration of this Agreement or until the required improvements are accepted by the City, whichever first occurs, not less than the following coverage and limits of insurance, which shall be maintained with insurers and under forms of policy satisfactory to the City. The maintenance by Subdivider and its contractors of the following coverage and limits of insurance is a material element of this Agreement. The failure of Subdivider or any of its contractors to maintain or renew coverage or to provide evidence of renewal may be treated by the City as a material breach of this Agreement.

a. Minimum Limits of Insurance. Subdivider shall maintain limits not less than:

- 1. Comprehensive General Liability: \$1,000,000 combined single limit per occurrence for bodily injury, personal injury and property damage.
- 2. Automobile Liability: \$1,000,000 combined single limit per accident for bodily injury, personal injury and property damage.
- 3. Worker’s Compensation and Employers Liability: Worker’s Compensation limits as required by the Labor Code of the State of California and Employers Liability limits of \$1,000,000 per accident.

b. Deductibles and Self-Insured Retentions. Any deductibles or self-insured retentions shall be declared to and approved by the City. At the option of the City, either: the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects to a bond guaranteeing payment of losses and related investigations, claim administration and defense expenses.

c. Other Insurance Provisions. The policies are to contain, or be endorsed to contain, the following provisions:

1. General Liability and Automobile Liability Coverages

- A. The City, its officers, officials, employees and volunteers are to be covered as insureds as respects: liability arising out of activities performed by or on behalf of the Subdivider; products and completed operations of the Subdivider; premises owned, leased or used by the Subdivider; or automobiles owned, leased, hired or borrowed by the Subdivider. The coverage shall contain no special limitations on the scope of protection afforded to the City, its officers, officials, employees or volunteers.
- B. The Subdivider’s insurance coverage shall be primary insurance

as respects the City, its officers, officials, employees and volunteers. Any insurance of self-insurance maintained by the City, its officials, employees or volunteers shall be excess of the Subdivider's insurance and shall not contribute with it.

- C. Any failure to comply with reporting provisions of the policies shall not affect coverage provided to the City, its officers, officials, employees or volunteers.
 - D. The Subdivider's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.
2. Worker's Compensation and Employers Liability Coverage. The insurer shall agree to waive all rights or subrogation against the City, its officers, officials, employees and volunteers for losses arising from work performed by Subdivider for the City.
 3. All Coverages. Each insurance policy required by this clause shall be endorsed to state that coverage shall not be suspended, voided or cancelled by either party, reduced in coverage or in limits except after thirty (30) days prior written notice by certified mail, return receipt requested, has been given to the City.
- d. Acceptability of Insurers. Insurance is to be placed with insurers with a Best's rating of not less than A: VII.
 - e. Verification of Coverage. Concurrently with the execution of this Agreement, the Subdivider shall furnish the City with original endorsements affecting coverage required by this clause. The endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The City reserves the right to require complete, certified copies of all required insurance policies at any time.
9. Title to Improvements. Title to and ownership of the required public improvements constructed under this Agreement by Subdivider shall vest absolutely in the City upon completion and written acceptance of such improvements by the City Engineer. The City Engineer shall not accept the required improvements unless Subdivider certifies that such improvements have been constructed in conformity with the approved plans and specifications, approved modifications, if any, the approved Final Map, City Improvement Standards and Standard Construction Specifications, any applicable City Ordinances or State and Federal laws and after 35 days from the date of filing of a Notice of Completion.
 10. Warranty Security. Prior to acceptance of the required improvements by the City Engineer, the Subdivider shall provide security in the amount and in the form as required by the City Engineer to guarantee the improvements against any defective work or labor done or defective materials used in the performance of the required improvements (Warranty Security) throughout the warranty security period which shall be the period of one year following

completion and written acceptance of the improvements (Warranty Security Period). The amount of the Warranty Security shall not be less than 10 percent of the cost of the construction of the improvements, including the cash deposit required in paragraph 5C of this agreement, which shall be retained for the Warranty Security Period.

11. Repair or Reconstruction of Defective Work or Materials. If, within the Warranty Security Period or the applicable statute of limitations, whichever is longer, any improvement or part of any improvement furnished and/or installed or constructed by Subdivider or any of the work done under this Agreement fails to fulfill any of the requirements of the Agreement or the specifications referred to herein as determined by the City, Subdivider shall without delay and without any cost to the City, repair, replace, or reconstruct any defective or otherwise unsatisfactory part or parts of the required improvements. If the Subdivider fails to act promptly or in accordance with this requirement, or if the exigencies of the situation require repairs or replacements to be made before the Subdivider can be notified, then the City may, at its option, make the necessary repairs or replacements or perform the necessary work, and Subdivider shall pay to City the actual cost of such repairs plus fifteen percent (15%) within thirty (30) days of the date of billing for such work by City. The parties further understand and agree that the Warranty Security furnished pursuant to paragraph 10 of this Agreement shall guarantee and secure the faithful performance and payment of the provisions of this paragraph during the Warranty Security Period.
12. Subdivider Not Agent of City. Neither Subdivider nor any of Subdivider's agents or contractors are or shall be considered to be agents of City in connection with the performance of Subdivider's obligations under this Agreement.
13. Notice of Breach and Default. If Subdivider refuses or fails to prosecute the work, or any part thereof, with such diligence as will ensure its completion within the time specified, or any extension thereof, or fails to complete the work within such time, or if Subdivider should be adjudged a bankruptcy, or Subdivider should make a general assignment for the benefit of his creditors, or if a receiver should be appointed in the event of Subdivider's insolvency, or if Subdivider or any of Subdivider's contractors, subcontractors, agents or employees should violate any of the provisions of this Agreement and the City may, but is under no obligation to, serve written notice upon Subdivider and Subdivider's surety, if any, of breach of this Agreement, or of any portion thereof.
14. Breach of Agreement; Performance By Surety or City. In the event of any such notice, Subdivider's surety, if any, shall have the duty to take over and complete the work and the required improvements; provided, however, that if the surety within fifteen (15) days after the serving of such notice of breach upon it does not give the City written notice of its intention to take over the performance thereof within fifteen (15) days after notice to the City of such election, then the City may take over the work and prosecute the same to completion by contract, or by any other method the City may deem advisable, for the account and at the expense of the Subdivider, and the Subdivider's surety shall be liable to City for any excess costs of damages incurred by the City; and in such event, the City, without liability for so doing, may take possession of and utilize in completing the work, such materials, appliances, plant or other property belonging to Subdivider as may be on the site of the work and necessary therefor.

If the form of improvement security is other than a bond, then the City, after giving notice of breach of the Agreement, may proceed to collect against the improvement security in the manner provided by law and by the terms of the security instrument.

- 15. Notices. All notices required under this Agreement shall be in writing, and delivered in person or sent by registered or certified mail, postage prepaid.

Notices required to be given to City shall be addressed as follows:

**City of Folsom
Community Development Department
50 Natoma Street
Folsom, CA 95630
ATTN: City Engineer**

Notices required to be given to Subdivider shall be addressed as follows:

**Beazer Homes Holdings, L.L.C.
12317 Edyth Lake Way
Rancho Cordova, CA 95742
ATTN; Lucas C. Wissmann, President & Taylor R. Bollinger, VP**

Notices required to be given surety, if any, of Subdivider shall be addressed as follows:

Any party of the surety may change such address by notice in writing to the other party and thereafter notices shall be addressed and transmitted to the new address.

- 16. Attorney's Fees. In the event any legal action is brought to enforce or interpret this Agreement, the prevailing party shall be entitled to an award of reasonable attorney's fees, in addition to any other relief to which he may be entitled.
- 17. Assignment. This Agreement shall bind and inure to the benefit of the assigns, successors in interest, heirs, executors, and administrators of the parties, and the parties agree that the City may cause a copy of this Agreement to be recorded in the Sacramento County Recorder's Office.

IN WITNESS WHEREOF, the parties have executed this Agreement as follows:

for
Subdivision Improvement Agreement

WHEREAS, The City Council of the City of Folsom, a Municipal Corporation in the State of California, and **Beazer Home Holdings, L.L.C., a Delaware Limited Liability Company**, (hereinafter designated as “Principal”) have entered into an agreement where by principal agrees to install and complete certain designated public improvements, which said agreement, dated _____ 2022, and identified as the **Mangini Ranch Phase 2 Village No. 3 Subdivision Improvement Agreement** is hereby referred to and made a part hereof; and,

WHEREAS, Said Principal is required under the terms of said agreement to furnish a bond for the faithful performance of said agreement;

NOW THEREFORE, We, the principal, and _____, as surety, are held and firmly bound unto the City of Folsom, hereinafter referred to as the City; in the penal sum of **ONE MILLION FIVE HUNDRED FIFTY-SIX THOUSAND ONE HUNDRED THIRTY-TWO AND 00/100 DOLLARS (\$1,556,132.00)**, lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, successors, executors, and administrators, jointly and severally firmly by these presents.

The condition of this obligation is such that if the above bounded principal, its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions, and provisions in the said agreement and any alteration thereof made as therein provided, on its part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the City, its officers, agents, and employees, as therein stipulated, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect.

As a part of the obligation secured hereby and in addition to the face amount specified therefor, there shall be included costs and reasonable expenses and fees, including reasonable attorney’s fees, incurred by City in successful enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

The surety hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the agreement or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the agreement or to the work or to the specifications.

IN WITNESS WHEREOF, this instrument has been duly executed by the principal and surety above named, on _____, 2022.

LABOR & MATERIALS BOND
for
Subdivision Improvement Agreement

WHEREAS, The City Council of the City of Folsom, a Municipal Corporation of the State of California, and **Beazer Home Holdings, L.L.C., a Delaware Limited Liability Company** (hereinafter designated as "Principal"), have entered into an agreement whereby principal agrees to install and complete certain designated public improvements, which said agreement, dated _____ 2022, and identified as the **Mangini Ranch Phase 2 Village No. 3 Subdivision Improvement Agreement** is hereby referred to and made a part hereof; and,

WHEREAS, under the terms of said agreement, principal is required before entering upon the performance of the work, to file a good and sufficient payment bond with the City of Folsom to secure the claims to which reference is made in Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code of the State of California;

NOW THEREFORE, said principal and the undersigned as corporate surety, are held firmly bound unto the City of Folsom and all contractors, subcontractors, laborers, materialmen and other persons employed in the performance of the aforesaid agreement and referred to in the aforesaid Code of Civil Procedure, in the sum of **ONE MILLION FIVE HUNDRED FIFTY-SIX THOUSAND ONE HUNDRED THIRTY-TWO AND 00/100 DOLLARS (\$1,556,132.00)** for materials furnished or labor thereon of any kind, or for amounts due under the Unemployment Insurance Act with respect to such work or labor, that said surety will pay the same in an amount not exceeding the amount hereinabove set forth, and also in case suit is brought upon this bond, will pay, in addition to the face amount thereof, cost and reasonable expenses and fees, including reasonable attorney's fees, incurred by City in successfully enforcing such obligation, to be awarded and fixed by the court, and to be taxed as costs and to be included in the judgment therein rendered.

It is hereby expressly stipulated and agreed that this bond shall inure to the benefit of any and all persona, companies and corporations entitled to file claims under Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code, so as to give a right of action to them or their assigns in any suit brought upon this bond.

Should the condition of this bond be fully performed, then this obligation shall become null and void, otherwise it shall be and remain in full force and effect.

The surety hereby stipulates and agrees that no change, extension of time, alteration, or addition to the terms of said agreement or the specifications accompanying the same shall in any manner affect its obligations on this bond, and it does hereby waive notice of any such change, extension, alteration, or addition.

IN WITNESS WHEREOF, this instrument has been duly executed by the principal and surety above named, on _____, 2022.

Vicinity Map 3. Illustrative Master Plan Exhibit, dated December 15, 2017 4. Large-Lot Vesting Tentative Subdivision Map, dated December 15, 2017 5. Small-Lot Vesting Tentative Subdivision Map, dated December 15, 2017 6. Preliminary Grading and Drainage Plan, dated December 15, 2017 7. Preliminary Utility Plan, dated December 15, 2017 8. Conceptual Phasing Plan, dated December 15, 2017 9. On-Site Infrastructure Phasing Exhibit, dated December 15, 2017 10. On-Site Infrastructure Phasing Narrative, dated December 14, 2017 11. Preliminary Phased Off-Site Utility Plan, dated September, 2017 12. Off-Site Infrastructure Triggers, dated December, 2017 13. Interim Off-Site Intersection Design, dated December 15, 2017 14. Trail System Modification Exhibit, dated December 15, 2017 15. Noise Mitigation Exhibit and Conceptual Wall and Fencing Exhibit, dated December 15, 2017 16. Inclusionary Housing Plan, dated September 26, 2017 17. Parks and Open Space Ownership/Maintenance Summary, dated December 14, 2017 18. Minor Administrative Modification Exhibits 19. Folsom Ranch Central District Guidelines Addendum, dated December, 2017 <p>The Small-Lot Vesting Tentative Subdivision Map is approved for the development of a 545-unit residential subdivision (Mangini Ranch Phase 2 Subdivision). Implementation of the project shall be consistent with the above referenced items and these conditions of approval.</p>	G, I, M, B	CD (P)(E)	<p>The Community Development Department has reviewed and approved the improvement plans and the final map for the project. The approved improvement plans are in substantial compliance with the grading and drainage plans, the site and utility plans, offsite infrastructure exhibit, the preliminary landscape plans and the design guidelines.</p> <p>The final map for Village 3 is in substantial compliance with the approved Vesting Tentative Subdivision Map.</p> <p>The Vesting Tentative Subdivision Map (PN17-307) was approved by the City Council on February 13, 2018. (Resolution No. 10069)</p>	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
2.	Plan Submittal All civil engineering, improvement, and landscape and irrigation plans, shall be submitted to the Community Development Department for review and approval to ensure conformance with this approval and with relevant codes, policies, standards and other requirements of the City of Folsom.	G, I, M,	CD (P)(E)(B)	Improvement plans for the Village 3 subdivision have been reviewed and approved by the Community Development Department. Grading and construction commenced in this subdivision in the Spring of 2022. Landscape and Irrigation plans for this subdivision reviewed and approved prior to the first building permit issuance in the subdivision.	Yes
3.	Validity This approval of the Vesting Small Lot Tentative Subdivision Map shall be valid for a period of twenty-four months pursuant to Section 16.16.110A of the Folsom Municipal Code and the Subdivision Map Act. The term of the approved Inclusionary Housing Plan shall track the term of the Vesting Small Lot Tentative Subdivision Map, as may be extended from time to time pursuant to Section 16.16.110.A and 16.16.120 of the Folsom Municipal Code and the Subdivision Map Act. The term of the Project Design Guidelines shall track the term of the First Amended and Restated Tier 1 Development Agreement.	OG	CD (P)	The City Council approved the Small Lot Vesting Tentative Map on February 13, 2018. (Resolution No. 10069)	Yes
4.	Vesting Tentative Subdivision Map Approval The Vesting Tentative Subdivision Map for the Mangini Ranch Phase 2 Subdivision project shall be subject to review and approval by the City Council.	M	CD (P)(E)	The Owner/applicant has complied with all applicable mitigation measures from the FEIR/EIS prior to the issuance of a grading permit. Additionally, construction inspection and monitoring is being conducted throughout construction by the City and/or its Consultants.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
5.	<p>Improvements in the PFFP</p> <p>The owner/applicant shall be subject to all thresholds, timelines and deadlines for the construction and final completion of various improvements for the entire Folsom Plan Area. The various improvements are outlined and detailed in the Folsom Plan Area Specific Plan Public Facilities Financing Plan (PFFP) dated January 28, 2014 and adopted by City of Folsom Resolution No. 9298. These improvements in the PFFP include, but are not limited to, the backbone infrastructure water (water reservoirs, water transmission mains, booster pump stations, pressure reducing valve stations, etc.), sanitary sewer (lift stations and forced mains) systems, recycled water mains and associated infrastructure, roadway and transportation (future interchanges, major arterial roadways, etc.) improvements, aquatic center (community pool), parks, fire stations, municipal services center, community library, etc The thresholds and timelines included in the PFFP require facilities to be constructed and completed based on number of building permits issued and in some cases, number of residential units that are occupied. The owner/applicant shall be required to address these thresholds and timelines as the project moves forward through the various developments stages and shall be subject to the various fair share requirements, subject to the provisions of the PFFP, the ARDA and any amendment thereto.</p>	M	CD(E)(P)(B), PW, FD, EWR, PR	The owner/applicant is in compliance with all plan area wide obligations. These conditions of approval require certain improvements during buildout of this Tentative Map. The owner/applicant has been required to construct these improvements as needed and in conjunction with the other subdivisions under development. Grading and construction in this subdivision commenced in the Spring of 2020.	Yes
6.	<p>Street Names</p> <p>The street names identified below shall be used for the Final Small-Lot Map: Savannah Parkway, Alder Creek Parkway, Westwood Drive, Dandelion Lane, Golden Wave Drive, Gardner Street, Persimmon Way, Sassafras Trail, Hackberry Lane, Arbor View Drive, Emerald Knoll Lane, Copper Ridge Drive, Field View Trail, Eagle Ridge Lane, Spice Wood Court, Willow Grove Street, Cimarron Trail, Vista Grande Drive, Sienna Bluff Trail, Lilac Circle, Butterfly Ridge, Spring Harvest Trail, Barnwood Drive, Barn Owl Drive, Triple Creek Way, Crooked Bed Trail, Deer Point Court, Blacktail Way, Willowick Lane, Shadow Creek Circle, Dragonfly Way, Old Ranch Road, Whispering Brook Way, Shakers Ridge Way, Quakie Glen Drive, Shale Rock Court, Wind River Range Lane, Owl Creek Drive, Drowsy Water Way, Cackleberry Court, Quail Meadow Way, Tall Oaks Bend, Stone View Trail, Snapdragon Lane, Timberline Meadow Way, Trails End, Broken Oak Lane, Bitterroot Lane.</p>	M	CD (E)(P)	The Final Map for Village 3 includes street names chosen from the approved list in this condition.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
7.	<p>Indemnity for City</p> <p>The owner/applicant shall protect, defend, indemnify, and hold harmless the City and its agents, officers and employees from any claim, action or proceeding against the City or its agents, officers or employees to attack, set aside, void, or annul any approval by the City or any of its agencies, departments, commissions, agents, officers, employees, or legislative body concerning the project, which claim, action or proceeding is brought within the time period provided therefore in Government Code Section 66499.37 or other applicable statutes of limitation. The City will promptly notify the owner/applicant of any such claim, action or proceeding, and will cooperate fully in the defense. If the City should fail to cooperate fully in the defense, the owner owner/applicant shall not thereafter be responsible to defend, indemnify and hold harmless the City or its agents, officers, and employees, pursuant to this condition. The City may, within its unlimited discretion, participate in the defense of any such claim, action or proceeding if both of the following occur:</p> <ul style="list-style-type: none"> • The City bears its own attorney's fees and costs; and • The City defends the claim, action or proceeding in good faith <p>The owner/applicant shall not be required to pay or perform any settlement of such claim, action or proceeding unless the settlement is approved by the owner/applicant. The owner/applicant's obligations under this condition shall apply regardless of whether a Final Map is ultimately recorded with respect to this project.</p>	OG	CD (P)(E)(B) PW, PR, FD, PD	The City standard subdivision improvement agreement includes language that satisfies this condition. The subdivision improvement agreement will be executed by the City Manager upon approval by the City Council.	Yes
8.	<p>Small-Lot Vesting Tentative Subdivision Map</p> <p>The Small-Lot Vesting Tentative Subdivision map is expressly conditioned upon compliance with all environmental mitigation measures in the Folsom Plan Area Specific Plan (FEIR/EIS) as amended by the Westland/Eagle Specific Plan Amendment CEQA Addendum, and the Folsom South of U.S. Highway 50 Specific Plan Revised Proposed Off-Site Water Facility Alternative CEQA Addendum as well as compliance with the mitigation measures in the South of U.S. Highway 50 Backbone Infrastructure Project Mitigated Negative Declaration for those portions of Mangini Ranch Phase 2 that are included as part of the South of U.S. Highway 50 Backbone Infrastructure Project.</p>	OG	CD	The Owner/applicant has complied with all applicable mitigation measures from the FEIR/EIS prior to the issuance of a grading permit for this subdivision in the Spring of 2022. Additionally, construction inspection and monitoring is conducted throughout construction by the City and/or its Consultants to verify compliance.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
9.	ARDA and Amendments The owner/applicant shall comply with all provisions of Amendments No. 1 and 2 to the First Amended and Restated Tier 1 Development Agreement and any approved amendments thereafter by and between the City and the owner/applicant of the project.	G, I, M, B	CD (E)	The owner/applicant has complied with all applicable provisions of the respective Amended and Restated Tier 1 Development Agreement.	Yes
10.	Mitigation Monitoring The owner/applicant shall participate in a mitigation monitoring and reporting program pursuant to City Council Resolution No. 2634 and Public Resources Code 21081.6. The mitigation monitoring and reporting measures identified in the Folsom Plan Area Specific Plan FEIR/EIS, the South of 50 Backbone Infrastructure Project MND, the Westland/Eagle Specific Plan Amendment to the FPASP and Addendum to the FPASP EIR/EIS, and the Folsom South of U.S. Highway 50 Specific Plan Project Revised Proposed Off-Site Water Facility Alternative Amendment to the FPASP and Addendum to the FPASP EIR/EIS have been incorporated into these conditions of approval in order to mitigate or avoid significant effects on the environment. These mitigation monitoring and reporting measures are identified in the mitigation measure column. Applicant shall fund on a Time and Materials basis all mitigation monitoring (e.g., staff and consultant time).	OG	CD (P)	The owner has funded and participated in a MMRP reporting program performed by the City's consultant (Helix) and/or staff throughout the course of grading and construction.	Yes
POLICE/SECURITY REQUIREMENT					
11.	The owner/applicant shall consult with the Police Department in order to incorporate all reasonable crime prevention measures. The following security/safety measures shall be considered: <ul style="list-style-type: none"> • A security guard on-duty at all times at the site or a six-foot security fence shall be constructed around the perimeter of construction areas. • Security measures for the safety of all construction equipment and unit appliances. • Landscaping shall not cover exterior doors or windows, block line-of-sight at intersections or screen overhead lighting. 	G, I, B	PD	The owner provided onsite security during construction and has incorporated line of sight guidelines into landscaping plans at intersections	Yes
DEVELOPMENT COSTS AND FEE REQUIREMENTS					
12.	Taxes and Fees The owner/applicant shall pay all applicable taxes, fees and charges for the project at the rate and amount required by the Public Facilities Financing Plan and Amendment No. 1 to the Amended and Restated Tier 1 Development Agreement.	OG	CD (P)(E)	The owner has paid all current taxes and fees associated with this subdivision.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
13.	Assessments If applicable, the owner/applicant shall pay off any existing assessments against the property, or file necessary segregation request and pay applicable fees.	OG	CD (E)	The owner has paid all taxes and fees associated with this subdivision and filed a tax segregation request for applicable taxes.	Yes
14.	FPASP Development Impact Fees The owner/applicant shall be subject to all Folsom Plan Area Specific Plan Area development impact fees in place at the time of approval or subsequently adopted consistent with the Public Facilities Financing Plan (PFFP), Development Agreement and amendments thereto, unless exempt by previous agreement. The owner/applicant shall be subject to all applicable Folsom Plan Area plan-wide development impact fees in effect at such time that a building permit is issued. These fees may include, but are not limited to, the Folsom Plan Area Specific Plan Fee, Specific Plan Infrastructure Fee (SPIF), Solid Waste Fee, Corporation Yard Fee, Transportation Management Fee, Transit Fee, Highway 50 Interchange Fee, General Park Equipment Fee, Housing Trust Fee, etc. Any protest to such for all fees, dedications, reservations or other exactions imposed on this project will begin on the date of final approval (February 13, 2018), or otherwise shall be governed by the terms of Amendments No. 1 and 2 to ARDA. The fees shall be calculated at the fee rate set forth in the PFFP and the ARDA.	B	CD (P), PW, PK	The Owner/Applicant shall pay all required City fees and Plan Area wide fees prior to issuance of building permits.	Yes
15.	Legal Counsel The City, at its sole discretion, may utilize the services of outside legal counsel to assist in the implementation of this project, including, but not limited to, drafting, reviewing and/or revising agreements and/or other documentation for the project. If the City utilizes the services of such outside legal counsel, the City shall provide notice to the owner/applicant of the outside counsel selected, the scope of work and hourly rates, and the owner/applicant shall reimburse the City for all outside legal fees and costs incurred and documented by the City for such services. The owner/applicant may be required, at the sole discretion of the City Attorney, to submit a deposit to the City for these services prior to initiation of the services. The owner/applicant shall be responsible for reimbursement to the City for the services regardless of whether a deposit is required.	OG	CD (P)(E)	The City has not yet utilized any outside services for any type of legal issues for this subdivision. If at any time during the development of this subdivision, any outside legal services were necessary, the owner/applicant would be required to conform to this condition.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
16.	<i>Consultant Services</i> If the City utilizes the services of consultants to prepare special studies or provide specialized design review or inspection services for the project, the City shall provide notice to the owner/applicant of the outside consultant selected, the scope of work and hourly rates, and the owner/applicant shall reimburse the City for actual costs incurred and documented in utilizing these services, including administrative costs for City personnel. A deposit for these services shall be provided prior to initiating review of the Grading Plan, Final Map, improvement plans, or beginning inspection, whichever is applicable.	G, I, M, B	CD (P)(E)	The City has provided notice to the owner/applicant for various Consultants performing services for the development of this subdivision. The City has collected deposits from the owner/applicant in advance of such work for these services.	Yes
17.	<i>Walls/Fences/Gates</i> The final location, design, height, materials, and colors of the walls, fences, and gates shall be subject to review and approval by the Community Development Department to ensure consistency with the Folsom Ranch Central District Design Guidelines.	B	CD (P)(E)	The owner/applicant will submit landscape and streetscape plans to the Community Development Department. The Community Development Department will verify that the landscape and streetscape plans include the required wall, fences and gates and that these improvements are in compliance with the Folsom Ranch Central District Design Guidelines.	Condition will be satisfied prior to building permit issuance in the subdivision.

21.	Off-site improvements / Rights of Entry For any improvements constructed on private property that are not under the ownership or control of the owner/applicant, all rights-of-entry, and if necessary, a permanent easement shall be obtained and provided to the City. All rights of entry, construction easements, either permanent or temporary and other easements shall be obtained as set forth in Amendments No. 1 and 2 to ARDA, which shall be fully executed by all affected parties and shall be recorded with the Sacramento County Recorder, where applicable, prior to approval of grading and/or improvement plans.	G	CD (E)	The owner/applicant obtained all Rights of Entry, construction easements and grant deeds for all off-site improvements prior to commencement of grading. All rights-of-entry are on file with the Community Development Department.	Yes
22.	Mine Shaft Remediation The owner/applicant shall locate and remediate all antiquated mine shafts, drifts, open cuts, tunnels, and water conveyance or impoundment structures existing on the project site, with specific recommendations for the sealing, filling, or removal of each that meet all applicable health, safety and engineering standards. Recommendations shall be prepared by an appropriately licensed engineer or geologist. All remedial plans shall be reviewed and approved by the City prior to approval of grading plans.	G	CD (E)	During the course of grading and construction for this subdivision no mine shafts or tunnels were located or discovered.	Yes
23.	Prepare Traffic Control Plan. Prior to construction, a Traffic Control Plan for roadways and intersections affected by construction shall be prepared. The Traffic Control Plan shall designate haul routes and comply with requirements in the encroachment permits issued by the City of Rancho Cordova, Sacramento County, and Caltrans and any other local agencies, including but not limited to the City, if applicable. The Traffic Control Plan to be prepared by the project construction contractor(s) shall, at minimum, include the following measures: <ul style="list-style-type: none"> • Maintaining the maximum amount of travel lane capacity during non-construction periods, possible, and advanced notice to drivers through the provision of construction signage. • Maintaining alternate one-way traffic flow past the lay down area and site access when feasible. • Heavy trucks and other construction transport vehicles shall avoid the busiest commute hours (7 a.m. to 8 a.m. and 5 p.m. to 6 p.m. on weekdays). • A minimum 72-hour advance notice of access restrictions for residents, businesses, and local emergency response agencies. This shall include the identification of alternative routes and detours to enable for the avoidance of the immediate construction zone. • A phone number and community contact for inquiries about the schedule of the construction throughout the construction period. This information will be posted in a local newspaper, via the City's web site, or at City Hall and will be updated on a monthly basis. 	G	CD (E)	The owner/applicant has jointly participated with the adjacent property owner (Enclave at Folsom Ranch) for the traffic control, planning and construction of roadway improvements to East Bidwell Street, Alder Creek Parkway, Savannah Parkway and Placerville Road. The improvements to Alder Creek Parkway, East Bidwell Street, Savannah Parkway, Old Ranch Way and Westwood Drive are expected to be completed in the Spring of 2022.	Yes

33.	Future Utility Lines All future utility lines lower than 69 KV that are to be built within the project, shall be placed underground within and along the perimeter of the project at the developer's cost. The owner/applicant shall dedicate to SMUD all necessary underground easements for the electrical facilities that will be necessary to service development of the project.	B	CD (E)	All utility lines below 69 kV have been designed to be placed underground and Public Utility Easements have been dedicated on the final map for this subdivision.	Yes
34.	Water Meter Fixed Network System The owner owner/applicant shall pay for, furnish and install all infrastructure associated with the water meter fixed network system for any City-owned and maintained water meter within the project.	I	CD (E), EWR	The Owner/applicant has completed the infrastructure allowing for the water meter fixed network system. Meters will be furnished and installed during home construction for each individual metered connection.	Yes
35.	Vertical Curb All curbs located adjacent to landscaping, whether natural or manicured, and where parking is allowed shall be vertical.	I	CD (P)(B)	The improvement plans for the subdivision improvements and backbone roadways provide vertical curbing as required.	Yes
36.	Class II Bike Lanes All Class II bike lanes shall be striped and the legends painted green. No parking shall be permitted within the Class II bike lanes.	I	CD (E)(P)	All Class II bike lanes have been constructed in accordance with the Specific Plan, Design Guidelines and City Standards and Specifications.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
37.	<p>Noise Barriers Based on the Environmental Noise Assessment prepared by Bollard Acoustical Consultants on August 23, 2017, the following measures shall be implemented to the satisfaction of the Community Development Department:</p> <ul style="list-style-type: none"> • Solid noise barriers or similar natural features (earthen berm, etc.) shall be required to reduce future traffic noise levels to below the City of Folsom exterior criteria of 60 dB Ldn at the proposed residential backyards. Barrier heights are specified relative to backyard elevations. The following barrier heights and locations are required to the satisfaction of the Community Development Department (see Figure 2 in the August 23, 2017 Assessment): <ul style="list-style-type: none"> ○ 6-foot noise barrier at residences adjacent to Highway 50 ○ 10-foot noise barrier at residences adjacent to East Bidwell Street ○ 7-foot noise barrier at residences adjacent to Alder Creek Parkway ○ 6-foot noise barrier at residences adjacent to Savannah Parkway • Suitable materials for the traffic noise barriers shall include masonry and precast concrete panels. Other materials may be acceptable but shall be reviewed by an acoustical consultant prior to use. The final design, materials, and colors of the barriers shall be to the satisfaction of the Community Development Department. • Mechanical ventilation (air conditioning) shall be provided for all residences within the Mangini Ranch Phase 2 Subdivision to allow the occupants to close doors and windows as desired to achieve compliance with the applicable interior noise level criteria. • All second-floor windows of residences located adjacent to East Bidwell Street from which the roadway is visible shall have a minimum STC rating of 32. Figure 2 of the Noise Assessment shows the specific lots where upgrades are required. • All second-floor windows of residences located adjacent to Alder Creek Parkway from which the roadway is visible shall have a minimum STC rating of 30. Figure 2 of the Noise Assessment shows the specific lots where upgrades are required. 	I	CD (E)(P)	The owner/applicant has designed the subdivision and sound walls along Savannah Parkway in accordance with these conditions. The sound walls in the required location and height will be constructed as part of the improvements for this subdivision.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
38.	<p><i>Master Plan Updates</i> The City has approved the Folsom Plan Area Storm Drainage Master Plan, Wastewater Master Plan, and Water Master Plan. The owner/applicant shall submit complete updates to the approved master plans, if applicable, for the proposed changes to the master plans as a result of the proposed project. The updates to the master plans for the proposed project shall be reviewed and approved by the City prior to approval of grading and/or improvement plans.</p> <p>The plans shall be accompanied by engineering studies supporting the sizing, location, and timing of the proposed facilities. Improvements shall be constructed in phases as the project develops in accordance with the approved master plans, including any necessary off-site improvements to support development of a particular phase or phases, subject to prior approval by the City. Off-site improvements may include roadways to provide secondary access, water transmission lines or distribution facilities to provide a looped water system, sewer trunk mains and lift stations, water quality facilities, non-potable water pipelines and infrastructure, and drainage facilities including on or off-site detention. No changes in infrastructure from that shown on the approved master plan shall be permitted unless and until the applicable master plan has been revised and approved by the City. Final lot configurations may need to be modified to accommodate the improvements identified in these studies to the satisfaction of the City.</p> <p>The owner/applicant shall provide sanitary sewer, water and storm drainage improvements with corresponding easements, as necessary, in accordance with these studies and the latest edition of the City of Folsom <u><i>Standard Construction Specifications and Details</i></u>, and the <u><i>Design and Procedures Manual and Improvement Standards</i></u>.</p> <p>The storm drainage design shall provide for no net increase in run-off under post-development conditions.</p>	G, I	CD(E), EWR, PW	The owner/applicant has provided updated Master Plans for approval prior to the issuance of a grading permit. Copies of the Master Plans are available from the Community Development Department.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP					
Condition No.	Condition of Approval	When Required	Responsible Department	Comments	Condition Satisfied?
39.	<p>Best Management Practices</p> <p>The storm drain improvement plans shall provide for “Best Management Practices” that meet the requirements of the water quality standards of the City’s National Pollutant Discharge Elimination System Permit issued by the State Regional Water Quality Control Board.</p> <p>In addition to compliance with City ordinances, the owner/applicant shall prepare a Stormwater Pollution Prevention Plan (SWPPP), and implement Best Management Practices (BMPs) that comply with the General Construction Stormwater Permit from the Central Valley RWQCB, to reduce water quality effects during construction. Detailed information about the SWPPP and BMPs are provided in Chapter 3A.9, “Hydrology and Water Quality.”</p> <p>Each proposed project development shall result in no net change to peak flows into Alder Creek and associated tributaries, or to Buffalo Creek, Carson Creek, and Coyote Creek. The owner/applicant shall establish a baseline of conditions for drainage on-site. The baseline-flow conditions shall be established for 2-, 5-, and 100-year storm events. These baseline conditions shall be used to develop monitoring standards for the stormwater system on the Specific Plan Area. The baseline conditions, monitoring standards, and a monitoring program shall be submitted to USACE and the City for their approval. Water quality and detention basins shall be designed and constructed to ensure that the performance standards, which are described in Chapter 3A.9, “Hydrology and Water Quality,” are met and shall be designed as off-stream detention basins.</p> <p>Discharge sites into Alder Creek and associated tributaries, as well as tributaries to Carson Creek, Coyote Creek, and Buffalo Creek, shall be monitored to ensure that pre-project conditions are being met. Corrective measures shall be implemented as necessary. The mitigation measures will be satisfied when the monitoring standards are met for 5 consecutive years without undertaking corrective measures to meet the performance standard.</p>	G, I	CD (E)	The Owner/Applicant is in compliance with the Storm Water Pollution Prevention Plan (SWPPP) for the subdivision. General notes have been included on the approved grading and public infrastructure plans to address this condition. Compliance has been monitored through construction inspection.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP

40.	Litter Control During Construction, the owner/applicant shall be responsible for litter control and sweeping of all paved surfaces in accordance with City standards. All on-site storm drains shall be cleaned immediately before the commencement of the rainy season (October 15).	OG	CD (E)	The owner/applicant has complied with this provision and completed periodic on-site cleaning and sweeping of the project site. Compliance has been monitored through construction inspection	Yes
FIRE DEPT REQUIREMENTS					
41.	Prepare fuel modification plan (FMP). If applicable, the owner/applicant shall submit a Fuel Modification Plan consistent with the FPA Open Space Management Plan to the City for review and preliminary approval from the Fire Code Official prior to any Final and/or Parcel Map. Final approval of the plan by the Fire Code Official shall occur prior to the issuance of a permit for any new construction. A Fuel Modification Plan shall consist of a set of scaled plans showing fuel modification zones indicated with applicable assessment notes, a detailed landscape plan and an irrigation plan. A fuel modification plan submitted for approval shall be prepared by one of the following: a California state licensed landscape architect, or state licensed landscape contractor, or a landscape designed, or an individual with expertise acceptable to the Fire Code Official. The owner/applicant shall obtain off-site easements for the required for the fuel modification buffer. The owner/applicant agree to be responsible for the long-term maintenance of the Fuel Modification Plan. Notification of fuel modification requirements are to be made upon sale to new property owners. Proposed changes to the approved Fuel Modification Plan shall be submitted to the Fire Code Official for approval prior to implementation.	G, I, M, B	CD (P), FD	The owner/applicant has submitted a Fuel Modification Plan (FMP) and the City Fire Department and the Community Development Department has reviewed and approved the plan. The FMP is for all open space areas adjacent to residential land uses adjoining the subdivision.	Yes

42.	<p><i>All-Weather Access and Fire Hydrants</i> The owner/applicant shall provide all-weather access and fire hydrants before combustible materials are allowed on any project site or other approved alternative method as approved by the Fire Code Official/Fire Chief. All-weather emergency access roads and fire hydrants (tested and flushed) shall be provided before combustible material or vertical construction is allowed on any project site or other approved alternative method as approved by the Fire Code Official/Fire Chief. (All-weather access is defined as six inches of compacted aggregate base from May 1 to September 30 and two inch asphalt concrete over six inch aggregate base from October to April 30). The building shall have illuminated addresses visible from the street or drive fronting the property. Size and location of address identification shall be reviewed and approved by the Fire Marshal.</p> <ul style="list-style-type: none"> • Commercial Fire-Flow with Automatic Fire Sprinkler System: The required fire-flow for the general commercial portion of the project is determined to be 750 GPM for three hours. The reduced fire-flow shall not be less than 1,000 GPM for commercial buildings with automatic sprinkler systems per Section 903.1.1 of the CFC, and shall not be less than 1,500 GPM for commercial buildings with automatic sprinkler systems per Section 903.3.1.2 of the CFC. • Residential Fire-Flow with Automatic Fire Sprinkler System: The required fire-flow for the proposed residential portion of the project is determined to be 875 GPM for one hour. • All public streets shall meet City of Folsom Street Standards unless an alternative is specifically included within this approval. • The maximum length of any dead end street shall not exceed 500 feet in accordance with the Folsom Fire Code (unless approved by the Fire Department). Several streets indicated on the plans are dead ends greater than 500 feet. In such cases, a second emergency access will be required. • All-weather emergency access roads and fire hydrants (tested and flushed) shall be provided before combustible material storage or vertical construction is allowed. All-weather access is defined as 6" of compacted AB from May 1 to September 30 and 2"AC over 6" AB from October 1 to April 30 • The first Fire Station planned for the Folsom Plan Area shall be completed and operational at the time that the threshold of 1,500 occupied homes within the Folsom Plan Area is met. 	G, I, M, B	CD (P), FD	The owner/applicant has designed and received approval for all weather access improvements and fire hydrants for the entire subdivision. Building permits will not be issued prior to these improvements being completed to the satisfaction of the Community Development Department and the Fire Department.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP

43.	<p>Landscaping Plans Final landscape plans and specifications shall be prepared by a registered landscape architect and approved by the City prior to the approval of the first building permit or the Small Lot Final Map, whichever occurs first. Said plans shall include all on-site landscape specifications and details, and shall comply with all State and local rules, regulations, Governor's declarations and restrictions pertaining to water conservation and outdoor landscaping.</p> <p>Landscaping shall meet shade requirements as outlined in the Folsom Plan Area Specific Plan where applicable. The landscape plans shall comply and implement water efficient requirements as adopted by the State of California (Assembly Bill 1881) (State Model Water Efficient Landscape Ordinance) until such time the City of Folsom adopts its own Water Efficient Landscape Ordinance at which time the owner/applicant shall comply with any new ordinance. Shade and ornamental trees shall be maintained according to the most current American National Standards for Tree Care Operations (ANSI A-300) by qualified tree care professionals. Tree topping for height reduction, view protection, light clearance or any other purpose shall not be allowed. Specialty-style pruning, such as pollarding, shall be specified within the approved landscape plans and shall be implemented during a 5-year establishment and training period. Landscaping installed in open spaces located between tiers of lots shall be chosen for resistance to fire and limited fuel production. Furthermore, the owner/applicant shall comply with city-wide landscape rules or regulations on water usage. Owner/applicant shall comply with any state or local rules and regulations relating to landscape water usage and landscaping requirements necessitated to mitigate for drought conditions on all landscaping in the Mangini Ranch Phase 2 project.</p>	B, M	CD(P), PW	The owner/applicant will submit the landscape and irrigation plans for this subdivision and the Community Development Department will review and approve the landscape and irrigation plans prior to issuance of the first building permit in the subdivision. The landscape and irrigation improvements are bonded for in the subdivision improvement agreement. In accordance with long established City policy, the landscape and irrigation improvements for the subdivision are required to be complete prior to the first certificate of occupancy in the subdivision. The long established City policy related to building permits and landscape and irrigation issuance and timing is contrary to this condition. However, the Community Development Department will verify compliance with the long established City policy.	Condition will be satisfied prior to issuance of a building permit in the subdivision.
44.	<p>Right of Way Landscaping Landscaping along all road rights of way and in public open space lots shall be installed when the adjoining road or lots are constructed.</p>	I, OG	CD (P), PW	Landscaping and irrigation plans for the Village 3 subdivision frontage on Savannah Parkway and are bonded for the subdivision improvement agreement for Village 3.	Yes

MAP REQUIREMENTS					
45.	<i>Subdivision Improvement Agreement</i> Prior to the approval of any Final Map, the owner/applicant shall enter into a subdivision improvement agreement with the City, identifying all required improvements, if any, to be constructed with each proposed phase of development. The owner/applicant shall provide security acceptable to the City, guaranteeing construction of the improvements.	M	CD (E)	The required subdivision improvement agreement is included as part of the City staff report accompanying the final map for City Council approval. The resolution approving the final map for this subdivision includes a statement authorizing the City Manager to execute the subdivision improvement agreement for the subdivision along with approval of the final map.	Yes
46.	<i>The Final Inclusionary Housing Plan</i> The Final Inclusionary Housing Plan shall be approved by the City Council, and the Inclusionary Housing Agreement approved by the City Attorney shall be executed prior to recordation of the first Small-Lot Final Map for the Mangini Ranch Phase 2 Subdivision.	M	CD (P)(E)	The owner/applicant has executed an Inclusionary Housing Agreement with the City. The agreement allows the owner/applicant to provide an in-lieu fee assigned to each building permit in the subdivision. The in-lieu housing fee will be paid at the time of building permit issuance.	Yes

48.	Public Utility Easements The owner/applicant shall dedicate public utility easements for underground facilities on properties adjacent to the streets. A minimum of twelve and one-half-foot (12.5') wide Public Utility Easements for underground facilities (i.e., SMUD, Pacific Gas and Electric, cable television, telephone) shall be dedicated adjacent to all public street rights-of-way. The owner/applicant shall dedicate additional width to accommodate extraordinary facilities as determined by the City. The width of the public utility easements adjacent to public right of way may be reduced with prior approval from public utility companies.	M	CD (E)	The owner/applicant has dedicated a 12.5' PUE along backbone roadway utility corridors as well as internal streets within the subdivision.	Yes
49.	Final Map Phasing Should multiple Final Maps be filed by the owner/applicant, the phasing of maps shall be to the satisfaction of the Community Development Department.	M	CD (E)	There is no phasing proposed for the Village 3 final map.	Yes
50.	Backbone Infrastructure As provided for in the ARDA and the Amendment No. 1 thereto, the owner/applicant shall provide fully executed grant deeds, legal descriptions, and plats for all necessary Backbone Infrastructure to serve the project, including but not limited to lands, public rights of way, public utility easements, public water main easements, public sewer easements, irrevocable offers of dedication and temporary construction easements. All required easements as listed necessary for the Backbone Infrastructure shall be reviewed and approved by the City and recorded with the Sacramento County Recorder pursuant to the timing requirements set forth in Section 3.8 of the ARDA, and any amendments thereto.	M	CD (E)	The owner/applicant (or its previous owner) provided all necessary public utility easements, grant deeds, offers of dedication or temporary construction easements required to build all of the required Backbone Infrastructure needed to serve the subdivision. These were recorded with Sacramento County Recorder within the Large Lot Final Map or by separate instrument.	Yes
51.	New Permanent Benchmarks The owner/applicant shall provide and establish new permanent benchmarks on the (NAVD 88) datum in various locations within the subdivision or at any other locations in the vicinity of the off-site Backbone Infrastructure as directed by the City Engineer. The type and specifications for the permanent benchmarks shall be provided by the City. The new benchmarks shall be placed by the owner/applicant within 6 months from the date of approval of the vesting tentative subdivision map.	M	CD (E)	The owner/applicant has installed new benchmarks per the direction of the City Engineer. The required benchmarks are in place and currently in use.	Yes
52.	Centralized Mail Delivery Units All Final Maps shall show easements or other mapped provisions for the placement of centralized mail delivery units. The owner/applicant shall provide a concrete base for the placement of any centralized mail delivery unit. Specifications and location of such base shall be determined pursuant to the applicable requirements of the U. S. Postal Service and the City of Folsom Community Development Department, with due consideration for street light location, traffic safety, security, and consumer convenience.	M	CD (E)	The Final Map includes an easement that allows for the construction and maintenance of centralized mail delivery boxes.	Yes

CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 2 SUBDIVISION PROJECT (PN 17-307) WEST OF PLACERVILLE ROAD, NORTH OF WHITE ROCK ROAD, EAST OF SCOTT ROAD, AND SOUTH OF US HIGHWAY 50 SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP

TRAFFIC, ACCESS, CIRCULATION, AND PARKING REQUIREMENTS					
56.	<p><u>East Bidwell Street/Savannah Parkway</u> Prior to issuance of the first building permit, the owner/applicant shall be responsible for configuring the East Bidwell Street/Savannah Parkway Intersection as follows:</p> <ul style="list-style-type: none"> o Southbound Approach to Savannah Parkway from East Bidwell Street: One thru-lane, and one left-turn lane with a 200-foot long transition, 60-foot-long taper, and 100 feet of vehicle storage. o Northbound Approach to Savannah Parkway from East Bidwell Street: One shared thru/right-turn lane. o Westbound Approach to East Bidwell Street from Savannah Parkway: One shared left/right-turn lane, and a striped out left-turn pocket with a 125-foot-long taper and 60 feet of vehicle storage. o Control: Stop-Sign control at the westbound approach to East Bidwell Street from Savannah Parkway with full access. o Between Old Ranch Way and the southern boundary of the project site, East Bidwell Street shall be constructed as a two-lane arterial on the eastern "half segment" of its ultimate configuration. This two-lane segment shall have a striped 2-foot-wide median south of Old Ranch Way, consistent with the California Manual of Uniform Traffic Control Devices (MUTCD) Figure 3A-107 (CA), or similar standard. The southbound left-turn pocket shall be developed in accordance with the Highway Design Manual (HDM) Figure 405-2A, or similar standard. Savannah Parkway shall have a raised median curb. 	B	CD (E)	The owner/applicant has constructed the required intersection improvements and the City has formally accepted these improvements in the Spring of 2022. The required improvements were included on either the approved Enclave at Folsom Ranch Off-Site Improvement Plans or the approved Village 2 Improvement Plans.	Yes

<p>57.</p>	<p><u>East Bidwell Street/Alder Creek Parkway</u> Prior to issuance of the 236th building permit, the owner/applicant shall be responsible for expanding and signalizing the East Bidwell Street/Alder Creek Parkway Intersection as follows:</p> <ul style="list-style-type: none"> o Southbound Approach to Alder Creek Parkway from East Bidwell Street: One thru-lane, and two left-turn lanes, with a 300-foot-long single lane left-turn pocket excluding tapers for the most easterly of the left turning lanes. o Northbound Approach to Alder Creek Parkway from East Bidwell Street: One thru lane and one shared thru/right-turn lane with a striped 500-foot long right-turn pocket excluding tapers for the shared thru/right-turn lane. o Westbound Approach to East Bidwell Street from Alder Creek Parkway: One right-turn lane and one left-turn lane, with a 200-foot left-turn pocket excluding tapers for the left-turn lane. o Eastbound Alder Creek Parkway Departure: Two receiving lanes shall be provided, the second receiving lane shall be dropped after 300 feet excluding tapers. o Control: Signalize with a protected southbound East Bidwell Street left-turn, westbound Alder Creek Parkway split phasing, and westbound Alder Creek Parkway right-turn overlap. U-Turns prohibited. o East Bidwell Street shall be constructed as a four-lane divided arterial between Alder Creek Parkway and the U.S. Highway 50 Interchange, with a 38-foot-wide median at Alder Creek Parkway that tapers back to match the existing four-lane arterial segment at the eastbound U.S. Highway 50 slip onramp. East Bidwell Street shall be constructed as a two-lane divided arterial between Alder Creek Parkway and Old Ranch Way, with a 38-foot-wide raised median at Alder Creek Parkway that tapers back to match the two-lane half segment described in the East Bidwell Street/Savannah Parkway Condition No. 57 above. Alder Creek Parkway between East Bidwell Street and Westwood Drive shall be constructed as a two-lane divided roadway with a 38-foot-wide raised median. 	<p>B</p>	<p>CD (E)</p>	<p>The Community Development Department has reviewed and approved the traffic signal plans for the proposed signal at the intersection of East Bidwell Street and Alder Creek Parkway. The traffic signal is expected to be complete and operational in the Spring of 2022. The Community Development Department is monitoring building permit issuance in the Mangini Ranch Phase 2 development to verify completion of the signal prior to issuance of the 236th building permit.</p>	<p>Condition will be satisfied prior to issuance of the 236th building permit in the Mangini Ranch Phase 2 subdivision.</p>
------------	---	----------	---------------	--	--

<p>58.</p>	<p><u>East Bidwell Street/White Rock Road</u> Prior to issuance of the 281st building permit, the owner/applicant shall be responsible for either Option A or Option B below as follows:</p> <ul style="list-style-type: none"> o Option A: The Capital Southeast Connector Joint Powers Authority (JPA) project proposes to relocate and signalize the East Bidwell Street/White Rock Road intersection: If the proposed JPA project at this location is fully funded and construction is underway by the time the 281st building permit is issued, the project shall pay the Sacramento County Transportation Development Fees, toward the JPA project. o Option B: Signalize the existing East Bidwell Street/White Rock Road intersection with Mangini Ranch Phase 1 improvements: If the JPA project to relocate and signalize the East Bidwell Street/White Rock Road intersection is not fully funded and under construction prior to issuances of the 281st building permit, the owner/applicant shall be responsible to signalize the existing intersection with improvements described in Condition No. 127 of the Mangini Ranch Phase 1 conditions of approval. Mangini Ranch Phase 1 improvements at this location consist of “Southbound on East Bidwell Street construct a free southbound right turn lane consisting of 315 feet of deceleration length plus 50 feet storage length, excluding appropriate tapers and a 300 foot receiving /acceleration lane, excluding tapers along westbound White Rock Road. Westbound on White Rock Road, construct a free right-turn lane consisting of 315 feet of deceleration length plus 50 feet of storage length, excluding appropriate tapers, and a 300 foot receiving lane excluding appropriate tapers along northbound East Bidwell Street. o The JPA currently has more than seven million dollars programed toward relocation and signalization of the East Bidwell Street/White Rock Road intersection, and is planning to begin acquiring right-of-way during the winter of 2018, and begin construction during the summer of 2019. The projected absorption Schedule for the Mangini Ranch Phase 2 project estimates that the 281 dwelling units will not be constructed until sometime in the second quarter of 2020. Option A above is the preferred improvement, Option B would be a throwaway improvement. 	<p>B</p>	<p>CD (E)</p>	<p>The required improvements to the intersection of East Bidwell Street and White Rock Road have been fully funded by the Connector JPA are currently under construction. It is anticipated that the new signal and the improvements at the intersection will be complete and operational in the Spring of 2022. This condition is therefore satisfied.</p>	<p>Yes</p>
------------	---	----------	---------------	---	------------

<p>59.</p>	<p><u>White Rock Road/Placerville Road</u> Prior to the 496th building permit, the owner/applicant shall be responsible for prohibiting southbound left-turns from Placerville Road to eastbound White Rock Road by construction of a raised median on Placerville Road to channelize all southbound traffic onto westbound White Rock Road.</p>	<p>B</p>	<p>CD (E)</p>	<p>This condition is not a requirement of this Village 3 subdivision since this subdivision will only increase the number of mapped lots to 422 in the Mangini Ranch Phase 2 subdivision which is below the requirement to complete the improvement prior to issuance of the 496th building permit.</p>	<p>Condition will be satisfied prior to issuance of the 496th building permit in the Mangini Ranch Phase 2 subdivision.</p>
<p>60.</p>	<p><u>East Bidwell Street/Savannah Parkway</u> Prior to issuance of the 496th building permit and concurrent with implementation of Condition 64 above, the owner/applicant shall signalize the East Bidwell Street/Savannah Parkway intersection as follows:</p> <ul style="list-style-type: none"> ○ Southbound Approach to Savannah Parkway from East Bidwell Street: One thru-lane, and one left-turn lane with a 100-foot-long left-turn pocket excluding tapers for the left-turn lane. ○ Northbound Approach to Savannah Parkway from East Bidwell Street: One shared thru/right-turn lane. ○ Westbound Approach to East Bidwell Street from Savannah Parkway: One right-turn lane, and one left-turn lane with a 60-foot left-turn pocket excluding tapers for the left-turn lane. ○ Control: Signal control with split phasing. ○ Between Old Ranch Way and the southern boundary of the project site, East Bidwell Street shall be constructed as a two-lane arterial on the eastern “half-segment” of its ultimate configuration. This two-lane segment shall have a striped 2-foot-wide median south of Old Ranch Way, consistent with the California Manual on Traffic Control Devices (MUTCD) Figure 3A-107 (CA), or similar standard. The southbound left-turn pocket shall be developed in accordance with the Highway Design Manual (HDM) Figure 405.2A, or similar standard. Savannah Parkway shall have a 4-foot-wide raised median. 	<p>B</p>	<p>CD (E)</p>	<p>This condition is not a requirement of this Village 3 subdivision since this subdivision will only increase the number of mapped lots to 422 in the Mangini Ranch Phase 2 subdivision which is below the requirement to complete the improvement prior to issuance of the 496th building permit.</p>	<p>Condition will be satisfied prior to issuance of the 496th building permit in the Mangini Ranch Phase 2 subdivision.</p>

61.	<i>Credit Reimbursement Agreement</i> Prior to the recordation of the first Small-Lot Final Map, the owner/applicant and City shall enter into a credit and reimbursement agreement for constructed improvements that are included in the Folsom Plan Area's Public Facilities Financing Plan.	M	CD (E)	The owner/applicant has entered into a SPIF Credit/Reimbursement Agreements with the City for eligible improvements constructed by the owner/applicant.	Yes
ARCHITECTURE/SITE DESIGN REQUIREMENTS					
62.	<i>Landscaping Plan</i> Owner/applicant shall submit a landscape plan for all areas (by phase or subdivision) of the project where owner/applicant proposes to install landscaping on residential lots. The landscape plan shall take into account the then existing state or local rules and regulations related to landscape water usage and water wise landscape principles. The landscape plans shall be submitted and approved by the Community Development Director prior to the issuance of a building permit in the phase or subdivision. The owner/applicant shall comply with any state or local rules and regulations relating to landscape water usage and landscaping requirements necessitated to mitigate for drought conditions.	B	CD (P) (E)	The Community Development Department will review all future residential site plans in the subdivision to verify compliance with this condition.	Condition will be satisfied prior to issuance of a building permit.
63.	<i>Mechanical Equipment Screening</i> All mechanical equipment shall be concealed from view of public streets, neighboring properties and nearby higher buildings where practicable to the satisfaction of the Community Development Department.	B	CD (P) (E)	The Community Development Department will review all future residential site plans in the subdivision to verify compliance with this condition.	Condition will be satisfied prior to issuance of a building permit.

64.	<p><i>Bicycle Trail System Modifications</i> The owner/applicant shall incorporate the design and grading for the proposed Class I bike trails located within Lot H into the improvement plans consistent with the Mangini Ranch Phase 2 Proposed Trail System Modification Exhibit dated December 15, 2017.</p>	I	CD (P)	<p>The Mangini Ranch Phase 2 Grading Plans approved by the City reflect the modifications to the trail system as shown in trail system modification exhibit dated December 15, 2017. The trail system modifications are adjoining future villages in the Mangini Ranch Phase 2 subdivision.</p>	Yes
-----	--	---	--------	---	-----

CITY CORPORATION YARD					
65.	<p>The location tentatively identified for acquisition by the City for the City's new Corporation Yard in Section 2.2.3.4 of the First Amended and Restated Tier I Development Agreement (ARDA) between the City and the project developer may not be feasible for use as a Corporation Yard due to challenges in obtaining County entitlements and utility services. Subject to the application of this condition to other Participating Landowners (as defined in the ARDA) as provided herein, the following condition is added with respect to resolution of the location of the corporation yard:</p> <p>Prior to approval of the First Final Small Lot Map in the FPA (or first building permit if development may occur without any subdivision), a site consistent with the requirements of Section 2.2.3.4 of the ARDA, as may be amended or as otherwise agreed to between the City and the Participating Landowners, shall be identified as acceptable to the City as suitable and feasible for use as the new Corporation Yard, with access to sewer, water and all required utility services. The City's determination of feasibility may include the identification of an alternative site consistent with the forgoing, as a back-up for the primary site, as well as an evaluation of the time, cost and likelihood of obtaining any necessary entitlements or other governmental approvals for use of the land as a corporation yard, with the final determination of feasibility subject to the sole and reasonable discretion of the City Council.</p> <p>The City intends to impose this condition equitably throughout the Plan Area as and to each and every Participating Landowner who seeks any future specific plan amendment, tentative subdivision map or ARDA amendment in connection with its proposed development. If the City fails to impose such a condition, when required, with at least substantially similar terms, although precise language may differ (whether through a tentative subdivision map condition of approval, amendment to the specific plan or to a development agreement, or other agreement between the City and a Participating Landowner), this condition of approval shall be null and void as to Owner/Applicant's Project, and shall not be used as a reason to prevent approval of any final small lot map for Owner/Applicant's Project. If the City approves any other final small lot map for a project within the Plan Area and the Corporation Yard site has not been approved as provided for herein, Owner/Applicant may seek relief from the terms of this condition by appeal to the City Manager, with the right to review by the City Council.</p>	M, B	CD (P)	<p>The City has completed the annexation process with LAFCO to add the future corporation site to the City of Folsom Limits. The grant deed for the transfer of the Corporation Yard to the City has recorded in the Official Records of Sacramento County and LAFCO has recorded the Certificate of Completion in Book 20181207 at Page 0779 in the Official Records of Sacramento County completing the annexation process.</p>	Yes

SCHOOL SITES				
66.	<p>The locations of the elementary school sites and the combined middle school/high school were initially established during the City's processing and approval of the Folsom Specific Plan, at which time all Plan Area participants were engaged in the review of land planning and land uses. In 2015, the Folsom Cordova Unified School District raised concerns that the planned location of the future combined middle school/high school site may not be preferred.</p> <p>Prior to approval of First Final Small Lot Map in the FPA (or first building permit if development may occur without any subdivision), the site(s) for the future high school and middle school in the Folsom Plan Area will be identified and approved by the City, in consultation with the Folsom Cordova Unified School District.</p> <p>The City intends to impose this condition equitably throughout the Plan Area as and to each and every Participating Landowner who seeks any future specific plan amendment, tentative subdivision map or ARDA amendment in connection with its proposed development. If the City fails to impose such a condition, when required, with at least substantially similar terms, although precise language may differ (whether through a tentative subdivision map condition of approval, amendment to the specific plan or to a development agreement, or other agreement between the City and a Participating Landowner), this condition of approval shall be null and void as to Owner/Applicant's Project, and shall not be used as a reason to prevent approval of any final small lot map for Owner/Applicant's Project. If the City approves any other final small lot map for a project within the Plan Area and the high school and middle school site(s) has not been approved as provided for herein, Owner/Applicant may seek relief from the terms of this condition by appeal to the City Manager, with the right to review by the City Council.</p> <p>If Owner/Applicant proposes final maps in phases, Owner/Applicant may apply to the City Manager to permit individual phases to move forward to final map if substantial progress is being made to identify an acceptable site(s) as described above. The City Manager's determination of substantial progress shall be in his/her sole discretion.</p>	M, B	CD (P) Folsom Cordova Unified School District	<p>The City, the Folsom Cordova Unified School District (FCUSD) and the Landowners in the Folsom Plan Area successfully negotiated the proposed locations of the combined middle school/high school site. The City Manager informed the Landowners that this condition of approval has been satisfied with a letter dated June 12, 2018. The letter is on file with the City.</p> <p>Yes</p>

Mitigation Measures					
67.	<i>Westland/Eagle Specific Plan Amendment (W/E SPA) Mitigation Monitoring Reporting Program (MMRP) for the Westland/Eagle Area of the Folsom Plan Area Specific Plan (FPASP).</i> Table 1 below describes the mitigation measures from the FPASP (May 2011) MMRP, as amended by the Revised Proposed Water Supply Facility Alternative (November 2012) and by W/E SPA (September 2015).				
Table 1.					
FPASP EIR/EIS, as amended by the W/E SPA Addendum, Mitigation Measures Applicable to the Mangini Ranch Phase 2 Tentative Subdivision Map Project.*					
*The MMRP for the W/E SPA Addendum to the FPASP EIR/EIS is included as Attachment 20.					
Condition	Mitigation Measures Applicable to the Project	Timing	Responsible Agency	Comments	Condition Satisfied?
Aesthetics					
67-1	3A.1-1: Construct and Maintain a Landscape Corridor Adjacent to U.S. 50.	G, O	CD	This subdivision does not have frontage on US HWY 50	Yes
67-2	3A.1-4: Screen Construction Staging Areas.	G	CD (P)(E)(B)	The construction staging area does not require screening due to distance from existing residences (>1000 feet)	Yes
67-3	3A.1-5: Establish and Require Conformance to Lighting Standards and Prepare and Implement a Lighting Plan.	B	CD (P)	CDD has approved the lighting plan for this subdivision	Yes
Air Quality					
67-4	3A.2-1a: Implement Measures to Control Air Pollutant Emissions Generated by Construction of On-Site Elements.	G, C	CD	(2) The City and its Environmental Compliance Consultant (Helix) have reviewed all MMRP conditions and verified compliance with this Mitigation Measure. Compliance was verified prior to commencement of grading and construction in Spring of 2022. Compliance table is on file with the City.	Yes
67-5	3A.2-1b: Pay Off-site Mitigation Fee to SMAQMD to Off-Set NOX Emissions Generated by Construction of On-Site Elements.	G, C	CD (P)(E) SMAQMD	See (2) above	Yes
67-6	3A.2-1c: Analyze and Disclose Projected PM10 Emission Concentrations at Nearby Sensitive Receptors Resulting from Construction of On-Site Elements.	G	CD (E)(P)	See (2) above	Yes
67-7	3A.2-1d: Implement SMAQMD's Basic Construction Emission Control Practices during Construction of all Off-site Elements located in Sacramento County	G	SMAQMD	See (2) above. No off-site elements outside the City limits required for this subdivision	Yes
67-8	3A.2-1f: Implement SMAQMD's Enhanced Exhaust Control Practices during Construction of all Off-site Elements.	G	Sacramento County El Dorado County or Cal Trans	See (2) above. No off-site elements outside the City limits required for this subdivision	Yes

67-9	3A.2-1g: Pay Off-site Mitigation Fee to SMAQMD to Off-Set NOX Emissions Generated by Construction of Off-site Elements.	G	SMAQMD	See (2) above	Yes
67-10	3A.2-1h: Analyze and Disclose Projected PM10 Emission Concentrations at Nearby Sensitive Receptors Resulting from Construction of Off-site Elements	G		See (2) above	Yes
67-11	3A.2-2: Implement All Measures Prescribed by the Air Quality Mitigation Plan to Reduce Operational Air Pollutant Emissions.	M, I	CD	See (2) above	Yes
67-12	3A.2-4a: Develop and Implement a Plan to Reduce Exposure of Sensitive Receptors to Construction-Generated Toxic Air Contaminant Emissions.	G, C	CD	See (2) above	Yes
67-13	3A.2-4b: Implement Measures to Reduce Exposure of Sensitive Receptors to Operational Emissions of Toxic Air Contaminants	G, C	CD SMAQMD	See (2) above	Yes
67-14	3A.2-5: Implement A Site Investigation to Determine the Presence of NOA and, if necessary, Prepare and Implement an Asbestos Dust Control Plan.	G, C	CD	See (2) above	Yes
67-15	3A.2-6: Implement Measures to Control Exposure of Sensitive Receptors to Operational Odorous Emissions	B, C	CD	See (2) above	Yes
Biological Resources					
67-16	3A.3-1a (as amended by W/E SPA): Mitigation for erosion impacts.	I, OG	PW USACE	See (2) above	Yes
67-17	3A.3-1b (as amended by W/E SPA): Implement Clean Water Act Section 404 Permits and Section 401 Water Quality Certifications.	G, I, OG	CD USACE	See (2) above	Yes
67-18	3A.3-2a (as amended by W/E SPA): Avoid Direct Loss of Swainson's Hawk and Other Raptor Nests.	G, I, C	CD CDFW	See (2) above	Yes
67-19	W/E SPA Mitigation Measure 4.4-4: Conduct preconstruction Swainson's Hawk and other raptor surveys	G	CD (P)(E) CDFW	See (2) above	Yes
67-20	3A.3-2b: Prepare and Implement a Swainson's Hawk Mitigation Plan.	G, I, C	CD	See (2) above	Yes
67-21	W/E SPA Mitigation Measure 4.4-5: Prepare and Implement Swainson's hawk mitigation plan.	G	CD (P)(E) CDFW	See (2) above	Yes
67-22	3A.3-2c (as amended by W/E SPA): Conduct preconstruction Tricolored Blackbird Nesting surveys.	G	CD CDFW	See (2) above	Yes
67-23	W/E SPA Mitigation Measure 4.4-6: Conducting preconstruction burrowing owl survey.	G	CD (P)(E) CDFW	See (2) above	Yes
67-24	W/E SPA Mitigation Measure 4.4-7: Preconstruction nesting bird survey.	G	CD (P)(E) CDFW	See (2) above	Yes
67-25	3A.3-2d (as amended by W/E SPA): Conduct preconstruction bat roosting survey.		CD	See (2) above	Yes
67-26	3A.3-2e: Obtain an Incidental Take Permit under Section 10(a) of ESA; Develop and Implement a Habitat Conservation Plan to Compensate for the Loss of Vernal Pool Habitat.	G, I, OG	USFWS CD	See (2) above	Yes
67-27	3A.3-2f: Obtain an Incidental Take Permit under Section 10(a) of ESA; Develop and Implement a Habitat Conservation	G, I, OG	USFWS	See (2) above	Yes

	Plan to Compensate for the Loss of VELB Habitat.		USACE CD		
67-28	3A.3-2g: Secure Take Authorization for Federally Listed Vernal Pool Invertebrates and Implement All Permit Conditions.	G, I, C	USACE CD	See (2) above	Yes
67-29	3A.3-2h (as amended by W/E SPA): Valley Elderberry Longhorn Beetle avoidance and minimization measures.	G, I, OG	USACE USFWS CD	See (2) above	Yes
67-30	3A.3-3: Conduct Special-Status Plant Surveys; Implement Avoidance and Mitigation Measures or Compensatory Mitigation.	G, I, B	USFWS CDFW CD	See (2) above	Yes
67-31	3A.3-4a (as amended by W/E SPA): Implement Section 1602 Master Streambed Alteration Agreement.	G, I, C	CDFW CD	See (2) above	Yes
67-32	3A.3-4b (as amended by W/E SPA): Valley Needlegrass Grassland Avoidance and Minimization Measures.	G, I, B	CDFW CD	See (2) above	Yes
67-33	3A.3-5 (as amended by W/E SPA): Oak woodlands mitigation.	G, I, C	CD, PW	See (2) above	Yes
67-34	W/E SPA Mitigation Measure 4.4-1: Conduct environmental awareness training for construction employees.	G, C	CD	See (2) above	Yes
67-35	W/E SPA Mitigation Measure 4.4-2: Conduct preconstruction western spadefoot survey	G	CD (E) (P) CDFW	See (2) above	Yes
67-36	W/E SPA Mitigation Measure 4.4-3: Conduct preconstruction western pond turtle survey.	G	CD (E)(P) CDFW	See (2) above	Yes
Climate Change					
67-37	3A.4-1: Implement Additional Measures to Control Construction-Generated GHG Emissions.	M, B, C	CD SMAQMD	See (2) above	Yes
67-38	3A.4-2a: Implement Additional Measures to Reduce Operational GHG Emissions.	M, B	CD SMAQMD	See (2) above	Yes
67-39	3A.4-2b: Participate in and Implement an Urban and Community Forestry Program and/or Off-Site Tree Program to Off-Set Loss of On-Site Trees.	M, B	CD	No trees are present in the subdivision.	Yes
Cultural Resources					
67-40	3A.5-1a (as amended by W/E SPA): Comply with the Programmatic Agreement	G	CD USACE	See (2) above	Yes
67-41	3A.5-1b (as amended by W/E SPA): Perform an Inventory and Evaluation of Cultural Resources for the California Register of Historic Places, Minimize or Avoid Damage or Destruction, and Perform Treatment Where Damage or Destruction Cannot be Avoided.	G	CD USACE	See (2) above	Yes
67-42	3A.5-2 (as amended by W/E SPA): Conduct Construction Personnel Education, Conduct On-Site Monitoring if Required, Stop Work if Cultural Resources are Discovered, Assess the Significance of the Find, and Perform Treatment or Avoidance as Required.	G, C	CD USACE	See (2) above	Yes

67-43	3A.5-3 (as amended by W/E SPA): Suspend Ground-Disturbing Activities if Human Remains are Encountered and Comply with California Health and Safety Code Procedures.	OG	CD (P)(E) Sacramento County Coroner Native American Heritage Commission	See (2) above. No human remains have been encountered in the subdivision during grading and construction.	Yes
Geology, Soils, Minerals, And Paleontological Resources					
67-44	3A.7-1a: Prepare Site-Specific Geotechnical Report per CBC Requirements and Implement Appropriate Recommendations.	B	CD (E)	Owner/applicant has provided Geotechnical Report to the City. The Geotechnical report for the subdivision is on file with the City.	Yes
67-45	3A.7-1b: Monitor Earthwork during Earthmoving Activities	B	CD (P)(E)(B)	Compliance monitored through construction inspection.	Yes
67-46	3A.7-3: Prepare and Implement the Appropriate Grading and Erosion Control Plan.	G	CD (E)	Compliance monitored through construction inspection.	Yes
67-47	3A.7-5: Divert Seasonal Water Flows Away from Building Foundations.	B	CD (B)(P)	CDD will review all future building permits in the subdivision to verify compliance with mitigation measure	Condition will be satisfied prior to building permit issuance.
67-48	3A.7-10: Conduct Construction Personnel Education, Stop Work if Paleontological Resources are Discovered, Assess the Significance of the Find, and Prepare and Implement a Recovery Plan as Required.	C	CD	See (2) above. No human remains or paleontological resources have been encountered in the subdivision during grading and construction.	Yes
Hazards and Hazardous Materials					
67-49	3A.8-2: Complete Investigations Related to the Extent to Which Soil and/or Groundwater May Have Been Contaminated in Areas Not Covered by the Phase I and II Environmental Site Assessments and Implement Required Measures	G, C	CD	See (2) above. No hazardous and/or contaminated soil or groundwater has been discovered in the subdivision.	Yes
67-50	3A.8-5: Prepare and Implement a Blasting Safety Plan in Consultation with a Qualified Blaster.	M	CD	The owner/applicant has retained a blasting contractor, BTI, Inc., to conduct all blasting in the subdivision. A Blasting Safety Plan was provided to the City and the contractor has been issued a blasting permit for the subdivision. BTI, Inc. notifies the City prior to all blasts in accordance with the Blasting Permit requirements.	Yes

67-51	Mitigation Measure 3A.8-6: Prudent Avoidance and Notification of EMF Exposure.	M	CD Folsom Cordova Unified School District	There are no existing overhead power lines within or adjoining the subdivision	Yes
67-52	3A.8-7: Prepare and Implement a Vector Control Plan in Consultation with the Sacramento-Yolo Mosquito and Vector Control District.	G	CD Sacramento- Yolo Mosquito and Vector Control District	A Vector Control Plan was prepared and submitted to the City for review and approval. The plan incorporated various Best Management Practices in consultation with the Sacramento-Yolo Mosquito and Vector Control District. A copy of the Vector Control Plan is available from the Community Development Department.	Yes
Hydrology and Water Quality					
67-53	3A.9-1: Acquire Appropriate Regulatory Permits and Prepare and Implement SWPPP and BMPs.	G, C	CD (E) CVRWQB	Owner/applicant has been issued a WDID # and has submitted a SWPPP approved by the RWQCB. SWPPP is on file at the City.	Yes
67-54	3A.9-2: Prepare and Submit Final Drainage Plans and Implement Requirements Contained in Those Plans.	G, B	CD (E)	The City has reviewed and approved the storm drain plans for this subdivision. The storm drain improvements are in compliance with the approved Folsom Plan Storm Drain Master Plan approved by the City.	Yes
67-55	3A.9-3: Develop and Implement a BMP and Water Quality Maintenance Plan.	G, C	CD (E), PW	Owner/applicant has been issued a WDID # and has submitted a SWPPP approved by the RWQCB. SWPPP is on file at the City.	Yes
67-56	3A.9-4: Inspect and Evaluate Existing Dams Within and Upstream of the Project Site and Make Improvements if Necessary.	M, I	PW	There are no existing dams upstream from this subdivision.	Yes

Noise					
67-57	3A.11-1: Implement Noise-Reducing Construction Practices, Prepare and Implement a Noise Control Plan, and Monitor and Record Construction Noise near Sensitive Receptors.	G, C	CD	The owner/applicant has implemented noise reducing construction practices included as part of the required Noise Control Plan. Compliance with these requirements has been monitored through construction inspection.	Yes
67-58	3A.11-3: Implement Measures to Prevent Exposure of Sensitive Receptors to Groundborne Noise or Vibration from Project Generated Construction Activities.	C	CD (E)(P)	The owner/applicant has been working closely with their contractors during the course of grading and construction to minimize ground borne noise and vibration. The owner/applicant has been challenged due to the extent of the blasting needed for the grading of the subdivision. The owner/applicant and their contractors are working very hard to minimize the vibration and disturbance to existing residents in the vicinity of the blasting. The owner/applicant as provided monitoring reports to the City verifying that all ground borne noise and vibration is within allowable thresholds and eliminating any possibility of structural damage to existing residential units.	Yes
67-59	3A.11-4: Implement Measures to Prevent Exposure of Sensitive Receptors to Increases in Noise from Project-Generated Operational Traffic on Off-site and On-Site Roadways.	C	CD (E)(P)	The owner/applicant continues to make efforts to reduce noise from grading and construction in the vicinity of existing residents. Night work is necessary due to impacts to the travelling public during the normal workday. The night work has been disruptive to some existing residences. The CDD is working closely to monitor the noise impacts in the night time hours to minimize impacts to existing residents.	Yes
67-60	3A.11-5: Implement Measures to Reduce Noise from Project-Generated Stationary Sources.	I, OG	CD (E)	All stationary construction equipment, if present, is muffled to reduce noise in accordance with noise requirements.	Yes
67-61	W/E SPA Mitigation Measure 4.12-1: Implement measures to prevent exposure of sensitive receptors to increases in noise from project-generated operational traffic on offsite and onsite roadways	M	CD	The owner/applicant continues to make efforts to reduce noise from grading and	Yes

				construction in the vicinity of existing residents. Night work is necessary due to impacts to the travelling public during the normal workday. The night work has been disruptive to some existing residences. The CDD is working closely to monitor the noise impacts in the night time hours to minimize impacts to existing residents.	
Public Services					
67-62	3A.14-1 (as amended by W/E SPA): Prepare and Implement a Construction Traffic Control Plan.	G, I, B, C	PW	The CDD has reviewed and approved all traffic control plans for the subdivision to verify compliance with City ordinances and to minimize delays to the travelling public.	Yes
67-63	3A.14-2: Incorporate California Fire Code; City of Folsom Fire Code Requirements; and EDHFD Requirements, if Necessary, into Project Design and Submit Project Design to the City of Folsom Fire Department for Review and Approval.	B, O	CD, FD	The City Fire Department has reviewed and approved all proposed improvements for the subdivision. The City FD will verify adequate fire flow prior to building permit issuance in the subdivision.	Yes
67-64	3A.14-3: Incorporate Fire Flow Requirements into Project Designs.	B, O	CD, FD	The City Fire Department has reviewed and approved all proposed improvements for the subdivision. The City FD will verify adequate fire flow prior to building permit issuance in the subdivision.	Yes

Traffic and Transportation

It should be noted that many of the Transportation, Traffic, and Circulation mitigation measures identified below will be satisfied through the payment of fees. Below is a brief summary of the fee types and their purpose. The acronyms for each fee type noted below are further noted in the Implementation Schedule column of each applicable mitigation measure to clarify how each mitigation measure is anticipated to be satisfied.

Public Facilities Financing Plan (PFFP):

In January of 2014, the City of Folsom adopted the PFFP for the Folsom Plan Area which detailed all the infrastructure components to address full build out of the Plan Area. The PFFP includes various techniques including development fees to fund the necessary infrastructure. The City is currently in the process of preparing and adopting implementing ordinances and a nexus study required by State law to impose the associated development fees.

Included in the PFFP are a number roadway projects including the Highway Interchanges that the Mangini Ranch Phase 2 Subdivision project will have cumulative impacts on within the Folsom Plan Area. The PFFP was designed to satisfy the “fair share” financing of all the Plan Area’s backbone roadway system. Participating in this fee program will satisfy numerous roadway mitigation measures as shown in the MMRP table.

Sacramento County Transportation Development Fee (SCTDF) contribution:

The City is establishing a “fair share” fee to mitigate roadway impacts outside the project boundaries and within unincorporated Sacramento County. This fee will be included in the City Facilities portion of the Public Facilities Financing Plan program and will be collected at the time of building permit issuance. The basis for the calculation of the fee is a report entitled, “Fair Share Cost Allocation Sacramento County & City of Folsom” dated January 2, 2014.

Cal Trans/City Memorandum of Understanding (Cal Trans MOU):

The City of Folsom and Cal Trans entered into an MOU on December 17, 2014 to establish a fee mechanism to address the "fair share" impacts to Highway 50. The MOU identifies all the highway improvements for which there are mitigation measures and potential construction projects to address them. The City will establish a fee in the City Facilities portion of the Public Facilities Financing Plan and it will be collected at the time of building permit issuance

67-65	3A.15-1: Project Participation in Funding Transportation Improvements	B	CD (E), PW	(1) This subdivision will pay its fair share of the following improvements with the payment of Specific Plan Infrastructure Fees (SPIF), City Traffic Impact Fees and Sacramento County Wide Transportation fees collected prior to building permit issuance in this subdivision.	Yes
67-66	3A.15-1a: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements to the Folsom Boulevard/Blue Ravine Road Intersection (Intersection 1).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-67	3A.15-1b: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements at the Sibley Street/ Blue Ravine Road Intersection (Intersection 2).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-68	3A.15-1c: The Applicant Shall Fund and Construct Improvements to the Scott Road (West)/White Rock Road Intersection (Intersection 28).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-69	3A.15-1e: Fund and Construct Improvements to the Hillside Drive/Easton Valley Parkway Intersection (Intersection 41).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-70	3A.15-1f: Fund and Construct Improvements to the Oak Avenue Parkway/Middle Road Intersection (Intersection 44).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-71	3A.15-1h: Participate in Fair Share Funding of Improvements to Reduce Impacts to the Hazel Avenue/Folsom Boulevard Intersection (Sacramento County Intersection 2).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-72	3A.15-1j: Participate in Fair Share Funding of Improvements to Reduce Impacts on Hazel Avenue between Madison Avenue and Curragh Downs Drive (Roadway Segment 10).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-73	3A.15-1o: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound U.S. 50 as an alternative to improvements at the Folsom Boulevard/U.S. 50 Eastbound Ramps Intersection (Caltrans Intersection 4).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-74	3A.15-1p: Participate in Fair Share Funding of Improvements to Reduce Impacts on the Grant Line Road/ State Route 16 Intersection (Caltrans Intersection 12).	B (Caltrans MOU/pay SCTDF)	CD (E), PW	See (1) above	Yes
67-75	3A.15-1q: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound U.S. 50 between Zinfandel Drive and Sunrise Boulevard (Freeway Segment 1).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-76	3A.15-1r: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound U.S. 50 between Hazel Avenue and Folsom Boulevard (Freeway Segment 3).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-77	3A.15-1s: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound U.S. 50 between Folsom Boulevard and Prairie City Road (Freeway Segment 4).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-78	3A.15-1u: Participate in Fair Share Funding of Improvements to Reduce Impacts on Westbound U.S. 50 between Prairie City Road and Folsom Boulevard (Freeway Segment 16).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes

67-79	3A.15-1v: Participate in Fair Share Funding of Improvements to Reduce Impacts on Westbound U.S. 50 between Hazel Avenue and Sunrise Boulevard (Freeway Segment 18).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-80	3A.15-1w: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Eastbound/Folsom Boulevard Ramp Merge (Freeway Merge 4).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-81	3A.15-1x: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Eastbound/Prairie City Road Diverge (Freeway Diverge 5).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-82	3A.15-1y: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Eastbound/Prairie City Road Direct Merge (Freeway Merge 6).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-83	3A.15-1z: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Eastbound/Prairie City Road Flyover On-Ramp to Oak Avenue Parkway Off-Ramp Weave (Freeway Weave 8).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-84	3A.15-1aa: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Eastbound/Oak Avenue Parkway Loop Merge (Freeway Merge 9).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-85	3A.15-1dd: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Westbound/Empire Ranch Road Loop Ramp Merge (Freeway Merge 23).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-86	3A.15-1ee: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Westbound/Oak Avenue Parkway Loop Ramp Merge (Freeway Merge 29).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-87	3A.15-1ff: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Westbound/Prairie City Road Loop Ramp Merge (Freeway Merge 32).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-88	3A.15-1gg: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Westbound/Prairie City Road Direct Ramp Merge (Freeway Merge 33).	B Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-89	3A.15-1hh: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Eastbound/Folsom Boulevard Diverge (Freeway Diverge 34).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-90	3A.15-1ii: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Westbound/Hazel Avenue Direct Ramp Merge (Freeway Merge 38).	B (Caltrans MOU)	CD (E), PW	See (1) above	Yes
67-91	3A.15-2a: Develop Commercial Support Services and Mixed-use Development Concurrent with Housing Development, and Develop and Provide Options for Alternative Transportation Modes.	I (pay PFFP fee and Transit fee)	PW	All properties in the FPASP pay an annual Transportation Management Fee via CFD 18	Yes
67-92	3A.15-2b: Participate in the City's Transportation System Management Fee Program.	B (pay City fee)	CD (E), PW	All properties in the FPASP pay an annual Transportation Management Fee via CFD 18	Yes
67-93	3A.15-2c: Participate with the 50 Corridor Transportation Management Association	B (pay City fee)	PW	All properties in the FPASP pay an annual Transportation Management Fee via CFD 18	Yes
67-94	3A.15-3: Pay Full Cost of Identified Improvements that Are Not Funded by the City's Fee Program.	B (Caltrans MOU, PFFP fee, SCTDF)	CD (E), PW	See (1) above	Yes
67-95	3A.15-4a: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements to the Sibley Street/Blue Ravine Road Intersection (Folsom Intersection 2).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-96	3A.15-4b: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements to the Oak Avenue Parkway/East Bidwell Street Intersection (Folsom Intersection 6).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes

67-97	3A.15-4c: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements to the East Bidwell Street/College Street Intersection (Folsom Intersection 7).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-98	3A.15-4d: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements to the East Bidwell Street/Iron Point Road Intersection (Folsom Intersection 21).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-99	3A.15-4e: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements to the Serpa Way/ Iron Point Road Intersection (Folsom Intersection 23)	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-100	3A.15-4f: The Applicant Shall Pay a Fair Share to Fund the Construction of Improvements to the Empire Ranch Road/Iron Point Road Intersection (Folsom Intersection 24).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-101	3A.15-4g: The Applicant Shall Fund and Construct Improvements to the Oak Avenue Parkway/Easton Valley Parkway Intersection (Folsom Intersection 33).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-102	3A.15-4i: Participate in Fair Share Funding of Improvements to Reduce Impacts on the Grant Line Road/White Rock Road Intersection (Sacramento County Intersection 3).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-103	3A.15-4j: Participate in Fair Share Funding of Improvements to Reduce Impacts on Grant Line Road between White Rock Road and Kiefer Boulevard (Sacramento County Roadway Segments 5-7).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-104	3A.15-4k: Participate in Fair Share Funding of Improvements to Reduce Impacts on Grant Line Road between Kiefer Boulevard and Jackson Highway (Sacramento County Roadway Segment 8).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-105	3A.15-4l: Participate in Fair Share Funding of Improvements to Reduce Impacts on Hazel Avenue between Curragh Downs Drive and U.S. 50 Westbound Ramps (Sacramento County Roadway Segments 12-13).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-106	3A.15-4m: Participate in Fair Share Funding of Improvements to Reduce Impacts on White Rock Road between Grant Line Road and Prairie City Road (Sacramento County Roadway Segment 22).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-107	3A.15-4n: Participate in Fair Share Funding of Improvements to Reduce Impacts on White Rock Road between Empire Ranch Road and Carson Crossing Road (Sacramento County Roadway Segment 28).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-108	3A.15-4o: Participate in Fair Share Funding of Improvements to Reduce Impacts on the White Rock Road/Carson Crossing Road Intersection (El Dorado County 1).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-109	3A.15-4p: Participate in Fair Share Funding of Improvements to Reduce Impacts on the Hazel Avenue/U.S. 50 Westbound Ramps Intersection (Caltrans Intersection 1).	B (pay SCTDF)	CD (E), PW	See (1) above	Yes
67-110	3A.15-4q: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound US 50 between Zinfandel Drive and Sunrise Boulevard (Freeway Segment 1).	B (pay SCTDF)	Capitol Southeast Connector JPA	See (1) above	Yes
67-111	3A.15-4r: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound US 50 between Rancho Cordova Parkway and Hazel Avenue (Freeway Segment 3).	B (pay SCTDF)	Capitol Southeast Connector JPA	See (1) above	Yes
67-112	3A.15-4s: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound US 50 between Folsom Boulevard and Prairie City Road (Freeway Segment 5).	B (pay SCTDF)	Capitol Southeast Connector JPA	See (1) above	Yes
67-113	3A.15-4t: Participate in Fair Share Funding of Improvements to Reduce Impacts on Eastbound US 50 between Prairie City Road and Oak Avenue Parkway (Freeway Segment 6).	B (pay PFFP/Interchange fee)	CD (E), PW	See (1) above	Yes

67-114	3A.15-4u: Participate in Fair Share Funding of Improvements to Reduce Impacts on the U.S. 50 Eastbound / Prairie City Road Slip Ramp Merge (Freeway Merge 6).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-115	3A.15-4v: Participate in Fair Share Funding of Improvements to Reduce Impacts on the U.S. 50 Eastbound / Prairie City Road Flyover On Ramp to Oak Avenue Parkway Off Ramp Weave (Freeway Weave 7).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-116	3A.15-4w: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Eastbound / Oak Avenue Parkway Loop Ramp Merge (Freeway Merge 8).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-117	3A.15-4x: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Westbound / Empire Ranch Road Loop Ramp Merge (Freeway Merge 27).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-118	3A.15-4y: Participate in Fair Share Funding of Improvements to Reduce Impacts on U.S. 50 Westbound / Prairie City Road Loop Ramp Merge (Freeway Merge 35).	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-119	W/E SPA Mitigation Measure 4.16-1: Participate in Fair Share Funding of modification of the Iron Point Road/East Bidwell Street Intersection.	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
67-120	W/E SPA Mitigation Measure 4.16-2: Participate in Fair Share Funding of improvements to the Scott Road/Easton Valley Parkway Intersection.	B (pay PFFP fee)	CD (E), PW	See (1) above	Yes
Utilities and Service Systems					
67-121	3A.16-1: Submit Proof of Adequate On- and Off-Site Wastewater Conveyance Facilities and Implement On- and Off-Site Infrastructure Service Systems or Ensure That Adequate Financing Is Secured	M, B	CD, PW	The Phase 1 Sanitary Sewer infrastructure including the off-site sewer trunk main, the Alder Creek Parkway sewer lift station and forced main to serve this subdivision have been constructed by the FPA landowners and have been completed and accepted by the City and are currently in operation.	Yes
67-122	3A.16-3: Demonstrate Adequate SRWTP Wastewater Treatment Capacity	M, B	CD, PW	The City obtained a letter from Regional San which provides verification that there is adequate capacity in the existing Regional San conveyance and treatment system to accommodate the entire Folsom Plan Area at buildout. Confirmation from Regional San was required because the Folsom Plan Area is served by the existing Regional San Lift Station on Iron Point Road. The City Sewer Lift Station and Forced Main which connects to the Regional San Lift Station has been accepted by the City and is currently in operation.	Yes
Water Supply					
67-123	3A.18-1: Submit Proof of Surface Water Supply Availability	M, B	CD, PW	The owner/applicant has constructed the necessary infrastructure to provide potable	Yes

				water to the subdivision. The potable Phase 1 water infrastructure for the Folsom Plan Area has been reviewed, approved and accepted by the City and is currently in operation.	
67-124	3A.18-2a: Submit Proof of Adequate Off-Site Water Conveyance Facilities and Implement Off-Site Infrastructure Service System or Ensure That Adequate Financing Is Secured.	M, B	CD, PW	The off-site potable water infrastructure to serve the subdivision has been reviewed, approved and accepted by the City and is currently in operation. In addition, the City has verified that the off-site potable water infrastructure is adequate to serve the subdivision.	Yes
Cumulative					
67-125	AIR-1-Land: Implement East Sacramento Regional Aggregate Mining Truck Management Plan or Other Measures to Reduce Exposure of Sensitive Receptors to Operational Emissions of Toxic Air Contaminants from Quarry Truck Traffic.	M	CD	The owner/applicant is a participant in the Truck Management Plan at such time there is traffic generated from the future quarries south of the Folsom Plan Area.	Yes
67-126	NOISE-1-Land: Implement East Sacramento Regional Aggregate Mining Truck Management Plan or Other Measures to Reduce Exposure of Sensitive Receptors to Operational Noise from Quarry Truck Traffic.	M	CD	The owner/applicant is a participant in the Truck Management Plan at such time there is traffic generated from the future quarries south of the Folsom Plan Area.	Yes
68.	Folsom South of U.S. Highway 50 Backbone Infrastructure Mitigated Negative Declaration (Backbone MND) Mitigation Monitoring Reporting Program (MMRP) for the Folsom Plan Area Specific Plan (FPASP). Table 2 Below describes the mitigation measures from the Backbone MND (December 2014) MMRP				
Table 2.					
Backbone MND Mitigation Measures Applicable to the Mangini Ranch Phase 2 Tentative Subdivision Map Project.*					
*The mitigation measures specific to the 2014 Backbone Infrastructure MND (designated by roman numerals, e.g., IV-1) apply only to the portions of the Mangini Ranch Phase 2 Project that are included as part of the South of Highway 50 Backbone Infrastructure Project. The MMRP for the Backbone Infrastructure Project is included as Attachment 20.					
Condition	Mitigation Measures Applicable to the Project	Timing	Responsible Agency	Comments	Condition Satisfied?
Aesthetics					
68-1	Backbone MND Mitigation Measure I-1: Design above ground pump station and storage tank facilities to reduce visual impacts.	I	CD, EWR	There are no above ground facilities required to be constructed in Mangini Ranch Phase 2	Yes
68-2	Backbone MND Mitigation Measure I-2: Develop and implement a landscaping plan for pump station and storage tank facilities to reduce visual impacts.	I	CD, EWR	There are no above ground facilities required to be constructed in Mangini Ranch Phase 2	Yes
Air Quality					

68-3	Backbone MND Mitigation Measure III-1: Prepare and Implement NOX Reduction Plan	G, C	CD SMAQMD	(2) The City and its Environmental Compliance Consultant (Helix) have reviewed all MMRP conditions and verified compliance with this Mitigation Measure. Compliance was verified prior to commencement of grading and construction in Spring of 2022. Compliance table is on file with the City.	Yes
68-4	Backbone MND Mitigation Measure III-2: Pay Off-site Mitigation Fee to SMAQMD to off-set NOX Emissions Generated by Construction.	G, C	CD SMAQMD	See (2) above	Yes
68-5	Backbone MND Mitigation Measure III-4: Implement A Site Investigation to Determine the Presence of NOA and, if necessary, Prepare and Implement an Asbestos Dust Control Plan.	G, C	CD SMAQMD	See (2) above	Yes
Biological Resources					
68-6	Backbone MND Mitigation Measure IV-1: Conduct Special-Status Plant Surveys; Implement Avoidance and Mitigation Measures or Compensatory Mitigation	G, C	CD	See (2) above	Yes
68-7	Backbone MND Mitigation Measure IV-2: Implement Conditions of the Biological Opinion (BO) for Federally Listed Vernal Pool Invertebrates.	G, C	CD USFWS	See (2) above	Yes
68-8	Backbone MND Mitigation Measure IV-3: Implement Conditions of the Biological Opinion for Impacts on Valley Elderberry Longhorn Beetle.	G, C	CD USFWS	See (2) above	Yes
68-9	Backbone MND Mitigation Measure IV-4: Western Spadefoot Toad	G, C	CD CDFW	See (2) above	Yes
68-10	Backbone MND Mitigation Measure IV-5: Western Pond Turtle	G, C	CD CDFW	See (2) above	Yes
68-11	Backbone MND Mitigation Measure IV-6(a): Swainson's Hawk Nesting Habitat	G, I, C	CD	See (2) above	Yes
68-12	Backbone MND Mitigation Measure IV-6(b): Swainson's Hawk Foraging Habitat	G, I, C	CD	See (2) above	Yes
68-13	Backbone MND Mitigation Measure IV-7: Tricolored Blackbird	G, C	CD CDFW	See (2) above	Yes
68-14	Backbone MND Mitigation Measure IV-8: Nesting Raptors	G, I	CD CDFW	See (2) above	Yes
68-15	Backbone MND Mitigation Measure IV-9: Nesting Special Status Birds and Migratory Birds	G, C	CD CDFW	See (2) above	Yes
68-16	Backbone MND Mitigation Measure IV-10: Special-Status Bats		CD CDFW	See (2) above	Yes
68-17	Backbone MND Mitigation Measure IV-12: Implement Section 1602 Master Streambed Alteration Agreement	G, C	CD CDFW	See (2) above	Yes
68-18	Backbone MND Mitigation Measure IV-13: Conduct Surveys to Identify and Map Valley Needlegrass Grassland; Implement Avoidance and Minimization Measures or Compensatory Mitigation, if necessary	G, C	CD CDFW	See (2) above	Yes

68-19	Backbone MND Mitigation Measure IV-14: Secure Amended Clean Water Act Section 404 Permit and Section 401 Permit and Implement All Permit Conditions; Ensure No Net Loss of Functions of Wetlands, Other Waters of the U.S., and Waters of the State	G, I, C	CD USACE	See (2) above	Yes
68-20	Backbone MND Mitigation Measure IV-15: Conduct Tree Survey, Prepare and Implement an Oak Woodland Mitigation Plan, Replace Native Oak Trees Removed, and Implement Measures to Avoid and Minimize Indirect Impacts on Oak Trees and Oak Woodland Habitat Retained On-Site.	G, I, C	CD, PW	See (2) above	Yes
68-21	Backbone MND Mitigation Measure IV-11: American Badger	G, C	CD CDFW	See (2) above	Yes
Cultural Resources					
68-22	Backbone MND Mitigation Measure V-1: Comply with the applicable procedures in the FAPA and implementation of applicable historic property treatment plans	G, C	CD USACE	See (2) above	Yes
68-23	Backbone MND Mitigation Measure V-2: Conduct Construction Personnel Education, Conduct On-Site Monitoring if Required, Stop Work if Cultural Resources are Discovered, Assess the Significance of the Find, and Perform Treatment or Avoidance as Required.	G, C	CD USACE	See (2) above	Yes
68-24	Backbone MND Mitigation Measure V-3: Suspend Ground-Disturbing Activities if Human Remains are Encountered and Comply with California Health and Safety Code Procedures.	OG	CD Sacramento County Coroner Native American Heritage Commission	See (2) above	Yes
Geology, Soils, and Paleontological Resources					
68-25	Backbone MND Mitigation Measure VI-1: Prepare Site-Specific Geotechnical Report per CBC Requirements and Implement Appropriate Recommendations.	G, C	CD EWR	See (2) above	Yes
68-26	Backbone MND Mitigation Measure VI-3: Monitor Earthwork during Earthmoving Activities.	G, C	CD	See (2) above	Yes
68-27	Backbone MND Mitigation Measure VI-5(a): Prepare and Implement the Appropriate Grading and Erosion Control Plan.	G	PW	See (2) above	Yes
Hydrology and Water Quality					
68-28	Backbone MND Mitigation Measure VI-5(b): Prepare and Implement the appropriate Grading and Erosion Control Plan for the detention basin West of Prairie City Road.	G	PW	See (2) above	Yes
68-29	Backbone MND Mitigation Measure IX-1: Acquire Appropriate Regulatory Permits and Prepare and Implement SWPPP and BMPs.	G	CD (E) Central Valley Reg. Water Quality Control	See (2) above	Yes

Condition	Mitigation Measures Applicable to the Project	Timing	Responsible Agency	Comments	Condition Satisfied?
Climate Change					
68-30	Backbone MND Mitigation Measure VII-1: Greenhouse Gas Emissions	Prior to releasing RFB to contractors	SMAQMD	See (2) above	
Public Services					
68-31	Backbone MND Mitigation Measure XVI-1: Prepare and Implement a Construction Traffic Control Plan.	G, I, B, C	PW	See (2) above	
Water Improvements					
68-32	Backbone MND Mitigation Measure III-3: North of U.S. Highway 50 Water Improvements	G, I	SMAQMD CD (E)	See (2) above	
68-33	Backbone MND Mitigation Measure V-4 North of U.S. Highway 50 Water Improvements	G, I	CD (E)	See (2) above	
68-34	Backbone MND Mitigation Measure VI-2 North of U.S. Highway 50 Water Improvements	G, I	CD (E)	See (2) above	
68-35	Backbone MND Mitigation Measure VI-4 North of U.S. Highway 50 Water Improvements	G, I	CD (E)	See (2) above	
68-36	Backbone MND Mitigation Measure XII-1 North of U.S. Highway 50 Water Improvements	G, I, B	PW	See (2) above	
69.	Revised Proposed Off-Site Water Facility Alternative Mitigation Monitoring Reporting Program (MMRP) for the Folsom Plan Area Specific Plan (FPASP). Table 3 below describes the mitigation measures from the Revised Water Alternative (November 2012) MMRP.				
Table 3.					
Revised Proposed Off-Site Water Facility Alternative Addendum to the FPASP EIR/EIS Mitigation Measures Applicable to the Mangini Ranch Phase 2 Tentative Subdivision Map Project.*					
*The Folsom South of U.S. Highway 50 Specific Plan Project: Revised Proposed Off-Site Water Facility Alternative was approved December 11, 2012. The November 2012 MMRP for the Revised Proposed Off-Site Water Facility Alternative is included as Attachment 21.					
Aesthetics					
69-1	3B 1-2a: Enhance Exterior Appearance of Structural Facilities.	G, B	CD	(3) The Folsom Plan Area (FPA) landowners did not construct the previously contemplated off-site water system to serve the FPA. Instead, the FPA landowners contributed funding to conserve 20% of the existing potable water being utilized in the City. This conservation effort has been completed and validated in the Sacramento County court system and will serve the FPA throughout buildout. The following mitigation measures were related to the previously contemplated off-site water system to be constructed to serve the FPA and therefore do not apply to this subdivision.	Yes
69-2	3B 1-2b: Prepare Landscaping Plan.	G, B	CD	See (3) above	Yes
69-3	3B 1-3a: Conformance to Construction Lighting Standards.	G, B	CD	See (3) above	Yes
69-4	3B 1-3b: Prepare and Submit a Lighting Master Plan.	G, B	CD	See (3) above	Yes
Air Quality					
69-5	3B 2-1a: Develop and Implement a Construction NOX Reduction Plan.	G, C	CD SMAQMD	See (3) above	Yes
69-6	3B 2-1c: Implement Fugitive Dust Control Measures and a Particulate Matter	G, C	CD	See (3) above	Yes

	Monitoring Program during Construction.		SMAQMD		
69-7	3B 2-3a: Cite Pump Siting Buffers Away from Sensitive Receptors.	G, B	CD SMAQMD	See (3) above	Yes
69-8	3B 2-3b: Conduct Project-Level DPM Screening and Implement Measures to Reduce Annual DPM to Acceptable Concentrations.	G, B	CD SMAQMD	See (3) above	Yes
Climate Change					
69-9	3B.4-1a: Implement GHG Reduction Measures during Construction.	G, B	CD SMAQMD	See (3) above	Yes
69-10	3B.4-1b Prepare and Implement an Off-site Water Facilities Climate Action Plan.	G, B	CD SMAQMD	See (3) above	Yes
Cultural Resources					
69-11	3A.5-1a: Comply with the Programmatic Agreement.	G	CD (E) USACE	See (3) above	Yes
69-12	3A.5-1b: Perform an Inventory and Evaluation of Cultural Resources for the California Register of Historic Places, Minimize or Avoid Damage or Destruction, and Perform Treatment Where Damage or Destruction Cannot be Avoided.	B, C	CD	See (3) above	Yes
69-13	3A.5-2: Conduct Construction Personnel Education, Conduct On-Site Monitoring if Required, Stop Work if Cultural Resources are Discovered, Assess the Significance of the Find, and Perform Treatment or Avoidance as Required.	G, C	CD USACE	See (3) above	Yes
69-14	3A.5-3: Suspend Ground-Disturbing Activities if Human Remains are Encountered and Comply with California Health and Safety Code Procedures.	C	CD USACE	See (3) above	Yes
Geology, Soils, Minerals, and Paleontological Resources					
69-15	3B 7-1a: Prepare Geotechnical Report(s) for the Revised Proposed Off-site Water Facilities and Implement Required Measures.	engineering plans	CD	See (3) above	Yes
69-16	3B 7-1b: Incorporate Pipeline Failure Contingency Measures Into Final Pipeline Design.	engineering plans	CD	See (3) above	Yes
69-17	3B.7-4: Implement Corrosion Protection Measures.	engineering plans	CD	See (3) above	Yes
69-18	3B 7-5: Conduct Construction Personnel Education, Stop Work if Paleontological Resources are Discovered, Assess the Significance of the Find, and Prepare and Implement a Recovery Plan as Required.	C	CD	See (3) above	Yes
Hazards and Hazardous Materials					
69-19	3B 8-1a: Transport, Store, and Handle Construction-Related Hazardous Materials in Compliance with Relevant Regulations and Guidelines.	G, C	CD	See (3) above	Yes
69-20	3B 8-1b: Prepare and Implement a Hazardous Materials Management Plan.	G, C	CD	See (3) above	Yes
69-21	3B 8-5a: Conduct Phase 1 Environmental Site Assessment for Selected Alignment.	G, C	CD	See (3) above	Yes
69-22	3B.8-5b: Develop and Implement a Remediation Plan.	G, C	CD	See (3) above	Yes
69-23	3B 8-7a: Keep Construction Area Clear of Combustible Materials.	G, C	CD	See (3) above	Yes

69-24	3B 8-7b: Provide Accessible Fire Suppression Equipment.	G, C	CD	See (3) above	Yes
Hydrology and Water Quality					
69-25	3B 9-1a: Acquire Appropriate Regulatory Permits and Prepare and Implement SWPPP and BMPs.	G, C	CD CVRWQB	See (3) above	Yes
69-26	3B 9-1b: Properly Dispose of Hydrostatic Test Water and Construction Dewatering in Accordance with the Central Valley Regional Water Quality Control Board.	G, C	CD CVRWQB	See (3) above	Yes
69-27	3B 9-3a: Prepare and Implement Drainage Plan(s) for Structural Facilities.	G, C	CD CVRWQB	See (3) above	Yes
69-28	3B 9-3b: Ensure the Provision of Sufficient Outlet Protection and On-site Containment.	G, C	CD CVRWQB	See (3) above	Yes
Noise					
69-29	3B 11-1a: Limit Construction Hours.	C	CD	See (3) above	Yes
69-30	3B 11-1b: Minimize Noise from Construction Equipment and Staging.	C	CD	See (3) above	Yes
69-31	3B 11-1c: Maximize the Use of Noise Barriers.	G, C	CD	See (3) above	Yes
69-32	3B 11-1d: Prohibit Non-Essential Noise Sources During Construction.	G, C	CD	See (3) above	Yes
69-33	3B 11-1e: Monitor Construction Noise and Provide a Mechanism for Filing Noise Complaints.	G, C	CD	See (3) above	Yes
69-34	3B 11-3: Implement Operational Noise Minimization Measures.	engineering plans	CD	See (3) above	Yes
Parks and Recreation					
69-35	3B 12-1: Provide for Continued Recreational Access as Identified in Mitigation Measure 3.14-1a.	G, C	CD	See (3) above	Yes
Traffic and Transportation					
69-36	3B 15-1a: Prepare Traffic Control Plan.	G, C	CD	See (3) above	Yes
69-37	3B 15-1b: Assess Pre-Off-site Water Facilities Roadway Conditions.	G, C	CD	See (3) above	Yes
Utilities and Service Systems

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No 10841 – A Resolution Ratifying the City Manager’s Execution of a Purchase Agreement with Golden State Fire Apparatus Inc. for a Ladder Truck from Pierce Manufacturing Inc. Pursuant to Folsom Municipal Code Section 2.36.150, and the Approval of an Interfund Loan and Appropriation of Funds
FROM:	Finance Department

RECOMMENDATION / CITY COUNCIL ACTION

Staff recommends the City Council approve Resolution No. 10841 - A Resolution Ratifying the City Manager’s Execution of a Purchase Agreement with Golden State Fire Apparatus, Inc for a Ladder Truck from Pierce Manufacturing, Inc. Pursuant to Folsom Municipal Code Section 2.36.150, and the Approval of an Interfund Loan and Appropriation of Funds.

UPDATE

This item was considered and approved by the Council at its regular meeting on April 26, 2022. Unfortunately, the public was not able to participate in that meeting remotely due to technical difficulties. As a result, staff is requesting that the Council reconsider and approve this item on May 10, 2022.

Before the City Council meeting on April 26th, the manufacturer notified staff that new purchases will be subject to a seven percent (7%) increase starting on April 28, 2022. Consequently, the purchase price of this ladder truck would increase by \$140,000 unless the contract was signed before April 28th. Pursuant to Folsom Municipal Code section 2.36.150, the contract was signed on April 27, 2022 to avoid that significant cost increase.

BACKGROUND / ISSUE

The City of Folsom Fire Department's current 100-foot aerial ladder truck was purchased in 2014 and currently has 54,732 road miles. The vehicle has seen an increase in annual vehicle maintenance and repair costs causing it to be out of service for an extended period.

Staff was notified by Pierce Manufacturing, Inc. that a 7% price increase on new purchases would go into effect on April 28, 2022. In order to secure the purchase prior to the price increase staff is requesting approval for an interfund loan in a not to exceed amount of \$2.0 million.

POLICY / RULE

In accordance with Folsom Municipal Code Section 2.36.080, contracts for supplies, equipment, services, and construction with a value of \$66,141 or greater shall be awarded by City Council.

ANALYSIS

The Fire Department operates one aerial ladder truck in its fleet. The apparatus is staffed on a daily basis to support the mission and tasks it routinely performs throughout the City and region. The truck is equipped with a hydraulic aerial ladder device, which allows firefighters to reach the roofs of commercial buildings up to 100 feet in height. The aerial ladder also allows firefighters to direct water on a large fire from an elevated position which is critical in keeping large fires contained to their building of origin. The apparatus also carries a large amount of equipment to meet the fire, rescue, and emergency medical tasks that it may be assigned.

The build time for this type of apparatus is approximately two years. Due to the length of time needed for the build, the increasing annual maintenance costs, prolonged out of service time on the current truck, and the upcoming price increase staff is requesting approval for the purchase of the ladder truck in the current fiscal year. An additional appropriation for this purchase will be required.

Staff is also requesting approval for an interfund loan from the Highway 50 Improvements Fund (Fund 443) to the General Fund (Fund 010) in a not to exceed amount of \$2.0 million. The Highway 50 Improvements Fund has sufficient funds available for the loan and will be repaid with interest earnings it would have received had there not been a loan, in order to not have a loss to the fund. The loan will be for a period of no more than 10 years and the rate of interest will be the quarterly rate of return the City receives on its pooled investments.

FINANCIAL IMPACT

The purchase of the ladder truck will be for a not-to-exceed amount of \$2.0 million. This purchase will require an appropriation in the current fiscal year in the General Fund (Fund 010)

Fire Department Operating Budget for the purchase of the truck and in the Highway 50 Improvements Fund (Fund 443) for the loan to the General Fund.

The loan from the Highway 50 Improvements Fund will provide the upfront funding for the purchase and the General Fund will repay the loan over no more than 10 years at a rate of interest equal to the quarterly rate of return as shown on the City's investment report each quarter. On April 12, 2022 the City Council approved the use of \$235,000 of American Rescue Plan Act funding which will be utilized for the first payment due as repayment of the interfund loan.

ATTACHMENTS

1. Resolution No 10841 – A Resolution Ratifying the City Manager's Execution of a Purchase Agreement with Golden State Fire Apparatus Inc. for a Ladder Truck from Pierce Manufacturing Inc. Pursuant to Folsom Municipal Code Section 2.36.150, and the Approval of an Interfund Loan and Appropriation of Funds

RESOLUTION NO. 10841**A RESOLUTION RATIFYING THE CITY MANAGER'S EXECUTION OF A PURCHASE AGREEMENT WITH GOLDEN STATE FIRE APPARATUS INC. FOR A LADDER TRUCK FROM PIERCE MANUFACTURING, INC. PURSUANT TO FOLSOM MUNICIPAL CODE SECTION 2.36.150, AND THE APPROVAL OF AN INTERFUND LOAN AND APPROPRIATION OF FUNDS**

WHEREAS, the Fire Department staff has validated the need to acquire a replacement aerial ladder truck for use within the City; and

WHEREAS, staff reviewed and recommended participation in a cooperative purchasing agreement with the Houston-Galveston Area Council utilizing Golden State Fire Apparatus Inc., for purchase of a new ladder truck to ensure purchase of the best product at the best price; and

WHEREAS, the current ladder truck is experiencing extended periods of down time due to maintenance and repairs; and

WHEREAS, the build time for this type of vehicle is approximately two years; and

WHEREAS, the manufacturer has notified the City that a 7% increase on new purchases will occur on April 28, 2022; and

WHEREAS, an interfund loan will allow the City to secure the production of the ladder truck prior to the cost increase; and

WHEREAS, an interfund loan would provide the upfront funding, and the loan would be between the General Fund (Fund 010) and the Highway 50 Improvements Fund (Fund 443) for a not-to-exceed amount of \$2.0 million, and will be repaid over no more than 10 years; and

WHEREAS, the interest rate on the interfund loan will be at the quarterly rate of return as shown on the City's investment report each quarter to not cause any loss to the Highway 50 Improvements Fund; and

WHEREAS, sufficient funds are available in the Highway 50 Improvements Fund (Fund 443) to provide the loan to the General Fund in a not-to-exceed amount of \$2.0 million; and

WHEREAS, the agreement will be in a form acceptable to the City Attorney; and

WHEREAS, this item was considered and approved by the Council on April 26, 2022 but the public was not able to participate remotely in the meeting due to technical difficulties; and

WHEREAS, the City Manager signed the agreement on April 27, 2022 pursuant to Folsom Municipal Code section 2.36.150, Emergency Procurement, to avoid a cost increase of \$140,000;

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom hereby ratifies the City Manager's execution of a purchase agreement with Golden State Fire Apparatus, Inc. for a ladder truck from Pierce Manufacturing, Inc. pursuant to Folsom Municipal Code section 2.36.150.

BE IT FURTHER RESOLVED that the City Council of the City of Folsom authorizes an interfund loan to the General Fund (Fund 010) from the Highway 50 Improvements Fund (Fund 443) in a not-to-exceed amount of \$2.0 million to be repaid over not more than 10 years at the rate of interest equal to the quarterly rate of return as shown on the City's investment report each quarter.

BE IT FURTHER RESOLVED the Finance Director is authorized to appropriate in Fiscal Year 2021-22 in the Highway 50 Improvements Fund (Fund 443) a loan for the not-to-exceed amount of \$2.0 million and to appropriate an additional \$2.0 million in the General Fund (Fund 010) for the purchase of the ladder truck in Fiscal Year 2021-22.

PASSED AND ADOPTED this 10th day of May, 2022, by the following roll-call vote:

PROPOSAL PREPARED FOR:

City of Folsom
 535 Glenn Drive
 Folsom, CA 95630

Submitted Date:	April 15, 2022
Proposal Number:	60415-22A
Expiration Date:	April 28, 2022
Sales Consultant:	Ryan Wright

We hereby propose and agree to furnish, after your acceptance of this proposal and the proper execution by the CITY OF FOLSOM, hereinafter called "Customer" and an officer of Golden State Fire Apparatus, Inc., hereinafter called "GSFA", the following fire apparatus and equipment, hereinafter called "Product":

#	Description	Unit Price
A	One (1) Pierce Manufacturing, Inc. 107' Velocity Ascendant Tiller	1,809,362.08
B	Fire Fighting Equipment	183,000.00
C	Discount for HGAC FS12-19, Product Code FS19VA11	(54,530.00)
D	Pre-Payment Discount for 100% Payment at Time of Order	(81,696.58)
E	SUBTOTAL	1,856,135.50
F	7.75% State Sales Tax	143,850.50
G	California Tire Fee	14.00
H	GRAND TOTAL	2,000,000.00

PROPOSAL SUMMARY

This proposal includes the following items in accordance with the specifications hereto attached:

- Fire apparatus and equipment
- Delivery to GSFA service center in Sacramento
- Final Delivery to Customer head quarters
- Demonstration and familiarization of the Product

PRODUCT COMPLETION

Product shall be built in accordance with the specifications hereto attached, delays due to acts of God, strikes, war, or intentional conflict, failures to obtain chassis, materials, unusual weather conditions or other causes beyond GSFA's control not preventing, within approximately **750 to 780 CALENDAR DAYS** after receipt of this order and the acceptance thereof at our Sacramento, California office. Within thirty (30) calendar days after receipt of this order and acceptance thereof, GSFA shall submit to Customer a production schedule including tentative pre-construction conference, final inspection and final delivery dates.

DELIVERY LOCATION

Product shall be shipped in accordance with the specifications hereto attached and be delivered to you at **FOLSOM, CALIFORNIA**. Proof of insurance must be demonstrated by the Customer to GSFA prior to transferring of the Product(s).

ACCEPTING THIS PROPOSAL

In the event Customer wishes to purchase the Product described in this Proposal and the attached specifications, then, prior to the expiration date listed on page 2 of this Proposal, Customer shall sign and return this Proposal. Thereafter, GSFA and Customer will endeavor to enter into a purchase agreement incorporating this Proposal and including additional terms (a "Purchase Agreement"). If Customer returns a signed copy of this Proposal alone, GSFA will send Customer its form of Purchase Agreement for Customer's review and signature. **If Customer desires to use its standard form of purchase order as the Purchase Agreement, then Customer should return a signed copy of this Proposal along with a copy of such purchase order. All purchase orders shall be made out to GSFA.** GSFA will review such purchase order and contact the Customer regarding any required revisions. Only upon a full execution of a Purchase Agreement shall GSFA and Customer be obligated to purchase and sell the Product set forth in this Proposal.

TERMS AND CONDITIONS

The following Terms and Conditions are hereby made part of this Proposal:

1. Payment Terms (100% Pre-Payment at Time of Order) – Customer shall pay the amount listed on page one of this Proposal, which includes: (i) the total price for the Product (the "Purchase Price"), (ii) the estimated state sales tax on the Product, and (iii) the California tire fee (together with the Purchase Price and estimated state sales tax, the "Grand Total") within fifteen (15) calendar days from the date on which the Purchase Agreement is fully executed. The proposed delivery timeframe for the Product, which is outlined on page one of this Proposal, shall not begin until full payment of the Grand Total is received. In the event Customer does not pay GSFA the Grand Total in the timeframe set forth in this Section 1, GSFA may, in its sole discretion, cancel the Purchase Agreement entered into between the parties.

2. Multiple Unit Purchase – If the Purchase Price includes pricing for multiple units, the price stated on this Proposal shall only be valid if the quantity of Products being proposed are purchased at the same time, pursuant to the same Purchase Agreement.

3. Stock / Demo Units – If applicable, any stock/demo units, including those identified by this Proposal, are available for sale on an as-is, first-come and first served-basis. Regardless of this Proposal, the first Customer to enter into a Purchase Agreement identifying any such stock/demo units shall obtain said units.

4. Order Changes – The Customer may request that GSFA incorporate a change to the Product or the Specifications for the Product by delivering a written change order to GSFA, which shall include a description of the proposed change sufficient to permit GSFA to evaluate the feasibility of such change (a "Change Order"). GSFA will provide Customer a written response (a "Response") stating (i) whether GSFA will accommodate such Change Order (which GSFA may decide in its sole and absolute discretion) and (ii) the terms of the modification to the order, including any increase or decrease in the Purchase Price resulting from such Change Order, and any effect on production scheduling or Delivery resulting from such Change Order. Customer shall have seven (7) days after receipt of the Response to notify GSFA as to whether Customer desires to make the changes GSFA has approved in the Response. In the event Customer counter-signs GSFA's Response, Customer shall pay the increase (or be refunded the decrease) in the Purchase Price prior to final delivery to Customer location.

5. Force Majeure – GSFA shall not be responsible nor deemed to be in default on account of delays in performance due to causes which are beyond GSFA's and manufacturer's control and which make GSFA's performance impracticable, including but not limited to wars, insurrections, strikes, riots, fires, storms, floods, other acts of nature, explosions, earthquakes, accidents, any act of government, delays in transportation, inability to obtain necessary labor supplies or manufacturing facilities, allocation regulations or orders affecting materials, equipment, facilities or completed products, failure to obtain any required license or certificates, acts of God or the public enemy or terrorism, failure of transportation, epidemics, quarantine restrictions, failure of vendors (due to causes similar to those within the scope of this clause) to perform their contracts or labor troubles causing cessation, slowdown, or interruption of work.

6. Cancellation/Termination – In the event Customer and GSFA enter into a Purchase Agreement and Customer thereafter cancels or terminates the Purchase Agreement, GSFA will charge a cancellation fee as follows: (a) 10% of the Purchase Price after order is accepted and entered by GSFA; (b) 20% of the Purchase Price after completion of the pre-construction phase of the order process; and (c) 50% of the Purchase Price after the requisition of any materials or commencement of any manufacturing or assembly of the Product by either GSFA or the manufacturer of the Product. The tier of cancellation fee applicable to any cancellation shall be in the sole and absolute discretion of GSFA.

7. State Sales Tax – Customer shall be responsible for the cost of state sales tax associated with, or attributable to the Product. The taxes owed by Customer for the Product is subject to adjustment for the applicable state sales tax rate in effect when the Product is delivered to the Customer. Therefore, the sales tax will be increased or decreased at the time of delivery if a change in the sales tax rate has occurred, in which case Customer shall pay GSFA (or be refunded by GSFA) the applicable change in sales tax.

8. Proposal Expiration – After the Expiration Date shown on page one of this Proposal, Customer shall require GSFA's written consent to accept this Proposal.

9. Governing Law – This Proposal is to be governed by and under the laws of the state of California.

Thank you for providing Golden State Fire Apparatus, Inc. with the opportunity to provide this proposal. If you have any questions regarding the options presented or need additional options, please contact me.

Sincerely,

I, _____ authorized representative of CITY OF FOLSOM agrees to purchase the proposed Product(s) and agree to the terms and conditions of this proposal and the specifications hereto attached.

Ryan Wright
Golden State Fire Apparatus, Inc.

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10842 - A Resolution Authorizing the City Manager to Execute an Agreement with McGuire and Hester for the Construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project and Appropriation of Funds
FROM:	Environmental and Water Resources Department

RECOMMENDATION / CITY COUNCIL ACTION

The Environmental and Water Resources Department recommends the City Council pass and adopt Resolution No. 10842 - A Resolution Authorizing the City Manager to Execute an Agreement with McGuire and Hester for the Construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project and Appropriation of Funds.

BACKGROUND / ISSUE

The Environmental and Water Resources (EWR) Department identifies infrastructure rehabilitation and replacement projects through water and sewer master plans, ongoing condition assessment programs, and regulatory changes. EWR staff completed an analysis of potential Water Treatment Plant capacity and reliability projects. Through these efforts, EWR staff identified the Water Treatment Plant Backwash and Recycled Water Upgrades Project as a priority project.

There are two Reclaimed Backwash (RBW) ponds (RBW #1 and RBW #2) at the Water Treatment Plant (WTP) that store backwash water, which is water used to clean the filters. This backwash water can be recycled back to the headworks of the WTP. The US Environmental Protection Agency (EPA) allows water agencies to recycle up to 10% of the backwash water based on the water treatment plant capacity. The WTP's current firm capacity is 35 million gallons per day (MGD), and 10% of the current firm capacity, or 3.5 MGD of backwash water,

can be recycled back into the system. The WTP's future firm capacity will be 50 MGD. This project will increase redundancy and reliability to allow for 10% of the future firm capacity, or 5.0 MGD of backwash water, to be recycled back into the WTP system. Additionally, increasing the recycled water capacity greatly reduces the City's risk for the RBW ponds to potentially overflow.

The current piping configuration at the inlet of the RBW ponds only feeds RBW #2. This project will upgrade the piping arrangement to feed either RBW #1 or RBW #2 with isolation valves. Having this operational flexibility in feeding either pond will allow for the maintenance and cleaning of one pond at a time, while the other is still operating. This project also involves upgrading the submersible pumps in the decant pump station (DPS) at the outlet of the RBW ponds to meet the peak flow of approximately 5.0 MGD. Additionally, the DPS control system will be upgraded to provide improved operational controls and flexibility. The DPS wet well also has aging and leaking slide gates that will be replaced.

This resolution will authorize the City Manager to execute an agreement with McGuire and Hester for the construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project in the amount of \$1,834,000, and the budget for this agreement to include a 10% contingency in the amount of \$183,400 and Appropriation of Funds.

POLICY / RULE

In accordance with Chapter 2.36 of the Folsom Municipal Code, supplies, equipment, services, and construction with a value of \$62,657 or greater shall be awarded by City Council.

ANALYSIS

The City completed plans and specifications for the Water Treatment Plant Backwash and Recycled Water Upgrades Project and publicly advertised for bids on February 16, 2022. In addition, the City provided these documents to www.ciplist.com which is also picked up by several area builders' exchanges and the City of Folsom's website. The Environmental and Water Resources Department received the following bids on March 25, 2022, for construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project:

Contractor	Bid Amount
McGuire and Hester	\$1,834,000
T & S Construction Co., Inc.	\$2,110,000
Lorang Brothers Construction, Inc.	\$2,280,329
Syblon Reid	\$2,290,000
TNT Industrial Contractors, Inc.	\$2,297,956

Staff has reviewed the bids submitted and has determined that McGuire and Hester is the lowest responsible and responsive bidder who meets the requirements and specifications set forth in the invitation for bids.

FISCAL IMPACT

The Environmental and Water Resources Department recommends that the contract be awarded to the lowest responsible, responsive bidder, McGuire and Hester for \$1,834,000 with the project budgeted for this agreement in the amount of \$2,017,400 which will include a 10% contingency in the amount of \$183,400.

Approximate project costs to date, which include design, construction administration services, construction management and inspection services total approximately \$362,625. The Water Treatment Plant Backwash and Recycled Water Upgrades Project was included in the FY 2021-22 Capital Improvement Plan with a total project budget of \$1,072,200, which was the original assumed project cost from the initial inclusion in the FY 2017/18 Capital Improvement Plan. Therefore, an additional appropriation will be needed for construction costs, and staff is requesting an appropriation of \$1,307,825 of which \$850,086 will be appropriated in the Water Operating Fund (Fund 520) and \$457,739 in the Water Capital Fund (Fund 521) for a total project budget of \$2,380,025. Funds are available in both Fund 520 and Fund 521 for this additional appropriation.

In February of 2021, the City was awarded a financial assistance agreement from the U.S. Department of the Interior, Bureau of Reclamation (BOR) WaterSMART Drought Response Program for \$750,000 to be utilized on three City water projects: Ashland Water System Rehabilitation Project No.1, The Empire Ranch Non-Potable Well Project, and the Water Treatment Plant Backwash and Recycled Water Upgrades Project. Of the \$750,000 grant, \$250,000 was reserved for the construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project. Following completion of construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project, the City will submit to the BOR for reimbursement of the allotted \$250,000 with \$162,500 to be applied to the Water Operating Fund (Fund 520) and \$87,500 to the Water Capital Fund (Fund 521).

ENVIRONMENTAL REVIEW

This project is replacement and/or improvement of existing infrastructure with negligible or no expansion of use and therefore is categorically exempt from environmental review under the California Environmental Quality Act as noted in Title 14 – California Code of Regulations, Chapter 3 – Guidelines for Implementation of the California Environmental Quality Act, Article 19 – Categorical Exemptions, Sections 15301 (Existing Facilities), 15302 (Replacement or Reconstruction), and/or 15304 (Minor Alterations to Land).

ATTACHMENT

Resolution No. 10842 - A Resolution Authorizing the City Manager to Execute an Agreement with McGuire and Hester for the Construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project and Appropriation of Funds

Submitted,

Marcus Yasutake, Director
ENVIRONMENTAL AND WATER RESOURCES DEPARTMENT

RESOLUTION NO. 10842**A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH MCGUIRE AND HESTER FOR THE CONSTRUCTION OF THE WATER TREATMENT PLANT BACKWASH AND RECYCLED WATER UPGRADES PROJECT AND APPROPRIATION OF FUNDS**

WHEREAS, the City of Folsom has identified this project as a priority to maintain the integrity and operation of the water treatment system; and

WHEREAS, the project is categorically exempt from environmental review under the California Environmental Quality Act; and

WHEREAS, plans and specifications were prepared for this work and publicly advertised for bids on February 16, 2022; and

WHEREAS, McGuire and Hester was the lowest responsible and responsive bidder, with an amount of \$1,834,000; and

WHEREAS, this project was included in the FY 2021-22 Capital Improvement Plan with a project budget of \$1,072,200 staff is now projecting the total project costs will be \$2,380,025; and

WHEREAS, an additional appropriation of funds in the amount of \$1,307,825 is needed for a revised project budget of \$2,380,025 and sufficient funds are available in the Water Operating Fund (Fund 520) and the Water Capital Fund (Fund 521) for this additional appropriation; and

WHEREAS, the agreement will be in a form acceptable to the City Attorney:

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom authorizes the City Manager to execute an agreement with McGuire and Hester for the Construction of the Water Treatment Plant Backwash and Recycled Water Upgrades Project for a not-to-exceed amount of \$1,834,000 with the budgeted amount to include a 10% contingency of \$183,400 for a total of \$2,017,400.

BE IT FURTHER RESOLVED that the Finance Director is authorized to appropriate \$1,307,825 for this agreement. The appropriation will be from the Water Operating Fund (Fund 520) in the amount of \$850,086 and from the Water Capital Fund (Fund 521) in the amount of \$457,739, for a total project budget of \$2,380,025.

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10843 - A Resolution Authorizing the City Manager to Execute an Agreement with Inferrera Construction Management Group, Inc. for Construction Management and Inspection Services for the Water Treatment Plant Backwash and Recycled Water Upgrades Project
FROM:	Environmental and Water Resources Department

RECOMMENDATION / CITY COUNCIL ACTION

The Environmental and Water Resources Department recommends the City Council pass and adopt Resolution No. 10843 - A Resolution Authorizing the City Manager to Execute an Agreement with Inferrera Construction Management Group, Inc. for Construction Management and Inspection Services for the Water Treatment Plant Backwash and Recycled Water Upgrades Project.

BACKGROUND / ISSUE

The Environmental and Water Resources (EWR) Department identifies infrastructure rehabilitation and replacement projects through water and sewer master plans, ongoing condition assessment programs, and regulatory changes. EWR staff completed an analysis of potential Water Treatment Plant capacity and reliability projects. Through these efforts, EWR staff identified the Water Treatment Plant Backwash and Recycled Water Upgrades Project as a priority project.

There are two Reclaimed Backwash (RBW) ponds (RBW #1 and RBW #2) at the Water Treatment Plant (WTP) that store backwash water, which is water used to clean the filters. This backwash water can be recycled back to the headworks of the WTP. The US Environmental Protection Agency (EPA) allows water agencies to recycle up to 10% of the backwash water

based on the water treatment plant capacity. The WTP’s current firm capacity is 35 million gallons per day (MGD), and 10% of the current firm capacity, or 3.5 MGD of backwash water, can be recycled back into the system. The WTP’s future firm capacity will be 50 MGD. This project will increase redundancy and reliability to allow for 10% of the future firm capacity, or 5.0 MGD of backwash water, to be recycled back into the WTP system. Additionally, increasing the recycled water capacity greatly reduces the City’s risk for the RBW ponds to potentially overflow.

The current piping configuration at the inlet of the RBW ponds only feeds RBW #2. This project will upgrade the piping arrangement to feed either RBW #1 or RBW #2 with isolation valves. Having this operational flexibility in feeding either pond will allow for the maintenance and cleaning of one pond at a time, while the other is still operating. This project also involves upgrading the submersible pumps in the decant pump station (DPS) at the outlet of the RBW ponds to meet the peak flow of approximately 5.0 MGD. Additionally, the DPS control system will be upgraded to provide improved operational controls and flexibility. The DPS wet well also has aging and leaking slide gates that will be replaced.

This resolution will authorize the City Manager to execute an agreement with Inferrera Construction Management Group, Inc. for construction management and inspection services for the Water Treatment Plant Backwash and Recycled Water Upgrades Project in the amount of \$184,951.

POLICY / RULE

In accordance with Chapter 2.36 of the Folsom Municipal Code, supplies, equipment, services, and construction with a value of \$66,141 or greater shall be awarded by City Council.

ANALYSIS

In October of 2018, the EWR Department completed a pre-qualification process for consultants for construction management and inspection services. Inferrera Construction Management Group, Inc., HydroScience Engineers, Inc., and NV5, Inc. were three of the consulting firms selected to provide these services for this type of project through the pre-qualification process.

On April 1, 2022, the City requested proposals from these consultants for construction management and inspection services for the Water Treatment Plant Backwash and Recycled Water Upgrades Project. The EWR department received proposals from Inferrera Construction Management Group, Inc., and HydroScience Engineers, Inc., on April 15, 2022, and NV5, Inc. chose to not submit a proposal.

The fee schedules from the proposals received are outlined below:

Consultant	Fee Amount
Inferrera Construction Management Group, Inc.	\$184,951
HydroScience Engineers, Inc.	\$226,640
NV5, Inc.	N/A

EWR staff evaluated the consultant submittals based on relevant project experience, the consultant's understanding of the background and requirements of the project, qualifications and experience of the consultant's construction management team, previous work with municipalities, cost and best value to the City.

Inferrera Construction Management Group, Inc. was determined to provide the best value to the City based on the fee amount, past municipal project experience involving work of similar scope and complexity, staff coordination, and abilities for performing these types of construction management and inspection services.

The construction management and inspection for this project will require approximately 872 person-hours of highly technical and specialized services, including full-time construction inspection. The proposed fee for construction management and inspection services is consistent with recent City construction projects with respect to the construction duration. Construction management services require full-time, on-site inspection, and include other necessary tasks such as project schedule tracking, review and/or coordination of project submittals, coordination with the other on-going City construction projects, materials testing, and overall owner representation throughout project construction.

This resolution will authorize the City Manager to execute an agreement with Inferrera Construction Management Group, Inc. for construction management and inspection services for the Water Treatment Plant Backwash and Recycled Water Upgrades Project in the amount of \$184,951.

FINANCIAL IMPACT

The Water Treatment Plant Backwash and Recycled Water Upgrades Project was included in the FY 2021-22 Capital Improvement Plan with a total project budget of \$1,072,200. Sufficient funds are available in both the Water Operating Fund (520) and Water Capital Fund (521) and the project for this agreement.

ENVIRONMENTAL REVIEW

This project is replacement and/or improvement of existing infrastructure with negligible or no expansion of use and therefore is categorically exempt from environmental review under the California Environmental Quality Act as noted in Title 14 – California Code of Regulations, Chapter 3 – Guidelines for Implementation of the California Environmental Quality Act, Article 19 – Categorical Exemptions, Sections 15301 (Existing Facilities), 15302 (Replacement or Reconstruction), and/or 15304 (Minor Alterations to Land).

ENVIRONMENTAL AND WATER RESOURCES DEPARTMENT

RESOLUTION NO. 10843

A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH INFERRERA CONSTRUCTION MANAGEMENT GROUP, INC. FOR CONSTRUCTION MANAGEMENT AND INSPECTION SERVICES FOR THE WATER TREATMENT PLANT BACKWASH AND RECYCLED WATER UPGRADES PROJECT

WHEREAS, the City has identified this project as a priority to maintain integrity and operation of the water treatment system; and

WHEREAS, Inferrera Construction Management Group, Inc. by reason of their past experience and abilities for performing these types of services, are qualified to perform the required construction management and inspection services for the project and provide the best value to the City; and

WHEREAS, the Water Treatment Plant Backwash and Recycled Water Upgrades Project was included in the FY 2021-22 Capital Improvement Plan; and

WHEREAS, sufficient funds are available in the both the Water Operating Fund (Fund 520) and the Water Capital Fund (Fund 521) for this agreement; and

WHEREAS, the agreement will be in a form acceptable to the City Attorney:

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom authorizes the City Manager to execute an agreement with Inferrera Construction Management Group, Inc. for construction management and inspection services for the Water Treatment Plant Backwash and Recycled Water Upgrades Project for a not-to-exceed amount of \$184,951.

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10844 – A Resolution Approving the Preliminary Engineer’s Report for the following Landscaping and Lighting Districts for Fiscal Year 2022-2023 and Setting Public Hearing for American River Canyon North, American River Canyon North No. 2, American River Canyon North No. 3, Blue Ravine Oaks, Blue Ravine Oaks No. 2, Briggs Ranch, Broadstone, Broadstone No. 4, Broadstone Unit No. 3, Cobble Ridge, Cobble Hills Ridge II/Reflections II, Folsom Heights, Folsom Heights No. 2, Hannaford Cross, Lake Natoma Shores, Los Cerros, Natoma Station, Natoma Valley, Prairie Oaks Ranch, Prairie Oaks Ranch No. 2, Prospect Ridge, Sierra Estates, Silverbrook, Steeplechase, The Residences at American River Canyon, The Residences at American River Canyon II, Willow Creek Estates East, Willow Creek Estates East No. 2, Willow Creek Estates South, and Willow Springs
FROM:	Parks and Recreation Department

RECOMMENDATION / CITY COUNCIL ACTION

Staff recommends the City Council adopt Resolution No. 10844 – A Resolution Approving the Preliminary Engineer’s Report for the following Landscaping and Lighting Districts for Fiscal Year 2022-2023 American River Canyon North, American River Canyon North No. 2, American River Canyon North No. 3, Blue Ravine Oaks, Blue Ravine Oaks No. 2, Briggs Ranch, Broadstone, Broadstone No. 4, Broadstone Unit No. 3, Cobble Ridge, Cobble Hills Ridge II/Reflections II, Folsom Heights, Folsom Heights No. 2, Hannaford Cross, Lake Natoma Shores, Los Cerros, Natoma Station, Natoma Valley, Prairie Oaks Ranch, Prairie Oaks Ranch No. 2, Prospect Ridge, Sierra Estates, Silverbrook, Steeplechase, The Residences at American River Canyon, The Residences at American River Canyon II, Willow Creek Estates East, Willow Creek Estates East No. 2, Willow Creek Estates South, and Willow Springs.

BACKGROUND / ISSUE

The City of Folsom has thirty existing Landscaping and Lighting Districts. Each year, as part of the annual assessment process, an Engineer's Report must be prepared in accordance with the requirement of Article 4 of Chapter 1 of Part 2 of Division 15 of the *Streets and Highways Code* and the *Landscaping and Lighting Act of 1972*.

The Engineer's Report for Fiscal Year 2022-2023 will address all thirty districts in one report and will be submitted for final approval to the City Council.

On March 22, 2022, the City Council approved Resolution No. 10825 – A Resolution Directing the Preparation of the Engineer's Report for American River Canyon North, American River Canyon North No. 2, American River Canyon North No. 3, Blue Ravine Oaks, Blue Ravine Oaks No. 2, Briggs Ranch, Broadstone, Broadstone No. 4, Broadstone Unit No. 3, Cobble Ridge, Cobble Hills Ridge II/Reflections II, Folsom Heights, Folsom Heights No. 2, Hannaford Cross, Lake Natoma Shores, Los Cerros, Natoma Station, Natoma Valley, Prairie Oaks Ranch, Prairie Oaks Ranch No. 2, Prospect Ridge, The Residences at American River Canyon, The Residences at American River Canyon II, Sierra Estates, Silverbrook, Steeplechase, Willow Creek Estates East, Willow Creek Estates East No. 2, Willow Creek Estates South, and Willow Springs Landscaping and Lighting Assessment Districts within the City of Folsom for FY 2022-23. The attached resolution approves the Preliminary Engineer's Report for the thirty districts, declares the continued assessment for each district and sets the date of the public hearing for final approval of the Engineer's Report. The attached Preliminary Engineer's Report for FY 2022-23 addresses all thirty districts in one report and is submitted for City Council review and approval. Included within the report are the following for each district:

- A. Plans and specifications for the maintenance of the improvements (on file in the Parks and Recreation Department).
- B. Cost estimates of maintaining the improvements.
- C. Diagram of the assessment districts.
- D. Estimated costs for maintaining the improvements.

Under the provision of Section 54954.6 of the Government Code, each year a public meeting and public hearing are to be held on the levy of assessments. The attached resolution sets the public hearing for the July 12, 2022 City Council meeting.

POLICY / RULE

The City Council is required to adopt a resolution approving the Preliminary Engineer's Report as part of the annual assessment process pursuant to Article 4 of Chapter 1 of Part 2 of Division 15 of the *Streets and Highways Code* (*Landscaping and Lighting Act of 1972*). The City Council is also required to adopt a resolution declaring intention to levy and collect assessments pursuant to Section 54954.6 of the Government Code and Section 22624 of the *Streets and Highways Code*.

ANALYSIS

The attached Preliminary Engineer's Report (Attachment 2) prepared by the Engineer of Record, SCI Consulting Group, is for all thirty Landscaping and Lighting Districts for FY 2022-23. This report (one for each district and combined into one document) is submitted for City Council review and has been prepared in accordance with the Streets and Highways Code and includes the following: plans and specifications, estimated costs and budgets, method of apportionment, the proposed assessment for FY 2022-23, and the assessment diagram.

Assessment to Properties

Assessments to properties within each district are the same as FY 2021-22, with the exception of two districts; Willow Creek Estates East No. 2, and Broadstone 4. Willow Creek Estates East No. 2 has 3 zones, zones A & B have an increase of \$3.98 from \$99.53 last year to \$103.51 this year. Zone C has an increase of \$3.66 over last year bringing their rate from \$91.49 last year to \$95.15 this year. Broadstone 4 has 4 zones, zone A has an increase of \$1.17 this year from \$38.81 last year to \$39.98 this year. Zone B has an increase of \$1.10 over last years rate and increased from 36.96 last year to 38.06 this year. Zone C has an increase of \$1.10 over last years rate and increased from \$36.42 to \$37.52. Zone D had an increase of \$1.06 this year and increased from \$35.74 last year to \$36.80 this year. There are another ten districts that have escalators and are eligible for CPI increases that will not be utilized this year. Those districts are American River Canyon North No. 3, Blue Ravine Oaks No. 2, Broadstone 3, Cobble Ridge, Folsom Heights No.2, Natoma Valley, Prospect Ridge, The Residences, The Residences II, and Sierra Estates.

Installment Summary

The installment summaries describe short-term installments collected pursuant to Section 22660 of the Streets and Highways Code to meet the districts' future repair and replacement needs anticipated to occur within an approximate five-year time frame, as well as long-term installments collected to meet those future needs anticipated to occur within 5 to 30-year time frames.

Comparison to Last Year

District budgets for this upcoming year will continue focusing on improvements and restorations that enhance each district's commitment to water conservation, prolonging assets life, drought tolerant landscaping improvements, fire safety, and tree stewardship. As such, some districts will be retrofitting and centralizing irrigation controllers, inventorying street trees, changing out plant materials to water wise varietals, and converting over to LED Streetlights. Many of the City's districts are over 20 years old and do not have escalators built

into their rates to track with cost-of-living increases and economic changes. As such, districts being monitored for future outreach regarding a new assessment overlay district are Briggs Ranch (31 years old), and Hannaford Cross (31 years old), and Cobble Ridge II / Reflections II (28 years old). Lastly the City will be starting the first stages of outreach for an increase in Natoma Station in the 2021-22, and 2022-2023 Fiscal Years.

FINANCIAL IMPACT

Each Landscaping and Lighting District levies and collects funds to cover operating and maintenance costs. There is no fiscal impact to the City of Folsom General Fund. Below is a summary of the proposed assessments for FY 2022-23. There are twenty-eight (28) districts in which the assessments remain the same, two (2) districts with increased assessments, and two (2) districts that are being removed from the tax roll (Union Square because it has an HOA that manages the landscape areas and Silverbrook because there is capacity in the fund balance).

District	Annual Assessment per unit	Credit or increase*	Annual Net Assessment

WHEREAS, the Engineer's Report for the Assessment Districts has been made, filed with the City Clerk and duly considered by the Council and is hereby deemed sufficient and preliminarily approved. The Engineer's Report shall stand as the Engineer's Report for all subsequent proceedings under and pursuant to this Resolution, Section 22565, et. seq., of the California Streets and Highways Code and Article XIID of the California Constitution; and

WHEREAS, it is the intention of the City Council to levy and collect assessments within the Assessment Districts for FY 2022-23. Within the Assessment Districts, the existing and proposed improvements are generally described as follows:

The improvements to be undertaken by the Assessment Districts are described as installation, maintenance and servicing of public facilities, including but not limited to, turf, ground cover, shrubs and trees, irrigation systems, drainage systems, street lighting, fencing, sound walls, sidewalks, monuments, statuary, fountains, water quality ponds, park facilities, open space, bike trails, walkways, drainage swales and other ornamental structures and facilities, entry signage, street pavers, art work, and all necessary appurtenances, and labor, materials, supplies, utilities and equipment, as applicable, for property owned or maintained by the City of Folsom. Services provided include all necessary service, operations and maintenance of the above-mentioned improvements, as applicable, for any property owned or maintained by the City of Folsom.

WHEREAS, the Assessment Districts consist of the lots and parcels shown on the boundary maps of the Assessment Districts on file with the City Clerk of the City of Folsom, and reference is hereby made to such maps for further particulars; and

WHEREAS, reference is hereby made to the Engineer's Report, on file with the City Clerk, for a full and detailed description of the improvements, the boundaries of the assessment districts and any zones therein, and the estimated cost of the improvements and the proposed assessments upon assessable lots and parcels of land within the Assessment Districts; and

WHEREAS, prior to the conclusion of the hearing, any interested person may file a written protest with the City Clerk, or, having previously filed a protest, may file a written withdrawal of that protest. A written protest shall state all grounds of objection. A protest by a property owner shall contain a description sufficient to identify the property owned by such owner; and

WHEREAS, the City Clerk shall cause a notice of the hearing to be given by publishing a notice once, at least ten (10) days prior to the date of the hearing above specified, in a newspaper circulated in the City of Folsom.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom authorizes:

1. **APPROVAL OF PRELIMINARY ENGINEER'S REPORT:** The City Council of the City of Folsom hereby approves, as submitted, the preliminary Engineer's Report for the City of Folsom Landscaping and Lighting Districts for FY 2022-23.

PROPOSED ASSESSMENT: The City Council of the City of Folsom intends to continue to levy and collect assessments during FY 2022-23 within the City of Folsom Landscaping and Lighting Districts. Annual Assessments are the same as FY 2021-22 for all Assessments Districts, with the exception of Broadstone No. 4, and Willow Creek Estates East No. 2 who will have increases in their assessments as shown in Annual Assessment Table above. Two districts, Natoma Station-Union Square and Silverbrook are being taken off the tax rolls for Fiscal Year 2022-23.

2. **REVIEW OF PRELIMINARY ENGINEER'S REPORT:** Affected property owners and interested persons may review the Engineer's Report, which contains a full and detailed description of each of the Assessment District boundaries, within the City of Folsom Landscaping and Lighting Districts, the improvements, and the proposed maintenance budget and assessments upon each parcel within each Assessment District, at the City of Folsom located at 50 Natoma Street, Folsom, California 95630 between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday.

- 3. **PUBLIC HEARING:** The City Council has scheduled a public hearing on the proposed assessments within each Assessment District on July 12 2022, at 6:30 p.m., at the City of Folsom, City Council Chambers, 50 Natoma Street, Folsom, California 95630, for the purpose of allowing public testimony regarding the proposed assessments and for the Council’s final action upon the Engineer’s Report and proposed assessments.

Introduction

Overview

The City of Folsom Landscaping and Lighting Districts (the "Districts") provides funding for the installation, maintenance and servicing of landscaping, sidewalks, fences, walls, parks, open space, signage, soundwalls, street lighting, and other public improvements in the City of Folsom. Thirty such districts exist as follows:

- American River Canyon North
- American River Canyon North No. 2
- American River Canyon North No. 3
- Blue Ravine Oaks
- Blue Ravine Oaks No. 2
- Briggs Ranch
- Broadstone
- Broadstone Unit No.3
- Broadstone No. 4
- Cobble Ridge
- Cobble Hills Ridge II/Reflections II
- Folsom Heights
- Folsom Heights No. 2
- Hannaford Cross
- Lake Natoma Shores
- Los Cerros
- Natoma Station (Including Union Square Annexation)
- Natoma Valley (Formerly Lakeridge Estates)
- Prairie Oaks Ranch
- Prairie Oaks Ranch No. 2
- Prospect Ridge
- Sierra Estates
- Silverbrook
- The Residences at American River Canyon
- The Residences at American River Canyon II
- Steeplechase
- Willow Creek Estates East
- Willow Creek Estates East No. 2
- Willow Creek Estates South
- Willow Springs

These assessments were established in previous fiscal years. In each subsequent year for which the assessments will be continued, the City Council ("Council") must direct the preparation of an Engineer's Report, budgets and proposed assessments for the upcoming fiscal year. The Engineer's Report also identifies future planned projects. After the Engineer's Report is completed, the Council may preliminarily approve the Engineer's Report and proposed assessments and establish the date for a public hearing on the continuation of the assessments. This Engineer's Report ("Report") was prepared pursuant to the direction of the Council.

This Report was prepared to establish the budget for the improvements that would be funded by the proposed 2022-23 assessments and to define the benefits received from the improvements by property within the Districts and the method of assessment apportionment to lots and parcels. This Report and the proposed assessments have been made pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the "Act") and Article XIID of the California Constitution (the "Article").

If the Council approves this Engineer's Report and the proposed assessments by resolution, a notice of the proposed assessment levies must be published in a local paper at least 10 days prior to the date of the public hearing. The resolution preliminarily approving the Engineer's Report and establishing the date for a public hearing typically directs that this notice be published.

Following the minimum 10-day time period after publishing the notice, a public hearing is held for the purpose of allowing public testimony about the proposed continuation of the assessments. This hearing is currently scheduled for July 12, 2022. At this hearing, the Council would consider approval of a resolution confirming the assessments for fiscal year 2022-23. If so confirmed and approved, the assessments would be submitted to the County Auditor/Controller for inclusion on the property tax rolls for Fiscal Year 2022-23.

Included is a separate but integral tool: the City of Folsom Landscaping and Lighting District Improvement Plan ("Improvement Plan"). It is a separate planning document that identifies the type of upcoming improvement (e.g. re-landscaping a corridor or painting a wall); the estimated cost; any installments required for short-term (less than five years) and/or long term (not greater than 30 years) improvements, and the approximate schedule for completion of the improvement. The City intends to continually update and revise the Improvement Plan throughout each year to reflect the current status of improvement projects, budget updates and/or changes in priorities.

The concept of the Improvement Plan arose from the City's commitment to comply with the requirements of the Act as well as produce a valuable instrument that enables the City to schedule, prioritize, and plan for needed maintenance and servicing improvements in the districts. It also serves as a user-friendly means for members of the public to review and understand the use of the assessment revenues generated from each district.

Legal Analysis

Silicon Valley Taxpayers Association, Inc. v Santa Clara County Open Space Authority

In July of 2008, the California Supreme Court issued its ruling on the Silicon Valley Taxpayers Association, Inc. v. Santa Clara County Open Space Authority ("SVTA vs. SCCOSA"). This ruling is the most significant court case in further legally clarifying the substantive assessment requirements of Proposition 218 which was approved by California voters in 1996. Several of the most important elements of the ruling included further emphasis that:

- Benefit assessments are for special, not general, benefit
- The services and/or improvements funded by assessments must be clearly defined
- Special benefits are directly received by and provide a direct advantage to property in each district

This Engineer's Report is consistent with the SVTA vs. SCCOSA decision and with the requirements of Article XIII C and XIII D of the California Constitution based on the following factors:

1. Most of the Districts were formed prior to the passage of Proposition 218 and/or with unanimous approval of property owners. Although these assessments are consistent with Proposition 218, the California judiciary has generally referred to pre-Proposition 218 assessments as "grandfathered assessments" and held them to a different standard than post Proposition 218 assessments.
2. The Districts are narrowly drawn to only include the specially benefiting parcels, and the assessment revenue derived from real property in each District is expended only on specifically identified improvements and/or maintenance and servicing of those improvements in that District that confer special benefits to property in that District.
3. The use of unique and narrowly drawn Districts ensures that the improvements constructed and maintained with assessment proceeds are located in close proximity to the real property subject to the assessment, and that such improvements provide direct and special benefit to the property in that District.
4. Due to their proximity to the assessed parcels, the improvements and maintenance thereof financed with assessment revenues in the District provide a direct advantage to properties in that District, and the benefits conferred on such property in each District are more extensive and direct than a general increase in property values.
5. The assessments paid in each District are proportional to the special benefit that each parcel within that District receives from such improvements and the maintenance thereof because:

- a. The specific improvements and maintenance and utility costs thereof in each District and their respective costs are specified in this Engineer's Report; and
- b. Such improvement and maintenance costs in each District are allocated among different types of property located within each District, and equally among those properties which have similar characteristics and receive similar special benefits.

Therefore, given the factors highlighted above, this Engineer's Report is consistent with the SVTA vs. SCCOSA decision and with the requirements of Article XIII C & XIII D of the California Constitution.

Dahms v. Downtown Pomona Property

On June 8, 2009, the 4th District Court of Appeal upheld a benefit assessment for property in the downtown area of the City of Pomona. On July 22, 2009, the California Supreme Court denied review. In Dahms the court upheld an assessment that was 100% special benefit (i.e. 0% general benefit) on the rationale that the services and improvements funded by the assessments were directly provided to property in the assessment district. The Court also upheld discounts and exemptions from the assessment for certain properties.

Bonander v. Town of Tiburon

On December 31, 2009, the 1st District Court of Appeal overturned a benefit assessment approved by property owners to pay for placing overhead utility lines underground in an area of the Town of Tiburon. The Court invalidated the assessments on the grounds that the assessments had been apportioned to assessed property based in part on relative costs within sub-areas of the assessment district instead of proportional special benefits.

Beutz v. County of Riverside

On May 26, 2010 the 4th District Court of Appeals issued a decision on the Steven Beutz v. County of Riverside ("Beutz") appeal. This decision overturned an assessment for park maintenance in Wildomar, California, primarily because the general benefit associated with improvements and services were not explicitly calculated and quantified and separated from the special benefits.

Golden Hill Neighborhood Association v. City of San Diego

On September 22, 2011, the San Diego Court of Appeal issued a decision on the Golden Hill Neighborhood Association V. City of San Diego appeal. This decision overturned an assessment for street and landscaping maintenance in the Greater Golden Hill neighborhood of San Diego, California. The court described two primary reasons for its decision. First, like in *Beutz*, the court found the general benefits associated with services were not explicitly calculated, quantified and separated from the special benefits. Second, the court found that the City had failed to record the basis for the assessment on its own parcels.

Compliance with Current Law

This Engineer's Report is consistent with the requirements of Article XIIC and XIID of the California Constitution and with the *SVTA* decision because the Improvements to be funded are clearly defined; the Improvements are directly available to and will directly benefit property in the Assessment Districts; and the Improvements provide a direct advantage to property in each of the Assessment Districts that would not be received in absence of the Assessments.

This Engineer's Report is consistent with *Beutz, Dahms and Greater Golden Hill* because the Improvements will directly benefit property in each of the Assessment Districts and the general benefits have been explicitly calculated and quantified and excluded from the Assessments. The Engineer's Report is consistent with *Bonander* because the Assessments have been apportioned based on the overall cost of the Improvements and proportional special benefit to each property.

Impact of Recent Proposition 218 Decisions

This Engineer's Report is consistent with the *SVTA vs. SCCOSA, Dahms, Bonander – Beutz* and *Greater Golden Hill* decisions and with the requirements of Article XIIC and XIID of the California Constitution based on the following factors:

1. The assessment revenue derived from real property in each assessment District within the City of Folsom is extended only on specific landscaping and other improvements and/or maintenance and servicing of those improvements in that assessment district
2. The use of various assessment districts ensures that the landscaping and other improvements constructed and maintained with assessment proceeds are located in close proximity to the real property subject to the assessment, and that such improvements provide a direct advantage to the property in the assessment district.

3. Due to their proximity to the assessed parcels, the improvements and maintenance thereof financed with assessment revenues in each assessment district benefits the properties in that assessment district in a manner different in kind from the benefit that other parcels of real property in the City of Folsom derive from such improvements, and the benefits conferred on such property in each assessment district are more extensive and direct than a general increase in property values.
4. The assessments paid in each assessment district are proportional to the special benefit that each parcel within that assessment district receives from such improvements and the maintenance thereof because:
 - a. The specific landscaping and other improvements and maintenance and utility costs thereof in each assessment district and the costs thereof are specified in this Engineer's Report; and
 - b. Such improvement and maintenance costs in each assessment district are allocated among different types of property located within each assessment district, and equally among those properties which have similar characteristics and receive similar special benefits.

There have been a number of clarifications made to the analysis, findings and supporting text in this Report to ensure that this consistency is well communicated.

Plans & Specification

The work and improvements proposed to be undertaken by the City of Folsom Landscaping and Lighting Districts (the "Districts") and the cost thereof paid from the continuation of the annual assessment provide special benefit to parcels within the Districts defined in the Method of Assessment herein. Consistent with the Landscaping and Lighting Act of 1972, (the "Act") the work and improvements (the "Improvements") are generally described as follows:

Within these districts, the existing and proposed improvements are generally described as the installation, maintenance and servicing of turf, ground cover, shrubs and trees, irrigation systems, drainage systems, street lighting, fencing, soundwalls, sidewalks, monuments, statuary, fountains, water quality ponds, park facilities, open space, bike trails, walkways, drainage swales and other ornamental structures and facilities, entry signage, street pavers, art work, and monuments and all necessary appurtenances, and labor, materials, supplies, utilities and equipment, as applicable, for property owned or maintained by the City of Folsom. Any plans and specifications for these improvements have been filed with the City of Folsom and are incorporated herein by reference.

"Maintain" or "maintenance" means the furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- (a) Repair, removal, or replacement of all or any part of any improvement.*
- (b) Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.*
- (c) The removal of trimmings, rubbish, debris, and other solid waste.*
- (d) The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.*

"Service" or "servicing" means the furnishing of:

- (a) Electric current or energy, gas, or other illuminating agent for any public lighting facilities or for the lighting or operation of any other improvements.*
- (b) Water for the irrigation of any landscaping, the operation of any fountains, or the maintenance of any other improvements.*

The assessment proceeds from each District will be exclusively used for Improvements within that District plus Incidental expenses. Reference is made to the Estimate of Cost and Budget, Appendix A and to the additional plans and specifications, including specific expenditure and improvement plans by District, which are on file with the City.

Estimate of Cost and Budget

Description of Improvements

Following are descriptions of improvements for the various City of Folsom Landscaping and Lighting Districts.

American River Canyon North

- Maintenance of lawns and trees within landscape medians, corridors, and open spaces.
- Purchase of irrigation water from San Juan Suburban Water District.
- Maintenance of Irrigation system, entry fountain, plantings, sidewalks and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- No planned projects.

Future Improvement Projects:

- Water fall pump, autofill, filters, chlorination systems.
- Waterfall pond liner.

American River Canyon North No. 2

- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- No planned projects.

Future Improvement Projects:

- Paint and replace streetlight poles.

American River Canyon North No. 3

- Purchase of electric power.
- Purchase of irrigation water from San Juan Suburban Water District.
- Maintenance of landscaping, open space, lighting, signs, sidewalk and walls, waterfalls, including turf, ground cover, shrubs and trees, irrigation systems, drainage systems, street lighting, walls, signs.

Planned Improvement Projects for 2022-23:

- Centralized irrigation controller upgrade.
- Signage replacement.
- Mystic Hills replace missing landscape.

Future Improvement Projects:

- Tree and Landscape Improvements (or replacements).
- ARC Drive/Canyon Falls (Cascade Perimeter) landscape remove/replace trees, mow band replacement.
- Main Walking Trail – landscaping, irrigation, stairs and clean up.
- Baldwin Dam path repair.
- Waterfall rock repair.

Blue Ravine Oaks

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from City of Folsom.
- Maintenance of irrigation system, plantings, sidewalks, fences, walls and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- No planned projects.

Future Improvement Projects:

- Blue ravine wall repair.

Blue Ravine Oaks No. 2

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from City of Folsom.
- Maintenance of irrigation system, plantings, sidewalks, fences, walls and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree removal/replacement.

Future Improvement Projects:

- Riley Street Fence Replacement.
- Tree removal/replacement.
- Signage replacement.

Briggs Ranch

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from City of Folsom.
- Maintenance of irrigation system, plantings, sidewalks, trails, walls, fences, open space area, signage and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Shrub and tree upgrades (Blue Ravine/E. Natoma).
- Fence/Wall repair/replacement.
- Fence repair/replacement (E. Natoma Partial).
- Pet station repair/replacement.

Future Improvement Projects:

- Bollard repair/replacement.
- Fence repair/replacement (Blue Ravine/E Natoma)
- Fence repair/replacement (E. Natoma Partial).
- Entry sign replacement (brass lettering)
- Irrigation upgrades/replacement (3 controllers).
- Landscape lighting upgrades or replacement.
- Tree and Landscape Improvements (partial collection).

Broadstone

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from City of Folsom.
- Maintenance of irrigation system, plantings, sidewalks, trails, sound walls, water quality ponds and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree and Landscape Improvements (partial fund collection).
- Bollard repair/replacement.
- Light pole/fixture replacement of KW.

Future Improvement Projects:

- Repair irrigation/replace shrubs – Iron Point median.
- Tree and Landscape Improvements (or replacements).
- Shrub replacement throughout (some irrigation repair) 28 acres.
- Landscape light replacement.
- Pet station replacement (7).
- Signage repair/replacement.
- Turf removal/irrigation retrofit.
- Irrigation upgrades and flow (15 controllers).

Broadstone Unit No. 3

- Purchase of electric power.
- Maintenance of street light fixtures.

Planned Improvement Projects for 2022-23:

- No planned projects.

Future Improvement Projects:

- Paint streetlight poles (350 poles).

Broadstone No. 4

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from City of Folsom.
- Maintenance of irrigation system, plantings, sidewalks, trails, sound walls, water quality ponds and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Repair irrigation, replant shrubs: Rathbone, Knofler, other interior areas
- Landscape light repair/replacement (60 lights).

Future Improvement Projects:

- No planned projects.

Cobble Hills Ridge II/Reflections II

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from the City of Folsom.

- Maintenance of Irrigation system, plantings, sidewalks, soundwalls, signage, parks, park facilities, open space and streetlights.
- Purchase of Electric Power from SMUD.
- Maintenance of public lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree and Landscape Improvements (or replacements).
- Mini Park and path to Lembi turf and shrub repair/replacement.

Future Improvement Projects:

- Fence repair/replacement (225 feet)
- Wall repairs and painting.
- Signage improvement/replacement.
- Tree and Landscape Improvements (or replacements).
- Shrub replacement – Sibley/Corner, Glenn/Oxborough.

Cobble Ridge

- Maintenance of shrubs and trees within landscape medians and corridors.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of irrigation system, plantings, open space areas, soundwalls, sidewalks and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Fence repair and painting.
- Tree pruning.

Future Improvement Projects:

- No planned projects.

Folsom Heights

- Maintenance of shrubs and trees within landscape medians and corridors, corridors, bike trails, walkways, and open space areas.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of irrigation system, plantings, fences, walls, sidewalks and streetlights.
- Purchase of Electric Power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Ladder fuel work.

Future Improvement Projects:

- No planned projects.

Folsom Heights No. 2

- Maintenance of lawns and trees within landscape medians and corridors, corridors, bike trails, walkways, and open space areas.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of irrigation system, plantings, fences, walls, sidewalks and streetlights.
- Purchase of Electric Power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree care in open space.
- Tree pruning.

Future Improvement Projects (if funded with new District):

- No planned projects.

Hannaford Cross

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water and electric power for the two mini parks in a 70%/30%: City/District contribution. (based on maintenance assignments)
- Maintenance of Irrigation system, bike trails, walkways, fences, walls, guard shack, drainage swale, plantings, sidewalks and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Lakeside fence repair.
- Repairs at guard shack.
- Tree pruning.

Future Improvement Projects:

- No planned projects.

Lake Natoma Shores

- Maintenance of lawns and trees within landscape medians and corridors.
- Maintenance of Irrigation system, soundwalls, signage, street pavers, plantings, sidewalks and streetlights.
- Purchase of Irrigation water from the City of Folsom.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- LED conversion.
- Tree pruning.

Future Improvement Projects:

- No planned projects.

Los Cerros

- Maintenance of landscape medians and corridors.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of Irrigation system, walls, plantings, sidewalks and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Ladder fuel work.
- Tree replacement.
- Tree pruning
- Paint street light poles.

Future Improvement Projects:

- Install flow package and master valve.
- Upgrade irrigation controllers

Natoma Station

- Maintenance of Irrigation system, walls, signage, art work, open space areas, parks, plantings and streetlights.
- Purchase of irrigation water from the City of Folsom.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Ladder fuel work
- Light pole replacement
- Shrub & tree replacement & concrete work on turnpike
- Iron Point Rd shrub & tree replacement
- Bigfoot mini park tree replacement
- Tree replacement / wall damage on back diamond
- Shrub / tree replacement on Blue Ravine
- Tree pruning.

Future Improvement Projects:

- Tree & Landscape Improvements (or replacements)
- Wetland area improvements
- Wall repair and painting (7800 linear feet)
- Mini park replanting / bark (2 parks @ .5 acre)
- Road paver replacement
- Signage repair / replacement
- Sidewalk repair
- Irrigation upgrades
- Art repair

Natoma Station-Union Square

Note: Union Square which is a Benefit zone of Natoma Station will be providing its own landscaping and lighting maintenance via an existing homeowner's association and servicing for 2022-23.

Natoma Valley

- Installation, maintenance and servicing of turf, ground cover, shrubs and trees, irrigation systems, drainage systems, street lighting, soundwalls, retaining walls, fencing and all necessary appurtenances, and labor, materials, supplies, utilities and equipment

Planned Improvement Projects for 2022-23:

- Interior landscape improvements.
- Tree pruning.

Future Improvement Projects:

- No planned projects.

Prairie Oaks Ranch

- Maintenance and servicing of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of Irrigation system, walls, signage, fences, open space areas, trellises, and streetlights along Grover Road, Russi Road, Willard Drive, Stewart Street and the interior public roadways within the subdivisions.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- No planned projects.

Future Improvement Projects:

- No planned projects.

Prairie Oaks Ranch No. 2

- Maintenance and servicing of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of Irrigation system, walls, signage, fences, open space areas, trellises, and streetlights along Grover Road, Russi Road, Willard Drive, Stewart Street and the interior public roadways within the subdivisions.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree pruning.
- Tree replacement (replace empty areas).
- LED Landscape Lights.
- Landscape replacement.
- Fence replacement.
- Ladder fuel.
- Repair damaged walls (stucco half walls).

Future Improvement Projects:

- Landscape replacement on Blue Ravine
- Landscape Replacement on Riley
- Landscape Replacement on Prairie City
- Landscape replacement on Iron Point
- Fence replacement

- Post and cable replacement
- Repair damaged wall

Prospect Ridge

- Maintenance of Irrigation system, walls, signage, open space areas, parks, plantings and streetlights.
- Purchase of irrigation water from the City of Folsom.
- Purchase of electric power.
- Maintenance of street lighting fixtures.
- Maintenance of landscape corridors.

Planned Improvement Projects for 2022-23:

- Tree pruning.

Future Improvement Projects:

- Plant replacement.

Sierra Estates

- Maintenance of landscaping, lighting and soundwalls along Rowland Court, Dolan Court and Riley Street including turf, ground cover, shrubs and trees, irrigation systems, drainage systems, street lighting, fencing, soundwalls, monuments, statuary, fountains, and other ornamental structures and facilities, entry monuments and all necessary appurtenances
- Purchase of water from the City of Folsom
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree replacement.

Future Improvement Projects:

- No planned projects.

Silverbrook

- Note: Silverbrook will not be levied for fiscal year 2022-23, due to a surplus in revenue.
- Maintenance of lawns and trees within landscape median.
- Purchase of irrigation water from City of Folsom.
- Maintenance of Irrigation system, entry median, plantings, sidewalks and streetlights.

- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree replacement.

Future Improvement Projects:

- No planned projects.

Steeplechase

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of Irrigation system, plantings, sidewalks and streetlights.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Fence replacement.
- Tree pruning.

Future Improvement Projects:

- No planned projects.

The Residences at American River Canyon

- Maintenance landscaping, lighting and soundwalls along American River Canyon Drive and Oak Avenue including turf, ground cover, shrubs and trees, irrigation systems, drainage systems, street lighting, sound-walls, and all necessary appurtenances.
- Purchase of water from San Juan Water District.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Landscape replacement.

Future Improvement Projects:

- No planned projects.

The Residences at American River Canyon II

- Installation, maintenance and servicing of turf, ground cover, shrubs, and trees, irrigation systems, drainage systems, street lighting, walls, signage and all necessary appurtenances, and labor, materials, supplies, utilities, and equipment

Planned Improvement Projects for 2022-23:

- Landscape replacement.

Future Improvement Projects:

- No planned projects.

Willow Creek Estates East

- Maintenance of lawns and trees within landscape medians and corridors.
- Purchase of irrigation water from the City of Folsom.
- Maintenance of irrigation system, walls, plantings, sidewalks and streetlights, as well as weed abatement.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- No planned projects.

Future Improvement Projects: (if funding available)

- No planned projects.

Willow Creek Estates East No. 2

- Maintenance of irrigation system, walls, plantings, sidewalks and streetlights, as well as weed abatement.
- Purchase of irrigation water from the City of Folsom.
- Purchase of electric power.
- Maintenance of street lighting fixtures.
- Maintenance of lawns and trees within landscape medians and corridors.

Planned Improvement Projects for 2022-23:

- 2 flow packages & Master Valve Install
- Light pole replacement (3)
- Tree pruning
- Oleander replacement on Blue Ravine frontage.

Future Improvement Projects:

- Landscape replacement on Oak Avenue.
- Landscape replacement on Blue Ravine.
- Irrigation controller upgrade (4 controllers).
- Tree and landscape improvement / replacement.

Willow Creek Estates South

- Purchase of irrigation water from the City of Folsom.
- Maintenance of Irrigation system, walls, entry signage, drainage way, parks, sidewalks and streetlights, as well as weed abatement.
- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- Tree pruning.
- New planting around replaced signs.
- Interior sign replacement.

Future Improvement Projects:

- No planned projects.

Willow Springs

- Purchase of electric power.
- Maintenance of street lighting fixtures.

Planned Improvement Projects for 2022-23:

- LED retrofits..

Future Improvement Projects:

- Paint/repair Lamp Posts.

Budgets

Below is a summary of the Budgets for the various districts. Refer to Appendix A - Budgets, for detailed budgets for each district.

District	Improvement Costs	Incidental Costs	Total Improvement Costs
American River Canyon North	\$146,500.00	\$6,309.54	\$152,809.54
American River Canyon North 2	\$56,000.00	\$1,475.40	\$57,475.40
American River Canyon North 3	\$373,600.00	\$542.54	\$374,142.54
Blue Ravine Oaks	\$17,700.00	\$2,343.35	\$20,043.35
Blue Ravine Oaks No. 2	\$48,800.00	\$5,917.35	\$54,717.35
Briggs Ranch	\$84,500.00	\$16,831.41	\$101,331.41
Broadstone	\$192,500.00	\$66,632.70	\$259,132.70
Broadstone Unit No.3	\$24,500.00	\$2,885.00	\$27,385.00
Broadstone No. 4	\$347,500.00	\$15,210.38	\$362,710.38
Cobble Hills II/Reflections II	\$41,350.00	\$12,078.51	\$53,428.51

Method of Apportionment

This section of the Engineer's Report includes an explanation of the benefits to be derived from the installation, maintenance and servicing of the Improvements throughout the Districts, and the methodology used to apportion the total assessment to properties within the City of Folsom Landscaping and Lighting Districts.

The City of Folsom Landscaping and Lighting Districts consist of all Assessor Parcels within the boundaries of each District defined as defined by Assessment Diagram included within this report and the Assessor Parcel Numbers listed within the included Levy roll. The parcels include all privately or publicly owned parcels within said boundaries. The method used for apportioning the assessment is based upon the proportional special benefits to be derived by the properties in the City of Folsom Landscaping and Lighting Districts over and above general benefits conferred on real property or to the public at large. The apportionment of special benefit is a two-step process: the first step is to identify the types of special benefit arising from the improvements, and the second step is to allocate the assessments to property based on the estimated relative special benefit for each type of property.

Discussion of Benefit

In summary, the assessments can only be levied based on the special benefit to property. This benefit is received by property over and above any general benefits. With reference to the requirements for assessments, Section 22573 of the Landscaping and Lighting Act of 1972 states:

"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."

Proposition 218, as codified in Article XIID of the California Constitution, has confirmed that assessments must be based on the special benefit to property and the assessment must not exceed the reasonable cost of the proportional benefit upon the assessed parcel:

"No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

The following benefit categories summarize the types of special benefit to residential, commercial, industrial and other lots and parcels resulting from the Improvements to be provided with the assessment proceeds. These categories of special benefit are supported by various California legislation and supporting studies which describe the types of special benefit received by property from Improvements such as those proposed by the City of Folsom Landscaping and Lighting Districts. These types of special benefit are summarized as follows:

- Proximity to improved landscaped areas within each District.
- Access to improved landscaped areas within each District.
- Improved Views within each District.
- Extension of a property's outdoor areas and green spaces for properties within close proximity to the Improvements.
- Creation of individual lots for residential and commercial use that, in absence of the District and the services provided by the District, would not have been created.

In this regard, the recent the SVTA v. SCCOSA decision provides enhanced clarity to the definitions of special benefits to properties in three distinct areas:

- Proximity
- Expanded or improved access
- Views

The SVTA v. SCCOSA decision also clarifies that a special benefit is a service or improvement that provides a direct advantage to a parcel, and that indirect or derivative advantages resulting from the overall public benefits from a service or improvement are general benefits. The SVTA v. SCCOSA decision also provides specific guidance that park improvements are a direct advantage and special benefit to property that is proximate to a park improved by an assessment:

The characterization of a benefit may depend on whether the parcel receives a direct advantage from the improvement (e.g. proximity to a park) or receives an indirect, derivative advantage resulting from the overall public benefits of the improvement (e.g. general enhancement of the district's property values).

Proximity, improved access and views, in addition to the other special benefits listed above further strengthen the basis of these assessments.

Benefit Factors

The special benefits from the Improvements are further detailed below:

Proximity to improved landscaped areas within the District

Only the specific properties within close proximity to the Improvements are included in each District. Therefore, property in the Districts enjoys unique and valuable proximity and access to the Improvements that the public at large and property outside the Districts do not share.

In absence of the assessments, the Improvements would not be provided and the landscaping areas in the Districts would be degraded due to insufficient funding for maintenance, upkeep and repair. Therefore, the assessments provide Improvements that are over and above what otherwise would be provided. Improvements that are over and above what otherwise would be provided do not by themselves translate into special benefits but when combined with the unique proximity and access enjoyed by parcels in the Districts, they provide a direct advantage and special benefit to property in the Districts.

Access to improved landscaped areas within the District

Since the parcels in each District are the only parcels that enjoy close access to the Improvements, they directly benefit from the unique close access to improved landscaping areas that are provided by the Assessments. This is a direct advantage and special benefit to property in that District.

Improved views within the District

The District, by maintaining these landscaped areas, provides improved views to properties in each District. The properties in a District enjoy close and unique proximity, access and views of the Improvements; therefore, the improved and protected views provided by the Assessments are another direct and tangible advantage that is uniquely conferred upon property in a District.

Extension of a property's outdoor areas and green spaces for properties within close proximity to the Improvements

In large part because it is generally cost prohibitive to provide large open land areas in development projects, the residential, commercial and other benefiting properties in each District do not have large outdoor areas and green spaces. The landscaped areas within each District provide additional outdoor areas that serve as an effective extension of the land area for properties that are in close proximity to the Improvements. The Improvements, therefore, provide an important, valuable and desirable extension of usable land area, which confers a direct advantage and special benefit to properties in close proximity to the Improvements.

Creation of individual lots for residential and commercial use that, in absence of the assessments, would not have been created

Typically, the original owner/developer of the property within the Districts can petition the City to establish the assessment districts. As parcels were sold, new owners were informed of the assessments through the title reports, and in some cases, through Department of Real Estate "White Paper" reports that the parcels were subject to assessment. Purchase of property was also an "agreement" to pay the assessment. In absence of the assessments, the lots within the Districts would probably not have been subdivided and created. These lots, and the improvements they support, are a special benefit to the property owners.

General versus Special Benefit

The assessments from the City of Folsom Landscaping and Lighting Districts are used to fund improvements and increased levels of maintenance to the grounds adjoining the properties in the Districts. In absence of those Districts, such Improvements would not be provided and the properties would not have been subdivided and improved to the same extent. The Districts were specifically proposed for formation to provide additional and improved improvements, and services in the Districts. In absence of the assessments, these public resources could not be created and revenues would not be available for their continued maintenance and improvement. Therefore, the assessments solely provide special benefit to property in the Districts over and above the general benefits conferred by the general facilities of the City.

Although these Improvements may be available to the general public at large because the Districts are accessible by members of the public, the Improvements within each District were specifically designed, located and created to provide additional and improved public resources for property inside the Districts, and not the public at large. Other properties that are either outside the Districts or within the Districts and not assessed, do not enjoy the unique proximity, access, views and other special benefit factors described previously. These Improvements are of special benefit to properties located within the Districts because they provide a direct advantage to properties in the Districts that would not be provided in absence of the assessments.

Although the analysis used to support these assessments concludes that the benefits are solely special, as described above, consideration is made for the suggestion that a portion of the benefits are general. General benefits cannot be funded by these assessments - the funding must come from other sources.

The maintenance and servicing of these improvements is also partially funded, directly and indirectly from other sources including City of Folsom, the County of Sacramento and the State of California. This funding comes in the form of grants, development fees, special programs, and general funds, as well as direct maintenance and servicing of facilities (e.g. curbs, gutters, streets, drainage systems, and other infrastructure maintenance items such as pond clean outs and street sweeping, etc.) This funding from other sources more than compensates for general benefits, if any, received by the properties within the districts.

In the 2009 Dahms case, the court upheld an assessment that was 100% special benefit on the rationale that the services funded by the assessments were directly provided within the assessment district over and above the services already provided by the City within the boundaries of the assessment district. It is also important to note that certain services funded by the assessments in Pomona are similar to the services funded by the Assessments described in this Engineer’s Report and the Court found these services to be 100% special benefit. Similar to the assessments in Pomona, the Assessments described in this Engineer’s Report fund improvements and services directly provided within the Assessment District to benefit properties within the assessment district and not to the public at large, and these properties enjoy close proximity and access to the Improvements. Therefore, Dahms establishes a basis for minimal or zero general benefits from the Assessments.

Step 1: Calculation of the General Benefit

The general benefits from this assessment may be quantified as illustrated in the following table.

Benefit Factor	Relative Weight	General Benefit Contribution	Relative General Benefit
Creation of parcels	90	0%	0
Improved views	5	10%	0.5
Improved nighttime visibility and safety from streetlights	5	20%	1
	100		1.5
Total Calculated General Benefit =			1.5%

As a result, the City of Folsom will contribute at least 1.5% of the total budget from sources other than the assessment. The contribution offsets any general benefits from the Assessment Services.

Step 2: Calculation of Current General Benefit Contribution from City

The general benefit contribution is satisfied from the sum of the following components:

The City of Folsom owns, maintains, rehabilitates and replaces curb and gutter along the border of the Assessment Districts improvements. This curb and gutter serves to support, contain, retain, manage irrigation flow and growth, and provide a boundary for the improvements. The contribution from the City of Folsom toward general benefit from the maintenance, rehabilitation and replacement of the curb gutter is conservatively estimated to be 1%.

The City of Folsom owns and maintains storm drainage systems along the border of the Assessment Districts improvements. This system serves to prevent flooding and associated damage to the improvements, and manage urban runoff including local pollutants loading from the improvements. The contribution from the City of Folsom towards general benefit from the maintenance, and operation of the local storm drainage systems are conservatively estimated to be 1%.

The City of Folsom owns and maintains local public streets along the border of the Assessment District improvements. These public streets proved access to the improvements for its enjoyment as well as efficient maintenance. The contribution from the City of Folsom towards general benefit from the maintenance of local public streets is conservatively estimated to contribute 1%.

The Improvements were constructed by the original owner/developer(s) as a condition of development. The value of the construction of the improvements can be quantified and monetized as an annuity. Since this construction was performed and paid by non-assessment funds, this "annuity" can be used to offset general benefit costs, and is conservatively estimated to contribute 25%.

Therefore, the total General Benefit that is conservatively quantified at 1.5% is more than offset by the total non-assessment contribution towards general benefit of 28%.

Method of Assessment

The second step in apportioning assessments is to determine the relative special benefit for each property. This process involves determining the relative benefit received by each property in relation to a single family home, or, in other words, on the basis of Single Family Equivalents (SFE). This SFE methodology is commonly used to distribute assessments in proportion to estimated special benefit and is generally recognized as providing the basis for a fair and appropriate distribution of assessments. For the purposes of this Engineer's Report, all properties are designated a SFE value, which is each property's relative benefit in relation to a single family home on one parcel. In this case, the "benchmark" property is the single family detached dwelling which is one Single Family Equivalent or one SFE.

Assessment Apportionment

The improved properties within the Districts consist of primarily of single family, multi-family, commercial and non-assessed parcels, with the vast majority being single family. Since all single family residential parcels in the Districts are deemed to have good proximity to the improvements, such single family properties receive similar benefit from the proposed improvements and are assigned 1.0 SFE units. The benefits for other types of properties are further defined as follows.

General Case

Many of the City of Folsom Districts contain only single family residences and non-assessed properties such as parks and green spaces. These districts are:

Blue Ravine Oaks	165 residential lots
Blue Ravine Oaks No. 2	165 residential lots
Cobble Ridge	98 residential lots

Cobble Hills Ridge II/Reflections II	389 residential lots
Hannaford Cross	103 residential lots
Lake Natoma Shores	113 residential lots
Los Cerros	337 residential lots
Natoma Station – (Union Square Annexation)	116 residential lots
Natoma Valley	72 residential lots
Sierra Estates	25 residential lots
Silverbrook	122 residential lots
Steeplechase	154 residential lots
The Residences at American River Canyon	17 residential lots
The Residences at ARC II Annexation	10 residential lots
Willow Creek East	747 residential lots
Willow Springs	<u>517</u> residential lots
Total	3,150

These Districts are assessed per Assessment Table 1, next page.

Assessment Table 1

Description	SFEs
Single Family Parcel	1.00
Non Assessed (e.g. open space, park land etc.)	0.00

Note: In 2006-07, a general case SFE rate was established for condominiums in districts in which the original Engineer’s Report did not anticipate condominium development. This rate is 0.67 SFEs.

American River Canyon North

There are 410.124 acres in American River Canyon North. There are 1006 residential lots and each one is assigned 1 benefit unit (SFE.) The 2.00 acres of currently undeveloped property is assigned 2.63 SFEs per acre from a rate determined at the time of formation of this district:

American River Canyon North properties are assessed per Assessment Table 2, below, as per the original formation documents:

Assessment Table 2

Description	SFEs
Single Family Parcel	1.00
Undeveloped Property, per acre	2.63
Non Assessed (e.g. open space, park land etc.)	0.00

American River Canyon North No. 2

There are 130.805 acres in American River Canyon North No. 2. American River Canyon No. 2 lies completely within American River Canyon North. There are 161 residential lots and each one is assigned 1 benefit unit (SFE).

American River Canyon North No. 2 properties are assessed per Assessment Table 3, below, as per the original formation documents:

Assessment Table 3

Description	SFEs
Single Family Parcel	1.0000
Undeveloped Residential Property, per lot	0.3273
Non Assessed (e.g. open space, park land etc.)	0.0000

American River Canyon North No 3

There are 410.124 acres in American River Canyon North. There are 1006 residential lots.

Each assessable parcel in the Assessment District receives a special and direct benefit from the improvements in the Assessment District. Since the Assessment District is comprised of residential single family improved properties and all properties have good proximity to the improvements, all assessable parcels within the Assessment District are estimated to benefit equally from the improvements associated with the Assessment District, and the costs associated with the improvements are apportioned equally to all parcels on the basis of current or proposed dwelling units. Each parcel is assigned SFE units relative to the number of current or proposed dwelling units on the parcel.

The procedure used to arrive at each parcel's annual levy amount is:

$$\text{Balance to Levy} / \text{Total SFE Benefit Units in District} = \text{Assessment Amount Per Benefit Unit}$$

There are three Zones of Benefit. In Zone A each parcel is assigned 1 benefit unit (SFE), in Zone B, each parcel is assigned 0.83 benefit unit (SFE) and Zone C each parcel is assigned 0.50 benefit unit (SFE.) Properties in Zone B and Zone C receive lower benefit units because they currently pay for common open space areas within their zone. In 2007, when the American River Canyon North District No. 3 was formed, an analysis of the associated landscaping improvements was performed to determine the relative benefit to each zone from this new assessment. It was estimated that Zone B receives 17% of the special benefit, and Zone C receives 50% of the special benefit. Therefore, the SFE units for Zone B and Zone C have been adjusted accordingly.

American River Canyon North properties are assessed per Assessment Table 4, below:

Assessment Table 4

Description	SFEs
Zone A – Original ARCN Area	1.0000
Zone B – Canyon Falls Village Area	0.8300
Zone C – ARCN No. 2 Area	0.5000

Broadstone

According to the Broadstone Landscaping and Lighting “Method of Spread,” there are 895.301 assessable acres in Broadstone. Of these, 416.1455 acres are divided into 1,682 single family residential lots (4.2 lots per acre average) and 479.156 acres are divided into multi-family and commercial lots. The multi-family parcels are APN 0721070002 through APN 0721070100 are known as Bentley Square West (99 units); and APN 0721610001 through APN 072161053 are known as Bentley Square East (53 units). [In addition to these properties listed in the “Method of Spread,” other multi-family complexes are also assessed, including Vessona, Sherwood, Haldon.] Although these projects were designed as single family small lot divisions, the density is consistent with the multi-family land use designation. These projects are consistent with both the Multi-Family Low Density General Plan Land Use Designation (MLD) and the Multi-Family zoning (R-M_PD) of the project site. There are 1530 single family residential lots and each one is assigned 1 SFEs. There are 312.555 developed, non-single family acres and each is assigned 2.1 SFEs per acre [This is the rate applied to commercial properties, as implicitly indicated in the Method of Spread]. (4.2 units * 0.5). Unrecorded single family residential lots are assigned .65 SFEs.

There are 134.387 undeveloped, non-single family residential acres and each one will be assigned 0.704 SFEs per acre. (4.2 units *.0.5 * 0.335). There are 152 lots with Bentley Square East and West and each is assigned .0962 SFEs per lot.

Broadstone properties are assessed per Assessment Table 4, below, as per the original formation documents:

Assessment Table 5

Description	SFEs
Single Family Parcel	1.0000
Multi-Family Parcels, per unit	0.0962
Developed Non-Single Family, per acre	2.1000
Undeveloped Non-Single Family, per acre	0.7040
Non Assessed (e.g. open space, park land etc.)	0.0000

Broadstone No. 3

There are 559.36 acres in Broadstone No. 3. Of these, 325 acres are single family residential lots (2.034 lots per acre average) and 11.48 acres are divided into multi-family residential and 26.93 acres are non-assessed for use as parks, open space, etc. There are 382 single family residential lots and each one is assigned 1 SFE. There are 28.09 developed, non-single family residential acres and each one is assigned 2.034 SFEs per acre. There are 283 undeveloped, single family lots and each one is assigned 0.326 SFEs. There are 171.71 undeveloped, non-single family residential acres and each one is assigned 0.326 x 2.034 SFEs.

Broadstone No.3 properties are assessed per Assessment Table 5, below, as per the original formation documents:

Assessment Table 6

Description	SFEs
Single Family Parcel	1.0000
Undeveloped Single Family Parcel	0.3260
Developed Non-Single Family, per acre	2.0340
Undeveloped Non-Single Family, per acre	0.6630
Non Assessed (e.g. open space, park land etc.)	0.0000

Broadstone No. 4**Residential**

Certain residential properties in the Assessment District that contain a single residential dwelling unit are assigned one Single Family Equivalent or 1.0 SFE. Detached or attached houses, zero-lot line houses and town homes are included in this category of single family residential property. If there is more than one single family detached dwelling on a parcel, it will be charged one SFE per single family detached dwelling.

Properties with more than one residential unit (other than parcels with more than one detached single family dwelling as described above) are designated as multi-family residential properties. These properties benefit from the Improvements in proportion to the number of dwelling units that occupy each property, the average number of people who reside in multi-family residential units versus the average number of people who reside in a single family home and the relative size of each type of residential dwelling unit. The population density factors for the area in Sacramento County encompassing the Assessment District, as depicted in the following table, provide the basis for determining the SFE factors for residential properties. Using the total population in a certain property type in the area from the 2010 Census and dividing it by the total number of such households, finds that approximately 2.91 persons occupy each single family residence, whereas an average of 2.12 persons occupy each condominium. The ratio of 2.91 people on average for a single family residence and 2.12 people per dwelling unit in a condominium unit results in a population density equivalent of 0.73 for condominiums. Next, the relative building areas are factored into the analysis because special benefits are related to the average size of a property, in addition to average population densities. For a condominium, this calculation results in an SFE factor of 0.40 per dwelling unit. A similar calculation is used for the SFE Rates for other residential property types.

Commercial

SFE values for commercial and industrial land uses are based on the equivalence of special benefit on a land area basis between single family residential property and the average commercial/industrial property. The SFE values for various commercial and industrial land uses are further defined by using average employee densities because the special benefit factors described previously can be measured by the average number of people who work at commercial/industrial properties.

In order to determine employee density factors, the findings from the San Diego Association of Governments Traffic Generators Study (the "SANDAG Study") are used because these findings were approved by the State Legislature as being a good representation of the average number of employees per acre of land area for commercial and industrial properties. As determined by the SANDAG Study, the average number of employees per acre for commercial and industrial property is 24.

In comparison, the average number of people residing in a single family home in the area is 2.91. Since the average lot size for a single family home in the Assessment District is approximately 0.20 acres, the average number of residents per acre of residential property is 14.55.

The employee density per acre is generally 1.65 times the population density of single family residential property per acre (24 employees per acre / 14.55 residents per acre). Therefore, the average employee density can be used as the basis for allocating benefit to commercial or industrial property since a commercial/industrial property with 4.8 employees receives generally similar special benefit to a residential property with 1 resident. This factor of equivalence of benefit between 1 resident to 4.8 employees is the basis for allocating commercial/industrial benefit. Table 2 below shows the average employees per acre of land area or portion thereof for commercial and industrial properties and lists the relative SFE factors per quarter acre for properties in each land use category.

Commercial and industrial properties in excess of 5 acres generally involve uses that are more land intensive relative to building areas and number of employees (lower coverage ratios). As a result, the benefit factors for commercial and industrial property land area in excess of 5 acres is determined to be the SFE rate per quarter acre for the first 5 acres and the relevant SFE rate per each additional acre over 5 acres.

Institutional properties that are used for residential, commercial or industrial purposes are also assessed at the appropriate residential, commercial or industrial rate.

Vacant

The benefit to vacant properties is determined to be proportional to the corresponding benefits for similar type developed properties; however, at a lower rate due to the lack of improvements on the property. A measure of the benefits accruing to the underlying land is the average value of land in relation to Improvements for developed property. The SFE factor for vacant/undeveloped parcels is 0.25 per parcel.

The benefit to undeveloped properties is determined to be proportional to the corresponding benefits for similar type developed properties, but at a lower rate due to the lack of improvements on the property. A measure of the benefits accruing to the underlying land is the average value of land in relation to Improvements for developed property. An analysis of the assessed valuation data from the County of Sacramento found that approximately 25% of the assessed value of improved properties is classified as the land value. It is reasonable to assume, therefore, that approximately 25% of the benefits are related to the underlying land and 75% are related to the improvements and the day-to-day use of the property. Using this ratio, the SFE factor for vacant/undeveloped parcels is 0.25 per parcel.

Other Properties

Article XIID stipulates that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment.

All properties that are specially benefited are assessed. Other publicly owned property that is used for purposes similar to private residential, commercial, industrial or institutional uses is benefited and assessed at the same rate as such privately owned property.

Miscellaneous, public right-of-way parcels, well, reservoir or other water rights parcels, limited access open space parcels, watershed parcels and common area parcels typically do not generate employees, residents, customers or guests. Moreover, many of these parcels have limited economic value and, therefore, do not benefit from specific enhancement of property value. Such parcels are, therefore, not specially benefited and are not assessed.

In 2015, when the Broadstone No. 4 was formed, an analysis was performed of the associated lighting and landscaping improvements to determine the relative benefit to each zone from this new assessment. As a result, four Zones of Benefit were created within Broadstone No. 4. Parcels in Zone B are determined to receive 95.25% of the level of special benefit of those within Zone A, parcels in Zone C are determined to receive 93.87% of the level of special benefit of those within Zone A, and parcels in Zone D are determined to receive 92.23% of the level of special benefit of those within Zone A.

Broadstone No. 4 properties are assessed per Assessment Table 4, below:

Assessment Table 7

Description	SFEs
Single Family Parcel	1.00
Multi-Family Parcels, per unit (2 to 4 units)	0.27
Multi-Family Parcels, per unit (5+ units)	0.22
Condo	0.40
Mobile Home (separate lot)	0.20
Commercial, shopping center	0.50
Office	1.42
Vacant	0.25

Briggs Ranch

There are 642 residential lots and each one is assigned 1 benefit unit (SFE). Undeveloped residential parcels APN: 071-1190-007, 008, 010, 011 and 012 are assessed based on 2.2 SFEs per acre.

Briggs Ranch properties are assessed per Assessment Table 6, below, as per the original formation documents:

Assessment Table 8

Description	SFEs
Single Family Parcel	1.0000
Undeveloped Single Family, per acre	2.2000
Non Assessed (e.g. open space, park land etc.)	0.0000

Folsom Heights

There are 288 residential lots and each one is assigned 1 benefit unit (SFE.) APN 071-1050-050 is assessed 4.1 SFEs per acre.

Folsom Heights properties are assessed per Assessment Table 7, below, as per the original formation documents:

Assessment Table 9

Description	SFEs
Single Family Parcel	1.0000
Undeveloped Single Family, per acre	4.1000
Multi Family, per unit	0.5000
Non Assessed (e.g. open space, park land etc.)	0.0000

Natoma Station

There are 1272 single family residential lots and each one is assigned 1 SFEs. There are 94.99 acres of Commercial and each one is assigned .6299 SFEs per acre. There are 21.03 acres of Multi Family and each one is assigned 3.2337 SFEs per acre.

Natoma Station properties are assessed per Assessment Table 8, below, as per the original formation documents:

Assessment Table 10

Description	SFEs
Single Family Parcel	1.0000
Commercial outside of Lot X, per acre	0.6299
Commercial inside of Lot X, per acre	4.2487
Multi Family, per acre	3.2337
Non Assessed (e.g. open space, park land etc.)	0.0000

Prospect Ridge

Residential

Certain residential properties in the Assessment District that contain a single residential dwelling unit are assigned one Single Family Equivalent or 1.0 SFE. Detached or attached houses, zero-lot line houses and town homes are included in this category of single family residential property. If there is more than one single family detached dwelling on a parcel, it will be charged one SFE per single family detached dwelling.

Properties with more than one residential unit (other than parcels with more than one detached single family dwelling as described above) are designated as multi-family residential properties. These properties benefit from the Improvements in proportion to the number of dwelling units that occupy each property, the average number of people who reside in multi-family residential units versus the average number of people who reside in a single family home and the relative size of each type of residential dwelling unit. The population density factors for the area in Sacramento County encompassing the Assessment District, as depicted in the following table, provide the basis for determining the SFE factors for residential properties. Using the total population in a certain property type in the area from the 2010 Census and dividing it by the total number of such households, finds that approximately 2.91 persons occupy each single family residence, whereas an average of 2.12 persons occupy each condominium. The ratio of 2.91 people on average for a single family residence and 2.12 people per dwelling unit in a condominium unit results in a population density equivalent of 0.73 for condominiums. Next, the relative building areas are factored into the analysis because special benefits are related to the average size of a property, in addition to average population densities. For a condominium, this calculation results in an SFE factor of 0.40 per dwelling unit. A similar calculation is used for the SFE Rates for other residential property types.

The single family equivalency factor of 0.22 per dwelling unit for multifamily residential properties of 5 or more units applies to such properties with 20 or fewer units. Properties in excess of 20 units typically offer on-site recreational amenities and other facilities that tend to offset some of the benefits provided by the improvements. Therefore the benefit for properties in excess of 20 units is determined to be 0.22 SFE per unit for the first 20 units and 0.10 SFE per each additional unit in excess of 20 dwelling units.

Commercial/Industrial Properties

SFE values for commercial and industrial land uses are based on the equivalence of special benefit on a land area basis between single family residential property and the average commercial/industrial property. The SFE values for various commercial and industrial land uses are further defined by using average employee densities because the special benefit factors described previously can be measured by the average number of people who work at commercial/industrial properties.

In order to determine employee density factors, the findings from the San Diego Association of Governments Traffic Generators Study (the "SANDAG Study") are used because these findings were approved by the State Legislature as being a good representation of the average number of employees per acre of land area for commercial and industrial properties. As determined by the SANDAG Study, the average number of employees per acre for commercial and industrial property is 24.

In comparison, the average number of people residing in a single family home in the area is 2.91. Since the average lot size for a single family home in the Assessment District is approximately 0.20 acres, the average number of residents per acre of residential property is 14.55.

The employee density per acre is generally 1.65 times the population density of single family residential property per acre (24 employees per acre / 14.55 residents per acre). Therefore, the average employee density can be used as the basis for allocating benefit to commercial or industrial property since a commercial/industrial property with 4.8 employees receives generally similar special benefit to a residential property with 1 resident. This factor of equivalence of benefit between 1 resident to 4.8 employees is the basis for allocating commercial/industrial benefit. Table 2 below shows the average employees per acre of land area or portion thereof for commercial and industrial properties and lists the relative SFE factors per quarter acre for properties in each land use category.

Commercial and industrial properties in excess of 5 acres generally involve uses that are more land intensive relative to building areas and number of employees (lower coverage ratios). As a result, the benefit factors for commercial and industrial property land area in excess of 5 acres is determined to be the SFE rate per quarter acre for the first 5 acres and the relevant SFE rate per each additional acre over 5 acres.

Institutional properties that are used for residential, commercial or industrial purposes are also assessed at the appropriate residential, commercial or industrial rate.

Vacant Properties

The benefit to vacant properties is determined to be proportional to the corresponding benefits for similar type developed properties; however, at a lower rate due to the lack of improvements on the property. A measure of the benefits accruing to the underlying land is the average value of land in relation to Improvements for developed property. The SFE factor for vacant/undeveloped parcels is 0.25 per parcel.

The benefit to undeveloped properties is determined to be proportional to the corresponding benefits for similar type developed properties, but at a lower rate due to the lack of improvements on the property. A measure of the benefits accruing to the underlying land is the average value of land in relation to Improvements for developed property. An analysis of the assessed valuation data from the County of Sacramento found that approximately 25% of the assessed value of improved properties is classified as the land value. It is reasonable to assume, therefore, that approximately 25% of the benefits are related to the underlying land and 75% are related to the improvements and the day-to-day use of the property. Using this ratio, the SFE factor for vacant/undeveloped parcels is 0.25 per parcel.

Other Properties

Article XIID stipulates that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment.

All properties that are specially benefited are assessed. Other publicly owned property that is used for purposes similar to private residential, commercial, industrial or institutional uses is benefited and assessed at the same rate as such privately owned property.

Miscellaneous, public right-of-way parcels, well, reservoir or other water rights parcels, limited access open space parcels, watershed parcels and common area parcels typically do not generate employees, residents, customers or guests. Moreover, many of these parcels have limited economic value and, therefore, do not benefit from specific enhancement of property value. Such parcels are, therefore, not specially benefited and are not assessed.

Prairie Oaks Ranch

There are 856 residential lots and each one is assigned 1 benefit unit (SFE). There is one multi-family parcel and it is being assessed 57 SFEs. There is one proposed school site and it is being assessed 5.62 SFEs, or the cost of maintaining its' frontage.

Prairie Oaks Ranch properties are assessed per Assessment Table 9, below, as per the original formation documents:

Assessment Table 11

Description	SFEs
Single Family Parcel	1.0000
Proposed School Site, per parcel	5.6300
Multi Family, per unit	1.0000
Non Assessed (e.g. open space, park land etc.)	0.0000

Prairie Oaks Ranch No. 2

The proposed assessments will provide additional maintenance and servicing of existing improvements that will clearly confer special benefits to properties in the Assessment District. The allocation of special benefits to property is partially based on the type of property and the size of property. These benefits can also partially be measured by the occupants on property in the Assessment District because such parcel population density is a measure of the relative benefit a parcel receives from the improvements. It should be noted that many other types of "traditional" assessments also use parcel population densities to apportion the assessments. For example, the assessments for sewer systems, roads and water systems are typically allocated based on the population density of the parcels assessed. Therefore, the apportionment of benefit is reasonably based the type of parcel, the size of parcels and the population density of parcels.

The primary step in apportioning assessments is to determine the relative special benefit for each property. This process involves determining the relative benefit received by each property in relation to a single-family home, or, in other words, on the basis of Single Family Equivalents (SFE). This SFE methodology is commonly used to distribute assessments in proportion to estimated special benefit and is generally recognized as providing the basis for a fair and appropriate distribution of assessments. For the purposes of this Engineer's Report, all properties are designated an SFE value, which is each property's relative benefit in relation to a single-family home on one parcel. In this case, the "benchmark" property is the single-family detached dwelling which is one Single Family Equivalent or one SFE that currently total to 899.4.

Moreover, a fixed or flat assessment for all commercial properties of similar type was deemed to be inappropriate because larger commercial properties receive a higher degree of benefit than other similarly used properties that are significantly smaller. (For two properties used for commercial purposes, there is clearly a higher benefit provided to the larger property in comparison to a smaller commercial property because the larger property generally supports a larger building and has higher numbers of employees, customers and guests that would benefit from proximity and improved access to well maintained and improved landscaped areas. So the potential population of employees or residents is a measure of the special benefits received by the property.) Larger parcels, therefore, receive an increased benefit from the assessments.

Finally, the special benefits to be derived from the proposed assessments will be conferred on property and are not based on a specific property owner's use of the improvements, or a specific property owner's occupancy of property or the property owner's demographic status such as age or number of dependents. However, it is ultimately people who value the special benefits described above and use and enjoy the Assessment District's landscaped areas. In other words, the benefits derived to property are related to the average number of people who could potentially live on, work at, or otherwise could use a property, not how the property is currently used by the present owner. Therefore, the number of people who could or potentially live on, work at or otherwise use a property is one indicator of the relative level of benefit received by a property.

In conclusion, the Assessment Engineer determined that the appropriate method of assessment apportionment should be based on the type and use of property, the relative size of the property, its relative population and usage potential and its proximity to landscaped areas. This method is further described below.

Residential Properties

Assessment Table 12

Type of Residential Property	Pop. Density Equivalent	SqR Factor	SFE Factor
Single Family Residential	1.00	1.00	1.00
Condominium	0.73	0.58	0.42
Duplex, Triplex, Fourplex	0.77	0.42	0.32
Multi-Family Residential (5+ Units)	0.72	0.30	0.22
Mobile Home on Separate Lot	0.58	0.43	0.25

Commercial/Industrial Properties

Assessment Table 13

Type of Commercial/Industrial Land Use	Average Employees Per Acre ¹	SFE Units per Quarter Acre ²	SFE Units per Acre After 5
Commercial	24	0.500	0.500
Office	68	1.420	1.420
Shopping Center	24	0.500	0.500
Office	24	0.500	0.500
Self Storage or Parking Lot	1	0.021	
Golf Course	0.80	0.033	
Cemeteries	0.10	0.004	
Agriculture	0.05	0.002	

Vacant Properties

The benefit to undeveloped properties is determined to be proportional to the corresponding benefits for similar type developed properties, but at a lower rate due to the lack of improvements on the property. A measure of the benefits accruing to the underlying land is the average value of land in relation to improvements for developed property. An analysis of the assessed valuation data from the County of Sacramento found that approximately 25% of the assessed value of improved properties is classified as the land value. It is reasonable to assume, therefore, that approximately 25% of the benefits are related to the underlying land and 75% are related to the improvements and the day-to-day use of the property. Using this ratio, the SFE factor for vacant/undeveloped parcels is 0.25 per parcel.

Willow Creek Estates East No. 2

Zones of Benefit

As part of the engineering work for this assessment, an analysis was conducted on the relationship (including proximity, level of service, etc.), between properties and the primary improvements located throughout the Assessment District. Parcels in Zone A (on Garrett Drive, Ferrera Drive and Whitmer Drive) receive direct special benefit from the proximate landscaping and trees adjacent to the properties as well as less proximate streetlighting. Parcels in Zone B receive direct special benefit from the proximate streetlighting as well as landscaping particularly along the street entrances into the neighborhood. Zone C receive direct special benefit from the proximate streetlighting but less benefit from the landscaping because they are less proximate to the landscaped areas.

Thus, three zones (A, B, and C) were created as shown on the assessment diagram. Parcels in Zone A are determined to receive same level of the level of special benefit of those within Zone B and parcels in Zone C are determined to receive 92.08% of the level of special benefit of those within Zone A and Zone B.

The SVTA decision indicates:

In a well-drawn district — limited to only parcels receiving special benefits from the improvement — every parcel within that district receives a shared special benefit. Under section 2, subdivision (i), these benefits can be construed as being general benefits since they are not “particular and distinct” and are not “over and above” the benefits received by other properties “located in the district.”

We do not believe that the voters intended to invalidate an assessment district that is narrowly drawn to include only properties directly benefiting from an improvement. Indeed, the ballot materials reflect otherwise. Thus, if an assessment district is narrowly drawn, the fact that a benefit is conferred throughout the district does not make it general rather than special. In that circumstance, the characterization of a benefit may depend on whether the parcel receives a direct advantage from the improvement (e.g., proximity to

park) or receives an indirect, derivative advantage resulting from the overall public benefits of the improvement (e.g., general enhancement of the district's property values).

In the Assessment District, the advantage that each parcel receives from the Improvements is direct, and the boundaries are narrowly drawn to include only parcels that benefit from the assessment. Therefore, the even spread of assessment throughout each narrowly drawn Zone of Benefit is indeed consistent with the SVTA decision and satisfies the "direct relationship to the "locality of the improvement" standard.

Residential Properties

Assessment Table 14

Type of Residential Property	Pop. Density Equivalent	SqFt Factor	Proposed Rate
Single Family Residential	1.00	1.00	1.00
Condominium	0.73	0.55	0.40
Duplex Triplex, Fourplex	0.64	0.42	0.27
Multi-Family Residential (5+ Units)	0.64	0.34	0.22
Mobile Home on Separate Lot	0.45	0.45	0.20

Commercial/Industrial Properties

Assessment Table 15

Type of Commercial/Industrial Land Use	Average Employees Per Acre ¹	SFE Units per Quarter Acre ²	SFE Units per Acre After 5
Commercial	24	0.500	0.500
Office	68	1.420	1.420
Shopping Center	24	0.500	0.500
Office	24	0.500	0.500
Self Storage or Parking Lot	1	0.021	
Golf Course	0.80	0.033	
Cemeteries	0.10	0.004	
Agriculture	0.05	0.002	

Vacant Properties

The benefit to vacant properties is determined to be proportional to the corresponding benefits for similar type developed properties; however, at a lower rate due to the lack of improvements on the property. A measure of the benefits accruing to the underlying land is the average value of land in relation to Improvements for developed property. The SFE factor for vacant/undeveloped parcels is 0.25 per parcel.

The benefit to undeveloped properties is determined to be proportional to the corresponding benefits for similar type developed properties, but at a lower rate due to the lack of improvements on the property. A measure of the benefits accruing to the underlying land is the average value of land in relation to Improvements for developed property. An analysis of the assessed valuation data from the County of Sacramento found that approximately 25% of the assessed value of improved properties is classified as the land value. It is reasonable to assume, therefore, that approximately 25% of the benefits are related to the underlying land and 75% are related to the improvements and the day-to-day use of the property. Using this ratio, the SFE factor for vacant/undeveloped parcels is 0.25 per parcel.

Other Properties

Article XIIID stipulates that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment.

All properties that are specially benefited are assessed. Other publicly owned property that is used for purposes similar to private residential, commercial, industrial or institutional uses is benefited and assessed at the same rate as such privately owned property.

Miscellaneous, public right-of-way parcels, well, reservoir or other water rights parcels, limited access open space parcels, watershed parcels and common area parcels typically do not generate employees, residents, customers or guests. Moreover, many of these parcels have limited economic value and, therefore, do not benefit from specific enhancement of property value. Such parcels are, therefore, not specially benefited and are not assessed.

Willow Creek Estates South

There are 1102 residential lots in Village 1, 2, 3 (lots 41-93 and 155-165), 4-7 and 9A and each one is assigned 1 benefit unit (SFE.) There are 243 residential lots in Village 8 and 9b and each one is assigned 1.086 benefit unit (SFE). There are 64 residential lots in Village 3 (lots 41-93 and 155-165), and each one is assigned 1.256 benefit unit (SFE). There are 10 Lexington Business Park parcels and they are assessed at 0.618 SFEs per parcel. There are 3 Lexington Square parcels and they are assessed at 2.4710 SFEs per parcel.

Willow Creek Estates South properties are assessed per Assessment Table 10, below, as per the original formation documents:

Assessment Table 16

Description	SFEs
Single Family Parcel Village 1,2,3 (lots 41-93 and 155-165),4-7 and 9A	1.0000
Single Family Parcel Village 8 and 9b	1.0870
Single Family Parcel Village 3 (lots 41-93 and 155-165)	1.2560
Business Park Parcel	0.6180
Commercial Parcel	2.4710
Non Assessed (e.g. open space, park land etc.)	0.0000

Other Property Types

Public right-of-way parcels, well, reservoir or other water rights parcels, limited access open space parcels, watershed parcels and common area parcels typically do not generate employees, residents, customers or guests. Moreover, many of these parcels have limited economic value and, therefore, do not benefit from specific Improvement of property value. Such parcels are, therefore, not specially benefited and are not assessed.

Assessment

WHEREAS, the City of Folsom, County of Sacramento, California, pursuant to the provisions of the Landscaping and Lighting Act of 1972 and Article XIID of the California Constitution (collectively "the Act"), initiated the preparation of an Engineer's Report for the City of Folsom Landscaping and Lighting Districts;

WHEREAS, the City of Folsom directed the undersigned Engineer of Work to prepare and file a report presenting an estimate of costs, a diagram for the Districts and an assessment of the estimated costs of the improvements upon all assessable parcels within the Districts, to which the description of said proposed improvements therein contained;

NOW, THEREFORE, the undersigned, by virtue of the power vested in me under said Act and the order of the City Council of said City of Folsom, hereby make the following assessment to cover the portion of the estimated cost of said improvements, and the costs and expenses incidental thereto to be paid by the Districts.

The amount to be paid for said improvements and the expense incidental thereto, to be paid by the City of Folsom Landscaping and Lighting Districts for the fiscal year 2022-23 is generally as follows:

Summary Cost Estimates	
Improvement Costs	\$2,540,313.17
Incidental Costs	\$399,402.15
Other Costs	<u>\$782,000.00</u>
Total Improvement Costs	<u>\$3,721,715.31</u>

As required by the Act, an Assessment Diagram is hereto attached and made a part hereof showing the exterior boundaries of said City of Folsom Landscaping and Lighting Districts. The distinctive number of each parcel or lot of land in the said City of Folsom Landscaping and Lighting Districts is its Assessor Parcel Number appearing on the Assessment Roll.

And I do hereby assess and apportion said net amount of the cost and expenses of said improvements, including the costs and expenses incident thereto, upon the parcels and lots of land within said City of Folsom Landscaping and Lighting Districts, in accordance with the special benefits to be received by each parcel or lot, from the improvements, and more particularly set forth in the Cost Estimate and Method of Assessment hereto attached and by reference made a part hereof.

The assessments are made upon the parcels or lots of land within the City of Folsom Landscaping and Lighting Districts in proportion to the special benefits to be received by the parcels or lots of land, from said improvements.

The Sierra Estates, The Residences at American River Canyon, The Residences at American Canyon II Annexation to the Residences at American River Canyon, Cobble Ridge, Broadstone 3, and Natoma Valley, Willow Creek Estates East No. 2, Prospect Ridge are subject to an annual adjustment tied to the Consumer Price Index for the San Francisco Area, with a maximum annual adjustment not to exceed 4% and American River Canyon North 3, Blue Ravine No. 2, Folsom Heights No. 2, and Prairie Oaks Ranch No.2 are subject a maximum annual adjustment not to exceed 3%.

Any change in the CPI in excess of the maximum annual increase shall be cumulatively reserved as the "Unused CPI" and shall be used to increase the maximum authorized assessment rate in years in which the CPI is less than 4% for Sierra Estates, The Residences at American River Canyon, The Residences at American Canyon II Annexation to the Residences at American River Canyon, Cobble Ridge, Broadstone 3, and Natoma Valley, Willow Creek Estates East No. 2, Prospect Ridge; and is less than 3% for American River Canyon North 3, Blue Ravine No. 2, Folsom Heights No. 2 and Prairie Oaks Ranch No. 2.

The proposed assessments for the Districts that are eligible for the CPI increase will be assessed at the rate used in fiscal year 2021-2022 but are less than the maximum authorized rates. Broadstone No.4 and Willow Creek East Estates No. 2 will be assessed at the maximum authorized rate for fiscal year 2022-23.

District	Authorized Rate	Proposed Rate 22-23
American River Canyon North No. 3	\$294.90	\$269.86
Blue Ravine Oaks No. 2	\$232.90	\$213.26
Broadstone 3	\$38.83	\$28.07
Broadstone No. 4-Zone A	\$39.98	\$39.98
Broadstone No. 4-Zone B	\$38.06	\$38.06
Broadstone No. 4-Zone C	\$37.52	\$37.52
Broadstone No. 4-Zone D	\$36.80	\$36.80
Cobble Ridge	\$227.73	\$139.64
Folsom Heights No.2	\$227.70	\$208.38
Natoma Valley	\$972.56	\$856.37
Prospect Ridge	\$1,220.81	\$1,173.86
Prairie Oaks Ranch No. 2	\$323.32	\$323.32
The Residences	\$722.63	\$536.67
The Residences II	\$1,499.93	\$1,169.97
Sierra Estates	\$413.02	\$363.68
Willow Creek East Estates No 2-Zone A&B	\$103.51	\$103.51
Willow Creek East Estates No 2-Zone C	\$95.15	\$95.15

Silverbrook is subject to an annual assessment for \$132.32. However, there will be a credit in 2022-23 due to sufficiency of fund balance for current maintenance needs.

On April 9, 2013 by Resolution No. 9137, the Fieldstone Meadows Landscaping and Lighting District was dissolved. The City will no longer be responsible for maintain the improvements nor providing services within the Fieldstone Meadows Landscaping and Lighting District.

Union Square a benefit zone of Natoma Station will be maintained and serviced by their Home Owner’s Association and has not been levied since fiscal year 2009-10.

Each parcel or lot of land is described in the Assessment Roll by reference to its parcel number as shown on the Assessor's Maps of the County of Sacramento for the fiscal year 2022-23. For a more particular description of said property, reference is hereby made to the deeds and maps on file and of record in the office of the County Recorder of said County.

I hereby place opposite the Assessor Parcel Number for each parcel or lot within the Assessment Roll, the amount of the assessment for the fiscal year 2022-23 for each parcel or lot of land within the said City of Folsom Landscaping and Lighting Districts.

Dated: April 26, 2022

Engineer of Work
John W. Bliss, License No. C52091

Assessment Diagram

The boundaries of the City of Folsom Landscaping and Lighting Districts are displayed on the following Assessment Diagram.

The specific lines and dimensions of each lot or parcel are on file at the City.

FILED IN THE OFFICE OF THE CITY CLERK OF THE CITY OF FOLSOM, COUNTY OF SACRAMENTO, CALIFORNIA, THIS ____ DAY OF _____, 2022.

CITY CLERK

RECORDED IN THE OFFICE OF THE CITY CLERK OF THE CITY OF FOLSOM, COUNTY OF SACRAMENTO, CALIFORNIA, THIS ____ DAY OF _____, 2022.

CITY CLERK

AN ASSESSMENT WAS CONFIRMED AND LEVIED BY THE CITY COUNCIL OF THE CITY OF FOLSOM ON THE LOTS, PIECES AND PARCELS OF LAND ON THIS ASSESSMENT DIAGRAM ON THE ____ DAY OF _____, 2022 FOR FISCAL YEAR 2022-23 AND SAID ASSESSMENT DIAGRAM AND THE ASSESSMENT ROLL FOR SAID FISCAL YEAR WERE FILED IN THE OFFICE OF THE COUNTY AUDITOR OF THE COUNTY OF SACRAMENTO ON THE ____ DAY OF _____, 2022. REFERENCE IS HEREBY MADE TO SAID RECORDED ASSESSMENT ROLL FOR THE EXACT AMOUNT OF EACH ASSESSMENT LEVIED AGAINST EACH PARCEL OF LAND.

CITY CLERK

FILED THIS ____ DAY OF _____, 2022, AT THE HOUR OF ____ O'CLOCK ____ M. IN THE OFFICE OF THE COUNTY AUDITOR OF THE COUNTY OF SACRAMENTO, STATE OF CALIFORNIA, AT THE REQUEST OF THE GOVERNING BOARD OF THE CITY OF FOLSOM.

COUNTY AUDITOR, COUNTY OF SACRAMENTO

Note:
REFERENCE IS HEREBY MADE TO THE MAPS AND DEEDS OF RECORD IN THE OFFICE OF THE ASSESSOR OF THE COUNTY OF SACRAMENTO FOR A DETAILED DESCRIPTION OF THE LINES AND DIMENSIONS OF ANY PARCELS SHOWN HEREIN. THOSE MAPS SHALL GOVERN FOR ALL DETAILS CONCERNING THE LINES AND DIMENSIONS OF SUCH PARCELS. EACH PARCEL IS IDENTIFIED IN SAID MAPS BY ITS DISTINCTIVE ASSESSOR'S PARCEL NUMBER.

Appendix A -- Budgets

The attached budgets for Fiscal Year 2022-23 are included for each of the Districts.

Category Descriptions

Fund Balance Calculation:

This calculation determines funds available in a district. This calculation includes the included funds remaining after being allocated to the estimated reserve.

Estimated Reserves

Estimated Reserve to finance approximately 6 months of the following year: This is approximately 45% of the operating and incidental costs of a Landscaping and Lighting District to fund the operations until collected revenue is received from the County.

Short-Term Installments

Funds listed here are monies collected in prior years and set aside for future proposed improvements projected to be completed within the next five years.

Long-Term Installments

Funds listed here are monies collected in prior years and set aside for future proposed improvements projected to be completed within five to thirty years.

Improvement Costs

General Maintenance Costs

- Scheduled: monthly landscape maintenance and service
- Unscheduled: unscheduled but potential costs for repairs (i.e. broken sprinklers and irrigation systems), replacements (i.e. remove and replace dead tree or irrigation controller), and other services (i.e. repair fence post or treat for a specific pest) not included in monthly maintenance and service costs
- Streetlights: repair and replace bulbs and ballasts in streetlights

Service Costs

- Electrical: electric costs for streetlight maintenance and power to irrigation controllers
- Water: water costs to irrigate landscaping

Current Year Improvement Projects

Funded improvements planned to occur in the upcoming fiscal year

Incidental Costs

- Professional Services: consultant cost for Engineer's Report and Improvement Plan
- Contract Services: other contracts or professional services such as backflow testing (yearly tests), vector control, graffiti removal, and streetlight pole replacement
- Publications/Mailings/Communications: yearly notices in public hearings, mailings to Advisory Committee Members, and telephone expenses
- Staff: Landscaping and Lighting District Manager and/or inspector, clerical support, and/or other city staff.
- Overhead: General overhead (Landscaping and Lighting Districts' share of general overhead categories such as City Clerk, City Attorney, City Manager, etc.) and Department overhead (Landscaping and Lighting Districts' share of department overhead categories such as City Attorney, City Clerk and Finance Dept. Costs).
- County Auditor Fee: Per Parcel Fee charged by County to put levy on tax bills

Total Improvement Costs

This is the total of all improvement costs budgeted for the upcoming year. This cost includes current improvements that are funded by fund balance monies. Fund balance monies are monies that have been collected in prior years in anticipation of being used for specific improvements and/or intended for replacement or improvement of capital items within a district.

Assessment to Property (Current)

This calculation takes the number of single-family equivalent benefit units and multiplies it by the amount that each property within a district is will be assessed for the upcoming year. This is the total assessment amount that will be generated by the properties within the District.

District Balance

The purpose of this calculation is to describe all costs expected to occur in the upcoming year, any installments being collected as part of the upcoming year's assessment and contributions from other sources. The outcome of the calculation is the total assessment for the district. A surplus would be applied and/or credited to the upcoming year's assessment. If there are insufficient funds in the fund balance to cover the 6-month reserve, or the current and/or proposed improvements, then a deficit would exist. A deficit generally indicates that an increase in assessment may be necessary (requiring voter approval with a simple majority), however there may be a one-time reason for the deficit and an increase may not be necessary. Deficit situations are reviewed and analyzed on a case-by-case basis.

Net Assessment Calculation

This calculation determines the net assessment after the surplus or deficit is factored into the calculation. If a deficit exists, the net assessment will indicate that the assessment for the district might be too low. If a surplus exists, the net assessment will indicate that the assessment for the district might be too high. Any increased adjustments require voter approval (simple majority).

Allocated Net Assessment to Property

This calculation takes the net assessment for the district that was calculated above (i.e. factoring in a surplus or deficit) and divides it by the number of single-family equivalent benefit units. The outcome of the calculation is the total allocated net assessment per single-family equivalent benefit unit. This calculation is generally the same as the allocated assessment however if there is a deficit it will indicate the revised amount that would be required to eliminate the deficit. Conversely if there is a surplus the calculation would show the amount that the assessment could be reduced by and still cover the anticipated costs for current and future years.

Comparison of Net Assessment and Assessment

Shows a comparison of the net assessment and the current assessment and indicates a per parcel deficit or surplus.

Appendix B – Assessment Roll, FY 2022-23

Reference is hereby made to the Assessment Roll in and for the assessment proceedings on file with the City of Folsom City Clerk, as the Assessment Roll is too voluminous to be bound with this Engineer's Report.

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10845 – A Resolution Authorizing the City Manager to Execute an Amendment to the Memorandum of Understanding Agreement (Contract No. 174-21 20-062) with the Capital Southeast Connector Joint Powers Authority for the Southeast Connector Segment D3(A) Bike Trail and Appropriation of Funds
FROM:	Public Works Department

RECOMMENDATION / CITY COUNCIL ACTION

The Public Works Department recommends that the City Council pass and adopt Resolution No. 10845 - A Resolution Authorizing the City Manager to Execute an Amendment to the Memorandum of Understanding Agreement (Contract No. 174-21 20-062) with the Capital Southeast Connector Joint Powers Authority for the Southeast Connector Segment D3(A) Bike Trail and Appropriation of Funds.

BACKGROUND / ISSUE

The Capital SouthEast Connector is a planned 34-mile limited-access roadway spanning from U.S. 50 at Silva Valley Parkway interchange in El Dorado County to Interstate 5 at the Hood-Franklin Interchange in Elk Grove. The Connector is planned to be constructed in segments as funding and priorities allow. Segment D3, referred to as the “Folsom segment,” includes the length of the Connector that borders the City of Folsom and Sacramento County from Prairie City Road to the El Dorado County Line. Segment E1 is the El Dorado County Segment that Segment D3 ties into.

Segment D3 has been further segmented into two additional segments: D3(A) and D3(B). Segment D3(A) will upgrade existing White Rock Road to a four-lane expressway beginning near the intersection of Prairie City Road and continuing through the intersection of East Bidwell Street. The project entails constructing four lanes between these two major

intersections, including a bridge over Alder Creek. The bridge also serves as a “wildlife crossing,” as contemplated in the South Sacramento Habitat Conservation Plan.

The project is a complete reconstruction that will create a new alignment of White Rock Road adjacent to and immediately south of the existing White Rock Road. The existing White Rock Road will remain open to traffic during construction. Currently under construction, Segment D(3A) is expected to be complete by the Summer of 2022.

The City is currently managing the SouthEast Connector Segment D3(A) on behalf of the Capital SouthEast Connector Joint Powers Authority (JPA) and in collaboration with Sacramento County. The City will also manage the Scott Road Realignment on behalf of the JPA in collaboration with Sacramento County.

During the design process, the Class 1 Bike Trail and Bridge was pulled from the project due to budgetary constraints, with an intent to construct it in a later phase. The project had the ability to add the rough grading for the bike trail and bike/pedestrian bridge through the contingency fund. In order to provide finish grade, base, paving, and shoulder backing an amendment with the JPA is required to provide additional funding.

POLICY / RULE

Execution of Amendments to the Memorandum of Understanding Agreement between Agencies require City Council approval.

ANALYSIS

The Memorandum of Understanding provides the framework for transactions between the City of Folsom and the JPA. Amendment two will allow for the project to complete the bike trail on Segment D3(A) which also completes the Segment D3(A).

The existing Memorandum of Understanding was approved by City Council at the October 27, 2020, Council Meeting. The First Amendment to the Memorandum of Understanding to add the Scott Road Realignment was approved by City Council on October 26, 2021.

FINANCIAL IMPACT

The Capital SouthEast Connector Segment D3(A) is eligible to receive funds from FAST Act funding based on a SACOG Regional Surface Transportation Program Grant and SB-1 Funding. Funding for construction and construction engineering is shown below:

Fund	Fund Type	Amount
FAST Act	Surface Transportation Block Grant to match SB-1 Funding 1 to 1 at \$10,000,000	\$15,000,000
SB1	Competitive	\$10,000,000
Local Transportation Fund (446)	To match Surface Transportation Block Grant of \$15,000,000 at 11.47%	\$1,720,500
Local Transportation Fund (446)	To Cover Balance of Project Funding	\$1,195,147
Local Transportation Fund (446)	SouthEast Connector Joint Powers Authority to provide funding for Pedestrian/Bike Trail through Invoicing	\$400,000
	Project Budget for Construction	\$28,315,396

The FAST Act funding requires a local match of 11.47%. The Transportation Fund (Fund 446) will be utilized to meet the required match of \$1,720,500. The SB1 funding requires a \$100% match, of which \$10,000,000 of the FAST Act funding will be utilized as the match.

The previously approved agreement with Goodfellow Brothers, LLC is for \$22,368,765 with a budgeted contingency of \$2,236,876.50 (10%) for a total contract budget amount of \$24,605,641.50.

The contract costs for construction and construction management have been previously approved by City Council in separate resolutions as follows:

Company	Description	Cost
Goodfellow Brothers, LLC	Construction	\$22,368,765.00
	10% Contingency for Construction	\$2,236,876.50
	Additional Contingency Funded by SouthEast Connector Joint Powers Authority	\$400,000
Salaber Associates, Inc.	Construction Engineering, Inspection and Materials Testing	\$2,992,848.00
Dokken Engineering, Inc.	Design Support and Environmental Services	\$317,157.28
	Project Budget for Construction	\$28,315,646.78

The Contract Change Order for the Pedestrian/Bike Trail will utilize the existing contingency in the amount of \$285,802. \$400,000 which has been appropriated through Amendment 2 of the Memorandum of Understanding with the SouthEast Connector Joint Powers Authority will be appropriated to the project. The total cost for the Pedestrian/Bike Trail is \$685,802 and the additional \$400,00 from the JPA will increase the project budget to \$28,443,000. No additional City of Folsom funding is needed.

ENVIRONMENTAL REVIEW

In 2016 the JPA approved a California Environmental Quality Act (CEQA) Tiered Initial Study with Mitigated Negative Declaration for the Capital Southeast Connector Segment D3/E1 which includes the Scott Road Realignment Project and the Class 1 Bike Trail. The project is not located in an environmentally sensitive area and would not result in potential impacts to the environment, including traffic, noise, air quality, and water quality.

ATTACHMENTS

1. Resolution No. 10845 – A Resolution Authorizing the City Manager to Execute an Amendment to the Memorandum of Understanding Agreement (Contract No. 174-21 20-062) with the Capital Southeast Connector Joint Powers Authority for the Southeast Connector Segment D3(A) Bike Trail and Appropriation of Funds
2. Second Amendment to Memorandum of Understanding Agreement
3. First Amendment to Memorandum of Understanding Agreement-Executed
4. Memorandum of Understanding Agreement-Executed

Submitted,

Mark Rackovan, PUBLIC WORKS DIRECTOR

Attachment 1

RESOLUTION NO. 10845

**A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN
AMENDMENT TO THE MEMORANDUM OF UNDERSTANDING AGREEMENT
(CONTRACT NO. 174-21 20-062) WITH THE CAPITAL SOUTHEAST CONNECTOR
JOINT POWERS AUTHORITY FOR THE SOUTHEAST CONNECTOR SEGMENT
D3(A) AND APPROPRIATION OF FUNDS**

WHEREAS, the Capital SouthEast Connector Project is the Sacramento region's largest single transportation project, ultimately extending over 34 miles from Elk Grove to El Dorado County; and

WHEREAS, the City of Folsom is a Member Jurisdiction of the Capital SouthEast Connector Joint Powers Authority and will implement the Project; and

WHEREAS, the Capital SouthEast Connector Project has, to date, been funded primarily through a Sacramento County sales-tax measure approved in 2004 by 75 percent of voters; and

WHEREAS, the Capital SouthEast Connector Project has developed a program development budget that requires the use of Federal and State funds to advance the project towards timely construction; and

WHEREAS, the City of Folsom desires to construct the Capital SouthEast Connector Segment D3(A) Pedestrian/Bike Trail; and

WHEREAS, the Capital SouthEast Connector Joint Powers Authority has funding to assist the construction of the Capital SouthEast Connector Segment D3(A) Project Pedestrian/Bike Trail; and

WHEREAS, the balance needed of \$285,801.96 is within the project budget contingency to fully fund the Pedestrian/Bike Trail; and

WHEREAS, the City of Folsom and Capital SouthEast Connector Joint Powers Authority desires to amend the existing Memorandum of Understanding to add the Pedestrian/Bike Trail; and

WHEREAS, the Second Amendment to the Memorandum of Understanding will identify responsibilities and financial transactions between the City of Folsom and Capital SouthEast Connector Joint Powers Authority; and

WHEREAS, funds in the amount of \$400,000 are available in the Transportation Improvement Fund (Fund 446) for Fiscal Year 2021-22; and

WHEREAS, reimbursements received from the Joint Powers Authority will be credited to the Transportation Improvement Fund (Fund 446); and

WHEREAS, the agreement will be in a form acceptable to the City Attorney;

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom authorizes the City Manager to execute an Amendment to the Memorandum of Understanding Agreement (Contract No. 174-21 20-062) with the Capital SouthEast Joint Powers Authority for the Capital SouthEast Connector Segment D3(A) Pedestrian/Bike Trail.

NOW, THEREFORE BE IT FURTHER RESOLVED that the Finance Director is authorized to appropriate \$400,000 from the Transportation Improvement Fund (Fund 446) for the Capital Southeast Connector Segment D3(A) Pedestrian/Bike Trail, to be offset by an additional reimbursement from the JPA.

PASSED AND ADOPTED this 10th day of May 2022, by the following roll-call vote:

AYES: Councilmember(s):
NOES: Councilmember(s):
ABSENT: Councilmember(s):
ABSTAIN: Councilmember(s):

Attachment 2

ITEM 14 b

**SECOND AMENDMENT TO MEMORANDUM OF UNDERSTANDING
BETWEEN THE CAPITAL SOUTHEAST CONNECTOR JPA AND THE CITY OF
FOLSOM RELATED TO A PORTION OF SEGMENT D3 OF THE CAPITAL
SOUTHEAST CONNECTOR EXPRESSWAY**

This Second Amendment (“Amendment”) to the November 10, 2020, Memorandum of Understanding (“MOU”) is made and entered into on this ___ day of _____, 2022 by and between the Capital SouthEast Connector Joint Powers Authority, a joint powers authority, (“JPA”) and the City of Folsom, a Municipal Corporation (“City”).

RECITALS

WHEREAS, the City and JPA entered into a MOU regarding a portion of Segment D3 of the Capital SouthEast Connector expressway beginning at the intersection of Prairie City Road and continuing to the intersection of East Bidwell Street (the “Project”); and

WHEREAS, the Project involves the construction of four lanes and a bridge over Alder Creek, which will result in a new alignment of White Rock Road adjacent and immediately south of its existing location; and

WHEREAS, the City and JPA entered into an amendment to the MOU on December 9, 2021 to provide funding for the realignment of existing Scott Road to the signalized intersection at White Rock Road/Prairie City Road within the City’s right of way (the “Scott Road Project”); and

WHEREAS, the City and JPA now desire to further amend the MOU to no longer provide for reimbursement of funds in connection with a Grant issued to the JPA by CalRecycle as the Project experienced significant cost savings, in excess of the grant award, by using alternate construction materials than those required by the Grant; and

WHEREAS, the City and JPA further desire to provide additional funding for the construction of Class 1 multi-use path improvements within the Project limits (the “Multi-Use Path”); and

NOW, THEREFORE, the parties hereto, in consideration of the mutual covenants, promises, and agreements herein contained, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged and agreed, do hereby agree to amend the MOU as follows:

1. **Recitals**. The above recitals are true and correct and are hereby made a part of the MOU.
2. **Term**. The MOU shall terminate on March 1, 2023.
3. **Elimination Grant Funding**. The JPA and City hereby agree that Sections 4 and 5 of the MOU are hereby deleted in their entirety and that these Sections of the MOU shall now read “[RESERVED]”.

4. Funding for Multi-Use Path. The JPA will reimburse the City up to Four Hundred Thousand dollars (\$400,000.00) for the Multi-Use Path (“Multi-Use Path Funds”). The JPA shall reimburse the City for Multi-Use Path improvements within thirty (30) days of receipt of an invoice from the City.
5. City Obligations. The City agrees to include the JPA in Multi-Use Path related decisions affecting construction cost, including those related to any design revisions or contract change order requests. The City shall submit monthly invoices related to the Multi-Use Path. Invoices shall include dates and description of the work performed, summary of 1) total Multi-Use Path Funds; 2) amount of current bill; 3) amount billed to date; 4) amount of remaining Multi-Use Path Funds, and documentation of reimbursable expenses and billed items.
6. No Additional Funding. Except as otherwise provided in this MOU and the existing Federal Funding of the project, neither party shall be responsible for contributing additional funds.
7. Except as expressly amended herein, all terms and conditions of the MOU shall remain in full force and effect.

[SIGNATURES ON NEXT PAGE]

IN WITNESS WHEREOF, the parties hereto have executed this Amendment in the County of Sacramento, State of California, on the date set forth above.

Attachment 3

**FIRST AMENDMENT TO MEMORANDUM OF UNDERSTANDING
BETWEEN THE CAPITAL SOUTHEAST CONNECTOR JPA AND THE CITY OF
FOLSOM RELATED TO A PORTION OF SEGMENT D3 OF THE CAPITAL
SOUTHEAST CONNECTOR EXPRESSWAY**

This First Amendment (“Amendment”) to the November 10, 2020 Memorandum of Understanding (“MOU”) is made and entered into on this 9 day of ~~November~~ ^{December}, 2021 by and between the Capital SouthEast Connector Joint Powers Authority, a joint powers authority, (“JPA”) and the City of Folsom, a Municipal Corporation (“City”).

RECITALS

WHEREAS, the City and JPA entered into a MOU regarding a portion of Segment D3 of the Capital SouthEast Connector expressway beginning at the intersection of Prairie City Road and continuing to the intersection of East Bidwell Street (the “Project”); and

WHEREAS, the Project involves the construction of four lanes and a bridge over Alder Creek, which will result in a new alignment of White Rock Road adjacent and immediately south of its existing location; and

WHEREAS, the City and JPA now desire to realign existing Scott Road to the signalized intersection at White Rock Road/Prairie City Road within the City’s right of way (the “Scott Road Project”); and

WHEREAS, the City and JPA have met regularly throughout the design phase and are in agreement on the scope and nature of the work which will include a realigned roadway upgraded to current design standards, including shoulders and drainage improvements; and

WHEREAS, the JPA approved the final bid package on August 27, 2021 (“Final Bid Package”) and the City and JPA now desire to advertise the project for construction and work collaboratively to ensure the successful completion of the Project.

NOW, THEREFORE, the parties hereto, in consideration of the mutual covenants, promises, and agreements herein contained, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged and agreed, do hereby agree to amend the MOU as follows:

1. **Recitals**. The above recitals are true and correct and are hereby made a part of the MOU.
2. **Term**. The MOU shall terminate on March 1, 2023.
3. **Funding Contingency**. The City and JPA hereby acknowledge that the obligations of the parties in this Amendment are contingent upon the JPA’s receipt of Construction Funds, as such term is defined in Section 4 herein, from the City of Elk Grove pursuant to a Memorandum of Understanding between the JPA and the City of Elk Grove Related to the Exchange of Funding.

4. JPA Obligations.

- a. The JPA will reimburse the City up to three million three hundred and fifty thousand dollars (\$3,350,000.00) for construction of the Scott Road Project (“Construction Funds”). The JPA shall reimburse the City for costs related to the construction of the Scott Road Project and for construction management services within thirty (30) days of receipt of an invoice from the City.
- b. During construction of the Project the JPA will provide engineering support and environmental monitoring services.

5. City Obligations. The City hereby agrees to the following:

- a. The City will publicly advertise for bids the Final Bid Package for construction of the Scott Road Project to allow for construction to commence in Spring of 2022.
 - b. The City will administer construction of the Scott Road Project and will release a request for proposals for construction management services for the Scott Road Project. The City will include the JPA in the request for proposal response review, evaluation, and selection process.
 - c. The City shall only award the Scott Road Project and execute a contract for construction management services if the total costs do not exceed the Construction Funds available for reimbursement by the JPA. The City agrees to include the JPA in Project related decisions affecting construction cost, including those related to any Project design revisions or contract change order requests. In the event bids for the Scott Road Project and the cost of construction management services exceed the amount of Construction Funds, the parties may agree in writing to provide additional funding to address any shortfall.
 - d. The City shall submit monthly invoices related to construction of the Scott Road Project to the JPA. Invoices shall include dates and description of the work performed, summary of 1) total Construction Funds; 2) amount of current bill; 3) amount billed to date; 4) amount of remaining construction funds, and documentation of reimbursable expenses and billed items.
6. No Additional Funding. Except as otherwise provided in this MOU, neither party shall be responsible for contributing additional funds.
7. Except as expressly amended herein, all terms and conditions of the MOU shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment in the County of Sacramento, State of California, on the date set forth above.

MEMORANDUM OF UNDERSTANDING
BETWEEN THE CAPITAL SOUTHEAST CONNECTOR JPA AND THE CITY OF
FOLSOM RELATED TO A PORTION OF SEGMENT D3 OF THE CAPITAL
SOUTHEAST CONNECTOR EXPRESSWAY

This Memorandum of Understanding (“MOU”) is made and entered into on this 10th day of November 2020 by and between the Capital SouthEast Connector Joint Powers Authority, a joint powers authority, (“JPA”) and the City of Folsom, a Municipal Corporation (“City”).

RECITALS

WHEREAS, the City and JPA have collaborated on the design of a portion of Segment D3 of the Capital Southeast Connector expressway beginning at the intersection of Prairie City Road and continuing to the intersection of East Bidwell Street (the “Project”); and

WHEREAS, the Project involves the construction of four lanes and a bridge over Alder Creek, which will result in a new alignment of White Rock Road adjacent and immediately south of its existing location; and

WHEREAS, on May 13, 2020, the California Transportation Commission authorized \$25 million for construction of the Project; and

WHEREAS, the City received construction authorization from the California Department of Transportation (“Caltrans”) on June 25, 2020 and subsequently released the Project for bid; and

WHEREAS, the City and JPA desire to address certain ancillary issues related to costs associated with preliminary grading for the Project and the use of funds awarded to the JPA in connection with the Department of Resources Recycling and Recovery (“CalRecycle”) Fiscal Year 2019-20 Rubberized Pavement Grant Program, Grant Number TRP12-19-0002 (the “Grant”).

NOW, THEREFORE, the parties hereto, in consideration of the mutual covenants, promises, and agreements herein contained, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged and agreed, do hereby agree as follows:

1. **Recitals**. The above recitals are true and correct and are hereby made a part of this MOU.
2. **Term**. This MOU shall terminate on April 1, 2022 or upon completion of the Project, whichever is sooner.
3. **Project Utility Grading**. Within sixty (60) days of execution of this MOU, the JPA shall pay the City thirty thousand dollars (\$30,000.00) for use in connection with certain Project costs associated with preliminary grading related to utility relocations.
4. **Reimbursement of Grant Funds**. The parties acknowledge the JPA has been awarded Grant funds in an amount not to exceed two hundred twenty thousand dollars (\$220,000.00) and that the Grant is reimbursement based in accordance with rates established in the Grant agreement. In connection with the Project and consistent with the terms of the Grant

agreement, the JPA shall seek reimbursement of all eligible costs and expenses from Grant funds awarded to the Project and remit any such Grant reimbursement received to the City. The City shall provide all requisite information and supporting documentation necessary for the completion of any forms, reports and documents required in connection with seeking reimbursement of Grant funds. The JPA and City acknowledge that determination of eligibility of costs and expenses for reimbursement is made exclusively by CalRecycle in accordance with the terms of the Grant agreement and that the JPA is only obligated to remit to the City as reimbursement any Grant funds received by the JPA.

5. Eligibility for Receipt of Grant Funds. The City hereby certifies that California Labor Code Section 1782 does not prohibit the City from receiving state funds for the Project. The City further certifies that it complies with California Labor Code Section 1770-1782.
6. Amendment. This MOU and all of the covenants and conditions set forth herein, may be modified, amended or terminated only by a writing duly authorized and executed by both the City and the JPA.
7. Construction and Interpretation. It is agreed and acknowledged by the parties hereto that the provisions of this MOU have been arrived at through negotiation, and that each of the parties has had a full and fair opportunity to revise the provisions of this MOU and to have such provisions reviewed by legal counsel. Therefore, the normal rule of construction that any ambiguities are to be resolved against the drafting party shall not apply in construing or interpreting this MOU.
8. Venue. This MOU and all matters relating to it shall be governed by the laws of the State of California and any action brought relating to this MOU shall be held exclusively in a state court in Sacramento County.
9. Severability. If any provision of this MOU is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of this MOU shall not be affected, except as necessarily required by the invalid provisions, and shall remain in full force and effect unless amended or modified by mutual consent of the parties.
10. Notices. All notices, requests, certifications or other correspondence required to be provided by the parties to this MOU shall be in writing and shall be personally delivered or delivered by first class mail to the respective parties at the following addresses:

CITY
 City of Folsom
 Attn: City Manager
 50 Natoma Street
 Folsom, CA 95630

JPA
Capital SouthEast Connector JPA
Attn: Executive Director
10640 Mather Blvd., Ste. 120
Mather, CA 95655

Notice by personal delivery shall be effective immediately upon delivery. Notice by mail shall be effective upon receipt or three days after mailing, whichever is earlier.

11. Counterparts. This MOU may be executed in multiple counterparts, each of which shall constitute an original, and all of which taken together shall constitute one and the same instrument. Documents executed, scanned, and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such scanned and electronic signatures having the same legal effect as original signatures.

[SIGNATURES ON NEXT PAGE]

IN WITNESS WHEREOF, the parties hereto have executed this MOU in the County of Sacramento, State of California, on the date set forth above.

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10846 - A Resolution Authorizing the City Manager to Execute a Design and Consulting Services Contract with Bennett Engineering Services, Inc. for the East Bidwell Street/Iron Point Road and US50 Onramp Improvement Project and Appropriation of Funds
FROM:	Public Works Department

RECOMMENDATION / CITY COUNCIL ACTION

The Public Works Department recommends that the City Council pass and adopt Resolution No. 10846 - A Resolution Authorizing the City Manager to Execute a Design and Consulting Services Contract with Bennett Engineering Services, Inc. for the East Bidwell Street/Iron Point Road and US50 Onramp Improvement Project and Appropriation of Funds.

BACKGROUND / ISSUE

In December 2020, City Council approved Resolution No. 10571 - A Resolution Authorizing the Authorizing Staff to Submit Grant Applications to the Sacramento Area Council of Governments for the 2020-21 Funding Round. One of the projects that received Sacramento Area Council of Governments (SACOG) funding, is the subject of this engineering design project.

The East Bidwell and Iron Point / US50 Onramp Improvement Project anticipates converting one westbound through lane on Iron Point Road to a third left turn lane, modifying the East Bidwell Street and westbound US50 onramp to create a westbound US50-only lane in the number 3 lane and modify and improve onramp operations by converting the westbound high-occupancy vehicle (HOV) lane into a mixed flow lane and installing a metering system. The project will also evaluate the storage capacity of the left turn pocket on Iron Point Road at East Bidwell Street using forecasted models in Folsom and the SACOG region. The project will be a coordinated effort between the City of Folsom and Caltrans Freeway Operations, who have

been briefed on the project and partnered with the city to define the scope prior to advertisement.

POLICY / RULE

Section 2.36.080 of the Folsom Municipal Code states, in part, that contracts for supplies, equipment, services, and construction with an estimated value of \$66,141 or greater shall be awarded by the City Council.

ANALYSIS

Staff publicly advertised a Request for Proposals to provide Professional Engineering Services on February 25, 2022 and received one proposal on March 22, 2022.

Bennett Engineering Services, Inc. was the sole submission for this project. City staff is comfortable recommending Bennett Engineering Services, Inc. for the award of this contract based on their prior experience with the city, their high-quality team consisting of Fehr & Peers, Jacobs, and UNICO, and their submitted proposal for this project which was built off their original design and analysis effort that was instrumental in the city being successfully awarded the grant for this project.

FINANCIAL IMPACT

The city was awarded SACOG Maintenance and Modernization funds in the amount of \$5,167,000 for this project. After subsequent discussions with Caltrans, staff demonstrated that nearly the same project result would be achieved by converting the existing HOV lane for the westbound US50 onramp to a metered mix flow lane and eliminating the widening of the onramp would substantially reduce the overall cost of the project by an anticipated \$4.3 million. Staff now believes that the use of local funds to accelerate project delivery would better serve the community and region. Staff is currently in discussions to reprogram the current SACOG award to other projects in the city.

The design contract with Bennett Engineering Services, Inc. would be authorized for a not to exceed amount of \$246,454. Staff is requesting an appropriation in the amount of \$246,454 from the Transportation Improvement Fund (Fund 446) for this project.

ENVIRONMENTAL REVIEW

Bennett Engineering Services, Inc will work with City Staff for environmental evaluations and a technical memorandum that will be submitted to Caltrans for approval of the project as it pertains to the California Environmental Quality Act (CEQA).

RESOLUTION NO. 10846

A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A DESIGN AND CONSULTING SERVICES CONTRACT WITH BENNETT ENGINEERING SERVICES, INC. FOR THE EAST BIDWELL STREET/IRON POINT ROAD AND US50 ONRAMP IMPROVEMENT PROJECT AND APPROPRIATION OF FUNDS

WHEREAS, using the recommendations from Resolution 10571 of the City Council, the Public Works Department applied for and received funds from the Sacramento Area Council of Governments (SACOG) for the 2020-2021 Funding Round in the amount of \$5,167,000 for the design and construction of roadway improvements at East Bidwell Street/Iron Point Road and the US50 westbound onramp; and

WHEREAS, subsequent discussions with Caltrans, changed the proposed design which significantly reduced the cost of the project and still provided increased traffic flow; and

WHEREAS, the awarded SACOG funding will most likely be re-programmed to other City of Folsom projects; and

WHEREAS, a Request for Proposal to provide Professional Engineering Services was publicly advertised on February 25, 2022, and on March 22, 2022, the lone proposal was received from Bennett Engineering Services, Inc.; and

WHEREAS, the proposal was reviewed by a proposal review panel, with Bennett Engineering Services, Inc. being chosen as the most qualified firm; and

WHEREAS, there is sufficient funding available for the contract in the Transportation Improvement Fund (Fund 446); and

WHEREAS, the agreement will be in a form acceptable to the City Attorney:

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom authorizes the City Manager to Execute a Design and Consulting Services Contract with Bennett Engineering Services, Inc. for the East Bidwell Street/Iron Point Road and US50 Onramp Improvement Project for the not-to-exceed amount of \$246,454.

NOW, THEREFORE, BE IT FURTHER RESOLVED that the Finance Director is authorized to appropriate an additional \$246,454 from the Transportation Improvement Fund (Fund 446) for this contract.

PASSED AND ADOPTED this 10th day of May 2022, by the following roll-call vote:

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10847 - A Resolution Authorizing the City Manager to Execute a Contract Change Order for the Pedestrian/Bike Trail with Goodfellow Brothers, LLC (Contract No. 174-21 20-060) for the Capital SouthEast Connector Segment D3(A), Project No. PW1607, Federal Project No. 5288(046)
FROM:	Public Works Department

RECOMMENDATION / CITY COUNCIL ACTION

The Public Works Department recommends that the City Council pass and adopt Resolution No. 10847 - A Resolution Authorizing the City Manager to Execute a Contract Change Order for the Pedestrian/Bike Trail with Goodfellow Brothers, LLC (Contract No. 174-21 20-060) for the Capital SouthEast Connector Segment D3(A), Project No. PW1607, Federal Project No. 5288(046).

BACKGROUND / ISSUE

The planned Capital SouthEast Connector is a 34-mile limited access roadway spanning from U.S. 50 at Silva Valley Parkway interchange in El Dorado County to Interstate 5 at the Hood-Franklin Interchange in Elk Grove. The Connector is planned to be constructed in segments as funding and priorities allow. Segment D3 includes the length of the Connector that borders the City of Folsom and Sacramento County from Prairie City Road to the El Dorado County Line. Segment E1 is the El Dorado County Segment that Segment D3 ties into.

Segment D3 has been further segmented into two additional segments: D3(A) and D3(B). Segment D3(A) will upgrade the existing White Rock Road to a four-lane expressway beginning near the intersection of Prairie City Road and continuing through the intersection of East Bidwell Street. The project involves constructing four lanes between these two major intersections, including a bridge over Alder Creek. The bridge also serves as a "wildlife crossing," as contemplated in the South Sacramento Habitat Conservation Plan.

The project is a complete reconstruction that will create a new alignment of White Rock Road adjacent to and immediately south of the existing White Rock Road. The existing White Rock Road will remain open to traffic during construction.

The City of Folsom is leading the construction of this project on behalf of the Capital SouthEast Connector Joint Powers Authority (JPA) and in collaboration with Sacramento County.

The City has secured the State Transportation Block Grant Program (STBG) and SB1 funding from the Sacramento Area Council of Governments (SACOG) in partnership with the JPA. A request for authorization to proceed with construction was submitted to Caltrans on May 15, 2020. The Authorization to Proceed (E-76) was received on June 25, 2020, and the subsequent Supplemental Agreement was received on August 8, 2020.

The project was initially designed to include a Class 1 Bike Trail and interconnection between traffic signals. These two items of work were removed from the project due to funding constraints, with an intent to construct them in a later phase. Funding for completion of the Pedestrian/Bike bridge and trail has been supplemented by Amendment No. 2 with the SouthEast Connector Joint Powers Authority.

POLICY / RULE

Section 2.36.080 of the Folsom Municipal Code states, in part, that contracts for supplies, equipment, services, and construction with an estimated value of \$66,141 or greater shall be awarded by the City Council.

ANALYSIS

This project was publicly advertised on July 13, 2020, and bids were opened publicly on September 9, 2020, at 2:00 p.m. in the City Council Chamber.

Six bids were received with Goodfellow Brothers, LLC being the lowest responsive responsible bid as follows:

Contractor	Ranking	Bid Amount
Goodfellow Brothers, LLC	Lowest Responsive Responsible Bid	\$22,368,765.00

The lowest responsive responsible bid proposal provided by Goodfellow Brothers, LLC was reviewed by staff and found to be in good order.

FINANCIAL IMPACT

The Capital SouthEast Connector Segment D3(A) is eligible to receive funds from FAST Act funding based on a SACOG Regional Surface Transportation Program Grant and SB-1 Funding. Funding for construction and construction engineering is shown below:

Fund	Fund Type	Amount
FAST Act	Surface Transportation Block Grant to match SB-1 Funding 1 to 1 at \$10,000,000	\$15,000,000
SB1	Competitive	\$10,000,000
Local Transportation Fund (446)	To match Surface Transportation Block Grant of \$15,000,000 at 11.47%	\$1,720,500
Local Transportation Fund (446)	To Cover Balance of Project Funding	\$1,195,147
Local Transportation Fund (446)	SouthEast Connector Joint Powers Authority to provide funding for Pedestrian/Bike Trail through Invoicing	\$400,000
	Project Budget for Construction	\$28,315,396

The FAST Act funding requires a local match of 11.47%. The Transportation Fund (Fund 446) will be utilized to meet the required match of \$1,720,500. The SB1 funding requires a 100% match, of which \$10,000,000 of the FAST Act funding will be utilized as the match.

The agreement with Goodfellow previously approved is for \$22,368,765 with a budgeted contingency of \$2,236,876.50 (10%) for a total contract budget amount of \$24,605,641.50.

The contract costs for construction and construction management have been previously approved by City Council in separate resolutions as follows:

Company	Description	Cost
Goodfellow Brothers, LLC	Construction	\$22,368,765.00
	10% Contingency for Construction	\$2,236,876.50
	Additional Contingency Funded by SouthEast Connector Joint Powers Authority	\$400,000
Salaber Associates, Inc.	Construction Engineering, Inspection and Materials Testing	\$2,992,848.00
Dokken Engineering, Inc.	Design Support and Environmental Services	\$317,157.28
	Project Budget for Construction	\$28,315,646.78

The Contract Change Order for the Pedestrian/Bike Trail will utilize the existing contingency in the amount of \$285,802 and \$400,000 which has been appropriated through Amendment 2 of the Memorandum of Understanding with the SouthEast Connector Joint Powers Authority. The total cost of the Pedestrian/Bike Trail is \$685,802. The current project budget is \$28,443,000. No additional City of Folsom funding is needed.

ENVIRONMENTAL REVIEW

In 2016 the Capital SouthEast Connector JPA approved a California Environmental Quality Act (CEQA) Tiered Initial Study with Mitigated Negative Declaration for the Capital SouthEast Connector Segment D3/E1.

Caltrans approved the National Environmental Policy Act (NEPA) Categorical Exclusion for Segment D3/E1.

The project is not located in an environmentally sensitive area and would not result in potential impacts to the environment, including traffic, noise, air quality and water quality.

CONTRACT CHANGE ORDER FOR THE PEDESTRIAN/BIKE TRAIL WITH
GOODFELLOW BROTHERS, LLC (CONTRACT NO. 174-21 20-060) FOR THE
CAPITAL SOUTHEAST CONNECTOR SEGMENT D3(A), PROJECT NO. PW1607,
FEDERAL PROJECT NO. 5288(046)**

WHEREAS, the Capital SouthEast Connector Project is the Sacramento region's largest single transportation project; and

WHEREAS, the City of Folsom is a Member Jurisdiction of the Capital SouthEast Connector Joint Powers Authority and will implement the Project; and

WHEREAS, the Capital SouthEast Connector Project has, to date, been funded primarily through a Sacramento County sales-tax measure approved in 2004 by 75 percent of voters; and

WHEREAS, the Capital SouthEast Connector Project has established a program development budget that requires the use of Federal and State funds to advance the project towards timely construction; and

WHEREAS, the City of Folsom desires to construct the Capital SouthEast Connector Project Segment D3(A) along the City's border to four lanes with two eight-foot shoulders; and

WHEREAS, the City of Folsom received Surface Transportation Block Grant Program funding, and is eligible for federal reimbursement, up to \$15,000,000; and

WHEREAS, the City of Folsom received SB-1 funding, and is eligible for state reimbursement up to \$10,000,000; and

WHEREAS, this project was publicly advertised on July 13, 2020, with six bids received on September 9, 2020, with Goodfellow Brothers, LLC being the lowest responsive responsible bidder; and

WHEREAS, the City of Folsom entered into a contract with Goodfellow Brothers, LLC for construction, of the Capital SouthEast Connector Segment D3(A); and

WHEREAS, a Contract Change Order will be utilized to add a pedestrian/bike trail; and

WHEREAS, the cost of completion for the Pedestrian/Bike Trail is \$685,801.96; and

WHEREAS, the City of Folsom received \$400,000 from the SouthEast Connector Joint Powers Authority through Amendment Two of the Memorandum of Understanding to construct the Class 1 Bike Trail; and

WHEREAS, the \$400,000 received from the SouthEast Connector Joint Powers Authority is to be added to the project contingency budget; and

WHEREAS, the balance needed of \$285,801.96 is within the existing project budget contingency; and

WHEREAS, the agreement will be in a form acceptable to the City Attorney:

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom authorizes the City Manager to Execute a Contract Change Order for the Pedestrian/Bike Trail with Goodfellow Brothers, LLC (Contract No. 174-21 20-060) for the Capital SouthEast Connector Segment D3(A), Project No. PW1607, Federal Project No. 5288(046), in the amount of \$685,801.96.

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No. 10848 - A Resolution Adopting a List of Projects for Fiscal Year 2022-23 to be Funded by Senate Bill 1: The Road Repair and Accountability Act
FROM:	Public Works Department

RECOMMENDATION / CITY COUNCIL ACTION

The Public Works Department recommends that the City Council pass and adopt Resolution No. 10848 - A Resolution Adopting a List of Projects for Fiscal Year 2022-23 to be Funded by Senate Bill 1: The Road Repair and Accountability Act.

BACKGROUND / ISSUE

On April 28, 2017, California Governor Brown signed into law Senate Bill 1 (SB-1) which establishes the Road Maintenance and Rehabilitation Account (RMRA) to address deferred maintenance on the state highway and local street and road systems. The Bill states that funds shall be used for projects that include, but are not limited to, the following:

- Road maintenance and rehabilitation
- Safety projects
- Railroad grade separations
- Complete street components, including active transportation purposes, pedestrian and bicycle safety projects, transit facilities, and drainage and stormwater capture projects
- Traffic control devices
- Match for state/federal funds for eligible projects

The City of Folsom is estimated to receive approximately \$1.8 million of RMRA funds for Fiscal Year 2022-23.

The Fiscal Year 2021-22 SB-1 funds will be utilized for the Pavement Resurfacing Project Fiscal Year 2021-22 which includes Iron Point Road between East Bidwell Street and Oak Avenue Parkway and Broadstone Parkway between East Bidwell Street and Iron Point Road.

The City of Folsom currently has an overall Pavement Condition Index (PCI) value of 71, which is described as “Good-Excellent” according to StreetSaver, the software program that is utilized by the Public Works Department to manage the City’s Pavement Management Program. Future projections show that at the pre-SB-1 funding level, this PCI value would degrade to 42 (Poor) by year 2037, and to value 32 (Very Poor) by the year 2045. Due to this rapid, yet expected, degradation of the pavement system, this SB-1 funding source is valuable in helping to maintain the City of Folsom’s overall pavement network.

In order to receive SB-1 funds, local agencies are required by the California Transportation Commission (CTC) to annually submit a list of projects that may be constructed and funded with RMRA funds, and the list must be part of an approved Resolution. The list of projects allows the City to scope the Capital Improvements to meet the available funding.

The Public Works Capital Improvement Projects identified to utilize SB-1 funding are as follows:

Project	Project Completion	Estimated Useful Life
Pavement Resurfacing Project FY 22-23	June 2023	25 year life
<ul style="list-style-type: none"> • Blue Ravine Road (Prairie City Road to Oak Avenue Parkway) • Willow Creek Estates East • Briggs Ranch • Rancho Diablo 		
On-Call Concrete & Asphalt Repair FY22-23	June 2023	50 year life
Glenn Drive Storm Drain Repair	June 2023	50 year life
Natoma Street Drainage Project (Phase 3)	June 2023	50 year life
Willow Creek Estates Storm Drain Lining (Phase 3)	June 2023	50 year life

POLICY / RULE

The California Transportation Commission (CTC) requires any agency that will receive funding from SB-1 to submit a list of projects that is part of an adopted Resolution.

ANALYSIS

Staff has reviewed the most recent SB-1 reporting and spending requirements and found them to be reasonable and realistic to achieve.

FINANCIAL IMPACT

RMRA revenue for Fiscal Year 2022-23 is estimated to be \$1.8 million. Adopting this list of eligible projects authorizes staff to use the Fiscal Year 2022-23 funding for the projects on the list.

ENVIRONMENTAL REVIEW

This action is exempt from environmental review under the California Environmental Quality Act (CEQA).

ATTACHMENT

Resolution No. 10848- A Resolution Adopting a List of Projects for Fiscal Year 2022-23 to be Funded by Senate Bill 1: The Road Repair and Accountability Act

Submitted,

Mark Rackovan, Public Works Director

RESOLUTION NO. 10848**A RESOLUTION ADOPTING A LIST OF PROJECTS FOR FISCAL YEAR 2022-23
TO BE FUNDED BY SENATE BILL 1: THE ROAD REPAIR AND ACCOUNTABILITY
ACT**

WHEREAS, Senate Bill 1 (SB 1), the Road Repair and Accountability Act of 2017 (Chapter 5, Statutes of 2017) was passed by the Legislature and signed into law by California Governor Brown in April 2017 in order to address the significant multi-modal transportation funding shortfalls statewide; and

WHEREAS, SB 1 includes accountability and transparency provisions that will ensure that Folsom residents are aware of the projects proposed for funding in their community and which projects have been completed each Fiscal Year; and

WHEREAS, the City must pass a resolution adopting a list of eligible projects proposed to receive funding from the Road Maintenance and Rehabilitation Account (RMRA), created by SB 1, which must include a description and the location of each proposed project, a proposed schedule for the project's completion, and the estimated useful life of the improvement; and

WHEREAS, the list of projects will include projects that may not be completed in the fiscal year allotted due to available funding; and

WHEREAS, the City will receive an estimated \$1.8 million in RMRA funding from SB 1 in Fiscal Year 2022-23; and

WHEREAS, this is the sixth year in which the City is receiving SB 1 funding that will enable the City to continue essential pavement resurfacing and drainage projects that would not have otherwise been possible without SB 1; and

WHEREAS, the City used a combination of the Pavement Management System and known priorities to develop the SB 1 project list to ensure revenues are being used on the most high-priority and cost-effective pavement resurfacing projects that also meet Folsom's priorities for transportation investment; and

WHEREAS, the SB 1 project list and overall investment in Folsom's local streets and roads infrastructure — with a focus on basic maintenance and safety, investing in the complete streets infrastructure, and using cutting edge technology, materials and practices — will have significant positive co-benefits citywide:

WHEREAS, the agreement will be in a form acceptable to the City Attorney:

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Folsom approves this Resolution adopting the below list of projects to be funded in FY 2022-23 by Senate Bill 1: The Road Repair and Accountability Act.

Project	Project Completion	Estimated Useful Life
Pavement Resurfacing Project FY 22-23	June 2023	25 year life
<ul style="list-style-type: none"> • Blue Ravine Road (Prairie City Road to Oak Avenue Parkway) • Willow Creek Estates East • Briggs Ranch • Rancho Diablo

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Consent Calendar
SUBJECT:	Resolution No.10850– A Resolution Authorizing the City Manager to Execute a Subdivision Improvement Agreement and Accept Offers of Dedication for the Mangini Ranch Phase 1C South Village No. 4 Subdivision, and Approval of the Final Map for the Mangini Ranch Phase 1C Village No. 4 South Subdivision
FROM:	Community Development Department

RECOMMENDATION / CITY COUNCIL ACTION

Staff recommends that the City Council move to adopt:

Resolution No. 10850 – A Resolution Authorizing the City Manager to Execute a Subdivision Improvement Agreement and Accept Offers of Dedication for the Mangini Ranch Phase 1C South Village No. 4 Subdivision, and Approval of the Final Map for the Mangini Ranch Phase 1C South Village No. 4 Subdivision.

BACKGROUND / ISSUE

The Vesting Tentative Subdivision Map for the Mangini Ranch Phase 1C South Village No. 4 subdivision was approved by the City Council on October 26, 2021.

The action for consideration by the City Council is the approval of the Final Map and Subdivision Improvement Agreement for the Mangini Ranch Phase 1C South Village No. 4 subdivision. The Final Map for the Mangini Ranch Phase 1C South Village No. 4 subdivision will create a total of 115 multi-family low density residential lots. With the approval of the Final Map, the subdivision process for this project will be complete.

The Mangini Ranch Phase 1C South Village No. 4 subdivision is located on the south side of Mangini Parkway and Mangini Ranch Phase 1C North Village No. 3, north of White Rock Road and west of Placerville Road in the Folsom Plan Area (FPA) (see Attachment 4).

POLICY / RULE

The Subdivision Map Act of the State of California and the City’s Subdivision Ordinance require that the City Council approve Final Maps and Subdivision Improvement Agreements.

ANALYSIS

The Final Map and conditions of approval for the Mangini Ranch Phase 1C South Village No. 4 subdivision have been reviewed by the Community Development Department and other City departments. The Final Map has been found to be in substantial compliance with the approved Vesting Tentative Subdivision Map, and all conditions pertaining to the map have been satisfied.

Attached is a table which includes the conditions of approval for the Mangini Ranch Phase 1C South Village No. 4 Vesting Tentative Subdivision Map. The tables include information concerning when the condition is required to be satisfied (e.g. at Final Map, building permit, etc.), which City department is responsible to verify that it has been satisfied, and comments or an explanation on how the condition was satisfied.

ENVIRONMENTAL REVIEW

The Mangini Ranch Phase 1C South Village No. 4 Subdivision project has been previously determined to be exempt from review under the California Environmental Quality Act (CEQA) pursuant to Government Code section 65457 and CEQA Guidelines sections 15182 and 15183. No further environmental review is required for this Final Map.

ATTACHMENTS

CITY OF FOLSOM

SUBDIVISION IMPROVEMENT AGREEMENT

This Agreement is made and entered into this _____ day of _____, 2022, by and between the **City of Folsom**, hereinafter referred to as "City", and **Arcadian Improvement Company, LLC., a California Limited Liability Company** hereinafter referred to as "Subdivider".

RECITALS

- A. Subdivider has presented to the City a certain Final Map of a proposed subdivision of land located within the corporate limits of the City that has been prepared in accordance with the Subdivision Map Act of the State of California, the subdivision ordinances of the City, and the Tentative Subdivision Map, if any, of the subdivision previously approved by the City Council of the City.
- B. The proposed subdivision of land is commonly known and described as **Mangini Ranch Phase 1C South Village No. 4** and is herein referred to as the "subdivision".
- C. Subdivider has requested approval of the Final Map prior to the construction and completion of the public improvements (as shown on the approved improvement plans and listed in Exhibit A), including, but not limited to streets, highways, public ways, sidewalks, curbs, gutters, bikeways, storm drainage facilities, sanitary sewer facilities, domestic water facilities, public utility facilities, landscaping, public lighting facilities, park or recreational improvements and appurtenances thereto, in or required by the Subdivision Map Act, the subdivision ordinances of the City, the Tentative Subdivision Map and development agreement, if any, approved by the City. The foregoing improvements, more specifically listed on Exhibit A attached hereto, are hereinafter referred to as "the required improvements".

- D. City Council has required as a condition precedent to the approval of the Final Map, the Subdivider first enters into and executes this subdivision improvement agreement with the City.

NOW, THEREFORE, the parties agree as follows:

1. Performance of Work. Subdivider agrees to furnish, construct, and install at his own expense the required improvements as shown on the approved plans and specifications of the subdivision, a copy of which is on file in the Community Development Department, and is incorporated herein by reference, along with any changes or modifications as may be required by the City Engineer due to errors, omissions, changes in conditions, or changes in facilities as required by the City Engineer. The approved plans and specifications of the required improvements may be modified by the Subdivider as the development progresses, provided that any modification is approved in writing by the City Engineer. The total estimated cost of the required improvements, as shown on Exhibit A, is **FOUR MILLION FOUR HUNDRED TWELVE THOUSAND TWO HUNDRED NINETY - TWO AND 00/100 DOLLARS (\$4,412,292.00)**.
2. Work; Satisfaction of City Engineer. All of the work on the required improvements is to be done at the places, of the materials, and in the manner and at the grades, all as shown upon the approved plans and specifications and as required by the City's Improvement Standards and Standard Construction Specifications and any applicable City ordinances or state and federal laws, and to the satisfaction of the City Engineer.
3. Work; Time for Commencement and Performance. Work on the required improvements shall be completed by the Subdivider on or before twelve (12) months from the date of this Agreement. At least fifteen (15) calendar days prior to the commencement of such work, the Subdivider shall notify the City Engineer in writing of the date fixed by Subdivider for commencement of the work.
4. Time of Essence; Extension.
 - a. Time is of the essence of this Agreement. The date for completion of the work of construction may not be extended, except as provided in Section 16.36.110 of the Folsom Municipal Code.
5. Improvement Security. Concurrently with the execution of this Agreement, the Subdivider shall furnish the City:
 - a. Improvement security in the sum of **FOUR MILLION FOUR HUNDRED TWELVE THOUSAND TWO HUNDRED NINETY - TWO AND 00/100 DOLLARS (\$4,412,292.00)**, which sum is equal to one hundred percent of the total estimated cost of constructing the required improvements and the cost of any other obligation to be performed by Subdivider under this Agreement, conditioned upon the faithful performance of this Agreement; and

- b. Separate improvement security in the sum of **FOUR MILLION FOUR HUNDRED TWELVE THOUSAND TWO HUNDRED NINETY - TWO AND 00/100 DOLLARS (\$4,412,292.00)**, which sum is equal to one hundred percent of the estimated cost of constructing the required improvements, securing payment to the contractor, subcontractor and to persons furnishing labor, materials, or equipment to them for the construction of the required improvements.
- c. The Subdivider shall deposit with the City **THREE THOUSAND AND NO/100 DOLLARS (\$3,000.00)** for the Final Map. The deposit may be used at the discretion of the City to correct deficiencies and conditions caused by the Subdivider, contractor, or subcontractors that may arise during or after the construction of the subdivision.
- d. The estimated total cost of required improvements includes a ten percent (10%) construction cost contingency, the cost of the installation of survey monuments in the Subdivision to guarantee and secure the placement of such monuments as provided by Section 66496 of the Government Code of the State of California, and an estimated utility cost in addition to ensure installation of public utilities. In lieu of providing the estimate of total utility costs, the Subdivider may submit, in a form acceptable to the City Engineer, certification from the utility companies that adequate security has been deposited to ensure installation.
6. Plan Checking and Inspection Fees. The Subdivider shall pay to the City fees for the checking, filing, and processing of improvement plans and specifications, and for inspecting the construction of the required improvements in the amounts and at the times established by the City.
7. Indemnification and Hold Harmless. The Subdivider shall indemnify, protect, defend, save and hold the City harmless from any and all claims or causes of action for death or injury to persons, or damage to property resulting from intentional or negligent acts, errors, or omissions of Subdivider or Subdivider's officers, employees, volunteers, and agents during performance of this Agreement, or in connection with Subdivider's work, or from any violation of any federal, state, or municipal law or ordinance, to the extent caused, in whole or in part, by the willful misconduct, negligent acts, or omissions of Subdivider or its employees, subcontractors, or agents, or by the quality or character of Subdivider's work. It is understood that the duty of Subdivider to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Subdivider from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply, and shall further survive the expiration or termination of this Agreement. By execution of this Agreement, Subdivider acknowledges and agrees to the provisions of this Section and that it is a material element of consideration. Subdivider shall, at his own cost and expense, defend any and all actions, suits, or legal

proceedings that may be brought or instituted against the City, its officers and employees, on any such claim or demand, and pay or satisfy any judgement that may be rendered against the City in any such actions, suits or legal proceedings, or result thereof.

8. Insurance. Subdivider and any contractors hired by Subdivider to perform any of the Required Improvements shall, at their expense, maintain in effect for the duration of this Agreement or until the required improvements are accepted by the City, whichever first occurs, not less than the following coverage and limits of insurance, which shall be maintained with insurers and under forms of policy satisfactory to the City. The maintenance by Subdivider and its contractors of the following coverage and limits of insurance is a material element of this Agreement. The failure of Subdivider or any of its contractors to maintain or renew coverage or to provide evidence of renewal may be treated by the City as a material breach of this Agreement.
- a. Minimum Limits of Insurance. Subdivider shall maintain limits not less than:
1. Comprehensive General Liability: \$1,000,000 combined single limit per occurrence for bodily injury, personal injury and property damage.
 2. Automobile Liability: \$1,000,000 combined single limit per accident for bodily injury, personal injury and property damage.
 3. Worker's Compensation and Employers Liability: Worker's Compensation limits as required by the Labor Code of the State of California and Employers Liability limits of \$1,000,000 per accident.
- b. Deductibles and Self-Insured Retentions. Any deductibles or self-insured retentions shall be declared to and approved by the City. At the option of the City, either: the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects to a bond guaranteeing payment of losses and related investigations, claim administration and defense expenses.
- c. Other Insurance Provisions. The policies are to contain, or be endorsed to contain, the following provisions:
1. General Liability and Automobile Liability Coverages
 - A. The City, its officers, officials, employees and volunteers are to be covered as insureds as respects: liability arising out of activities performed by or on behalf of the Subdivider; products and completed operations of the Subdivider; premises owned, leased or used by the Subdivider; or automobiles owned, leased, hired or borrowed by the Subdivider. The coverage shall contain no special limitations on the scope of protection afforded to the City, its officers, officials, employees or volunteers.

- B. The Subdivider's insurance coverage shall be primary insurance as respects the City, its officers, officials, employees and volunteers. Any insurance of self-insurance maintained by the City, its officials, employees or volunteers shall be excess of the Subdivider's insurance and shall not contribute with it.
 - C. Any failure to comply with reporting provisions of the policies shall not affect coverage provided to the City, its officers, officials, employees or volunteers.
 - D. The Subdivider's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.
2. Worker's Compensation and Employers Liability Coverage. The insurer shall agree to waive all rights or subrogation against the City, its officers, officials, employees and volunteers for losses arising from work performed by Subdivider for the City.
 3. All Coverages. Each insurance policy required by this clause shall be endorsed to state that coverage shall not be suspended, voided or cancelled by either party, reduced in coverage or in limits except after thirty (30) days prior written notice by certified mail, return receipt requested, has been given to the City.
- d. Acceptability of Insurers. Insurance is to be placed with insurers with a Best's rating of not less than A: VII.
 - e. Verification of Coverage. Concurrently with the execution of this Agreement, the Subdivider shall furnish the City with original endorsements affecting coverage required by this clause. The endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The City reserves the right to require complete, certified copies of all required insurance policies at any time.
9. Title to Improvements. Title to and ownership of the required public improvements constructed under this Agreement by Subdivider shall vest absolutely in the City upon completion and written acceptance of such improvements by the City Engineer. The City Engineer shall not accept the required improvements unless Subdivider certifies that such improvements have been constructed in conformity with the approved plans and specifications, approved modifications, if any, the approved Final Map, City Improvement Standards and Standard Construction Specifications, any applicable City Ordinances or State and Federal laws and after 35 days from the date of filing of a Notice of Completion.
 10. Warranty Security. Prior to acceptance of the required improvements by the City Engineer, the Subdivider shall provide security in the amount and in the form as required by the City Engineer to guarantee the improvements against any defective work or labor done or defective materials used in the performance of the required improvements (Warranty Security)

throughout the warranty security period which shall be the period of one year following completion and written acceptance of the improvements (Warranty Security Period). The amount of the Warranty Security shall not be less than 10 percent of the cost of the construction of the improvements, including the cash deposit required in paragraph 5C of this agreement, which shall be retained for the Warranty Security Period.

11. Repair or Reconstruction of Defective Work or Materials. If, within the Warranty Security Period or the applicable statute of limitations, whichever is longer, any improvement or part of any improvement furnished and/or installed or constructed by Subdivider or any of the work done under this Agreement fails to fulfill any of the requirements of the Agreement or the specifications referred to herein as determined by the City, Subdivider shall without delay and without any cost to the City, repair, replace, or reconstruct any defective or otherwise unsatisfactory part or parts of the required improvements. If the Subdivider fails to act promptly or in accordance with this requirement, or if the exigencies of the situation require repairs or replacements to be made before the Subdivider can be notified, then the City may, at its option, make the necessary repairs or replacements or perform the necessary work, and Subdivider shall pay to City the actual cost of such repairs plus fifteen percent (15%) within thirty (30) days of the date of billing for such work by City. The parties further understand and agree that the Warranty Security furnished pursuant to paragraph 10 of this Agreement shall guarantee and secure the faithful performance and payment of the provisions of this paragraph during the Warranty Security Period.
12. Subdivider Not Agent of City. Neither Subdivider nor any of Subdivider's agents or contractors are or shall be considered to be agents of City in connection with the performance of Subdivider's obligations under this Agreement.
13. Notice of Breach and Default. If Subdivider refuses or fails to prosecute the work, or any part thereof, with such diligence as will ensure its completion within the time specified, or any extension thereof, or fails to complete the work within such time, or if Subdivider should be adjudged a bankruptcy, or Subdivider should make a general assignment for the benefit of his creditors, or if a receiver should be appointed in the event of Subdivider's insolvency, or if Subdivider or any of Subdivider's contractors, subcontractors, agents or employees should violate any of the provisions of this Agreement and the City may, but is under no obligation to, serve written notice upon Subdivider and Subdivider's surety, if any, of breach of this Agreement, or of any portion thereof.
14. Breach of Agreement: Performance By Surety or City. In the event of any such notice, Subdivider's surety, if any, shall have the duty to take over and complete the work and the required improvements; provided, however, that if the surety within fifteen (15) days after the serving of such notice of breach upon it does not give the City written notice of its intention to take over the performance thereof within fifteen (15) days after notice to the City of such election, then the City may take over the work and prosecute the same to completion by contract, or by any other method the City may deem advisable, for the account and at the expense of the Subdivider, and the Subdivider's surety shall be liable to City for any excess costs of damages incurred by the City; and in such event, the City, without liability for so doing, may take possession of and utilize in completing the work, such materials, appliances, plant or other property belonging to Subdivider as may be on the site of the work and necessary therefor.

If the form of improvement security is other than a bond, then the City, after giving notice of breach of the Agreement, may proceed to collect against the improvement security in the manner provided by law and by the terms of the security instrument.

- 15. Notices. All notices required under this Agreement shall be in writing, and delivered in person or sent by registered or certified mail, postage prepaid.

Notices required to be given to City shall be addressed as follows:

**City of Folsom
Community Development Department
50 Natoma Street
Folsom, CA 95630
ATTN: City Engineer**

Notices required to be given to Subdivider shall be addressed as follows:

**Arcadian Improvement Company, LLC
4370 Town Center Boulevard, Suite 100
El Dorado Hills, CA 95762
ATTN; William B. Bunce, President**

Notices required to be given surety, if any, of Subdivider shall be addressed as follows:

Any party of the surety may change such address by notice in writing to the other party and thereafter notices shall be addressed and transmitted to the new address.

- 16. Attorney's Fees. In the event any legal action is brought to enforce or interpret this Agreement, the prevailing party shall be entitled to an award of reasonable attorney's fees, in addition to any other relief to which he may be entitled.
- 17. Assignment. This Agreement shall bind and inure to the benefit of the assigns, successors in interest, heirs, executors, and administrators of the parties, and the parties agree that the City may cause a copy of this Agreement to be recorded in the Sacramento County Recorder's Office.

IN WITNESS WHEREOF, the parties have executed this Agreement as follows:

PERFORMANCE BOND
 for
Subdivision Improvement Agreement

WHEREAS, The City Council of the City of Folsom, a Municipal Corporation in the State of California, and **Arcadian Improvement Company, LLC., a California Limited Liability Company**, (hereinafter designated as "Principal") have entered into an agreement where by principal agrees to install and complete certain designated public improvements, which said agreement, dated _____ 2022, and identified as the **Mangini Ranch Phase 1C South Village No. 4 Subdivision Improvement Agreement** is hereby referred to and made a part hereof; and,

WHEREAS, Said Principal is required under the terms of said agreement to furnish a bond for the faithful performance of said agreement;

NOW THEREFORE, We, the principal, and _____, as surety, are held and firmly bound unto the City of Folsom, hereinafter referred to as the City; in the penal sum of **FOUR MILLION FOUR HUNDRED TWELVE THOUSAND TWO HUNDRED NINETY - TWO AND 00/100 DOLLARS (\$4,412,292.00)**, lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, successors, executors, and administrators, jointly and severally firmly by these presents.

The condition of this obligation is such that if the above bounded principal, its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions, and provisions in the said agreement and any alteration thereof made as therein provided, on its part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the City, its officers, agents, and employees, as therein stipulated, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect.

As a part of the obligation secured hereby and in addition to the face amount specified therefor, there shall be included costs and reasonable expenses and fees, including reasonable attorney's fees, incurred by City in successful enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

The surety hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the agreement or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the agreement or to the work or to the specifications.

IN WITNESS WHEREOF, this instrument has been duly executed by the principal and surety above named, on _____, 2022.

LABOR & MATERIALS BOND
 for
Subdivision Improvement Agreement

WHEREAS, The City Council of the City of Folsom, a Municipal Corporation of the State of California, and **Arcadian Improvement Company, LLC, a California Limited Liability Company** (hereinafter designated as "Principal"), have entered into an agreement whereby principal agrees to install and complete certain designated public improvements, which said agreement, dated _____ 2022, and identified as the **Mangini Ranch Phase 1C South Village No. 4 Subdivision Improvement Agreement** is hereby referred to and made a part hereof; and,

WHEREAS, under the terms of said agreement, principal is required before entering upon the performance of the work, to file a good and sufficient payment bond with the City of Folsom to secure the claims to which reference is made in Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code of the State of California;

NOW THEREFORE, said principal and the undersigned as corporate surety, are held firmly bound unto the City of Folsom and all contractors, subcontractors, laborers, materialmen and other persons employed in the performance of the aforesaid agreement and referred to in the aforesaid Code of Civil Procedure, in the sum of **FOUR MILLION FOUR HUNDRED TWELVE THOUSAND TWO HUNDRED NINETY - TWO AND 00/100 DOLLARS (\$4,412,292.00)** for materials furnished or labor thereon of any kind, or for amounts due under the Unemployment Insurance Act with respect to such work or labor, that said surety will pay the same in an amount not exceeding the amount hereinabove set forth, and also in case suit is brought upon this bond, will pay, in addition to the face amount thereof, cost and reasonable expenses and fees, including reasonable attorney's fees, incurred by City in successfully enforcing such obligation, to be awarded and fixed by the court, and to be taxed as costs and to be included in the judgment therein rendered.

It is hereby expressly stipulated and agreed that this bond shall inure to the benefit of any and all persona, companies and corporations entitled to file claims under Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code, so as to give a right of action to them or their assigns in any suit brought upon this bond.

Should the condition of this bond be fully performed, then this obligation shall become null and void, otherwise it shall be and remain in full force and effect.

The surety hereby stipulates and agrees that no change, extension of time, alteration, or addition to the terms of said agreement or the specifications accompanying the same shall in any manner affect its obligations on this bond, and it does hereby waive notice of any such change, extension, alteration, or addition.

IN WITNESS WHEREOF, this instrument has been duly executed by the principal and surety above named, on _____, 2022.

05/10/2022 Item No. 17.

- ### NOTES
- Lot dimensions and bearings are approximate and subject to change.
 - Typical lots are measured from back of apron. On irregular shaped lots, measure lot width at narrowest or vertical.
 - Lot lines and bearings may be adjusted at the time of final map if approved by the City of Folsom. Responsibility for compliance with minimum lot area is assumed by the applicant in a subdivision map application with the approved specific plan. Subject to the approval of the City of Folsom.
 - The final mapping and subdivision development of lots may be affected. (including) to the extent of the Development Agreement.
 - Utility and lot markings to be identified by the applicant and does not include existing utility or development. Utility development zoning that is on-site and will be determined at final map and approved subdivision map.
 - Persons to Government Code Section 65401.1, the applicant may not merge their lots based upon this tentative map. The filing of a final map on a portion of this tentative map may not affect any part of this tentative map.
 - Pursuant to California Government Code Section 64099.20.3, the landowner herein may be merged and subdivided without payment to acreage and may constitute a subdivision for purposes of the existing public trusts, subject to the approval of the City of Folsom, including the following:
 - As a person as set forth in 64099.20.3(a)(2).
 - As a person as set forth in 64099.20.3(b).
 - Street names that are reserved for identification purposes only. A street name will be approved with tentative map that street name is located on lot for identification of the time of final map and development map application.
 - Additional (optional) to accommodate new public utility transmission, access is applied to lot development or other similar requirements needed to accomplish the final map may be located prior to such final map based on lot location.
 - A 10' public utility easement will be located adjacent to an easement right-of-way and is approved by the City of Folsom.
 - The utility program contained within this tentative subdivision map is covered by an Allocation Agreement to the benefit of the City of Folsom and County of Sacramento proposed August 26, 2014 in local order 2014-03-026, Council of Sacramento and Sacramento County.
 - For subdivision purposes that apply to this project see the Development Statement contained within the tentative map.
 - The applicant is to a Development Permit.

TABLE OF CONDITIONS OF APPROVAL FOR THE MANGINI RANCH PHASE 1C SOUTH VILLAGE NO. 4 VESTING TENTATIVE SUBDIVISION MAP

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
1.		<p>Final Development Plans The owner/applicant shall submit final site development plans to the Community Development Department that shall substantially conform to the exhibits referenced below:</p> <ol style="list-style-type: none"> 1. Small-Lot Vesting Tentative Subdivision Map, dated July 1, 2021 2. Preliminary Grading, Drainage, and Utility Plan, dated July 1, 2021 3. Residential Schematic Design, dated December 4, 2020 4. Digital Color Board, dated May 4, 2021 5. Access and Circulation Analysis, dated September 23, 2021 6. Environmental Noise Analysis, dated September 15, 2021 7. Applicant's Inclusionary Housing Letter, September 15, 2021 <p>The Small-Lot Vesting Tentative Subdivision Map, Minor Administrative Modifications, Planned Development Permit-Development Standard Deviations and Design Review, Street Names and Inclusionary Housing Plan are approved for the development of a 115-unit single-family residential subdivision (Phase 1 C South Subdivision). Implementation of the project shall be consistent with the above referenced items and these conditions of approval.</p>	G, I, M, B	CD (P)(E)	<p>The Community Development Department has reviewed and approved the improvement plans and the final map for the project. The approved improvement plans are in substantial compliance with the preliminary grading and drainage plans, the preliminary site and utility plans, offsite infrastructure exhibit, the preliminary landscape plans and the community design guidelines.</p> <p>The final map for this subdivision is in substantial compliance with the approved Vesting Tentative Subdivision Map.</p>	Yes
2.		<p>Plan Submittal</p> <p>All civil engineering, improvement, and landscape and irrigation plans, shall be submitted to the Community Development Department for review and approval to ensure conformance with this approval and with relevant codes, policies, standards and other requirements of the City of Folsom.</p>	G, I	CD (P)(E)	<p>Improvement plans for Savannah Parkway, Mangini Parkway, and this subdivision have been approved by the City. Landscape plans for Savannah Parkway and Mangini Parkway have also been approved by the City.</p>	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
3.		Validity This approval of the Small-Lot Vesting Tentative Subdivision Map shall be valid for a period of twenty-four (24) months pursuant to Section 16.16.110A of the Folsom Municipal Code and the Subdivision Map Act. The term of the Planned Development Permit and approved Inclusionary Housing Agreement shall track the term of the Small-Lot Vesting Tentative Subdivision Map, as may be extended from time to time pursuant to Section 16.16.110.A and 16.16.120 of the Folsom Municipal Code and the Subdivision Map Act.	M	CD (P)	The small-lot vesting tentative subdivision map for the subdivision was approved by the City Council on June 22, 2021.	Yes
4.		FMC Compliance The Small-Lot Final Map shall comply with the Folsom Municipal Code and the Subdivision Map Act.	M	CD (E)	The small-lot vesting tentative subdivision map for the subdivision is in compliance with the Folsom Municipal Code and the State Subdivision Map Act.	Yes
5.		Development Rights The approval of this Small-Lot Vesting Tentative Subdivision Map conveys the right to develop. As noted in these conditions of approval for the Small-Lot Vesting Tentative Subdivision Map, the City has identified improvements necessary to develop the subject parcels. These improvements include on and off-site roadways, water, sewer, storm drainage, landscaping, sound walls, and other improvements.	OG	CD (P)(E)(B) PW, PR, FD, PD	The Community Development Department has reviewed and approved the improvement plans for both the required on-site and off-site improvements and landscape plans.	Yes
6.		Public Right of Way Dedication As provided for in the First Amended and Restated Development Agreement (ARDA) and the Amendments No. 1 and 2 thereto, and any approved amendments thereafter, the Owner/Applicant shall dedicate all public rights-of-way and corresponding public utility easements such that public access is provided to each and every lot within the Phase 1 C South Subdivision project as shown on the Small-Lot Vesting Tentative Subdivision Map (Lots 1-115).	M	CD (E)(P)	The final map for the subdivision includes all required public right-of-way and public utility easements necessary to serve all 115 lots in the subdivision. The public right-of-way and public utility easements are shown on the final map.	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
8.		<p>Indemnity for City The Owner/Applicant shall protect, defend, indemnify, and hold harmless the City and its agents, officers and employees from any claim, action or proceeding against the City or its agents, officers or employees to attack, set aside, void, or annul any approval by the City or any of its agencies, departments, commissions, agents, officers, employees, or legislative body concerning the project, which claim, action or proceeding is brought within the time period provided therefore in Government Code Section 66499.37 or other applicable statutes of limitation. The City will promptly notify the owner/applicant of any such claim, action or proceeding, and will cooperate fully in the defense. If the City should fail to cooperate fully in the defense, the owner owner/applicant shall not thereafter be responsible to defend, indemnify and hold harmless the City or its agents, officers, and employees, pursuant to this condition. The City may, within its unlimited discretion, participate in the defense of any such claim, action or proceeding if both of the following occur:</p> <ul style="list-style-type: none"> • The City bears its own attorney’s fees and costs, and • The City defends the claim, action or proceeding in good faith <p>The owner/applicant shall not be required to pay or perform any settlement of such claim, action or proceeding unless the settlement is approved by the owner/applicant. The owner/applicant’s obligations under this condition shall apply regardless of whether a Final Map is ultimately recorded with respect to this project.</p>	OG	CD (P)(E)(B) PW, PR, FD, PD	The City standard subdivision improvement agreement includes language that satisfies this condition. The subdivision improvement agreement will be executed by the City Manager upon approval by the City Council.	Yes
9.		<p>Small-Lot Vesting Tentative Subdivision Map The Small-Lot Vesting Tentative Subdivision map is expressly conditioned upon compliance with all environmental mitigation measures identified in the Folsom</p>	OG	CD	The owner/applicant has complied with all applicable mitigation measures from the FPASP FEIR/EIS and other noted approved environmental documents prior to the issuance of a grading permit. Additionally,	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
		Plan Area Specific Plan EIR/EIS as amended by the Revised Proposed Water Supply Facility Alternative (November 2012), the Folsom South of U.S. Highway 50 Backbone Infrastructure Mitigated Negative Declaration (December 2014).			construction inspection and monitoring was conducted throughout construction by the City and/or its Consultants.	
10.		ARDA and Amendments The Owner/Applicant shall comply with all provisions of Amendments No. 1 and 2 to the First Amended and Restated Tier 1 Development Agreement and any approved amendments thereafter by and between the City and the owner/applicant of the project.	M	CD (E)	The Community Development Department has reviewed the subdivision and verified that it is in compliance with Amendment No. 1 and No. 2 to the First Amended and Restated Tier 1 development Agreement.	Yes
11.		Mitigation Monitoring The owner/applicant shall participate in a mitigation monitoring and reporting program pursuant to City Council Resolution No. 2634 and Public Resources Code 21081.6. The mitigation monitoring and reporting measures identified in the Folsom Plan Area Specific Plan FEIR/EIS have been incorporated into these conditions of approval in order to mitigate or avoid significant effects on the environment. These mitigation monitoring and reporting measures are identified in the mitigation measure column. Applicant shall fund on a Time and Materials basis all mitigation monitoring (e.g., staff and consultant time).	OG	CD (P)	The owner/applicant has funded and participated in a MMRP reporting program performed by the City's consultant (Helix) and/or City staff.	Yes
12.		The owner/applicant acknowledges that the State adopted amendments to Section 65850 of the California Government Code (specifically Section 65850(9)), effective January 1, 2018, to allow for the implementation of inclusionary housing requirements in residential rental units, upon adoption of an ordinance by the City. The Landowner is not currently contemplating any residential rental projects within the Subject Property; however, in the event the City amends its Inclusionary Housing Ordinance with respect to rental housing pursuant to	OG	CD (P)	The Landowner has acknowledged this requirement and has confirmed that there is currently no plan to include any residential rental property within the subdivision.	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
		Section 65850(9), Landowner (or successor in interest) agrees that the Subject Property shall be subject to said City Ordinance, as amended, should any residential rental project be proposed within the Subject Property.				
POLICE/SECURITY REQUIREMENT						
13.		<p>The Owner/Applicant shall consult with the Police Department in order to incorporate all reasonable crime prevention measures. The following security/safety measures shall be considered:</p> <ul style="list-style-type: none"> • A security guard on-duty at all times at the site or a six-foot security fence shall be constructed around the perimeter of construction areas. • Security measures for the safety of all construction equipment and unit appliances. • Landscaping shall not cover exterior doors or windows, block line-of-sight at intersections or screen overhead lighting. 	G, I, B	PD	The owner/applicant provided onsite security during construction and has incorporated line of sight guidelines into landscaping plans at intersections which have been reviewed and approved by the City.	Yes
DEVELOPMENT COSTS AND FEE REQUIREMENTS						
14.		<p>Taxes and Fees The owner/applicant shall pay all applicable taxes, fees and charges for the project at the rate and amount required by the Public Facilities Financing Plan and Amendments No. 1 and No. 2 to the Amended and Restated Tier 1 Development Agreement.</p>	M	CD (P)(E)	The owner/applicant has paid all current taxes and fees associated with this subdivision.	Yes
15.		<p>Assessments If applicable, the owner/applicant shall pay off any existing assessments against the property, or file necessary segregation request and pay applicable fees.</p>	M	CD (E)	The owner/applicant has paid all taxes and fees associated with this subdivision and filed a tax segregation request for applicable taxes.	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
16.		<p>FPASP Development Impact Fees The Owner/Applicant shall be subject to all Folsom Plan Area Specific Plan Area development impact fees in place at the time of approval or subsequently adopted consistent with the Public Facilities Financing Plan (PFFP), Development Agreement and amendments thereto, unless exempt by previous agreement. The owner/applicant shall be subject to all applicable Folsom Plan Area plan-wide development impact fees in effect at such time that a building permit is issued. These fees may include, but are not limited to, the Folsom Plan Area Specific Plan Fee, Specific Plan Infrastructure Fee (SPIF), Solid Waste Fee, Corporation Yard Fee, Transportation Management Fee, Transit Fee, Highway 50 Interchange Fee, General Park Equipment Fee, Housing Trust Fee, etc.</p> <p>Any protest to such for all fees, dedications, reservations or other exactions imposed on this project will begin on the date of final approval (November 2021), or otherwise shall be governed by the terms of Amendments No. 1 and 2 to ARDA. The fees shall be calculated at the fee rate set forth in the PFFP and the ARDA.</p>	B	CD (P), PW, PK	The Owner/Applicant shall pay all required City fees and Plan Area wide fees prior to issuance of building permits.	Condition will be satisfied prior to issuance of a building permit.
17.		<p>Legal Counsel The City, at its sole discretion, may utilize the services of outside legal counsel to assist in the implementation of this project, including, but not limited to, drafting, reviewing and/or revising agreements and/or other documentation for the project. If the City utilizes the services of such outside legal counsel, the City shall provide notice to the owner/applicant of the outside counsel selected, the scope of work and hourly rates, and the owner/applicant shall reimburse the City for all outside legal fees and costs incurred and documented by the City for such services. The owner/applicant may be required, at the sole discretion of the City Attorney, to submit a deposit to the City for these</p>	OG	CD (P)(E)	The City has not yet utilized any outside services for any type of legal issues for this subdivision. If at any time during the development of this subdivision, any outside legal services were necessary, the owner/applicant would be required to comply with this condition	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
		services prior to initiation of the services. The owner/applicant shall be responsible for reimbursement to the City for the services regardless of whether a deposit is required.				
18.		Consultant Services If the City utilizes the services of consultants to prepare special studies or provide specialized design review or inspection services for the project, the City shall provide notice to the owner/applicant of the outside consultant selected, the scope of work and hourly rates, and the owner/applicant shall reimburse the City for actual costs incurred and documented in utilizing these services, including administrative costs for City personnel. A deposit for these services shall be provided prior to initiating review of the Grading Plan, Final Map, improvement plans, or beginning inspection, whichever is applicable.	G, I, M, B	CD (P)(E)	The City has provided notice to the owner/applicant for various Consultants performing services for the development of this subdivision. The City has collected deposits in advance of such work for these services.	Yes
GRADING PERMIT REQUIREMENTS						
19.		Walls/Fences The final location, design, height, materials, and colors of the walls and fences shall be consistent with the submitted tentative map exhibits and noise barrier exhibit, subject to review and approval by the Community Development Department to ensure consistency with the Folsom Ranch Central District Design Guidelines. The location of the fencing shall remain in perpetuity as shown and installed originally by the Applicant (i.e., fence may not be moved into the PUE on side/corner lots).	G, I, B	CD (P)(E), FD	The Community Development Department has verified that the proposed walls and fences for the subdivision are in compliance with the Folsom Ranch Central Design Guidelines. The Community Development Department will review all proposed site plans to verify compliance with the Folsom Fire Code.	Yes Condition will be satisfied prior to issuance of a building permit.
20.		Mine Shaft Remediation The owner/applicant shall locate and remediate all antiquated mine shafts, drifts, open cuts, tunnels, and water conveyance or impoundment structures existing on the project site, with specific recommendations for the sealing, filling, or removal of each that meet all applicable health, safety and engineering standards. Recommendations shall be prepared by an appropriately licensed engineer or geologist. All remedial	G	CD (E)	During the course of grading and construction for this subdivision no mine shafts or tunnels were located or discovered.	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
		plans shall be reviewed and approved by the City prior to approval of grading plans.				
21		<p>Prepare Traffic Control Plan. Prior to construction, a Traffic Control Plan for roadways and intersections affected by construction shall be prepared by the owner/applicant. The Traffic Control Plan prepared by the owner/applicant shall, at minimum, include the following measures:</p> <ul style="list-style-type: none"> • Maintaining the maximum amount of travel lane capacity during non-construction periods, possible, and advanced notice to drivers through the provision of construction signage. • Maintaining alternate one-way traffic flow past the lay down area and site access when feasible. • Heavy trucks and other construction transport vehicles shall avoid the busiest commute hours (7 a.m. to 8 a.m. and 5 p.m. to 6 p.m. on weekdays). • A minimum 72-hour advance notice of access restrictions for residents, businesses, and local emergency response agencies. This shall include the identification of alternative routes and detours to enable for the avoidance of the immediate construction zone. • A phone number and City contact for inquiries about the schedule of the construction throughout the construction period. This information will be posted in a local newspaper, via the City's web site, or at City Hall and will be updated on a monthly basis. 	G	CD (E)	The required Traffic Control Plans in this condition are no longer applicable. This condition was added to the project since the original concept for water supply contemplated extending a large diameter water main from the Sacramento River to the FPA. In lieu of the water supply being extended through the various jurisdictions noted in this condition, the water supply provided to the FPA comes from conservation efforts by the City to provide the needed water supply for the FPA. The new water supply proposal was validated in 2014.	Yes
22.		<p>State and Federal Permits The owner/applicant shall obtain all required State and Federal permits and provide evidence that said permits have been obtained, or that the permit is not required, subject to staff review prior to approval of any grading or improvement plan.</p>	G, I	CD (P)(E)	The owner/applicant has obtained all required State and Federal permits and copies are available from the Community Development Department.	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
23.		<i>Landslide /Slope Failure</i> The owner/applicant shall retain an appropriately licensed engineer during grading activities to identify existing landslides and potential slope failure hazards. The said engineer shall be notified a minimum of two days prior to any site clearing or grading to facilitate meetings with the grading contractor in the field.	G	CD (E) PW	The owner/applicant retained a geotechnical engineer and implemented recommendations for this mitigation measure. A geotechnical report outlining these recommendations is available from Community Development Department.	Yes
IMPROVEMENT PLAN REQUIREMENTS						
24.		<i>Improvement Plans</i> The improvement plans for the required public and private subdivision improvements necessary to serve any and all phases of development shall be reviewed and approved by the Community Development Department prior to approval of a Final Map.	M	CD (E)	The owner/applicant submitted improvement plans for all infrastructure improvements required to serve this subdivision. The City Engineer has reviewed and approved all required improvement plans to serve this subdivision. Copies of the improvement plans are available from the Community Development Department.	Yes
25.		<i>Standard Construction Specifications and Details</i> Public and private improvements, including roadways, curbs, gutters, sidewalks, bicycle lanes and trails, streetlights, underground infrastructure and all other improvements shall be provided in accordance with the latest edition of the City of Folsom <u><i>Standard Construction Specifications and Details</i></u> and the <u><i>Design and Procedures Manual and Improvement Standards</i></u> .	I	CD (P)(E)	The owner/applicant submitted improvement plans in accordance with the City's Standard Specifications.	Yes
26.		<i>Water and Sewer Infrastructure</i> All City-owned water and sewer infrastructure shall be placed within the street right of way. In the event that a City-maintained public water or sewer main needs to be placed in an area other than the public right of way, such as through an open space corridor, landscaped area, etc., the following criteria shall be met; <ul style="list-style-type: none"> • The Owner/Applicant shall provide public sewer and water main easements. • An access road shall be designed and constructed to allow for the operations, maintenance and replacement of the public water or sewer line by the 	I	CD (E)	The owner/applicant has installed all sewer and water infrastructure within the street right of way. The outfall sewer line has been installed within easements or planned right of way within future streets.	Yes

		<p>and shall be screened from adjacent occupied land uses in earlier development phases to the maximum extent practicable. Screens may include, but are not limited to, the use of such visual barriers such as berms or fences. The screen design shall be approved by the appropriate agency to further reduce visual effects to the extent possible.</p> <p>Mitigation for the off-site elements outside of the City of Folsom's jurisdictional boundaries shall be developed by the project applicant(s) of each applicable project phase in consultation with the affected oversight agency(ies) (i.e., El Dorado and/or Sacramento Counties, and Caltrans) to reduce to the extent feasible the visual effects of construction activities on adjacent project land uses that have already been developed.</p>				
53-2	3A.1-5 (FPASP EIR/EIS)	<p>Establish and Require Conformance to Lighting Standards and Prepare and Implement a Lighting Plan. To reduce impacts associated with light and glare, the City shall:</p> <p>Establish standards for on-site outdoor lighting to reduce high-intensity nighttime lighting and glare as part of the Folsom Specific Plan design guidelines/standards. Consideration shall be given to design features, namely directional shielding for street lighting, parking lot lighting, and other substantial light sources, that would reduce effects of nighttime lighting. In addition, consideration shall be given to the use of automatic shutoffs or motion sensors for lighting features to further reduce excess nighttime light.</p> <p>Use shielded or screened public lighting fixtures to prevent the light from shining off of the surface intended to be illuminated. To reduce impacts associated with light and glare, the project applicant(s) of all project phases shall: Shield or screen lighting fixtures to direct the light downward</p>	Before approval of building permits.	City of Folsom Community Development Department	The Community Development Department (CDD) has reviewed and approved lighting plan for subdivision	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES						
No.	Mitigation Measure	Condition of Approvals	When Required	Responsible Department	Comments	Conditioned Satisfied
		and prevent light spill on adjacent properties. Flood and area lighting needed for construction activities, nighttime sporting activities, and/or security shall be screened or aimed no higher than 45 degrees above straight down (half-way between straight down and straight to the side) when the source is visible from any off-site residential property or public roadway. For public lighting in residential neighborhoods, prohibit the use of light fixtures that are of unusually high intensity or brightness (e.g., harsh mercury vapor, low-pressure sodium, or fluorescent bulbs) or that blink or flash. Use appropriate building materials (such as low-glare glass, low-glare building glaze or finish, neutral, earth-toned colored paint and roofing materials), shielded or screened lighting, and appropriate signage in the office/commercial areas to prevent light and glare from adversely affecting motorists on nearby roadways. Design exterior on-site lighting as an integral part of the building and landscape design in the Folsom Specific Plan area. Lighting fixtures shall be architecturally consistent with the overall site design.				
AIR QUALITY						
53-3	3A.2-1a (FPASP EIR/EIS)	<i>Implement Measures to Control Air Pollutant Emissions Generated by Construction of On-Site Elements.</i> To reduce short-term construction emissions, the project applicant(s) for any particular discretionary development application shall require their contractors to implement SMAQMD's list of Basic Construction Emission Control Practices, Enhanced Fugitive PM Dust Control Practices, and Enhanced Exhaust Control Practices (list below) in effect at the time individual portions of the site undergo construction. In addition to SMAQMD-recommended measures, construction operations shall comply with all applicable SMAQMD rules and regulations.	Before the approval of all grading plans by the City and throughout project construction, where applicable, for all project phases.	City of Folsom Community Development Department	The City and its Environmental Compliance Consultant (Helix) have reviewed all MMRP conditions and verified compliance with this Mitigation Measure. Compliance was verified prior to commencement of grading and construction in Fall of 2021. Compliance table is on file with the City.	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES

		<p>Basic Construction Emission Control Practices Water all exposed surfaces two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads. Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways should be covered. Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited. Limit vehicle speeds on unpaved roads to 15 miles per hour (mph). All roadways, driveways, sidewalks, parking lots to be paved should be completed as soon as possible. In addition, building pads should be laid as soon as possible after grading unless seeding or soil binders are used. Minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes (as required by the state airborne toxics control measure [Title 13, Section 2485 of the California Code of Regulations]). Provide clear signage that posts this requirement for workers at the entrances to the site. Maintain all construction equipment in proper working condition according to manufacturer's specifications. The equipment must be checked by a certified mechanic and determine to be running in proper condition before it is operated.</p> <p>Enhanced Fugitive PM Dust Control Practices – Soil Disturbance Areas Water exposed soil with adequate frequency for continued moist soil. However, do not overwater to the extent that sediment flows off the site. Suspend excavation, grading, and/or demolition activity when</p>

		staff and/or other officials may conduct periodic site inspections to determine compliance. Nothing in this mitigation measure shall supersede other SMAQMD or state rules or regulations. If at the time of construction, SMAQMD has adopted a regulation or new guidance applicable to construction emissions, compliance with the regulation or new guidance may completely or partially replace this mitigation if it is equal to or more effective than the mitigation contained herein, and if SMAQMD so permits.				
53-4	3A.2-1b (FPASP EIR/EIS)	<p><i>Pay Off-site Mitigation Fee to SMAQMD to Off-Set NOX Emissions Generated by Construction of On-Site Elements.</i></p> <p>Implementation of the project or the other four other action alternatives would result in construction-generated NOX emissions that exceed the SMAQMD threshold of significance, even after implementation of the SMAQMD Enhanced Exhaust Control Practices (listed in Mitigation Measure 3A.2-1a). Additionally, Mitigation Measure 3A.4-1 (Implement Additional Measures to Control Construction-Generated GHG Emissions, pages 3A.4-14 to 15) has the potential to both reduce and increase NOX emissions, depending on the types of alternative fuels and engine types employed. Therefore, the project applicant(s) shall pay SMAQMD an off-site mitigation fee for implementation of any of the five action alternatives for the purpose of reducing NOX emissions to a less-than- significant level (i.e., less than 85 lb/day). All NOX emission reductions and increases associated with GHG mitigation shall be added to or subtracted from the amount above the construction threshold to determine off-site mitigation fees, when possible. The specific fee amounts shall be calculated when the daily construction emissions can be more accurately determined: that is, if the City/USACE select</p>	Before the approval of all grading plans by the City and throughout project construction for all project phases.	The City of Folsom Community Development Department shall not grant any grading permits to the respective project applicant(s) until the respective project applicant(s) have paid the appropriate off-site mitigation fee to SMAQMD.	The City and its Environmental Compliance Consultant (Helix) have reviewed all MMRP conditions and verified compliance with this Mitigation Measure. Compliance was verified prior to commencement of grading and construction in Fall of 2021. Compliance table is on file with the City.	Yes

CONDITIONS OF APPROVAL FOR THE PHASE 1 C SOUTH SUBDIVISION (PN 21-086) WEST OF SAVANNAH PARKWAY, SOUTH OF MANGINI PARKWAY AND NORTH OF WHITE ROCK SMALL-LOT VESTING TENTATIVE SUBDIVISION MAP, PLANNED DEVELOPMENT PERMIT- DEVELOPMENT STANDARD DEVIATIONS AND DESIGN REVIEW, AND MINOR ADMINISTRATIVE MODIFICATIONS AND STREET NAMES

		and certify the EIR/EIS and approves the Proposed Project or one of the other four other action alternatives, the City and the applicants must establish the phasing by which development would occur, and the applicants must develop a detailed construction schedule. Calculation of fees associated with each project development phase shall be conducted by the project applicant(s) in consultation with SMAQMD staff before the approval of grading plans by the City. The project applicant(s) for any particular discretionary development application shall pay into SMAQMD's off-site construction mitigation fund to further mitigate construction generated emissions of NOX that exceed SMAQMD's daily emission threshold of 85 lb/day. The calculation of daily NOX emissions shall be based on the cost rate established by SMAQMD at the time the calculation and payment are made. At the time of writing this EIR/EIS the cost rate is \$16,000 to reduce 1 ton of NOX plus a 5% administrative fee (SMAQMD 2008c). The determination of the final mitigation fee shall be conducted in coordination with SMAQMD before any ground disturbance occurs for any project phase.				
53-5	3A.2-1c (FPASP EIR/EIS)	Analyze and Disclose Projected PM10 Emission Concentrations at Nearby Sensitive Receptors Resulting from Construction of On-Site Elements. Prior to construction of each discretionary development entitlement of on-site land uses, the project applicant shall perform a project-level CEQA analysis (e.g., supporting documentation for an exemption, negative declaration, or project-specific EIR) that includes detailed dispersion modeling of construction-generated PM10 to disclose what PM10 concentrations would be at nearby sensitive receptors. The dispersion modeling shall be performed in accordance with applicable SMAQMD guidance that is in place at the time the analysis is performed. At the time of writing this EIR/EIS, SMAQMD's most current and most detailed guidance for addressing construction-generated PM10 emissions is found in its Guide to Air Quality Assessment in Sacramento County (SMAQMD 2009a). The project-level analysis shall incorporate detailed parameters of	Before the approval of all grading plans by the City.	City of Folsom Community Development Department	The City and its Environmental Compliance Consultant (Helix) have reviewed all MMRP conditions and verified compliance with this Mitigation Measure. 		provide oversight during all excavation, placement of fill, and disposal of materials removed from and deposited on both on- and off-site construction areas. Mitigation for the off-site elements outside of the City of Folsom's jurisdictional boundaries must be coordinated by the project applicant(s) of each applicable project phase with the affected oversight agency(ies) (i.e., El Dorado and/or Sacramento Counties, or Caltrans).	permits and ground-disturbing activities.	Development Department		
53-13	3A.7-3 (FPASP EIR/EIS)	<p><i>Prepare and Implement the Appropriate Grading and Erosion Control Plan.</i></p> <p>Before grading permits are issued, the project applicant(s) of each project phase that would be located within the City of Folsom shall retain a California Registered Civil Engineer to prepare a grading and erosion control plan. The grading and erosion control plan shall be submitted to the City Public Works Department before issuance of grading permits for all new development. The plan shall be consistent with the City's Grading Ordinance, the City's Hillside Development Guidelines, and the state's NPDES permit, and shall include the site-specific grading associated with development for all project phases.</p> <p>The plans referenced above shall include the location, implementation schedule, and maintenance schedule of all erosion and sediment control measures, a description of measures designed to control dust and stabilize the construction-site road and entrance, and a description of the location and methods of storage and disposal of construction materials. Erosion and sediment control measures could include the use of detention basins, berms, swales, wattles, and silt fencing, and covering or watering of stockpiled soils to reduce wind erosion. Stabilization on steep slopes could include construction of retaining walls and reseeded with vegetation after construction. Stabilization of construction entrances to minimize trackout (control dust) is commonly achieved by installing filter fabric and crushed rock to a depth of approximately 1 foot. The project</p>	Before the start of construction activities.	City of Folsom Community Development Department	Compliance with this condition has been monitored through construction inspection by the City.	Yes

53-67	3A.15-4m (FPASP EIR/EIS)	<p>Participate in Fair Share Funding of Improvements to Reduce Impacts on White Rock Road between Grant Line Road and Prairie City Road (Sacramento County Roadway Segment 22).</p> <p>To improve operation on White Rock Road between Grant Line Road and Prairie City Road, this roadway segment must be widened to six lanes. This improvement is included in the 2035 MTP but is not included in the Sacramento County General Plan. Improvements to this roadway segment must be implemented by Sacramento County. The identified improvement would more than offset the impacts specifically related to the Folsom South of U.S. 50 project on this roadway segment. However, because of other development in the region that would substantially increase traffic levels, this roadway segment would continue to operate at an unacceptable LOS F even with the capacity improvements identified to mitigate Folsom South of U.S. 50 impacts. The applicant shall pay its proportionate share of funding of improvements to the agency responsible for improvements, based on a program established by that agency to reduce the impacts to White Rock Road between Grant Line Road and Prairie City Road (Sacramento County Roadway Segment 22).</p>	Before project build out. A phasing analysis should be performed prior to approval of the first subdivision map to determine during which project phase the improvement should be built.	Sacramento County Department of Transportation.	This subdivision will pay its fair share of the following improvements with the payment of Specific Plan Infrastructure Fees (SPIF), City Traffic Impact Fees and Sacramento County Wide Transportation fees collected prior to building permit issuance in this subdivision.	Condition will be satisfied prior to issuance of a building permit.

		following requirements: record the site with the NAHC or the appropriate Information Center, use an open-space or conservation zoning designation or easement, or record a reinternment document with the county. The project applicant(s) or its authorized representative of all project phases shall rebury the Native American human remains and associated grave goods with appropriate dignity on the property in a location not subject to further subsurface disturbance if the NAHC is unable to identify an Most Likely Descendant or if the Most Likely Descendant fails to make a recommendation within 48 hours after being granted access to the site. The project applicant(s) or its authorized representative may also reinter the remains in a location not subject to further disturbance if it rejects the recommendation of the Most Likely Descendant and				

Folsom City Council Staff Report

MEETING DATE:	5/10/2022
AGENDA SECTION:	Public Hearing
SUBJECT:	Appeal by Igor Semenyuk of a Decision by the Historic District Commission Denying a Conditional Use Permit for the Lakeside Memorial Lawn Crematorium project (PN 19-182) located at 1201 Forrest Street
FROM:	Community Development Department

RECOMMENDATION/CITY COUNCIL ACTION

Move to deny the appeal by Igor Semenyuk of a Decision by the Historic District Commission Denying a Conditional Use Permit for the Lakeside Memorial Lawn Crematorium project (PN 19-182) located at 1201 Forrest Street.

BACKGROUND

The Lakeside Memorial Lawn located at 1201 Forrest Street has been in operation since the 19th century and represents a combination of several old Folsom cemeteries, including the Masonic, Odd Fellows, Jewish, Citizen's, and Cook's cemeteries. It is adjacent to the Chung Wah cemetery to the south, dredge mining tailings to the east, the Folsom Lake State Recreation Area and American River to the west and the Preserve/Lake Natoma Shores subdivision to the north.

The Lakeside Cemetery (including the Odd Fellows and Mason's Cemeteries) and the adjacent Chung Wah Cemetery and mining tailings all appear on the City of Folsom's Cultural Resources Inventory list and the Lakeside Memorial Lawn and Chung Wah cemeteries were both designated as "historic" by the Sacramento County Board of Supervisors and Cemetery Advisory Commission. The Chung Wah Cemetery is also listed on the National Register of Historic Places.

The Planning Commission approved a Use Permit and Variance for Mausoleums at Lakeside Memorial Lawn in 1991 (PC91-042). An amendment to the approval was granted in 1995 (PC95-033). That approval allowed for the construction of twelve mausoleums. To date, two mausoleums have been built.

In 2002, Lorin Claney applied for a Conditional Use Permit (CUP) for a crematorium at the Lakeside Memorial Lawn (PN 02-258). Staff prepared a Draft Initial Study/Mitigated Negative Declaration (IS/MND) for the project and routed it for public review. Staff received several comments from the public and from the Sacramento County Cemetery Advisory Commission recommending denial of the project.

While no formal air quality or cultural resources studies were done as part of the 2002 IS/MND, staff prepared a staff report for the Historic District Commission recommending denial of the project in 2003 on the grounds that the letter from the Cemetery Advisory Commission stated that the crematorium would have a negative impact on the historical character of the existing cemetery and historical use of the area. The staff report stated that, based on the Cemetery Advisory Commission letter, the conglomeration of historic cemeteries, combined with the tailings, create a rare combination of unique cultural resources that will be impacted by the proposal, that a crematorium is not a use consistent with a historic cemetery, and that approval of a CUP for a contemporary use such as a crematorium would jeopardize the eligibility status of the site as an historic cemetery by the County. Because the staff report recommended denial, the CEQA analysis was not included in the staff report since CEQA does not apply to projects which a public agency rejects or disapproves.

Prior to the scheduled public hearing, the applicant withdrew the application based on costs associated with preparing additional environmental analysis for air quality and cultural resources studies. The Historic District Commission did not review or consider the project proposed in 2003, including the CUP application or the associated IS/MND.

An existing maintenance building, approximately 1,071 square feet in area (where the crematorium is proposed), is located along the south border of the cemetery. The design review application for a second 1,600-square-foot maintenance shed was approved by the Historic District Commission in 2020 (PN 20-160) and the shed was subsequently constructed.

On May 16, 2019, the applicant (Igor Semenyuk) submitted a development application for approval of a Conditional Use Permit for operation of a crematorium inside the Miller Funeral Home located at 507 Scott Street. In coordinating with the Sacramento Metropolitan Air Quality Management District (SMAQMD), the applicant determined that a crematorium at this location would not be feasible. The applicant then proposed to perform alkaline hydrolysis (liquid cremations) at this location that would not employ any burning or produce emissions but instead would produce a liquid effluent that would be flushed down sewage pipes. While this method of cremation was approved in California in 2017, City Environmental and Water

Resources staff, in coordination with the Sacramento Regional County Sanitation District, did not have enough local examples of the impacts of these effluents to support this proposal. The applicant subsequently proposed to locate the crematorium in the Lakeside Memorial Lawn in the same metal structure in which it was proposed in 2003.

The proposed project includes the installation of one HCT Apex-250 crematory (manufactured by Hartwick Combustion) within an existing metal structure. The roof of the structure would be cut open to accommodate this device, but the structure's footprint would not be expanded. In addition, a 10-foot-wide by 15-foot-wide walk-in cooler would be installed inside the structure to provide temporary, short-term storage of human remains prior to cremation. Two 250-gallon propane tanks would be installed on a concrete pad along the northern side of the structure to provide power for the crematorium, as no gas lines currently exist on the property. The concrete pad covers approximately 38.3 square feet of ground. An exhaust stack would be installed on the roof of the metal structure approximately 19.5 feet from finished grade. The applicant proposes up to four cremations per day and expects that the total will not exceed 500 cremations per year. Average cremation time is approximately 90 minutes. One to two employees would be present to operate the crematorium during the cremation process. Existing parking spaces would be utilized to accommodate employees and visitors.

If the CUP is approved, the project is also required to obtain an authority to construct permit to operate (A/C, PTO) from SMAQMD before the crematory can be installed and operated. As part of that process, the applicant would be required to provide analysis to ensure the crematory will meet all air district rules/regulations and significance thresholds during the air district's A/C, PTO application and review process. In the event the air district's refined health risk assessment analysis shows that cancer risk or hazard index numbers exceed the significance thresholds noted, further restrictions to the crematorium would be required by SMAQMD before they would issue the A/C, PTO. All crematoriums in Sacramento County are also subject to regular inspections by SMAQMD, which investigates all public complaints about the facilities and fines all facilities for any violations.

Based on the potential for the project to impact nearby residences and cultural resources, staff had an environmental study, called an Initial Study (IS), prepared. Staff retained HELIX Environmental Planning, Inc. to prepare the study, including a full Air Quality and Greenhouse Gas Emissions Assessment. HELIX also hired ECORP Consulting to prepare a Cultural Resources Inventory Report that informed the environmental conclusions regarding cultural and tribal resources. As a result of the Initial Study, a Mitigated Negative Declaration (MND) was prepared by HELIX and that environmental document found that all environmental impacts related to the project would be less than significant with mitigation. The IS/MND is included as an appendix within Attachment 2 of this staff report.

After the IS/MND had been made public, staff prepared a staff report recommending approval of the proposed CUP and IS/MND to the Historic District Commission (provided in Attachment 2). In the staff report, staff noted that with the rigorous analysis of air quality and

cultural resources provided in the new IS/MND, staff determined that the project would not be detrimental to the health, safety, peace, morals, comfort and general welfare of persons residing or working in the neighborhood or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the city, as the proposed project would not have negative impacts to nearby commercial or residential uses that have not been mitigated. Notice of the IS/MND publication and the public hearing in front of the Historic District Commission were placed in the Sacramento Bee and mailed to property owners within 300 feet of the subject property.

During the life of the project application, staff received directly or was forwarded over 120 unique public comments regarding the project and/or the environmental document, the vast majority of which expressed concerns about the project and the environmental document. Also submitted to staff were an online petition with over 160 signatures, a hand-signed petition with almost 500 signatures, and over 300 signed form letters all expressing opposition to the proposed project. Staff included these letters and petitions as part of the staff report and made them available to the public, the Historic District Commissioners, and the applicant. Staff also summarized each of the unique points made in the public comments in the staff report and HELIX provided a response letter to the general points that were made in several of the letters regarding environmental issues addressed in the IS/MND. All of the comment letters were provided to the Historic District Commission for their consideration (included as part of Attachment 2 to this staff report) at the February 16, 2022 meeting. Comments received after the publication of the staff report are included in Attachment 3 of this staff report.

The individuals who were opposed to the proposed project voiced concerns regarding a number of topics including the following:

- Concerns regarding air quality emissions and the data used in the Air Quality and Greenhouse Gas Emissions Assessment;
- Concerns regarding traffic, circulation and parking;
- Concerns regarding wildfire and life safety in case of fire caused by the crematorium;
- Cultural and archaeological concerns regarding the impact of the crematory machine on nearby cultural resources and burial sites
- Concerns regarding the appropriateness of the land use (a crematorium) in the Historic District;
- Aesthetic concerns regarding the height and design of the stack and impacts to views from nearby cultural resources and residences;
- Whether members of the public could be present at cremations;
- Differences in the conclusions of the 2003 and 2022 staff reports for the crematorium;
- Concerns regarding the potential decrease in property values of nearby residences due to the presence of the crematorium; and
- Psychological effects of nearby residences being located near a crematorium.

After publication of the staff report, staff received six additional public comment letters that were added to the record. Included in those comments were two letters from individuals belonging to the Sacramento County Cemetery Advisory Commission. The Chair of the Cemetery Advisory Commission reiterated the points that were made by the group in 2003, stating that construction of a crematorium would be inappropriate near the surrounding cultural resources of historic importance. The Chair also provided evidence that the Lakeside Cemetery and Chung Wah Cemetery were listed for historical designation by the County. Another member of the Cemetery Advisory Commission wrote a letter stating that the proposed crematorium could threaten the nomination of the Young Wo Cemetery and that construction of the crematorium could adversely affect the historic features and burials of those buried nearby. HELIX provided a topical response to these comments prior to the hearing. This memorandum has been included in Attachment 4 of this staff report.

The Historic District Commission reviewed the Lakeside Memorial Lawn Crematorium project at its February 16, 2022 meeting. At this meeting, 36 individuals (mostly residents of the Preserve/Lake Natoma Shores subdivision and the surrounding neighborhoods of the Historic District, as well as a representative from the Sacramento County Funeral Commission) voiced concerns about and asked for denial of the proposed project, citing many of the same reasons expressed in the previously submitted letters. Following extensive public comment, the Historic District Commission engaged in a lengthy discussion regarding the proposed project on primary topics related to air quality, fire hazards, aesthetics, cultural resources, property values and required CUP findings.

With respect to air quality, the Historic District Commission discussed the preliminary Health Risk Assessment performed for the IS/MND and spoke with a representative from SMAQMD about the air district's permitting and enforcement process. It was reiterated that Best Available Control Technologies (BACTs) would be required for the cremation machine which would limit air pollution. Regarding complaints, the SMAQMD explained that they typically respond within 24 hours and visit both the complainant and the potential sources of the complaint. Notices of violation and fines may be levied under the air district's authority to enforce public nuisance provisions and facilities with persistent violations or nuisances are subject to permit revocation. SMAQMD Staff also noted that persistent complaints that result in such actions may result in revocation of the CUP.

With regards to an increase in potential cancer rates due to the crematorium, HELIX staff began the discussion by noting that there is a risk of potentially developing cancer inherent in breathing the air around us. In the state of California, that baseline risk is approximately 800 cases per 1 million people. When analyzing whether a proposed project has the potential to increase that baseline risk due to the project's impact on air quality, an increase in 10 cancer cases per million people would be considered significant. Based on modeling and its analysis, HELIX determined that this project has the potential to increase the baseline risk of potentially

developing cancer by 0.5 cases per million people. This analysis assumes that someone would remain at the maximum point of exposure consecutively for 30 years. HELIX staff also explained that this analysis does not mean that anyone will necessarily develop cancer; the focus is on the potential risk that it will happen. For CEQA purposes, a potential increase of 0.5 cases per million people is not considered significant.

Ultimately, a majority of the Historic District Commissioners expressed confidence in the air quality analysis in the IS/MND and SMAQMD process.

With respect to fire hazards, one or more Historic District Commissioners asked about the potential fire hazards of the proposed propane tanks. Folsom Fire Chief Ken Cusano clarified that the commercial-grade tanks require an operation permit from the Fire Department and are designed to vent. Chief Cusano was also asked about public concern regarding the adequacy of existing evacuation routes in case of fire. Chief Cusano stated that since the crematorium posed no significant fire danger to the area as conditioned, there would be no significant impact to evacuation routes. Chief Cusano also stated that the Fire Department can open the opposite end of Forrest Street if needed and that potential issues with Light Rail gates being in the down position on the evacuation route during an emergency event can be worked out by contacting Light Rail during an emergency to stop trains from coming to the area. During deliberation, individual Historic District Commissioners expressed confidence with regards to staff's analysis of fire hazard impacts.

With respect to aesthetics, individual Historic District Commissioners asked for clarification on the ultimate height of the stack and what kind of control SMAQMD has over the height. Commissioners also questioned whether design review would be warranted for the proposed stack or whether they could provide design parameters as part of the CUP so that a separate design review would not be necessary. HELIX commented that the analysis done for the IS/MND assumed a height of 19.5 feet from finished grade based on specifications provided to them by the applicant. The SMAQMD representative noted that the Air District does not advocate for a specific height unless the height proposed by the applicant does not meet the district's air quality standards for nearby sensitive receptors.

With respect to cultural resources, individual Historic District Commissioners expressed concern that the project was not consistent with Historic District Design and Development Guidelines (DDGs) Policy 2.2, which states that "the City shall encourage National Register nomination of historic buildings as well as other historical designations by state or local agencies" given the Sacramento County Cemetery Advisory Commission's letters. Individual Commissioners also expressed concern that the proposed crematorium is not an historic use. ECORP staff, who prepared the Cultural Resources Inventory Report, stated that many different cultures' funerary practices have occurred at Lakeside Memorial Lawn and that introducing a new practice (cremation) would not be the first time that a new funerary practice has been introduced on the project site. They also stated that while cremation is not a typical

part of Chinese funerary practices, burning of possessions was common in such practices, and occurred in the Chung Wah cemetery until the 1960's.

ECORP stated that whether a crematory is an appropriate use on the project site is not an archeological question but if a crematory were to be located on the project site, the proposed location would be the most appropriate place for it since it is in a modern, previously disturbed maintenance area of the cemetery. Historic District Commissioners agreed that the appropriateness of the use is for the HDC to decide, but several commissioners stated that their cultural resources concerns had not been adequately addressed, especially since the Sacramento County Cemetery Advisory Commission stated that the crematorium would have a negative impact on the historical significance of the cemetery. Individual Historic District Commissioners stated that they wished that the Cemetery Advisory Commission would have provided more information regarding how specifically the crematory would have a negative impact but stated that the Cemetery Advisory Commission would have time to provide a greater level of detail before a City Council meeting, as it was assumed that their decision would be appealed by either the public or the applicant based on the level of project controversy. Staff has since reached out to the Cemetery Advisory Commission directly after the hearing for more information. The Cemetery Advisory Commission communicated to staff that they were able to meet regarding the proposed crematory prior to publication of the City Council staff report and that the comments they made in 2002 still stand.

With respect to property values, individual Historic District Commissioners asked whether property owners would be required to provide disclosures that they live near a crematorium. The Assistant City Attorney stated that they did not see anything specifically in their research of real estate laws that would necessarily require that the presence of a crematory would have to be disclosed but recommended that anyone with concerns about real estate disclosures should consult a realtor or a real estate attorney. However, multiple Historic District Commissioners stated that they believe that the presence of a crematory would be detrimental to nearby residential property values and that realtors would take that into account when determining home listing prices.

Finally, with respect to the required CUP findings, individual Historic District Commissioners asked for clarification as to why the findings in the 2003 staff report differed from those in the 2022 staff report. One commissioner referenced that the 2003 staff report showed that the originally proposed crematorium was not consistent with the DDGs and questioned how the newly proposed project is different. Multiple commissioners brought up the high volume of public comments received from members of the surrounding community and wondered if the finding that the project would not be detrimental to the peace, morals, comfort and general welfare of persons residing or working in the neighborhood or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the city could be met given the amount of opposition from the neighborhood and chances of property values going down due to the presence of a crematorium in the area. Staff clarified that the 2003 staff

report relied on an internally produced IS/MND with no technical studies performed by cultural resources experts, and without further information beyond the letter from the Cemetery Advisory Commission, denial was recommended. Staff recommended approval in the 2022 staff report in part because of the conclusions of the Ecorp Cultural Resources Inventory Report.

At the conclusion of the Historic District Commission meeting on February 16, 2022, a motion was made to approve the proposed CUP and IS/MND with additional conditions added to install a weather station on the structure on which the crematory would be located to collect wind data for potential smoke and odor complaints and for the stack to be subject to design review by the Historic District Commission subsequent to obtaining a permit from the SMAQMD. That motion was seconded but failed by a vote of 1-6. A second motion was then made to deny the CUP using the same finding that was made in the 2003 staff report that stated that the use is detrimental to the health, safety, or general welfare of persons residing or working in the neighborhood, and detrimental or injurious to property and improvements in the neighborhood and the general welfare of the city because introduction of this use will impact the historical character of the existing cemetery and historical use of the area. This motion was seconded and passed with a vote of 6-1.

Since the Historic District Commission hearing, and in response to the timely appeal, staff received additional comments from the public and the Cemetery Advisory Commission for consideration during the appeal. All such comments oppose the project and recommend denial of the appeal. These letters are included in Attachment 6 of this staff report.

The City Council considered the appeal at the April 26, 2022 meeting. At that meeting, staff presented the project and appeal, the applicant presented his appeal, and the City Council opened the public hearing and heard public testimony from members of the public who were physically present at the meeting. The public hearing was then continued to this meeting in response to technical challenges to ensure that any interested persons intending to participate remotely would have an opportunity to provide comments prior to any action/decision by the City Council. Public comment letters that were received after publication of the April 26, 2022 staff report are included in Attachment 7 and public comment letters received since the April 26, 2022 hearing are included in Attachment 8.

POLICY / RULE

As set forth in Section 17.52.700 of the Folsom Municipal Code, actions of the Historic District Commission may be appealed to the City Council. The appeal shall be in writing, shall state the specific reason for the appeal and grounds asserted for relief, and shall be filed no later than 10 calendar days after the date of the action being appealed.

APPEAL/ANALYSIS

On February 22, 2022, project applicant Igor Semenyuk submitted a timely appeal of the decision of the Historic District Commission denying the proposed project (Attachment 1). The applicant/appellant later submitted a supplemental letter providing additional reasoning for the appeal, also included in Attachment 1.

In his appeal and supplemental letter, Mr. Semenyuk makes the following claims:

1. The findings for denial were that the project was detrimental to health and safety/general welfare of the neighborhood, and to property values in the neighborhood and city and that there would be impacts to the historical character of the cemetery and area. However, no data was provided by the Commission to support their findings for denial. Their denial was based on the residents' concerns rather than the data from the staff report and IS/MND.
2. Staff recommended approval of the crematorium and an IS/MND was prepared by multiple parties, including experts who were present at the hearing to defend their findings. The IS/MND showed that the project was well below CEQA thresholds of significance.
3. The crematorium would not impact the historical character of the cemetery since it is being placed inside a modern metal shed within a modern area of the cemetery.
4. There are existing regional cemeteries included on historical resources lists in which modern crematoriums currently operate.
5. The crematorium would not significantly impact property values of the neighborhood as property values are dictated by current market values in real estate.
6. There are no industrially zoned areas in Folsom that have a neighborhood more than 500 feet from the property, so alternative industrially-zoned locations would not result in fewer impacts to residences.

City Staff Response

Reasoning Behind Commission Findings for Denial

In the finding for denial, the Historic District Commission stated that the introduction of the crematory use will impact the historical character of the existing cemetery and historical use of the area and would therefore be detrimental or injurious to property and improvements in the neighborhood and the general welfare of the city. In their deliberations, the Commission cited the letters received from the Cemetery Advisory Commission which stated that the crematorium would be inappropriate near the surrounding cultural resources of historic

importance and could threaten the nomination of the Young Wo Cemetery and adversely affect the historic features and burials of those buried nearby. While the Historic District Commission discussed factors related to air quality, property values, and fire hazards, the finding they made was related specifically to the historical character of the cemetery and area, including the historical nature of the Young Wo Cemetery and the people who are buried there.

Staff's Recommendation for HDC Approval

As explained in the February 2022 HDC staff report, the analysis in the IS/MND did result in a staff recommendation for HDC approval of the project. To approve the project, the Historic District Commission had to find that the project WOULD NOT be detrimental to the health, safety, peace, morals, comfort and general welfare of persons residing or working in the neighborhood or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the city. However, after considering the staff report, IS/MND, public comments and comments from the Cemetery Advisory Commission, the Historic District Commission determined that the project WOULD (as noted in the analysis above), be detrimental or injurious to property and improvements in the neighborhood and the general welfare of the city due to the introduction of the crematory use impacting the historical character of the existing cemetery and historical use of the area.

Impacts to the Historical Character of the Cemetery

During the Historic District Commission's questions to staff and consultants, Lisa Westwood with Ecorp Consulting stated that if a crematorium were to be placed on the cemetery grounds, the existing metal building within the modern maintenance area would be the best location for a crematorium on the project site. Furthermore, the Cultural and Tribal Resources section of the IS/MND found that there would be a less than significant impact with standard mitigation related to the unanticipated discovery of archeological or paleontological resources during construction based on the analysis provided in Ecorp's Cultural Resources Inventory Report. However, the letters sent by the Cemetery Advisory Commission stated that the crematorium would be inappropriate near the surrounding cultural resources of historic importance and could threaten the nomination of the Young Wo Cemetery and adversely affect the historic features and burials of those buried nearby. Ultimately, the Historic District Commission voted to deny the Conditional Use Permit because the Commission found that introduction of a crematorium would impact the historical character of the existing cemetery and historical use of the area.

Other Historic Cemeteries with Crematoriums

Staff coordinated with SMAQMD to identify all crematoriums operating in Sacramento County. While there are five cemeteries in Sacramento County with operational crematoriums, staff did not identify any of these cemeteries as being on a cultural or historical resources list.

Impacts to Property Values

Several members of the Preserve/Lake Natoma Shores community expressed concern that the crematorium would negatively impact the property values of their homes. While the Historic District Commission discussed potential impacts to property values, the finding for denial was based on the introduction of the crematory use negatively impacting the historical character of the existing cemetery and historical use of the area.

Industrial Properties Adjacent to Residential Uses

Staff researched industrial properties located within the city in relation to their proximity to residential uses. Staff found that, of the properties within the city zoned M-1 and M-2, four areas (Lake Forest Technical Center, Kikkoman property, 250 Outcropping Way, and 600 Coolidge Drive) have either buildings or vacant property located over 600 feet from residential uses, though none of the properties currently on the real estate market consist of a building in scale with the small shed in which the applicant is proposing to operate the crematorium.

FINDING FOR DENIAL

Based on the foregoing, staff recommends that the appeal be denied based on the following finding:

CONDITIONAL USE PERMIT FINDING

- A. THE USE APPLIED FOR IS DETRIMENTAL TO THE HEALTH, SAFETY, PEACE, COMFORT, MORALS, OR GENERAL WELFARE OF PERSONS RESIDING OR WORKING IN THE NEIGHBORHOOD, AND DETRIMENTAL OR INJURIOUS TO PROPERTY AND IMPROVEMENTS IN THE NEIGHBORHOOD AND THE GENERAL WELFARE OF THE CITY BECAUSE INTRODUCTION OF THIS USE WILL IMPACT THE HISTORICAL CHARACTER OF THE EXISTING CEMETERY AND HISTORICAL USE OF THE AREA.

CONCLUSION

Based on the information contained in this report and the Historic District Commission's denial of the Conditional Use Permit for the Lakeside Memorial Lawn Crematorium project (PN 19-182) located at 1201 Forrest Street, staff recommends denial of the appeal by Igor Semenyuk to overturn the Historic District Commission decision.

To: Folsom City Council

Reason for Appeal of Historic District Commissioners Meeting held 2/16/2022

In the interest of the project called Lakeside Memorial Lawn Crematorium the motion of the commissioners was denial, all but one- Commissioner Justin Raithel.

The Findings claimed for denial was as follows:

- Detrimental to health and safety/ general welfare of neighborhood.
- Detrimental to property value in neighborhood and city.
- Impacts historical character of cemetery and area.

The recommendation of the planning committee was approval of the crematorium. A full scope Environmental Report was done with multiple experts. Experts were present in the meeting to defend their findings. The findings and data showed that the project was well below any thresholds of CA standards for health and safety. The crematorium would not impact any historical character of the cemetery as the project was being placed inside the modern metal shed, in the modern area of the cemetery. It does not significantly impact the property values of the neighborhood. That is dictated by current market values in real estate.

In the meeting, a presentation was shown with funeral homes and cemeteries that are listed as historical cemeteries having and operating modern crematoriums in their facilities. All of the crematoriums shown are closer to residents, business and restaurants than the proposed crematorium at Lakeside Cemetery.

The data was not considered at all. Everything was drowned out by residents who just don't want it near their neighborhood. They want cremation services; they just want it done in other cities. There is no area in Folsom that is zoned industrial that does not have a neighborhood within 500 feet of it. Folsom is growing. Cremation demand is growing. A crematory is essential to the growing demand. If you can't place a crematory in a cemetery, then where can you?

The denial was based on findings, yet when asked what those were, none could be provided. No data was provided to prove that it is detrimental to the health and safety, that it is detrimental to the property values and that it impacts any historical character. No matter what the experts data was, it was just dismissed with prejudice.

We implore you to reconsider the historic commission decision on the crematory. A city is larger than just one neighborhood.

Thank you,

Igor Semenyuk

ATTACHMENT 1 DESCRIPTION/ANALYSIS

APPLICANT'S PROPOSAL

The applicant, Igor Semenyuk, is requesting approval of a Conditional Use Permit (PN 19-182) to operate a crematorium in an existing 1,071-square foot metal structure within the Lakeside Memorial Lawn cemetery located at 1201 Forrest Street. The proposed project includes the installation of one HCT Apex-250 crematory (manufactured by Hartwick Combustion) within an existing metal structure. The roof of the structure would be cut open to accommodate this device, but the structure's footprint would not be expanded. In addition, a 10-foot-wide by 15-foot-wide walk-in cooler would be installed inside the structure to provide temporary, short-term storage of human remains prior to cremation. Two 250-gallon propane tanks will be installed on a proposed concrete pad along the northern side of the structure to provide power for the crematorium, as no gas lines currently exist on the property. The concrete pad will cover approximately 38.3 square feet of ground. An exhaust stack will be installed on the roof of the metal structure (as shown in Attachment 6). The applicant proposes up to four cremations per day and expects that the total will not exceed 500 cremations per year. Average cremation time is approximately 90 minutes. One to two employees would be present to operate the crematorium during the cremation process. Existing parking spaces would be utilized to accommodate employees and visitors. The Applicant's project description, which includes additional information related to the cremation process and other project-related details, is included as Attachment 9. Please refer to Attachment 5 for the proposed site plans and floor plan and Attachment 6 for the Hartwick Combustion Technologies Floor Plan, Outer Dimensions and Specifications.

POLICY/RULE

Section 17.52.550 of the Folsom Municipal Code (FMC) states that cemeteries are permitted in the Open Space/Public Primary Area of the Historic District with a conditional use permit ("CUP"). The Folsom Municipal Code does not address crematoriums as a land use.

Section 17.52.360 of the FMC states that the Historic District Commission (HDC) shall have final authority relating to the issuance of Conditional Use Permits for any of the uses or purposes for which such permits are required or permitted by the terms of this title, within the boundaries of the Historic District.

Use Permits are governed by Chapter 17.60 of the FMC. Section 17.60.040 states that the findings of the Commission shall be that the establishment, maintenance or operation of the use applied for will or will not, under the circumstances of the particular case, be detrimental to the health, safety, peace, morals, comfort and general welfare of persons residing or working in the neighborhood of such proposed use or be detrimental or injurious to property and improvements in the neighborhood, or to the general welfare of

the city.

ANALYSIS

General Plan and Zoning Consistency

The General Plan land use designation for the project site is OS (Open Space) and the zoning designation for the project site is OS/P (Open Space/Public Primary Area of the Historic District) with an underlying zoning of OSC (Open Space Conservation District). The zoning designation is consistent with the General Plan designation.

Cemeteries are a permitted use within the OS/P Primary Area upon approval of a Conditional Use Permit (CUP) per Section 17.52.550 of the FMC. The subject cemetery has been in operation since the 1800's and pre-dates the requirement for a CUP. The cemetery did receive a CUP for operation of a mausoleum in 1995. The proposed crematory would be operating as an accessory use to the existing cemetery, not as a stand-alone business.

Crematories are not specifically addressed in the Folsom Municipal Code. The Commission would then determine whether to approve the request for a CUP and impose appropriate conditions. If not, then the proposed crematory would not be considered a permitted use, even with a CUP.

A primary or principal use is the main use to which premises are devoted and the primary purpose for which the premises exist. Primary uses may be permitted by right or may be conditional uses subject to a CUP. Accessory uses are structures or activities that are subordinate in area, extent, and purpose to the primary use; contribute to the comfort, convenience, or necessity of the principal use; and are located on the same lot and the same zoning district as the principal use. Home occupations are a typical example of an accessory use. By definition, an accessory use must be associated with a principal use and cannot be established on a property without a principal use. (Adam U. Lindgren & Steven T. Mattas, California Land Use Practice (2021) § 4.46, Primary and Accessory Uses.)

In this case, the cemetery is the primary or principal use. The applicant proposes a crematorium as an accessory use to the existing cemetery. As proposed, the crematorium would be subordinate in area, extent, and purpose to that of the existing cemetery. It would provide a service related to and supportive of the service already provided by the cemetery and mausoleum. It would be located on the same lot and in the same zoning district as the principal use. It would be owned and operated by the same people who own and operate the existing cemetery and mausoleum.

As a part of the work to analyze whether a crematory is appropriate as an accessory use

to an existing cemetery, staff researched data available from the Sacramento Air Quality Management District regarding the locations of existing crematoriums within the county. As described in more detail in the Land Use Compatibility/Site Considerations section of the report, staff found that 16 crematoriums are currently operating within Sacramento County, five of which are located within cemeteries (East Lawn Memorial Park, Sacramento Memorial Lawn, St. Mary Cemetery and Funeral Center, and Sunset Lawn Chapel of the Chimes in Sacramento, and Mount Vernon Memorial Park & Mortuary in Fair Oaks).

Public comment letters have stated that a crematory is not appropriate as an accessory use in this case for a variety of reasons. Upon review, staff reads the majority of those comments to raise concerns about the impacts of the proposed use. Many, if not most, of the impacts discussed in the public comment letters can be mitigated by imposing appropriate conditions on the project. For that reason, as well as the fact that the crematory is not proposed as a stand-alone business but as an accessory use to the existing cemetery, staff analyzed those comments through the lens of the CUP.

Based on the analysis described above, staff concluded that the crematorium, as proposed, is an appropriate accessory use to the existing cemetery.

Conditional Use Permit

In order to approve a request for a Conditional Use Permit, the Commission must find that the "establishment, maintenance, or operation of the use or building applied for will or will not, under the circumstances of the particular case, be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use, or be detrimental or injurious to property and improvements in the neighborhood, or to the general welfare of the City" (FMC section 17.60.040).

In evaluating the Conditional Use Permit, staff considered the proposed use and its compatibility with existing land uses in the area, as well as air quality impacts, cultural resources impacts, fire/life safety impacts, traffic/access/circulation/parking impacts, noise impacts, and visual impacts. Each of these subject matters are discussed in detail below and are further discussed in the Lakeside Memorial Lawn Crematorium Initial Study/Mitigated Negative Declaration (IS/MND) provided in Attachment 11.

Should the Commission grant the proposed Lakeside Memorial Lawn Crematorium Conditional Use Permit, the CUP would be subject to ongoing review by the Community Development Department to ensure that it does not result in any adverse impacts to the community. Pursuant to FMC Section 17.60.050, in any case where the conditions to the granting of a use permit have not been, or are not, complied with, the Historic District Commission may revoke the permit after a public hearing on the matter. In addition, if the Community Development Director finds evidence that conditions of approval for the

Lakeside Memorial Lawn Crematory business have not been fulfilled or that the use has resulted in a substantial adverse effect on the health, and/or general welfare of users of adjacent or proximate property, or have a substantial adverse impact on public facilities or services or the general welfare of the City, the Director will refer the use permit to the Historic District Commission for review. If, upon such review, the Historic District Commission finds that any of the above-stated results have occurred, the Commission may modify or revoke the Conditional Use Permit following a hearing on the matter. Condition No. 4 is included to reflect this requirement.

Air Quality

As part of the CEQA documentation for the proposed project, an Air Quality and Greenhouse Gas Assessment was prepared by HELIX Environmental Planning, Inc., and is included in Attachment 11. Two daily cremations were analyzed under the original environmental document, an Initial Study/Mitigated Negative Declaration (IS/MND) and the applicant later asked that the analysis show impacts for four cremations per day. As a result, HELIX also prepared an Addendum to the Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Emissions Assessment, included in Appendix B of the IS/MND, that provides additional analysis regarding the air quality and greenhouse gas emissions assessment based on additional daily cremations. This analysis was incorporated into the IS/MND as well.

As a part of its environmental review, HELIX analyzed whether the proposed project will have or will potentially have a significant adverse impact on the environment, either individually or cumulatively with other projects. With respect to air quality, HELIX used the standard Environmental Initial Study Checklist to consider four main questions:

- a. Would the project conflict with or obstruct implementation of the applicable air quality plan?
- b. Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?
- c. Would the project expose sensitive receptors to substantial pollutant concentrations?
- d. Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Ultimately, Helix determined that the proposed project would have no impact with respect to question b and would have a less than significant impact with respect to questions a, c, and d. The following sections provide an overview of the analysis related to sensitive receptors, criteria pollutants, toxic air contaminants and odors as they relate to both construction and operation of the proposed project.

Sensitive Receptors

In general, some land uses are considered more sensitive to air pollution than others due to the types of population groups or activities involved and are referred to as sensitive receptors. Examples of these sensitive receptors are residences, schools, hospitals, and daycare centers.

The California Air Resources Board (CARB) and the Office of Environmental Health Hazard Assessment (OEHHA) have identified the following groups of individuals as the most likely to be affected by air pollution: people over 65 years old, children under 14 years old, infants (including in utero in the third trimester of pregnancy), and persons with cardiovascular and chronic respiratory diseases such as asthma, emphysema, and bronchitis.

Residential areas are considered sensitive receptors to air pollution because residents (including children and people over 65) tend to be at home for extended periods of time, resulting in sustained exposure to any pollutants present. Children and infants are considered more susceptible to health effects of air pollution due to their immature immune systems, developing organs, and higher breathing rates. As such, schools are also considered sensitive receptors, as children are present for extended durations and engage in regular outdoor activities.

The closest existing sensitive receptors to the project site are multiple single-family residences adjacent to the cemetery to the north, between 450 and 750 feet from the proposed crematory location, and mobile homes across Folsom Boulevard to the east, approximately 700 feet from the proposed crematory location. The closest schools to the project site are the Folsom Montessori School approximately 3,200 feet (0.6 miles) to the northeast and the Golden Valley Charter River School. That school is located across Lake Natoma from the project site and, though it is approximately 2.7 miles away by car, its physical location is about 3,000 feet (just over one-half mile) northwest of the project site. The nearest daycare is located 1,800 feet (0.3 miles) from the project site and the nearest hospital is located over 9,000 feet (1.8 miles) from the project site

Criteria Pollutants

Ambient air quality is described in terms of compliance with state and national standards, and the levels of air pollutant concentrations considered safe, to protect the public health and welfare. These standards are designed to protect people most sensitive to respiratory distress, such as asthmatics, the elderly, very young children, people already weakened by other disease or illness, and persons engaged in strenuous work or exercise. The U.S. Environmental Protection Agency (USEPA), the federal agency that administrates the Federal Clean Air Act of 1970, as amended in 1990, has established national ambient air quality standards (NAAQS) for several air pollution constituents known as criteria pollutants, including: ozone (O₃); carbon monoxide (CO); coarse particulate matter (PM₁₀; particles 10 microns or less) and fine particulate matter (PM_{2.5}; particles 2.5 microns or less); sulfur dioxide (SO₂); and lead (Pb).

As permitted by the Clean Air Act, California has adopted the more stringent California ambient air quality standards (CAAQS) and expanded the number of regulated air constituents. Ground-level ozone is not emitted directly into the environment but is generated from complex chemical and photochemical reactions between precursor pollutants, primarily reactive organic gases (ROGs; also known as volatile organic compounds [VOC]), and oxides of nitrogen (NO_x). PM₁₀ and PM_{2.5} are generated from a variety of sources, including road dust, diesel exhaust, fuel combustion, tire and brake wear, construction operations and windblown dust. In addition, PM₁₀ and PM_{2.5} can also be formed through chemical and photochemical reactions of precursor pollutants in the atmosphere.

CARB is required to designate areas of the state as attainment, nonattainment, or unclassified for the ambient air quality standards. An "attainment" designation for an area signifies that pollutant concentrations do not violate the standard for that pollutant in that area. A "nonattainment" designation indicates that a pollutant concentration violated the standard at least once. An "unclassified" designation indicates that insufficient data was available to determine the status. Sacramento County is designated as being in nonattainment for the state and federal ozone standards, the state PM₁₀ standards, and the federal PM_{2.5} standards.

The Sacramento Metropolitan Air Quality Management District (SMAQMD) is responsible for implementing emissions standards and other requirements of federal and state laws in Sacramento County. Attainment plans for meeting the federal air quality standards are incorporated into the State Implementation Plan (SIP), which is subsequently submitted to the USEPA.

The current air quality plan applicable to the project, the *Sacramento Regional 2008 NAAQS 8-Hour Ozone Attainment and Reasonable Further Progress Plan* (Regional Ozone Plan), was developed by the SMAQMD and adjacent air districts to describe how the air districts in and near the Sacramento metropolitan area will continue the progress toward attaining state and national ozone air quality standards

With respect to criteria pollutants, HELIX looked at whether the proposed project would conflict with or obstruct implementation of the Regional Ozone Plan or the SIP, either during construction or operation of the proposed project. HELIX also analyzed whether the proposed project would result in a cumulatively considerable net increase of any criteria pollutant for which the region is in non-attainment under applicable California Ambient Air Quality Standards. Highlights from that analysis are included in the following paragraphs. The full analysis is contained in Attachment 11. Furthermore, Condition No. 16, requires compliance with the Regional Ozone Plan.

Construction (Short-Term) Emissions

Construction of the project would involve the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for one day and one truck load of concrete to install a small pad for the two propane

tanks.

Typically, projects that are 35 acres or less in size will not exceed the SMAQMD's construction NOx or PM thresholds of significance. Even so, all construction projects are required to implement the SMAQMD's Basic Construction Emission Control Practices (also known as Best Management Practices [BMPs]). The BMPs satisfy the requirements of SMAQMD's Rule 403, *Fugitive Dust*, which requires every reasonable precaution not to cause or allow the emissions of fugitive dust from being airborne beyond the property line from which the emission originates.

Reactive Organic Gas (ROG) emissions during construction are generally associated with the application of architectural coatings. The project does not propose any new structures, would not require substantial amounts of painting, and would not result in significant emissions of ROGs.

If approved, the proposed project will be required to implement SMAQMD's BMPs and it will not result in significant emissions of ROGs. Therefore, construction of the project would not result in a cumulatively considerable net increase of any criteria pollutant and the proposed project's impact on implementation of the Regional Ozone Plan would be less than significant with implementation of Condition No. 16, which requires implementation of the SMAQMD's BMPs.

Operation (Long-Term) Emissions

The project would result in long-term operational emissions from two sources: (1) vehicles that drive to and from the project and (2) from operation of the crematory.

With respect to emissions from vehicles, because there are no crematories currently operating in Folsom, demand for cremation services is filled by transporting the deceased to facilities outside of the City. Therefore, operations of the project would not result in new vehicle trips (nor the associated emissions in the region). Instead, the project would replace existing regional vehicle trips with shorter trips (and reduced associated emissions).

Operation of a propane-fired crematory would be considered a new stationary source of emissions. The project is subject to SMAQMD's Rule 201, *General Permit Requirements*, and Rule 202, *New Source Review*. Pursuant to these Rules, the project would be required to implement best available control technology (BACT) for the minimization of emissions.

BACT for crematories is incorporated into the product design in the form of controls which ensure maintenance of the correct temperatures and cycle times, and a secondary combustion chamber which ensures oxygenation and complete combustions of all fuels.

As shown in Table 4 of the IS/MND included in Attachment 11 and Table 1 of the Air Quality Addendum memo included in Appendix B of the IS/MND, the project's operational

emissions of criteria pollutants and precursors would not exceed the SMAQMD daily or annual thresholds. Therefore, the project's operational emissions would not result in a cumulatively considerable net increase of any criteria pollutant and impacts from operation of the crematory on implementation of the Regional Ozone Plan would be less than significant.

Toxic Air Contaminants

Toxic air contaminants (TACs) are a diverse group of air pollutants that may cause or contribute to an increase in deaths or in serious illness or that may pose a present or potential hazard to human health. TACs can cause long-term chronic health effects such as cancer, birth defects, neurological damage, asthma, bronchitis, or genetic damage, or short-term acute effects such as eye watering, respiratory irritation (a cough), runny nose, throat pain, and headaches. TACs are considered either carcinogenic or noncarcinogenic based on the nature of the health effects associated with exposure to the pollutant. For carcinogenic TACs, there is no level of exposure that is considered safe and impacts are evaluated in terms of overall relative risk expressed as excess cancer cases per one million exposed individuals. Noncarcinogenic TACs differ in that there is generally assumed to be a safe level of exposure below which no negative health impact is believed to occur. These levels are determined on a pollutant-by-pollutant basis.

Crematories are a potential source of TACs as a result of trace metals and organic compounds that accumulate in the body throughout a person's life and are released during combustion of human remains, and as a result of trace organic compounds that are formed in the combustion process. These TACs include: metals and inorganics (i.e., arsenic, beryllium, cadmium, chromium, copper, hydrogen fluoride, lead, mercury, nickel, selenium, zinc); VOCs (i.e., benzene, toluene, xylenes, vinyl chloride); aldehydes (i.e., acetaldehyde, formaldehyde); polyaromatic hydrocarbons (PAHs); polychlorinated dibenzodioxins (dioxins; PCDD); and polychlorinated dibenzofurans (furans; PCD). Prolonged exposure to significant concentrations of these TACS can result in a variety of adverse health effects including cancers, chronic conditions, and/or acute conditions, depending on the substance and level of exposure. Based on the results of the Health Risk Assessment (HRA) included in Attachment 11, hexavalent chromium and mercury are the primary drivers of the health risks from crematory emissions because the health risks from crematory emissions of these substances are one or more orders of magnitude greater than the health risks from other TACs in crematory emissions.

Health risks associated with cancer from development projects are estimated using the incremental excess cancer risk expressed as cancer cases per one million exposed individuals. The incremental excess cancer risk is an estimate of the chance a person exposed to specific sources of a TACs may have of developing cancer from that exposure beyond the individual's risk of developing cancer from existing background levels of pollutants in the ambient air. For context, the average cancer risk from TACs in the ambient air for an individual living in an urban area of California is 830 in 1 million. Cancer risk estimates do not mean, and should not be interpreted to mean, that a person will develop cancer from estimated exposures to toxic air pollutants.

The maximum estimated community incremental excess cancer, chronic and acute health risks due to exposure to the project TAC emissions from long term operation of the proposed crematory are presented in Table 5 of the attached IS/MND. These estimates are conservative (health protective) and assume that the resident or worker is outdoors for the entire exposure period. This table shows that the maximum incremental increased cancer risks and maximum non-cancer chronic and acute hazard index due to exposure to TACs from long-term operation of the proposed crematory would not exceed the SMAQMD thresholds. Therefore, operation of the project would not result in the exposure of sensitive receptors to substantial TAC concentrations and the impact would be less than significant.

The Addendum to the IS/MND clarifies that regardless of whether the applicant performs two or four cremations daily, the Health Risk Assessment remains accurate, as it was based on the maximum hourly emissions rate and the average annual emissions generated by project operations, not the number of cremations performed daily. The hourly cremation rate would not change because there is only one cremation machine proposed as a part of this project. The annual emissions generated by the project also would not change with an increase from two to four cremations per day because the applicant has not requested modification to their request for up to 500 cremations per year. To ensure that the numbers in the HRA remain accurate, staff has added Condition No. 13 stating that no more than four cremations may be performed each and that no more than 500 cremations may be performed each year.

In addition, the proposed crematory is considered a combustion source requiring an authority to construct permit to operate (A/C, PTO) from SMAQMD before it can be installed and operated. Staff has provided Condition No. 16, which states that a building permit will not be issued until an A/C, PTO has been obtained from SMAQMD. SMAQMD has stated that the applicant will be required to provide analysis to ensure the crematory will meet all air district rules/regulations and significance thresholds during the air district's A/C, PTO application and review process. In the event the air district's refined health risk assessment analysis shows that cancer risk or hazard index numbers exceed the significance thresholds noted, further restrictions to the crematorium would be required by SMAQMD before they would issue the A/C, PTO. As noted above, Condition No. 16 requires the proposed project to obtain an A/C, PTO from the air district before the City will issue a building permit, so neither construction nor operation of the proposed project can occur without the A/C, PTO.

Odors

The IS/MND prepared for the proposed project found that diesel equipment could generate diesel exhaust odors during construction activities. The generation of odors during the construction period would be temporary, intermittent, and dispersed within a short distance from the active work area. Once operational, potential odors from human remains prior to cremation would be minimized either by immediately processing remains

or by temporarily storing remains in the proposed refrigeration chiller. Operation of the crematory would not be a significant source odors or other emissions due to the BACT features of the crematory, including process temperature and cycle time controls, as well as secondary combustion chambers which ensure the complete combustion of all solids, liquids, and gaseous fuels. Therefore, the project would not result in other emissions (such as those leading to odors).

Cultural, Archaeological, Paleontological and Historical/Tribal Resources

Lakeside Memorial Lawn cemetery is Folsom's only active historic cemetery. It represents a combination of several old Folsom cemeteries, including the Masonic, Odd Fellows, Jewish, Citizen's, and Cook's cemeteries,

The existing metal structure was built in the 1990s and is located in a previously disturbed maintenance area. The project area itself is surrounded on the west and south by dredge mining tailings and the parcel is situated along a perennial waterway. All mining operations in the immediate vicinity of the project site had ceased by 1962. Based on a Cultural Resources Investigation performed by PAR Environmental for the mausoleum project for Lakeside Memorial Lawn in 1995, these tailings were determined not eligible for inclusion in the National Register of Historic Places by the Office of Historic Preservation. The report also states that the tailings do not meet California Environmental Quality Act guidelines as an important resource and do not qualify for inclusion in the California Register of Historic Places.

ECORP Consulting prepared a Cultural Resources Inventory Report of the proposed project that included a record search, Native American tribal consultation and a pedestrian survey. The results of the ECORP record search for cultural resources and Native American Heritage Commission Sacred Lands File Coordination search failed to reveal the presence of Native American cultural resources in the project area.

ECORP's pedestrian survey revealed no precontact or historic resources. The project site itself is not in an area otherwise suspected to contain unknown archaeological resources. The site survey and surveys of written records, historical maps and photographs, and outreach to groups with knowledge of the area's history all suggest that no known or previously unknown archaeological resources would be encountered or disturbed during construction. Ground disturbing activity would be limited to shallow ground clearing and site prep for the installation of a concrete pad to support two propane tanks. Still, the potential exists for inadvertent discovery of archaeological resources during project construction. The implementation of standard archaeological resource construction conditions (Condition 18-21) would ensure that potential impacts would be less than significant.

Though the project site is located on the property of the Lakeside Memorial Lawn Cemetery, no human remains are known to exist in the immediate vicinity of the project site. No evidence of potential human remains outside of marked graves was found in the project area during the cultural resources site survey by ECORP's archaeologist. Ground

disturbing activity would be limited to shallow ground clearing and site prep for the installation of a concrete pad to support two propane tanks. However, there is always the possibility that subsurface construction activities associated with the proposed project, specifically the preparation of the site for the small concrete pad, could potentially damage or destroy previously undiscovered human remains. However, if human remains were discovered, implementation of Condition No. 20 would reduce this potential impact to a less than significant level.

The ethnographic information reviewed for the project, including ethnographic maps, does not identify any villages, occupational areas, or resource procurement locations in or around the current project area. In addition, the Sacred Lands File failed to identify any sacred lands or tribal resources in or near the project area. The cultural resources survey did not reveal any Native American archaeological sites within or adjacent to the proposed project area. As stated in the attached IS/MND document, the City performed AB-52 consultation with three local Native American tribes that have previously submitted general request letters: Wilton Rancheria, the Lone Board of Miwok Indians and the United Auburn Indian Community. The purpose of consultation is to identify Tribal Cultural Resources (TCR) that may be significantly impacted by the proposed project and to allow the City to avoid or mitigate significant impacts prior to project approval and implementation. No specific TCRs were identified on the project site as a result of this consultation. In case of unanticipated discovery of tribal cultural resources, staff has incorporated Condition No. 21 (as described above). Implementation of this condition would ensure that there would not be a significant impact on tribal cultural resources.

Fire/Life Safety

The proposed project proposes to locate two 250-gallon propane tanks immediately adjacent to the existing metal structure in which the crematorium is proposed. Propane is considered a hazardous material in that is extremely flammable and may cause burns, irritations, and/or asphyxiation if humans come into direct contact with significant quantities of it. Federal and state laws include provisions for the safe handling of hazardous substances. The federal Occupational Safety and Health Administration (OSHA) administers requirements to ensure worker safety. Construction activity must also be in compliance with California OSHA regulations. Further, significant damage to the tanks, failure of safety mechanisms, and/or the presence of an ignition source may make the tanks an explosion hazard. However, the tanks would be secured in place on a concrete pad, marked conspicuously, and placed in an area at low risk of impact from any vehicle or piece of equipment. They would not be located in an area of the cemetery frequented by the public. All installation, maintenance, and operations would be done by trained individuals in accordance with the manufacturer's recommendations and state regulations. The tanks would be regularly inspected to ensure soundness and proper function. Delivery of propane and filling of the tanks would be done only by licensed professionals following all applicable regulations and best practices. Furthermore, the Folsom Fire Department has reviewed the proposed site plan and has provided Condition No. 26 which requires the propane tanks to be a minimum of 10 feet from the metal structure in which the cremations would occur.

Fire Station 35 is the nearest station to the project site and is located approximately 1.5 miles east of the project site. The project site is easily accessible to fire service personnel. Consistent with the City's Multi-Hazard Emergency Management Plan, the City of Folsom maintains pre-designated emergency evacuation routes along major streets and thoroughfares. The proposed project would not modify any pre-designated emergency evacuation route or preclude their continued use as an emergency evacuation route. Emergency vehicle access would be maintained throughout the project site to meet the Fire Department standards for fire engine maneuvering, location of fire engine to fight a fire, rescue access to the units, and fire hose access to all sides of the building.

The project is not located in or near a State Responsibility Area or in a Very High Fire Hazard Severity Zone. Vegetation on the property is irrigated and includes maintained lawns and well-spaced trees with a generally open canopy and limbs pruned near ground level. The project site is located in an urbanized area in the City of Folsom and is provided urban levels of fire protection by the City. Landscaping on the property is well-irrigated, well-spaced, trimmed, pruned, and generally maintained. To the north of the site is a residential neighborhood, to the east is gravel/rock cover and Folsom Boulevard, and to the south and west is a greenbelt that runs parallel to Lake Natoma on a north/south axis. The natural spaces are small, with a relatively open and discontinuous canopy. The project is not likely to cause any ignition, given that the crematory will not emit sparks, and any ignition caused by other factors could be quickly controlled by the City of Folsom Fire Department and would not spread great distances given the land use and vegetation surrounding and occupying the site.

As an existing facility, Lakeside Memorial Lawn maintains adequate fire response infrastructure for both current operations and the proposed project. The City of Folsom Fire Department reviewed the project application and did not raise any concerns regarding the adequacy of water supply or site access. The Fire Department also provided Condition No. 24, which requires a fire alarm/detection system if sprinklers are not provided, Condition No. 25, which requires on-site fire hydrants and mains capable of supplying the water flow for fires and Condition No. 26, which requires that combustible materials, trash, weeds and brush are not stored or located within 10 feet of the propane tanks. Furthermore, Condition No. 27 states that a trained operator must be present at all times that the crematorium machine is in operation. Therefore, with these conditions, the proposed project would not expose people or structures to a significant risk of loss due to wildland fires.

Traffic, Access, Circulation and Parking

The project site can be accessed from either northbound or southbound on Folsom Boulevard or from westbound Natoma Street approaching this intersection with Folsom Boulevard. The site would be accessed by proceeding a very short distance west on Forrest Street to reach the entry gate to the cemetery and turning left onto Mormon Street.

Diagonal parking spaces can be found along both sides of Mormon Street. At the terminus

of Mormon Street, members of the public may continue straight onto a main cemetery access road to find an additional parking lot. All existing parking spaces would be maintained. Access to the project site directly would continue to be provided by a smaller existing access road located at the southwestern terminus of Mormon Street. Both the smaller access road and the main access road can be reached at the terminus of Mormon Street, but the two roads do not form a continuous loop because of a fence line separating them. No new parking spaces or parking facilities would be constructed.

As the crematorium would not be located in or near a funeral home and would be separate from any funeral services or public gatherings provided by the project applicant, access would only need to accommodate a small number of people at the site. There are a total of 92 parking spaces in the cemetery with room for 23 additional parking spaces during large events. The applicant has seen an average of 12 to 15 visitors to the cemetery on an average day. The maximum number of visitors under the proposed project conditions would be during large funeral services at the site. However, the 921 parking spaces and overflow parking available on-site are designed accommodate such services.

The City of Folsom identifies most major streets in the City as emergency evacuation routes. The proposed project would not modify any major street and/or preclude their continued use as an emergency evacuation route. The project does not propose any alterations to any access roads, rights-of-way or other routes, and would not increase traffic to a point that additional risk on existing routes would be incurred. Emergency vehicle access would be maintained throughout the project site to meet the Fire Department standards for fire engine maneuvering, location of fire engine to fight a fire, rescue access, and fire hose access to all sides of the building.

Noise

Development of the crematory facility will temporarily increase noise levels in the project vicinity during the construction period. Construction activities, including site work and construction, would be considered an intermittent noise impact throughout the construction period of the project. The City's Noise Ordinance excludes construction activities from meeting the General Plan Noise Element standards, provided that all phases of construction are limited to the hours between 7:00 a.m. and 6:00 p.m. on weekdays, and between 8:00 a.m. and 5:00 p.m. on Saturdays. To ensure compliance with the City's Noise Control Ordinance and General Plan Noise Element, staff recommends that hours of construction operation be limited from 7:00 a.m. to 6:00 p.m. on weekdays and 8:00 a.m. to 5:00 p.m. on Saturdays with no construction permitted on Sundays or holidays. Condition No. 12 is included to reflect these requirements.

Visual Impacts

The project site is currently a small cemetery, with associated landscaping, outbuildings, and access roads. Lands to the south and west contain woodland habitat typical of riparian communities in the Sierra Nevada foothills. Soils at the project site are comprised of dredge tailings and other fill material. Tailing piles between the site and Folsom Boulevard prevent the site from being visible from that street. To the west is also the

Historic District Commission
Lakeside Memorial Lawn Crematorium Conditional Use Permit (PN 19-182)
February 16, 2022

Jedidiah Smith Memorial Trail that runs along the eastern shore of Lake Natoma. To the north is a small residential neighborhood with single family dwellings (The Preserve/Lake Natoma Shores). Folsom Boulevard runs in a north/south line just east of the property. East of Folsom Boulevard is a large, developed area containing single family homes, apartment complexes, a mobile home park, and some small businesses. The more regional setting is primarily characterized by residential development with a commercial shopping center to the east.

The project would be located in an existing metal structure on the grounds of the Lakeside Memorial Lawn Cemetery. The structure would be modified with an exhaust stack added to the roof to accommodate the crematorium, but its footprint would not be expanded. The height of the stack is determined during the SMAQMD permitting process in order to meet their air quality standards. Based on initial consultation with SMAQMD, the stack would most likely be located approximately 19.5 feet above grade and would project up to 10 feet above the existing roof of the structure. The crematory would be placed in the northwest corner of the structure. Two 250-gallon propane tanks would be installed on a proposed concrete pad along the northern side of the structure to provide power for the crematorium, as no gas lines currently exist. An existing wooden fence would shield these tanks from view from the publicly used areas of the cemetery.

Existing landscaping at the cemetery and around the metal structure consists of mature broad-leaved, coniferous, and palm trees. These trees also provide shade for much of the cemetery and many of the parking spaces. An irrigated lawn surrounds the existing cemetery plots and a smaller lawn surrounds the rear of the structure (i.e., the non-service entrance side). Native oak/gray pine woodland habitat exists surrounding the cemetery. No new landscaping installation or modification is proposed. Native habitat in the vicinity of the project would not be disturbed.

An existing brick and wrought iron fence marks the edge of the cemetery from the Forrest Street side, but does not extend the length of Mormon Street. A wooden fence currently separates the front side of the metal structure (facing the access road) from the back side and extends both north and south of the structure. The fencing south of the structure further extends to block the access road and restrict access between the lawn to the west of the structure and the access road to the east of the structure. No changes to fencing are proposed as part of this action. The access side of the structure that would be used for crematory operations is shielded from view from the rest of the cemetery by wooden fencing. A gravel berm shields views of the structure from the east, including from Folsom Boulevard.

Neither the project site nor the surrounding areas are scenic vistas due to the presence of existing nearby commercial and residential developments. Further, neither the project site, nor views to or from the project site, have been designated as important scenic resources by the City of Folsom or any other public agency. Additionally, the site of proposed modifications is already largely shielded from public view and would remain so. Images of the metal structure taken from the edge of the cemetery adjacent to the Lake

Natoma Shores/Preserve subdivision are provided in Attachment 10. All human remains are transported to or from the crematorium fully shielding the deceased from public view with fully shielded gurneys. The vehicles back up inside the structures' doors to unload the gurney, similar to what is done at the applicant's Miller Funeral Home on the corner of Scott Street and Natoma Street. Given that external modifications would be very minor and that the building is already mostly shielded from view, staff does not anticipate a significant visual impact.

Land Use Compatibility/Site Considerations

The project site consists of a small cemetery, with associated landscaping, outbuildings, and access roads. Lands to the south and west contain woodland habitat. Tailing piles between the site and Folsom Boulevard prevent the site from being visible from that street. To the west is also the Jedidiah Smith Memorial Trail, which is part of the American River Parkway. To the north of the project site is a residential neighborhood with single-family dwellings (Lake Natoma Shores/The Preserve). Folsom Boulevard runs in a north/south line just east of the property. East of Folsom Boulevard is a large, developed area containing single-family homes, apartment complexes, a mobile home park, and some small businesses. The more regional setting is primarily characterized by residential development with a commercial shopping center to the east.

Staff researched data available from the Sacramento Air Quality Management District regarding the locations of existing crematoriums within the county, their proximity to residential uses, complaints received by SMAQMD for these facilities, and actions taken against these facilities by SMAQMD. Staff found that 16 crematoriums are currently operating within Sacramento County, of which five were located within cemeteries (East Lawn Memorial Park, Sacramento Memorial Lawn, St. Mary Cemetery and Funeral Center, and Sunset Lawn Chapel of the Chimes in Sacramento and Mount Vernon Memorial Park & Mortuary in Fair Oaks). Nine of the crematoriums were within 1,100 feet of residential uses, as shown in the table on the following page. Images of these facilities are provided in Attachment 12. Note that the closest residence to the proposed crematorium is 450 feet from the building.

TABLE 1: CREMATORIUMS IN SACRAMENTO COUNTY LOCATED WITHIN 1,100 FEET OF RESIDENTIAL LAND USES

Name of Facility	Address	Distance to Residential Uses
East Lawn Memorial Park	4300 Folsom Blvd. Sacramento	525 ft.
Sacramento Memorial Lawn	6100 Stockton Blvd. Sacramento	1,100 ft.
St. Mary Cemetery and Funeral Center	6509 Fruitridge Rd. Sacramento	275 ft.
Sunset Lawn Chapel of the Chimes	4701 Marysville Rd. Sacramento	600 ft.
Mount Vernon Memorial Park & Mortuary	8201 Greenback Ln. Fair Oaks	175 ft.
Evergreen Memorial	3030 Fruitridge Rd. Sacramento	90 ft.
North Sacramento Funeral Home	725 El Camino Ave. Sacramento	100 ft.
Pet Loss Services of North America	4601 Pell Dr. Sacramento	650 ft.
Sierra View Funeral Chapel & Crematory	6201 Fair Oaks Blvd. Carmichael	150 ft.

All crematoriums in Sacramento County are subject to additional permitting and regular inspections by SMAQMD, who investigates all public complaints about the facilities and fines all facilities for any violations. Three of the facilities listed in the above table have been issued violations from SMAQMD, for a total of 17 violations. Of these violations, four were discharge related. The last discharge-related violation issued by SMAQMD at one of these facilities was in 2010. Five of the facilities listed above have been the subject of public complaints. SMAQMD has received a total of 26 public complaints regarding five of these facilities since 1992. Of these complaints, eight have been received since 2010, predominantly regarding odor and smoke. SMAQMD requires recordkeeping and reporting of all cremations and has the right to inspect cremation facilities at any time.

The applicant has also stated that they currently operate two crematoriums in the region, the Lakeside Colonial Chapel in Marysville and the Chapel of the Twin Cities in Yuba City, both directly adjacent to residential uses. Given that the proposed project is located 450 to 750 feet away from the nearest sensitive receptors (residences), this is consistent with the location of other crematoriums located in residential areas of Sacramento County as well as the regional crematoriums operated by the applicant.

Based on the analysis presented in the attached staff report and attached IS/MND, staff concluded that there would be a less than significant impact to surrounding land uses with regards to air quality, fire/life safety, traffic, noise and aesthetics. As conditioned, the

crematorium would be subject to stringent air quality permitting and monitoring from SMAQMD. The crematorium is also subject to an annual unannounced inspection from the California Cemetery and Funeral Board. Furthermore, staff has provided Condition No. 10 which states that any intensification or expansion of the crematorium will require a subsequent Conditional Use Permit by the Historic District Commission and Condition No. 13 which states that no expansion in number of cremations per day or per year beyond what has been conditioned shall be permitted without prior approval being obtained from the Historic District Commission through a Conditional Use Permit. Any increase in air quality or noise impacts beyond what is described in this report is subject to either permit revocation or modification by the commission.

With these conditions in place, staff has concluded that the establishment, maintenance, and operation of the proposed use will be compatible with surrounding land uses and will not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood or be detrimental or injurious to property or improvements in the neighborhood, or to the general welfare of the city.

Public Outreach, Noticing and Comments

Staff routed the initial development application to relevant local and state agencies. Based on comments received, staff has coordinated with SMAQMD to appropriately condition the project and ensure that the applicant goes through the required SMAQMD permitting process. No other public agencies provided comments. The application was also routed to the Sacramento County Cemetery Advisory Commission, the California Cemetery and Funeral Bureau and the Cremation Association of Northern California. Staff received no comments from these organizations.

A public notice was placed in the Folsom Telegraph on January 6, 2022, and notices were mailed to all property owners located within 300 feet of the project site and also to residents who filed written requests for notices, consistent with Government Code sections 65905, 65091, and 65094, as well as CEQA Guidelines sections 15072 and 15105. A public notice was also placed on the project site 30 days prior to the public hearing.

Staff received numerous public comments regarding the project in general and also the IS/MND prior to publication of this staff report. Most comments received were from residents of the Historic District (especially residents of the Lake Natoma Shores/Preserve subdivision) and the Chinese Historical Society of America in opposition to the project, with one letter from a resident expressing support for the project. Written comments received prior to publication of the staff report are included in Attachment 13. Furthermore, the applicant held a phone meeting for nearby residents to listen to their concerns about the proposed project. Issues brought up in these comment letters and during the applicant meeting include:

Air Quality Concerns

- Proximity to residential uses, places where children recreate and impacts to those with compromised lungs and other at-risk populations
- Air quality concerns related to particulate matter, CO₂, TACs, NO_x, and cremated bodies containing mercury from fillings, pacemakers, chemotherapy chemicals and radiation and SMAQMD/Sacramento County's oversight of these pollutants
- Lack of analysis regarding cumulative air quality effects of the crematory with car fumes on Folsom Blvd.
- Whether the crematory would be allowed to operate on days with poor air quality
- Whether wind would blow smoke into the adjacent neighborhoods
- Consistency with General Plan air quality goals, especially given that the property is in an existing non-attainment area
- Accuracy of meteorological weather data used
- Lack of methodology and citations used to justify statements in odor analysis
- Lack of analysis regarding the Schultz Eddy Phenomenon which causes air to be trapped in the Preserve neighborhood
- Need for additional air quality modelling due to varying air pollution patterns
- Optimal operation of crematory facilities vs. reality
- How filters inside smokestack are cleaned
- Lack of clarity regarding which agencies regulate and inspect crematories for air quality effects and how those agencies regulate emissions on days they are not testing them
- Potential odors during cremation activities, especially on evenings when Code Enforcement staff cannot be present
- Lack of maintenance cleanup procedures with regards to runoff, residue and dust
- Conclusions of the air quality analysis being related to an average healthy human rather than sensitive receptors such as children and the elderly
- Whether a rain cover is proposed on the exhaust stack

Traffic, Circulation, Parking, Wildfire and Life Safety Concerns

- Additional traffic in a busy neighborhood due to additional trips for witnessed cremations, propane delivery, and morgue delivery, both in the neighborhood and in the larger Historic District
- Amount of people allowed to attend a witnessed cremation
- Emergency access to the structure in which the cremations are proposed and propane tanks in case of fire
- Increased air quality concerns when cremating bodies with excess weight
- Evacuation of residents in case of fire on narrow streets accessing many existing uses and frequent light rail crossing
- Parking concerns during on-site funeral and witnessed cremation services
- Lack of analysis regarding cumulative traffic, circulation, and wildfire effects
- Whether a trained operator would always be on-site in case of malfunction
- Chances of a propane explosion near historic cemeteries, State parks, and residences
- Whether there is room in the metal structure in which the crematorium is proposed for both maintenance equipment and crematory equipment
- Insufficient fencing and security measures at the site
- Absence of design measures to create defensible space
- Consistency with the Folsom Community Wildfire Protection Plan
- Whether the recently constructed storage shed was taken into account in the emergency access analysis
- Greater evidence that the crematory machine will not produce particles that could ignite a fire
- Documented feedback on the project from the Fire Department and California State Parks

Quality of Life Concerns

- Whether property values would go down as a result of having to disclose that there is a crematory nearby
- Psychological effects of knowing that cremations are occurring close to residences
- Concerns over how much cremation noise would be discernable from the nearest residences and to visitors of the cemetery
- Whether the smoke stack would be visible from nearby streets and residential yards (and lack of clarity on the height of the stack)
- Whether bodies to be cremated would be transferred to the crematory facility in public view
- Impacts to those using nearby trails and recreational areas
- Whether there would be noise impacts when the crematory machine is running

Cultural, Archaeological, Paleontological and Historical/Tribal Resources Concerns

- Potential presence of archeological and paleontological resources on-site
- Potential smoke impacts to nearby Chinese cemetery, Veteran's Hall, Murer House, and State Recreation Area
- Consideration of the Chung Wah Cemetery being placed on the National Register and California Registry of Historic Places and Young Wo Chinese Cemetery being placed on the California Registry of Historic Points of Interest and both cemeteries being placed on the Sacramento County Cemetery Commission's Registry of Pioneer Cemeteries
- Cremation not being consistent with Chinese funerary customs and practice and not an integral part of Gold Rush pioneer cemetery customs
- The presence of the crematorium changing the character and historic significance of a pioneer cemetery
- Historical accuracy of a crematory chimney

Land Use Concerns

- How a crematory could be allowed in an Open Space zone
- Compatibility with the Open Space element of the General Plan
- The use being more appropriate for an industrial or commercial zone
- The M-2 zone being the only zone that calls out specific uses close to the crematory being allowed, such as pottery kilns and ceramic works
- Lack of compatibility with an historic use in the historic district
- Impact of people who own cemetery plots and niches in Lakeside Memorial Lawn near the proposed crematory

General and Miscellaneous Concerns

- Public noticing and agency noticing irregularities
- Whether the City Council should be hearing the project rather than the HDC
- Whether a design review application is warranted
- Public outreach from the applicant
- City delays in publishing documentation based on when application was submitted
- Legal standing of the IS/MND
- The Commission's standards of guidance to issue a CUP
- Number of cremations per day being proposed and allowed
- Issues with accuracy of applicant's provided scope of work
- Conflicting information about whether the crematorium will be accessible to members of the public or just employees
- Whether sewer or bathroom facilities are available at the cremation site

- The previous proposal for a crematory on this site being rejected/withdrawn
- Historical easements to the Chung Wah cemetery
- Location of property lines
- Lack of discussion of recommendations in the 2003 Crematory CUP
- Time limits and conditions on the 2003 Crematory CUP
- Operation of the crematorium changing people's perception of spiritual worship in the Chung Wah and Young Wo cemeteries due to ash and smoke
- Necessity of the project given other crematories within the general vicinity
- Applicant starting fencing work and flatwork prior to a decision being made on the CUP
- Future growth of the Corporation Yard land
- Whether there is a need for witnessed cremations
- Impacts related to potential increases in neighborhood resources
- If heat from the exhaust stack would impact special status bird and bat species nesting nearby
- The consideration of performing aquamation (liquid cremation) instead of standard cremations

Staff notes that the air quality, odor, traffic/circulation, parking, wildfire safety, cultural/archaeological, paleontological and historical/tribal resources, noise and land use concerns have been addressed in the analysis sections of this staff report and the attached IS/MND. Noticing has been completed pursuant to Government Code sections 65905, 65091, and 65094 as well as CEQA Guidelines sections 15072 and 15105, and the applicant has held a public outreach meeting as described above.

With regards to the previous proposal for a crematorium in 2003 that recommended denial, staff notes that the technology for crematorium machines has improved significantly since 2003 and based on the air quality assessment performed for the

project, staff concluded that the air quality impacts of the newly proposed crematory would not result in the same impacts as the crematorium proposed in 2003. Furthermore, the Sacramento County Cemetery Commission that expressed concern over the 2003 project did not comment on the current project as proposed.

Finally, staff has concluded that concerns regarding consistency with the General Plan Air Quality and Open Space Goals and Policies and the Historic District Design and Development Guidelines, concerns regarding Chinese and Gold Rush customs, and concerns over a drop in property values will be adequately alleviated by the filtering and burning technology of the proposed crematory machinery as well as the required SMAQMD permitting and monitoring, the shielding of the facility from public view, and the conditions imposed on the proposed project as a part of the Conditional Use Permit, as described in this staff report. Particularly significant to staff's analysis, as detailed above, are the following facts: (1) the crematorium would be subject to stringent air quality permitting and monitoring from SMAQMD; and (2) any impacts beyond those described in this report are not permitted and, if they occur, will subject the applicant to either permit revocation or modification by the Commission.

ENVIRONMENTAL REVIEW

An Initial Study and Mitigated Negative Declaration, and an associated Addendum, have been prepared for this project (Attachment 11). A detailed summary of the environmental analysis for this project is contained in other sections of this report, with a particular focus on Air Quality. A summary of the environmental analyses on the issues of cultural, archeological, paleontological, and historical/tribal resources; fire/life safety; traffic, access, circulation, and parking; noise; and visual impacts are also included above. Note that an addendum to the initial air quality analysis was also prepared, and has been included both in the final Air Quality section and Appendix B of the IS/MND.

A detailed description of the potential impacts is provided within the Initial Study for this project, which is included as Attachment 11 to this report. As described above, the Mitigated Negative Declaration includes mitigation measures which, when implemented, will reduce the identified impacts to a less than significant level. These mitigation measures have been included as conditions of approval for this project. Staff points to Conditions 18 through 21 as particularly significant in this regard.

To date, several public comments were received during the Mitigated Negative Declaration public review period which started on January 7, 2022 and ended on February 7, 2022. Those public comments have been included in Attachment 13. HELIX Environmental will provide responses to those comments for the Public Hearing and on the City's website at the following link: <https://www.folsom.ca.us/government/community-development/planning-services/current-project-information>

Pursuant to AB 52, before the release of the mitigated negative declaration for this project, the City began the process of consultation with any California Native American tribes traditionally and culturally affiliated with the geographic area of the proposed project. The consultation was concluded and no changes to the project were required as a result of the consultation process.

RECOMMENDATION

Based on the information included in this report, staff recommends finding that the proposed crematory is appropriate as an accessory use to the existing cemetery. Staff also recommends approval of a Conditional Use Permit for the proposed project, based on the information included in this report and the environmental documents in Attachment 11.

HISTORIC DISTRICT COMMISSION ACTION

MOVE TO ADOPT THE MITIGATED NEGATIVE DECLARATION AND MITIGATION MONITORING AND REPORTING PROGRAM FOR THE LAKESIDE MEMORIAL LAWN CREMATORIUM, PER ATTACHMENT 11;

AND

MOVE TO FIND THAT THE PROPOSED CREMATORIUM IS APPROPRIATE AS AN ACCESSORY USE TO THE EXISTING CEMETERY;

AND

MOVE TO APPROVE THE CONDITIONAL USE PERMIT (PN 19-182) FOR OPERATION OF A CREMATORIUM WITHIN AN EXISTING 1,071-SQUARE FOOT METAL STRUCTURE LOCATED AT 1201 FORREST STREET, WITHIN THE LAKESIDE MEMORIAL LAWN CEMETERY AS ILLUSTRATED IN ATTACHMENTS 5 and 6, WITH THE FOLLOWING FINDINGS (A-K) AND CONDITIONS (NOS. 1-30):

GENERAL FINDINGS

- A. NOTICE OF HEARING HAS BEEN GIVEN AT THE TIME AND IN THE MANNER REQUIRED BY STATE LAW AND CITY CODE.
- B. THE PROJECT IS CONSISTENT WITH THE GENERAL PLAN AND THE ZONING CODE OF THE CITY.

CEQA FINDINGS

- C. A MITIGATED NEGATIVE DECLARATION HAS BEEN PREPARED FOR THE PROJECT IN ACCORDANCE WITH CEQA.
- D. PURSUANT TO AB 52, BEFORE RELEASE OF THE MITIGATED NEGATIVE DECLARATION FOR THIS PROJECT, THE CITY CONTACTED ALL CALIFORNIA NATIVE AMERICAN TRIBES ON THE CITY'S AB 52 CONTACT LIST IN ASSOCIATION WITH THIS PROJECT.
- E. THE CITY RECEIVED ONE REQUEST FOR CONSULTATION FROM CALIFORNIA NATIVE AMERICAN TRIBES AND CONSULTATION WAS SUBSEQUENTLY CONCLUDED. NO CHANGES TO THE PROJECT WERE REQUIRED AS A RESULT OF THE CONSULTATION.
- F. THE HISTORIC DISTRICT COMMISSION HAS CONSIDERED THE INITIAL STUDY, THE PROPOSED MITIGATED NEGATIVE DECLARATION AND ALL COMMENTS RECEIVED DURING THE PUBLIC REVIEW PROCESS BEFORE MAKING A DECISION REGARDING THE PROJECT.
- G. THE MITIGATED NEGATIVE DECLARATION REFLECTS THE INDEPENDENT JUDGMENT AND ANALYSIS OF THE CITY OF FOLSOM.
- H. THE MITIGATED NEGATIVE DECLARATION HAS DETERMINED THAT THE PROPOSED PROJECT WOULD NOT HAVE A SIGNIFICANT EFFECT ON THE ENVIRONMENT WITH THE REQUIRED MITIGATION MEASURES AND THE CONDITIONS OF APPROVAL ON THE PROJECT.
- I. ON THE BASIS OF THE WHOLE RECORD, THERE IS NO SUBSTANTIAL EVIDENCE THAT THE PROJECT WILL HAVE A SIGNIFICANT EFFECT ON THE ENVIRONMENT WITH THE REQUIRED MITIGATION MEASURES AND THE CONDITIONS OF APPROVAL ON THE PROJECT.

LAND USE COMPATIBILITY FINDING

- J. AS CONDITIONED, THE PROPOSED CREMATORY IS APPROPRIATE AS AN ACCESSORY USE TO THE EXISTING CEMETERY.

CONDITIONAL USE PERMIT FINDING

- K. AS CONDITIONED, THE ESTABLISHMENT, MAINTENANCE AND OPERATION OF THE USE APPLIED FOR WILL NOT, UNDER THE CIRCUMSTANCES OF THIS PARTICULAR CASE, BE DETRIMENTAL TO THE HEALTH, SAFETY, PEACE, MORALS, COMFORT, AND GENERAL WELFARE OF PERSONS RESIDING OR WORKING IN THE NEIGHBORHOOD, OR BE DETRIMENTAL OR INJURIOUS TO PROPERTY AND IMPROVEMENTS IN THE

Historic District Commission
Lakeside Memorial Lawn Crematorium Conditional Use Permit (PN 19-182)
February 16, 2022

NEIGHBORHOOD OR TO THE GENERAL WELFARE OF THE CITY, AS THE PROPOSED PROJECT WILL NOT HAVE NEGATIVE IMPACTS TO NEARBY COMMERCIAL OR RESIDENTIAL USES THAT HAVE NOT BEEN MITIGATED.

ATTACHMENT 2 BACKGROUND

BACKGROUND

The Planning Commission approved a Use Permit and Variance for Mausoleums at Lakeside Memorial Lawn in 1991 (PC91-042). An amendment to the approval was granted in 1995 (PC95-033). That approval allowed for the construction of twelve mausoleums. To date, two mausoleums have been built. In 2002, Lorin Claney applied for a Conditional Use Permit for a crematorium at the Lakeside Memorial Lawn (PN 02-258). Staff routed the project for public review and prepared a staff report recommending denial of the project in 2003, but the applicant withdrew the application before Historic District Commission review. An existing maintenance building (where the crematorium is proposed), approximately 1,071 square feet in area, is located along the south border of the cemetery. The design review for a second 1,600-square-foot maintenance shed was approved by the Historic District Commission in 2020 (PN 20-160) and was subsequently constructed. The site plan associated with this approval showing both structures is provided in Attachment 7.

The applicant for the crematorium proposed in this staff report initially proposed that it be located in the Miller Funeral Home located at 507 Scott Street. Staff expressed initial concern with the crematorium being located directly adjacent to residences. The applicant also coordinated with SMAQMD to determine what measures would need to be taken to locate the crematory adjacent to residences and ultimately decided not to move forward with that location. The applicant then proposed to modify the application for cremations at the Miller Funeral Home to instead perform alkaline hydrolysis (liquid cremations) that would not employ any burning or produce emissions but instead would produce a liquid effluent that would be flushed down sewage pipes. While this method of cremation was approved in California in 2017, City Environmental and Water Resources staff, in coordination with the Sacramento Regional County Sanitation District, did not have enough local examples of the impacts of these effluents to support this proposal. The applicant subsequently decided to move forward with a standard crematorium at the Lakeside Memorial Lawn. The proposed location in the existing metal structure is further away from sensitive receptors than the previous location at the Miller Funeral Home.

The front of the project site is mostly level with a slight to moderate downward slope towards the rear of the site. Lakeside Cemetery has a variety of mature deciduous and evergreen trees. The front of the cemetery, along Forrest Street, is bounded by a brick wall capped with wrought iron fencing. Photographs of the Lakeside Memorial Lawn are included here as Attachment 10. Both the Lakeside Cemetery (including the Odd Fellows and Mason's Cemeteries) and the adjacent Chung Wah Cemetery appear on the City of Folsom's Cultural Resources Inventory. The subject property is located in the Open Space/Public Primary Area of the Historic District, with an underlying zoning of OSC (Open Space and Conservation District).

Historic District Commission
 Lakeside Memorial Lawn Crematorium Conditional Use Permit (PN 19-182)
 February 16, 2022

GENERAL PLAN DESIGNATION	OS, Open Space
ZONING	OS/P (Open Space/Public Primary Area), underlying zoning of OSC (Open Space and Conservation)
ADJACENT LAND USES/ZONING	<p>North: Lakeside Memorial Lawn Cemetery (OS/P) with single-family residential subdivision (Lake Natoma Shores/The Preserve) beyond (PRE)</p> <p>South: Vacant land with mine tailings (OSC)</p> <p>East: Vacant land with mine tailings (OSC) with Folsom Boulevard and Folsom Village Mobile Homes beyond (NRB)</p> <p>West: Lakeside Memorial Lawn Cemetery (OS/P) with Folsom Lake State Recreation Area (OSC) beyond</p>
SITE CHARACTERISTICS	The 12.02-acre project site contains mausoleums, gravesites, landscaping, a utility building, mine tailings and a variety of mature deciduous and evergreen trees. The project site is generally flat, ranging from about 175 to 185 feet above mean sea level. There are no wetlands, streams, or jurisdictional features located on the project site.

ATTACHMENT 3

Proposed Conditions of Approval

CONDITIONS OF APPROVAL FOR LAKESIDE MEMORIAL LAWN CREMATORIUM CONDITIONAL USE PERMIT (PN 19-182)				
Cond. No.	Mitigation Measure	GENERAL REQUIREMENTS	When Required	Responsible Department
1.		Issuance of a Building Permit is required. The applicant shall submit final site and building plans to the Community Development Department that substantially conform to the overall site plan, detailed site plan and floor plans dated February 19, 2020, included in Attachment 5 and the Outer Dimensions dated August 27, 2020, contained in Attachment 6. Implementation of this project shall be consistent with the above referenced items as modified by these conditions of approval.	B	CD (B)
2.		Compliance with all local, state and federal regulations pertaining to building construction and demolition is required.	OG	CD (B)
3.		This approval is for operation of a crematorium within an existing 1,071-square foot metal structure located at 1201 Forrest Street, within the Lakeside Memorial Lawn cemetery. The applicant shall submit building plans that substantially comply with this approval and the site plan and floor plan dated February 19, 2020, included in Attachment 5 and the Outer Dimensions dated August 27, 2020, contained in Attachment 6.	B	CD (P)
4.		If the Community Development Director finds evidence that conditions of approval for the Lakeside Memorial Lawn Crematorium Conditional Use Permit have not been fulfilled or complied with, that the use has resulted in a substantial adverse effect on the health, and/or general welfare of users of adjacent or proximate property, or has a substantial adverse impact on public facilities or services, the Director will refer the use permit to the Historic District Commission for review. If, upon such review, the Historic District Commission finds that any of the above-stated results have occurred, the Commission may modify or revoke the Conditional Use Permit.	OG	CD (P)

Historic District Commission
 Lakeside Memorial Lawn Crematorium Conditional Use Permit (PN 19-182)
 February 16, 2022

5.		<p>This project approval shall remain in effect for one year until February 16, 2023. Failure to submit a complete application for the relevant building permits within this time period, without the subsequent extension of this approval, or failure to vest the Conditional Use Permit within the identified time frame prior to the expiration date and the applicant has not demonstrated substantial progress towards the development of the project, shall render this approval null and void. The owner/applicant may file an application with the Community Development Department for a permit extension not less than 30 days prior to the expiration date of the permit, along with appropriate fees and necessary submittal materials pursuant to Chapter 17.60 of the <u>Folsom Municipal Code</u>.</p>	B	CD (P, B)
6.		<p>The owner/applicant shall defend, indemnify, and hold harmless the City and its agents, officers and employees from any claim, action or proceeding against the City or its agents, officers or employees to attack, set aside, void, or annul any approval by the City or any of its agencies, departments, commissions, agents, officers, employees, or legislative body concerning the project. The City will promptly notify the owner/applicant of any such claim, action or proceeding, and will cooperate fully in the defense. The City may, within its unlimited discretion, participate in the defense of any such claim, action or proceeding if both of the following occur:</p> <ul style="list-style-type: none"> • The City bears its own attorney's fees and costs; and • The City defends the claim, action or proceeding in good faith <p>The owner/applicant shall not be required to pay or perform any settlement of such claim, action or proceeding unless the settlement is approved by the owner/applicant.</p>	OG	CD (P)(E)(B) PW, PR, FD, PD
DEVELOPMENT COSTS AND FEE REQUIREMENTS				
7.		<p>The owner/applicant shall pay all applicable taxes, fees and charges at the rate and amount in effect at the time such taxes, fees and charges become due and payable.</p>	B	CD (P)(E)

8.		The City, at its sole discretion, may utilize the services of outside legal counsel to assist in the implementation of this project, including, but not limited to, drafting, reviewing and/or revising agreements and/or other documentation for the project. If the City utilizes the services of such outside legal counsel, the applicant shall reimburse the City for all outside legal fees and costs incurred by the City for such services. The applicant may be required, at the sole discretion of the City Attorney, to submit a deposit to the City for these services prior to initiation of the services. The applicant shall be responsible for reimbursement to the City for the services regardless of whether a deposit is required.	B	CD (P)(E)
9.		This project shall be subject to all City-wide development impact fees, unless exempt by previous agreement. This project shall be subject to all Citywide development impact fees in effect at such time that a building permit is issued. These fees may include, but are not limited to, fees for fire protection, park facilities, park equipment, Quimby, Humbug-Willow Creek Parkway, Light Rail, TSM, capital facilities and traffic impacts. The 90-day protest period for all fees, dedications, reservations or other exactions imposed on this project has begun. The fees shall be calculated at the fee rate in effect at the time of building permit issuance.	B	CD (P)(E), PW, PK
CONDITIONAL USE PERMIT REQUIREMENTS				
10.		Any intensification or expansion of the use approved and conditioned herein will require a subsequent Conditional Use Permit Modification by the Historic District Commission. No approvals are granted in this Conditional Use Permit except as provided.	B, OG	CD (P)
11.		All conditions of the original Conditional Use Permit (PC91-042 as modified by PC 95-033) are incorporated by reference.	OG	CD (P)
12.		Compliance with the City of Folsom's Noise Control Ordinance (<u>Folsom Municipal Code Chapter 8.42</u>) and General Plan Noise Element shall be required.	OG	CD (P)
13.		No more than four cremations shall occur per day and no more than 500 cremations shall be performed each year. No expansion in number of cremations per day or per year beyond what is stated above shall be permitted without prior approval being obtained from the Historic District Commission through a Conditional Use Permit Modification.	OG	CD (P)
14.		The building in which the crematorium is located shall remained locked at all times when a cremation is not occurring.	OG	CD (P)
15.		This Conditional Use Permit shall be deemed revoked without further action by the Historic District Commission if the operation of the facility in the manner described in the Conditional Use Permit ceases for any consecutive period of six (6) months.	OG	CD
AIR QUALITY REQUIREMENTS				

16.		<p>An authority to construct and permit to operate (A/C, PTO) shall be obtained from the Sacramento Metropolitan Air Quality Management District (SMAQMD) prior to the commencement of equipment installation. As part of this process, SMAQMD will determine if the emissions from the propane combustion and toxic emissions meet applicable rules and Best Available Control Technology (BACT) requirements, as well as the NAAQS 8-Hour Ozone Attainment and Reasonable Further Progress Plan (Regional Ozone Plan). A building permit will not be issued until an A/C, PTO has been obtained.</p> <p>Compliance with the SMAQMD A/C, PTO and the maintenance of such permits in good standing are requirements for validity of this Conditional Use Permit and the failure to comply with such permits and/or to maintain such permits in good standing shall trigger the process described in Condition of Approval No. 4.</p>	B	CD (P, B)
-----	--	--	---	-----------

17.		<p>The following SMAQMD Basic Construction Emission Control Practices shall be implemented throughout construction activities:</p> <ul style="list-style-type: none">• All exposed surfaces shall be watered two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads.• Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways shall be covered.• Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited.• Limit vehicle speeds on unpaved roads to 15 miles per hour.• All roadways, driveways, sidewalks, parking lots shall be paved as soon as possible. In addition, building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.• Minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes (as required by the state airborne toxics control measure [Title 13, Section 2485 of the California Code of Regulations]). Provide clear signage that posts this requirement for workers at the entrances to the site.• Maintain all construction equipment in proper working condition according to manufacturer's specifications. The equipment shall be checked by a certified mechanic and determine to be running in proper condition before it is operated.	DC	CD (E)
-----	--	---	----	--------

CULTURAL, ARCHAEOLOGICAL, PALEONTOLOGICAL AND HISTORICAL/TRIBAL RESOURCES REQUIREMENTS				
18.	✓	<p>Prior to the initiation of ground disturbing activity, a qualified professional archaeologist shall be retained to develop and deliver a contractor awareness training program to construction supervisors. The purpose of the training is to ensure that contractors are aware of the need to limit their activity, including equipment storage, staging, parking, and ground disturbance to only those locations identified as work areas on the official site plans.</p> <p>Prior to the initiation of ground disturbing activity, a qualified professional archaeologist shall be retained to monitor the installation of temporary high-visibility exclusionary fencing along the toe of existing mine tailings features adjacent to the shed. The fencing shall remain in place until all project activities are completed. City inspectors shall include a verification of the fencing during all required inspections. In the event that exclusionary fencing has failed, the construction supervisor must re-install or repair the fence within 24 hours.</p>	G, I, B	CD (P)(E)(B)

19.	✓	<p>If subsurface deposits believed to be cultural in origin are discovered during construction, all work must halt within a 50-foot radius of the discovery. A qualified professional archaeologist, meeting the Secretary of the Interior's Professional Qualification Standards for pre-contact and historic archaeologist, shall be retained to evaluate the significance of the find, and shall have the authority to modify the no-work radius as appropriate, using professional judgment. The following notifications shall apply, depending on the nature of the find:</p> <ul style="list-style-type: none">• If the professional archaeologist determines that the find does not represent a cultural resource, work may resume immediately, and no agency notifications are required.• If the professional archaeologist determines that the find does represent a cultural resource from any time period or cultural affiliation, he or she shall immediately notify the City to consult on a finding of eligibility and implement appropriate treatment measures, if the find is determined to be a Historical Resource under CEQA, as defined in Section 15064.5(a) of the CEQA Guidelines or a historic property under Section 106 NHPA, if applicable. Work may not resume within the no-work radius until the City, through consultation as appropriate, determines that the site either: 1) is not an Historical Resource under CEQA, as defined in Section 15064.5(a) of the CEQA Guidelines; or 2) that the treatment measures have been completed to its satisfaction.	G, I, B	CD (P)(E)(B)
-----	---	--	---------	--------------

20.	✓	<p>If subsurface deposits believed to be cultural or human in origin are discovered during construction, all work must halt within a 50-foot radius of the discovery. A qualified professional archaeologist, meeting the Secretary of the Interior's Professional Qualification Standards for pre-contact and historic archaeologist, shall be retained to evaluate the significance of the find, and shall have the authority to modify the no-work radius as appropriate, using professional judgment. The following notifications shall apply, depending on the nature of the find:</p> <ul style="list-style-type: none"> • If the find includes human remains, or remains that are potentially human, he or she shall ensure reasonable protection measures are taken to protect the discovery from disturbance (AB 2641). The archaeologist shall notify the Sacramento County Coroner (per §7050.5 of the Health and Safety Code). The provisions of §7050.5 of the California Health and Safety Code, §5097.98 of the California PRC, and Assembly Bill 2641 will be implemented. If the Coroner determines the remains are Native American and not the result of a crime scene, the Coroner will notify the NAHC, which then will designate a Native American Most Likely Descendant (MLD) for the project (§5097.98 of the PRC). The designated MLD will have 48 hours from the time access to the property is granted to make recommendations concerning treatment of the remains. If the landowner does not agree with the recommendations of the MLD, the NAHC can mediate (§5097.94 of the PRC). If no agreement is reached, the landowner must rebury the remains where they will not be further disturbed (§5097.98 of the PRC). This will also include either recording the site with the NAHC or the appropriate Information Center; using an open space or conservation zoning designation or easement; or recording a reinternment document with the county in which the property is located (AB 2641). If the Coroner determines that the remains are human but are not Native American, then the Coroner will direct subsequent steps to address the discovery. Work may not resume within the no-work radius until the City, through consultation as appropriate, determines that the treatment measures have been completed to its satisfaction. 	G, I, B	CD (P)(E)(B)
-----	---	--	---------	--------------

21.	✓	If potentially significant Tribal Cultural Resources (TCRs) are discovered during ground disturbing construction activities, all work shall cease within 50 feet of the find. A Native American Representative from traditionally and culturally affiliated Native American Tribes that requested consultation on the project shall be immediately contacted and invited to assess the significance of the find and make recommendations for further evaluation and treatment, as necessary. If deemed necessary by the City, a qualified cultural resources specialist meeting the Secretary of Interior's Standards and Qualifications for Archaeology, may also assess the significance of the find in joint consultation with Native American Representatives to ensure that Tribal values are considered. Work at the discovery location cannot resume until the City, in consultation as appropriate and in good faith, determines that the discovery is either not a TCR, or has been subjected to culturally appropriate treatment, if avoidance and preservation cannot be accommodated.	G, I, B	CD (P)(E)(B)
22.		If any archaeological, cultural, or historical resources or artifacts, or other features are discovered during the course of construction anywhere on the project site, work shall be suspended in that location until a qualified professional archaeologist assesses the significance of the discovery and provides consultation with the Folsom Historical Society, City staff, and the Heritage Preservation League. Appropriate mitigation as recommended by the archaeologist and the Historical Society representative shall be implemented. If agreement cannot be met, the Historic District Commission shall determine the appropriate implementation method.	G, I, B	CD (P)(E)(B)
FIRE AND LIFE SAFETY REQUIREMENTS				
23.		Current occupancy loads shall be posted at all times, and the owner/applicant shall have an effective system to keep count of the number of occupants present at any given time. This information shall be provided to public safety personnel upon request.	OG	CD (F)
24.		The building in which the crematorium is located shall be provided with an approved monitored fire alarm/detection system when the building is not protected by an automatic sprinkler system in accordance with the Folsom Municipal Code Section 907.9.1.	O	CD (F)

25.		On-site fire hydrants and mains capable of supplying the fire flow shall be provided in accordance with the 2019 <u>California Fire Code (CFC)</u> Section 507 Fire Protection Water Supplies: An approved water supply capable of supplying the required fire flow for fire protection shall be provided to all premises upon which facilities, buildings or portions of buildings are hereby constructed or moved into or within the jurisdiction, including the structure where cremations are proposed as a part of this project. Where a portion of a facility or building constructed is more than 400 feet from a hydrant on a fire apparatus access road, as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains capable of supplying the fire flow shall be provided where required by the fire code official. <u>CFC 507</u>	O	CD(F)
26.		Installation of the propane tanks shall comply with the following: a. There shall be no more than two propane tanks with capacities of no more than 250 gallons each. b. The installation shall conform to 2019 CFC, Chapter 61, and 2014 <u>National Fire Protection Association (NFPA)</u> Standard 58. c. The container installation shall conform to Sec. 6.6.3, <u>NFPA 58</u> , which requires a minimum 10-foot separation distance between the 250-gallon propane tanks and the building in which the crematorium is located. d. Piping shall be installed per Section 6.9, <u>NFPA 58</u> , and tested per Section 6.14. e. Combustible materials, trash, weeds and brush shall not be stored or located within 10 feet of the propane tanks. <u>CFC 6107.3 & NFPA 58: 6.4.4.3</u> f. If the point of transfers for the propane tanks are not located at the tanks, they shall be located in accordance with <u>NFPA 58: Table 6.5.2.1</u> . g. Support of the propane tanks shall comply with <u>NFPA 58: 6.3.3(A) through 6.3.3(D)</u> . h. Steel supports shall be protected against fire exposure with materials having a fire resistance rating of at least 2 hours if the height limits specified in <u>NFPA 58: Table 6.3.3(A)</u> are exceeded.	O	CD (F)
27.		A trained operator shall remain on-site at all times that the crematorium machine is in operation.	O	CD (P)
OTHER AGENCY REQUIREMENTS				

Historic District Commission
 Lakeside Memorial Lawn Crematorium Conditional Use Permit (PN 19-182)
 February 16, 2022

28.		The owner/applicant shall obtain and continually maintain in good standing all required State and Federal permits and provide evidence that said permits have been obtained, or that the permit is not required, subject to staff review and approval. Compliance with all required State and Federal permits and the maintenance of such permits in good standing are requirements for validity of this Conditional Use Permit and the failure to comply with such permits and/or to maintain such permits in good standing shall trigger the process described in Condition of Approval No. 4.	I, G	CD (P)(E)
29.		The owner/applicant shall obtain permission (permit, letter, agreement, etc.) from all applicable public utility companies (SMUD, PG&E, WAPA, etc.) in a form acceptable to the Community Development Department for construction-related activities proposed within the existing public utility easements.	I	CD (P)
30.		The proposed project shall comply with all State and local rules, regulations, Governor's Declarations, and restrictions including but not limited to requirements relative to water usage and conservation established by the State Water Resources Control Board, and water usage and conservation requirements established within the <u>Folsom Municipal Code</u> , (Chapter 13.26 Water Conservation), as amended from time to time. Applicant's Narrative

Scope of Work- Installing a Crematory

We are proposing to install a Hartwick Apex 250 Human Crematory at our existing shed in our cemetery Lakeside Memorial Lawn 1201 Forrest St Folsom CA 95630.

Introduction

Lakeside Memorial Lawn has existed since 1850. It has been a large part of the history of the city of Folsom and remains to be a part of the future of the city of Folsom. It is privately held and operated by family, who currently reside in Folsom and have a long heritage in Folsom. Lakeside Memorial Lawn alongside Miller Funeral Home have over 150 years in service to the community.

The Claney and Semenyuk family has a combined experience of 100 years in the funeral industry. Residents of Folsom and active partners in the community, local ordinances and the Folsom Police Department in Every 15 Minutes Program. We also own Caring Service Group, which has 8 funeral homes from Clear Lake to Arroyo Grande. With four crematories in four separate cities. Coordinating with their respected cities and local air ordinances, Caring Service Group has been successful in operating and installing these crematories. They have been in operation for the last 10 years and have not received one complaint against their licensing as they continue to operate at full capacity. All four crematories are inside the funeral home buildings, which is an impressive feat on its own. These crematories have facilitated thousands of cremations and will continue to do so. This is to demonstrate the knowledge, professionalism and ethical practices we uphold when we install and operate crematories.

Point at Issue

There are several large cultural communities residing and moving into Folsom. Regretfully, we do not have the ability nor the capability to serve the Sikh, Hindu, Buddhist or other cremation-based cultures as they require an on-site crematory so that they may be able to exercise their funeral rights and customs. Currently, there is no crematory in the city of Folsom, so they must find these services outside their city.

The increase in homes being built in the city of Folsom, including Folsom Ranch, we need to have an on-site crematory in order to facilitate its increase in cremation service. Folsom tax paying residents are unable to choose cremation disposition to be performed locally.

California currently has a cremation rate of 66.7 percent and will increase to 80 percent by 2030. Since 2019 the city of Folsom has an estimated 450 deaths a year and rising as the population increases. That is an estimated 300 cremations needed to be performed every year.

Our Proposition

The crematory placement at Lakeside Memorial Lawn is a strategic placement. It is removed from any residences, parks, or schools. It is not in eyesight of any homes, business's or restaurants. It will be inside the existing shed of Lakeside Memorial Lawn, surrounded by the rock piles of Folsom. As the only operational cemetery in Folsom, it is governed by the California Funeral and Cemetery Bureau and crematories fall under its' jurisdiction in licensing and on-site inspections.

As the cemetery does not have a gas or sewer line, we will be installing two propane tanks to facilitate the energy needed for the machine. It is a simple and cost-efficient option.

Cremation Process

A small explanation of cremation and its process.

Once paperwork - death certificate and local disposition permit is filed, with the family's permission and consent, we can then proceed with cremation.

Through a very strict identification process, we take the remains of John Doe and place them in a cremation container. It is identified again, weighed and recorded into the crematory log.

The machine or Cremator is started and heated up to a degree that the local air quality board deems necessary for the area, prior to remains being placed into the main chamber. Usually ranges from 1100-1600 degrees Fahrenheit. A Cremator has two burners, a main burner which is directly over the middle of the main chamber and a back burner, which is in the back in the second chamber.

The function of the second chamber is to initially heat up the machine and to incinerate any particles that escape the main chamber during the cremation process. That way there is no smoke or residue that leaves the chamber.

The main burner is there to facilitate the cremation process. It continues to heat up the main chamber and maintains a consistent temperature that allows the water in the subject to evaporate.

Once the Cremator reaches the set temperature, the cremation container is then rolled inside the main chamber. When the door opens, the main burner shuts off for safety reasons. That prevents any harm to the crematory operator and facility. The door is then shut and after a few minutes the main burner starts again and thus begins the cremation process.

This process is self-operating and does not require anything else apart from time. The usual time cremation takes is an average of 2 hours for the combustion process to be complete. It is a self-contained and safe process from start to finish.

The side door is opened, and the remains are collected and placed to cool down. Once cool, they are processed through a processor and placed into a plastic bag that is identified and sealed. The bag is placed into an urn and sealed. The urn is identified with name, date of cremation and the crematories license number. All this information is logged into the crematory book that is overseen by the CA State Funeral and Cemetery Bureau.

Usual Safety Concerns

In the process of any errors or malfunction, there are safety features installed. In the event of an operational failure, the gas is immediately and automatically shut off. There is a manual switch as well. There has never been a crematory blowing up in the history of cremation.

We buy our machines from a very reputable, if not the best in the cremation industry manufacturer called Hartwick Combustion Technologies. They are manufactured in California, are designed to use less fuel, have lower NOx emissions, is NFPA compliant, meets Air Quality standards and the components used are UL listed.

We have one of their machines located within our Lakeport funeral home and we have not had one issue or complaint. We trust in the safety and manufacturing of these machines and ourselves hold years of experience in the cremation industry with our own high safety standards.

Scope of Work

We are hoping to get a use permit from the city of Folsom to operate our very own Hartwick Apex 250 Human Crematory. To accomplish this, we will be working side by side with the city of Folsom, Sacramento Air Quality Board and the CA Funeral and Cemetery Bureau to meet all necessary standards, laws and regulations in order to complete said application and Use permit.

Once we are issued the Use Permit from the city of Folsom, we will go ahead and install the Cremator inside the existing shed at Lakeside Memorial Lawn.

We will have it lifted with a crane off the truck and rolled inside the shed. Once in the proper place, the stack will be installed, and the electrical/propane lines connected by its respected professionals. The CA Cemetery and Funeral Bureau will do a final inspection and they will issue a crematory license. At that point we will be operational, and the city of Folsom will have its first crematory.

We have done this process twice in two other cities and we look forward to doing this in the city we live in.

If you have any questions or require more information, please contact me.

LIST OF APPENDICES

- A Figures
- B Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Assessment and Addendum to the Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Emissions Assessment
- C Tribal Consultation Record for Compliance with AB 52 and CEQA
- D Mitigation Monitoring and Reporting Program

1.0 INTRODUCTION

This Initial Study (IS) addresses the proposed Lakeside Memorial Lawn Crematorium project (proposed project) and whether it may cause significant effects on the environment. The IS also assesses whether any environmental impacts of the project are susceptible to substantial reduction or avoidance by project revision, imposition of conditions, or any other means [§15152(b)(2)] of the California Environmental Quality Act (CEQA) Guidelines. If such revisions, conditions, or other means are identified, they will be included as mitigation measures.

This Initial Study relies on CEQA Guidelines Sections §15064 and 15064.4 in its determination of the significance of the environmental impacts. Per §15064, the finding as to whether a project may have one or more significant impacts shall be based on substantial evidence in the record, and that controversy alone, without substantial evidence of a significant impact, does not trigger the need for an Environmental Impact Report (EIR).

2.0 PROJECT BACKGROUND

The following project specific technical reports quantified analysis and or surveys were used in preparation of this Initial Study and are incorporated by reference:

- Air Quality and Greenhouse Gas Analysis, prepared by HELIX Environmental Planning, Inc. (December 2020).
- Addendum to the Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Emissions Assessment, prepared by HELIX Environmental Planning, Inc. (November 2021).
- Cultural Resources Inventory Report for the Lakeside Memorial Lawn Storage Shed Project, prepared by ECORP Consulting, Inc. (November 2020).
- Tribal Consultation Record for Compliance with Assembly Bill 52 and CEQA for the Lakeside Memorial Lawn Storage Shed Project, prepared by ECORP Consulting, Inc. (January 2021).

3.0 PROJECT DESCRIPTION

3.1 Project Location

The proposed project would be constructed on an approximately 12-acre parcel situated near the western boundary of the City of Folsom in Sacramento County, California. The project site is located west of the intersection of Forrest Street/Natoma Street along Folsom Boulevard within the existing Lakeside Memorial Lawn Cemetery. It lies along the eastern shore of Lake Natoma. The crematorium would be constructed within an existing shed along the eastern boundary of the property, just west of the end of Mormon Street. The project site is identified as Assessor's Parcel Number (APN) 070-0260-001. Refer to **Figure 1** for the regional location and **Figure 2** for an aerial view of the project site. All figures are included in **Appendix A**.

3.2 Project Setting and Surrounding Land Uses

The project site is currently a small cemetery, with associated landscaping, outbuildings, and access roads. Lands to the south and west contain woodland habitat typical of riparian communities in the Sierra Nevada foothills. Soils at the project site are comprised of dredge tailings and other fill material.

Tailing piles between the site and Folsom Boulevard prevent the site from being visible from that street. To the west is also the Jedidiah Smith Memorial Trail that runs along the eastern shore of Lake Natoma. The trail, also known as the American River Bike Trail, connects Folsom Lake (north of the project site) to the confluence of the American and Sacramento Rivers in Downtown Sacramento. It is a part of the American River Parkway that is operated by the California Department of Parks and Recreation. To the north of the project site is a small residential neighborhood with single-family dwellings. Folsom Boulevard runs in a north/south line just east of the property. East of Folsom Boulevard is a large, developed area containing single-family homes, apartment complexes, a mobile home park, and some small businesses. The more regional setting is primarily characterized by residential development with a commercial shopping center to the east.

The project site is generally flat, ranging from about 175 to 185 feet above mean sea level. There are no wetlands, streams, or jurisdictional features located on the project site.

3.3 Project Characteristics

The project would be located in an existing metal shed on the grounds of the existing Lakeside Memorial Lawn Cemetery. The shed can be reached by following Mormon Street to its terminus, making a slight left turn, and continuing for approximately 100 feet down an access road. The proposed project includes the installation of one HCT Apex-250 crematory manufactured by Hartwick Combustion. The shed would be modified to accommodate this device, but the shed's footprint would not be expanded. The shed currently covers 1,071 square feet. Further, a 10 foot by 15-foot walk-in cooler would be installed inside the shed to provide temporary, short-term storage of human remains prior to cremation. Two 250-gallon propane tanks would be installed on a proposed concrete pad along the northern side of the shed to provide power for the crematorium, as no gas lines currently exist on the property. The pad would cover approximately 38.3 square feet of ground. A small exhaust stack would be installed on the roof of the shed.

The applicant anticipates 1-4 cremations on business days (Monday through Friday) with the total number of cremations not exceeding 500 per year. Average cremation time is approximately 90 minutes. Refer to **Figure 3** for the site design plan in **Appendix A**.

Parking and Circulation

Diagonal parking spaces can be found along both sides of Mormon Street. At the terminus of Mormon Street, members of the public may continue straight onto a main cemetery access road to find an additional parking lot. All existing parking spaces would be maintained. Access to the project site directly would continue to be provided by a smaller existing access road located at the southwestern terminus of Mormon Street. Both the smaller access road and the main access road can be reached at the terminus of Mormon Street, but the two roads do not form a continuous loop due to a fence line dividing them. No new parking spaces or facilities would be constructed.

As the crematorium would not be located in or near a funeral home and would be separate from any funeral services or public gatherings provided by the project applicant, access would only need to accommodate a small number of staff members with business at the site.

Emergency Vehicle Access

Emergency vehicle access would be maintained throughout the project site to meet the Fire Department standards for fire engine maneuvering, location of fire engine to fight a fire, rescue access to the units, and fire hose access to all sides of the building.

Utilities

The cemetery is currently serviced with potable water and irrigation water from the City of Folsom. There is no need to seek a "will serve" letter as the City currently provides water and the crematory would not substantially increase flow demand. The City also provides solid waste collection and disposal services; the project is not expected to result in a significantly increased demand for solid waste removal.

As an existing facility, Lakeside Memorial Lawn maintains adequate fire response infrastructure for both current operations and the proposed project. The City Fire Department reviewed the project application and did not raise any concerns regarding the adequacy of water supply or site access.

The cemetery is currently served with an electricity supply from the Sacramento Municipal Utilities District (SMUD). Electrical connections already exist for the shed, and may be upgraded as needed as part of the proposed project. Installation and operation of the crematory would not result in a significant increase in demand for electricity on the project site.

The cemetery, including the shed, does not have an existing sewer line. This project would not require access to, or construction of, a sewer line. The two 250-gallon propane tanks and a concrete pad for securing them would be constructed along the northern edge of the shed to provide power for the crematorium.

Stormwater flows on the site are retained and drained to Lake Natoma. There would be no change in the hydrologic regime of the project site due to the installation or operation of the proposed project.

Landscaping

Existing landscaping at the cemetery and around the shed consists of mature broad-leaved, coniferous, trees and palms. These trees and landscaping also provide shade for much of the cemetery and many of the parking spaces. An irrigated lawn surrounds the existing cemetery plots, and a smaller lawn surrounds the rear of the shed (i.e., the non-service entrance side). Native oak/gray pine woodland habitat surrounds the cemetery.

No new landscaping installation or modification is proposed. Native habitat in the vicinity of the project would not be disturbed. No built footprint would be expanded.

Fencing

An existing brick and wrought iron fence demarcate the boundary to the cemetery from the Forrest Street side, but does not extend the length of Mormon Street. A wooden fence currently separates the front side of the shed (facing the access road) from the back side and extends both north and south of the shed. The fencing south of the shed further extends to block the access road and restrict access between the lawn to the west of the shed and the access road to the east of the shed.

Grading

No grading of the site would be required.

3.4 City Regulation of Urban Development

General Plan

The City of Folsom updated and adopted its current comprehensive General Plan in August 2018. The General Plan is a long-term planning document that guides growth and land development in the City. It provides the foundation for establishing community goals and supporting policies, and directs appropriate land uses for all land parcels within the City. The project site is designated as Open Space (OS) in the City of Folsom General Plan. It is also within the Historic District and within a Sacramento Area Council of Governments (SACOG) Transit Priority Area.

Zoning Ordinance

Developed land uses in the City of Folsom are regulated specifically by the City's Zoning Code (Title 17 of the City's Municipal Code), in addition to the other adopted regulations and programs that apply to all proposed development within the City. In more detail than the General Plan, the Zoning Code regulates land uses on a parcel-by-parcel basis throughout the City. In order to achieve this regulation, the City assigns each parcel within the City to a zoning district, such as a district for single-family homes. Regulations for each district apply equally to all properties within the district.

The project site is currently within the Open Space/Public Primary Area of the Historic District (OS/P), with an underlying zoning of Open Space and Conservation (OSC). The applicant is seeking a Conditional Use Permit from the City to authorize their installation of a crematory.

3.5 Other City Regulation of Urban Development

The City of Folsom further regulates urban development through standard construction conditions and through mitigation, building, and construction requirements set forth in the Folsom Municipal Code. Required of all projects constructed throughout the City, compliance with the requirements of the City's standard conditions and the provisions of the Municipal Code avoids or reduces many potential environmental effects. City procedures to minimize negative environmental effects and disruptions include an analysis of existing features, responsible agency and public input to the design process, engineering and design standards, and construction controls. The activities that mitigate typical environmental impacts to be implemented by the City during the project review, design, and construction phases are described in greater detail below.

Community Development Department Standard Construction Conditions

The City's standard construction requirements are set forth in the City of Folsom, Community Development Standard Construction Specifications updated in February of 2020. A summary of these requirements is set forth below and incorporated by reference into the project description. Copies of these documents may be reviewed at the City of Folsom, Community Development Department, 50 East Natoma Street, Folsom, California 95630.

The Department's standard construction specifications are required to be adhered to by any contractor constructing a public or private project within the City.

Use of Pesticides – Requires contractors to store, use, and apply a wide range of chemicals consistent with all local, state, and federal rules and regulations.

Air Pollution Control – Requires compliance with all Sacramento Metropolitan Air Quality Management District (SMAQMD) and City air pollution regulations.

Water Pollution – Requires compliance with City water pollution regulations, including National Pollutant Discharge Elimination System (NPDES) provisions.

Noise Control – Requires that all construction work comply with the Folsom Noise Ordinance (discussed further below), and that all construction vehicles be equipped with a muffler to control sound levels.

Naturally Occurring Asbestos – Requires compliance with all SMAQMD and City air pollution regulations, including preparation and implementation of an Asbestos Dust Mitigation Plan consistent with the requirements of Section 93105 of the State Government Code.

Weekend, Holiday, and Night Work – Prohibits construction work during evening hours, or on Sunday or holidays, to reduce noise and other construction nuisance effects.

Public Convenience – Regulates traffic through the work area, operations of existing traffic signals, roadway cuts for pipelines and cable installation, effects to adjacent property owners, and notification of adjacent property owners and businesses.

Public Safety and Traffic Control – Regulates signage and other traffic safety devices through work zones.

Existing Utilities – Regulates the relocation and protection of utilities.

Preservation of Property – Requires preservation of trees and shrubbery and prohibits adverse effects to adjacent property and fixtures.

Cultural Resources – Requires that contractors stop work upon the discovery of unknown cultural or historic resources, and that an archaeologist be retained to evaluate the significance of the resource and to establish mitigation requirements, if necessary.

Protection of Existing Trees – Specifies measures necessary to protect both ornamental and native oak trees.

Clearing and Grubbing – Specifies protection standards for signs, mailboxes, underground structures, drainage facilities, sprinklers and lights, trees and shrubbery, and fencing. Also requires the preparation of a Stormwater Pollution Prevention Plan (SWPPP) to control erosion and siltation of receiving waters.

Reseeding – Specifies seed mixes and methods for reseeded of graded areas.

City of Folsom Municipal Code

The City regulates many aspects of construction and development through requirements and ordinances established in the Folsom Municipal Code. These requirements are summarized in **Table 1** and

incorporated by reference into the project description. Copies of these documents may be reviewed at the City of Folsom, Office of the City Clerk, 50 East Natoma Street, Folsom, California 95630.

Table 1. City of Folsom Municipal Code Regulating Construction and Development

CODE SECTION	CODE NAME	EFFECT OF CODE
8.42	Noise Control	Establishes interior and exterior noise standards that may not be exceeded within structures, including residences; establishes time periods for construction operations.
8.70	Stormwater Management and Discharge Control	Establishes conditions and requirements for the discharge of urban pollutants and sediments to the storm-drainage system; requires preparation and implementation of Stormwater Pollution Prevention Plans.
9.34	Hazardous Materials Disclosure	Defines hazardous materials; requires filing of a Hazardous Material Disclosure Form by businesses that manufacture, use, or store such materials.
9.35	Underground Storage of Hazardous Substances	Establishes standards for the construction and monitoring of facilities used for the underground storage of hazardous substances and establishes a procedure for issuance of permits for the use of these facilities.
12.16	Tree Preservation	Regulates the cutting or modification of trees, including oaks and specified other trees; requires a Tree Permit prior to cutting or modification; establishes mitigation requirements for cut or damaged trees.
13.26	Water Conservation	Prohibits the wasteful use of water; establishes sustainable landscape requirements; defines water use restrictions.
14.19	Energy Code	Adopts the California Energy Code, 2010 Edition, published as Part 6, Title 24, C.C.R. to require energy efficiency standards for structures.
14.20	Green Building Standards Code	Adopts the California Green Building Standards Code (CALGreen Code), 2010 Edition, excluding Appendix Chapters A4 and A5, published as Part 11, Title 24, C.C.R. to promote and require the use of building concepts having a reduced negative impact or positive environmental impact and encouraging sustainable construction practices.
14.29	Grading Code	Requires a grading permit prior to the initiation of any grading, excavation, fill or dredging; establishes standards, conditions, and requirements for grading, erosion control, stormwater drainage, and revegetation.
14.32	Flood Damage Prevention	Restricts or prohibits uses that cause water or erosion hazards, or that result in damaging increases in erosion or in flood heights; requires that uses vulnerable to floods be protected against flood damage; controls the modification of floodways; regulates activities that may increase flood damage or that could divert floodwaters.

4.0 PROJECT OBJECTIVES

The project objectives, as expressed by the applicant, are to:

- Provide cremation services for those who currently live in and around Folsom, as no such services currently exist in the City;
- Provide cremation services for members of the population whose customs or religions require such practices;
- Prepare for an increase in the demand for cremation services as cremations become more popular in California and as Folsom's population grows;
- Upgrade existing facilities to capitalize on a business opportunity that has proven successful for the applicant elsewhere in California.

5.0 REQUIRED APPROVALS

A listing and brief description of the project approvals required to implement the proposed project is provided below. This environmental document is intended to address the environmental impacts associated with all the following decision actions and approvals:

- Conditional Use Permit

The City of Folsom has the following discretionary powers related to the proposed project:

- **Certification of the environmental document:** The Folsom City Council will act as the lead agency as defined by the California Environmental Quality Act (CEQA) and will have authority to determine if the environmental document is adequate under CEQA.
- **Approval of project:** The Folsom City Council will consider approval of the project and all entitlements as described above.

6.0 PREVIOUS RELEVANT ENVIRONMENTAL ANALYSIS

6.1 City of Folsom General Plan

The Program EIR for the City of Folsom General Plan (2018) provides relevant policy guidance for this environmental analysis. The EIR evaluated the environmental impacts that could result from implementation of the City of Folsom 2035 General Plan (2035 General Plan) (City of Folsom 2018a). The Program EIR is intended to provide information to the public and to decision makers regarding the potential effects of adoption and implementation of the 2035 General Plan, which consists of a comprehensive update of Folsom's current General Plan. The 2035 General Plan consists of a policy document, including Land Use and Circulation Diagrams.

6.2 Tiering

“Tiering” refers to the relationship between a Program EIR (where long-range programmatic cumulative impacts are the focus of the environmental analysis) and subsequent environmental analyses such as the subject document, which focus primarily on issues unique to a smaller project within the larger program or plan. Through tiering a subsequent environmental analysis can incorporate, by reference, discussion that summarizes general environmental data found in the Program EIR that establishes cumulative impacts and mitigation measures, the planning context, and/or the regulatory background. These broad-based issues need not be reevaluated subsequently, having been previously identified and evaluated at the program stage.

Tiering focuses the environmental review on the project-specific significant effects that were not examined in the prior environmental review, or that are susceptible to substantial reduction or avoidance by specific revisions in the project, by the imposition of conditions or by other means. Section 21093(b) of the Public Resources Code requires the tiering of environmental review whenever feasible, as determined by the Lead Agency.

In the case of the proposed project, this Initial Study tiers from the Program EIR for the City of Folsom 2035 General Plan. The Folsom 2035 General Plan is a project that is related to the proposed project and, pursuant to §15152(a) of the State CEQA Guidelines, tiering of environmental documents is appropriate. State CEQA Guidelines §15152(e) specifically provides that:

“[w]hen tiering is used, the later EIRs or Negative Declarations shall refer to the prior EIR and state where a copy of the prior EIR may be examined. The later [environmental document] should state that the Lead Agency is using the tiering concept and that the [environmental document] is being tiered with the earlier EIR.”

The above-mentioned Program EIR and this Initial Study can be reviewed at the following location:

6.3 Incorporation of the Folsom General Plan and East Area Facilities Plan EIRs by Reference

The Program EIR for the Folsom 2035 General Plan is a comprehensive document. Due to various references to the Folsom 2035 General Plan Program EIR in this proposed project, and to its importance relative to understanding the environmental analysis that has occurred to date with respect to development in the Folsom area, the program EIR document is hereby incorporated by reference pursuant to CEQA Guidelines Section 15150.

6.4 Summary of Folsom 2035 General Plan EIR

The 2035 General Plan Program EIR focused on the secondary or indirect effects of implementing the 2035 General Plan. Indirect physical changes to the environment (impacts) that could result from

implementation of 2035 General Plan are addressed in the appropriate technical chapters of the Program EIR. Likewise, inconsistency with an adopted plan, in general, is not considered a direct physical impact to the environment, but may result in impacts, which are discussed in the appropriate technical chapters. According to this definition, potential secondary or indirect environmental effects may be divided into two broad classes:

- Coverage Impacts - Those that result from development or other activities covering land or otherwise physically interfering with a resource (e.g., constructing a paved parking lot over a sensitive biological resource); and,
- Intensity Impacts - Those that result from increased levels of human activity (e.g., increases in traffic levels leading to increased emissions of criteria air pollutants).

The 2035 General Plan does not identify any additional areas designated for urban uses beyond those set forth in the 1988 General Plan as amended through fall 2017. Therefore, the environmental analysis concentrates its evaluation on those undeveloped areas designated for urban uses and the resources still present within them, including within the Folsom Plan Area Specific Plan (FPASP) area, south of Highway 50.

Coverage Impacts

These impacts are based on the conversion of existing vacant parcels to a developed land use. Conversion can result in the eradication of, or damage to, a resource, revealing of environmental conditions detrimental to a developed land use, or exposure of the developed use to an existing environmental hazard. For the purposes of evaluating these effects, the Program EIR assumed that all land identified for urban uses in the 2035 General Plan would be developed with such uses within the 20-year planning horizon.

For areas designated for urban or infrastructure uses by the 2035 General Plan, potential coverage effects for certain environmental topics were assessed in a multi-step process. Quantitative evaluations began with a review of resources potentially affected by the implementation of the 2035 General Plan project, and the areal extent of identified resources.

To determine the locations where a resource could be converted to developed uses under the proposed 2035 General Plan, an inventory of each environmental resource within each urban area project boundary was completed. Using geospatial data, or geographic information systems (GIS), all parcels or lots within the 2035 Plan Evaluation Area were identified as developed or vacant. Vacant parcels were further identified as being located north of Highway 50, or south of Highway 50 within the FPASP area.

For vacant parcels north of Highway 50, the analysis identified 453 total vacant parcels encompassing 441 acres. Of these 453 parcels, 377 are lots within existing single-family residential subdivisions totaling 163 acres, with a gross median lot size of 16,125 square feet. Of the remaining 76 parcels, the majority are designated for commercial or multi-family uses. For these uses, the total acreage is 278 acres with a gross median parcel size of 37,150 square feet. Once the 453 parcels were identified, each was evaluated using aerial photographs to determine its condition. As evidenced on the aerial photographs, the overwhelming majority of both the single-family residential and commercial/multi-family residential parcels are remnant areas within subdivisions or larger development projects, and most have been disturbed by prior rough grading and/or the construction of roads and utilities.

There are a total of 3,336 acres in the FPASP area south of Highway 50, of which 1,118 acres would remain in open space. The remaining 2,218 acres would be developed with a variety of urban land uses and supporting infrastructure. Although potential environmental impacts could occur throughout the 2035 Plan Evaluation Area, the majority of the land available for new development of urban uses (77 percent of the citywide total or 2,218 acres) would be located within the FPASP area.

The possibility of potential coverage impacts was determined by layering maps of sensitive resources (e.g., sensitive species, areas of naturally occurring asbestos, flood hazards) over the map of vacant parcels. The results of this type of analysis are reported in the following chapters of the PEIR: 6. Aesthetics and Visual Resources, 7. Agricultural and Forestry Resources, 9. Biological Resources, 10. Cultural Resources, 11. Geology, Soils, and Mineral Resources, 13. Hazards and Hazardous Materials, 14. Hydrology and Water Quality, and 18. Tribal Cultural Resources.

Intensity Impacts

Intensity impacts, such as those for traffic, air quality, greenhouse gas emissions, and noise, depend upon both the location and level of human activity. Other impacts, such as those to public services and utilities depend upon the size of the served population.

The 2035 General Plan proposed no increases in the amount of land identified for urban uses beyond that currently identified in the 1988 General Plan as amended. However, the development of urban uses on vacant land designated and available for residential and employment uses would result in an increase in the number of people and jobs in the City over existing (2015/2017) conditions. For intensity impacts, the PEIR evaluated a forecast of 2035 conditions consistent with the land uses identified in the 2035 General Plan.

The 2035 development forecast is based on a buildout model for use in the analysis of future traffic conditions. Summarily, the buildout model forecasts full development of all planned land uses within the existing city limits, full buildout of the Easton and Glenborough projects as approved by Sacramento County, and background land use assumptions outside of the City, Glenborough, and Easton consistent with the land use assumptions of Sacramento Area Council of Governments (SACOG) Metropolitan Transportation Plan/Sustainable Communities Strategy (MTP/SCS). Because the MTP/SCS forecasts conditions for the year 2036, the buildout model used in the Program EIR interpolates 2035 conditions, the horizon year for the proposed Folsom General Plan.

As with the Coverage Impact analysis, the Intensity Impact Analysis focused on the difference between the location and level of human activity currently existing (2015/2017), and the level of activity that would exist with implementation of the 2035 General Plan. The results of this type of analysis are reported in the following chapters of the Program EIR: 8. Air Resources, 12. Global Climate Change, 15. Noise and Vibration, 16. Public Services and Recreation, 17. Transportation, and 19. Utilities and Service Systems.

7.0 ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that may require mitigation to reduce the impact from "Potential Impact" to "Less than Significant" as indicated by the checklist on the following pages.

An Initial Study is conducted by a Lead Agency to determine if a project may have a potentially significant effect on the environment (CEQA Guidelines Section 15063). An Environmental Impact Report (EIR) must be prepared if an Initial Study indicates that further analysis is needed to determine whether a significant impact will occur or if there is substantial evidence in the record that a project may have a significant effect on the environment (CEQA Guidelines Section 15064(f)).

8.0 DETERMINATION (TO BE COMPLETED BY THE LEAD AGENCY)

On the basis of this initial evaluation:

<input type="checkbox"/>	I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
<input checked="" type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
<input type="checkbox"/>	I find that the proposed project MAY have a significant effect on the environment, and an environmental impact report is required.
<input type="checkbox"/>	I find that the proposed project MAY have a "potential impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
<input type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

9.0 ENVIRONMENTAL INITIAL STUDY CHECKLIST

Responses to the following questions and related discussion indicate if the proposed project will have or will potentially have a significant adverse impact on the environment, either individually or cumulatively with other projects. All phases of project planning, implementation, and operation are considered. Mandatory Findings of Significance are located in Section 9.XXI below.

- A. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- B. "Less Than Significant with Mitigation" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures and briefly explain how they reduce the effect to a less than significant level (mitigation measures from earlier analyses may be cross-referenced).
- C. "Less Than Significant Impact" applies where the project creates no significant impacts, only less than significant impacts.
- D. "No Impact" applies where a project does not create an impact in that category. "No Impact" answers do not require an explanation if they are adequately supported by the information sources cited by the lead agency which show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project would not expose sensitive receptors to pollutants, based on a project specific screening analysis).

I. AESTHETICS

AESTHETICS:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Except as provided in Public Resources Code Section 21099, would the project:				
a) Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The project site is currently a small cemetery, with associated landscaping, outbuildings, and access roads. Lands to the south and west contain woodland habitat typical of riparian communities in the Sierra Nevada foothills. Soils at the project site are comprised of dredge tailings and other fill material. Tailing piles between the site and Folsom Boulevard prevent the site from being visible from that street. To the west is also the Jedidiah Smith Memorial Trail that runs along the eastern shore of Lake Natoma. To the north is a small residential neighborhood with single family dwellings. Folsom Boulevard runs in a north/south line just east of the property. East of Folsom Boulevard is a large, developed area containing single family homes, apartment complexes, a mobile home park, and some small businesses. The more regional setting is primarily characterized by residential development with a commercial shopping center to the east.

The project would be located in an existing metal shed on the grounds of the existing Lakeside Memorial Lawn Cemetery. The shed can be reached by following Mormon Street to its terminus, making a slight left turn, and continuing for approximately 100 feet down an access road. The proposed project includes the installation of one HCT Apex-250 crematory manufactured by Hartwick Combustion. The shed would be modified to accommodate this device, but its footprint would not be expanded. It currently covers 1,071 square feet. A small exhaust stack would be added to the roof of the shed. This stack would be approximately 19.5 feet above grade, and would project approximately 10 feet above the existing roof of the shed. The crematory would be placed in the northwest corner of the shed. Two 250-gallon propane tanks would be installed on a proposed concrete pad along the northern side of the shed to provide power for the crematorium, as no gas lines currently exist. An existing wooden fence would shield these tanks from view from the publicly used areas of the cemetery.

Existing landscaping at the cemetery and around the shed consists of mature broad-leaved, coniferous, and palm trees. These trees also provide shade for much of the cemetery and many of the parking spaces. An irrigated lawn surrounds the existing cemetery plots and a smaller lawn surrounds the rear of the shed (i.e., the non-service entrance side). Native oak/gray pine woodland habitat exists surrounding the cemetery. No new landscaping installation or modification is proposed. Native habitat in the vicinity of the project would not be disturbed. No built footprint would be expanded.

An existing brick and wrought iron fence marks the edge of the cemetery from the Forrest Street side, but does not extend the length of Mormon Street. A wooden fence currently separates the front side of the shed (facing the access road) from the back side and extends both north and south of the shed. The fencing south of the shed further extends to block the access road and restrict access between the lawn to the west of the shed and the access road to the east of the shed. No changes to fencing are proposed as part of this action.

The access side of the shed that would be used for crematory operations is shielded from view from the rest of the cemetery by wooden fencing. A gravel berm shields views of the shed from the east, including from Folsom Boulevard. No external modifications to the shed are proposed.

Evaluation of Aesthetics

a) Have a substantial adverse effect on a scenic vista?

No Impact. Neither the project site nor the surrounding areas are scenic vistas due to the presence of existing nearby commercial and residential developments. Further, neither the project site, nor views to or from the project site, have been designated as important scenic resources by the City of Folsom or any other public agency. Additionally, the site of proposed modifications is already largely shielded from public view and would remain so. Therefore, the proposed development would not interfere with or degrade a scenic vista, and no impact would occur.

b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

No Impact. There are no state or locally designated scenic highways in the vicinity of the proposed project site (Caltrans 2020). Implementation of the proposed project would not adversely affect scenic resources within a designated scenic highway, and no impact would occur.

c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Less than Significant Impact. The crematory would be placed inside a shed that already exists on the property and that is already mostly shielded from public view. The only external modifications would be the addition of two 250-gallon propane tanks on a concrete pad near the edge of the building and the addition of a small exhaust stack to the roof of the shed. Given that external modifications would be very minor and that the building is already mostly shielded from view, any impacts would be less than significant.

- d) Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area?

No Impact. The project would not result in any external glow or light source. No impact would occur.

II. AGRICULTURE AND FORESTRY RESOURCES

AGRICULTURE AND FORESTRY RESOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non- forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

No agricultural activities or timber management occur on the project site or in adjacent areas, and the project site is not designated for agricultural or timberland uses. The California Important Farmland Finder classifies the project site as “Urban and Built Up” and “Other Land” (i.e., not farmland or potential farmland) (CDC 2020c).

The Natural Resources Conservation Service (NRCS) soil survey report generated for the project site indicates that no Prime or Unique Farmland or Farmland of Statewide Importance occurs on the project site (NRCS 2020).

Evaluation of Agriculture and Forestry Resources

- a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

No Impact. The project site is not designated as Prime Farmland, Unique Farmland, or Farmland of Statewide importance (Farmland), pursuant to the California Important Farmland Finder (CDC 2020c). Therefore, no impact would occur.

b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?

No Impact. The project site is not zoned for agricultural use or enacted into a Williamson Act contract. Therefore, no impact would occur.

c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use?

No Impact. The project site is not zoned or designated as farmland, and the surrounding land uses are primarily residential developments and open space as part of an urban greenbelt. Therefore, the nature and location of the project would not directly or indirectly result in the conversion of Farmland to non-agricultural uses. No impact would occur.

d) Result in the loss of forest land or conversion of forest land to non-forest use?

No impact. No changes to the landscape are proposed, no removal of trees is proposed, and no expansion of a building footprint is proposed. No impact would occur.

e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

No Impact. No changes to the landscape are proposed, no removal of trees is proposed, and no expansion of a building footprint is proposed. No impact would occur.

III. AIR QUALITY

AIR QUALITY:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

The Air Quality section of this document is based upon the approach, methodology, results, and conclusions outlined in the project-specific Air Quality and Greenhouse Gas Assessment (HELIX 2020) and the subsequent addendum analysis (HELIX 2021); both documents were prepared by HELIX Environmental Planning, Inc. and are included as **Appendix B**.

Environmental Setting

The City of Folsom lies within the Sacramento Valley Air Basin (SVAB), near the southeastern edge. The SVAB consists of all or parts of eleven counties spanning from Solano and Sacramento counties in the south to Shasta County in the north. The Sacramento Metropolitan Air Quality Management District (SMAQMD) is responsible for implementing emissions standards and other requirements of federal and state laws for Sacramento County, including the project area.

The climate of the SVAB is characterized by hot, dry summers and mild, rainy winters. During the year, the temperature may range from 20 to 115 degrees Fahrenheit with summer highs usually in the 90s and winter lows occasionally below freezing. Average annual rainfall is about 20 inches with snowfall being very rare. The prevailing winds are moderate in strength and vary from moist breezes from the south to dry land flows from the north. The mountains surrounding the Sacramento Valley create a barrier to airflow, which can trap air pollutants in the valley when certain meteorological conditions are present, and a temperature inversion (areas of warm air overlying areas of cooler air) exists. Air stagnation in the autumn and early winter occurs when large high-pressure cells lie over the valley. The lack of surface wind during these periods and the reduced vertical flow caused by less surface heating reduces the influx of outside air and allows pollutants to become concentrated in the air. The surface concentrations of pollutants are highest when these conditions are combined with increased levels of smoke or when temperature inversions trap cool air, fog, and pollutants near the ground. The ozone season (May through October) in the SVAB is characterized by stagnant morning air or light winds with

the breeze arriving in the afternoon out of the southwest from the San Francisco Bay. Usually the evening breeze transports the airborne pollutants to the north out of the SVAB. During about half of the days from July to September, however, a phenomenon called the “Schultz Eddy” prevents this from occurring. Instead of allowing for the prevailing wind patterns to move north carrying the pollutants out of the valley, the Schultz Eddy causes the wind pattern and pollutants to circle back southward. This phenomenon’s effect exacerbates the pollution levels in the area and increases the likelihood of violating the federal and state air quality standards (SMAQMD 2020a).

Regulatory Setting

Criteria Pollutants

Ambient air quality is described in terms of compliance with state and national standards, and the levels of air pollutant concentrations considered safe, to protect the public health and welfare. These standards are designed to protect people most sensitive to respiratory distress, such as asthmatics, the elderly, very young children, people already weakened by other disease or illness, and persons engaged in strenuous work or exercise. The U.S. Environmental Protection Agency (USEPA), the federal agency that administrates the Federal Clean Air Act of 1970, as amended in 1990, has established national ambient air quality standards (NAAQS) for several air pollution constituents known as criteria pollutants, including: ozone (O₃); carbon monoxide (CO); coarse particulate matter (PM₁₀; particles 10 microns or less) and fine particulate matter (PM_{2.5}; particles 2.5 microns or less); sulfur dioxide (SO₂); and lead (Pb). As permitted by the Clean Air Act, California has adopted the more stringent California ambient air quality standards (CAAQS) and expanded the number of regulated air constituents. Ground-level ozone is not emitted directly into the environment but is generated from complex chemical and photochemical reactions between precursor pollutants, primarily reactive organic gases (ROGs; also known as volatile organic compounds [VOC]),¹ and oxides of nitrogen (NO_x). PM₁₀ and PM_{2.5} are generated from a variety of sources, including road dust, diesel exhaust, fuel combustion, tire and brake wear, construction operations and windblown dust. In addition, PM₁₀ and PM_{2.5} can also be formed through chemical and photochemical reactions of precursor pollutants in the atmosphere.

The California Air Resources Board (CARB) is required to designate areas of the state as attainment, nonattainment, or unclassified for the ambient air quality standards. An “attainment” designation for an area signifies that pollutant concentrations do not violate the standard for that pollutant in that area. A “nonattainment” designation indicates that a pollutant concentration violated the standard at least once. An “unclassified” designation indicates that insufficient data was available to determine the status. The air quality attainment status of Sacramento County is shown in **Table 2**.

Table 2. Sacramento County Attainment Status

Pollutant	State of California Attainment Status	Federal Attainment Status
Ozone (1-hour)	Nonattainment	No Federal Standard
Ozone (8-hour)	Nonattainment	Nonattainment
Coarse Particulate Matter (PM ₁₀)	Nonattainment	Attainment
Fine Particulate Matter (PM _{2.5})	Attainment	Nonattainment

¹ CARB defines and uses the term ROGs while the USEPA defines and uses the term VOCs. The compounds included in the lists of ROGs and VOCs and the methods of calculation are slightly different. However, for the purposes of estimating criteria pollutant precursor emissions, the two terms are often used interchangeably.

Pollutant	State of California Attainment Status	Federal Attainment Status
Carbon Monoxide (CO)	Attainment	Attainment
Nitrogen Dioxide (NO ₂)	Attainment	Attainment
Lead	Attainment	Attainment
Sulfur Dioxide (SO ₂)	Attainment	Attainment
Sulfates	Attainment	No Federal Standard
Hydrogen Sulfide	Unclassified	No Federal Standard
Visibility Reducing Particles	Unclassified	No Federal Standard

Sources: SMAQMD 2020a.

Sacramento County is designated as nonattainment for the state and federal ozone standards, the state PM₁₀ standards, and the federal PM_{2.5} standards. The SMAQMD is responsible for implementing emissions standards and other requirements of federal and state laws in Sacramento County. Attainment plans for meeting the federal air quality standards are incorporated into the State Implementation Plan (SIP), which is subsequently submitted to the USEPA, the federal agency that administrates the Federal CAA of 1970, as amended in 1990. The current air quality plan applicable to the project, the *Sacramento Regional 2008 NAAQS 8-Hour Ozone Attainment and Reasonable Further Progress Plan* (Regional Ozone Plan), was developed by the SMAQMD and adjacent air district to describe how the air districts in and near the Sacramento metropolitan area will continue the progress toward attaining state and national ozone air quality standards (SMAQMD 2017).

Toxic Air Contaminants

Toxic air contaminants (TAC) are a diverse group of air pollutants that may cause or contribute to an increase in deaths or in serious illness or that may pose a present or potential hazard to human health. TACs can cause long-term chronic health effects such as cancer, birth defects, neurological damage, asthma, bronchitis, or genetic damage, or short-term acute effects such as eye watering, respiratory irritation (a cough), runny nose, throat pain, and headaches. TACs are considered either carcinogenic or noncarcinogenic based on the nature of the health effects associated with exposure to the pollutant. For carcinogenic TACs, there is no level of exposure that is considered safe and impacts are evaluated in terms of overall relative risk expressed as excess cancer cases per one million exposed individuals. Noncarcinogenic TACs differ in that there is generally assumed to be a safe level of exposure below which no negative health impact is believed to occur. These levels are determined on a pollutant-by-pollutant basis.

The Health and Safety Code (§39655[a]) defines TAC as “an air pollutant which may cause or contribute to an increase in mortality or in serious illness, or which may pose a present or potential hazard to human health.” All substances that are listed as hazardous air pollutants pursuant to subsection (b) of Section 112 of the CAA (42 United States Code Sec. 7412[b]) are designated as TACs. Under State law, the California Environmental Protection Agency (CalEPA), acting through CARB, is authorized to identify a substance as a TAC if it determines the substance is an air pollutant that may cause or contribute to an increase in mortality or an increase in serious illness, or that may pose a present or potential hazard to human health.

Crematoriums are a potential source of TACs as a result of trace metals and organic compounds that accumulate in the body throughout a person’s life and are released during combustion of human remains, and as a result of trace organic compounds that are formed in the combustion process. These TACs include: metals and inorganics (i.e., arsenic, beryllium, cadmium, chromium, copper, hydrogen

fluoride, lead, mercury, nickel, selenium, zinc); VOCs (i.e., benzene, toluene, xylenes, vinyl chloride); aldehydes (i.e., acetaldehyde, formaldehyde); polyaromatic hydrocarbons (PAHs); polychlorinated dibenzodioxins (dioxins; PCDD); and polychlorinated dibenzofurans (furans; PCD). Prolonged exposure to significant concentrations of these TACS can result in a variety of adverse health effects including cancers, chronic conditions, and/or acute conditions, depending on the substance and level of exposure. Based on the results of the Health Risk Assessment (HRA), described below, hexavalent chromium and mercury are the primary drivers of the health risks from crematory emissions because the health risks from crematory emissions of these substances are one or more orders of magnitude greater than the health risks from other TACs in crematory emissions.

Increased Cancer Risks – Hexavalent Chromium. Hexavalent chromium is a toxic form of the element chromium. Hexavalent chromium compounds are man-made and widely used in many different industries. Prolonged exposure to airborne hexavalent chromium may result in lung cancer. Although exposure to high levels of airborne hexavalent chromium may result in irritation or damage to the nose, throat, and lungs, breathing small amounts of hexavalent chromium even for long periods does not cause respiratory tract irritation in most people (Occupational Safety and Health Administration [OSHA] 2006).

Non-Cancer Chronic and Acute Health Risks – Mercury. Mercury is a naturally occurring element that is found in its elemental form (commonly known as quicksilver), in organic compounds which accumulate in fish and shellfish, and in inorganic compounds mainly occurring in contaminated drinking water. Mercury is a neurotoxin that can result in a range of chronic neurological disorders and developmental issues. The specific health effects of mercury are dependent on the form and amount of mercury in the exposure, the duration of the exposure, and the age of the individual (USEPA 2020b).

Sensitive Receptors

Some land uses are considered more sensitive to air pollution than others due to the types of population groups or activities involved and are referred to as sensitive receptors. Examples of these sensitive receptors are residences, schools, hospitals, and daycare centers. CARB and the Office of Environmental Health Hazard Assessment (OEHHA) have identified the following groups of individuals as the most likely to be affected by air pollution: the elderly over 65, children under 14, infants (including in utero in the third trimester of pregnancy), and persons with cardiovascular and chronic respiratory diseases such as asthma, emphysema, and bronchitis (CARB 2005; OEHHA 2015).

Residential areas are considered sensitive receptors to air pollution because residents (including children and the elderly) tend to be at home for extended periods of time, resulting in sustained exposure to any pollutants present. Children and infants are considered more susceptible to health effects of air pollution due to their immature immune systems, developing organs, and higher breathing rates. As such, schools are also considered sensitive receptors, as children are present for extended durations and engage in regular outdoor activities.

The closest existing sensitive receptors to the project site are multiple single-family residences adjacent to the cemetery to the north, between 450 and 750 feet from the proposed crematory location, and mobile homes across Folsom Boulevard to the east, approximately 700 feet from the proposed crematory location; see Figure 3, *Receptor Locations*, attached to the air quality report. The closest schools to the project site are the Folsom Montessori School approximately 3,200 feet (0.6 miles) to the northeast and the Golden Valley Charter River School. That school is located across Lake Natoma from

the project site and, though it is approximately 2.7 miles away by car, its physical location is about 3,000 feet (just over one-half mile) northwest of the project site.

Methods

Criteria Pollutant Emissions

Criteria pollutant and precursor emissions for long-term operation of the proposed crematory were calculated using propane combustion emissions factors from the USEPA AP-42 Compilation of Emissions Factors Chapter 1.5 (USEPA 2008), and crematory emissions factors provided by the SMAQMD, which combined USEPA AP-42 data and the USEPA Factor Information Retrieval Program (SMAQMD 2020b).

Crematory Health Risks

Potential health risks to nearby sensitive receptors from the emission of TACs during operation of the proposed crematory were analyzed after consultation with the SMAQMD and in accordance with the OEHHA Air Toxics Hot Spots Program Guidance Manual for Preparation of Health Risk Assessments (OEHHA 2015).

TAC Emissions

Toxic emissions from the cremation process were estimated based on emissions factors provided by the SMAQMD and on maximum cremation process rates provided by Caring Service Group of 200 pounds per hour and 100,000 pounds per year. The TAC emissions factors provided by SMAQMD were based on data in a test report from CARB that measured emissions from two propane-fired crematories (SMAQMD 2020b)

Dispersion Modeling

Localized concentrations of TACs were modeled using Lakes AERMOD View version 9.8.3. The Lakes program utilizes USEPA's AERMOD gaussian air dispersion model version 19191. Plot files from AERMOD using unitized emissions (one gram per second) from the crematory stack were imported into CARB's Hotspots Analysis and Reporting Program (HARP), Air Dispersion Modeling and Risk Tool (ADMRT) version 19121. The ADMRT calculated ground-level concentrations of TACs utilizing the imported plot files and the annual and hourly emissions inventory (provided in detail in Attachment A to the Air Quality report).

Source Parameters

Based on data provided by the crematory manufacturer, emissions from the proposed crematory were modeled as a point source emitting from the exhaust stack at 19.5 feet above the ground. The stack diameter was set at 20 inches, the exhaust gas temperature was set to 1080 degrees Fahrenheit (°F), the gas exit velocity was set to 14.7 feet per second, and the stack was assumed to have a rain cap resulting in a near-zero initial vertical gas velocity. Downwash from the existing shed housing the proposed crematory was modeled using the Building Profile Input Program (BPIP – a building preprocessing program for AERMOD).

Meteorological Data

SMAQMD provides pre-processed meteorological data suitable for use with AERMOD (SMAQMD 2014) for projects within Sacramento County. The available data set most representative of conditions in the project vicinity was from the Sacramento Executive Airport station, approximately 19 miles southwest of the project site. The Sacramento Executive Airport set includes 5 years of data collected between 2010 to 2014. Rural dispersion coefficients were selected in the model to reflect the existing undeveloped and open nature of the immediate project vicinity. A wind rose for the Sacramento Executive Airport shows an average speed of 6.6 miles per hour from the south (Iowa Environmental Mesonet 2019). The wind rose graphic is included in Attachment B to the air quality report.

Terrain Data

United States Geological Survey (USGS) National Elevation Dataset (NED) files with a 10-meter resolution covering an area approximately 500 meters (1,640 feet) around the project site were used in the model to cover the analysis area. Terrain data was imported to the model using AERMAP (a terrain preprocessing program for AERMOD).

Receptor Modeling

To develop risk isopleths (linear contours showing equal level of risk) and ensure that the area of maximum impact was captured, receptors were placed in a cartesian grid 690 meters by 490 meters (approximately 2,264 feet by 1,608 feet), centered on the proposed crematory with a grid spacing of 10 meters (33 feet) and a receptor height (flagpole height) of 1.2 meters (4 feet) above the ground. Additional discrete receptors were placed at the residential property line of the 37 closest identified sensitive receptors and the 4 closest off-site worker buildings. See Figure 3 for the discrete receptor locations relative to the TAC source.

Risk Determination

Health risks resulting from localized concentration of TACs emitted by the proposed crematory were estimated using the ADMRT. The latest cancer slope factors, chronic Recommended Exposure Limits (REL), acute RELs and exposure paths for all TACs, as designated by CARB, are included in the ADMRT. For the residential cancer risk, an exposure duration of 30 years was selected in accordance with the OEHHA (2015) guidelines. In accordance with OEHHA guidelines, the model conservatively assumes that residents would be standing and breathing outdoors at the location of the property line closest to the crematory every day between 17 and 21 hours per day (depending on the age group, starting with infants in utero in the third trimester of pregnancy) for 30 years. For off-site worker cancer risk, an exposure duration of 25 years was selected with an assumption of 8 hours per day, 5 days per week of exposure while standing outside. The mandatory minimum exposure pathways and the OEHHA derived breathing intake rate percentile method were selected.

Significance Criteria

The following potential air quality impacts are based on Appendix G of the CEQA Guidelines, a significant impact is identified if the project would result in any of the following:

- a) *Conflict with or obstruct implementation of the applicable air quality plan?*

- b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?
- c) Expose sensitive receptors to substantial pollutant concentrations?
- d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

While the final determination of whether or not a project has a significant effect is within the purview of the lead agency pursuant to CEQA Guidelines Section 15064(b), the SMAQMD has adopted screening tables and thresholds which lead agencies can use to determine the significance of a development project's short-term construction and long-term operational pollutant emissions. The SMAQMD's project-level thresholds of significance for mass emissions of criteria pollutant and precursors and exposure to TACs are shown in **Table 3**.

Table 3. SMAQMD Significance Thresholds

Pollutant	Operational Emissions Threshold
ROG	65 pounds per day
NO _x	65 pound per day
PM10	80 pounds per day/14.6 tons per year ¹
PM2.5	82 pounds per day/15 tons per year ¹
TAC Exposure Incremental Increased Cancer Risk	10 in 1 million
TAC Exposure Non-Cancer Hazard Index	1

Source: SMAQMD 2020c

¹ Thresholds for PM is zero unless all feasible best available control technology/best management practices (BACT/BMPs) are applied.

Evaluation of Air Quality

- a) Conflict with or obstruct implementation of the applicable air quality plan?

Less Than Significant Impact. Consistency with the air quality plan is determined by whether the project would hinder implementation of control measures identified in the air quality plan or would result in growth of population or employment that is not accounted for in local and regional planning. The SMAQMD's Regional Ozone Plan and the SIP are the applicable air quality plans for the projects developed within Sacramento County.

The project would be consistent with the General Plan land use designation of Open Space, but the project would require a conditional use permit to install and operate a crematory in the Open Space and Conservation zoning designation of the project site. The project would not result in population growth in the City and employment growth would be limited to a few personnel to operate the crematory. Therefore, the project would be consistent with the local and regional growth assumptions used in developing the Regional Ozone Plan and the SIP. In addition, as described in impact discussion b), below, the project would not result in a cumulatively considerable increase of any criteria pollutant. Therefore, the project would not conflict with or obstruct implementation of the applicable air quality plan and the impact would be less than significant.

- b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable federal or state ambient air quality standard?

Construction (Short-Term) Emissions

Less Than Significant Impact with Mitigation Incorporated. Construction of the project would involve the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for one day and one truck load of concrete to install a small pad for the two propane tanks.

According to the SMAQMD's CEQA Guide, projects that are 35 acres or less in size generally will not exceed the SMAQMD's construction NO_x or PM thresholds of significance. However, all construction projects regardless of the screening level are required to implement the SMAQMD's Basic Construction Emission Control Practices (also known as Best Management Practices [BMP]; SMAQMD 2020b). The BMPs satisfy the requirements of SMAQMD's Rule 403, *Fugitive Dust*, which requires every reasonable precaution not to cause or allow the emissions of fugitive dust from being airborne beyond the property line from which the emission originates. ROG emissions during construction are generally associated with the application of architectural coatings. The project does not propose any new structures and would not require substantial amounts of painting and would not result in significant emissions of ROGs. Therefore, construction of the project would not result in a cumulatively considerable net increase of any criteria pollutant and the impact would be less than significant with implementation of Mitigation Measure AIR-01.

Mitigation Measure AIR-01: Implement SMAQMD's Basic Construction Emission Control Practices.

City approval of grading and/or improvement plans for the proposed project shall include the following SMAQMD Basic Construction Emission Control Practices:

- All exposed surfaces shall be watered two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads.
- Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways shall be covered.
- Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited.
- Limit vehicle speeds on unpaved roads to 15 miles per hour.
- All roadways, driveways, sidewalks, parking lots shall be paved as soon as possible. In addition, building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- Minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes (as required by the state airborne toxics control measure [Title 13, Section 2485 of the California Code of Regulations]). Provide clear signage that posts this requirement for workers at the entrances to the site.

- Maintain all construction equipment in proper working condition according to manufacturer's specifications. The equipment shall be checked by a certified mechanic and determine to be running in proper condition before it is operated.

Operation (Long-Term) Emissions

Less than Significant. The project would result in long-term operational emissions from vehicles that drive to and from the project and from operation of the crematory.

Because there are no crematories currently operating in Folsom, demand for cremation services is filled by transporting the deceased to facilities outside of the City. Therefore, operations of the project would not result in new vehicle trips (nor the associated emissions in the region). Instead, the project would replace existing regional vehicle trips with shorter trips (and reduced associated emissions).

Operation of a propane-fired crematory would be considered a new stationary source of emissions. The project may be subject to SMAQMD's Rule 201, *General Permit Requirements*, and Rule 202, *New Source Review*. The project would be required to implement best available control technology (BACT) for the minimization of emissions. BACT for crematories is incorporated into the product design in the form of controls which ensure maintenance of the correct temperatures and cycle times, and a secondary combustion chamber which ensures oxygenation and complete combustions of all fuels. As described in the Methods sections above, Criteria pollutant and precursor emissions for long-term operation of the proposed crematory were calculated using propane combustion emissions factors from AP-42 and crematory emissions factors provided by SMAQMD. The project's calculated criteria and precursor operational emissions are compared to the SMAQMD thresholds in **Table 4**. A printout of the calculation sheets is included in Attachment A of the air quality report.

Table 4. Operational Criteria Pollutant and Precursor Emissions

Pollutant	Project Emissions	SMAQMD Threshold	Exceed Threshold?
Daily Emissions (pounds per day)			
ROG	0.1	65	No
NO _x	1.2	65	No
CO	0.9	None	No
SO _x	0.4	None	No
PM ₁₀	0.3	80	No
PM _{2.5}	0.3	82	No
Annual Emissions (tons per year)			
ROG	0.01	None	No
NO _x	0.15	None	No
CO	0.11	None	No
SO _x	0.05	None	No
PM ₁₀	0.03	14.6	No
PM _{2.5}	0.03	15	No

Source: SMAQMD 2020b; SMAQMD 2020c

As shown in **Table 4**, the project's operational emissions of criteria pollutants and precursors would not exceed the SMAQMD daily or annual thresholds. Therefore, the project's operational emissions would

not result in a cumulatively considerable net increase of any criteria pollutant and impacts would be less than significant.

c) Expose sensitive receptors to substantial pollutant concentrations?

Less Than Significant Impact. Crematories are a potential source of TACs as a result of trace metals and organic compounds that accumulate in the body and are released during combustion, and trace organic compounds that are formed in the combustion process. An HRA was conducted to determine potential community health risks from exposure to TACs emitted from the proposed crematory, as described in the Methods section above.

Health risks associated with cancer from development projects are estimated using the incremental excess cancer risk expressed as cancer cases per one million exposed individuals. The incremental excess cancer risk is an estimate of the chance a person exposed to specific sources of a TACs may have of developing cancer from that exposure beyond the individual's risk of developing cancer from existing background levels of pollutants in the ambient air. For context, the average cancer risk from TACs in the ambient air for an individual living in an urban area of California is 830 in 1 million (CARB 2015). Cancer risk estimates do not mean, and should not be interpreted to mean, that a person will develop cancer from estimated exposures to toxic air pollutants.

Health risks associated with chronic and acute effects from a development project are quantified using the maximum hazard index. A hazard index is the potential exposure to a substance divided by the reference exposure level (the level at which no adverse effects are expected). A hazard index of less than one indicates no adverse health effects are expected from the potential exposure to the substance. The maximum hazard index is the sum of hazard indices for pollutants with non-cancer health effects that have the same or similar adverse health effects.

The modeled point of maximum impact for the project (geographic point outside of the project site with the highest estimated incremental cancer risk and maximum hazard index) would be a point near the project boundary approximately 96 feet southeast of the proposed crematory exhaust stack, at approximately Universal Transverse Mercator (UTM) coordinates Zone 10, 657982 meters east, 4281757 meters north. The maximum health risk exposure at this point would be a residential incremental cancer risk of 3.2 in 1 million and a residential non-cancer chronic hazard index of 0.09. This point of maximum impact is in an area zoned as Open Space Conservation District containing dredge tailings from past gold mining. No residents or workers are anticipated to be at the point of maximum impact for prolonged periods.

The maximum estimated community incremental excess cancer, chronic and acute health risks due to exposure to the project TAC emissions from long term operation of the proposed crematory are presented in **Table 5**. These estimates are conservative (health protective) and assume that the resident or worker is outdoors for the entire exposure period. The modeled locations of the Maximum Exposed Individual Resident (MEIR) and the point of maximum impact, along with the residential cancer risk isopleths (contours of equal risk), are shown in Figure 4, *Cancer Risks*. The complete HRA model output, including tables of health risks for all modeled discrete receptors and isopleth figures for incremental cancer risk, non-cancer chronic hazard index and acute hazard index are included as Attachment B to the air quality report.

Table 5. Maximum Exposed Individual Incremental Cancer Risk and Hazard Index

	MEI Resident Cancer Risk	MEI Worker Cancer Risk	MEI Resident Chronic Hazard Index	MEI Worker Chronic Hazard Index	MEI Acute Hazard Index
Results	0.6 in 1 million	<0.1 in 1 million	0.02	0.02	0.20
Threshold	10 in 1 million	10 in 1 million	1	1	1
Exceed Threshold?	No	No	No	No	No

Source: Lakes AERMOD View version 9.8.3 and CARB ADMRT version 19121. See Attachment B for model inputs, outputs, and risk isopleths.

MEI = Maximum Exposed Individual.

As shown in **Table 5**, the maximum incremental increased cancer risks and maximum non-cancer chronic and acute hazard index due to exposure to TACs from long-term operation of the proposed crematory would not exceed the SMAQMD thresholds. Therefore, operation of the project would not result in the exposure of sensitive receptors to substantial TAC concentrations and the impact would be less than significant.

- d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less Than Significant Impact Diesel equipment could generate diesel exhaust odors during construction activities. The generation of odors during the construction period would be temporary, intermittent, and dispersed within a short distance from the active work area. Once operational, potential odors from human remains prior to cremation would be minimized either by immediately processing remains or by temporarily storing remains in the proposed refrigeration chiller. Operation of the crematory would not be a significant source odors or other emissions due to the BACT features of the crematory, including process temperature and cycle time controls, as well as secondary combustion chambers which ensure the complete combustion of all solids, liquids, and gaseous fuels. Therefore, the project would not result in other emissions (such as those leading to odors) adversely affecting a substantial number of people and the impact would be less than significant.

IV. BIOLOGICAL RESOURCES

BIOLOGICAL RESOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or US Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Have a substantial adverse effect on federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The project site features open space habitat consisting of maintained grass with an open canopy of a variety of native and exotic tree species. The property that encompasses the project site features an open cemetery, lawns, associated landscaping, and the existing shed in which the crematory would be installed. Existing landscaping at the cemetery and around the shed consists of mature broad-leaved, coniferous, and palm trees. Lands to the south and west of the property contain native oak/gray pine woodland habitat typical of riparian communities in the Sierra Nevada foothills. To the west of the project site, the Jediah Smith Memorial Trail and Lake Natoma run on a north/south axis. The open spaces to the south and west are a part of the American River Parkway operated by the California Department of Parks and Recreation.

There are no jurisdictional wetlands, riparian, or other special status habitats located on or immediately adjacent to the project site.

Regulatory Framework Related to Biological Resources

The City of Folsom regulates urban development through standard construction conditions and through mitigation, building, and construction requirements set forth in the Folsom Municipal Code. Required of all projects constructed throughout the City, compliance with the requirements of the City's standard conditions and the provisions of the Municipal Code avoids or reduces many potential environmental effects. No Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan has been approved for the City of Folsom.

State and Federal Endangered Species Acts

Special status species are protected by state and federal laws. The California Endangered Species Act (CESA; California Fish and Game Code Sections 2050 to 2097) protects species listed as threatened and endangered under CESA from harm or harassment. This law is similar to the Federal Endangered Species Act of 1973 (FESA; 16 USC 1531 et seq.) which protects federally threatened or endangered species (50 CFR 17.11, and 17.12; listed species) from take. For both laws, take of the protected species may be allowed through consultation with and issuance of a permit by the agency with jurisdiction over the protected species.

California Code of Regulations and California Fish and Game Code

The official listing of endangered and threatened animals and plants is contained in the California Code of Regulations Title 14 § 670.5. A state candidate species is one that the California Fish and Game Code has formally noticed as being under review by the California Department of Fish and Wildlife (CDFW) for inclusion on the state list pursuant to Sections 2074.2 and 2075.5 of the California Fish and Game Code. CDFW also designates Species of Special Concern that are not currently listed or candidate species.

Legal protection is also provided for wildlife species in California that are identified as "fully protected animals." These species are protected under Sections 3511 (birds), 4700 (mammals), 5050 (reptiles and amphibians), and 5515 (fishes) of the California Fish and Game Code. These statutes prohibit take or possession of fully protected species at any time. The CDFW is unable to authorize incidental take of fully protected species when activities are proposed in areas inhabited by these species. The CDFW has informed non-federal agencies and private parties that they must avoid take of any fully protected species. However, Senate Bill (SB) 618 (2011) allows the CDFW to issue permits authorizing the incidental take of fully protected species under the CESA, so long as any such take authorization is issued in conjunction with the approval of a Natural Community Conservation Plan that covers the fully protected species (California Fish and Game Code Section 2835).

California Native Plant Protection Act

The California Native Plant Protection Act of 1977 (California Fish and Game Code Sections 1900 to 1913) requires all state agencies to use their authority to implement programs to conserve endangered and otherwise rare species of native plants. Provisions of the act prohibit the taking of listed plants from the wild and require notification of CDFW at least 10 days in advance of any change in land use other than changing from one agricultural use to another, which allows CDFW to salvage listed plants that would otherwise be destroyed.

Nesting and Migratory Birds

Nesting birds are protected by state and federal laws. California Fish and Game Code (§3503, 3503.5, and 3800) prohibits the possession, incidental take, or needless destruction of any bird nests or eggs; Fish and Game Code §3511 designates certain bird species “fully protected” (including all raptors), making it unlawful to take, possess, or destroy these species except under issuance of a specific permit. Under the Migratory Bird Treaty Act (MBTA) of 1918 (16 USF §703-711), migratory bird species and their nests and eggs that are on the federal list (50 CFR §10.13) are protected from injury or death, and project-related disturbance must be reduced or eliminated during the nesting cycle.

City of Folsom Tree Preservation Ordinance

Requirements related to biological resources also include protection of existing trees and specifies measures necessary to protect both ornamental and native oak trees.

Chapter 12.16 of the Folsom Municipal Code, Tree Preservation, further regulates the cutting or modification of trees, including oaks and specified other trees; requires a Tree Permit prior to cutting or modification; and establishes mitigation requirements for cut or damaged trees (City of Folsom 2018b). The Tree Preservation Ordinance establishes policies, regulations, and standards necessary to ensure that the City will continue to preserve and maintain its “urban forests”. Anyone who wishes to perform “Regulated Activities” on “Protected Trees” must apply for a permit with the City. Regulated activities include:

- Removal of a Protected Tree
- Pruning/trimming of a Protected Tree
- Grading or trenching within the Protected zone

Protected trees include:

- Native oak trees with a diameter of 6 inches or larger at breast height for single trunk trees or 20 inches or larger at combined diameter at breast height of native oak multi-trunk trees
- Heritage oak trees are native oaks with a trunk diameter of 19 inches or larger at breast height or native oaks with a multi-trunk diameter of 38 inches or larger at breast height
- Landmark trees are a tree or group of trees determined by the City Council to be a significant community benefit
- Street trees within the tree maintenance strip or contained on the master tree list

Jurisdictional Waters

Any person, firm, or agency planning to alter or work in “waters of the U.S.,” including the discharge of dredged or fill material, must first obtain authorization from the U.S. Army Corps of Engineers (USACE) under Section 404 of the Clean Water Act (CWA). Section 401 requires an applicant for a federal license or permit that allows activities resulting in a discharge to waters of the U.S. to obtain a state certification that the discharge complies with other provisions of the CWA. The Regional Water Quality Control Board (RWQCB) administers the certification program in California. The RWQCB also regulates discharges of pollutants or dredged or fill material to waters of the State which are more broadly defined than waters of the U.S.

Biological Resources Present in the Project Site

Land Cover Type

The land cover type present on the project site is mostly maintained lawn with an open overstory of native and exotic trees. The land is within the Open Space/Public (OS/P) Primary Area of the Historic District with underlying zoning of Open Space and Conservation (OSC). Land cover adjacent to the project site is primarily developed to the north and east, oak/gray pine woodland to the south and west, along with the Jedediah Smith Memorial Trail and Lake Natoma that run on a north-south axis to the west of the project site.

Wildlife

The project site provides habitat for disturbance-tolerant wildlife species typical of urban and suburban areas. Species present likely include resident and migratory passerines, raptors, and waterfowl, along with small mammals and reptiles adapted to a moderate level of human activity.

Special-Status Species with the Potential to Occur

The regionally occurring special-status species in the Folsom area are typically associated with aquatic habitats including perennial waterbodies, wetlands, and/or vernal pools, or are associated with relatively undisturbed contiguous stands of oak or riparian woodland. The project site is developed and lacks any aquatic habitats. Species expected to use the site would be highly adaptable common species tolerant of disturbance and urban areas.

No special-status wildlife species are expected to occur on the project site with the possible exception of a special-status bird using the project site as a temporary stopover in transit to or from more suitable habitats.

Other Migratory Birds and Nesting Birds

While no special-status bird species are expected to nest on the project site, marginal habitat is present on the site for a variety of common bird species that nest in trees, on buildings, or on the ground in urban and suburban areas.

Protected Trees

No site grading or removal of any trees, protected or otherwise, is proposed.

Jurisdictional Waters

No potential waters of the U.S. and/or State are present on the project site.

Evaluation of Biological Resources

- a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

Less Than Significant. No habitat modifications are proposed. No sensitive species are expected to use the site, although birds protected under the MBTA may use the vicinity of the site for roosting, foraging, and nesting. While the delivery and installation of the crematory would likely result in a small increase in vehicles and workers visiting the site, those increases are expected to be insignificant relative to the number of workers and members of the public who visit the cemetery each day. Birds roosting in nearby trees may be temporarily flushed by the arrival of workers or equipment, but any birds using the site are likely already accustomed to a moderate level of human activity. A less than significant impact would occur.

- b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

No Impact. No external modifications to the shed are proposed beyond the addition of two 250-gallon propane tanks on a concrete pad along the edge of the building and the addition of the proposed stack to the roof. Those modifications would occur in an area already subject to vehicle and worker visits and maintenance activity and would not affect any native habitat in the vicinity of the project site. No modifications to any habitat, vegetation, or landscaping are proposed. Therefore, no impact would occur.

- c) Have a substantial adverse effect on federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal wetlands, etc.) through direct removal, filling, hydrological interruption, or other means?

No Impact. No potential waters of the U.S. or State exist on the project site. No modification of any habitat is proposed. Therefore, there would be no impact.

- d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

No Impact. No external modifications are proposed except for the installation of two 250-gallon propane tanks on a concrete pad adjacent to a building already in use as a service shed. No modification of any landscaping, habitat, or vegetation is proposed as part of this project. There would be no impact.

- e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

No Impact. No modifications to, or removals of, any habitat, vegetation, trees, or landscaping are proposed. Therefore, no impact would occur.

- f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. No Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan has been approved for the City of Folsom. Therefore, no impacts to an existing adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan would occur.

V. CULTURAL RESOURCES

CULTURAL RESOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The Cultural Resources section of this document is based upon the approach, methodology, and conclusions outlined in the project-specific Cultural Resources Inventory Report prepared by ECORP Consulting, Inc. (2020). All phases of the cultural resources investigation were conducted or supervised by Registered Professional Archaeologist (RPA) Lisa Westwood, who meets the Secretary of the Interior’s Professional Qualifications Standards for prehistoric and historical archaeology. Fieldwork and report contributions were conducted by Staff Archaeologist Laurel Zickler-Martin, RPA. Though the document in its entirety is incorporated by reference, the report itself is confidential and is not included as an appendix to this Initial Study.

Environmental Setting

To meet the regulatory requirements of this project, the cultural resources investigation was conducted pursuant to the provisions for the treatment of cultural resources contained within Section 106 of the National Historic Preservation Act (NHPA) and in CEQA (Public Resources Code [PRC] § 21000 et seq.). The goal of NHPA and CEQA is to develop and maintain a high-quality environment that serves to identify the significant environmental effects of the actions of a proposed project and to either avoid or mitigate those significant effects where feasible. CEQA pertains to all proposed projects that require State or local government agency approval, including the enactment of zoning ordinances, the issuance of conditional use permits, and the approval of development project maps. The NHPA pertains to projects that entail some degree of federal funding or permit approval.

The NHPA and CEQA (Title 54 U.S. Code [USC] Section 100101 et seq. and Title 14, California Code of Regulations [CCR], Article 5, § 15064.5) apply to cultural resources of the historical and pre-contact periods. Any project with an effect that may cause a substantial adverse change in the significance of a cultural resource, either directly or indirectly, is a project that may have a significant effect on the environment. As a result, such a project would require avoidance or mitigation of impacts to those affected resources. Significant cultural resources must meet at least one of four criteria that define eligibility for listing on either the California Register of Historical Resources (CRHR) (PRC § 5024.1, Title 14 CCR, § 4852) or the National Register of Historic Places (NRHP) (36 Code of Federal Regulations [CFR] 60.4):

- 1) is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
- 2) is associated with the lives of persons important in our past;
- 3) embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
- 4) has yielded, or may be likely to yield, information important in prehistory or history.

Cultural resources eligible for listing on the NRHP are considered Historic Properties under 36 Code of Federal Regulations Part 800 and are automatically eligible for the CRHR. Resources listed on or eligible for inclusion in the CRHR are considered Historical Resources under CEQA.

The City of Folsom Standard Construction Specifications were developed and approved by the City of Folsom in May 2004 and updated in April 2015. They include Article 11 - Cultural Resources, which provides direction on actions to be taken in the event that materials are discovered that may ultimately be identified as a historical or archaeological resource, or human remains (City of Folsom 2015).

Ethnography

Following is a brief summary providing a context in which to understand the background and relevance of resources that may occur in the general project area. This section is not intended to be a comprehensive review of the current resources available; rather, it serves as a general overview. Further details can be found in ethnographic studies, mission records, and major published sources.

Regional Background

California has been occupied by humans for approximately the past 10,000 years. Early groups between 10,000 and 8,000 years before present (BP) were largely mobile, small in number, and relied upon big game hunting and a limited exploitation of small game and plant resources. Between 8,000 and 5,000 BP, groups become more sedentary and stable and shifted to a greater reliance on plant resources and milling seeds and other plant matter. After about 5,000 BP, groups became more specialized, population densities increased, and regional cultures and languages developed that would form the basis for the societies encountered at the time of first European contact. Current patterns of climate and vegetation communities were in place by approximately 3,000 BP.

Nisenan or Southern Maidu

Ethnographically, the project area is in the southwestern portion of the territory occupied by the Penutian-speaking Nisenan. Nisenan inhabited the drainages of the Yuba, Bear, and American rivers, and also the lower reaches of the Feather River, extending from the east banks of the Sacramento River on the west to the mid to high elevations of the western flank of the Sierra Nevada to the east (Wilson and Towne 1978). The territory extended from the area surrounding the current city of Oroville on the north to a few miles south of the American River in the south.

Individual and extended families "owned" hunting and gathering grounds, and trespassing was discouraged (Kroeber 1925; Wilson and Towne 1978). Residence was generally patrilocal, but couples had a choice in the matter (Wilson and Towne 1978). The basic social and economic group for the

Nisenan was the family or household unit. The nuclear and/or extended family formed a corporate unit. These basic units were combined into distinct village or hamlet groups, each largely composed of consanguine relatives (Beals 1933; Littlejohn 1928). Lineage groups were important political and economic units that combined to form tribelets, which were the largest sociopolitical unit identified for Nisenan (Wilson and Towne 1978). Each tribelet had a chief or headman who exercised political control over all villages within it. Villages typically included family dwellings, acorn granaries, a sweathouse, and a dance house, owned by the chief. The role of chief seems to have been an advisory role with little direct authority (Beals 1933) but with the support of the shaman and the elders, the word of the chief became virtually the law (Wilson and Towne 1978). Tribelets assumed the name of the head village where the chief resided (Beals 1933; Levy 1978).

The office of tribelet chief was hereditary, with the chieftainship being the property of a single patrilineage within the tribelet. Tribelet populations of Valley Nisenan were as large as 500 persons (Wilson and Towne 1982), while foothill and mountain tribelets ranged between 100 and 300 persons (Littlejohn 1928; Levy 1978). Each tribelet owned a bounded tract of land and exercised control over its natural resources (Littlejohn 1928). Beals (1933) estimated that Nisenan tribelet territories averaged approximately 10 miles along each boundary, or 100 square miles, with foothill territories tending to encompass more area than mountain territories.

Nisenan practiced seasonal migration, a subsistence strategy involving moving from one area or elevation to another to harvest plants, fish, and game across contrasting ecosystems that were in relatively close proximity to each other. Valley Nisenan generally did not range beyond the valley and lower foothills, while foothill and mountain groups ranged across a more extensive area that included jointly shared territory whose entry was subject to traditional understandings of priority of ownership and current relations between the groups (d'Azevedo 1963).

Important food items included small and large game, fish, acorns, roots, pine nuts, and various hardwood nuts. Further resources were obtained from coastal groups and trans-Sierran groups through trade networks. Prescribed fire was used to maintain hunting and gathering grounds and to enhance opportunities to produce and gather acorns.

The Spanish arrived on the central California coast in 1769. Early contact with the first Spanish explorers to enter California was limited to the peripheries of Nisenan territory; they occurred mainly to the south on lands of the Miwok which had been explored by José Canizares in 1776, with only ephemeral explorations into Nisenan lands. There are no records of Nisenan groups being removed to the missions. They did, however, receive escapees from the missions, as well as pressure of displaced Miwok populations on their southern borders. The first known occupation by Euro-Americans was marked by American and Hudson Bay Company fur trappers in the late 1820s establishing camps in Nisenan territories. This occupation was thought to have been peaceful (Wilson and Towne 1978).

However, in the coming decades disease decimated the Nisenan of the Sacramento Valley, and many of the survivors retreated into the hills. Both they and mountain groups of Nisenan were met with persecution and attacks from settlers following the 1848 discovery of gold. The remaining Nisenan were relegated to working in agriculture, logging, ranching, or domestic pursuits (Wilson and Towne 1978). They and their descendants faced poor living and working conditions in the coming decades, although some customs and traditional practices have been preserved through the 21st century.

Regional History

The first European to visit California was Spanish maritime explorer Juan Rodriguez Cabrillo in 1542. He visited San Diego Bay, Catalina Island, San Pedro Bay, and the northern Channel Islands. The English adventurer Francis Drake visited the Miwok Native American group at Drake's Bay or Bodega Bay in 1579.

Colonization of California began with the Spanish Portolá land expedition. The expedition, led by Captain Gaspar de Portolá of the Spanish army and Father Junipero Serra, a Franciscan missionary, explored the California coast from San Diego to the Monterey Bay Area in 1769. As a result of this expedition, Spanish missions to convert the native population, presidios (forts), and pueblos (towns) were established. The Franciscan missionary friars established 21 missions in Alta California (the area north of Baja California) beginning with Mission San Diego in 1769 and ending with the mission in Sonoma established in 1823. The purpose of the missions and presidios was to establish Spanish economic, military, political, and religious control over the Alta California territory. No missions were established in the Central Valley; the closest were in the Bay Area. The Spanish did not establish any settlements in the Central Valley.

After Mexico became independent from Spain in 1821, what is now California became the Mexican province of Alta California with its capital at Monterey. In 1827, American trapper Jedediah Smith traveled along the Sacramento River and into the San Joaquin Valley to meet other trappers of his company who were camped there, but no permanent settlements were established by the fur trappers (Thompson and West 1880).

The Mexican government closed the missions in the 1830s and former mission lands, as well as previously unoccupied areas, were granted to retired soldiers and other Mexican citizens for use as cattle ranches. Much of the land along the coast and in the interior valleys became part of Mexican land grants or "ranchos" (Robinson 1948).

John Sutter, a European immigrant, built a fort at the confluence of the Sacramento and American rivers in 1839 and petitioned the Mexican governor of Alta California for a land grant, which he received in 1841. Sutter built a flour mill and grew wheat near the fort (Bidwell 1971). Gold was discovered in the flume of Sutter's lumber mill at Coloma on the South Fork of the American River in January 1848 (Marshall 1971). The discovery of gold initiated the 1849 California Gold Rush, which brought thousands of miners and settlers to the Sierra foothills east and southeast of Sacramento.

The American period began when the Treaty of Guadalupe Hidalgo was signed between Mexico and the U.S. in 1848. As a result of the treaty, Alta California became part of the U.S. as the territory of California. Rapid population increase occasioned by the Gold Rush of 1849 allowed California to become a state in 1850. Most Mexican land grants were confirmed to the grantees by U.S. courts, but usually with more restricted boundaries.

Project Area History

The project area is located within the northern portion of the former 35,521-acre Rio de los Americanos land grant, which stretches from Folsom Lake in the northeast to a southwestern point nearly reaching modern-day Florin Road, approximately 3.3 miles south of central Rosemont and 3.8 miles east of Florin. In 1848, Captain Joseph Folsom pursued ownership of the Rio de los Americanos. He died in 1855, and the land grant was subsequently sold, piecemeal, for developments in agriculture, mining endeavors,

and quarrying of granite. Originally named Granite City, the city of Folsom was named for the captain in the year he died.

City of Folsom History

The first railroad in California was built from Sacramento to Folsom in 1856 by the Sacramento Valley Railroad Company (Robertson 1998). Other railroads soon connected Folsom with additional communities in the Sacramento Valley and surrounding foothills. Folsom became a transportation hub and supply center for gold miners.

Folsom State Prison opened in 1880 on 40 acres of land (California Department of Corrections [CDCR] 2010a). When it opened, it housed 44 inmates in the State's first high-security prison. Although authorized by the State legislature in 1858, construction did not begin until 1878. A dam on the American River and a hydroelectric generation facility were built by inmates (CDCR 2010b). Electricity from the Folsom Powerhouse was transmitted 22 miles to Sacramento on July 13, 1895 (American Society of Mechanical Engineers 1976). Folsom was incorporated as a City in 1945. Folsom Dam was built in 1955, creating Folsom Lake. The dam was for flood control and to provide hydroelectricity. The largest employer in the area is Intel Corporation, which built a facility in the southern part of Folsom in 1984. Folsom continues to grow as an upscale community within the Sacramento Metropolitan Area.

History of Folsom Mining

The vicinity of the project area was used historically for mining, largely by the Natomas Company, who employed broad scale dredge mining in the first half of the twentieth century.

During the early mining period of the late 1840s and early 1850s, only the creeks and streams were mined, using pans, rockers, and hand-dug shallow diggings. Two historic gold mining districts were present in Sacramento County - the Folsom, or American River, District and the Michigan Bar District (Clark 2005). In 1853, the Natoma Water and Mining Company built a system of ditches, north of the current project area, to feed water from the American River and nearby creeks into the prairie and pasture lands that were known to have gold rich deposits. Most of the shallow gold deposits had been exhausted by 1865, and drift mining, which consisted of digging shafts down to depths of 20 feet and below, resumed until the late 1890s.

The project area itself is surrounded on the west and south by dredge mining tailings and the parcel is situated along a perennial waterway; these locations were appealing locations for miners to seek gold bearing deposits. All mining operations in the immediate vicinity of the project site had ceased by 1962.

Chinese Influence on Folsom

Chinese workers, some already present in California, greatly increased in numbers following the discovery of gold. Chinese miners often utilized their skills and diligence to successfully pursue mining claims that had been overlooked by white miners. Much of the money that was made from mining was sent in remittances to family members still in China. In 1878, there were over 3,500 Chinese mining in and around Folsom. When the gold began to run out, the Chinese worked at many other jobs, including such tasks as building the first Delta levees and constructing the transcontinental railroad. They also developed small businesses becoming laundrymen, cooks, storekeepers, farmers, and fishermen. Folsom once had a Chinese community numbering about 2,500 people, complete with businesses and community institutions. The Chung Wah Chinese Cemetery is listed on the National Register of Historic

Places and is a state registered landmark. It is adjacent to the project area (PAR Environmental Services, Inc. 1995).

History of Lakeside Memorial Lawn

Not much information in academic or gray literature exists on the history of the Lakeside Memorial Lawn Cemetery. The oldest section of the Cemetery evolved from the Negro Bar mining camp internments, with the first internment being in 1849 or shortly thereafter. The Cemetery is associated with the Miller Family. Jacob Miller, a German immigrant, opened a furniture and casket shop at 709 Sutter Street in 1869 and then transitioned the business into caskets and undertaking by the early 1880s. After his passing in 1905, ownership of the business transferred first to his son, Oscar Miller, then to longtime employee Robert Claney in 1962 (Scott 2020).

The cemetery represents a combination of several old Folsom cemeteries, including the Masonic, Odd Fellows, Jewish, Citizen's, and Cook's cemeteries. Lakeside Memorial Lawn is Folsom's only active historic cemetery.

Cultural Resources Surveys

The Area of Potential Effects (APE) consists of the horizontal and vertical limits of a project and includes the area within which significant impacts or adverse effects to Historical Resources or Historic Properties could occur as a result of the project. The APE is defined for projects subject to regulations implementing Section 106 (federal law and regulations). For projects subject to the CEQA, the term project area is used rather than APE. For the purpose of this document, the terms "project area" and APE are interchangeable. When referring to the larger Lakeside Memorial Lawn facility, within which the project area is situated, the term property is used.

Records Searches

ECORP requested a records search for the property from the North Central Information Center (NCIC) of the California Historical Resources Information System (CHRIS) at California State University-Sacramento on October 30, 2020 (NCIC search #SAC-20-152). The purpose of the records search was to determine the extent of previous surveys within a 0.25-mile (400-meter) radius of the property, and whether previously documented pre-contact or historic archaeological sites, architectural resources, or traditional cultural properties exist within this area.

In addition to the official records and maps for archaeological sites and surveys in Sacramento County, the following historic references were also reviewed: *Historic Property Data File for Sacramento County* (OHP 2012); *The National Register Information System* (National Park Service [NPS] 2020); *Office of Historic Preservation, California Historical Landmarks* (OHP 2019); *California Historical Landmarks* (OHP 1996 and updates); *California Points of Historical Interest* (OHP 1992 and updates); *Directory of Properties in the Historical Resources Inventory* (1999); *Caltrans Local Bridge Survey* (Caltrans 2019); *Caltrans State Bridge Survey* (Caltrans 2018); and *Historic Spots in California* (Kyle 2002).

Other references examined include a RealQuest Property Search and historic General Land Office (GLO) land patent records (Bureau of Land Management [BLM] 2020). Several historic maps and historic and recent aerial photographs were also reviewed.

The results of the records search indicate that the property has been previously surveyed for cultural resources, but the survey was performed 25 years ago under obsolete standards, and long prior to the

consideration of the type of project activity being currently proposed. Therefore, a pedestrian survey of the property was conducted for the current project under current protocols.

Native American Heritage Commission Sacred Lands File Coordination

ECORP contacted the California Native American Heritage Commission (NAHC) on October 26, 2020 to request a search of the Sacred Lands File for the property. This search was to determine whether or not Sacred Lands have been recorded by California Native American tribes within the property, because the Sacred Lands File is populated by members of the Native American community who have knowledge about the locations of tribal resources. In requesting a search of the Sacred Lands File, ECORP solicited information from the Native American community regarding tribal cultural resources, but the responsibility to formally consult with the Native American community lies exclusively with the federal and local agencies under applicable State and federal law. Results of the search were received on November 10, 2020. The search failed to reveal the presence of Native American cultural resources in the project area. For more information, including a description of official consultation with Native tribes, see Section 9.0.XVIII, Tribal Cultural Resources.

Other Interested Party Consultation

ECORP mailed letters to the Sacramento County Historical Society and the Folsom Historical Society on October 26, 2020 to solicit comments or obtain historical information that the repository might have regarding events, people, or resources of historical significance in the area. No responses to the letters sent to the Folsom Historical Society or the Sacramento County Historical Society have been received as of the preparation of this document.

Pedestrian Survey

On November 2, 2020, ECORP subjected the property to pedestrian survey under the guidance of the *Secretary of the Interior's Standards for the Identification of Historic Properties* (NPS 1983) using transects spaced 15 meters apart. ECORP expended less than half of one person-day in the field. At that time, the ground surface was examined for indications of surface or subsurface cultural resources. The general morphological characteristics of the ground surface were inspected for indications of subsurface deposits that may be manifested on the surface, such as circular depressions or ditches. Whenever possible, the locations of subsurface exposures caused by such factors as rodent activity, water or soil erosion, or vegetation disturbances were examined for artifacts or for indications of buried deposits. No subsurface investigations or artifact collections were undertaken during the pedestrian survey. The project area was photographed, and survey coverage mapped using a handheld Global Positioning System receiver.

Ground visibility in the cemetery itself was very limited, as the entire area is either paved or covered in manicured lawn; the only visible soil was immediately surrounding headstones and in sparse patches at the edges of the lawn.

Built Environment Resources

ECORP researched the shed itself to determine if it is old enough to warrant further evaluation as a cultural resource by an architectural historian. According to modern aerial photographs of the property, the shed was installed sometime between May 1993 and August 1998. As further supported by field inspection, the shed is not old enough to be considered a potential cultural resource, and therefore, it

was not recorded or considered further. Should the proposed project include demolition or remodeling of the shed, such activity would not have an impact on a cultural resource.

Evaluation of Cultural Resources

- a) Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?

Less Than Significant Impact. Historical resources are outside of the site of the proposed project. No precontact or historic resources were discovered during the pedestrian survey conducted by ECORP. The existing shed is not old enough to warrant consideration as a potential historic or cultural resource. Therefore, project impacts to historic resources would be less than significant.

- b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

Less Than Significant Impact with Mitigation. In accordance with CEQA Guidelines, ECORP has assessed the project area for the presence of archaeological resources. The project site itself is not in an area otherwise suspected to contain unknown archaeological resources. The site survey and surveys of written records, historical maps and photographs, and outreach to groups with knowledge of the area's history all suggest that no known or previously unknown archaeological resources would be encountered or disturbed during construction. Ground disturbing activity would be limited to shallow ground clearing and site prep for the installation of a concrete pad to support two propane tanks. Still, the potential exists for inadvertent discovery of archaeological resources during project construction. The implementation of standard archaeological resource construction mitigation (Mitigation Measures CUL-01 and CUL-02) would ensure that potential impacts would be less than significant.

Mitigation Measure CUL-01: Avoid impacts to previously unknown archaeological resources.

Prior to the initiation of ground disturbing activity, a qualified professional archaeologist shall be retained to develop and deliver a contractor awareness training program to construction supervisors. The purpose of the training is to ensure that contractors are aware of the need to limit their activity, including equipment storage, staging, parking, and ground disturbance to only those locations identified as work areas on the official site plans.

Prior to the initiation of ground disturbing activity, a qualified professional archaeologist shall be retained to monitor the installation of temporary high-visibility exclusionary fencing along the toe of existing mine tailings features adjacent to the shed. The fencing shall remain in place until all project activities are completed. City inspectors shall include a verification of the fencing during all required inspections. In the event that exclusionary fencing has failed, the construction supervisor must re-install or repair the fence within 24 hours.

Mitigation Measure CUL-02: Minimize impacts to any previously unknown archaeological resources discovered during construction.

If subsurface deposits believed to be cultural in origin are discovered during construction, all work must halt within a 50-foot radius of the discovery. A qualified professional archaeologist, meeting the Secretary of the Interior's Professional Qualification Standards for pre-contact and historic archaeologist, shall be retained to evaluate the significance of the find, and shall have the authority to

modify the no-work radius as appropriate, using professional judgment. The following notifications shall apply, depending on the nature of the find:

- If the professional archaeologist determines that the find does not represent a cultural resource, work may resume immediately, and no agency notifications are required.
- If the professional archaeologist determines that the find does represent a cultural resource from any time period or cultural affiliation, he or she shall immediately notify the City to consult on a finding of eligibility and implement appropriate treatment measures, if the find is determined to be a Historical Resource under CEQA, as defined in Section 15064.5(a) of the CEQA Guidelines or a historic property under Section 106 NHPA, if applicable. Work may not resume within the no-work radius until the City, through consultation as appropriate, determines that the site either: 1) is not an Historical Resource under CEQA, as defined in Section 15064.5(a) of the CEQA Guidelines; or 2) that the treatment measures have been completed to its satisfaction.

c) Disturb any human remains, including those interred outside of dedicated cemeteries?

Less Than Significant Impact with Mitigation. Though the project site is located on the property of the Lakeside Memorial Lawn Cemetery, no human remains are known to exist in the immediate vicinity of the project site. No evidence of potential human remains outside of marked graves was found in the project area during the cultural resources site survey by ECORP's archaeologist. Ground disturbing activity would be limited to shallow ground clearing and site prep for the installation of a concrete pad to support two propane tanks. However, there is always the possibility that subsurface construction activities associated with the proposed project, specifically the preparation of the site for the small concrete pad, could potentially damage or destroy previously undiscovered human remains. This is a potentially significant impact. However, if human remains were discovered, implementation of Mitigation Measure CUL-03 would reduce this potential impact to a less than significant level.

Mitigation Measure CUL-03: Avoid and minimize impacts related to accidental discovery of human remains.

If subsurface deposits believed to be cultural or human in origin are discovered during construction, all work must halt within a 50-foot radius of the discovery. A qualified professional archaeologist, meeting the Secretary of the Interior's Professional Qualification Standards for pre-contact and historic archaeologist, shall be retained to evaluate the significance of the find, and shall have the authority to modify the no-work radius as appropriate, using professional judgment. The following notifications shall apply, depending on the nature of the find:

- If the find includes human remains, or remains that are potentially human, he or she shall ensure reasonable protection measures are taken to protect the discovery from disturbance (AB 2641). The archaeologist shall notify the Sacramento County Coroner (per §7050.5 of the Health and Safety Code). The provisions of §7050.5 of the California Health and Safety Code, §5097.98 of the California PRC, and Assembly Bill 2641 will be implemented. If the Coroner determines the remains are Native American and not the result of a crime scene, the Coroner will notify the NAHC, which then will designate a Native American Most Likely Descendant (MLD) for the project (§5097.98 of the PRC). The designated MLD will have 48 hours from the time access to the property is granted to make recommendations concerning treatment of the remains. If the landowner does not agree with the recommendations of the MLD, the NAHC can mediate

(§5097.94 of the PRC). If no agreement is reached, the landowner must rebury the remains where they will not be further disturbed (§5097.98 of the PRC). This will also include either recording the site with the NAHC or the appropriate Information Center; using an open space or conservation zoning designation or easement; or recording a reinternment document with the county in which the property is located (AB 2641). If the Coroner determines that the remains are human but are not Native American, then the Coroner will direct subsequent steps to address the discovery. Work may not resume within the no-work radius until the City, through consultation as appropriate, determines that the treatment measures have been completed to its satisfaction.

VI. ENERGY

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

Electricity

California's electricity needs are satisfied by a variety of entities, including investor-owned utilities, publicly owned utilities, electric service providers and community choice aggregators. In 2019, the California power mix totaled 277,704 gigawatt hours (GWh). In-state generation accounted for 200,475 GWh, or 72 percent, of the state's power mix. The remaining electricity came from out-of-state imports (CEC 2020a). **Table 6** provides a summary of California's electricity sources as of 2019.

Table 6. California Electricity Sources 2019

Fuel Type	Percent of California Power
Coal	2.96%
Large Hydro	14.62%
Natural Gas	34.23%
Nuclear	8.98%
Oil	0.01%
Other (Petroleum Coke/Waste Heat)	0.15%
Renewables	31.70%

Source: CEC 2020a

Natural Gas

Natural gas provides the largest portion of the total in-state capacity and electricity generation in California, with nearly 45 percent of the natural gas burned in California used for electricity generation in a typical year. Much of the remainder was consumed in the residential, industrial, and commercial sectors for uses such as cooking, space heating, and as an alternative transportation fuel. In 2012, total natural gas demand in California for industrial, residential, commercial, and electric power generation was 2,313 billion cubic feet per year (bcf/year), up from 2,196 bcf/year in 2010 (CEC 2020b).

Transportation Fuels

Transportation accounts for a major portion of California's energy budget. Automobiles and trucks consume gasoline and diesel fuel, which are nonrenewable energy products derived from crude oil. Gasoline is the most used transportation fuel in California, with 97 percent of all gasoline being consumed by light-duty cars, pickup trucks, and sport utility vehicles (SUV). In 2015, 15.1 billion gallons of gasoline were sold in California (CEC 2020c). Diesel fuel is the second most consumed fuel in California, used by heavy-duty trucks, delivery vehicles, buses, trains, ships, boats, and farm and construction equipment. In 2015, 4.2 billion gallons of diesel were sold in California (CEC 2020d).

Proposed Project

Potential energy use of the proposed crematory and cooler were estimated for the proposed project using assumptions provided by the manufacturer and the applicant. During projected operation, the crematory would use approximately 900.00 MMBTU (million British Thermal Units) of energy and 9,835.9 gallons of propane per year. The cooler would use approximately 15,000 kWhr (kilowatt hour) of electricity or 51.18 MMBTU of energy per year. The total energy use of the proposed crematory and cooler would be approximately 951 MMBTU per year. Additional minor increases in energy consumption may result from added time which would require lighting within and around the shed to accommodate any workers while operating the facility, and a minor increase in gasoline and/or diesel usage as remains are brought to/from the crematory and as workers drive to and from the site.

Regulatory Framework

State Regulations

California Building Standards Code (California Code of Regulations, Title 24)

The 2019 Building Energy Efficiency Standards, comprising Title 24, Parts 1 and 6, of the California Code of Regulations, is mandatory statewide. Local government agencies may adopt and enforce energy efficiency standards for newly constructed buildings, additions, alterations, and repairs provided the California Energy Commission finds that the standards will require buildings to consume no more energy than permitted by Title 24, Part 6. Such local standards may include adopting the requirements of Title 24, Part 6 before their effective date, requiring additional energy conservation measures, or setting stricter energy budgets.

Local Regulations

City of Folsom General Plan

The City of Folsom 2035 General Plan Utilities Element provides the following goals and policies relative to energy.

Goal PFS 8.1: Provide for the energy and telecommunications needs of Folsom and decrease the dependence on nonrenewable energy sources through energy conservation, efficiency, and renewable resource strategies now and in the future.

- PFS 8.1.3 Renewable Energy: Promote efforts to increase the use of renewable energy resources such as wind, solar, hydropower, and biomass both in the community and in City operations, where feasible.
- PFS 8.1.4 Regional Energy Conservation: Partner with neighboring jurisdictions and local energy utilities (e.g., SMUD and PG&E) to develop, maintain, and implement energy conservation programs.
- PFS 8.1.5 PACE Program: Assist in implementing the Property Assessed Clean Energy (PACE) financing programs to provide residential and commercial property owners with energy efficiency and renewable energy financing opportunities.
- PFS 8.1.6 Energy-Efficient Lighting: Reduce the energy required to light Folsom's parks and public facilities by employing energy-efficient lighting technology.
- PFS 8.1.7 Energy Conservation in City Operations: Strive to achieve an overall 20 percent reduction in City facility energy usage by continuing to install energy efficiency upgrades in City facilities (buildings, parks, and infrastructure) and implementing programs to measure and track energy usage in City facilities.

Folsom Municipal Code

Chapter 14.19 of the City of Folsom Municipal Code, entitled ENERGY CODE, adopts by reference the California Energy Code, 2019 Edition, published as Part 6, Title 24, California Code of Regulations to require energy efficiency standards for structures.

Evaluation of Energy

- a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Less Than Significant Impact. Construction of the project would involve the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for a day and one truck load of concrete to install a small pad for the two propane tanks. Construction equipment would be relatively small, given the small size of the project, and construction would be of short duration. Construction equipment would require gasoline, diesel, and potentially other fuel sources to operate. Additionally, a small number of workers would need to drive to and from the site.

Construction of the project would incorporate on-site energy conservation features. The following practices would be implemented during project construction to reduce waste and energy consumption:

- Follow maintenance schedules to maintain equipment in optimal working order and rated energy efficiency, which would include, but not be limited to, regular replacement of filters, cleaning of compressor coils, burner tune-ups, lubrication of pumps and motors, proper vehicle maintenance, etc.;
- Reduce on-site vehicle idling; and,

- In accordance with CALGreen criteria as well as state and local laws, at least 50 percent of on-site construction waste and ongoing operational waste would be diverted from landfills through reuse and recycling.

The project's construction-related energy usage would not represent a significant demand on energy resources because it is temporary in nature and small in scale. Therefore, the project's construction-phase energy impacts would be less than significant.

Operation of the proposed project would increase the consumption of energy, primarily related to propane used to power the crematory and to a lesser extent from electricity used to power the cooler. During projected operation, the crematory would use approximately 900.00 MMBTU of energy and 9,835.9 gallons of propane per year. The cooler would use approximately 15,000 kWhr of electricity or 51.18 MMBTU of energy per year. The total energy use of the proposed crematory and cooler would be approximately 951 MMBTU per year. Additional minor increases in energy would include electricity to light the space when workers are present and a minor increase in worker vehicle trips to and from the site.

Additionally, adequate energy facilities are already located within and adjacent to the site serving the existing uses. The cemetery is currently served with an electricity supply from the Sacramento Municipal Utilities District (SMUD). Electrical connections already exist for the shed, and may be upgraded as needed as part of the proposed project. Thus, the incremental increase associated with implementation of the project would not require the construction of new energy facilities or sources of energy that would not otherwise be needed to serve the region. Therefore, energy impacts from project operation would be less than significant.

- b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

No Impact. The proposed project would not conflict with or obstruct a state or local plan for renewable energy efficiency. The project would conform to all applicable state, federal, and local laws and codes. Therefore, the proposed project would have no impact.

VII. GEOLOGY AND SOILS

GEOLOGY AND SOILS:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii. Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii. Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv. Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct and indirect risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

Geology

Information in the "Geology" subsection is derived from County of Sacramento's General Plan Safety Element (2017) unless noted otherwise. The project site is located near the border of the Great Valley and the Sierra Nevada Geomorphic Provinces. Specifically, the site is located within the Alluvial Plain Geomorphic Subunit of the Great Valley Province, just southwest of the boundary marking the start of the Sierra Nevada Province. Quaternary deposits of up to two million years old make up the soil of this subunit, which overlies layers of clay hardpans.

The project site lies within a seismically active region, as California has numerous faults that are considered active. An active fault is defined by the State Mining and Geology Board as one that has had surface displacement within Holocene time (about the last 11,000 years). Alquist-Priolo Earthquake Fault Zones are regulatory zones, delineated by the State Geologist, within which site-specific geologic studies are required to identify and avoid fault rupture hazards prior to subdivision of land and/or construction of most structures for human occupancy. There are no Alquist-Priolo Earthquake Fault Zones within Sacramento County. The nearest faults of any type to the project site are part of the Foothills Fault Zone's North Central Reach Section, and range from about 1.6 million to 130,000 years in age. (USGS 2014). They run north/northwest from Shingle Springs (El Dorado County) to Auburn (Placer County) and continue northward. They are not likely to be active. The nearest faults with recent earthquake activity, which are the most likely to cause shaking felt in the project area, are the Green Valley Fault Zone and the Greenville Fault Zone. Some faults in this area have experienced displacement within the past 200 years and are likely to be active; the nearest faults in these zones run north/northwest from Mt. Diablo to the southern Napa Valley (CGS 2020) and are located approximately 60 miles to the southwest of the project site.

Soils

The soil map unit for the project site is 245-Xerorthents, dredge tailings, 2 to 50 percent slopes. (NRCS 2020).

City Regulation of Geology and Soils

The City of Folsom regulates the effects of soils and geological constraints on urban development primarily through enforcement of the California Building Code, which requires the implementation of engineering solutions for constraints to urban development posed by slopes, soils, and geology. The City has additionally adopted a Grading Code (Folsom Municipal Code Section 14.29) that regulates grading citywide to control erosion, storm water drainage, revegetation, and ground movement.

Evaluation of Geology and Soils

- a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:
 - i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

Less Than Significant Impact. There are no known active faults crossing the property, and the project site is not located within an Alquist-Priolo Earthquake Fault Zone. Therefore, ground rupture is unlikely at the subject property, and impacts would be less than significant.

- ii. Strong seismic ground shaking?

Less Than Significant Impact. Though the project site is in an area of relatively low risk from most earthquakes, an earthquake of moderate to high magnitude generated within the region could still cause considerable ground shaking at the site (County of Sacramento 2017). To minimize potential ground shaking effects, crematory installation should be done in accordance with any relevant

provisions of the 2019 California Building Code, along with all safety recommendations from the manufacturer. Conformance to the current building code recommendations would minimize potential ground shaking impacts to a less-than-significant level.

iii. Seismic-related ground failure, including liquefaction?

Less Than Significant Impact. Soils most susceptible to liquefaction are clean, loose, saturated, uniformly graded, fine-grained sands. Soils at the project site are comprised of dredge tailings and other fill material; thus the soil is likely not loose nor uniformly graded. Further, only a small amount of superficial ground disturbance is proposed. Any impacts would be less than significant.

iv. Landslides?

No impact. The project site is generally flat, ranging in elevation from approximately 175 to 185 feet. The project is not located adjacent to any steep or unstable areas. No impact would occur.

b) Result in substantial soil erosion or the loss of topsoil?

Less Than Significant Impact. The only ground-disturbing work undertaken during this project would be the installation of two 250-gallon propane tanks and a concrete pad that would cover approximately 38.3 square feet of ground. All other work would take place inside an existing shed. Given the small area of soil disturbed, the short duration of the work to install the tanks, and the fact that the applicant is required to ensure that any relevant BMPs for soil conservation are adhered to, any impact is expected to be less than significant.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

Less Than Significant Impact. The site is not unstable and the project area is nearly flat. Though the project is located in an area that has a medium to high potential for subsidence (County of Sacramento 2017), soil at the project site is generally comprised of dredge tailings and other fill material (NRCS 2020). Given that, the risk for future subsidence at the project site is low. Further, the project would not disturb significant areas of ground (disturbance would be limited to approximately 38.3 square feet), would take place mostly within an existing structure, and would not add an excessive amount of weight to the site. Therefore, potential impacts from project implementation would be less than significant.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?

Less Than Significant Impact. New ground disturbing activity and construction are not proposed as part of the project, with the exception of the construction of an approximately 38.3 square foot concrete pad to support two 250-gallon propane tanks. All other activity would take place within an existing shed. Given that no issues with expansive soils have been identified regarding the existing shed or its immediate surroundings, and that new foundation construction as part of the proposed project would be limited to a small concrete pad, any impacts would be less than significant.

- e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

No Impact. Though no sanitary sewer line currently exists, there is no demand for one on the project site. No demand for the disposal of septic waste would be created as a result of this project. As no septic systems exist or are proposed, no impact would occur.

- f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

No Impact. The proposed project area is not located in an area that is considered likely to have paleontological resources present. Paleontological resources (fossils) are the remains and/or traces of prehistoric life. Fossils are typically preserved in layered sedimentary rocks, and the distribution of fossils is a result of the sedimentary history of the geologic units within which they occur. Vertebrate fossils have been documented in nine different locations within Sacramento County. The finds encompass several hundred specimens, all within the Riverbank Formation. Because of the large number of vertebrate fossils that have been recovered from the Riverbank Formation from Sacramento County and throughout the Central Valley, this formation is considered to have high sensitivity under criteria established by the Society of Vertebrate Paleontology (1995). Likewise, the Mehrten and Lone formations located within the 2035 Plan Evaluation Area may be considered to be sensitive for the presence of paleontological resources. Other geologic formations found in the 2035 Folsom Plan Evaluation Area, such as the Laguna Formation, mine/dredge tailings, and Holocene alluvium along local drainage features, would not be expected to contain fossils. The only type of soil found at the site is composed of dredge tailings and other urban fill material, and would not be expected to contain fossils. Further, very little ground disturbance is proposed.

Fossils of plants, animals, or other organisms of paleontological significance have not been discovered within the project area, nor has the project area been identified as being within any of the areas mentioned above where such discoveries are likely. Therefore, the project would not result in impacts to paleontological resources or unique geologic features.

VIII. GREENHOUSE GAS EMISSIONS

GREENHOUSE GAS EMISSIONS:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

The Greenhouse Gas Emissions section of this document is based upon the approach, methodology, results, and conclusions outlined in the project-specific Air Quality and Greenhouse Gas Assessment prepared by HELIX Environmental Planning (HELIX 2020). The Air Quality and Greenhouse Gas Assessment is included as **Appendix B**.

Environmental Setting

Global climate change refers to changes in average climatic conditions on Earth including temperature, wind patterns, precipitation, and storms. Global temperatures are moderated by atmospheric gases. These gases are commonly referred to as greenhouse gasses (GHG) because they function like a greenhouse by letting sunlight in but preventing heat from escaping, thus warming the Earth’s atmosphere.

GHGs are emitted by natural processes and human (anthropogenic) activities. Anthropogenic GHG emissions are primarily associated with: the burning of fossil fuels during motorized transport; electricity generation; natural gas consumption; industrial activity; manufacturing; and other activities such as deforestation, agricultural activity, and solid waste decomposition.

The GHGs defined under California’s Assembly Bill (AB) 32, described below, include carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFC), perfluorocarbons (PFC), and sulfur hexafluoride (SF₆). Each GHG differs in its ability to absorb heat in the atmosphere based on the lifetime, or persistence, of the gas molecule in the atmosphere. Estimates of GHG emissions are commonly presented in carbon dioxide equivalents (CO₂e), which weigh each gas by its global warming potential (GWP). Expressing GHG emissions in CO₂e takes the contribution of all GHG emissions to the greenhouse effect and converts them to a single unit equivalent to the effect that would occur if only CO₂ were being emitted. GHG emissions quantities in this analysis are presented in metric tons (MT) of CO₂e. For consistency with United Nations Standards, modeling and reporting of GHGs in California and the U.S. use the GWPs defined in the Intergovernmental Panel on Climate Change’s (IPCC) Fourth Assessment Report (IPCC 2007), as shown in **Table 7**.

Table 7. Global Warming Potential and Atmospheric Lifetimes

Greenhouse Gas	Atmospheric Lifetime (years)	GWP
Carbon Dioxide (CO ₂)	50-200	1
Methane (CH ₄)	12	25
Nitrous Oxide (N ₂ O)	114	298
HFC-134a	14	1,430
PFC: Tetrafluoromethane (CF ₄)	50,000	7,390
PFC: Hexafluoroethane (C ₂ F ₆)	10,000	12,200
Sulfur Hexafluoride (SF ₆)	3,200	22,800

Source: IPCC 2007.

HFC: hydrofluorocarbon; PFC: perfluorocarbon

Regulatory Setting

The primary GHG reduction legislation and plans (applicable to the project) at the State, regional, and local levels are described below. Implementation of California's GHG reduction mandates is primarily under the authority of the California Air Resources Board (CARB) at the state level, SMAQMD and the Sacramento Area Council of Governments (SACOG) at the regional level, and the City at the local level.

Executive Order S-3-05

On June 1, 2005, Executive Order (EO) S-3-05 proclaimed that California is vulnerable to climate change impacts. It declared that increased temperatures could reduce snowpack in the Sierra Nevada, further exacerbate California's air quality problems, and potentially cause a rise in sea levels. To avoid or reduce climate change impacts, EO S-3-05 calls for a reduction in GHG emissions to the year 2000 level by 2010, to year 1990 levels by 2020, and to 80 percent below 1990 levels by 2050. Executive Orders are not laws and can only provide the governor's direction to state agencies to act within their authority to reinforce existing laws.

Assembly Bill 32 – Global Warming Solutions Act of 2006

The California Global Warming Solutions Act of 2006, widely known as AB 32, requires that CARB develop and enforce regulations for the reporting and verification of statewide GHG emissions. CARB is directed by AB 32 to set a GHG emission limit, based on 1990 levels, to be achieved by 2020. The bill requires CARB to adopt rules and regulations in an open public process to achieve the maximum technologically feasible and cost-effective GHG emission reductions.

Executive Order B-30-15

On April 29, 2015, EO B-30-15 established a California GHG emission reduction target of 40 percent below 1990 levels by 2030. The EO aligns California's GHG emission reduction targets with those of leading international governments, including the 28 nation European Union. California is on track to meet or exceed the target of reducing GHGs emissions to 1990 levels by 2020, as established in AB 32. California's new emission reduction target of 40 percent below 1990 levels by 2030 will make it possible to reach the goal established by EO S-3-05 of reducing emissions 80 percent under 1990 levels by 2050.

Senate Bill 32

Signed into law by Governor Brown on September 8, 2016, Senate Bill (SB) 32 (Amendments to the California Global Warming Solutions Action of 2006) extends California's GHG reduction programs beyond 2020. SB 32 amended the Health and Safety Code to include Section 38566, which contains language to authorize CARB to achieve a statewide GHG emission reduction of at least 40 percent below 1990 levels by no later than December 31, 2030. SB 32 codified the targets established by EO B-30-15 for 2030, which set the next interim step in the State's continuing efforts to pursue the long-term target expressed in EO B-30-15 of 80 percent below 1990 emissions levels by 2050.

California Air Resources Board

On December 11, 2008, the CARB adopted the Climate Change Scoping Plan (Scoping Plan) as directed by AB 32. The Scoping Plan proposes a set of actions designed to reduce overall GHG emissions in California to the levels required by AB 32. Measures applicable to development projects include those related to energy-efficiency building and appliance standards, the use of renewable sources for electricity generation, regional transportation targets, and green building strategy. Relative to transportation, the Scoping Plan includes nine measures or recommended actions related to reducing vehicle miles traveled (VMT) and vehicle GHGs through fuel and efficiency measures. These measures would be implemented statewide rather than on a project-by-project basis (CARB 2008).

In response to EO B-30-15 and SB 32, all state agencies with jurisdiction over sources of GHG emissions were directed to implement measures to achieve reductions of GHG emissions to meet the 2030 and 2050 targets. The mid-term target is critical to help frame the suite of policy measures, regulations, planning efforts, and investments in clean technologies and infrastructure needed to continue driving down emissions (CARB 2014). In December 2017, CARB adopted the 2017 Climate Change Scoping Plan Update, the Strategy for Achieving California's 2030 Greenhouse Gas Target, to reflect the 2030 target set by EO B 30 15 and codified by SB 32 (CARB 2017).

Sacramento Metropolitan Air Quality Management District

The SMAQMD provides direction and recommendations for the analysis of GHG impacts of a project and approach to mitigation measures in its CEQA Air Quality Guidelines (SMAQMD 2020a).

Sacramento Area Council of Governments

As required by the Sustainable Communities and Climate Protection Act of 2008 (SB 375), SACOG has developed the 2020 Metropolitan Transportation Plan and Sustainable Communities Strategy. This plan seeks to reduce GHG and other mobile source emissions through coordinated transportation and land use planning to reduce VMT.

City of Folsom

As part of the 2035 General Plan, the City of Folsom prepared an integrated Greenhouse Gas Emissions Reduction Strategy (GHG Strategy) to identify and reduce current and future community GHG emissions and those associated with the City's municipal operations. Adopted on August 28, 2018, the GHG Strategy also serves as the City's "plan for the reduction of greenhouse gases", per Section 15183.5 of the CEQA Guidelines, which provides the opportunity for tiering and streamlining of project-level emissions for certain types of discretionary projects subject to CEQA review that are consistent with the

General Plan. The GHG Strategy includes goals and strategies to reduce community and municipal GHG emissions, compared to the 2005 baseline year, by 15 percent in 2020, 51 percent in 2035, and 80 percent in 2050 (City of Folsom 2018a; City of Folsom 2018c).

Significance Criteria

The following potential air quality impacts are based on Appendix G of the CEQA Guidelines, a significant impact is identified if the project would result in any of the following:

- a) *Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?*
- b) *Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?*

In accordance with CEQA Guidelines Sections 15064(h)(3), 15130(d), and 15183(b), a project's incremental contribution to a cumulative GHG emissions effect may be determined not to be cumulatively considerable if it complies with the requirements of a qualified plan for the reduction of greenhouse gases. The City General Plan Policy NCR 3.2.8 provides criteria for project-level streamlining and tiering (City of Folsom 2018a):

Projects subject to environmental review under CEQA may be eligible for tiering and streamlining the analysis of GHG emissions, provided they are consistent with the GHG reduction measures included in the GHG Strategy contained in the General Plan and EIR. The City may review such projects to determine whether the following criteria are met:

- Proposed project is consistent with the current general plan land use designation for the project site;
- Proposed project incorporates all applicable GHG reduction measures (as documented in the Climate Change Technical Appendix to the General Plan EIR) as mitigation measures in the CEQA document prepared for the project; and,
- Proposed project clearly demonstrates the method, timing and process for which the project will comply with applicable GHG reduction measures and/or conditions of approval, (e.g., using a CAP/GHG reduction measures consistency checklist, mitigation monitoring and reporting plan, or other mechanism for monitoring and enforcement as appropriate).

Evaluation of Greenhouse Gas Emissions

- a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Less Than Significant Impact. To determine consistency with the City's GHG Strategy, the criteria outlined in the Greenhouse Gas Reduction Strategy Consistency Checklist are shown and discussed in **Table 8**.

Table 8. GHG Reduction Strategy Consistency Checklist

Checklist Item	Consistent?	Discussion
Part 1: Land Use Consistency		
A. The proposed project is consistent with the City's 2035 General Plan land use and zoning designations. If "Yes," proceed to Part 2 of the Checklist.	Yes	The project would be located within the footprint of an existing building in an existing cemetery in an area designated Open Space in the General Plan and zoned Open Space/Public (OS/P) Primary Area of the Historic District with underlying zoning of Open Space and Conservation District (OSC). According to the City Zoning Code Chapter 17.52.550 and Chapter 17.39, a cemetery is an allowed use in both the OS/P Primary Area and OSC zone with a use permit. While the project may require a new conditional use permit, the project would not require a General Plan amendment or rezone. The project would be consistent with existing project site use and land use designation the General Plan.
Part 2: GHG Reduction Measures Consistency		
E-1: Improve Building Energy Efficiency in New Development	Not Applicable	The project does not propose new buildings or substantial modifications to existing buildings.
E-2: Water Heater Replacement in Existing Residential Development	Not Applicable	The project is not an existing residential development.
E-3: Improve Building Energy Efficiency in Existing Development	Not Applicable	The project's proposed equipment would be installed within an existing metal shed and would not include any conditioned or occupied building space.
E-4: Increase Use of Renewable Energy in Existing Development	Not Applicable	The project's proposed equipment would be installed within an existing metal shed. No expansion or retrofit of existing buildings are proposed.
T-1: Reduce VMT Through Mixed and High-Density Land Use	Not Applicable	The project does not propose, and the project site open space land use designation and zoning does not permit, high density development and mixed uses.
T-2: Improve Streets and Intersections for Multi-Modal Use and Access	Not Applicable	The project does not include construction of new streets or improvement to existing streets.
T-3: Adopt Citywide TDM Program	Not Applicable	The project is not a residential, office, commercial retail, public facility or school development. The project would not include new parking spaces.
T-5: Reduce Minimum Parking Standards	Not Applicable	The project would not include new parking spaces.
T-6: Require the Use of High-Performance Renewable Diesel in Construction Equipment	Not Applicable	The project would require minimal off-road diesel construction equipment. At most, a small excavator or skid steer loader may be used for a few hours to prepare an area for a small concrete pad.
T-8: Install Electric Vehicle Charging Stations	Not Applicable	The project is not a residential development, does not propose new parking spaces, and existing parking spaces at the project building are less than 10.
SW-1: Increase Solid Waste Diversion	Not Applicable	The project would involve minimal construction activity and would not result in substantial construction waste which could be diverted.

W-1: Increase Water Efficiency in New Residential Development	Not Applicable	The project is not a new residential development and the project does not propose new indoor or outdoor water uses.
W-2: Reduce Outdoor Water Use	Not Applicable	The project does not propose substantial addition, alteration, or expansion to existing facilities or new outdoor water uses.

Source: City of Folsom 2018d

As presented in **Table 8**, the project would be consistent with the project site general plan land use designation and none of the GHG reduction measures listed in the GHG Strategy are applicable to the project. Therefore, the project would be consistent with the City’s GHG Strategy and the project would not generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment. The impact would be less than significant.

b) Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Less Than Significant Impact. As discussed in criterion a), above, the project would be consistent with the City’s integrated General Plan and GHG Strategy. The GHG strategy was developed to meet the City’s GHG reduction targets which were formulated to meet the statewide GHG mandates of AB 32 and SB 32. Therefore, the project would not conflict with an applicable plan adopted for the purposes of reducing GHG emissions and the impact would be less than significant.

IX. HAZARDS AND HAZARDOUS MATERIALS

HAZARDS AND HAZARDOUS MATERIALS:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Environmental Setting

The project property is currently developed as a cemetery; the project site is within and immediately adjacent to an existing maintenance shed. The project site has no known past land uses associated with potentially hazardous sites.

The proposed project would include the installation of two 250-gallon propane tanks immediately adjacent to the existing shed. Propane is considered a hazardous material in that is extremely flammable and may cause burns, irritations, and/or asphyxiation if humans come into direct contact with significant quantities of it (USDOT 2016). Federal and state laws include provisions for the safe handling of hazardous substances. The federal Occupational Safety and Health Administration (OSHA) administers requirements to ensure worker safety. Construction activity must also be in compliance with California OSHA regulations (Occupational Safety and Health Act of 1970).

Nearby schools include the Golden Valley Charter River School (approximately 2.7 miles west of the project site²), Folsom Montessori School (0.6 miles east), Sutter Middle School (1.0 mile east), Folsom Lake High School (0.9 miles east) and Folsom Middle School (2.5 miles east).

The following databases were reviewed for the project site and surrounding area to identify potential hazardous contamination sites: the USEPA's Envirofacts online database (USEPA 2020a); California Department of Toxic Substance Control's EnviroStor online database (DTSC 2020); and the USEPA's Superfund National Priorities List (USEPA 2020c). Based on the results of the databases reviewed, the project site is not listed as a hazardous waste site. No Superfund sites are located on or near the project site. According to the EnviroStor database, there are two potentially hazardous sites near the project site:

- City of Folsom Corporate Yard Landfill. Located approximately 0.3 miles north of the project site. Underwent voluntary cleanup. No further action required.
- A&S Custom Plating Co. Located 0.6 miles northeast of the project site. Underwent evaluation. No further action required.

No private or public airports are located within the City of Folsom. The nearest public airfield is Mather Airport, located approximately 11.7 miles southwest of the project site. Cameron Airpark is a public use airport located approximately 13 miles northeast of the project site, and McClellan Airport is a privately-owned public use airport located approximately 17 miles west of the project site.

The City of Folsom Fire Department provides fire protection services. There are four fire stations providing fire/rescue and emergency medical services within the City of Folsom with a fifth station planned near the eastern city limits. Station 35 is the nearest station to the project site and is located at 535 Glenn Drive, approximately 1.5 miles east of the project site. Station 36 is second nearest to the project site and is located at 9700 Oak Avenue, approximately 2.3 miles north of the project site. The Fire Department responds to over 6,000 requests for service annually with an average of 16.4 per day (City of Folsom 2020). The project site is easily accessible to fire service personnel. Consistent with the City's Multi-Hazard Emergency Management Plan, the City of Folsom maintains pre-designated emergency evacuation routes along major streets and thoroughfares (City of Folsom 2005).

The project is not located in or near a State Responsibility Area or in a Very High Fire Hazard Severity Zone (CAL FIRE 2020; CSG 2020). Vegetation on the property is irrigated and includes maintained lawns and well-spaced trees with a generally open canopy and limbs pruned near ground level.

Evaluation of Hazards and Hazardous Materials

- a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?
- b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less Than Significant Impact. The project would involve the installation of two 250-gallon propane tanks

² The school is located across Lake Natoma from the project site and, though it is approximately 2.7 miles away by car, its physical location is about 3,000 feet (just over one-half mile) northwest of the project site.

immediately adjacent to the existing maintenance shed to power the crematory. Propane is flammable and has the potential to negatively impact human health if people are directly exposed to the liquid, gas, and/or vapors in the cases of large leaks or spills (USDOT 2016). Further, significant damage to the tanks, failure of safety mechanisms, and/or the presence of an ignition source may make the tanks an explosion hazard. However, this is very unlikely for a number of reasons. The tanks would be secured in place on a concrete pad, marked conspicuously, and placed in an area at low risk of impact from any vehicle or piece of equipment. They would not be located in an area of the cemetery frequented by the public. All installation, maintenance, and operations would be done by trained individuals in accordance with the manufacturer's recommendations and state regulations. The tanks would be regularly inspected to ensure soundness and proper function. Delivery of propane and filling of the tanks would be done only by licensed professionals following all applicable regulations and best practices.

No existing hazardous materials have been identified on the project site, and the site has no known history of past land uses associated with potentially hazardous sites. Construction of the proposed project would result in a small increase in the generation, storage, and disposal of hazardous wastes. During project construction, oil, gasoline, diesel fuel, paints, solvents, and other hazardous materials may be used. If spilled, these substances could pose a risk to the environment and to human health.

Following construction, household hazardous materials (such as various cleansers, paints, solvents, pesticides, and automobile fluids) may occasionally be used or brought into the vicinity of the site as part of routine maintenance. The routine transport, use, and disposal of hazardous materials are subject to local, state, and federal regulations to minimize risk and exposure.

Further, the City has set forth its hazardous materials goals and policies in the Hazardous Materials Element of the General Plan. The preventative policies protect the health and welfare of residents of Folsom through management and regulation of hazardous materials. Consequently, use of the listed materials above for their intended purpose would not pose a significant risk to the public or environment, and impacts would be less than significant for questions a) and b).

- c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

No impact. The project site is not located within one-quarter mile of an existing or proposed school.

- d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

No Impact. The project site is not listed as a hazardous waste site on Envirofacts (USEPA 2020a), EnviroStor (DTSC 2020), or the EPA's Superfund National Priorities List (USEPA 2020c). Therefore, project implementation would have no impact for question d).

- e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

No Impact. The project site is not located within an Airport Land Use Plan area, and no public or private airfields are within two miles of the project site. Therefore, the proposed project would not result in a

safety hazard or excessive noise for people residing or working in the project area, and no impact would occur.

- f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Less Than Significant Impact. Consistent with the City's Multi-Hazard Emergency Management Plan, the City of Folsom maintains pre-designated emergency evacuation routes along major streets and thoroughfares (City of Folsom 2005). The proposed project would not modify any pre-designated emergency evacuation route or preclude their continued use as an emergency evacuation route. Emergency vehicle access would be maintained throughout the project site to meet the Fire Department standards for fire engine maneuvering, location of fire engine to fight a fire, rescue access to the units, and fire hose access to all sides of the building. Therefore, project impacts to the City's adopted emergency plans would be less than significant.

- g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

Less Than Significant Impact. The project site is located in an urbanized area in the City of Folsom and is provided urban levels of fire protection by the City. Landscaping on the property is well-irrigated, well-spaced, trimmed, pruned, and generally maintained. To the north of the site is a residential neighborhood, to the east is gravel/rock cover and Folsom Boulevard, and to the south and west is a greenbelt that runs parallel to Lake Natoma on a north/south axis. The natural spaces are small, with a relatively open and discontinuous canopy. The project is not likely to cause any ignition, given that the crematory will not emit sparks, and any ignition caused by other factors could be quickly controlled by the City of Folsom Fire Department and would not spread great distances given the land use and vegetation surrounding and occupying the site. As an existing facility, Lakeside Memorial Lawn maintains adequate fire response infrastructure for both current operations and the proposed project. The City of Folsom Fire Department reviewed the project application and did not raise any concerns regarding the adequacy of water supply or site access. Therefore, the proposed project would not expose people or structures to a significant risk of loss due to wildland fires, and impacts would be less than significant.

X. HYDROLOGY AND WATER QUALITY

HYDROLOGY AND WATER QUALITY:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
i. Result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off- site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional resources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv. Impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Environmental Setting

The project site is currently a small cemetery, with associated landscaping, outbuildings, and access roads. Lands to the south and west contain woodland habitat typical of riparian communities in the Sierra Nevada foothills. To the west is also the Jedidiah Smith Memorial Trail that runs along the eastern shore of Lake Natoma. The trail, also known as the American River Bike Trail, connects Folsom Lake (north of the project site) to the confluence of the American and Sacramento Rivers in Downtown Sacramento. It is a part of the American River Parkway that is operated by the California Department of Parks and Recreation. To the north of the project site is a small residential neighborhood with single-family dwellings. Folsom Boulevard runs in a north/south line just east of the property. East of Folsom Boulevard is a large, developed area containing single-family homes, apartment complexes, a mobile home park, and some small businesses. The more regional setting is primarily characterized by residential development with a commercial shopping center to the east.

The project site is generally flat, ranging from about 175 to 185 feet in elevation throughout. Precipitation is the only apparent source of surface water as there are no wetlands or streams located on the project site.

The project site currently retains stormwater onsite and then discharges it into Lake Natoma. There is no connection with a City sewer system. Demand for water disposal, of either sanitary waste or stormwater, is projected to be unchanged by the proposed action.

Construction of the proposed project would disturb only the amount of soil required to install a concrete pad of approximately 38.3 square feet to secure two 250-gallon propane tanks adjacent to the existing shed.

Federal Emergency Management Agency (FEMA) flood insurance rate maps were reviewed for the project's proximity to a 100-year floodplain. The proposed project is on FEMA panel 06067C0116H, effective August 16, 2012. The project site is not located within a 100-year floodplain (FEMA 2020). The project is not located in a tsunami inundation zone (CDC 2020a).

The site is not located in an area of important groundwater recharge. Domestic water in the City is provided solely by surface water sources, and the City is the purveyor of water to the project area.

Regulatory Framework Relating to Hydrology and Water Quality

The City is a signatory to the Sacramento Countywide NPDES permit for the control of pollutants in urban stormwater. Since 1990, the City has been a partner in the Sacramento Stormwater Quality Partnership, along with the County of Sacramento and the Cities of Sacramento, Citrus Heights, Elk Grove, Galt, and Rancho Cordova. These agencies are implementing a comprehensive program involving public outreach, construction and industrial controls (i.e., BMPs), water quality monitoring, and other activities designed to protect area creeks and rivers. This program would be unchanged by the proposed project, and the project would be required to implement all appropriate program requirements.

In addition to these activities, the City maintains the following requirements and programs to reduce the potential impacts of urban development on stormwater quality and quantity, erosion and sediment control, flood protection, and water use. These regulations and requirements would be unchanged by the proposed project.

Standard construction conditions required by the City include:

- *Water Pollution* – requires compliance with City water pollution regulations, including NPDES provisions.
- *Clearing and Grubbing* – specifies protection standards for signs, mailboxes, underground structures, drainage facilities, sprinklers and lights, trees and shrubbery, and fencing. Also requires the preparation of a SWPPP to control erosion and siltation of receiving waters.
- *Reseeding* – specifies seed mixes and methods for reseeding of graded areas.

Additionally, the City enforces the following requirements of the Folsom Municipal Code as presented in **Table 9**.

Table 9. City of Folsom Municipal Code Sections Regulating the Effects on Hydrology and Water Quality from Urban Development

CODE SECTION	CODE NAME	EFFECT OF CODE
8.70	Stormwater Management and Discharge Control	Establishes conditions and requirements for the discharge of urban pollutants and sediments to the storm-drainage system; requires preparation and implementation of Stormwater Pollution Prevention Plans.
13.26	Water Conservation	Prohibits the wasteful use of water; establishes sustainable landscape requirements; defines water use restrictions.
14.20	Green Building Standards Code	Adopts by reference the California Green Building Standards Code (CALGreen Code), 2016 Edition, excluding Appendix Chapters A4, A5, and A6.1 published as Part 11, Title 24, C.C.R. Purpose of the Folsom Green Building Standards Code is to promote and require the use of building concepts having a reduced negative impact or positive environmental impact and encouraging sustainable construction practices.
14.29	Grading Code	Requires a grading permit prior to the initiation of any grading, excavation, fill or dredging; establishes standards, conditions, and requirements for grading, erosion control, stormwater drainage, and revegetation.
14.32	Flood Damage Prevention	Restricts or prohibits uses that cause water or erosion hazards, or that result in damaging increases in erosion or in flood heights; requires that uses vulnerable to floods be protected against flood damage; controls the modification of floodways; regulates activities that may increase flood damage or that could divert floodwaters.
14.33	Hillside Development Standards	Regulates urban development on hillsides and ridges to protect property against losses from erosion, ground movement and flooding; to protect significant natural features; and to provide for functional and visually pleasing development of the city's hillsides by establishing procedures and standards for the siting and design of physical improvements and site grading.

Source: City of Folsom 2018b.

Evaluation of Hydrology and Water Quality

- a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Less Than Significant Impact. No work would occur on the site outside of the existing shed with the exception of installing two 250-gallon propane tanks immediately adjacent to the existing shed. The tanks would cover an area of ground of approximately 38.3 square feet and thus may disturb 38.3 square feet of soil during installation. There would be an addition of approximately 38.3 square feet of impervious surface, following the completion of construction since the tanks would be built on a concrete foundation. No significant increase in wastewater or runoff is expected as a result of the project. The temporary disturbance of a small amount of soil and the potential addition of an impervious surface (approximately 38.3 square feet in both cases) would render any impacts less than significant.

- b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less Than Significant Impact. The project does not propose any new building construction or the addition of any impervious surfaces, except for up to 38.3 square feet to be covered by propane tanks' concrete foundation. No other soil disturbance and no grading or compaction are anticipated. The small change in impervious surfaces would render any impacts to infiltration at the site or groundwater recharge to be less than significant.

- c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:
- i. Result in substantial erosion or siltation on- or off-site?

Less Than Significant Impact. Approximately 38.3 square feet of soil may be disturbed for a short time during construction. Any resulting erosion impact would be less than significant.

- ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off- site?

Less Than Significant Impact. Approximately 38.3 square feet of impervious surfaces would be added during construction. There would be no other addition or expansion of impervious surfaces, and existing drainage patterns and systems would not be altered. Any impact would be less than significant.

- iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional resources of polluted runoff?

Less Than Significant Impact. Approximately 38.3 square feet of impervious surfaces would be added during construction. There would be no other addition or expansion of impervious surfaces, and existing drainage patterns and systems would not be altered. No additional wastewater is expected to be generated by the proposed action. Existing systems are adequate to deal with existing levels of runoff. Any impact would be less than significant.

- iv. Impede or redirect flood flows?

No impact. The proposal would not alter or block any existing watercourse or drainage feature, nor would it block or impede the drainage of any floodwater from the property during times of heavy rain. There would be no impact.

- d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

No impact. The project site is not located within a 100-year floodplain nor in a tsunami inundation zone or seiche zone. No impact would occur.

- e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less Than Significant Impact. The project would include the disturbance of up to approximately 38.3 square feet of soil and the installation of the same amount of impervious surfaces on the project site. All other work would be conducted inside of an established building. Given the small area of soil disturbed and impervious surfaces added, any impacts to groundwater infiltration rates or groundwater quality are expected to be less than significant.

XI. LAND USE AND PLANNING

LAND USE AND PLANNING:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Environmental Setting

Land use in the project area is regulated by the City of Folsom through the various plans and ordinances adopted by the City. These include the City of Folsom General Plan and the City of Folsom Municipal Code, including the Zoning Code. The project site is designated as Open Space (OS) in the City of Folsom General Plan. The following General Plan policies apply to the Open Space designation:

LU-1.1.8: Preserve Natural Assets: Maintain the existing natural vegetation, landscape features, open space, and viewsheds in the design of new developments.

LU-1.1.9: Preserve Historic Resources: Recognize the importance of history in the City of Folsom, and preserve historic and cultural resources throughout the city, to the extent feasible.

LU-1.1.10: Network of Open Space: Ensure designated open space is connected whenever feasible with the larger community and regional network of natural systems, recreational assets, and viewsheds

The proposed action would not be in conflict with the OS designation or the above policies, as disturbances would be largely limited to an existing building and a small area of existing disturbance that is shielded from public view..

The project site is currently zoned Open Space/Public (OS/P) Primary Area of the Historic District with underlying zoning of Open Space and Conservation (OSC). The applicant is seeking a Conditional Use Permit from the City to authorize their installation of a crematory.

Evaluation of Land Use and Planning

a) Physically divide an established community?

No Impact. No new building or road construction is proposed. The project site is located within an existing cemetery outside of established residential communities. No impact would occur.

- b) Cause significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Less Than Significant Impact. The project site is designated as OS in the City of Folsom General Plan. The proposed action would not conflict with the intended uses of that designation. The project site is currently zoned Open Space/Public (OS/P) Primary Area of the Historic District with underlying zoning of Open Space and Conservation District (OSC). . The applicant is seeking a Conditional Use Permit (CUP) from the City to authorize their installation of a crematory. Granting of the CUP from the City would render any impacts less than significant.

XII. MINERAL RESOURCES

MINERAL RESOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The Folsom area regional geologic structure is defined by the predominantly northwest- to southeast-trending belt of metamorphic rocks and the strike-slip faults that bound them. The structural trend influences the orientation of the feeder canyons into the main canyons of the North and South Forks of the American River. This trend is interrupted where the granodiorite plutons outcrop (north and west of Folsom Lake) and where the metamorphic rocks are blanketed by younger sedimentary layers (west of Folsom Dam) (Wagner et al. 1981 in Geotechnical Consultants 2003). The four primary rock divisions found in the area are: ultramafic intrusive, metamorphic, granodiorite intrusive, and volcanic mud flows (Geotechnical Consultants 2003).

The presence of mineral resources within the City has led to a long history of gold extraction, primarily placer gold. No areas of the City are currently designated for mineral resource extraction (CDC 2020b).

Evaluation of Mineral Resources

- a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?
- b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

No Impact. The proposed project is not located in a zone of known mineral or aggregate resources. No active mining operations are present on or near the site. Implementation of the project would not interfere with the extraction of any known mineral resources. Thus, no impacts would result, and no mitigation would be necessary for questions a) and b).

XIII. NOISE

NOISE:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The project site is located southwest of the intersection of Forrest Street/Natoma Street and Folsom Boulevard, within an existing shed on the grounds of the Lakeside Memorial Lawn Cemetery. The proposed project would include the installation and operation of a crematory within the existing shed, and the installation of a small concrete pad and two propane tanks adjacent to the shed to power the crematory. According to the manufacturer, the crematory would generate approximately 60 decibels (dB) of noise during normal operation. Noise-sensitive land uses are land uses that may be subject to stress and/or interference from excessive noise, including residences, hospitals, schools, hotels, resorts, libraries, sensitive wildlife habitat, or similar facilities where quiet is an important attribute of the environment. Noise receptors (receivers) are individual locations that may be affected by noise. Noise-sensitive land uses in the project vicinity include nearby residences along Young Wo Circle, approximately 420 feet to the north/northwest, and the Folsom Village Mobile Home Park, located approximately 1,000 feet to the east across Folsom Boulevard.

Noise Terminology and Metrics

All noise level or sound level values presented herein are expressed in terms of decibels (dB), with A weighting (dBA) to approximate the hearing sensitivity of humans. Time-averaged noise levels are expressed by the symbol LEQ, with a specified duration.

The amplitude of pressure waves generated by a sound source determines the loudness of that source. Sound pressure amplitude is measured in micro-Pascals (mPa). One mPa is approximately one hundred billionth (0.0000000001) of normal atmospheric pressure. Sound pressure amplitudes for different kinds of noise environments can range from less than 100 to 100,000,000 mPa. Because of this wide range of values, sound is rarely expressed in terms of mPa. Instead, a logarithmic scale is used to

describe sound pressure level (SPL) in terms of dBA. The threshold of hearing for the human ear is about 0 dBA, which corresponds to 20 mPa.

Because decibels are logarithmic units, SPL cannot be added or subtracted through standard arithmetic. Under the decibel scale, a doubling of sound energy corresponds to a 3 dBA increase. In other words, when two identical sources are each producing sound of the same loudness, the resulting sound level at a given distance would be 3 dBA higher than from one source under the same conditions. For example, if one automobile produces an SPL of 70 dB when it passes an observer, two cars passing simultaneously would not produce 140 dBA—rather, they would combine to produce 73 dBA. Under the decibel scale, three sources of equal loudness together produce a sound level 5 dBA louder than one source.

Under controlled conditions in an acoustical laboratory, the trained, healthy human ear is able to discern 1 dBA changes in sound levels, when exposed to steady, single-frequency (“pure-tone”) signals in the mid-frequency (1,000 Hz–8,000 Hz) range. In typical noisy environments, changes in noise of 1 to 2 dBA are generally not perceptible. It is widely accepted, however, that people begin to detect sound level increases of 3 dB in typical noisy environments. Further, a 5 dBA increase is generally perceived as a distinctly noticeable increase, and a 10 dBA increase is generally perceived as a doubling of loudness.

Regulatory Framework

City of Folsom General Plan

The City of Folsom 2035 General Plan Safety and Noise Element provides the following goals and policies relative to noise that are applicable to this project:

GOAL SN 6.1: Protect the citizens of Folsom from the harmful effects of exposure to excessive noise and to protect the economic base of Folsom by preventing the encroachment of incompatible land uses within areas affected by existing noise-producing uses.

- SN 6.1.1 Noise Mitigation Strategies: Develop, maintain, and implement strategies to abate and avoid excessive noise exposure in the city by requiring that effective noise mitigation measures be incorporated into the design of new noise-generating and noise-sensitive land uses.
- SN 6.1.2 Noise Mitigation Measures: Require effective noise mitigation for new development of residential or other noise sensitive land uses to reduce noise levels as follows:
 - 2. For non-transportation-related noise sources: achieve compliance with the performance standards contained within Table SN-1 [Table 10].

Table 20. Noise Compatibility Standards

Land Use	Exterior Noise Level Standard for Outdoor Activity Areas ^a	Interior Noise Level Standard	
	L _{dn} /CNEL, dB	L _{dn} /CNEL, dB	L _{eq} , dB ^b
Residential (Low Density Residential, Duplex, Mobile Homes)	60 ^c	45	N/A
Residential (Multi Family)	65 ^d	45	N/A
Transient Lodging (Motels/Hotels)	65 ^d	45	N/A

Land Use	Exterior Noise Level Standard for Outdoor Activity Areas ^a	Interior Noise Level Standard	
	L _{dn} /CNEL, dB	L _{dn} /CNEL, dB	L _{eq} , dB ^b
Mixed-Use Developments	70	45	N/A
Schools, Libraries, Churches, Hospitals, Nursing Homes, Museums	70	45	N/A
Theaters, Auditoriums	70	N/A	35
Playgrounds, Neighborhood Parks	70	N/A	N/A
Golf Courses, Riding Stables, Water Recreation, Cemeteries	75	N/A	N/A
Office Buildings, Business Commercial and Professional	70	N/A	45
Industrial, Manufacturing, and Utilities	75	N/A	45

Notes: Where a proposed use is not specifically listed on this table, the use shall comply with the noise exposure standards for the nearest similar use as determined by the Community Development Department.

- a. Outdoor activity areas for residential developments are considered to be the back yard patios or decks of single-family residential units, and the patios or common areas where people generally congregate for multifamily development. Outdoor activity areas for nonresidential developments are considered to be those common areas where people generally congregate, including outdoor seating areas. Where the location of outdoor activity areas is unknown, the exterior noise standard shall be applied to the property line of the receiving land use.
- b. As determined for a typical worst-case hour during periods of use.
- c. Where it is not possible to reduce noise in outdoor activity areas to 60 dB, L_{dn}/CNEL or less using a practical application of the best-available noise reduction measures, an exterior level of up to 65 dB, L_{dn}/CNEL may be allowed provided that available exterior noise level reduction measures have been implemented and interior noise levels are in compliance with this table.
- d. Where it is not possible to reduce noise in outdoor activity areas to 65 dB, L_{dn}/CNEL or less using a practical application of the best-available noise reduction measures, an exterior level of up to 70 dB, L_{dn}/CNEL may be allowed provided that available exterior noise level reduction measures have been implemented and interior noise levels are in compliance with this table.

Folsom Municipal Code

Chapter 8.42 of the City of Folsom Municipal Code, entitled Noise Control, provides exterior noise level performance standards for stationary noise sources. In addition, this chapter also provides noise source exemptions which are applicable to this project.

8.42.040 Exterior noise standards.

- A. It is unlawful for any person at any location within the incorporated area of the city to create any noise, or to allow the creation of any noise, on property owned, leased, occupied or otherwise controlled by such person which causes the exterior noise level when measured at any affected single- or multiple-family residence, school church, hospital or public library situated in either the incorporated or unincorporated area to exceed the noise level standards as set forth in **Table 11**.

Table 11. Exterior Noise Level Standards

Noise Level Category	Cumulative Number of minutes in any 1-hour time period	Daytime (dB) (7 a.m. – 10 p.m.)	Nighttime (dB) (10 p.m. – 7 a.m.)
1	30	50	45
2	15	55	50
3	5	60	55
4	1	65	60
5	0	70	65

Note: dB = A-weighted decibels

Source: City of Folsom Code, Noise Control 1993.

- B. In the event the measured ambient noise level exceeds the applicable noise level standard in any category above, the applicable standard shall be adjusted so as to equal the ambient noise level.
- C. Each of the noise level standards specified above shall be reduced by 5 dB for simple tone noises, noises consisting primarily of speech or music, or for recurring noises.
- D. If the intruding noise source is continuous and cannot reasonably be discontinued or stopped for a time period whereby the ambient noise level can be measured, the noise level measured while the source is in operation shall be the noise level standards as specified above.

Noise Source Exemptions (Section 8.42.060)

Section 8.42.060 of the City of Folsom Municipal Code establishes the following activities that are considered exempt from the associated exterior noise provisions:

- A. Activities conducted in unlighted public parks, public playgrounds and public or private school grounds, during the hours of 7 a.m. to dusk, and in lighted public parks, public playgrounds and public or private school grounds, during the hours of 7 a.m. to 11 p.m., including but not limited to school athletic and school entertainment events;
- B. Any mechanical device, apparatus, or equipment used, related to or connected with emergency activities or emergency work;
- C. Noise sources associated with construction, provided such activities do not take place before 7 a.m. or after 6 p.m. on any day except Saturday or Sunday, or before 8 a.m. or after 5 p.m. on Saturday or Sunday;
- D. Noise sources associated with the maintenance of residential property provided such activities take place between the hours of seven a.m. to dusk on any day except Saturday or Sunday, between the hours of 8 a.m. to dusk on Saturday or Sunday;
- E. Noise sources associated with agricultural activities on agricultural property;
- F. (Section Expired)
- G. Noise sources associated with the collection of waste or garbage from property devoted to commercial or industrial uses;

H. Any activity to the extent regulation thereof has been preempted by state or Federal law.

Evaluation of Noise

- a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less Than Significant Impact. Construction of the project would involve the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for a day and one truck load of concrete to install a small pad for the two propane tanks. Construction equipment would be relatively small, given the small size of the project, and construction would be of short duration. Noise generated by construction may exceed the levels permitted by section 8.42.040 of the Folsom Municipal Code; however, construction activities are exempt from those requirements provided that they take place between 7:00 a.m. and 6:00 p.m. on any day except Saturday or Sunday, or between 8:00 a.m. and 5:00 p.m. on Saturday or Sunday (Folsom Municipal Code 8.42.060). The project applicant is required to comply with these requirements and ensure that all construction activities were limited to those windows.

The crematory is expected to generate 60 dB of noise during normal operations, which is below the 75 dB level authorized for cemeteries under item SN 6.1.2 of the City of Folsom 2035 General Plan Safety and Noise Element. Operation would be limited to between the hours of 7:00 a.m. and 10:00 p.m., so 60 dB would be the lowest standard applied by Folsom Municipal Code Section 8.42.040 for noise reaching the nearest sensitive receptor for 30 cumulative minutes of any hour during that time frame. That standard would further be lowered to 45 dB for recurring noises. The nearest sensitive receptors to the project site are the residences located along Young Wo Circle, approximately 420 feet to the north/northwest of the proposed crematory. A rough estimate of noise levels reaching these receptors was calculated. This discussion assumes that the 60 dB measurement provided by the manufacturer refers to noise levels ten feet from the proposed crematory during operation, and assumes spherical spreading of sound from the source to the receiver (i.e., 6 decibel decrease for each doubling of distance from the noise source). An additional offset for atmospheric absorption of -1.5 dB per thousand feet was applied to the computations.

Noise from the proposed crematory's normal operations would attenuate to approximately 27.5 dB by the time it reached the nearest sensitive receptors. This does not account for the added muffling effect of the shed containing the crematory. Consequently, the proposed project would not generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of applicable standards, and impacts from the project would be less than significant.

- b) Generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact. Construction of the project would involve the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for a day and one truck load of concrete to install a small pad for the two propane tanks. Construction equipment would be relatively small, given the small size of the project, and construction would be for a short duration. Operation of the proposed crematory is not expected to create any new sources of vibration that could be felt outside of the immediate vicinity of the device. Therefore, any impacts would be less than significant.

- c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. No public airports or private airstrips are located within two miles of the project site. Therefore, residents of the proposed project would not be exposed to excessive noise levels from air activity, and no impact would occur.

XIV. POPULATION AND HOUSING

POPULATION AND HOUSING:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The proposed project includes the installation of a crematory within an existing maintenance shed at an existing cemetery. It also involves the installation of two 250-gallon propane tanks adjacent to one side of the shed.

Evaluation of Population and Housing

- a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

No Impact. The project would not expand any existing service apart from providing an opportunity to cremate deceased individuals within the City of Folsom. It would not expand or provide any public service nor alter public access to any site, nor create significant new employment opportunities. No impact would occur.

- b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

No Impact. This project does not involve the demolition, alteration, or replacement of any housing. It would not affect local conditions to the degree that any residents would be compelled to move away. Therefore, no impact would occur.

XV. PUBLIC SERVICES

PUBLIC SERVICES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The proposed project is in an area currently served by urban levels of utilities and services. Public services provided by the City of Folsom in the project area include fire, police, school, library, and park services. The site is served by all public utilities including domestic water, wastewater treatment, and storm water utilities.

The City of Folsom Fire Department provides fire protection services. There are four fire stations providing fire/rescue and emergency medical services within the City of Folsom with a fifth station planned near the eastern city limits. Station 35 is the nearest station to the project site and is located at 535 Glenn Drive, approximately 1.5 miles east of the project site. Station 36 is second nearest to the project site and is located at 9700 Oak Avenue, approximately 2.3 miles north of the project site. The Fire Department responds to over 6,000 requests for service annually with an average of 16.4 per day (City of Folsom 2020). The City of Folsom Police Department is located at 46 Natoma Street, approximately 1.5 miles northeast of the project site.

The project site is located within the Folsom Cordova Unified School District. Nearby schools include the Golden Valley Charter River School (approximately 2.7 miles west of the project site), Folsom Montessori School (0.6 miles east), Sutter Middle School (1.0 mile east), Folsom Lake High School (0.9 miles east) and Folsom Middle School (2.5 miles east). The nearest recreational feature to the site is the Jedediah Smith Memorial Trail which runs adjacent to the property near its west side. The trail runs along the shores of Lake Natoma and continues on to provide bike access to the City of Sacramento. The land to the south and west of the property, including the land surrounding the trail and the lake, is a part of the American River Parkway that is operated by the State of California Department of Parks and Recreation.

The Sacramento Municipal Utilities District (SMUD) would continue to supply electricity to the project site. The City of Folsom provides potable water and irrigation water to the site. The project site does not currently have a gas line; two 250-gallon propane tanks would be installed to provide fuel for the crematory. The project site does not currently have a sanitary sewer line.

The City of Folsom has a program of maintaining and upgrading existing utility and public services within the City. Similarly, all private utilities maintain and upgrade their systems as necessary for public convenience and necessity, and as technology changes.

Evaluation of Public Services

a) Fire protection?

Less Than Significant Impact. The City of Folsom Fire Department is capable of responding to structure and wildland fires in addition to hazardous materials incidents. As a professionally staffed department with two stations nearby, they would be able to respond quickly and effectively in the unlikely event of a fire or hazardous materials incident at the project site. Emergency vehicle access would be maintained throughout the project site to meet the Fire Department standards for fire engine maneuvering, location of fire engine to fight a fire, rescue access, and fire hose access to all sides of the building. The proposed project would not significantly increase fire service demands or render the current service level to be inadequate, and impacts would be less than significant.

b) Police protection?

Less Than Significant Impact. The proposed project would not increase public access to the site and would only marginally increase the presence of workers at the site. As such, no increase in calls for service to the police department is expected under normal operating conditions. In the unlikely event of a fire or other emergency involving the crematory or the propane tanks, police would likely be called to assist with incident command and to control access to the site. The Folsom Police Department and other mutual aid departments would have sufficient resources and manpower to accommodate such an assignment, and a Less Than Significant Impact would occur.

c) Schools?

No impact. The project would not induce population growth and would not increase or decrease demand for any school facilities. No impact would occur.

d) Parks?

No impact. The project would not induce population growth and would not increase or decrease demand for any park facilities. No impact would occur.

e) Other public facilities?

No impact. The project would not induce population growth and would not significantly increase or decrease demand for any public services or utilities. No impact would occur.

XVI. RECREATION

RECREATION:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The nearest recreational opportunity to the project side is adjacent to the western boundary of the property. The Jedediah Smith Memorial Trail and Lake Natoma both run along a north/south axis just west of the project site. The open space surrounding the lake and trail in the project vicinity is comprised of oak/gray pine woodland typical of the Sierra Nevada Foothills. The trail continues to the City of Sacramento and allows bike and pedestrian access. It is part of the American River Parkway. The portion of the parkway nearest the project area is administered by the California Department of Parks and Recreation.

Evaluation of Recreation

a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

No Impact. The proposed project would not induce population growth or increase tourism or public access or demand to any recreational site. It would not impair the quality of any existing site. No impact would occur.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

No Impact. The proposed project does not include any recreational facilities, nor would it induce demand for new recreational facilities. No impact would occur.

XVII. TRANSPORTATION

TRANSPORTATION:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

Parking and Access

The project site can be accessed from either northbound or southbound on Folsom Boulevard or from Westbound Natoma Street approaching this intersection with Folsom Boulevard. The site would be accessed by proceeding a very short distance west on Forrest Street to reach the entry gate to the cemetery and turning left onto Mormon Street.

Diagonal parking spaces can be found along both sides of Mormon Street. At the terminus of Mormon Street, members of the public may continue straight onto a main cemetery access road to find an additional parking lot. All existing parking spaces would be maintained. Access to the project site directly would continue to be provided by a smaller existing access road located at the southwestern terminus of Mormon Street. Both the smaller access road and the main access road can be reached at the terminus of Mormon Street, but the two roads do not form a continuous loop because of a fence line separating them. No new parking spaces or parking facilities would be constructed.

As the crematorium would not be located in or near a funeral home and would be separate from any funeral services or public gatherings provided by the project applicant, access would only need to accommodate a small number of staff members with business at the site.

Roadway System

Brief descriptions of the key roadways serving the project site are provided below.

Folsom Boulevard is a four-lane arterial (with additional turn lanes as needed) that operates at a posted speed limit of 50 mph within the project vicinity. It is non-divided south of the intersection with Natoma Street/Forrest Street and becomes divided north of the intersection. A light rail track runs parallel to Folsom Boulevard. The intersection of Folsom Boulevard and Natoma Street/Forrest Street is controlled by a traffic light. About five miles south of that intersection, Folsom Boulevard provides access to US

Route 50. Folsom Boulevard crosses Lake Natoma about one mile north of the intersection with Natoma Street/Forrest Street.

Natoma Street is a two-lane, non-divided road that operates at a posted speed limit of 25 mph within the project vicinity. It intersects with Folsom Boulevard on the eastern side of the intersection nearest the project site. On the western side, the road becomes known as *Forrest Street* and remains a non-divided, two lane road with turn lanes as needed. Natoma Street provides access to residential and mixed-use neighborhoods to the east, and Forrest Street provides access to the cemetery, a small number of residential neighborhoods, and additional parks and businesses.

Transit, Light Rail, Bicycle, and Pedestrian Facilities

Transit services in the City of Folsom are provided by the Folsom Stage Line bus service which, as of February 4, 2019, is now operated by Sacramento Regional Transit. The Folsom Stage Line bus service provides both Fixed-Route and Dial-A-Ride services exclusively within the Folsom city limits, Monday through Friday. The nearest bus stop is approximately 0.5 miles north of the project site on Folsom Boulevard and is served by the Route 10 bus. The next nearest stop is approximately 0.7 miles south of the project site along Folsom Boulevard and is served by the Route 30 bus.

Light rail access to the site is provided by the Sacramento Regional Transit District, Light Rail to Folsom (Gold Line). The nearest stations are approximately 0.5 miles north and 0.7 miles south of the project site, respectively. Both stations are along the eastern side of Folsom Boulevard.

Bicycles can access the site from either northbound or southbound on Folsom Boulevard, or westbound from Natoma Street. Additional bike access is provided by the Jedidiah Smith Memorial Trail, which can reach Forrest Street via Young Wo Circle just west of the project site.

Pedestrians can access the site through the same routes as described for bicycles. Crossing signals and crosswalks are provided at the intersection of Folsom Boulevard and Natoma Street/Forrest Street.

Airports

No private or public airports are located within the City of Folsom. The nearest public airfield is Mather Airport, located approximately 11.7 miles southwest of the project site. Cameron Airpark is a public use airport located approximately 13 miles northeast of the project site, and McClellan Airport is a privately-owned public use airport located approximately 17 miles west of the project site.

Emergency Access

The City of Folsom identifies most major streets in the City as emergency evacuation routes. The proposed project would not modify any major street and/or preclude their continued use as an emergency evacuation route.

Evaluation of Transportation

- a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

No Impact. The project does not propose any alterations to any path of access for vehicle, transit, rail, bicycle, or pedestrian facilities. The project would not conflict with any plan, policy, or ordinance affecting the above categories. No impact would occur.

- b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

No Impact. The proposed action would not be a destination accessible for members of the public and would only be visited by a small number of workers during construction and operation. The project would not result in a significant increase in vehicle miles traveled, and is located within one half mile of a major public transit stop (the Historic Folsom Station) which provides both bus and light rail service. No impact would occur.

- c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

No Impact. The project does not propose any alterations to any access roads or other routes, and would not increase traffic to a point that additional risk on existing routes would be incurred. No impact would occur.

- d) Result in inadequate emergency access?

No Impact. No alterations to any access road or right of way are proposed. Emergency vehicle access would be maintained throughout the project site to meet the Fire Department standards for fire engine maneuvering, location of fire engine to fight a fire, rescue access, and fire hose access to all sides of the building. No impact would occur.

XVIII. TRIBAL CULTURAL RESOURCES

TRIBAL CULTURAL RESOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Environmental Setting

For discussion of the history of Native American use of the project area, see Section 9.0.V., Cultural Resources. This section is based on the Tribal Consultation Record for Compliance with Assembly Bill (AB) 52 and CEQA for the Lakeside Memorial Lawn Storage Shed Project, City of Folsom (ECORP 2021). That document is included as **Appendix C**, and a summary is provided below.

Regulatory Setting

Tribal Cultural Resources are defined in Section 21074 of the California PRC as sites, features, places, cultural landscapes (geographically defined in terms of the size and scope), sacred places, and objects with cultural value to a California Native American tribe that are either included in or determined to be eligible for inclusion in the CRHR, or are included in a local register of historical resources as defined in subdivision (k) of Section 5020.1, or are a resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1. Section 1(b)(4) of AB 52 established that only California Native American tribes, as defined in Section 21073 of the California PRC, are experts in the identification of Tribal Cultural Resources and impacts thereto.

AB 52 requires that the City of Folsom (City) provide notice to any California Native American tribes that have requested notice of projects subject to CEQA review and consult with tribes that responded to the notice within 30 days of receipt with a request for consultation. Section 21073 of the Public Resources Code (PRC) defines California Native American tribes as “a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of the Statutes of 2004.” This includes both federally and non-federally recognized tribes. For the City of Folsom, these include the following tribes that previously submitted general request letters, requesting such noticing:

- Wilton Rancheria (letter dated January 13, 2020);
- Lone Band of Miwok Indians (letter dated March 2, 2016); and,
- United Auburn Indian Community (UAIC) of the Auburn Rancheria (letter dated November 23, 2015).

The purpose of consultation is to identify Tribal Cultural Resources (TCR) that may be significantly impacted by the proposed project and to allow the City to avoid or mitigate significant impacts prior to project approval and implementation. Section 21074(a) of the PRC defines TCRs, for the purpose of CEQA, as:

Sites, features, places, cultural landscapes (geographically defined in terms of the size and scope), sacred places, and objects with cultural value to a California Native American tribe that are either of the following:

- a) Included or determined to be eligible for inclusion in the California Register of Historical Resources; and/or
- b) Included in a local register of historical resources as defined in subdivision (k) of Section 5020.1; and/or
- c) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1. In applying the criteria set forth in subdivision (c) of Section 5024.1, for the purposes of this paragraph, the lead agency shall consider the significance of the resource to a California Native American tribe.

Because criteria A and B also meet the definition of a Historical Resource under CEQA, a TCR may also require additional consideration as a Historical Resource. TCRs may or may not exhibit archaeological, cultural, or physical indicators and can only be identified by a culturally affiliated tribe, which has been determined under State law to be the subject matter expert for TCRs.

CEQA requires that the City initiate consultation with tribes at the commencement of the CEQA process to identify TCRs. Furthermore, because a significant effect on a TCR is considered a significant impact on the environment under CEQA, consultation is required to develop appropriate avoidance, impact minimization, and mitigation measures. Therefore, in accordance with the requirements summarized above, the City carried out, or attempted to carry out, tribal consultation for the project.

City Consultation

Within 14 days of initiating CEQA review for the project, on November 25, 2020, the City sent project notification letters to the three California Native American tribes named above, which had previously submitted general consultation request letters pursuant to Section 21080.3.1(d) of the PRC. Each tribe

was provided a brief description of the project and its location, the contact information for the City's authorized representative, and a notification that the tribe has 30 days to request consultation.

The Lone Band of Miwok Indians did not respond to the City's notification letter, and therefore, the threshold for carrying out tribal consultation with that tribe under PRC 21080.3.1(e) was not met.

On December 11, 2020, and within the 30-day response timeframe, the City received an automated email from UAIC that acknowledged receipt of the City's notification letter, thanked the City for consulting with UAIC, and attached the tribe's consultation record for the project. The response did not include any information on TCRs and indicated that the Tribal Historic Preservation Department would review the project and respond; however, no further communication was received from UAIC. Because the tribe failed to provide comments or engage with the City pursuant to PRC 21082.3(d)(2), the City considers this consultation requirement complete.

On December 1, 2020, and within the 30-day response timeframe, a Wilton Rancheria representative responded by email to the City's initial notification letter and requested to formally initiate consultation under AB 52. She requested additional information regarding the project's environmental review process and provided Wilton Rancheria's recommended mitigation measures for TCRs, though she did not indicate that there were known TCRs within the project area. City staff shared additional details with the representative, including the Cultural Resources Inventory Report (ECORP 2020). Despite several attempts by the City to schedule a meeting with tribal representatives, the representatives did not engage with the City at any of these meeting times. Because the tribe failed to engage meaningfully with the City after a reasonable and good-faith effort composed of multiple attempts to meet with the tribe, pursuant to PRC 21082.3(d)(2), the City considers this consultation requirement complete.

All information relevant to the City's AB 52 consultation process is documented in Appendix C.

Should Wilton Rancheria, or any other culturally affiliated tribe, submit public comments, the City will consider them in accordance with Section 11(b) of AB 52; however, after completing the required notification and consultation procedures specified in AB 52 and the PRC, the City has not been provided any information about TCRs that could be affected by the proposed project. Therefore, the determination of impacts to TCRs is drawn from other lines of evidence, as summarized below.

Information about potential impacts to TCRs was drawn from the ethnographic context, the results of a search of the Sacred Lands File of the Native American Heritage Commission (NAHC), and the results of a cultural resources inventory prepared by ECORP (2020). The methods and results of these efforts are provided in ECORP (2020) and are hereby incorporated by reference (see summary in Section V, Cultural Resources).

Evaluation of Tribal Cultural Resources

- a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:
 - i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?
 - ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources

Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe?

Less Than Significant with Mitigation.

The ethnographic information reviewed for the project, including ethnographic maps, does not identify any villages, occupational areas, or resource procurement locations in or around the current project area. In addition, the Sacred Lands File failed to identify any sacred lands or tribal resources in or near the project area. The cultural resources survey did not reveal any Native American archaeological sites within or adjacent to the proposed project area. Finally, as summarized above, two of the three tribes notified of the project responded to the City's offer to consult; however, none provided any information about TCRs in the project area. This is not unexpected, as the project is in a highly disturbed environment and does not involve substantial ground disturbance.

In reviewing the lines of evidence summarized above, this project would not have an impact on known TCRs. There exists an extremely low potential for the discovery of previously unknown TCRs during project construction, but if TCRs were to be encountered, the project activity could result in a significant impact. Implementation of unanticipated discovery procedures, as provided in mitigation measure TCR-1 below, would reduce that impact to less than significant.

Mitigation Measure TCR-01: Unanticipated Discovery of Tribal Cultural Resources.

If potentially significant TCRs are discovered during ground disturbing construction activities, all work shall cease within 50 feet of the find. A Native American Representative from traditionally and culturally affiliated Native American Tribes that requested consultation on the project shall be immediately contacted and invited to assess the significance of the find and make recommendations for further evaluation and treatment, as necessary. If deemed necessary by the City, a qualified cultural resources specialist meeting the Secretary of Interior's Standards and Qualifications for Archaeology, may also assess the significance of the find in joint consultation with Native American Representatives to ensure that Tribal values are considered. Work at the discovery location cannot resume until the City, in consultation as appropriate and in good faith, determines that the discovery is either not a TCR, or has been subjected to culturally appropriate treatment, if avoidance and preservation cannot be accommodated.

XIX. UTILITIES AND SERVICE SYSTEMS

UTILITIES AND SERVICE SYSTEMS:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Require or result in the relocation or construction of new water or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunication facilities, the construction of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The cemetery is currently serviced with potable water and irrigation water from the City of Folsom. There is no need to seek a "will serve" letter as the City currently provides water and the crematory will not substantially increase flow demand. The City also provides solid waste collection and disposal services; the project is not expected to result in a significantly increased demand for solid waste removal.

The cemetery is currently served with an electricity supply from SMUD. Electrical connections already exist for the shed, and may be upgraded as needed as part of the proposed project. Installation and operation of the crematory would not result in a significant increase in demand for electricity on the project site.

The cemetery, including the shed, does not have an existing sewer line. This project would not require access to, nor construction of, a sewer line. Two 250-gallon propane tanks would be constructed along the northern edge of the shed to provide power for the crematorium.

Stormwater flows on the site are retained and drained to Lake Natoma. There would be no change in the hydrologic regime of the project site due to the installation or operation of the proposed project.

The City of Folsom employs a design process that includes coordination with potentially affected utilities as part of project development. The City of Folsom coordinates with the appropriate utility companies to plan and potentially expand existing utilities in the project area, including water, sewer, telephone, gas, and electricity. All utility services should be able to accommodate the proposed project as no increased demand is expected except for propane, which the applicant will purchase.

Evaluation of Utilities and Service Systems

- a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Less Than Significant Impact. Existing levels of service are expected to be adequate for most utilities, as the project applicant does not predict a significant increase in demand. The only exception is propane. The site does not currently have a gas line, so the applicant is proposing to construct two 250-gallon propane tanks adjacent to the shed to power the crematory.

Since existing levels of service are adequate for all requirements except gas, and the applicant would supply the only additional utility requirement (propane) independently of utility companies and in accordance with all manufacturer's recommendations and safety practices, any impact would be less than significant.

- b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less Than Significant Impact. The applicant does not predict a significantly increased demand for water as a result of this project. The project consists solely of the installation of a crematory and supporting systems, and would not require significantly increased water for sanitation, irrigation, consumption, or any other uses. Any impacts would be less than significant.

- c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

No Impact. The site does not currently have any sewer lines. No need for a sanitary sewer would arise as a result of this project. Any stormwater that accumulates onsite is disposed of locally into the adjacent Lake Natoma. There would not be an increase in the amount of impervious surfaces on the site apart from the addition of two 250-gallon propane tanks and a 38.3 square foot concrete foundation to support them immediately adjacent to one of the buildings. There are no foreseeable changes to the hydrologic regime or to stormwater quality or quantity. No impact would occur.

- d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

No Impact. No increase in solid waste generation is expected as a result of this project apart from potentially a small and temporary increase during construction; any waste generated would be removed and disposed of by the contractor or the applicant. No impact would occur.

- e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

No Impact. No change to the amount of solid waste generated on the property or its disposal is anticipated as a result of this project. The City of Folsom provides solid waste, recycling, and hazardous materials collection services to its residential and business communities. In order to meet the State mandated 50 percent landfill diversion requirements stipulated under AB 939, the City has instituted several community-based programs. The City offers a door-to-door collection program for household hazardous and electronic waste, in addition to six "drop-off" recycling locations within the City.

After processing, solid waste is taken to the Kiefer Landfill, the primary municipal solid waste disposal facility in Sacramento County. The landfill facility sits on a 1,084-acre site in the community of Sloughhouse and has a remaining capacity of 112.9 million cubic yards. The estimated cease operation date for the landfill is January 1, 2064 (CalRecycle 2018). Kiefer Landfill has sufficient capacity to accommodate the solid waste disposal needs of the City of Folsom. No impact would occur.

XX. WILDFIRE

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Setting

The project site is not located in or near a state responsibility area or lands classified as very high fire hazard severity zones (CAL FIRE 2020; CSG 2020).

Evaluation of Wildfire

- a) Substantially impair an adopted emergency response plan or emergency evacuation plan?
- b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?
- c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?
- d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

No Impact. The project site is not located in or near a state responsibility area or lands classified as very high fire hazard severity zones. Therefore, no impact would occur for questions a) through d).

XXI. MANDATORY FINDINGS OF SIGNIFICANCE

MANDATORY FINDINGS OF SIGNIFICANCE:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of past, present and probable future projects)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Evaluation of Mandatory Findings of Significance

- a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Less Than Significant Impact with Mitigation. The preceding analysis indicates that the proposed project has the potential to adversely affect air quality, cultural resources, and tribal cultural resources. See Sections 9.III, 9.V, and 9.XVIII of this Initial Study for discussion of the proposed project’s potential impacts on these environmental issue areas. With implementation of the mitigation measures identified in those Sections and reiterated below, and compliance with City programs and requirements identified in this report, impacts would be reduced to a less than significant level. No significant or potentially significant impacts would remain.

Evaluation of air quality impacts: Construction of the project would involve short-term/temporary emissions via the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for a one day and one truck load of concrete to install a small pad for the two propane tanks.

According to the SMAQMD’s CEQA Guide, projects that are 35 acres or less in size generally will not exceed the SMAQMD’s construction NOX or PM thresholds of significance. However, all construction

projects regardless of the screening level are required to implement the SMAQMD's Basic Construction Emission Control Practices (also known as Best Management Practices [BMP]; SMAQMD 2020b). The BMPs satisfy the requirements of SMAQMD's Rule 403, Fugitive Dust, which requires every reasonable precaution not to cause or allow the emissions of fugitive dust from being airborne beyond the property line from which the emission originates. Construction of the project would not result in a considerable net increase of any criteria pollutant and the impact would be less than significant with implementation of **Mitigation Measure AIR-01**.

Evaluation of cultural resources impacts: A database records search was conducted for the project site, including a 0.25-mile buffer area, at the North Central Information Center (NCIC) of the California Historical Resources Information System (CHRIS) at California State University-Sacramento. Additionally, a pedestrian survey of the project site was conducted by ECORP Staff Archaeologist Laurel Zickler-Martin, RPA. Although no evidence of cultural resources of significance were noted on project site, the City recognizes that sensitive and/or protected resources could be unintentionally discovered during project construction. Further, workers must be aware of sensitive cultural resources in the vicinity of the project area (but not on the project site) that must be protected. With implementation of **Mitigation Measures CUL-01, CUL-02, and CUL-03**, the impacts would be reduced to a less than significant level and potentially cumulative impacts would be avoided.

Evaluation of tribal cultural resources impacts: The City of Folsom sent project notification letters to three California Native American tribes. One tribe did not respond, one responded but did not provide any information regarding TCRs, and one requested additional information and discussion but, following a good faith effort by the City, did not meet with staff and did not provide information regarding TCRs. The City relied on other methods, including those outlined in the Cultural Resources report (ECORP 2020, see Section 9.V and 9.XVIII), to evaluate the potential presence of TCRs. Although there is no evidence of tribal cultural resources occurring or having the potential to occur on the project site, the City recognizes that sensitive and/or protected resources could be unintentionally discovered during project construction. With implementation of **Mitigation Measure TCR-01**, the impacts would be reduced to a less than significant level and potentially cumulative impacts would be avoided.

- b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of past, present and probable future projects)?

Less Than Significant Impact with Mitigation. While the project would indirectly contribute to cumulative impacts associated with increased urban development in the City and region, these impacts have previously been evaluated by the City and considered in development of the City's General Plan as set forth in this Initial Study. Key areas of concern are discussed in detail below.

Evaluation of air quality impacts: Construction of the project would involve short-term/temporary emissions via the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for a one day and one truck load of concrete to install a small pad for the two propane tanks.

According to the SMAQMD's CEQA Guide, projects that are 35 acres or less in size generally will not exceed the SMAQMD's construction NOX or PM thresholds of significance. However, all construction projects regardless of the screening level are required to implement the SMAQMD's Basic Construction Emission Control Practices (also known as Best Management Practices [BMP]; SMAQMD 2020b). The

BMPs satisfy the requirements of SMAQMD's Rule 403, Fugitive Dust, which requires every reasonable precaution not to cause or allow the emissions of fugitive dust from being airborne beyond the property line from which the emission originates. Construction of the project would not result in a cumulatively considerable net increase of any criteria pollutant and the impact would be less than significant with implementation of **Mitigation Measure AIR-01**.

Evaluation of cumulative cultural resources impacts: A database records search was conducted for the project site, including a 0.25-mile buffer area, at the North Central Information Center (NCIC) of the California Historical Resources Information System (CHRIS) at California State University-Sacramento. Additionally, a pedestrian survey of the project site was conducted by ECORP Staff Archaeologist Laurel Zickler-Martin, RPA. Although no evidence of cultural resources of significance were noted on project site, the City recognizes that sensitive and/or protected resources could be unintentionally discovered during project construction. Further, workers must be aware of sensitive cultural resources in the vicinity of the project area (but not on the project site) that must be protected. With implementation of **Mitigation Measures CUL-01, CUL-02, and CUL-03**, the impacts would be reduced to a less than significant level and potentially cumulative impacts would be avoided.

Evaluation of cumulative tribal cultural resources impacts: The City of Folsom sent project notification letters to three California Native American tribes. One tribe did not respond, one responded but did not provide any information regarding TCRs, and one requested additional information and discussion but, following a good faith effort by the City, did not meet with staff and did not provide information regarding TCRs. The City relied on other methods, including those outlined in the Cultural Resources report (ECORP 2020, see Section 9.V and 9.XVIII), to evaluate the potential presence of TCRs. Although there is no evidence of tribal cultural resources occurring or having the potential to occur on the project site, the City recognizes that sensitive and/or protected resources could be unintentionally discovered during project construction. With implementation of **Mitigation Measure TCR-01**, the impacts would be reduced to a less than significant level and potentially cumulative impacts would be avoided.

- c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

Less Than Significant Impact. Because of site conditions, existing City regulations, and regulation of potential environmental impacts by other agencies, the proposed project would not have the potential to cause substantial adverse effects on human beings as demonstrated in the evaluation contained in this Initial Study. Therefore, impacts would be less than significant.

10.0 MITIGATION MONITORING AND REPORTING PROGRAM

A Mitigation Monitoring and Reporting Program (MMRP) has been prepared by the City per Section 15097 of the CEQA Guidelines and is presented in **Appendix D**.

Project # COF-32

Mr. Scott Johnson, AICP
Planning Manager
City of Folsom, Community Development Department
50 Natoma Street
Folsom, CA 95630

Subject: Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Emissions Assessment

Dear Mr. Johnson:

HELIX Environmental Planning, Inc. (HELIX) has assessed the air quality and greenhouse gas (GHG) emissions associated with the construction and operation of the proposed Folsom Lakeside Crematorium Project (project), including a health risk assessment (HRA) to evaluate potential community health risks from the project's emissions. The analysis has been prepared to support environmental review under the California Environmental Quality Act (CEQA).

PROJECT LOCATION

The project would be constructed within an approximately 12-acre parcel in the City of Folsom (City) in Sacramento County, California. The project site is located west of the intersection of Forrest Street/Natoma Street with Folsom Boulevard, within the existing Lakeside Memorial Lawn Cemetery (See Figure 1, *Regional Location*, attached to this letter report).

PROJECT DESCRIPTION

The project would consist of installation of an HCT Apex-250 crematory, a 10-foot by 15-foot cooler, and associated electrical and propane improvements in an existing metal shed on the grounds of the existing Lakeside Memorial Lawn Cemetery. The shed would be modified to accommodate the equipment, but the shed would not be expanded beyond the existing 1,071 square feet footprint. Two 250-gallon propane tanks would be installed on a small concrete pad along the northern side of the shed to provide power for the crematory (see Figure 2, *Detailed Site Plan*, attached to this letter report).

Letter to Mr. Scott Johnson
December 4, 2020

Page 2 of 19

AIR QUALITY ANALYSIS

Environmental Setting

The City of Folsom lies within the Sacramento Valley Air Basin (SVAB), near the southeastern edge. The SVAB consists of all or parts of eleven counties spanning from Solano and Sacramento counties to the south, and Shasta County to the north. The Sacramento Metropolitan Air Quality Management District (SMAQMD) is responsible for implementing emissions standards and other requirements of federal and state laws for Sacramento County, including the project area.

The climate of the SVAB is characterized by hot dry summers and mild rainy winters. During the year the temperature may range from 20 to 115 degrees Fahrenheit with summer highs usually in the 90s and winter lows occasionally below freezing. Average annual rainfall is about 20 inches with snowfall being very rare. The prevailing winds are moderate in strength and vary from moist breezes from the south to dry land flows from the north. The mountains surrounding the Sacramento Valley create a barrier to airflow, which can trap air pollutants in the valley when certain meteorological conditions are right and a temperature inversion (areas of warm air overlying areas of cooler air) exists. Air stagnation in the autumn and early winter occurs when large high-pressure cells lie over the valley. The lack of surface wind during these periods and the reduced vertical flow caused by less surface heating reduces the influx of outside air and allows pollutants to become concentrated in the air. The surface concentrations of pollutants are highest when these conditions are combined with increased levels of smoke or when temperature inversions trap cool air, fog and pollutants near the ground. The ozone season (May through October) in the SVAB is characterized by stagnant morning air or light winds with the breeze arriving in the afternoon out of the southwest from the San Francisco Bay. Usually the evening breeze transports the airborne pollutants to the north out of the SVAB. During about half of the days from July to September, however, a phenomenon called the "Schultz Eddy" prevents this from occurring. Instead of allowing for the prevailing wind patterns to move north carrying the pollutants out of the valley, the Schultz Eddy causes the wind pattern and pollutants to circle back southward. This phenomenon's effect exacerbates the pollution levels in the area and increases the likelihood of violating the federal and state air quality standards (SMAQMD 2020a).

Regulatory Setting

Criteria Pollutants

Ambient air quality is described in terms of compliance with state and national standards, and the levels of air pollutant concentrations considered safe, to protect the public health and welfare. These standards are designed to protect people most sensitive to respiratory distress, such as asthmatics, the elderly, very young children, people already weakened by other disease or illness, and persons engaged in strenuous work or exercise. The U.S. Environmental Protection Agency (USEPA), the federal agency that administrates the Federal Clean Air Act of 1970, as amended in 1990, has established national ambient air quality standards (NAAQS) for several air pollution constituents known as criteria pollutants, including: ozone (O₃); carbon monoxide (CO); coarse particulate matter (PM₁₀; particles 10 microns or less) and fine particulate matter (PM_{2.5}; particles 2.5 microns or less); sulfur dioxide (SO₂); and lead (Pb). As permitted by the Clean Air Act, California has adopted the more stringent California ambient air quality standards (CAAQS) and expanded the number of regulated air constituents. Ground-level ozone is not emitted directly into the environment but is generated from complex chemical and photochemical

Letter to Mr. Scott Johnson
December 4, 2020

Page 3 of 19

reactions between precursor pollutants, primarily reactive organic gases (ROGs; also known as volatile organic compounds [VOCs]),¹ and oxides of nitrogen (NO_x). PM₁₀ and PM_{2.5} are generated from a variety of sources, including road dust, diesel exhaust, fuel combustion, tire and brake wear, construction operations and windblown dust. In addition, PM₁₀ and PM_{2.5} can also be formed through chemical and photochemical reactions of precursor pollutants in the atmosphere.

The California Air Resources Board (CARB) is required to designate areas of the state as attainment, nonattainment, or unclassified for the ambient air quality standards. An “attainment” designation for an area signifies that pollutant concentrations do not violate the standard for that pollutant in that area. A “nonattainment” designation indicates that a pollutant concentration violated the standard at least once. An “unclassified” designation indicates that insufficient data was available to determine the status. The air quality attainment status of Sacramento County is shown in Table 1, *Sacramento County Attainment Status*.

Table 1
SACRAMENTO COUNTY ATTAINMENT STATUS

Pollutant	State of California Attainment Status	Federal Attainment Status
Ozone (1-hour)	Nonattainment	No Federal Standard
Ozone (8-hour)	Nonattainment	Nonattainment
Coarse Particulate Matter (PM ₁₀)	Nonattainment	Attainment
Fine Particulate Matter (PM _{2.5})	Attainment	Nonattainment
Carbon Monoxide (CO)	Attainment	Attainment
Nitrogen Dioxide (NO ₂)	Attainment	Attainment
Lead	Attainment	Attainment
Sulfur Dioxide (SO ₂)	Attainment	Attainment
Sulfates	Attainment	No Federal Standard
Hydrogen Sulfide	Unclassified	No Federal Standard
Visibility Reducing Particles	Unclassified	No Federal Standard

Sources: SMAQMD 2020a.

Sacramento County is designated as nonattainment for the state and federal ozone standards, the state PM₁₀ standards, and the federal PM_{2.5} standards. The SMAQMD is responsible for implementing emissions standards and other requirements of federal and state laws in Sacramento County. Attainment plans for meeting the federal air quality standards are incorporated into the State Implementation Plan (SIP), which is subsequently submitted to the USEPA, the federal agency that administrates the Federal CAA of 1970, as amended in 1990. The current air quality plan applicable to the project, the *Sacramento Regional 2008 NAAQS 8-Hour Ozone Attainment and Reasonable Further Progress Plan* (Regional Ozone Plan), was developed by the SMAQMD and adjacent air district to describe how the air districts in and near the Sacramento metropolitan area will continue the progress toward attaining state and national ozone air quality standards (SMAQMD 2017).

¹ CARB defines and uses the term ROGs while the USEPA defines and uses the term VOCs. The compounds included in the lists of ROGs and VOCs and the methods of calculation are slightly different. However, for the purposes of estimating criteria pollutant precursor emissions, the two terms are often used interchangeably.

Letter to Mr. Scott Johnson

Page 4 of 19

Toxic Air Contaminants

Toxic air contaminants (TACs) are a diverse group of air pollutants that may cause or contribute to an increase in deaths or in serious illness or that may pose a present or potential hazard to human health. TACs can cause long-term chronic health effects such as cancer, birth defects, neurological damage, asthma, bronchitis, or genetic damage, or short-term acute effects such as eye watering, respiratory irritation (a cough), runny nose, throat pain, and headaches. TACs are considered either carcinogenic or noncarcinogenic based on the nature of the health effects associated with exposure to the pollutant. For carcinogenic TACs, there is no level of exposure that is considered safe and impacts are evaluated in terms of overall relative risk expressed as excess cancer cases per one million exposed individuals. Noncarcinogenic TACs differ in that there is generally assumed to be a safe level of exposure below which no negative health impact is believed to occur. These levels are determined on a pollutant-by-pollutant basis.

The Health and Safety Code (§39655[a]) defines TAC as “an air pollutant which may cause or contribute to an increase in mortality or in serious illness, or which may pose a present or potential hazard to human health.” All substances that are listed as hazardous air pollutants pursuant to subsection (b) of Section 112 of the CAA (42 United States Code Sec. 7412[b]) are designated as TACs. Under State law, the California Environmental Protection Agency (CalEPA), acting through CARB, is authorized to identify a substance as a TAC if it determines the substance is an air pollutant that may cause or contribute to an increase in mortality or an increase in serious illness, or that may pose a present or potential hazard to human health.

Crematories are a potential source of TACs as a result of trace metals and organic compounds that accumulate in the body throughout a person’s life and are released during combustion of human remains, and as a result of trace organic compounds that are formed in the combustion process. These TACs include: metals and inorganics (i.e., arsenic, beryllium, cadmium, chromium, copper, hydrogen fluoride, lead, mercury, nickel, selenium, zinc); VOCs (i.e., benzene, toluene, xylenes, vinyl chloride); aldehydes (i.e., acetaldehyde, formaldehyde); polyaromatic hydrocarbons (PAHs); polychlorinated dibenzodioxins (dioxins; PCDDs); and polychlorinated dibenzofurans (furans; PCDFs). Prolonged exposure to significant concentrations of these TACS can result in a variety of adverse health effects including cancers, chronic conditions, and/or acute conditions, depending on the substance and level of exposure. Based on the results of the HRA, described below, hexavalent chromium and mercury are the primary drivers of the health risks from crematory emissions because the health risks from crematory emissions of these substances are one or more orders of magnitude greater than the health risks from other TACs in crematory emissions.

Increased Cancer Risks – Hexavalent Chromium. Hexavalent chromium is a toxic form of the element chromium. Hexavalent chromium compounds are man-made and widely used in many different industries. Prolonged exposure to airborne hexavalent chromium may result in lung cancer. Although exposure to high levels of airborne hexavalent chromium may result in irritation or damage to the nose, throat, and lungs, breathing small amounts of hexavalent chromium even for long periods does not cause respiratory tract irritation in most people (Occupational Safety and Health Administration [OSHA] 2006).

Non-Cancer Chronic and Acute Health Risks – Mercury. Mercury is a naturally occurring element that is found in its elemental form (commonly known as quicksilver), in organic compounds which accumulate

Letter to Mr. Scott Johnson
December 4, 2020

Page 5 of 19

in fish and shellfish, and in inorganic compounds mainly occurring in contaminated drinking water. Mercury is a neurotoxin that can result in a range of chronic neurological disorders and developmental issues. The specific health effects of mercury are dependent on the form and amount of mercury in the exposure, the duration of the exposure, and the age of the individual (USEPA 2020).

Sensitive Receptors

Some land uses are considered more sensitive to air pollution than others due to the types of population groups or activities involved and are referred to as sensitive receptors. Examples of these sensitive receptors are residences, schools, hospitals, and daycare centers. CARB and the Office of Environmental Health Hazard Assessment (OEHHA) have identified the following groups of individuals as the most likely to be affected by air pollution: the elderly over 65, children under 14, infants (including in utero in the third trimester of pregnancy), and persons with cardiovascular and chronic respiratory diseases such as asthma, emphysema, and bronchitis (CARB 2005; OEHHA 2015).

Residential areas are considered sensitive receptors to air pollution because residents (including children and the elderly) tend to be at home for extended periods of time, resulting in sustained exposure to any pollutants present. Children and infants are considered more susceptible to health effects of air pollution due to their immature immune systems, developing organs, and higher breathing rates. As such, schools are also considered sensitive receptors, as children are present for extended durations and engage in regular outdoor activities.

The closest existing sensitive receptors to the project site are multiple single-family residences adjacent to the cemetery to the north, between 450 and 750 feet from the proposed crematory location, and mobile homes across Folsom Boulevard to the east, approximately 700 feet from the proposed crematory location, see Figure 3, *Receptor Locations*, attached to this letter report. The closest school to the project site is the Folsom Montessori School approximately 3,200 feet (0.6 miles) to the northeast.

Methods

Criteria Pollutant Emissions

Criteria pollutant and precursor emissions for long-term operation of the proposed crematory were calculated using propane combustion emissions factors from the USEPA AP-42 Compilation of Emissions Factors Chapter 1.5 (USEPA 2008), and crematory emissions factors provided by the SMAQMD, which combined USEPA AP-42 data and the USEPA Factor Information Retrieval Program (SMAQMD 2020b).

Crematory Health Risks

Potential health risks to nearby sensitive receptors from the emission of TACs during operation of the proposed crematory were analyzed after consultation with the SMAQMD and in accordance with the OEHHA Air Toxics Hot Spots Program Guidance Manual for Preparation of Health Risk Assessments (OEHHA 2015).

Letter to Mr. Scott Johnson
December 4, 2020

Page 6 of 19

TAC Emissions

Toxic emissions from the cremation process were estimated based on emissions factors provided by the SMAQMD and on maximum cremation process rates provided by Caring Service Group of 200 pounds per hour and 100,000 pounds per year. The TAC emissions factors provided by SMAQMD were based on a data in a test report from CARB that measured emissions from two propane-fires crematories (SMAQMD 2020b)

Dispersion Modeling

Localized concentrations of TACs were modeled using Lakes AERMOD View version 9.8.3. The Lakes program utilizes USEPA's AERMOD gaussian air dispersion model version 19191. Plot files from AERMOD using unitized emissions (one gram per second) from the crematory stack were imported into CARB's Hotspots Analysis and Reporting Program (HARP), Air Dispersion Modeling and Risk Tool (ADMRT) version 19121. The ADMRT calculated ground-level concentrations of TACs utilizing the imported plot files and the annual and hourly emissions inventory (provided in detail in Attachment A to this letter report).

Source Parameters

Based on data provided by the crematory manufacturer, emissions from the crematory were modeled as a point source emitting from the exhaust stack at 19.5 feet above the ground. The stack diameter was set at 20 inches, the exhaust gas temperature was set to 1080 degrees Fahrenheit (°F), the gas exit velocity was set to 14.7 feet per second, and the stack was assumed to have a rain cap resulting in a near-zero initial vertical gas velocity. Downwash from the existing shed housing the proposed crematory was modeled using the Building Profile Input Program (BPIP – a building preprocessing program for AERMOD).

Meteorological Data

SMAQMD provides pre-processed meteorological data suitable for use with AERMOD (SMAQMD 2014) for projects within Sacramento County. The available data set most representative of conditions in the project vicinity was from the Sacramento Executive Airport station, approximately 19 miles southwest of the project site. The Sacramento Executive Airport set includes 5 years of data collected between 2010 to 2014. Rural dispersion coefficients were selected in the model to reflect the existing undeveloped and open nature of the immediate project vicinity. A wind rose for the Sacramento Executive Airport shows an average speed of 6.6 miles per hour from the south (Iowa Environmental Mesonet 2019). The wind rose graphic is included in Attachment B to this letter.

Terrain Data

United States Geological Survey (USGS) National Elevation Dataset (NED) files with a 10-meter resolution covering an area approximately 500 meters (1,640 feet) around the project site were used in the model to cover the analysis area. Terrain data was imported to the model using AERMAP (a terrain preprocessing program for AERMOD).

Letter to Mr. Scott Johnson
December 4, 2020

Page 7 of 19

Receptor Modeling

To develop risk isopleths (linear contours showing equal level of risk) and ensure that the area of maximum impact was captured, receptors were placed in a cartesian grid 690 meters by 490 meters (approximately 2,264 feet by 1,608 feet), centered on the proposed crematory with a grid spacing of 10 meters (33 feet) and a receptor height (flagpole height) of 1.2 meters (4 feet) above the ground. Additional discrete receptors were placed at the residential property line of the 37 closest identified sensitive receptors and the 4 closest off-site worker buildings. See Figure 3 for the discrete receptor locations relative to the TAC source.

Risk Determination

Health risks resulting from localized concentration of TACs emitted by the proposed crematory were estimated using the ADMRT. The latest cancer slope factors, chronic Recommended Exposure Limits (RELs), acute RELs and exposure paths for all TACs, as designated by CARB, are included in the ADMRT. For the residential cancer risk, an exposure duration of 30 years was selected in accordance with the OEHHA (2015) guidelines. In accordance with OEHHA guidelines, the model conservatively assumes that residents would be standing and breathing outdoors at the location of the property line closest to the crematory every day between 17 and 21 hours per day (depending on the age group, starting with infants in utero in the third trimester of pregnancy) for 30 years. For off-site worker cancer risk, an exposure duration of 25 years was selected with an assumption of 8 hours per day, 5 days per week of exposure while standing outside. The mandatory minimum exposure pathways and the OEHHA derived breathing intake rate percentile method were selected.

Significance Criteria

The following potential air quality impacts are based on Appendix G of the State CEQA Guidelines, a significant impact is identified if the project would result in any of the following:

- a) *Conflict with or obstruct implementation of the applicable air quality plan?*
- b) *Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?*
- c) *Expose sensitive receptors to substantial pollutant concentrations?*
- d) *Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?*

While the final determination of whether or not a project has a significant effect is within the purview of the lead agency pursuant to CEQA Guidelines Section 15064(b), the SMAQMD has adopted screening tables and thresholds which lead agencies can use to determine the significance of a development project's short-term construction and long-term operational pollutant emissions. The SMAQMD's project-level thresholds of significance for mass emissions of criteria pollutant and precursors and exposure to TACs are shown in Table 2, *SMAQMD Significance Thresholds* (SMAQMD 2020c).

Letter to Mr. Scott Johnson
December 4, 2020

Page 8 of 19

Table 2
SMAQMD SIGNIFICANCE THRESHOLDS

Pollutant	Operational Emissions Threshold
ROG	65 pounds per day
NO _x	65 pound per day
PM10	80 pounds per day/14.6 tons per year ¹
PM2.5	82 pounds per day/15 tons per year ¹
TAC Exposure Incremental Increased Cancer Risk	10 in 1 million
TAC Exposure Non-Cancer Hazard Index	1

Source: SMAQMD 2020c

¹ Thresholds for PM is zero unless all feasible best available control technology/best management practices (BACT/BMPs) are applied.

Air Quality Impact Analysis

a) Conflict with or obstruct implementation of the applicable air quality plan?

Less than significant. Consistency with the air quality plan is determined by whether the project would hinder implementation of control measures identified in the air quality plan or would result in growth of population or employment that is not accounted for in local and regional planning. The SMAQMD's Regional Ozone Plan and the SIP are the applicable air quality plans for the projects developed within Sacramento County.

The project would be consistent with the General Plan land use designation of Open Space, but the project would require a conditional use permit to install and operate a crematory in the Open Space and Conservation zoning designation of the project site. The project would not result in population growth in the City and employment growth would be limited to a few personnel to operate the crematory. Therefore, the project would be consistent with the local and regional growth assumptions used in developing the Regional Ozone Plan and the SIP. In addition, as described in impact discussion b), below, the project would not result in a cumulatively considerable increase of any criteria pollutant. Therefore, the project would not conflict with or obstruct implementation of the applicable air quality plan and the impact would be less than significant.

b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Construction (Short-Term) Emissions

Less than Significant. Construction of the project would involve the use of a crane for several hours to unload the chiller and crematory from the truck, and the use of a mini excavator or skid steer loader for a day and one truck load of concrete to install a small pad for the two propane tanks.

According to the SMAQMD's CEQA Guide, projects that are 35 acres or less in size generally will not exceed the SMAQMD's construction NO_x or PM thresholds of significance. However, all construction projects regardless of the screening level are required to implement the SMAQMD's Basic Construction Emission Control Practices (also known as Best Management Practices [BMPs]; SMAQMD 2020b). The BMPs satisfy the requirements of SMAQMD's Rule 403, *Fugitive Dust*, which requires every reasonable

Letter to Mr. Scott Johnson
December 4, 2020

Page 9 of 19

precaution not to cause or allow the emissions of fugitive dust from being airborne beyond the property line from which the emission originates. ROG emissions during construction are generally associated with the application of architectural coatings. The project does not propose any new structures and would not require substantial amounts of painting and would not result in significant emissions of ROGs. Therefore, construction of the project would not result in a cumulatively considerable net increase of any criteria pollutant and the impact would be less than significant.

Operation (Long-Term) Emissions

Less than Significant. The project would result in long-term operational emissions from vehicles that drive to and from the project and from operation of the crematory.

Because there are no crematoriums currently operating in Folsom, demand for cremation services is filled by transporting the deceased to facilities outside of the City. Therefore, operations of the project would not result in new vehicle trips (nor the associated emissions in the region). Instead, the project would replace existing regional vehicle trips with shorter trips (and reduced associated emissions).

Operation of a propane-fired crematory would be considered a new stationary source of emissions. The project may be subject to SMAQMD's Rule 201, *General Permit Requirements*, and Rule 202, *New Source Review*. The project would be required to implement best available control technology (BACT) for the minimization of emissions. BACT for crematories is incorporated into the product design in the form of controls which ensure maintenance of the correct temperatures and cycle times, and a secondary combustion chamber which ensures oxygenation and complete combustions of all fuels. As described in the Methods sections, above, Criteria pollutant and precursor emissions for long-term operation of the proposed crematory were calculated using propane combustion emissions factors from AP-42 and crematory emissions factors provided by SMAQMD. The project's calculated criteria and precursors operational emissions are compared to the SMAQMD thresholds in Table 3, *Operational Criteria Pollutant and Precursor Emissions*, a printout of the calculation sheets is included in Attachment A to this letter.

Table 3
OPERATIONAL CRITERIA POLLUTANT AND PRECURSOR EMISSIONS

Pollutant	Project Emissions	SMAQMD Threshold	Exceed Threshold?
Daily Emissions (pounds per day)			
ROG	0.1	65	No
NO _x	1.2	65	No
CO	0.9	None	No
SO _x	0.4	None	No
PM ₁₀	0.3	80	No
PM _{2.5}	0.3	82	No
Annual Emissions (tons per year)			
ROG	0.01	None	No
NO _x	0.15	None	No
CO	0.11	None	No
SO _x	0.05	None	No

Letter to Mr. Scott Johnson
December 4, 2020

Page 10 of 19

Pollutant	Project Emissions	SMAQMD Threshold	Exceed Threshold?
PM ₁₀	0.03	14.6	No
PM _{2.5}	0.03	15	No

Source: SMAQMD 2020b; SMAQMD 2020c

As shown in Table 3, the project's operational emissions of criteria pollutants and precursors would not exceed the SMAQMD daily or annual thresholds. Therefore, the project's operational emissions would not result in a cumulatively considerable net increase of any criteria pollutant and impacts would be less than significant.

c) *Expose sensitive receptors to substantial pollutant concentrations?*

Less than Significant. Crematories are a potential source of TACs as a result of trace metals and organic compounds that accumulate in the body and are released during combustion, and trace organic compounds that are formed in the combustion process. An HRA was conducted to determine potential community health risks from exposure to TACs emitted from the proposed crematory, as described in the Methods section above.

Health risks associated with cancer from development projects are estimated using the incremental excess cancer risk expressed as cancer cases per one million exposed individuals. The incremental excess cancer risk is an estimate of the chance a person exposed to specific sources of a TACs may have of developing cancer from that exposure beyond the individual's risk of developing cancer from existing background levels of pollutants in the ambient air. For context, the average cancer risk from TACs in the ambient air for an individual living in an urban area of California is 830 in 1 million (CARB 2015). Cancer risk estimates do not mean, and should not be interpreted to mean, that a person will develop cancer from estimated exposures to toxic air pollutants.

Health risks associated with chronic and acute effects from a development project are quantified using the maximum hazard index. A hazard index is the potential exposure to a substance divided by the reference exposure level (the level at which no adverse effects are expected). A hazard index of less than one indicates no adverse health effects are expected from the potential exposure to the substance. The maximum hazard index is the sum of hazard indices for pollutants with non-cancer health effects that have the same or similar adverse health effects.

The modeled point of maximum impact for the project (geographic point outside of the project site with the highest estimated incremental cancer risk and maximum hazard index) would be a point near the project boundary approximately 96 feet southeast of the proposed crematory exhaust stack, at approximately Universal Transverse Mercator (UTM) coordinates Zone 10, 657982 meters east, 4281757 meters north. The maximum health risk exposure at this point would be a residential incremental cancer risk of 3.2 in 1 million and a residential non-cancer chronic hazard index of 0.09. This point of maximum impact is in an area zoned as Open Space Conservation District containing dredge tailings from past gold mining. No residents or workers are anticipated to be at the point of maximum impact for prolonged periods.

The maximum estimated community incremental excess cancer, chronic and acute health risks due to exposure to the project TAC emissions from long term operation of the proposed crematory are

Letter to Mr. Scott Johnson
December 4, 2020

Page 11 of 19

presented in Table 4, *Maximum Exposed Individual Incremental Cancer Health Risk and Hazard Index*. These estimates are conservative (health protective) and assume that the resident or worker is outdoors for the entire exposure period. The modeled locations of the Maximum Exposed Individual Resident (MEIR) and the point of maximum impact, along with the residential cancer risk isopleths (contours of equal risk), are shown in Figure 4, *Cancer Risks*. The complete HRA model output, including tables of health risks for all modeled discrete receptors and isopleth figures for incremental cancer risk, non-cancer chronic hazard index and acute hazard index are included as Attachment B to this letter report.

Table 4
MAXIMUM EXPOSED INDIVIDUAL INCREMENTAL CANCER RISK AND HAZARD INDEX

	MEI Resident Cancer Risk	MEI Worker Cancer Risk	MEI Resident Chronic Hazard Index	MEI Worker Chronic Hazard Index	MEI Acute Hazard Index
Results	0.6 in 1 million	<0.1 in 1 million	0.02	0.02	0.20
Threshold	10 in 1 million	10 in 1 million	1	1	1
Exceed Threshold?	No	No	No	No	No

Source: Lakes AERMOD View version 9.8.3 and CARB ADMRT version 19121. See Attachment B for model inputs, outputs, and risk isopleths.

MEI = Maximum Exposed Individual.

As shown in Table 4, the maximum incremental increased cancer risks and maximum non-cancer chronic and acute hazard index due to exposure to TACs from long term operation of the proposed crematory would not exceed the SMAQMD thresholds. Therefore, operation of the project would not result in the exposure of sensitive receptors to substantial TAC concentrations and the impact would be less than significant.

d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Diesel equipment could generate diesel exhaust odors during construction activities. The generation of odors during the construction period would be temporary, would last for a few days and would be dispersed within a short distance from the active work area. Once operational, potential odors from human remains prior to cremation would be minimized by either by immediately processing remains or by temporarily storing remains in the proposed refrigeration chiller. Operation of the crematory would not be a significant source odors or other emissions because the BACT features of the crematory, including process temperature and cycle time controls, and secondary combustion chambers which ensure the complete combustion of all solids, liquids, and gaseous fuels. Therefore, the project would not result in other emissions (such as those leading to odors) adversely affecting a substantial number of people and the impact would be less than significant.

GREENHOUSE GAS EMISSIONS

Environmental Setting

Global climate change refers to changes in average climatic conditions on Earth including temperature, wind patterns, precipitation, and storms. Global temperatures are moderated by atmospheric gases.

Letter to Mr. Scott Johnson
December 4, 2020

Page 12 of 19

These gases are commonly referred to as greenhouse gasses (GHGs) because they function like a greenhouse by letting sunlight in but preventing heat from escaping, thus warming the Earth's atmosphere.

GHGs are emitted by natural processes and human (anthropogenic) activities. Anthropogenic GHG emissions are primarily associated with: the burning of fossil fuels during motorized transport; electricity generation; natural gas consumption; industrial activity; manufacturing; and other activities such as deforestation, agricultural activity, and solid waste decomposition.

The GHGs defined under California's Assembly Bill (AB) 32, described below, include carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF₆). Each GHG differs in its ability to absorb heat in the atmosphere based on the lifetime, or persistence, of the gas molecule in the atmosphere. Estimates of GHG emissions are commonly presented in carbon dioxide equivalents (CO₂e), which weigh each gas by its global warming potential (GWP). Expressing GHG emissions in CO₂e takes the contribution of all GHG emissions to the greenhouse effect and converts them to a single unit equivalent to the effect that would occur if only CO₂ were being emitted. GHG emissions quantities in this analysis are presented in metric tons (MT) of CO₂e. For consistency with United Nations Standards, modeling and reporting of GHGs in California and the U.S. use the GWPs defined in the Intergovernmental Panel on Climate Change's (IPCC) Fourth Assessment Report (IPCC 2007), as shown in Table 5, *Global Warming Potential and Atmospheric Lifetimes*.

Table 5
GLOBAL WARMING POTENTIAL AND ATMOSPHERIC LIFETIMES

Greenhouse Gas	Atmospheric Lifetime (years)	GWP
Carbon Dioxide (CO ₂)	50-200	1
Methane (CH ₄)	12	25
Nitrous Oxide (N ₂ O)	114	298
HFC-134a	14	1,430
PFC: Tetrafluoromethane (CF ₄)	50,000	7,390
PFC: Hexafluoroethane (C ₂ F ₆)	10,000	12,200
Sulfur Hexafluoride (SF ₆)	3,200	22,800

Source: IPCC 2007.

HFC: hydrofluorocarbon; PFC: perfluorocarbon

Regulatory Setting

The primary GHG reduction regulatory legislation and plans (applicable to the project) at the State, regional, and local levels are described below. Implementation of California's GHG reduction mandates is primarily under the authority of the California Air Resources Board (CARB) at the state level, SMAQMD and the Sacramento Area Council of Governments (SACOG) at the regional level, and the City at the local level.

Letter to Mr. Scott Johnson
December 4, 2020

Page 13 of 19

Executive Order S-3-05

On June 1, 2005, Executive Order (EO) S-3-05 proclaimed that California is vulnerable to climate change impacts. It declared that increased temperatures could reduce snowpack in the Sierra Nevada, further exacerbate California's air quality problems, and potentially cause a rise in sea levels. To avoid or reduce climate change impacts, EO S-3-05 calls for a reduction in GHG emissions to the year 2000 level by 2010, to year 1990 levels by 2020, and to 80 percent below 1990 levels by 2050. Executive Orders are not laws and can only provide the governor's direction to state agencies to act within their authority to reinforce existing laws.

Assembly Bill 32 – Global Warming Solution Act of 2006

The California Global Warming Solutions Act of 2006, widely known as AB 32, requires that CARB develop and enforce regulations for the reporting and verification of statewide GHG emissions. CARB is directed by AB 32 to set a GHG emission limit, based on 1990 levels, to be achieved by 2020. The bill requires CARB to adopt rules and regulations in an open public process to achieve the maximum technologically feasible and cost-effective GHG emission reductions.

Executive Order B-30-15

On April 29, 2015, EO B-30-15 established a California GHG emission reduction target of 40 percent below 1990 levels by 2030. The EO aligns California's GHG emission reduction targets with those of leading international governments, including the 28 nation European Union. California is on track to meet or exceed the target of reducing GHGs emissions to 1990 levels by 2020, as established in AB 32. California's new emission reduction target of 40 percent below 1990 levels by 2030 will make it possible to reach the goal established by EO S-3-05 of reducing emissions 80 percent under 1990 levels by 2050.

Senate Bill 32

Signed into law by Governor Brown on September 8, 2016, Senate Bill (SB) 32 (Amendments to the California Global Warming Solutions Action of 2006) extends California's GHG reduction programs beyond 2020. SB 32 amended the Health and Safety Code to include Section 38566, which contains language to authorize CARB to achieve a statewide GHG emission reduction of at least 40 percent below 1990 levels by no later than December 31, 2030. SB 32 codified the targets established by EO B-30-15 for 2030, which set the next interim step in the State's continuing efforts to pursue the long-term target expressed in EO B-30-15 of 80 percent below 1990 emissions levels by 2050.

California Air Resources Board

On December 11, 2008, the CARB adopted the Climate Change Scoping Plan (Scoping Plan) as directed by AB 32. The Scoping Plan proposes a set of actions designed to reduce overall GHG emissions in California to the levels required by AB 32. Measures applicable to development projects include those related to energy-efficiency building and appliance standards, the use of renewable sources for electricity generation, regional transportation targets, and green building strategy. Relative to transportation, the Scoping Plan includes nine measures or recommended actions related to reducing vehicle miles traveled (VMT) and vehicle GHGs through fuel and efficiency measures. These measures would be implemented statewide rather than on a project by project basis (CARB 2008).

Letter to Mr. Scott Johnson
December 4, 2020

Page 14 of 19

In response to EO B-30-15 and SB 32, all state agencies with jurisdiction over sources of GHG emissions were directed to implement measures to achieve reductions of GHG emissions to meet the 2030 and 2050 targets. The mid-term target is critical to help frame the suite of policy measures, regulations, planning efforts, and investments in clean technologies and infrastructure needed to continue driving down emissions (CARB 2014). In December 2017, CARB adopted the 2017 Climate Change Scoping Plan Update, the Strategy for Achieving California's 2030 Greenhouse Gas Target, to reflect the 2030 target set by EO B 30 15 and codified by SB 32 (CARB 2017).

Sacramento Metropolitan Air Quality Management District

The SMAQMD provides direction and recommendations for the analysis of GHG impacts of a project and approach to mitigation measures in its CEQA Air Quality Guidelines (SMAQMD 2020a).

Sacramento Area Council of Governments

As required by the Sustainable Communities and Climate Protection Act of 2008 (SB 375), SACOG has developed the 2020 Metropolitan Transportation Plan and Sustainable Communities Strategy. This plan seeks to reduce GHG and other mobile source emissions through coordinated transportation and land use planning to reduce VMT.

City of Folsom

As part of the 2035 General Plan, the City of Folsom prepared an integrated Greenhouse Gas Emissions Reduction Strategy (GHG Strategy) to identify and reduce current and future community GHG emissions and those associated with the City's municipal operations. Adopted on August 28, 2018, the GHG Strategy also serves as the City's "plan for the reduction of greenhouse gases", per Section 15183.5 of the CEQA Guidelines, which provides the opportunity for tiering and streamlining of project-level emissions for certain types of discretionary projects subject to CEQA review that are consistent with the General Plan. The GHG Strategy includes goals and strategies to reduce community and municipal GHG emissions, compared to the 2005 baseline year, by 15 percent in 2020, 51 percent in 2035, and 80 percent in 2050 (City 2018a; City 2018b).

Significance Criteria

The following potential air quality impacts are based on Appendix G of the State CEQA Guidelines, a significant impact is identified if the project would result in any of the following:

- a) *Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?*
- b) *Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?*

In accordance with CEQA Guidelines Sections 15064(h)(3), 15130(d), and 15183(b), a project's incremental contribution to a cumulative GHG emissions effect may be determined not to be cumulatively considerable if it complies with the requirements of a qualified plan for the reduction of

Letter to Mr. Scott Johnson
December 4, 2020

Page 15 of 19

greenhouse gases. The City General Plan Policy NCR 3.2.8 provides criteria for project-level streamlining and tiering (City 2018a):

Projects subject to environmental review under CEQA may be eligible for tiering and streamlining the analysis of GHG emissions, provided they are consistent with the GHG reduction measures included in the GHG Strategy contained in the General Plan and EIR. The City may review such projects to determine whether the following criteria are met:

- Proposed project is consistent with the current general plan land use designation for the project site;
- Proposed project incorporates all applicable GHG reduction measures (as documented in the Climate Change Technical Appendix to the General Plan EIR) as mitigation measures in the CEQA document prepared for the project; and,
- Proposed project clearly demonstrates the method, timing and process for which the project will comply with applicable GHG reduction measures and/or conditions of approval, (e.g., using a CAP/GHG reduction measures consistency checklist, mitigation monitoring and reporting plan, or other mechanism for monitoring and enforcement as appropriate).

Greenhouse Gas Emissions Impact Analysis

a) *Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?*

Less than significant. To determine consistency with the City's GHG Strategy the criteria outlined in the Greenhouse Gas Reduction Strategy Consistency Checklist are shown and discussed in Table 6, *GHG Strategy Checklist* (City 2018c).

Table 6
GHG STRATEGY CONSISTENCY CHECKLIST

Checklist Item	Consistent?	Discussion
Part 1: Land Use Consistency		
A. The proposed project is consistent with the City's 2035 General Plan land use and zoning designations. If "Yes," proceed to Part 2 of the Checklist.	Yes	The project would be located within the footprint of an existing building in an existing cemetery in an area designated Open Space in the General Plan and zoned Open Space and Conservation District (OSC). According to the City Zoning Code Chapter 17.39, a cemetery is an allowed use in the OSC zone with a use permit. While the project may require a new conditional use permit, the project would not require a General Plan amendment or rezone. The project would be consistent with existing project site use and land use designation the General Plan.

Letter to Mr. Scott Johnson
December 4, 2020

Page 16 of 19

Checklist Item	Consistent?	Discussion
Part 2: GHG Reduction Measures Consistency		
E-1: Improve Building Energy Efficiency in New Development	Not Applicable	The project does not propose new buildings or substantial modifications to existing buildings.
E-2: Water Heater Replacement in Existing Residential Development	Not Applicable	The project is not an existing residential development.
E-3: Improve Building Energy Efficiency in Existing Development	Not Applicable	The project's proposed equipment would be installed within an existing metal shed and would not include any conditioned or occupied building space .
E-4: Increase Use of Renewable Energy in Existing Development	Not Applicable	The project's proposed equipment would be installed within an existing metal shed. No expansion or retrofit of existing buildings are proposed.
T-1: Reduce VMT Through Mixed and High-Density Land Use	Not Applicable	The project does not propose, and the project site open space land use designation and zoning does not permit, high density development and mixed uses .
T-2: Improve Streets and Intersections for Multi-Modal Use and Access	Not Applicable	The project does not include construction of new streets or improvement to existing streets.
T-3: Adopt Citywide TDM Program	Not Applicable	The project is not a residential, office, commercial retail, public facility or school development. The project would not include new parking spaces .
T-5: Reduce Minimum Parking Standards	Not Applicable	The project would not include new parking spaces.
T-6: Require the Use of High-Performance Renewable Diesel in Construction Equipment	Not Applicable	The project would require minimal off-road diesel construction equipment. At most, a small excavator or skid steer loader may be used for a few hours to prepare an area for a small concrete pad .
T-8: Install Electric Vehicle Charging Stations	Not Applicable	The project is not a residential development, does not propose new parking spaces, and existing parking spaces at the project building are less than 10.
SW-1: Increase Solid Waste Diversion	Not Applicable	The project would involve minimal construction activity and would not result in substantial construction waste which could be diverted.
W-1: Increase Water Efficiency in New Residential Development	Not Applicable	The project is not a new residential development and the project does not propose new indoor or outdoor water uses.
W-2: Reduce Outdoor Water Use	Not Applicable	The project does not propose substantial addition, alteration, or expansion to existing facilities or new outdoor water uses.

Source: City 2018c

As discussed in Table 6, the project would be consistent with the project site general plan land use designation and none of the GHG reduction measures listed in the GHG Strategy are applicable to the project. Therefore, the project would be consistent with the City's GHG Strategy and the project would not generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment. The impact would be less than significant.

Letter to Mr. Scott Johnson
December 4, 2020

Page 17 of 19

- b) *Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?*

Less Than Significant. As discussed in criterion a), above, the project would be consistent with the City's integrated General Plan and GHG Strategy. The GHG strategy was developed to meet the City's GHG reduction targets which were formulated to meet the statewide GHG mandates of AB 32 and SB 32. Therefore, the project would not conflict with an applicable plan adopted for the purposes of reducing GHG emissions and the impact would be less than significant.

SUMMARY

The project's emissions of criteria pollutants and precursors would be below SMAQMD thresholds and would result in a less than significant impact. Community health risks resulting from emissions of TACs from the project's operation of a crematory were evaluated in an HRA following OEHHA guidelines. Project TAC emissions would not result in increased health risks beyond the SMAQMD thresholds and the impact would be less than significant. The project would not be a substantial source of objectional odors and odor impacts would be less than significant. The project would be consistent with the City's integrated General Plan and GHG Strategy and GHG emissions impacts would be less than significant. The project would not conflict an applicable plan adopted for the purposes of reducing GHG emissions and the impact would be less than significant.

Sincerely,

Martin Rolph
Air Quality Specialist

Victor Ortiz
Senior Air Quality Specialist

Project 02576.00032.001

Mr. Scott Johnson, AICP
 Planning Manager
 City of Folsom, Community Development Department
 50 Natoma Street
 Folsom, CA 95630

Subject: Addendum to the Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Emissions Assessment

Dear Mr. Johnson:

HELIX Environmental Planning, Inc. (HELIX) completed the *Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Emissions Assessment* in July 2021 (HELIX 2021). Following the completion of the July 2021 analysis, Caring Services Group (Applicant) has requested alterations to the operating hours and number of daily cremations to occur on site. This Addendum provides an updated analysis based on these alterations.

PREVIOUS ANALYSIS

The July 2021 letter report assessed the air quality and greenhouse gas (GHG) emissions associated with the construction and operation of the proposed Folsom Lakeside Crematorium Project (project), including a health risk assessment (HRA) to evaluate potential community health risks from the project's emissions. The analysis was prepared to support environmental review under the California Environmental Quality Act (CEQA).

The analysis assumed a maximum cremation process rate of 200 pounds per hour, 400 pounds per day, and 100,000 pounds per year based on information provided by Applicant. The project's emissions of criteria pollutants and precursors were found to be below Sacramento Metropolitan Air Quality Management District (SMAQMD) thresholds and result in a less than significant impact. Community health risks resulting from emissions of toxic air contaminants (TACs) from the project's operation of a crematory were evaluated in an HRA following the Office of Environmental Health Hazard Assessment (OEHHA) guidelines. Project TAC emissions were found to result in less than significant impacts. The project was not found to be a substantial source of objectional odors and odor impacts were disclosed as less than significant. The project was found to be consistent with the City's integrated General Plan and GHG Strategy and GHG emissions impacts were disclosed as being less than significant. The project was found to not conflict with an applicable plan adopted for the purposes of reducing GHG emissions and the impact was disclosed as less than significant.

Letter to Mr. Scott Johnson, AICP
November 5, 2021

Page 2 of 4

REVISED ANALYSIS

As discussed previously, the Applicant has requested alterations to the operating hours and number of daily cremations to occur on the site. The Applicant has requested an increase in the daily process rate from the previously analyzed 400 pounds per day to a new value of 800 pounds per day. There are no changes to the project that would affect the construction analysis previously conducted. The analysis that follows focuses on daily operational emissions.

The HRA previously conducted to evaluate potential community health risks from the project's TAC emissions relies on the maximum hourly emissions rate and the average annual emissions generated by project operations. The hourly cremation process rate was previously set based on the maximum hourly capacity of the crematory; therefore, there is no change to the hourly process rate or maximum hourly emissions. The Applicant has not requested alteration to the total number of cremations to occur per year; therefore, there is no change to the annual cremation process rate or average annual emissions profile. Therefore, the potential health risks from the project would remain the same as previously disclosed.

Methods

Criteria pollutant and precursor emissions for long-term operation of the proposed crematory were calculated using propane combustion emissions factors from the USEPA AP-42 Compilation of Emissions Factors Chapter 1.5 (USEPA 2008), and crematory emissions factors provided by the SMAQMD, which combined USEPA AP-42 data and the USEPA Factor Information Retrieval Program (SMAQMD 2020a).

Air Quality Impact Analysis

Operation of a propane-fired crematory would be considered a new stationary source of emissions. The project may be subject to SMAQMD's Rule 201, *General Permit Requirements*, and Rule 202, *New Source Review*. The project would be required to implement best available control technology (BACT) for the minimization of emissions. BACT for crematories is incorporated into the product design in the form of controls which ensure maintenance of the correct temperatures and cycle times, and a secondary combustion chamber which ensures oxygenation and complete combustions of all fuels. As described in the Methods sections, above, criteria pollutant and precursor emissions for long-term operation of the proposed crematory were calculated using propane combustion emissions factors from AP-42 and crematory emission factors provided by SMAQMD. The project's calculated criteria and precursors operational emissions are compared to the SMAQMD thresholds in Table 1, *Operational Criteria Pollutant and Precursor Emissions*, and the calculation output sheets are included in Attachment A to this letter.

Letter to Mr. Scott Johnson, AICP
November 5, 2021

Page 3 of 4

Table 1
OPERATIONAL CRITERIA POLLUTANT AND PRECURSOR EMISSIONS

Pollutant	Project Emissions	SMAQMD Threshold	Exceed Threshold?
<i>Daily Emissions (pounds per day)</i>			
ROG	0.2	65	No
NO _x	2.4	65	No
CO	1.8	None	No
SO _x	0.9	None	No
PM ₁₀	0.5	80	No
PM _{2.5}	0.5	82	No

Source: SMAQMD 2020a; SMAQMD 2020b

As shown in Table 1, the project's operational emissions of criteria pollutants and precursors would not exceed the SMAQMD daily thresholds. Therefore, the project's operational emissions would not result in a cumulatively considerable net increase of any criteria pollutant and impacts would be less than significant.

SUMMARY

The project's daily emissions of criteria pollutants and precursors would remain below SMAQMD thresholds and would result in a less than significant impact. All other quantified emissions and significance determinations remain unchanged from what was presented in the July 2021 *Folsom Lakeside Crematorium Project Air Quality and Greenhouse Gas Emissions Assessment*.

Sincerely,

Victor Ortiz
Senior Air Quality Specialist

Tribal Consultation Record

January 8, 2021

Robert Edgerton, AICP CEP
 HELIX Environmental Planning, Inc.
 11 Natoma Street, Suite 155
 Folsom, California 95630

RE: Tribal Consultation Record for Compliance with Assembly Bill 52 and CEQA for the Lakeside Memorial Lawn Storage Shed Project, City of Folsom

Dear Mr. Edgerton:

The California Environmental Quality Act (CEQA), as amended in 2014 by Assembly Bill 52 (AB 52), requires that the City of Folsom provide notice to any California Native American tribes that have requested notice of projects subject to CEQA review, and consult with tribes that responded to the notice within 30 days of receipt with a request for consultation. Section 21073 of the Public Resources Code (PRC) defines California Native American tribes as "a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of the Statutes of 2004." This includes both federally and non-federally recognized tribes. For the City, these include the following tribes that previously submitted general request letters, requesting such noticing:

- Wilton Rancheria (letter dated January 13, 2020);
- Lone Band of Miwok Indians (letter dated March 2, 2016); and
- United Auburn Indian Community (UAIC) of the Auburn Rancheria (letter dated November 23, 2015).

The purpose of consultation is to identify Tribal Cultural Resources (TCRs) that may be significantly impacted by the proposed Project, and to allow the City to avoid or mitigate significant impacts prior to Project approval and implementation. Section 21074(a) of the PRC defines TCRs for the purpose of CEQA as:

Sites, features, places, cultural landscapes (geographically defined in terms of the size and scope), sacred places, and objects with cultural value to a California Native American tribe that are either of the following:

- a) included or determined to be eligible for inclusion in the California Register of Historical Resources; and/or
- b) included in a local register of historical resources as defined in subdivision (k) of Section 5020.1; and/or

- c) a resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1. In applying the criteria set forth in subdivision (c) of Section 5024.1, for the purposes of this paragraph the lead agency shall consider the significance of the resource to a California Native American tribe.

Because the first two criteria also meet the definition of a Historical Resource under CEQA, a TCR may also require additional consideration as a Historical Resource. TCRs may or may not exhibit archaeological, cultural, or physical indicators and can only be identified by a culturally affiliated tribe, which has been determined under State law to be the subject matter expert for TCRs.

CEQA requires that the City initiate consultation with tribes at the commencement of the CEQA process to identify TCRs. Furthermore, because a significant effect on a TCR is considered a significant impact on the environment under CEQA, consultation is required to develop appropriate avoidance, impact minimization, and mitigation measures. Therefore, in accordance with the requirements summarized above, the City carried out, or attempted to carry out, tribal consultation for the Project. The methods and results of tribal consultation are summarized below, and a copy of the complete non-confidential administrative record is provided in Attachment A.

1.0 SUMMARY OF CONSULTATION

Within 14 days of initiating CEQA review for the Project, on November 25, 2020, the City sent Project notification letters to the three California Native American tribes named above, which had previously submitted general consultation request letters pursuant to Section 21080.3.1(d) of the PRC. Each tribe was provided a brief description of the Project and its location, the contact information for the City's authorized representative, and a notification that the tribe has 30 days to request consultation.

1.1 Lone Band of Miwok Indians

The lone Band of Miwok Indians did not respond to the City's notification letter, and therefore, the threshold for carrying out tribal consultation with that tribe under PRC 21080.3.1(e) was not met.

1.2 UAIC

On December 11, 2020, and within the 30-day response timeframe, the City received an automated email from the United from UAIC that acknowledged receipt of the City's notification letter, thanked the City for consulting with UAIC, and attached the tribe's consultation record for the project. The response did not include any information on TCRs and indicated that the Tribal Historic Preservation Department would review the Project and respond; however, no further communication was received from UAIC. Because the tribe failed to provide comments or engage with the City pursuant to PRC 21082.3(d)(2), the City considers this consultation requirement complete.

1.3 Wilton Rancheria

On December 1, 2020, and within the 30-day response timeframe, Wilton Rancheria representative Mariah Mayberry responded to the City's initial notification letter by email requesting to formally initiate

consultation under AB 52 on the Project. In her response, Ms. Mayberry stated that the tribe would like to discuss the type of environmental review that is being conducted for the Project, Project alternatives, any significant effects, and mitigation measures for any direct, indirect, or cumulative impacts that the Project may cause to tribal cultural resources. Ms. Mayberry also requested a copy of the cultural resource assessment and results of the record search. Although she did not indicate or suggest that there are TCRs within the Project Area, Ms. Mayberry provided Wilton Rancheria's recommended mitigation measures for TCRs.

On December 14, 2020, the City formally initiated consultation with Wilton Rancheria by inviting Ms. Mayberry to a virtual meeting on December 17, 2020. In the City's initiation letter to the tribe, Associate Planner Josh Kinkade further clarified that the purpose of the Project is to remodel an existing shed, and that there will be no mass grading or excavation associated with the Project. Additionally, Mr. Kinkade provided a link to the Cultural Resources Inventory Report, prepared by ECORP Consulting, Inc. (2020) and a copy of the meeting agenda. Mr. Kinkade requested that if Ms. Mayberry is unable to attend that she contact him to reschedule the meeting to another time that is mutually agreeable.

On December 15, 2020, Ms. Mayberry contacted the City to indicate that she is unavailable to meet at the scheduled time. The City offered another meeting on January 5, 2021, at 8:30 a.m. On January 4, 2021, Ms. Mayberry contacted the City and asked that the meeting be scheduled for 10:00 a.m. instead, and the City accepted. After Ms. Mayberry or any other tribal representatives failed to report to the meeting at the scheduled time, the meeting was terminated by the City after 20 minutes. At approximately noon on January 5, Ms. Mayberry emailed the City to request availability for January 6, and the City offered 3:30 p.m. for another meeting. Ms. Mayberry did not attend the meeting and did not respond to the City to reschedule again. Because the tribe failed to engage meaningfully with the City after a reasonable and good-faith effort composed of multiple attempts to meet with the tribe, pursuant to PRC 21082.3(d)(2), the City considers this consultation requirement complete. Should Wilton Rancheria, or any other culturally affiliated tribe, submit public comments, the City will consider them in accordance with Section 11(b) of AB 52; however, after completing the required notification and consultation procedures specified in AB 52 and the PRC, the City has not been provided any information about TCRs that could be affected by the proposed Project. Therefore, the determination of impacts to TCRs is drawn from other lines of evidence, as summarized below.

1.4 Recommended Findings

Information about potential impacts to TCRs was drawn from the ethnographic context, the results of a search of the Sacred Lands File of the Native American Heritage Commission (NAHC), and the results of a cultural resources inventory prepared by ECORP (2020). The methods and results of these efforts are provided in ECORP 2020 and are hereby incorporated by reference. In summary, the ethnographic information reviewed for the Project, including ethnographic maps, does not identify any villages, occupational areas, or resource procurement locations in or around the current Project Area. In addition, the Sacred Lands File failed to identify any sacred lands or tribal resources in or near the Project Area. The cultural resources survey did not reveal any Native American archaeological sites within or adjacent to the proposed Project Area. Finally, as summarized above, two of the three tribes notified of the Project responded to the City's offer to consult; however, none provided any information about TCRs in the

Project Area. This is not unexpected, as the Project is in a highly disturbed environment and does not involve substantial ground disturbance. As noted in the City's initial notification letter and follow up correspondence with tribes:

"the purpose of this project is to remodel an existing shed to install crematory equipment inside of it, which is a high-temperature furnace with associated equipment. The existing driveway area adjacent to the shed will be subject to minor improvements, but there is no mass grading or major excavation associated with the remodeling of the shed. There will be no new construction of buildings or structures" (Josh Kinkade to Mariah Mayberry, December 14, 2020).

In reviewing the lines of evidence summarized above, this Project will not have an impact on known TCRs. There exists an extremely low potential for the discovery of previously unknown TCRs during Project construction, but if TCRs were to be encountered, the Project activity could result in a significant impact. Implementation of unanticipated discovery procedures, as provided in mitigation measure TCR-1 below, would reduce that impact to less than significant.

TCR-1: Unanticipated Discovery of Tribal Cultural Resources. If potentially significant Tribal Cultural Resources (TCRs) are discovered during ground disturbing construction activities, all work shall cease within 50 feet of the find. A Native American Representative from traditionally and culturally affiliated Native American Tribes that requested consultation on the project shall be immediately contacted and invited to assess the significance of the find and make recommendations for further evaluation and treatment, as necessary. If deemed necessary by the City, a qualified cultural resources specialist meeting the Secretary of Interior's Standards and Qualifications for Archaeology, may also assess the significance of the find in joint consultation with Native American Representatives to ensure that Tribal values are considered. Work at the discovery location cannot resume until the City, in consultation as appropriate and in good faith, determines that the discovery is either not a TCR, or has been subjected to culturally appropriate treatment, if avoidance and preservation cannot be accommodated.

If you have any questions, you may reach me by phone at (916) 782-9100 or by email at LWestwood@ecorpconsulting.com.

Sincerely,

Lisa Westwood, RPA
Vice President and Director of Cultural Resources

Non-Confidential Tribal Consultation Record

Folsom Crematorium

AB 52 Log

City received a general request letter dated November 23, 2015 from United Auburn Indian Community.

City received a general request letter dated January 13, 2020 from Wilton Rancheria.

City received a general request letter dated March 2, 2016 from Lone Band of Miwok Indians.

November 25, 2020: Initial notices were mailed to UAIC, Lone, and Wilton Rancheria. The 30-day response window closes on December 25, 2020.

December 1, 2020: City received an email from Ms. Mariah Mayberry with Wilton Rancheria formally requesting consultation under AB 52. In her response, Ms. Mayberry requested the opportunity for a tribal representative to participate in cultural resource surveys and requested copies of all cultural resource assessments and results of record searches. The tribe also provided their recommended mitigation measures to the City.

December 11, 2020: City staff received an email from UAIC containing a PDF form that acknowledged receipt of the notice of opportunity to consult on the project, but the tribe did not request nor defer to engage in consultation.

December 14, 2020: City initiated consultation with Wilton by email, invited to consultation meeting on 12/17. Wilton requested to reschedule to 1/5/2021.

January 5, 2021: City held consultation meeting, however Wilton did not attend.

RE: AB 52 Notification Request, California Environmental Quality Act Public Resources Code section 21080.3, subd. (b) Request for Formal Notification of Proposed Projects within the United Auburn Indian Community (UAIC) of the Auburn Rancheria's Geographic Area of Traditional and Cultural Affiliation

Dear City of Folsom Representative:

In accordance with Public Resources Code Section 21080.3.1, subd. (b), The United Auburn Indian Community (UAIC) of the Auburn Rancheria, which is traditionally and culturally affiliated with a geographic area within your agency's geographic area of jurisdiction, requests formal notice of and information on proposed projects for which your agency will serve as a lead agency under the California Environmental Quality Act (CEQA), Public Resources Code Section 21000 et seq.

Enclosed with this letter is a copy of a map that depicts the ancestral territory that the UAIC is traditionally and culturally affiliated with. UAIC's traditionally and culturally affiliated geographic area is supported by, and has been developed through, multiple lines of evidence including oral tradition, history, ethnography, geography, linguistic, kinship, biology, archaeology, anthropology, folklore, other relevant information and expert opinion, and Congressional action through the Auburn Indian Restoration Act of 1994 (H.R. 4228 [103rd]).

Pursuant to Public Resources Code section 21080.3.1, subd. (b), and until further notice, we hereby designate the following person as the tribe's lead contact person for purposes of receiving notices of proposed projects from your agency:

Lead Contact:
Gene Whitehouse,
Chairman
10720 Indian Hill Road
Auburn, CA 95603
916-883-2320

Copies to:
Jason Camp
Tribal Historic Preservation Officer
10720 Indian Hill Road
Auburn, CA 95603
(530) 883-2320

Marcos Guerrero
Cultural Resources Manager
10720 Indian Hill Road
Auburn, CA 95603
(530) 883-2364
mguerrero@auburnrancheria.com

We request that all notices be sent via certified U.S. Mail with return receipt and that your notices specify a lead contact person for your agency. Following receipt and review of the information your agency provides, within the 30-day period outlined in Public Resources Code section 21080.3.1, subd. (d), the UAIC may request consultation, as defined by Public Resources Code section 21080.3.1, subd. (b), pursuant to Public Resources Code section 21080.3.2 to discuss issues including the type of environmental review to be conducted, project alternatives, significant effects of the project and mitigation measures for any project impacts (direct, indirect and cumulative) a specific project may cause to tribal cultural resources.

For your information, UAIC's policy is to be present during project cultural resource surveys, including initial pedestrian surveys, to identify tribal cultural resources. UAIC's policy is also to be provided all existing cultural resource assessments, including the request for and results of any records search that may have been conducted prior to the initial survey or consultation meeting. Finally, UAIC's general policy is preservation in place and avoidance of tribal cultural resources, and any subsurface testing or data recovery must not occur without first consulting with UAIC and receiving UAIC's written consent.

We recommend that your agency retain this correspondence in your permanent files. If you have any questions or need additional information, please contact Marcos Guerrero, Cultural Resources Manager, at (530) 883-2364 or by email at mguerrero@auburnrancheria.com.

Sincerely,

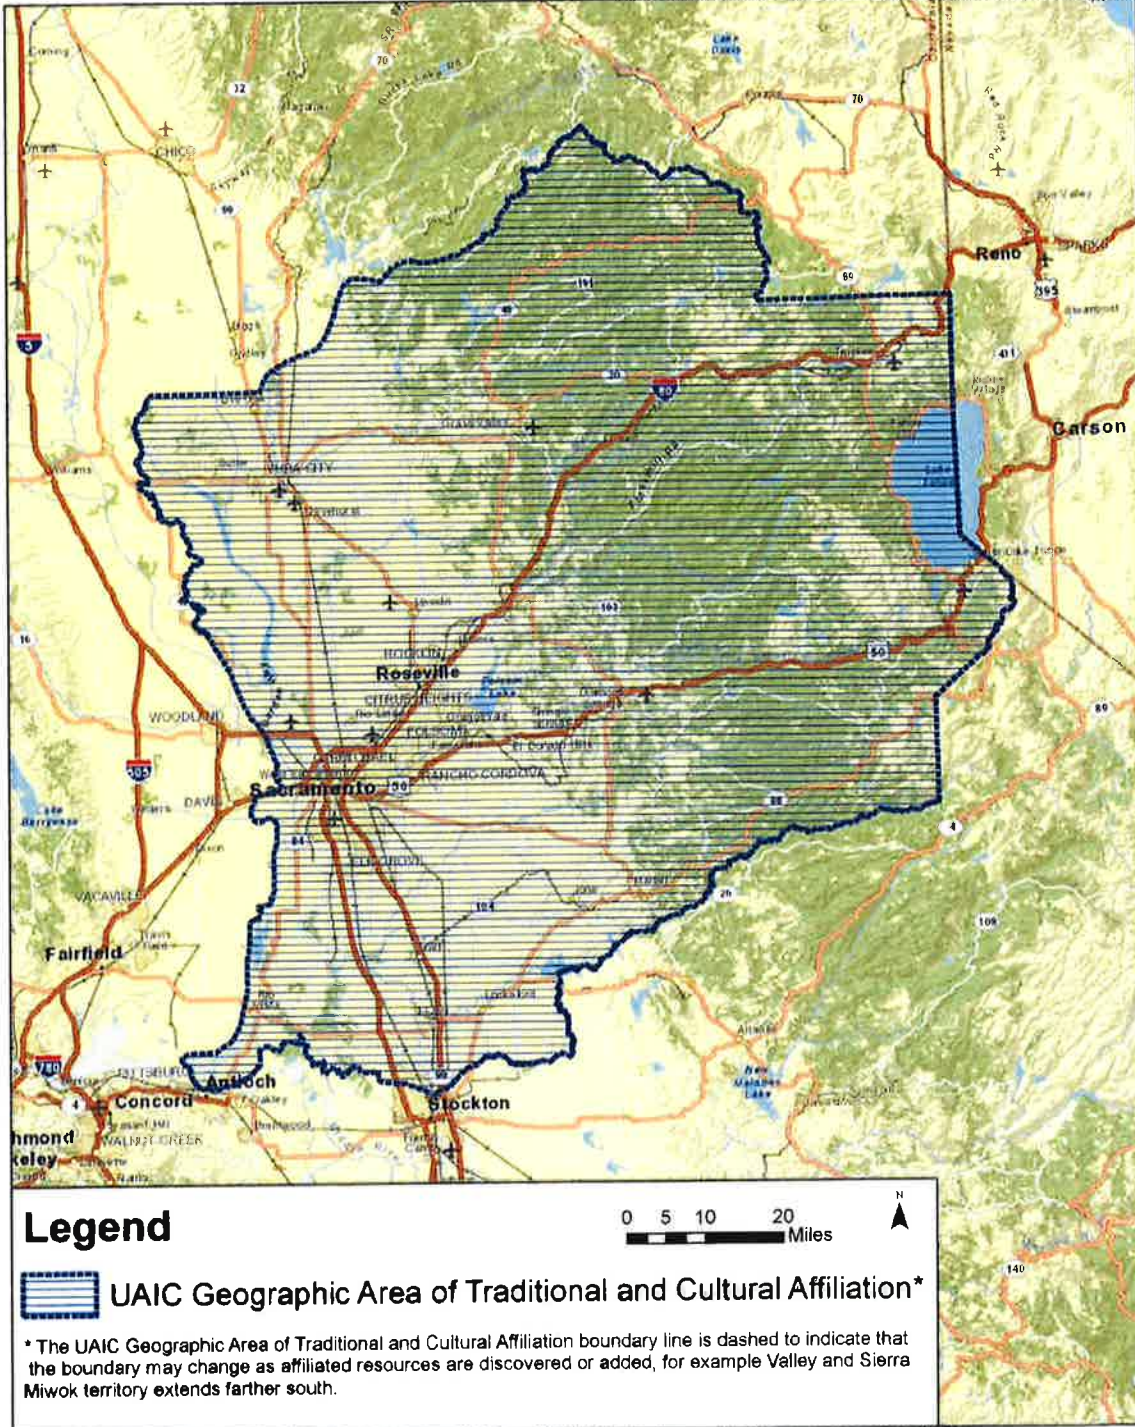

Gene Whitehouse,
Chairman

CC: Jason Camp, THPO
Marcos Guerrero, CRM
Cynthia Gomez, NAHC

UAIC Geographic Area of Traditional and Cultural Affiliation (for the purposes of California AB 52)

This area includes all of Amador, El Dorado, Nevada, Placer, Sacramento, Sutter and Yuba counties as well as portions of Butte, Plumas, San Joaquin, Sierra, Solano, and Yolo counties.

Map Created on 10/28/2015 by the UAIC Tribal Preservation Department

This map is no substitute for direct consultation with UAIC prior to considering any proposed project or commencing any archaeological activities in or around sensitive areas.

Note: While we make every effort to identify Tribal Cultural Resources that exist within the UAIC Geographic Area of Traditional and Cultural Affiliation, it is highly probable that there are additional, older sites that we have not yet identified due to restricted access or other reasons or that agricultural or construction activities have distributed burials and cultural materials beyond the previously known boundaries of these sites. Even if these materials are in a disturbed condition, they still retain cultural value to UAIC and should be respected and protected. Because of this, thorough survey with a qualified Native American Monitor to confirm site boundaries and search for unknown sites is critical. This survey should be conducted after consultation with the Tribe and prior to the final determination of the type of environmental document to be used.

RE: California Environmental Quality Act Public Resources Code section 21080.3, subd. (b) Request for Formal Notification of Proposed Projects Within Wilton Rancheria Tribe's Geographic Area of Traditional and Cultural Affiliation

Dear Sir or Madam,

As of the date of this letter, in accordance with Public Resources Code Section 21080.3.1, subd. (b), Wilton Rancheria, which is traditionally and culturally affiliated with a geographic area within your agency's geographic area of jurisdiction, requests formal notice of and information on proposed projects for which your agency will serve as a lead agency under the California Environmental Quality Act (CEQA), Public Resources Code section 21000 et seq.

Pursuant to Public Resources Code section 21080.3.1, subd. (b), and until further notice, we hereby designate the following person as the tribe's lead contact person for purposes of receiving notices of proposed projects from your agency:

Attn: Chairman Raymond C. Hitchcock / Director
Ralph Hatch Wilton Rancheria, Cultural Preservation
Department
9415 Rancheria Drive
Wilton, CA 95693 crd@wiltonrancheria-nsn.gov
rhatch@wiltonrancheria-nsn.gov

We request that all notices be sent via certified U.S. Mail with return receipt. Following receipt and review of the information your agency provides, within the 30-day period proscribed by Public Resources Code section 21080.3.1, subd. (d), the Wilton Rancheria may request consultation, as defined by Public Resources Code section 21080.3.1, subd. (b), pursuant to Public Resources Code section 21080.3.2 to mitigate any project impacts a specific project may cause to tribal cultural resources.

If you have any questions or need additional information, please contact our lead contact person listed above.

Respectfully,

Ralph Hatch

RE: Formal Request for Tribal Consultation Pursuant to the California Environmental Quality Act (CEQA), Public Resources Code section 21080.3.1, subs. (b), (d) and (e) for City of Folsom

Dear , Mr. Miller

This letter constitutes a formal request for tribal consultation for the first phase of planning under the provisions of the California Environmental Quality Act (CEQA) (Public Resources Code section 21080.3.1 subdivisions (b), (d) and (e)) for the mitigation of potential project impacts to tribal cultural and environmental resources for the above referenced project. The Ione Band of Miwok Indians requests formal notice and information for all projects within your agency's jurisdiction.

The Ione Band of Miwok Indians requests consultation on the following topics listed below, which shall be included in consultation if requested (Public Resources Code section 21080.3.2, subd. (a)):

- Alternatives to the project
- Recommended mitigation measures
- Significant effects of the project

The Ione Band of Miwok Indians also requests consultation on the following discretionary topics listed below (Public Resources Code section 21080.3.2, subd. (a)):

- Type of environmental review necessary
- Significance of tribal cultural resources, including any regulations, policies or standards used by your agency to determine significance of tribal cultural resources
- Significance of the project's impacts on tribal cultural resources
- Project alternatives and/or appropriate measures for preservation or mitigation that we may recommend, including, but not limited to:

- (1) Avoidance and preservation of the resources in place, pursuant to Public Resources Code section 21084.3, including, but not limited to, planning and construction, geotechnical tests, utility location, and pedestrian surveys to avoid harming the resources (including water, endangered tribal plant resources, and endangered animal resources), and to protect the cultural and natural context, or planning greenspace, parks or other open space, to incorporate the resources with culturally appropriate protection and management criteria;

lone Band of Miwok Indians

A Federally Recognized Sovereign Tribe

(2) Treating the resources with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resources, including but not limited to the following:

- Protecting the cultural character and integrity of the resource
- Protecting the traditional use of the resource
- Protecting the confidentiality of the resource

(3) Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places

(4) Protecting the resource

Additionally, the lone Band of Miwok Indians would like to receive any cultural resources assessments or other assessments that have been completed on all or part of the project's potential "area of project effect" (APE), including, but not limited to:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response
- Notification of whether the probability is low, moderate, or high that cultural resources are located in the APE
- Notification if a records search indicates a low, moderate or high probability that unrecorded cultural resources are located in the potential APE
- Notification if a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present

2. The results of any archaeological inventory survey that was conducted, including:

- Any report that may contain site forms, site significance, and suggested mitigation measures
- All information regarding site locations, Native American human remains, and associated funerary objects; such information should be placed in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code Section 6254.10.

Lone Band of Miwok Indians

A Federally Recognized Sovereign Tribe

3. The results of any Sacred Lands File (SFL) check conducted through the Native American Heritage Commission. The request form can be found at <http://www.dot.ca.gov/hq/env/cultural/#templates> under Compliance Document Templates. Click on the link *Sacred Lands Inventory Form* to download the pdf. USGS 7.5- minute quadrangle name, township, range, and section are required for the search.
4. Any ethnographic studies conducted for any area including all or part of the potential APE
5. Any geotechnical reports regarding all or part of the potential APE

We would like to remind your agency that CEQA Guidelines section 15126.4, subdivision (b)(3) states that preservation-in-place is the preferred manner of mitigating impacts to archaeological sites. Section 15126.4, subd. (b)(3) of the CEQA Guidelines has been interpreted by the California Court of Appeal to mean that "feasible preservation in place must be adopted to mitigate impacts to historical resources of an archaeological nature unless the lead agency determines that another form of mitigation is available and provides superior mitigation of impacts." *Madera Oversight Coalition v. County of Madera* (2011) 199 Cal.App.4th 48, disapproved on other grounds, *Neighbors for Smart Rail v. Exposition Metro Line Construction Authority* (2013) 57 Cal.4th 439.

The Lone Band of Miwok Indians expects to begin consultation within 30 days of your receipt of this letter. Please contact the Cultural Committee of the Lone Band of Miwok Indians.

Thank you.

Sincerely,

RE: Notice of Opportunity to Consult under Assembly Bill 52 for the Lakeside Memorial Lawn Storage Shed Project, City of Folsom (File # PN 20-160)

Dear Chairwoman Setshwaelo:

The City of Folsom is initiating environmental review under the California Environmental Quality Act (CEQA) for the Lakeside Memorial Lawn Crematorium Project. Igor Semenyuk, on behalf of Lakeside Memorial Lawn (applicant), is proposing to repurpose an existing corrugated steel storage shed at Lakeside Memorial Lawn, located at 1201 Forrest Street. The project includes the installation of a human crematorium in an existing shed, located northeast of the existing mausoleum structures in a previously disturbed maintenance area. Minor improvements to the small existing access road adjacent to the shed are also proposed. Project site plans are enclosed for your reference.

Assembly Bill 52 (AB 52) and Section 21080.3.1(d) of the California Public Resources Code (PRC) require that we respond to your written request to be notified of projects in our jurisdiction that will be reviewed under CEQA. Your name was provided to us as the point of contact for your tribe. We are hereby notifying you of an opportunity to consult with us regarding the potential for this project to impact Tribal Cultural Resources, as defined in Section 21074 of the PRC. The purposes of tribal consultation under AB 52 are to determine, as part of the CEQA review process, whether or not Tribal Cultural Resources are present within the project area, and if so, whether or not those resources will be significantly impacted by the proposed project. If Tribal Cultural Resources may be significantly impacted, then consultation will also help to determine the most appropriate way to avoid or mitigate those impacts.

In accordance with Section 21080.3.1(d) of the PRC, you have 30 days from the receipt of this letter to either request or decline consultation in writing for this project. Please send your written response to my attention at the City of Folsom, Community Development Department, 50 Natoma Street, Folsom, 95630. You may also reach me by email at jkinkade@folsom.ca.us or at 916-461-6209. In your response, please reference the following project name: Lakeside Memorial Lawn Storage Shed, PN 20-160. If I do not receive a response within 30 days, then we will proceed.

Thank you and we look forward to your response.

Respectfully,

Josh Kinkade

RE: Notice of Opportunity to Consult under Assembly Bill 52 for the Lakeside Memorial Lawn Storage Shed Project, City of Folsom (File # PN 20-160)

Dear Director Hatch:

The City of Folsom is initiating environmental review under the California Environmental Quality Act (CEQA) for the Lakeside Memorial Lawn Crematorium Project. Igor Semenyuk, on behalf of Lakeside Memorial Lawn (applicant), is proposing to repurpose an existing corrugated steel storage shed at Lakeside Memorial Lawn, located at 1201 Forrest Street. The project includes the installation of a human crematorium in an existing shed, located northeast of the existing mausoleum structures in a previously disturbed maintenance area. Minor improvements to the small existing access road adjacent to the shed are also proposed. Project site plans are enclosed for your reference.

Assembly Bill 52 (AB 52) and Section 21080.3.1(d) of the California Public Resources Code (PRC) require that we respond to your written request to be notified of projects in our jurisdiction that will be reviewed under CEQA. Your name was provided to us as the point of contact for your tribe. We are hereby notifying you of an opportunity to consult with us regarding the potential for this project to impact Tribal Cultural Resources, as defined in Section 21074 of the PRC. The purposes of tribal consultation under AB 52 are to determine, as part of the CEQA review process, whether or not Tribal Cultural Resources are present within the project area, and if so, whether or not those resources will be significantly impacted by the proposed project. If Tribal Cultural Resources may be significantly impacted, then consultation will also help to determine the most appropriate way to avoid or mitigate those impacts.

In accordance with Section 21080.3.1(d) of the PRC, you have 30 days from the receipt of this letter to either request or decline consultation in writing for this project. Please send your written response to my attention at the City of Folsom, Community Development Department, 50 Natoma Street, Folsom, 95630. You may also reach me by email at jkinkade@folsom.ca.us or at 916-461-6209. In your response, please reference the following project name: Lakeside Memorial Lawn Storage Shed, PN 20-160. If I do not receive a response within 30 days, then we will proceed.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon,

This letter is notice that Wilton Rancheria would like to initiate consultation under AB 52.

We would like to discuss the topics listed in Cal. Public Resources Code section 21080.3.2(a), including the type of environmental review to be conducted for the project; project alternatives; the project's significant effects; and mitigation measures for any direct, indirect, or cumulative impacts the project may cause to tribal cultural resources. As consultation progresses, we may also wish to discuss design options that would avoid impacts to tribal cultural resources; the scope of any environmental document that is prepared for the project; pre-project surveys; and tribal cultural resource identification, significance evaluations and culturally-appropriate treatment.

This letter is also a formal request to allow Wilton Rancheria tribal representatives to observe and participate in all cultural resource surveys, including initial pedestrian surveys for the project. Please send us all existing cultural resource assessments, as well as requests for, and the results of, any records searches that may have been conducted prior to our first consultation meeting. If tribal cultural resources are identified within the project area, it is Wilton Rancheria's policy that tribal monitors must be present for all ground disturbing activities. Finally, please be advised that our preference is to preserve tribal cultural resources in place and avoid them whenever possible. Subsurface testing and data recovery must not occur without first consulting with Wilton Rancheria and receiving Wilton Rancheria's written consent.

In the letter Josh Kinkade is identified as the lead contact person for consultation on the proposed project. Mariah Mayberry will be Wilton Rancheria's point of contact for this consultation. Please contact Mariah by phone (916) 683-6000 ext. 2023 or email at mmayberry@wiltonrancheria-nsn.gov to begin the consultation process.

Thank you for involving Wilton Rancheria in the planning process at an early stage. We ask that you make this letter a part of the project record and we look forward to working with you to ensure that tribal cultural resources are protected.

Sincerely,

Mariah Mayberry

Wilton Rancheria

Dear Ms. Mayberry,

Thank you for your response, below, regarding the above-referenced project. We appreciate the tribe's interest in this project and welcome the opportunity to discuss this project in further detail with you. We are hereby initiating consultation with you under Assembly Bill 52 by inviting you to a virtual meeting via Microsoft Teams at 8:30 a.m. on December 17, 2020. If you are unable to attend, please contact me to schedule an alternate date.

In order to facilitate our discussion, I would like to provide some additional information to you. First, the purpose of this project is to remodel an existing shed to install crematory equipment inside of it, which is a high-temperature furnace with associated equipment. The existing driveway area adjacent to the shed will be subject to minor improvements, but there is no mass grading or major excavation associated with the remodeling of the shed. There will be no new construction of buildings or structures.

Second, as requested, below is a link from which you can download a copy of the draft cultural resources technical report for the project, titled "Cultural Resources Inventory Report for the Lakeside Memorial Lawn Storage Shed Project, Folsom, California," prepared by ECORP Consulting, Inc. (November 2020). Please note that this report includes confidential information that is restricted from public distribution by state and federal law. If you are having trouble accessing the documents, you may have to open the link below in Internet Explorer or Microsoft Edge. Let me know if the link isn't working.

<https://ecorpconsulting-my.sharepoint.com/:f/p/lwestwood/EhToQu3F6Y5IvGZuP81ACEoB5nGB7feXGXTV445bLeBiRA?e=0on1Ef>

The link above also includes the link to the virtual meeting and will include a copy of the meeting agenda. If you have any questions, I can be reached by email at jkinkade@folsom.ca.us or by phone at (916)-461-6209. Thank you and we look forward to consulting with you.

Subject: Lakeside Memorial Lawn Storage Shed (PN 20-160) Notification Confirmation

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

The United Auburn Indian Community thanks you for your commitment to consultation for the following project:

Lakeside Memorial Lawn Storage Shed (PN 20-160)

You will find a copy of your consultation submission attached for your records.

Our Tribal Historic Preservation Department will review the project and respond as soon as possible. If you need to speak with someone regarding the project or your submission, please contact the Tribal Office at (530) 883-2390.

The United Auburn Indian Community is now accepting electronic consultation requests and project notifications. To learn more, [click here](#).

**This is an automated email. Replies to this address will not be received.

Nothing in this e-mail is intended to constitute an electronic signature for purposes of the Electronic Signatures in Global and National Commerce Act (E-Sign Act), 15, U.S.C. §§ 7001 to 7006 or the Uniform Electronic Transactions Act of any state or the federal government unless a specific statement to the contrary is included in this e-mail.

Thank you for consulting with the UAIC Please complete one form for each notification.

How to submit a consultation notification or project update:

1. One form must be completed for each project.
2. Forms cannot be saved and completed at a later time.
3. Include all relevant project information.
4. Upload file attachments. Multiple files can be attached.
5. Submit form.
6. You will receive a submission receipt via email when submission is complete. UAIC prefers our online submission form over certified or hard copy letters.

Contact the Tribal Office at (530) 883-2390 for questions or concerns. Ask for Tribal Historic Preservation or use the [contact form located on our website](#).

AGENDA

City of Folsom and Wilton Rancheria AB 52 Consultation Meeting for the Lakeside Memorial Lawn Storage Shed Project

Date: January 5, 2021

Time: 10:00 am

Location: Microsoft Teams

Host: Josh Kinkade, City of Folsom, (916) 461-6209

Meeting Objective: for the City of Folsom to share project information with the tribe and receive information from the tribe about potential impacts to tribal cultural resources to inform the CEQA document.

Overall Goal: for the City to make a decision about the project in a manner that is mindful of, and takes into consideration, impacts to tribal cultural resources.

Agenda:

1. Introductions
2. Project Orientation and Overview (City)
 - Purpose and Need for the Proposed Project
 - Project Description
 - Type and Scope of Environmental Review under CEQA
 - Alternatives and Design Options Considered
 - Anticipated Project Schedule
 - Summary of the Cultural Resources Survey (transmitted electronically to Wilton Rancheria on December 14, 2020)
3. Discussion of Tribal Cultural Resources (Wilton Rancheria)
 - Any Tribal Cultural Resources within the Project Area? If so:
 - Description and Location
 - Significant Effects, if any?
 - Opportunities to Avoid, if present?
 - Mitigation Measures for any Direct, Indirect, or Cumulative Impacts, if they will occur?
4. Action Items

The screenshot shows a web browser window displaying the OneDrive interface. The browser's address bar shows the URL: `ecorpcconsulting-my.sharepoint.com/personal/lwestwood_ecorpcconsulting_com/_layouts/15/onedrive.aspx?id=%2Fpersonal%2Fwestwood_eco...`. The OneDrive header includes the user name 'Lisa Westwood', a search bar, and navigation options like '+ New', 'Upload', 'Share', 'Copy link', 'Download', and 'Automate'. The main content area is titled 'My files' and shows a folder named 'Lakeside Crematorium - AB 52 Transfer Folder'. Inside this folder, there is a table of files:

Name	Modified	Modified By	File size	Sharing
2020-162_Folsom Crematorium_11-23-202...	Yesterday at 3:07 PM	Lisa Westwood	10.5 MB	Shared
Agenda_AB 52 Meeting_Lakeside Crematori...	A few seconds ago	Lisa Westwood	174 KB	Shared
Meeting Link.docx	Yesterday at 3:10 PM	Lisa Westwood	12.0 KB	Shared

At the bottom of the interface, there are links for 'Get the OneDrive apps' and 'Return to classic OneDrive'.

Mitigation Monitoring and Reporting Program

MITIGATION MONITORING AND REPORTING PROGRAM LAKESIDE MEMORIAL LAWN CREMATORIUM

Purpose of Mitigation Monitoring and Reporting Program: The California Environmental Quality Act (CEQA), Public Resources Code Section 21081.6, requires that a Mitigation Monitoring and Reporting Program (MMRP) be established upon completing findings. CEQA stipulates that “the public agency shall adopt a reporting or monitoring program for the changes to the project which it has adopted or made a condition of project approval in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation.”

This MMRP has been prepared in compliance with Section 21081.6 of CEQA to ensure that all required mitigation measures are implemented and completed according to schedule and maintained in a satisfactory manner during the construction and operation of the project, as required. A table (attached) has been prepared to assist the responsible parties in implementing the MMRP. The table identifies individual mitigation measures, monitoring/mitigation timing, the responsible person/agency for implementing the measure, and space to confirm implementation of the mitigation measures. The numbering of mitigation measures follows the numbering sequence found in the Initial Study and Mitigated Negative Declaration.

The City of Folsom is the lead agency for the project under CEQA and shall administer and implement the MMRP. The City is responsible for review of all monitoring reports, enforcement actions, and document disposition. The City shall rely on information provided by the project site observers/monitors (e.g., construction manager, project manager, biologist, archaeologist, etc.) as accurate and up-to-date and shall provide personnel to field check mitigation measure status, as required.

This page intentionally left blank.

**MITIGATION MONITORING AND REPORTING PROGRAM FOR THE
LAKESIDE MEMORIAL LAWN CREMATORIUM**

Mitigation Measure	Monitoring / Mitigation Timing	Reporting / Responsible Party	Verification of Compliance	
			Initials	Date
AIR QUALITY				
<p>Mitigation Measure AIR-01: Implement SMAQMD’s Basic Construction Emission Control Practices. City approval of grading and/or improvement plans for the proposed project shall include the following SMAQMD Basic Construction Emission Control Practices:</p> <ul style="list-style-type: none"> • All exposed surfaces shall be watered two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads. • Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways shall be covered. • Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited. • Limit vehicle speeds on unpaved roads to 15 miles per hour. • All roadways, driveways, sidewalks, parking lots shall be paved as soon as possible. In addition, building pads shall be laid as soon as possible after grading unless seeding or soil binders are used. • Minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes (as required by the state airborne toxics control measure [Title 13, Section 2485 of the California Code of Regulations]). Provide clear signage that posts this requirement for workers at the entrances to the site. • Maintain all construction equipment in proper working condition according to manufacturer’s specifications. The equipment shall be checked by a certified mechanic and determine to be running in proper condition before it is operated. 	<p>Prior to and during construction – this mitigation measure shall be included in all construction documents for implementation during construction.</p>	<p>City of Folsom; Project Applicant; Construction Contractor</p>		

CULTURAL RESOURCES				
<p>Mitigation Measure CUL-01: Avoid impacts to previously unknown archaeological resources. Prior to the initiation of ground disturbing activity, a qualified professional archaeologist shall be retained to develop and deliver a contractor awareness training program to construction supervisors. The purpose of the training is to ensure that contractors are aware of the need to limit their activity, including equipment storage, staging, parking, and ground-disturbance to only those locations identified as work areas on the official site plans.</p> <p>Prior to the initiation of ground disturbing activity, a qualified professional archaeologist shall be retained to monitor the installation of temporary high-visibility exclusionary fencing along the toe of existing mine tailings features adjacent to the shed. The fencing shall remain in place until all project activities are completed. City inspectors shall include a verification of the fencing during all required inspections. In the event that exclusionary fencing has failed, the construction supervisor must re-install or repair the fence within 24 hours.</p>	<p>Prior to and during construction – this mitigation measure shall be included in all construction documents for implementation during construction.</p>	<p>City of Folsom; Archaeologist or Qualified Cultural Resource Monitor; Construction Contractor</p>		
<p>Mitigation Measure CUL-02: Minimize impacts to any previously unknown archaeological resources during construction. If subsurface deposits believed to be cultural in origin are discovered during construction, all work must halt within a 50-foot radius of the discovery. A qualified professional archaeologist, meeting the Secretary of the Interior’s Professional Qualification Standards for pre-contact and historic archaeologist, shall be retained to evaluate the significance of the find, and shall have the authority to modify the no-work radius as appropriate, using professional judgment. The following notifications shall apply, depending on the nature of the find:</p> <ul style="list-style-type: none"> • If the professional archaeologist determines that the find does not represent a cultural resource, work may resume immediately, and no agency notifications are required. • If the professional archaeologist determines that the find does represent a cultural resource from any time period or cultural affiliation, he or she shall immediately notify the City to consult on a finding of eligibility and implement appropriate 	<p>Prior to and during construction – this mitigation measure shall be included in all construction documents for implementation during construction.</p>	<p>City of Folsom; Archaeologist or Qualified Cultural Resource Monitor; Construction Contractor</p>		

<p>treatment measures, if the find is determined to be a Historical Resource under CEQA, as defined in Section 15064.5(a) of the CEQA Guidelines or a historic property under Section 106 NHPA, if applicable. Work may not resume within the no-work radius until the City, through consultation as appropriate, determines that the site either: 1) is not an Historical Resource under CEQA, as defined in Section 15064.5(a) of the CEQA Guidelines; or 2) that the treatment measures have been completed to its satisfaction.</p>				
<p>Mitigation Measure CUL-03: Avoid and minimize impacts related to accidental discovery of human remains. If subsurface deposits believed to be cultural or human in origin are discovered during construction, all work must halt within a 50-foot radius of the discovery. A qualified professional archaeologist, meeting the Secretary of the Interior’s Professional Qualification Standards for pre-contact and historic archaeologist, shall be retained to evaluate the significance of the find, and shall have the authority to modify the no-work radius as appropriate, using professional judgment. The following notifications shall apply, depending on the nature of the find:</p> <ul style="list-style-type: none"> • If the find includes human remains, or remains that are potentially human, he or she shall ensure reasonable protection measures are taken to protect the discovery from disturbance (AB 2641). The archaeologist shall notify the Sacramento County Coroner (per §7050.5 of the Health and Safety Code). The provisions of §7050.5 of the California Health and Safety Code, §5097.98 of the California PRC, and Assembly Bill 2641 will be implemented. If the Coroner determines the remains are Native American and not the result of a crime scene, the Coroner will notify the NAHC, which then will designate a Native American Most Likely Descendant (MLD) for the project (§5097.98 of the PRC). The designated MLD will have 48 hours from the time access to the property is granted to make recommendations concerning treatment of the remains. If the landowner does not agree with the recommendations of the MLD, the NAHC can mediate (§5097.94 of the PRC). If no agreement is reached, the landowner must rebury the remains where they will not be further disturbed (§5097.98 of the PRC). This will also include either recording the site with the NAHC or the appropriate Information Center; using an open space or conservation zoning designation or easement; or recording a reinternment document with the county in which the property is located (AB 2641). If the Coroner determines that the remains are 	<p>Prior to and during construction – this mitigation measure shall be included in all construction documents for implementation during construction.</p>	<p>City of Folsom; Archaeologist or Qualified Cultural Resource Monitor; Construction Contractor</p>		

<p>human but are not Native American, then the Coroner will direct subsequent steps to address the discovery. Work may not resume within the no-work radius until the City, through consultation as appropriate, determines that the treatment measures have been completed to its satisfaction.</p>				
<p>TRIBAL CULTURAL RESOURCES</p>				
<p>Mitigation Measure TCR-01: Inadvertent discovery of TCRs. If potentially significant TCRs are discovered during ground disturbing construction activities, all work shall cease within 50 feet of the find. A Native American Representative from traditionally and culturally affiliated Native American Tribes that requested consultation on the project shall be immediately contacted and invited to assess the significance of the find and make recommendations for further evaluation and treatment, as necessary. If deemed necessary by the City, a qualified cultural resources specialist meeting the Secretary of Interior’s Standards and Qualifications for Archaeology, may also assess the significance of the find in joint consultation with Native American Representatives to ensure that Tribal values are considered. Work at the discovery location cannot resume until the City, in consultation as appropriate and in good faith, determines that the discovery is either not a TCR, or has been subjected to culturally appropriate treatment, if avoidance and preservation cannot be accommodated.</p>	<p>Prior to and during demolition and construction – this mitigation measure shall be included in all construction documents for implementation during demolition or construction.</p>	<p>City of Folsom; Native American Representative/ Monitor or Qualified Cultural Resource Monitor; Construction Contractor</p>

Dear sirs,

I use the Folsom trail systems very regularly for fun and health. The Folsom Historic District is a unique treasure with renowned trails, quality eating and entertainment venues. When I visit (at least twice per week) I often stop for a bite to eat after biking the trails. Should this crematorium be allowed to operate, I will be forced to consider alternate locals for my recreational biking. I simply will not tolerate smoke and ash from burning bodies in my health regiment. Most in the bike club, I belong to, feel the same way. Please be mindful of the jewel you have made in developing Historic Folsom as a tourist and recreation hub. If this plan is allowed to progress, I and my friends will be taking our recreation dollars elsewhere. Thank you. I am confident you will make the right decision here.

Sincerely,

Andrew Cherniski

a. m. Cherniski

PROTECT FOLSOM HISTORIC DISTRICT

Vote NO on
Lakeside Memorial
Lawn Crematorium

Dear Historic District Commissioners,

Date: 9/11/21

I AM:

- HIGH RISK FOR AIR QUALITY HEALTH IMPLICATIONS.**
- A PARENT OR CAREGIVER OF A CHILD OR CHILDREN.**
- AN INDIVIDUAL WHO INTENDS TO HAVE CHILDREN.**
- OVER THE AGE OF 65 AND VULNERABLE.**
- VERY WORRIED ABOUT THE SAFETY & LEGACY OF HISTORIC FOLSOM.**
- HIGHLY CONCERNED ABOUT **EXTREME FIRE RISK** CAUSED BY LP TANKS IN OPEN SPACE.**

I write to you with great concern about Lakeside Memorial Lawn's application for a conditional use permit to install and operate a crematorium. Lakeside Memorial Lawn's project site is designated as Open Space and includes historical burial grounds. In reviewing Lakeside Memorial's application for a condition use permit, the following concerns require your attention and action on the community's behalf:

TOXICITY LEVELS UNSAFE FOR CHILDREN, VULNERABLE

The Initial Study by HELIX Environmental Planning, Inc. notates levels for harmful toxins including chromium, mercury, and organics. Such toxins become the *most dangerous when vaporized*. The smaller the particulate matter, the more dangerous it becomes. The report designates the levels as "not significant." This applies *only* to average, healthy adults. The Study *fails* to report significant and potentially deadly levels for **unborn children, developing children, elderly, and those with existing health conditions** in the neighboring community.

NONCONFORMING USE OF OPEN SPACE

The proposed crematorium would be installed and operated in designated open space that is *not zoned for commercial use*. Thousands of families, children, park visitors, trail and lake users will be inequitably impacted by **nonconforming use** of the land. This will harm the living to profit off of the dead. With only one way in and out for emergency vehicles, One fire will harm thousands. Such an operation does not belong in *any* child's backyard.

AIR QUALITY, SMELL, PARTICULATE MATTER MAKING HISTORY

The Folsom Historic District is treasured for its legacy of community, architecture, and natural appeal. Poor air quality, smell, and toxic particulate matter will cause **lasting damage on the physical, environmental and fiscal health** of our community. Visually, the shed, smoke, and heat waves are incredibly out of character for the District. Scent will be detected for miles, even if not visible. A permanent pollutant, foul smell and toxins will leave a damaged legacy.

PROTECT HISTORIC FOLSOM. PROTECT THE VULNERABLE. NO CREMATORIUM.

Sincerely,

a.m. Cherniski

Subject: Folsom Crematorium proposal - in opposition

You don't often get email from atrim6@gmail.com. [Learn why this is important](#)

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Scott

Thank you so much for all that you do to serve the community of Folsom. I am a resident and frequent (twice weekly) user of the Lake Natoma trail system with much appreciation for nature. I have obtained your contact information through a website that aims to share preferences on opposing the Lakeside Crematorium proposal. I would like to express my interest in leveraging a more win-win opportunity for development in our community by exploring alternative options for the crematorium site.

Quick list for your reference on why a win-win situation is beneficial:

- Retail sites that sit vacantly would appreciate the revenue and lease commitment where residents and nature are not impacted
- Lake Natoma is one of the remaining lakes in Folsom with consistent water flow, animals, trails, and appreciation of visitors

The Precautionary Principle (Friis, 2019) in terms of Environmental Health states the four aspects should be exhausted in respect of new or further development:

- 1) Taking preventive action to harm the environment, people, or wildlife
- 2) Shifting the burden of proof
- 3) Explore alternatives
- 4) Public participation in the decision

I would respectfully like to implore you to explore alternatives if not already in pursuit. There are retail leasing spaces that sit vacant with no residents, beautiful nature, or athletics nearby that a crematorium could be accommodated in Folsom. The win-win is that a crematorium could be placed at a vacant retail location while not disturbing residents or trail enthusiasts.

Folsom has a trail system that invites residents and visitors to explore and with the imposing threat of a crematorium built in the prime location of the trail, it would be a disadvantage to Folsom to lose the inviting vistas and Historic Folsom revenue for diners/ pedestrians.

Subject: Concern Regarding Historic Area

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To Whom It May Concern:

I would like to start by saying how much my family adores this town (particularly historic) and appreciates the work that has gone into making it such a wonderful place to live. We moved into The Preserve in 2017 and chose an older home over new construction because of the amazing location. Being able to walk to Sutter Street, paddle board to Negro Bar and utilize the endless miles of trails has been worth every penny. We have two children who are 12 and 10 that have spent the last 3 years playing basketball at the park, searching for turkeys and deer at sunset and endless hours biking around the neighborhood. We have raised them to value nature, community and their health. They spend many hours outdoors, playing together or on family walks/rides. Even through all of the Covid uncertainty, the hardest weeks for us were those where they could not play due to smoke and poor air quality. The ability to decompress in nature was greatly healing to our family.

We enjoy hosting outdoor gatherings- the first thing we added to our home was a covered patio area to expand our living space to include the outside. Having come from the Midwest, we have a true understanding of how beautiful the weather is here- even in the summer heat. We have a whole house fan and windows are open most evenings to allow the delta breeze to cool everything down.

While I attended the meeting with Igor and I greatly appreciated his patience in hearing questions (and even some erratic accusations), I am still against a crematorium being placed so close to where my children play, enjoy nature and even read outdoors. Having lived in Rancho Cordova next to a rendering plant, I can attest to being told that I would NEVER smell it, that there were very high quality filters being ran at all times and that we could always call the city with a complaint. I can also attest to the fact that we DID often smell it, normally during weekends or dinner hours- when it was very unlikely that someone would come to check that regulations were being followed. There were even times when we could smell it with all of our windows closed, coming in through the stove ventilation. I was told this was a result of wind changes that caused the cloud to rest over our neighborhood. While the smell was offputting, what concerns me more is what we DON'T smell but is still lingering in the air. The proximity of this to where families call home and children play is concerning. The study that was done was based on two burns a day but Igor himself said there was no way to know how many would actually be done on any given day. This is not acceptable, in my opinion.

Over the three years that we have lived here, many families with young children have moved in and more have brought new life to this neighborhood. I imagine that many of them have the same concerns for their little

ones lung development. I have been so happy to see our neighborhood revitalized by new families with children moving in - it feels very unfair to be putting something like this in an older residential community. I can't imagine that this would even be suggested in an area like The Palladio. I appreciate your service to our city and I am happy to answer any questions you may have.

Re: Lake Natoma Shores

Dear City of Folsom,

I recently listed a property in the beautiful Historical District of Lake Natoma Shores. We had our first showing at the property and the agent called and left me a message telling me her clients loved the home and wanted to live in the Historic District, but had one concern she wanted to ask me about. When I called her back, she said her buyers were worried about the crematorium going in next door. I explained the situation to her and let her know her clients could check with city planning for more information. I don't know if they followed up or not, but they ended up not submitting an offer specifically because of the crematorium.

I also had an open house the first weekend on the market. Several people came through, and there were about eight groups of buyers who were all concerned about the crematorium. They all loved the home, but I never heard from them nor their agents again. Out of all the neighbors and groups of people that came through, there was only one person who liked the house and did not care about the crematorium. However, her husband was not with her. When she left, she told me she was going to tell him about the house to see if they could purchase it. I never heard from her again either.

I am not a Folsom resident, but am writing this letter out of concern for the neighborhood. Having personally seen every single buyer that walked through this beautiful home get turned off from the highly desirable location because of an undesirable crematorium should concern every single representative of the people, the nearby homes and the neighborhood itself as an entity. I wonder why the city has allowed the cemetery owner to get this far in the planning phase of the project, despite the multiple and loud cries of the Folsom residents and groups, who should not have to trouble themselves with such a threat while living in such a popular, sophisticated and historically protected area. I am absolutely astonished that this is occurring at all.

Please don't hesitate to contact me if you need further information or details of my experience. I am attaching the text conversation between myself and the first agent (with her permission) who showed the house first with the buyers who decided not to write an offer. I am also attaching the lockbox showing activity since we've been on the market. Besides my open houses, there has been only one other agent showing (during the open house) since we went on the market, and she would not tell me why her buyers did not submit an offer. There have been no other inquiries since.

Thank you for time, and hopefully your deep concern for what is happening under your watch.

Sincerely,

Barbara Krieger, Realtor

Yep you're good to go tonight on Fong Street

Thank you!

Thank you too! Let me know how it goes

Will do

Monday 2:13 PM

Did they get spooked by the crematorium by fong st? Just curious cuz I'm gonna write a letter for the neighborhood 🤔

Yeah it was a bit of a concern for them I'm sorry!

Barbara Manwell
1310 Fong Street
Folsom, CA 95630

Mike Kozlowski
Mayor City of Folsom
50 Natoma St.
Folsom, CA 95630

Dear Mike,

My name is Barbara Manwell. I have lived at [REDACTED] Fong Street since November 1995. It is important that you understand my opposition to a crematorium being installed at the Lakeside Cemetery in my neighborhood. The majority of houses in the Preserve subdivision have at least one person who is at risk for breathing polluted air: children 14 years or younger and Seniors 65 years or older.

The City is aware that homeowners have opposed a crematorium in the past. The developer has stated it will not have an adverse effect on the neighborhood and the needs of the entire City must be considered. This is a question of the air I breathe, the air a 92 year old woman out for her daily walk breathes, the air a toddler taking her first steps breathes, the air a group of Seniors meeting for yoga three days a week in the Young Wo Park breathe, the air three boys racing through the neighborhood on bikes breathe. We are an outdoor group of citizens.

The developers' declaration has information to support his application from the manufacturer of the crematorium, Hartwick Combustion Technologies, and HELIX Environmental Planning. Both businesses receive money from the developers. This is not reassuring to me.

Igor Semenyuk, representing Lakeside Cemetery in our recent ZOOM meeting happily informed the participants in the informational crematorium meeting that he had recently sold his property in Old Town for \$800,000. Making a profit is important to this business man. Having safe air to breathe is important to me.

Please deny Lakeside's application for a crematorium.

Sincerely yours,

Barbara Manwell

Ms. Andersen,

As longtime residents of Natoma Shores, we are asking you to not allow our beautiful neighborhood to be destroyed. The prospect of having a crematorium in the Lakeside Cemetery is very upsetting and is wrong for so many reasons. For starters, our home is a "Receptor" and we are very concerned about the pollution and the health hazards associated with it. Such a facility should not be built this close to a residential neighborhood. In addition, this will lower the property value of our homes. How will we be compensated? If there are health issues arising from the smoke will we be able to be compensated for that as well?

I hope you would honestly consider how you would react if the crematorium was built in your neighborhood and not allow this to happen.

Dear Historic District Commissioners:

I am writing to express my deep concern at the conditional use permit submitted by Lakeside Memorial Lawn, owned by Miller Funeral Home, to install a crematory.

The Historic District is the crown jewel of Folsom. Its history, incredible landscape, unique shopping and dining experiences, and community provide so much to the city of Folsom. The thought of a crematory burning 800 pounds of human bodies **per day** will have untold negative physical, environmental, and fiscal implications that will damage both the city and the community.

Our air quality in the Valley has been the worst on record. How can we justify adding more particulate, more carbon, to our already hurting environment? How can we justify putting the citizens at risk? How can we tarnish the shining gem that is Old Folsom?

I implore you and the other staff members to consider all that is to be lost by granting this permit. I thank you for your consideration and welcome any feedback.

Sincerely,
Ben Gamache
Historic District Home Owner

August 2, 2021

Dear Mr. Josh Kincaid,

I, together with my neighbors at Lake Natoma Shores, a community next to the Lakeside Memorial Lawn Cemetery am asking you to halt the proposed construction of a crematorium there. The crematorium will be located adjacent to: a residential neighborhood, the Old Town District and the American River Parkway. This area is part of Folsom's historic district and resides near many outdoor activities promoted by our city as family friendly, safe and "distinctive by nature". It entails a farmers market, outdoor concerts; city sponsored festivals and sits adjacent to the American River Parkway that is actively used by many walkers, runners, and bicyclists daily. The Parkway serves as a window to the natural world, for all those that live and visit Folsom.

In researching the toxicity impacts of a crematorium I went to the National Collaborating Center for Environmental Health and found the following information, as per an article written in the US National Library of Medicine:

"Cremation is a combustion process whereby a casket and human remains are incinerated at a high temperature in a closed chamber. The process of corpse cremation generates numerous harmful air pollutants, including particulate matter, sulfur dioxide, nitrogen oxides, volatile organic compounds, and heavy metals. These pollutants are carcinogenic and could have **severe effects** on human health and the surrounding environment." (*)

It is of great concern to me that scientific papers have been written proving that the emissions from crematorium incineration are toxic. And that the level of toxicity is a danger to people's health and well-being, has destroyed surrounding water sheds & water quality and is of great harm to the natural environment.

The proposed crematorium owners may see a viable commercial need for such an operation, but I portend, not in the Old Town District, adjacent to a residential neighborhood and a State Parkway. It is best suited for a heavy industrial park where the zoning and utility systems can better accommodate any toxic air emissions, toxic water runoff and any potential fire danger generated by such an operation.

Please consider our concerns and let that serve as your guide forward.

Sincerely,

Bert Pittari,
Resident Lake Natoma Shores

Dear People in charge

I am writing in response to the notice that the Folsom Cemetery is planning to install an Crematorium. I have a home that is on Young Wo circle that would be adversely impacted.

I have a daughter who lives on Sunrise Boulevard near the Sacramento Rendering Plant, and when it is in production the fumes it produces make it unbearable to stay out side. From what I understand the crematorium would not have an air scrubber, which would put all of lower Folsom [that includes Sutter Street] in the direct path of the same noxious fumes that come from the Sacramento animal rendering plant!

I understand that the disease Mad Cow syndrome came from cows eating food made of other dead cow carcasses. What will fume and ash from Human cremation do to other Humans who breath in these by products.

Today we are told to wear N95 Mask to go out into forest fire smoke that has invisible particles, how will we feel safe that we are not being exposed to the same toxic and more lethal by products. I would also like to know how the curators of the Muir House Museum, and the Chamber of Commerce of Sutter street would feel about the impacts of these fumes on Tourism in their areas.

After reading the city planning commissions report on the impacts of this new project, I would like to know if the commission has taken a field trip to crematory to actually see it impact to adjacent areas. In reading the commissions report, on page 19 of 11 , section D leaves a question as to what a substantial number of people are and if wind conditions are taken into account. I was also quite surprised at the number of pounds of toxic chemicals and elements per hours of use that would be released into the atmosphere, as listed on page 27of 51 of this same report.

SUBJECT: Lakeside Crematorium - Comments on Initial Study/MND

Dear Ms. Johns:

This letter provides my comments on the Lakeside Memorial Lawn Crematorium Initial Study/Mitigated Negative Declaration (IS/MND) dated January 2022.

1. **The IS/MND correctly identifies the City Council as having approval decision authority for the project; but is contradicted by the public hearing notice.** As limited by the City Charter, the Historic District Commission (HDC) is an *advisory* commission only and does not have the authority to make a final approval decision. This is recognized in the IS/MND on page 7 (section 5.0, “Required Approvals”) which specifically states that the “Folsom City Council” will act as the lead CEQA agency and consider approval of the project entitlements. However, the public hearing notice issued for the project discusses that an appeal would be required for consideration by the City Council. The public hearing notice incorrectly identifies the HDC has having final approval authority and should be corrected to be consistent with the City Charter limitations on HDC authority.
2. **A design review application is required but has not been submitted.** The proposed shed modification requires design review pursuant to Folsom Municipal Code (FMC) section 17.52.300, “Design Review,” which requires design review for, “B. All exterior renovations, remodeling, modification or addition to existing structures” and FMC Section 17.52.310 provides design review application submittal (including design review application fee) requirements. The IS/MND does not identify *design review* as a necessary entitlement and the project application on the Community Development Department’s Pending Development Applications is only for a use permit. An application for design review containing the required submittals must be submitted and design review application fees paid before the City provides further processing of this project. Importantly, such design review would then consider whether the building that would undergo a substantial expansion of use to house the proposed crematorium is consistent with Historic District design standards and guidelines or if the design of that structure requires additional modifications to comply with Historic District design standards and guidelines.
3. **The IS/MND incorrectly identifies the project as consistent with the General Plan, yet the General Plan has no land use designation for either a cemetery or a crematorium, therefore the analysis cannot tier from the General Plan EIR.** The IS/MND incorrectly states that the project would be consistent with the General Plan land use designation of Open Space. A review of the General Plan intent for the Open Space land use designation reveals that there is no basis for concluding that a crematorium is consistent with the General Plan Open Space land use designation. The General Plan

February 4, 2022

mentions "cemeteries" just one time and crematoriums not at all.¹ Table LU-5 of the General Plan (page 2-7) defines the Open Space designation as, "The Open Space land use designation encompasses the preserved natural open space areas of Folsom." Throughout the General Plan, policies encourage that development incorporate areas of open space. It is unreasonable to suggest that the intent of those policies is that such open space areas could or might be used for siting a cemetery and a crematorium.² The IS/MND interpretation and the subsequent analysis which tiers from the General Plan EIR are fundamentally flawed. The IS/MND must be revised to eliminate the erroneous statements about General Plan consistency, and the impact analyses must fully evaluate the project without attempting to tier from the General Plan EIR. Further, while FMC section 17.52.550 identifies "cemeteries" as a permitted use in the Open Space/Public primary area of the Historic District (subject to a conditional use permit when proposed by a private entity), the FMC does not extend the definition of cemetery to a crematorium. Furthermore, the FMC is subordinate to, and may not conflict with, the General Plan, therefore, expanding the unspecified FMC definition of a cemetery to include a crematorium would even further stray from the General Plan's Open Space definition and is impermissible.

4. **The IS/MND must identify whether the project would involve public attendance at services at the Lakeside Memorial cemetery and/or other locations within the City and, if so, define the parameters and evaluate impacts associated with such services.** The IS/MND provides no information on whether cremations (up to 4 per day and 500 per year) would or could be attended by family, friends, or other members of the public. If no such attendance will be permitted, a condition of any use permit for this project must specifically state that such attendance is prohibited and must include a mechanism to ensure the prohibition is enforced. Alternatively, if such attendance will be permitted, the IS/MND must be revised to discuss the maximum anticipated attendance at each cremation and evaluate the impacts associated with vehicle trips, noise, parking capacity, neighborhood circulation and pedestrian safety, effects on other services and activities at the cemetery, and other factors associated with public attendance. Furthermore, the IS/MND does not discuss whether cremations at the proposed Lakeside Crematorium would result in an increase in memorial services either at Lakeside cemetery or elsewhere in Folsom. If cremations at Lakeside cemetery would result in an increase in services at other locations in Folsom (e.g., the funeral home on Scott Street), similar evaluations of potential impacts associated with vehicle trips, noise, parking capacity, neighborhood circulation and pedestrian safety and other factors associated with those services must be addressed.
5. **The IS/MND fails to recognize the visibility of the existing shed and proposed modifications from public view locations (Folsom Boulevard) and the impacts of such visibility on visual quality and locally designated historic resources.** The IS/MND aesthetics and cultural resources analyses are fundamentally flawed by failing to recognize that **the existing structure is visible from public viewpoints** including Folsom Boulevard and the bluffs on the north side of Lake Natoma. Page 2 of the IS/MND incorrectly states that "[t]ailing piles between the site and Folsom Boulevard

¹ The single General Plan cemetery reference pertains to Noise Compatibility Standards (Table SN-1) which is unrelated to establishing land use designations and uses

² Example: Policy LU 3.1.1 - "Encourage mixed-use development in nodes located at major intersections that include housing, open space, and offices." The IS/MND's interpretation would suggest that the expectation of that policy is for those open space areas to be eligible for siting a crematorium.

February 4, 2022

prevent the site from being visible from that street.” This is incorrect. The roof and upper portion of the structure in which the crematorium is proposed to be located and on which an exhaust flume would be installed is clearly visible from Folsom Boulevard at the intersection of Natoma Street. Furthermore, between Folsom Boulevard and the structure are cobble mine tailings that are identified in the City of Folsom Cultural Resources Inventory as import local historic resources. In fact, this section of tailings is one of the most prominent locations of representative historic mine tailings visible to the largest number of viewers anywhere in the City. The impact of the project’s modification to the existing structure would be visible in the background of these tailings and must be identified and evaluated in terms of impacts to the quality of views of the tailings and impacts to the historic quality of the tailings viewshed.

6. **The air quality and health risk analysis does not use best available information and requires more certainty regarding project design.** The air quality and health risk analysis circulated with the IS/MND uses a wind rose (wind direction information) from the Sacramento Executive Airport. The Sacramento Executive Airport is nearly 20 miles from the project site and is more strongly influenced by the Delta and Central Valley wind patterns than the project site’s location along the American River corridor near the Sierra Nevada foothills. More representative wind flow data from a location nearer the site (e.g., Mather Field) is available and should be used for any air quality and health risk assessment conducted for the project to ensure that locally accurate wind directions and speeds are used in the analysis. Furthermore, the health risk analysis states that the analysis *assumes* a rain cover will be installed on the crematorium exhaust stack. However, the application and representative photograph of the exhaust stack do not discuss or identify the intent for such a cover. If a cover is not present during operation of the crematorium, the emissions and resulting health risk analysis conclusions would vary from those presented in the IS/MND. Clarification and certainty for this project design component is needed. If the rain cover is to be in place during cremations, an analysis of potential localized effects of downdraft on memorial lawn visitors while cremations should also be provided.
7. **The IS/MND does not adequately evaluate potential impacts on nesting and foraging bald eagles and other special-status bird and bat species.** The IS/MND provides no discussion of the annually active bald eagle nest located just 0.5 mile north of the project site and the potential effects of the project and exhaust stack on foraging behavior of the eagles or other protected bird and bat species. While the IS/MND discusses that effects of vehicles and workers at the site would not adversely affect migratory birds, the analysis does not address the potential effects on foraging activity of the furnace exhaust heat blast with an assumed exhaust gas temperature of 1,080 degrees Fahrenheit (°F) and a gas exit velocity of 14.7 feet per second that would occur for up to 90 minutes up to four times a day. This analysis is necessary to determine if the project would adversely affect this bald eagle nesting and foraging area or otherwise adversely affect other special-status bird or bat species that may use the area.
8. **The IS/MND analysis of fire risk is inadequate and warrants a definitive determination by the City Fire Department and California State Parks.** The IS/MND analysis of potential fire risk associated with the project is insufficient. The discussion of potential exposure to wildland fire risks downplays and fails to provide a meaningful analysis of the project’s potential fire risk. The IS/MND discusses that the “project site is located in an urbanized area in the City of Folsom.” In fact, the project

February 4, 2022

site contains and is located immediately adjacent to substantial oak woodland areas and oak canopy adjacent to the building proposed to house an exhaust flume with an assumed exhaust gas temperature of 1,080 degrees Fahrenheit (°F) and a gas exit velocity of 14.7 feet per second. Within and adjacent to the site are oak canopy linkages to the large oak woodland open spaces to the north, west, and south of the project. The IS/MND states that, "the project is not likely to cause any ignition, given that the crematory will not emit sparks." Evidence providing a definitive conclusion that the crematory – a facility design for burning and with an exhaust flume – will not emit sparks or other hot particles of potential ignition source is needed. Furthermore, the IS/MND discusses that the City Fire Department reviewed the project and did not raise any concerns regarding *water supply or site access*. This begs the question of whether the Fire Department raised other concerns and even whether the Fire Department reviewed and considered the project. The project proposal to install and operated a large furnace in an open space area adjacent to oak woodlands with residents beyond, warrants specific review and documented feedback from the Folsom Fire Department specifically confirming that the Fire Department has carefully reviewed the project and all potential fire risk issues. Also, because the project site is immediately adjacent to lands managed by State Parks, similar definitive review and input from State Parks wildland fire experts should be documented and included in the analysis.

Sincerely,

Bob Delp

SUBJECT: Lakeside Crematorium – Supplemental Comments on Initial Study/MND

Dear Ms. Johns:

On February 4, 2022, I submitted a letter with comments on the Lakeside Crematorium project Initial Study/Mitigated Negative Declaration (IS/MND). In my February 4 comments I expressed concerns with, among other things, visibility of the project shed and fire risk. Having viewed the property more closely with physical observations from Folsom Boulevard and review of aerial imagery available online, it is evident that the IS/MND fails to disclose critical information related to existing conditions at the site that are relevant to the project environmental impact analyses.

Figure 1, “Excerpt of IS/MND Figure 3 Detailed Site Plan,” on the following page is an excerpt of the IS/MND Figure 3 to which I have added red linework and labels. Figure 2, “Photograph of Existing Site Conditions,” on the following page is a photograph I took on Sunday February 6, 2022, from the south side of Folsom Boulevard just east of the Natoma Street intersection and facing northwest toward the project site. The black linework on Figure 1 shows what the IS/MND considers to be the existing site condition. However, as illustrated in red, there is another building adjacent to the project shed and located near or on the property boundary that is not identified or discussed in the IS/MND. As shown on Figure 2, that building is a metal structure that is taller and larger in footprint than the project “shed” illustrated on Figure 1. Review of aerial photograph on Google Earth indicates that sometime in 2020 or 2021 a concrete pad was installed and the second metal structure was erected. That the structure is one or very near the property line and within 5 feet or less of the project shed.

This additional structure provides a substantial constraint to the ability of emergency response vehicle access to areas surrounding the project shed. Since the IS/MND fails to identify the structure, the IS/MND also fails to identify its use and fails to consider the implications of this structure and its constraint on emergency access. Furthermore, the presence of this structure and its bearing on the project’s cumulative visual and other impacts must be considered in the environmental review.

An understanding of the project site’s actual existing conditions is necessary for any meaningful review of the project’s impacts. The IS/MND’s failure to even acknowledge the existence of the largest building on the property, let alone consider it in the impact analysis, warrants substantial revision to the IS/MND to adjust the analysis to account for this structure.

Sincerely,

Bob Delp
 Historic District Resident
 Folsom, CA 95630

Subject: Re: Lakeside Crematorium

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Pam and Josh:

I remain interested in receiving your input on the questions and information about the proposed crematorium requested in my emails below. The feedback I'm requesting is related to basic information about the project that is fundamental to your Department's review of the project, so it's unclear why you would not be able to easily provide it or post it to the Pending Development Applications webpage. (It is troubling, to say the least, that your Department maintains a webpage specifically named "Pending Development Applications" and yet for some reason the project application isn't posted and it seems you are unable to provide it upon request even months after an Initial Study was prepared and circulated.)

After reviewing the General Plan specifically to identify its intent for the Open Space land use designation, it is obvious that there is simply no basis for concluding that a crematorium is consistent with the General Plan Open Space land use designation. Your Department's interpretation (as presented in the April 2021 Initial Study) is incorrect and could have long-term damaging consequences regardless of the outcome of the currently proposed crematorium project. If you actually have a solid basis for your interpretation, not only would I and others in the community like to see that, but I would also request that you take that interpretation to the City Council for their concurrence in advance of further consideration of the current or any other individual cemetery or crematorium project.

You must be aware that the General Plan mentions "cemeteries" just one time (and crematoriums not at all), and that is in reference to Noise Compatibility Standards (Table SN-1) having nothing to do with land use designations. Table LU-5 of the General Plan (page 2-7) defines the Open Space designation as, "***The Open Space land use designation encompasses the preserved natural open space areas of Folsom.***" Throughout the General Plan, policies encourage development to incorporate areas of open space. No reasonable person can argue that the intent of those policies was that those open space areas could or might be used for siting a cemetery, let alone a crematorium. (Example: Policy LU 3.1.1 - "Encourage mixed-use development in nodes located at major intersections that include housing, open space, and offices." Are you prepared to argue that the expectation in that policy is that those open space areas would be eligible for siting a crematorium?)

There very well may be a need for one or more crematoriums in the Folsom area. When a particular type of land use hasn't previously been anticipated in the General Plan but the need or interest in that type land use is identified, I would think that as planners you would recognize that the City should undertake a process to assess whether that type of land use is appropriate for the City and, if so, at what location(s) in the City that type of land use might best be located. That should not be done on a individual project basis, but through a

more broad (City-wide) planning and General Plan (and perhaps also zoning code) amendment process that would engage the community and ultimately be decided by the City Council.

To avoid ramifications that go beyond a simple yes or no decision on the currently proposed crematorium, I am asking that your Department retract the April 2021 Initial Study and its incorrect interpretation of General Plan consistency. If your Department proceeds with a City-wide planning exercise to determine whether and where cemeteries and/or crematoriums should be eligible for siting, please include me in your public notices for that process.

Thank you,
-Bob Delp

Subject: Re: Lakeside Crematorium

Pam and Josh:

I am still interested in receiving your feedback on the questions in my email to you on Sept 14 (below).

Additionally, can you provide the existing CUP (approvals, allowable uses, conditions, etc.) for the cemetery?

Also, I have reviewed the General Plan and do not see *any* discussion or references in the City General Plan or zoning code that suggests an intent or expectation that a crematorium is an allowable use in conjunction with designated Open Space areas, and nothing in the General Plan to indicate that even cemeteries without crematoriums are an allowable use in the Open Space land use designation (and nothing in the General Plan EIR, from which the crematorium Initial Study tiers, to suggest that crematoriums were an assumed use in Open Space or anywhere else in the City in the General Plan EIR analysis). Can you provide an explanation of staff's basis for suggesting crematoriums are an allowable use in Open Space areas and also how you interpret development of a crematorium as being acceptable in Open Space that is within a SACOG transit priority area?

Your feedback on this would be most helpful.

Thank you,
-Bob

Subject: Lakeside Crematorium

Hi, Pam and Josh.

I see the April 2021 Lakeside Memorial Lawn Crematorium draft IS/MND on the Pending Development Applications page, but no other information about the project is posted there. I have a few questions I'm hoping you can answer:

1. What date did the City deem the application complete?
- 2.
3. Are the project application materials available and can they be posted on the Pending Development Applications webpage?
- 4.
5. What is the status of the City's review of the project?

4. Are there any permit streamlining act deadlines that apply to this project?
- 5.
6. Was the IS/MND filed with the State Clearinghouse and did any agencies comment? (I don't see it on the CEQAnet database.)

Thanks in advance for any feedback you can provide.

Hello everyone,

I'm am writing this email to express my concerns over the potential Lakeside Memorial Lawn Crematorium within the preserves neighborhood. We are still very much opposed to this proposal.

I love this small community I live in. These people aren't just neighbors, they are friends and family. My sister, brother in law, mom, dad, husband, one year old daughter, niece and nephew, live within this community. In addition, I am 6 months pregnant. I am writing this letter for them.

We moved to folsom last year to be all together. A close family's dream come true. We watch each other's children and do daily life together. As a mother I have learned, it takes a village and the neighboring village to raise a child. This community is my neighboring village. It's truly something special.

I have worked at Mercy Hospital of Folsom for the last 12 years as a nutritionist and my husband is a RN in the Emergency Department at Mercy Hospital of San Juan. We work for this community, even through the pandemic. We risk our health and the health of our family for the community. These past two year was incredibly difficult and we sacrificed a lot.

If this crematorium is put in, we would not only be exposing ourselves to health risks at work, but now at home. Where would our sanctuary be?

We are a working class community, with many public servants living here: healthcare workers, law enforcement, retired fireman and military, just to name a few.

Now is the time for the community to pay it forward. Please protect our neighborhood, my babies, my family and friends from this crematorium. Put it outside city limits, away from not only my community, but others as well. Put it in a designated area. Let's protect each other.

The bad air quality, it's the top concern. Contaminated air will be surrounding this neighborhood, causing potential health related issues to our children, elderly and vulnerable population. I worry about any emissions this crematory will expel into the air. Can my children's health really be guaranteed? Can you guarantee that? Should they have to live and play in a area where they watch bodies being burned?

"White" smoke in the sky, indicating they are in the process of burning a body. I don't want that for my children or their friends in the neighborhood.

This is a neighborhood that the kids play outside together. "Like the good old days" the kids ride bikes, go to the park, scooter around the block. They aren't inside on the computer, they don't have phones, they aren't playing video games. I'm very proud of that. Kids being kids - it's a beautiful thing. If this crematorium is put in, I worry about the kids being outside. Running around breathing in the contaminates or not being allowed to play outside during certain days/hours. What will the kids do?? My guess is go to electronics, which is disappointing.

As a neighborhood we are rallying together to try and stop this proposal from going any further. We were strong and will continue to fight for our friends and family.

I ask for your help in preventing this crematorium from coming into our neighborhood. I ask you to help protect my family and our health.

This crematory should not be in a or near a residential area. It should be in a industrial zone, not in open space. We were already lied to once by Igor. They have submitted an addendum to the proposal and have increased the daily rate from 400 lbs to 800 lbs a day of human remains. Will this continue to increase? What else will be adjusted?

I thank you for taking the time to read this. I have attached a picture of my baby Greta with her cousins. They are on their grandmother's front yard (please note the cemetery/potential crematory directly in the background) which is three houses down from mine.

Dear Folsom Historic District,

I live with the Preserve neighborhood, and I recently learned from my neighbors that the Lakeside Memorial Lawn (owned by the Caring Service Group) has applied for a conditional use permit to install a crematory on the grounds.

I live at [REDACTED] Young Wo Circle. The region where the crematory will sit (currently a shed) is within about 400-500 feet from our home. My wife Dawn, and our twelve-year-old son Austin, have lived here for 12 years—we enjoy the lake, our wonderful neighbors, and the Folsom historical areas nearby. The Chinese cemetery in our neighborhood is an awesome tribute to the past Chinese immigrants. Unsurprisingly, we prefer our current situation, and we prefer to not smell or breath the output from the crematorium. Although our personal situation is obviously import to our family (me), the message of this letter concerns the greater public good of conserving history and ecological landscapes (us).

I understand the societal need for crematoriums—we need them. However, it makes more sense as a community to keep industrial operations separate from neighborhoods, historical regions, and precious ecological reserves. There are societies that have chosen a hands-off approach to regulation. In one large US city, I recall seeing a brothel, chemical plant, churches, and residences all in the same neighborhood. Folsom is not like this at all—we have a planned community that includes some of the best parks, bike paths, historical districts, and neighborhoods in the country. Thus, people move to Folsom and will continue to move here in the future due to our desirable planned community.

Yet what will residents think if they internalize the brand of “distinctive by nature”, come to enjoy our historical district, and then learn that the city allowed an unattractive industrial process to occur directly in the heart of the most precious area of the city?

I strongly believe that the Folsom Historical District and others need to work together to ensure that our city follows its brand—we are distinctive by nature. Moreover, we are distinctive by our historical treasures. Let us work together to live our distinctive and precious brand.

Best,

Brian Paciotti

Dear Members of the Folsom City Board,

I am a resident of Folsom Preserve. I live close to where the proposed crematorium would be built. I oppose this plan, because of the

the danger to our air quality. I am most concerned for our children, who play outdoors, and could be harmed by increased poor air

quality. This community strongly opposes the crematorium, and agrees that it should be built elsewhere. Certainly there are other

more open areas where this could be built...far away from communities. If you have not visited our community to see how close our

homes are to the cemetery, I would ask you to do so.

Thank you,

Carol Hart

COMMENTS TO REQUEST FOR REVIEW FOR THE MITIGATED NEGATIVE DECLARATION, LAKESIDE MEMORIAL LAWN CREMATORIUM PROJECT, SCH#2022010039, SACRAMENTO COUNTY

Pursuant to the State Clearinghouse's 5 January 2022 request, the Central Valley Regional Water Quality Control Board (Central Valley Water Board) has reviewed the *Request for Review for the Mitigated Negative Declaration* for the Lakeside Memorial Lawn Crematorium Project, located in Sacramento County.

Our agency is delegated with the responsibility of protecting the quality of surface and groundwaters of the state; therefore, our comments will address concerns surrounding those issues.

I. Regulatory Setting

Basin Plan

The Central Valley Water Board is required to formulate and adopt Basin Plans for all areas within the Central Valley region under Section 13240 of the Porter-Cologne Water Quality Control Act. Each Basin Plan must contain water quality objectives to ensure the reasonable protection of beneficial uses, as well as a program of implementation for achieving water quality objectives with the Basin Plans. Federal regulations require each state to adopt water quality standards to protect the public health or welfare, enhance the quality of water and serve the purposes of the Clean Water Act. In California, the beneficial uses, water quality objectives, and the Antidegradation Policy are the State's water quality standards. Water quality standards are also contained in the National Toxics Rule, 40 CFR Section 131.36, and the California Toxics Rule, 40 CFR Section 131.38.

The Basin Plan is subject to modification as necessary, considering applicable laws, policies, technologies, water quality conditions and priorities. The original Basin Plans were adopted in 1975, and have been updated and revised periodically as required, using Basin Plan amendments. Once the Central Valley Water Board has adopted a Basin Plan amendment in noticed public hearings, it must be approved by the State Water Resources Control Board (State Water Board), Office of

DENISE KADARA, ACTING CHAIR | PATRICK PULUPA, EXECUTIVE OFFICER

Lakeside Memorial Lawn
Crematorium Project
Sacramento County

- 2 -

7 February 2022

Administrative Law (OAL) and in some cases, the United States Environmental Protection Agency (USEPA). Basin Plan amendments only become effective after they have been approved by the OAL and in some cases, the USEPA. Every three (3) years, a review of the Basin Plan is completed that assesses the appropriateness of existing standards and evaluates and prioritizes Basin Planning issues. For more information on the *Water Quality Control Plan for the Sacramento and San Joaquin River Basins*, please visit our website:

http://www.waterboards.ca.gov/centralvalley/water_issues/basin_plans/

Antidegradation Considerations

All wastewater discharges must comply with the Antidegradation Policy (State Water Board Resolution 68-16) and the Antidegradation Implementation Policy contained in the Basin Plan. The Antidegradation Implementation Policy is available on page 74 at:

https://www.waterboards.ca.gov/centralvalley/water_issues/basin_plans/sacsjr_2018_05.pdf

In part it states:

Any discharge of waste to high quality waters must apply best practicable treatment or control not only to prevent a condition of pollution or nuisance from occurring, but also to maintain the highest water quality possible consistent with the maximum benefit to the people of the State.

This information must be presented as an analysis of the impacts and potential impacts of the discharge on water quality, as measured by background concentrations and applicable water quality objectives.

The antidegradation analysis is a mandatory element in the National Pollutant Discharge Elimination System and land discharge Waste Discharge Requirements (WDRs) permitting processes. The environmental review document should evaluate potential impacts to both surface and groundwater quality.

II. Permitting Requirements

Construction Storm Water General Permit

Dischargers whose project disturb one or more acres of soil or where projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres, are required to obtain coverage under the General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities (Construction General Permit), Construction General Permit Order No. 2009-0009-DWQ. Construction activity subject to this permit includes clearing, grading, grubbing, disturbances to the ground, such as stockpiling, or excavation, but does not include regular maintenance activities performed to restore the original line, grade, or capacity of the facility. The Construction General Permit requires the development and implementation of a Storm Water Pollution Prevention Plan (SWPPP). For more information on the Construction General Permit, visit the State Water Resources Control Board website at:

Lakeside Memorial Lawn
Crematorium Project
Sacramento County

- 3 -

7 February 2022

http://www.waterboards.ca.gov/water_issues/programs/stormwater/constpermits.shtml

Phase I and II Municipal Separate Storm Sewer System (MS4) Permits¹

The Phase I and II MS4 permits require the Permittees reduce pollutants and runoff flows from new development and redevelopment using Best Management Practices (BMPs) to the maximum extent practicable (MEP). MS4 Permittees have their own development standards, also known as Low Impact Development (LID)/post-construction standards that include a hydromodification component. The MS4 permits also require specific design concepts for LID/post-construction BMPs in the early stages of a project during the entitlement and CEQA process and the development plan review process.

For more information on which Phase I MS4 Permit this project applies to, visit the Central Valley Water Board website at:

http://www.waterboards.ca.gov/centralvalley/water_issues/storm_water/municipal_permits/

For more information on the Phase II MS4 permit and who it applies to, visit the State Water Resources Control Board at:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/phase_ii_municipal.shtml

Industrial Storm Water General Permit

Storm water discharges associated with industrial sites must comply with the regulations contained in the Industrial Storm Water General Permit Order No. 2014-0057-DWQ. For more information on the Industrial Storm Water General Permit, visit the Central Valley Water Board website at:

http://www.waterboards.ca.gov/centralvalley/water_issues/storm_water/industrial_general_permits/index.shtml

Clean Water Act Section 404 Permit

If the project will involve the discharge of dredged or fill material in navigable waters or wetlands, a permit pursuant to Section 404 of the Clean Water Act may be needed from the United States Army Corps of Engineers (USACE). If a Section 404 permit is required by the USACE, the Central Valley Water Board will review the permit application to ensure that discharge will not violate water quality standards. If the project requires surface water drainage realignment, the applicant is advised to contact the Department of Fish and Game for information on Streambed Alteration Permit requirements. If you have any questions regarding the Clean Water Act

¹ Municipal Permits = The Phase I Municipal Separate Storm Water System (MS4) Permit covers medium sized Municipalities (serving between 100,000 and 250,000 people) and large sized municipalities (serving over 250,000 people). The Phase II MS4 provides coverage for small municipalities, including non-traditional Small MS4s, which include military bases, public campuses, prisons and hospitals.

Lakeside Memorial Lawn
Crematorium Project
Sacramento County

- 4 -

7 February 2022

Section 404 permits, please contact the Regulatory Division of the Sacramento District of USACE at (916) 557-5250.

Clean Water Act Section 401 Permit – Water Quality Certification

If an USACE permit (e.g., Non-Reporting Nationwide Permit, Nationwide Permit, Letter of Permission, Individual Permit, Regional General Permit, Programmatic General Permit), or any other federal permit (e.g., Section 10 of the Rivers and Harbors Act or Section 9 from the United States Coast Guard), is required for this project due to the disturbance of waters of the United States (such as streams and wetlands), then a Water Quality Certification must be obtained from the Central Valley Water Board prior to initiation of project activities. There are no waivers for 401 Water Quality Certifications. For more information on the Water Quality Certification, visit the Central Valley Water Board website at: https://www.waterboards.ca.gov/centralvalley/water_issues/water_quality_certification/

Waste Discharge Requirements – Discharges to Waters of the State

If USACE determines that only non-jurisdictional waters of the State (i.e., "non-federal" waters of the State) are present in the proposed project area, the proposed project may require a Waste Discharge Requirement (WDR) permit to be issued by Central Valley Water Board. Under the California Porter-Cologne Water Quality Control Act, discharges to all waters of the State, including all wetlands and other waters of the State including, but not limited to, isolated wetlands, are subject to State regulation. For more information on the Waste Discharges to Surface Water NPDES Program and WDR processes, visit the Central Valley Water Board website at: https://www.waterboards.ca.gov/centralvalley/water_issues/waste_to_surface_water/

Projects involving excavation or fill activities impacting less than 0.2 acre or 400 linear feet of non-jurisdictional waters of the state and projects involving dredging activities impacting less than 50 cubic yards of non-jurisdictional waters of the state may be eligible for coverage under the State Water Resources Control Board Water Quality Order No. 2004-0004-DWQ (General Order 2004-0004). For more information on the General Order 2004-0004, visit the State Water Resources Control Board website at:

https://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2004/wqo/wqo2004-0004.pdf

Dewatering Permit

If the proposed project includes construction or groundwater dewatering to be discharged to land, the proponent may apply for coverage under State Water Board General Water Quality Order (Low Threat General Order) 2003-0003 or the Central Valley Water Board's Waiver of Report of Waste Discharge and Waste Discharge Requirements (Low Threat Waiver) R5-2018-0085. Small temporary construction dewatering projects are projects that discharge groundwater to land from excavation activities or dewatering of underground utility vaults. Dischargers seeking coverage

Lakeside Memorial Lawn
Crematorium Project
Sacramento County

- 5 -

7 February 2022

under the General Order or Waiver must file a Notice of Intent with the Central Valley Water Board prior to beginning discharge.

For more information regarding the Low Threat General Order and the application process, visit the Central Valley Water Board website at:

http://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2003/wqo/wqo2003-0003.pdf

For more information regarding the Low Threat Waiver and the application process, visit the Central Valley Water Board website at:

https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/waivers/r5-2018-0085.pdf

Limited Threat General NPDES Permit

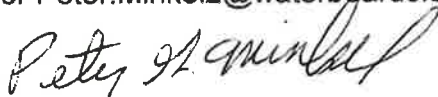

If the proposed project includes construction dewatering and it is necessary to discharge the groundwater to waters of the United States, the proposed project will require coverage under a National Pollutant Discharge Elimination System (NPDES) permit. Dewatering discharges are typically considered a low or limited threat to water quality and may be covered under the General Order for *Limited Threat Discharges to Surface Water* (Limited Threat General Order). A complete Notice of Intent must be submitted to the Central Valley Water Board to obtain coverage under the Limited Threat General Order. For more information regarding the Limited Threat General Order and the application process, visit the Central Valley Water Board website at:

https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/general_orders/r5-2016-0076-01.pdf

NPDES Permit

If the proposed project discharges waste that could affect the quality of surface waters of the State, other than into a community sewer system, the proposed project will require coverage under a National Pollutant Discharge Elimination System (NPDES) permit. A complete Report of Waste Discharge must be submitted with the Central Valley Water Board to obtain a NPDES Permit. For more information regarding the NPDES Permit and the application process, visit the Central Valley Water Board website at: <https://www.waterboards.ca.gov/centralvalley/help/permit/>

If you have questions regarding these comments, please contact me at (916) 464-4684 or Peter.Minkel2@waterboards.ca.gov.

Dear Historic District Commissioners:

Thank you for giving the Chinese Historical Society of America (CHSA) the opportunity to comment on the above-proposed project. CHSA is a non-profit organization the Mission of which is to *“collect, preserve, and illuminate the history of Chinese in America by serving as a center for research, scholarship and learning to inspire a greater appreciation for, and knowledge of, their collective experience through exhibitions, public programs, and any other means for reaching the widest audience.”* CHSA is the oldest Chinese historical society in America and maintains a museum concerning Chinese history and culture in San Francisco. By way of this letter, CHSA wishes to voice its strong opposition to the Lakeside Memorial Lawn Crematorium Project.

Our position on the Helix Initial Study (IS) and Mitigated Negative Declaration (MND), adopted by the City of Folsom, is that the IS and MND do not adequately consider the planning, implementation and operation of the Crematorium Project. For example, the following cultural resources were not identified or evaluated: that the Chung Wah Cemetery has been placed on the National Register and California State Register of Historic Places; that the Young Wo Chinese Cemetery has been placed on the California Registry of Historic Points of Interest; and that, in addition, both Cemeteries have been being placed on the Sacramento County Cemetery Commission's Registry of Pioneer Cemeteries. The integrity of these culturally unique cemeteries are of historical and archaeological importance to a specific time in history: the building of Folsom, the establishment of the State of California, and the opening up of the West.

Also, the Helix IS/MND does not discuss the indirect social changes the crematorium's operation would have on people's perception of spiritual worship in the Chung Wah and Young Wo Cemeteries, resulting in an unfortunate modern misinterpretation of historic spiritual and religious practices.

But fortunately, Folsom's Chinese community is well aware of this issue. For example,

**CHINESE
HISTORICAL
SOCIETY of
AMERICA**

on September 27, 2002 Ms. June Chan submitted written public comment on an earlier Crematorium Project application made by the Miller Funeral Home, a prior owner of the Lakeside Memorial Lawn Cemetery. (Her letter appears on page 68 of the 01.15.03 Folsom Historic District Commission Staff Report.)

Ms. Chan expressed fears that the crematorium's operational impact could cause a social change in the perception of the Chung Wah and Young Wo Cemeteries. Ms. Chan's letter questioned how the crematorium's operations could be reconciled alongside the Chung Wah Cemetery in order to ensure the Chung Wah's historical and archaeological integrity, "Because of cremated ashes in the air – either from the crematorium chimney; when ashes are put/poured into a container; through clean-up of ash residue waste disposal or cleaning up of interior crematorium – the potential impact over time would be significant to both Chung Wah Memorial Cemetery and Young Wo Memorial Cemetery. Remnant ashes that are at the crematorium will be in the air and with the winds will have to land someplace such as the Chinese burial mounds."

In her letter Ms. Chan asserts that any disturbance by the proposed Crematorium's operations (ashes, smoke, or the thought of ashes and smoke) on her ancestors graves would affect her, and other Chinese descendants, in a very spiritual way. "These circa Chinese Gold Rush cemeteries for their descendants today, continue to be held in solemn spiritual reverence and profound sacred esteem for those inter(n)red eternally." Local historians estimate that there are between 250-600 Chinese pioneers buried at the Chung Wah Cemetery.

The crematorium applicant has applied for a Conditional Use Permit (CUP) , to build and operate a crematorium in a Conservation/Open Space zone. However, cremation was not consistent with Chinese funerary customs and practice. Also, and as noted in the Findings of the old 01.15.03 Folsom Historic District Commission Staff Report at page 4, cremation was not an integral part of Gold Rush pioneer cemetery customs, either. Still further, and as also noted in that 01.15.03 Staff Report, a crematorium is not aligned with the Folsom Historic District Design and Development Guidelines, or with Folsom's General Plan Conservation/Open Space zoning.

On December 5, 1988 CHSA participated, along with Ms. June Chan, in the City of Folsom's dedication of the Young Wo Cemetery. A bronze marker at the entrance to the Young Wo Cemetery reads in part:

"The Young Wo Cemetery 1883-1925 ...Buried here are Chinese pioneers who struggled for economic survival and human dignity and in so doing helped build Folsom and the West."

Thank you for considering CHSA's comments. For the reasons stated above, CHSA believes that the 2021 Lakeside Memorial Lawn Crematorium Project should be denied and

**CHINESE
HISTORICAL
SOCIETY of
AMERICA**

request that this letter be entered into the Public Comment record for consideration by the Historic District Commission and any other public bodies which may consider this matter.

Very Truly Yours,

Justin Hoover

Regarding the metals and pollutants I referenced:

In addition to harmless compounds such as water vapor, emissions include carbon dioxide, carbon monoxide, nitrogen oxide, sulphur dioxide, hydrogen chloride gas, hydrogen fluoride, mercury vapour . Organic compounds such as benzenes, furans, acetone are also emitted and these react with the hydrogen chloride and hydrogen fluoride under combustion conditions to form polychlorinated dibenzodioxins (PCDDs) and polychlorinated dibenzofurans (PCDFs) both of which are carcinogens. **A study by the Cremation Association of North America has found that filtering crematorium fumes has little effect on the toxins released.**

Sent from iCloud

On Feb 7, 2022, at 6:40 PM, Christine Holmes [REDACTED] wrote:

Dear City Planning Officials and Council Members:

I am adamantly opposed to the crematorium proposed by Lakeside Memorial. I bike and hike that area frequently, and I also enjoy visiting historic downtown Folsom, sitting outside and having a lovely meal and beverage. A facility such as is proposed would certainly negatively affect my enjoyment of my city and the

very thought of traces of metals and chemical pollutants' effects on Lake Natoma and the American River are horrifying and sad. Our waterways are already so threatened and struggling. But there are so many more reasons not to allow this to go forward.

A CREMATORIUM WOULD BE A NONCONFORMING USE OF ZONED OPEN SPACE, DESIGNATED HISTORICAL SITES.

The proposed crematorium would be installed and operated in designated open space that is **not zoned for commercial, industrial use, within 600 feet of residential homes**. By definition open space zoning districts **maintain community open space resources for purposes ranging from conservation, to preserving community land use options**. Thousands of families, children, park visitors, trail and lake users will be inequitably impacted by **nonconforming use** of the zoned land. This proposed industrial function will be conducted on and next to nationally registered historical sites and has disregarded the National Chinese Historical Society's history with the grounds. This effort will harm the living to profit off of the dead.

AIR QUALITY, SMELL, PARTICULATE MATTER, FIRE RISK WILL MAKE HISTORY.

The Folsom Historic District is treasured for its legacy of community, architecture, and natural appeal. Poor air quality, smell, increased fire risk, and toxic particulate matter will cause **lasting damage on the physical, environmental and fiscal health** of our community. According to the Sacramento County's Air Quality Management District, the crematorium would be self-regulated, with **the County having very little oversight no oversight of the mercury-based emissions**. Visually, the metal shed that will be used for cremation, the resulting smoke and heat waves are incredibly **out of character** for the Historic District. Each individual's senses are different and scent may be detected for miles, even if not visible. A permanent pollutant, foul smell and toxins will leave a damaged legacy. The increased fire risk created by the proposed 500 gallon propane tanks puts hundreds of residents who rely on a singular evacuation point in grave danger.

TOXICITY LEVELS WILL BE UNSAFE FOR CHILDREN, ELDERLY AND THE VULNERABLE.

The Initial Study by HELIX Environmental Planning, Inc. notates levels for harmful toxins including chromium, mercury, and organics. Our local experts have warned that such toxins become the **most dangerous when vaporized**. The smaller the particulate matter, the more dangerous it becomes. The report designates the levels as "not significant." This applies **only** to average, healthy adults. The Study **fails** to report significant and potentially deadly levels for **unborn children, developing children, elderly, and those with existing health conditions** in the neighboring community. Particulate matter (PM) identified in the study was based on measures taken at the Executive Airport in Sacramento--not in Folsom. As machinery ages, particulate matter released can quickly become "very unhealthy" by air quality standards and pollution at that

level calls for limited and short outdoor activities. There has not been a full Environmental Impact Study (EIR) conducted to date to inform the conditions to be considered. There are serious concerns about the daily impact on air quality in the Historic District posing a serious threat to those with heart and lung conditions, unborn and developing children, teens, and older adults. Shifting wind patterns will impact Sutter Street visitors and business, and recreational areas along Natoma Lake and the surrounding trails. Several hundred permanent residents including young children, veterans, and the elderly will have their health jeopardized.

PLEASE PROTECT HISTORIC FOLSOM. PROTECT OUR BEAUTIFUL TRAILS. PROTECT THE LAKE AND RIVER. PROTECT THE VULNERABLE. NO CREMATORIUM.

Sincerely,
Christine Holmes

RE: Opposition to Proposed Crematorium in Lakeside Cemetery
 July 28, 2021

Dear Folsom Historic District Commissioners,

I'm very opposed to the plans for a crematorium being proposed on the Lakeside Cemetery property. I respect the Miller Funeral Home, although I am not familiar with the Caring Services Group chain that bought out the Claneys. Millers has buried four generations of my family and I am entrusting them to bury me as well. They take wonderful care of the cemetery grounds, one of the oldest and most beautiful historic cemeteries in northern California. Their mausoleum additions have been well executed and are a pleasure to visit. I understand the financial motivation to build a crematorium on the cemetery site, land they already own, to create a permanent income stream. However, it creates an undue burden on the people living and recreating nearby. Emissions and odors will impact our fresh air and property values will be negatively impacted.

I live just a few hundred yards from their proposed site and their project description of operations indicate they would be conducting cremations nearly every day of the year with multiple cremations daily. My house is inundated by the odor when the Kikkoman plant (which is much farther away) brews soy beans. The crematorium application exhibit showing the detection of emissions within the neighborhood, the cemetery and across Folsom Boulevard is disturbing. Their permit application was denied in recent years and all the reasoning at that time remains relevant.

Other crematoriums in the region do emit noticeable odors and emissions. I spoke recently with a retired Sacramento City Fire Department employee who told me that when the crematorium on Stockton

Boulevard incinerates a particularly obese person, they get complaint calls due to odor as a column of dark smoke rises out of the stack. As disgusting as that sounds, this would be the reality we would be forced to live with. It would be an undue burden for residents to have to breath the output nearly every day of the year. I walk daily in the neighborhood and often entertain outside. I certainly don't want to lose the enjoyment of fresh air I currently enjoy. Additionally, its presence would have to be disclosed on any sales agreement, deterring buyers and reducing property values. Even visitors to the cemetery would be exposed to the output, including myself. I frequently visit five family members buried at Lakeside, visits that would become unpleasant if there are emissions blowing where the applicant's detection maps indicate.

I think it's critical that Millers Funeral Home find a more appropriate location in an area zoned for industrial or commercial use. I believe building a crematorium within yards of homes, the historic cemeteries (Lakeside and Chung Wah) and Lake Natoma State Park space is inappropriate and has too negative an impact on local residents. This project benefits only the funeral home, while negatively impacting the community.

Sincerely,
Cindy Baker

I oppose the proposed crematorium at the Lakeside Memorial Cemetery. I would appreciate that my comments below be read into the record during public comment:

As a longtime resident of the Folsom Historic District, I would like to express my concerns and opposition regarding the proposed crematorium at the Lakeside Memorial Cemetery. The homeowners who live within feet of the Lakeside Memorial Cemetery are actively voicing their concerns and rallying together against this proposal, I am listening to their concerns and so should you! If a crematorium were proposed in your backyard I'm sure that you would oppose it too. There are too many valid concerns regarding air quality, increased traffic, noise, nonconforming use of land and zoning, and long term affects to residents including children and the elderly.

A crematorium at this location will add more traffic to the only street that provides ingress and egress to the adjoining neighborhood and access to Folsom Blvd. This location is already impacted by the many people who enjoy the trails along Lake Natoma. The future growth of the Corporation Yard's existing property is also a concern that should be considered before adding more growth, noise, and pollution to an already overburdened residential community that lies within feet of this proposed crematorium.

Please consider the residents who are loyal, tax paying citizens who deserve the respect from our City representatives. We rely on you to hear our concerns and to be our voices when making the right decisions that affect our lives, our future and our property here in Folsom. Please vote "No" on the crematorium.

Folsom Historic District Commissioners

I implore you to deny approval of the proposed Lakeside Memorial Lawn crematory.

My two concerns:

I live directly adjacent to the cemetery and have grave concerns about what effect fumes from the crematory will have on my health. Burning 800 lbs of human remains each day in a residential neighborhood is deplorable. No matter what claims of air filtration for the crematory, some undetected harmful chemical is bound to be passed into the air and on to my property

Two large capacity propane tanks are proposed for the project. They will be placed in an urban/wilderness interface area vulnerable to high heat fires. The tanks would be in constant threat of a BLEVE fire. (boiling liquid expanding vapor explosion). These propane tank fires have an explosive force capable of hurling a car into our neighborhood.

Please vote to stop this project,

Daniel Winkelman

Dear Sirs and Madams,

As a resident of Folsom and particularly the Preserve development, we strongly urge that you not approve the crematorium permit for the Lakeside Cemetery. We are less than a 1000 feet from the proposed crematorium and many neighbors in and out of our development are even closer. We have no problems with the idea of cremation; but this facility does not belong in a residential neighborhood. It should be placed in an industrial area away from houses and families. Many people, for various reasons, are upset at this prospect and I hope you will consider this when voting on the project. We don't want it here!

Sincerely,
Dann and Shari Shively
Young Wo Circle

January 11, 2022

Historic District Commissioner

Re: Lakeside Crematorium

As you are aware, The hearing for the Proposed Crematorium is February 16, 2022. You are also aware that this is a sensitive issue for the Historic District, especially the Preserve/Natoma Shores Neighborhood.

The Preserve Neighborhood is a community bound together by strong relationships and common interests. This proposed crematorium has in the last year and a half put our small community on edge and diminished our quality of life.

If you haven't been in the neighborhood for awhile I suggest you come and visit. Walk around and reacquaint yourself with the Lakeside Cemetery, Chung Wah Cemetery, Young Wo cemetery, Dredger Diggings Preserve, Veterans Hall, Murer House, Lake Natomas, our small park and of course, the Residents.

I am available anytime to act as your tour guide if you so choose.

Thanks for your time

Dave Higgins

February 11, 2022

City Council Members
City Manager
Historic District Commissioners

I have read Mr. Semenyuk's " **Scope of work - Installing a Crematory**" document from the Historic Folsom Residence Association (HFRA) email I received back in December 2020. This document was not dated however it was signed by Mr. Igor Semenyuk. I also participated in a HFRA Zoom meeting on July 15, 2021 with Igor Semenyuk of Caring Service Group and Peter Hartwick from Hartwick Combustion Technologies. They informed us about "how wonderful it would be for Folsom to have it's own Crematorium."

Mr. Semenyuk talked about the need and the service he could render. He stated in the 12-2020 document;

" There are several large cultural communities residing and moving into Folsom. Regretfully, we do not have the ability nor the capability to serve the Sikh, Hindu, Buddhist or other cremation based cultures as they require an onsite crematory so they may be able to exercise their rights and customs. Currently, there is no crematory in the City of Folsom, so they must find these services outside their city."

After reviewing the revised CEQA application on page 81 "Parking and Access" third paragraph, it states:

"As the crematorium would not be located in or near a funeral home and would be separate from any funeral services or public gatherings provided by the applicant. Access would only need to accommodate a small number of staff members with business at the site"

In the CEQA document, section 4.0, Project Objectives, stated again is "Cultural and Religious Communities as one of four reasons to have a crematorium. Of the four objectives stated, the only one true and honest is the statement " **Upgrade existing facilities to capitalize on a business opportunity that has proven successful for the applicant elsewhere in California**"

Mr. Semenyuk and Caring Services Group will say whatever they think is necessary to get their crematorium approved and built.

If the above quote was true I would like to have Mr Semenyuk identify these large cultural groups so I would have a better understanding of their rights and customs. I have contacted the Consumer Affairs office in Sacramento and was informed in Sacramento County there are 16 crematories between downtown Sacramento and Lakeside Memorial Lawn. In addition there is 1 in Rocklin and 1 in Placerville. There are many crematories close by to serve the community. The cultural and religious requirements that Mr. Semenyuk states can be fulfilled at Mt. Vernon Cemetery in Fair Oaks 5.2 miles away. Mt. Vernon Cemetery advertises a cremation viewing suite.

There seems to be plenty of incinerators to fulfill this perceived regional need. Currently there are, 70.12% white, 17.18% asian, 5.89% two or more races, 3.41% african american living in Folsom. In my opinion, the cultural and religious community that would use a ritual cremation is comparably low compared to the combined population of Folsom. This is a marketing tactic and disingenuous on Mr. Semenyuk's and Care Service Group part.

In my notes from the Zoom meeting, Mr Semenyuk said "You will see a puff of white smoke in the beginning then heat waves". Peter Hartwick later in the Zoom meeting said "You will not see or smell anything" In the document Mr. Semenyuk wrote "there is no smoke or residue that leaves the chamber". I'm confused, which is it?? What am I going to see? Smoke, heat waves or what smell? Mr Semenyuk wants to install an incinerator. Mr Hartwick wants to sell an incinerator. It's all Business, it's about money. It's smoke and mirrors

Also in the Scope of Work document, Mr. Semenyuk states "they are designed to use less fuel, have lower NOx emissions, are NFPA compliant, meet Air Quality standards, and the components are UL listed." So is my toaster and BBQ but it still has puffs of smoke, creates heat waves, and smells. The question is by who and how it is tested. By the manufacturer or an outside entity? How often is the incinerator operationally inspected? Does it have wet scrubbers or just filters? If it has filters are the filters cleaned or are they thrown away? How are they disposed of?

In addition, the document states:

"In the event of an operational failure, the gas is immediately and automatically shut off. There is a manual switch as well. There has never been a crematory blowing up in the history of cremation".

That is not true. There have been dozens of reported explosions, mostly from pacemakers, within the incinerator causing damage to the Incinerators bricks, doors, and other components.

Is an explosion within the incinerator reported to the Fire Department or some other governmental agency? Will there be an inspection of the facilities after such an event by qualified service personnel or governmental agencies? Will there be a trained operator onsite during the entire cremation process? Someone to hit the manual switch when something goes wrong? What happens during a power outage or Flex Alert? Will they incinerate on "Spare the Air Days", "Red Flag" days, or our smoke filled summer wildfire days? Lots of questions and no answers.

Caring Service Group is **profit driven**, as most businesses, Their excitement for " City of Folsom will have their first Crematory" is dangerous and disingenuous. They are looking for that **competitive advantage** over their competition versus the health and well being of the community. Caring Service Group admits its "**Primary goal is to purchase funeral home business**" on their website. It's just Business.

The original application was for incinerating 200 to 400 lbs of human remains per day. Now it's 400 lbs to 800 lbs per day. Is that 7 days a week? When are they going to request a second incinerator to increase their cash flow. This project has already affected our neighborhood quality of life. This is no small town operation. This is a full fledged commercial operation that needs to be placed in a commercial setting. Remember, this land is zoned open space. Give us little guys a break.

A crematorium proposal was submitted back in 2002 by Lorin Chaney, then owner of Lakeview Memorial Cemetery and was denied by the Historic Commission on 1-15-2003. What has changed since then? It is still proposed in the same old meal shed, Crematoriums still malfunction, still have operator error, still smoke, still emit nasty odor. This project is still located in the same Zoned Open Space. We now have more residents including infants, young children and many seniors. Am I missing something? This is obviously wrong.

So, does Folsom really need an industrial **incinerator** in the **Historic District**, In a **Zoned "Open Space" designated area**, in a **historic residential neighborhood**, in a documented **"Wildland High Fire Risk"** area, near a **State Recreational Area**, near a **National Registered Historic Site** (China Mission-Chung Wuh Cemetery).

Caring Service Group and Miller Funeral Home think it would be wonderful. Really????

Thank You for your time.

David Higgins
[REDACTED] Fong St.

December 28, 2020

My Name Is Dave Higgins. I am a member of HFRA. I live near Lakeside Memorial Lawn. I have some questions and concerns about the proposed Crematory at the Lakeside Memorial lawn.

I have read the proposal submitted to the City of Folsom by Igor Semenyuk.

My first comment comes from their "Point at Issue".

The proposal states Folsom has an estimated 450 deaths per year and an estimated 300 cremations need to be performed. That would be .82 cremations a day, present time. As the document states, "including Folsom Ranch, we need to have an on-site crematory in order to facilitate it's increase. This does not take into consideration neighboring cities and their demand for cremation services. The 300 number is not real. I foresee the facility, in time, being a very busy place processing several remains a day, increasing traffic demands ie. funeral vehicles, propane delivery trucks, service trucks, funeral patrons.

Second comment comes from their "Our Proposition"

Lakeside Memorial Lawn is near residences, 117 homes in the "Preserves Neighborhood. Some in direct view of the Lakeside Memorial Lawn. This place is not that removed from residences, as stated. In addition, there are two parks, FLSRA and the playground on Sutter St.

Also, within the section, it states Lakeside Lawn does not have a gas or sewer line. The proposal states they will be installing two propane tanks. Where, how big, how often serviced by delivery trucks? I question the no need for a sewer connection or some other sort of liquid disposal.

Third comment comes from their "Cremation Process"

I am concerned the "Shed" might not be large enough to facilitate the process. I believe the shed currently houses equipment like the backhoe, garden tractor, mowers, trailers, hand tools, and chemicals used in the care of the grounds. Is there room for all? Is another building planned?

Will the remains be transferred outside the shed from the vehicle to the crematory oven in public view or within the shed, protected from public view?

Fourth comment comes from their "Scope of Work"

There is no mention of the height of the "stack".

Living in the "Preserves" neighborhood is special. Great neighbors and community. Proximity to the treasures of Folsom. Lake Natomas, The Hike and Bike Trails, Historic Downtown Folsom, Muir House, Chinese Memorial Cemetery, Veterans Hall, and Sutter St. Play Park. They are wonderful places.

However, with all these wonderful things comes a down side. We have a lot of traffic. Muir house on weekends, FLSRA access point everyday, Veterans and delivery trucks to the Veterans Hall, Occasional City of Folsom vehicles accessing the back gate to the Crop Yard. Not to mention the ever present UPS, FedEx, and Amazon Delivery Vans.

So, It is my opinion, a Crematory at Lakeside Lawn would provide a service for the community. However, it needs to address and satisfy the concerns of the Preserves Community. If the proposal is approved, limit the number of daily cremations, limit the cremation to weekdays only. Have the proposed activity and operations away from public view. Evaluate the location and size of the shed and propane tanks. The Preserve neighborhood is basically a court, one way in one way out.

On a selfish note, I believe this could hurt our home values.

Please consider and weigh all aspects of this project. Once it's approved there is no return.

Thank You for your time.

Dave Higgins
[REDACTED]

July 6, 2021

To: Historic District Commission
Folsom Planning Commission

My name is David Higgins. I live at [REDACTED] Fong St, directly across the street from Lakeside Memorial Lawn Cemetery. I am opposed to having a crematory placed in my neighborhood. A crematorium should be zoned for commercial - industrial areas NOT residential areas.

I have seen the proposal submitted by Igor Semenyuk and participated in the Zoom meeting hosted by HFRA for a crematorium at Lakeside Memorial Lawn. I have several concerns about the Crematorium.

Igor Semenyuk stated the crematory would probably operate 5 to 7 times a week. I assume this would be the initial start up number. I am concerned what the actual cremation number would be for the future. 2,3,4,5 a day? 5-7 days a week?

In the initial proposal submitted and in the Zoom meeting there was no mention of any noise. I would like to know if I am going to be subjected to a constant hum or roar from the machine.

How much propane is used during a cremation process and how often will I see propane trucks servicing the tanks and smelling the propane gas when refilling.

I won't be looking forward to the increase in traffic from the vehicles delivering the bodies, service trucks, etc. Since we have only one access point in and out of this residential area, we already live with a large amount of traffic and congestion from light rail.

Igor Semenyuk stated the only smoke emitted is at the beginning of the process when a "puff of white vapor is released." After researching crematoriums online I saw some disturbing videos of "white vapor" being exhausted out of crematorium stacks. Please see the links enclosed.

https://mountainx.com/news/community-news/crematorium_smoke_triggers_complaints/

• OKC Crematorium Operating at Night "Dusting" Residential Neighborhoods

• Crematorium fires up in NE Portland

• Scottsdale neighborhood concerned about increased cremation smoke

<https://www.latimes.com/archives/la-xpm-2007-dec-26-na-cremate26-story.html>

Will there always be an operator on site during the process to shutdown the machine if a malfunction arises?

In researching who regulates and inspects crematoriums the information is rather vague. The Federal Trade Commission regulates the funeral industry, however, it does not oversee crematoriums. Nobody seems to. It appears they are under the radar. So, is the fox guarding the hen house? Do we just trust they are going to do the right thing? I don't think so. The moment it is installed, it's there forever.

Speculation arises from the air quality. Can't find a definitive answer here either. Mercury from teething fillings, chemicals from embalmed bodies, medical prosthesis (pace makers), chemotherapy and radiation by-products from cancer patients. Are any of these materials released into the air or are they consumed 100% by the fire.

My home is approximately 575 feet from the proposed crematorium. Other homes are as close as 450 feet. Not very far. I suspect the smoke stack will be visible from my porch. I believe some of my neighbors will also have a view of the smoke stack.

Lakeside Memorial Lawn also shares this small neighborhood with the Chinese Cemetery, Veterans Hall, Muir House, access to the State Rec area and a quaint park and playground. It is my opinion all these facilities will be impacted. I also believe the crematorium will affect our property values.

Please don't allow the crematorium in our residential area. It belongs in a commercial-Industrial area. Would you like it in your neighborhood?

Thank You for your time,

David Higgins

Folsom Historic Commission
Folsom Planning Department

My name is Dave Higgins, I am a retired Fire Captain from the City of Fremont, Ca. with over 30 years of experience, 10 of which I was a member of the HazMat Response Team. I live next to Lakeside Memorial Lawn where the proposed crematorium is planned. I am writing to express my concerns.

My concern centers around the two 250 gallon propane tanks proposed. This proposed facility is 30 feet from the Open Space/Wildland Zoned part of Folsom. 600 feet from my house. Should these tanks be exposed to fire, physical damage, or vandalism this neighborhood would be in serious trouble. Protection of the tanks, in my opinion, would be difficult.

There is a fire hydrant on the street at the entrance to Lakeside Memorial Lawn. The distance from the hydrant to the old shed is approximately 650 feet. The driveway, one way in and out is narrow, however, it could support two pieces of apparatus if not blocked by fire hose or parked vehicles. Clear access to the tanks would be difficult because of the tanks location. The tanks will be blocked by a fence, shrubbery, and trees. Placement of hoselines to reach the tanks could prove hazardous for firefighters.

Propane being a compressed gas expands 270:1 when released. This vapor is heavier than air and will creep along the ground and settle in low pockets. Should a leak occur at night a large section of the Preserve Neighborhood could be impacted. The Preserves Neighborhood has one access / exit corridor that passes directly in front of Lakeside Memorial Lawn. Should an event occur not all of the residents are getting out.

According to the "City of Folsom Community Wildfire Protection Plan" dated April 2013, The Sacramento County Multi-Hazard Mitigation Plan identifies Folsom as having the greatest density of housing subject to wildfire in Sacramento County. (page 5)

Folsom is a registered community at risk. The Folsom Fire Department has identified the greatest threat to the community from fire would be a fast moving wildfire in the brush and oak woodland fuel bed that line the American River where it flows through Folsom. (page 6)

The City of Folsom also has the responsibility to insure future planning and zoning decisions for development adjacent to open space areas including sufficient provisions for the clearance required to protect new and future structures. These provisions may include adequate setbacks, buffer areas, or other measures to reduce the wildfire risks. (page 7) In my opinion, the authors of this document overlooked the "City of Folsom Community Wildfire Plan". The Negative Declaration states, page 61, "The project is not located in or near a State Responsibility Area or in a Very High Fire Hazard Severity Zone (Calfire2020;csg2020)". On page 92, "Environmental Setting", "The project site is not located in or near a state responsibility area or lands classified as a very high fire hazard severity zone". It seems the

Negative Declaration overlooked or failed to seek out all relative information as to the fire hazards in the area.

In the past couple of months there have been several grass/wildland fire incidents in Folsom and within the Lake Natoma Recreation area.

- On June 2, 2021 storage shed at Negro Bar and the exterior of the Cliff House Restaurant was set on fire.
- On June 5, 2021, 3.5 acres was burned off Prairie City Road near the transient encampment.
- On July 7, 2021 encampment fire near Blue Ravine and Sibley.
- On July 16,2021 several acres of vegetation burned in the Humbug-Willow Creek with reported difficulty accessing.
- On July 23, Folsom Fire Department requested the City to declare a "Local Fire Emergency" .
Already this year, 47 brush fires, majority human caused.

Several times I have witnessed transient activity at the lake and in the nearby woodlands. I believe a fire from a transient camp or vandalism could impact the propane tanks. 500 gallons of propane is a lot of propane for a residential neighborhood with limited access.

I am not opposed to crematoriums. I am opposed to crematoriums in residential neighborhoods. "Folsom Distinctive by Nature ". This project belongs in a commercial industrial zoned area.

Thank You for your time,

Dave Higgins

Propane Tank Hazards

Miscellaneous Fireline Hazards

Liquefied Propane Gas (LPG) tanks are commonly found in the wildland-urban interface and present hazards to firefighters in that environment. LPG tanks may be found in a number of other environments such as motor homes,

travel trailers, grills, camp stoves, lanterns, etc. Directly attacking LPG tank fires is a structural fire task involving hazardous materials and should only be attempted by trained personnel using full structural personal protective

equipment and equipped with a volume of water adequate to safely attack the fire.

Boiling Liquid Expanding Vapor Explosions (BLEVE)

- The most recognized hazard with LPG tanks is BLEVE (Boiling Liquid Expanding Vapor Explosions) or sudden complete failure of the tank. Some training courses have directed responders to approach the tank from the sides, believing that the force of the explosion will occur on the ends of the tank. However, this is not a guarantee that you will be safe from projectiles or missiles from the explosion, as they may travel in ALL directions up to 2,500 feet away. Leave the area immediately if you smell propane; hear a rising sound from venting safety devices or see discoloration or deformation of the tank. If you leave the area, get at least 2,500 feet away and do not go down wind or down slope of the leaking propane. BLEVEs are a major hazard to emergency responders!

Fuel Reduction Around Tanks

- Wildland firefighters may take action to prevent direct flame impingement on LPG tanks by removing wildland fuels in the area. However, be aware that lines from the tank to structures may be above or below ground, and may be cut by tools or equipment. Propane gas is heavier than air, and may move along the ground at some distance, and may ignited when it reaches open flame or another ignition source. Use extreme caution when doing fuel reduction around tanks, and flag any lines you encounter.

Other Wildland Fire Considerations

- Do not position engines or other apparatus near LPG tanks or downwind / down slope from tanks.
- Do not deploy fire shelters near LPG tanks or downwind / down slope from tanks. Cooling Tanks
- In light fuels such as grasses, where any heat exposure to the tank will be very limited, rapid application of cooling water on the outside of the tank above the liquid level can reduce the likelihood of container failure by lowering the external temperature of the shell of the exposed tank. Water should not be directed at the valve safety devices, due to the potential of "icing" the valve closed.
- In heavy fuels where long duration heat exposure to the LPG tank is likely, evacuate all personnel and equipment 2,500 feet away and not down slope or down wind. NFPA says that direct flame impingement protection requires water flow of at least 500 gpm from an unmanned monitor nozzle. This is a situation for properly trained, equipped and supported structural firefighters.

Historic District Commissioners
City Council Members
City Manager
Kelly Mullett

My name is Dave Higgins, I live across the street from Lakeside Memorial Lawn where the proposed crematorium is to be built. Over the course of summer to the present time I have taken pictures of activity at the cemetery. I wish to share.

This picture was submitted by the Caring Service Group and Miller Funeral Home's 2-27-2020 application for the Conditional Use Permit to install a crematory. Two years ago. This is what the metal storage shed and surrounding grounds looked like in 2-27-2020.

This picture was also submitted 2-27-2020 to illustrate the look and size of the smokestack on the roof. The amateurish hand drawn chimney does not truly illustrate the true look or height of the proposed stack. According to the Negative Declaration the stack is to be 19 ½ feet total height from grade.

This picture was taken January 13th, 2022. This is what the maintenance grounds look like currently. The new storage shed is in the background and the existing shed is on the right. The metal security fencing surrounds the grounds and has a locked security gate. Note the Dredger Tailing Pile condition. It has been disturbed over the years.

This picture was taken January 13th, 2022. This picture illustrates the current look of the maintenance grounds, sheds and security fencing. The metal shed on the right is where the proposed crematory is to be installed.

This picture shows the propane tank pad right of the building under the large tree. This photograph was taken January 13th, 2022. The application site plan confirms the location of the propane pad. In addition, the site plan calls for 2 x 500 gallon tanks, not the 2 x 250 gallon tanks in the Negative Declaration text.

This photograph taken January 13th 2021 displays another angle of the location of the propane tanks pad. Blocked by a wooden fence, metal security fencing, a large redwood tree and the metal shed.

This picture was taken on August 4th, 2021. This is Lakeside Memorial Lawn groundskeeper, Valdimir Semenyuk, driving out of the cemetery with a 250 gallon propane tank. This picture is disturbing on many levels. It is my opinion that the Caring Service is very confident in the outcome of the Conditional Use Permit. If indeed this tank is for the Crematory it is very arrogant for the Caring Service Group to show no discretion in their activities.

Pictures are worth a thousand words.

Thank You
Dave Higgins

[You don't often get email from [REDACTED] Learn why this is important at <http://aka.ms/LearnAboutSenderIdentification.>]

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Josh,

Thanks for taking my call this morning.

As we discussed the Caring Services Group (Miller Funeral Home) applicant is applying to place a crematorium in a shed on that Lakeside Cemetery site.

What I want to do is remind you of our discussion that this crematorium affects so many people. Not only the city, the environment, homes close by, the river, Lake Natoma State Park and the other historic cemetery.

I am requesting the Applicant must also contact the owners of all the niches and family members that have buried their loved ones and disclose the proposed project to them. These people should be informed just like other projects MUST send out notices. YES, this is a unique situation and YES it should get unique attention. There is no excuse this far in advance that this added Notice can't be done. Again, this is a unique situation.

I own my own niche for my husband and I. Other siblings of mine living today have purchased niches along the same wall that is closest to the metal shed. When I visit my parents, we stand and talk to them, and what we would be having to endure is a crematorium staring us in the face. How unpleasant do you think that will be? It would affect our use and enjoyment of the cemetery and visiting our loved ones. It makes me sick to think of visiting them while knowing bodies are being cremated just feet from my parents remains.

I please, please ask that the Applicant and City must take additional time and work to notify the people involved that purchased in that cemetery. There must be records of what they sold and to whom. If they have no records or lost records that tells you they have poor business practices.

Again, please make this a condition that those folks are informed and heard. They have the right to know! I am certain the numbers of people opposing this project will be ten times the numbers you would get otherwise. We purchase a spot for our loved ones to rest and now to think we may need to sell niches and move our parents. This is what we are faced with.

Please review with appropriate city folks and let me know what has been decided.

Just remember if you were in our shoes how would you feel? Ask those Planners that question too. It's the right thing to do.

Regards.

Hi Josh,

I noticed that this Project's CUP is not included in the public review documents IS/MND released. CEQA refers to the CUP being an integral part of the public comment review period. The Governor's Office of Research and Planning wrote a guide titled, 'The Conditional Use Permit.' It states on page 3, paragraph 3, " ...If the proposal is not exempt from environmental review, the city or county is required to prepare either a negative declaration indicating that the conditional use permit will have no significant effect, or an Environmental Impact Report (EIR) which describes the potential negative impacts of the proposal and the means to avoid or lessen those impacts.

Please see the CEQA references to the public's right to review below :

CEQA CALIFORNIA PUBLIC RESOURCES CODE, DIVISION 13.ENVIRONMENTAL QUALITYChapter 1: Policy

§ 21003. PLANNING AND ENVIRONMENTAL REVIEW PROCEDURES; DOCUMENTS; REPORTS; DATA BASE; ADMINISTRATION OF PROCESS

The Legislature further finds and declares that it is the policy of the state that:

(a) Local agencies integrate the requirements of this division with planning and environmental review procedures otherwise required by law or by local practice so that all those procedures, to the maximum feasible extent, **run concurrently, rather than consecutively** ,...

§ 21003.1. ENVIRONMENTAL EFFECTS OF PROJECTS; COMMENTS FROM PUBLIC AND PUBLIC AGENCIES TO LEAD AGENCIES; AVAILABILITY OF INFORMATION

The Legislature further finds and declares it is the policy of the state that:

(a) Comments from the public and public agencies on the environmental effects of a project shall be made to lead agencies as soon as possible in the review of **environmental documents, including, but not limited to**, draft environmental impact reports and **negative declarations**, in order to allow the lead agencies to identify, at the earliest possible time in the environmental review process, potential significant effects of a project, alternatives, and mitigation measures which would substantially reduce the effects.

(b) Information relevant to the significant effects of a project, alternatives, and mitigation measures which substantially reduce the effects shall be made available as soon as possible by lead agencies, other public agencies, and interested persons and organizations.

(c) Nothing in subdivisions (a) or (b) reduces or otherwise limits public review or comment periods currently prescribed either by statute or in guidelines prepared and adopted pursuant to Section 21083 for environmental documents, **including, but not limited to**, draft environmental impact reports and **negative declarations**.

§ 21064.5. MITIGATED NEGATIVE DECLARATION

“Mitigated negative declaration” means a negative declaration prepared for a project when the initial study has identified potentially significant effects on the environment, but

(1) revisions in the project plans or proposals made by, or agreed to by, the applicant **before the proposed negative declaration and initial study are released for public review** would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur, and

(2) there is no substantial evidence in light of the whole record before the public agency that the project, as revised, may have a significant effect on the environment.

§ 21080. DIVISION APPLICATION TO DISCRETIONARY PROJECTS; NONAPPLICATION; NEGATIVE DECLARATIONS; ENVIRONMENTAL IMPACT REPORT PREPARATION

(a) Except as otherwise provided in this division, this division shall apply to **discretionary projects** proposed to be carried out or approved by public agencies, including, but not limited to, the enactment and amendment of zoning ordinances, the issuance of zoning variances, **the issuance of conditional use permits**, and the approval of tentative subdivision maps ...

(c) If a lead agency determines that a proposed project, not otherwise exempt from this division, would not have a significant effect on the environment, the lead agency shall adopt a negative declaration to that effect. The negative declaration shall be prepared for the proposed project in **either** of the following circumstances:

(1) There is no substantial evidence, in light of the whole record before the lead agency, that the project may have a significant effect on the environment.

(2) An initial study identifies potentially significant effects on the environment, **but**

(A) revisions in the project plans or proposals made by, or agreed to by, the applicant **before the proposed negative declaration and initial study are released for public review** would avoid the effects or mitigate the effects to a point where clearly no significant effect on the environment would occur....

§ 21092. PUBLIC NOTICE OF PREPARATION OF ENVIRONMENTAL IMPACT REPORT OR NEGATIVE DECLARATION; PUBLICATION

(b)(1) The notice shall specify the period during which comments will be received on the draft environmental impact report or negative declaration, and shall include the date, time, and place of any public meetings or hearings on the proposed project, a brief description of the proposed project and its location, the significant effects on the environment, if any, anticipated as a result of the project, the address where copies of the draft environmental impact report or **negative declaration, and all documents referenced in the draft environmental impact report or negative declaration, are available for review**, description of how the draft environmental impact report or negative declaration can be provided in an electronic format.

Josh, I request that you post the Conditional Use Permit in accordance to CEQA, and adjust the period of time for public review for this Project.

Hello,

If you are receiving this email, you have previously emailed or sent a letter to City of Folsom staff and/or City Council members and their Historic District Commission representatives regarding the proposed Lakeside Memorial Lawn Crematory project. Because you are an interested party, I am sharing the attached public hearing notice (which is being published in the February 6th Folsom Telegraph and sent to property owners within a 300-foot radius of the project site) and informing you that the Historic District Commission is considering the Conditional Use Permit (CUP) and Initial Study/Mitigated Negative Declaration (IS/MND) for the project at the February 16, 2022 Historic District Commission meeting.

The final version of the IS/MND, as well as additional project documentation, is located here: <https://www.folsom.ca.us/government/community-development/planning-services/current-project-information>. Physical copies of the document will also be made available at City Hall, at the Community Development Counter. The public comment period for the IS/MND begins on January 7, 2022 and ends on February 7, 2022.

The staff report for the CUP will be available here at least 5 days prior to the February 16 hearing date: <https://www.folsom.ca.us/government/community-development/planning-services/historic-district-commission>. A physical copy of the document will also be made available at City Hall, at the Community Development Counter.

Note that if you have emailed or mailed a comment to staff, or if your letter/email to City Council members or Historic District Commissioners was forwarded to staff, that comment will be included in the staff report for the CUP and will be available to the commission and general public prior to the hearing on February 16th. All additional comments received prior to the publication of the staff report will also be published in the staff report. You may also make a verbal comment at the February 16th meeting (up to 3 minutes in length per person).

Thank you,

Josh Kinkade

RE 2022 Lakeside Memorial Lawn Crematorium Folsom,
 Project PN-19-182 and 2002 Lakeside Cemetery
 Crematorium Project PN-02-058

Dear Commissioners:

I would like to make a comment on the above-mentioned 2022 Lakeside Memorial Lawn Project Application. In 2002, the Lakeside Cemetery Crematorium made an identical application based on an Initial Study and Mitigated Negative Declaration prepared by the City of Folsom. Those 2002 documents survive any subsequent consideration of an application with an identical project that, has no new substantial information, based on the holding in *Friends of the College of San Mateo Gardens v. San Mateo County Community College* (2016) 1 Cal. 5th 937. :

OPINION J. Kruger “To ensure that governmental agencies and the public are adequately informed about the environmental impact of public decisions, the California Environmental Quality Act (CEQA) (*Public Resources Code 21000 et seq.*) requires a lead agency to prepare an environmental impact report (EIR) before approving a new project that “may have a significant effect on the environment” (*id.* 21151 (a)). When changes are proposed to a project for which an EIR has already been prepared, the agency must prepare a Subsequent or Supplemental EIR only if the changes are “[s]ubstantial” and require “major revisions” of the previous EIR. (*Id.* 21166.) **Guidelines ... extend this subsequent review framework to projects for which a negative declaration was initially adopted, and no EIR was prepared...(CEQA Guidelines 15162.)”**

According to the above court’s ruling, the existing 2002 Mitigated Negative Declaration (MND) stands and must be the controlling document for an identical project.

Staff’s 2002 Findings on the CUP application were recommended for denial based the MND’s lack of substantial environmental information on: whether the operation of the crematorium would or would not affect the health, safety and welfare of the neighborhood residents; that a crematorium was not a compatible use with a historic cemetery because it did not agree with the Historic District Design and Development Guidelines or General Plan goals of history resource preservation of Folsom’s three unique historic resources (Chung Wah, Lakeside Cemetery’s 8 historic cemeteries, and State Preserve Dredger Tailings) , and, because of the substantial reaction against the crematorium by the residents and history preservation groups.

Because the 2022 Lakeside Memorial Lawn Crematorium Project MND and CUP do not have any standing the 2022 MND and CUP should be denied by the Historic District Commission based on (*Friends of the College of San Mateo Gardens v. San Mateo County Community College* (2016) 1 Cal. 5th 937).

If the Lakeside Cemetery wants to re-apply they can do so with the 2002 MND and a new CUP application. However, the Findings for the 2002 CUP denial would still be unanswered and a new CUP application would still have to answer to those deficiencies - by doing the CEQA environmental work that the MND failed to provide.

I recommend HDC deny the 2022 Lakeside Memorial Lawn Cemetery Project with a recommendation to go back and do an Environmental Impact Report. If substantial information regarding the environmental studies should provide answers as to why the Staff recommended denial of the CUP originally, then reapply with a Subsequent EIR. A Subsequent EIR would have legal standing before HDC. The general public, residents surrounding the cemetery and history preservation groups are vigilant and will settle for nothing less.

Sincerely,

Deborah Grassl

RE Lakeside Memorial Lawn Crematorium Project
PN-19-182

Dear Commissioners:

I would like to make three comments with regards to *standards of guidance* that control the approval or denial of the above mentioned Project and its request for a Conditional Use Permit (CUP). And then summarize a recommendation for denial of the Lakeside Memorial Lawn Crematorium Mitigated Negative Declaration and CUP operation.

Standards of Guidance: California's Hierarchy of Planning Laws

1) Under State of California law, charter cities have the legal authority to issue conditional use permits (CUP) using their own written *standards of guidance*, with one proviso: the *standards of guidance* must be contained in the charter city's Municipal Zoning Code, which must be in compliance with its adopted General Plan, which must be in compliance with the California Environmental Quality Act (CEQA) state laws.

The validity of a charter city's CUP approval process derives from compliance with this hierarchy of planning laws (*Neighborhood Action Group v. County of Calaveras (1984) 156 Cal. App.3d 1176*). A charter city can name any number of documents as *standards of guidance* as long as they are contained in their Municipal Zoning Code, in compliance with their General Plan; and in compliance with CEQA. The reason for this hierarchy of planning laws is to check any unbridled discretionary act or decision by an administrative agency, and to help guide the administrative body's Findings.

The City of Folsom is a charter city that authorizes the Historic District Commission to approve CUPs for projects in the Historic District. Some of Folsom's *standards of guidance* are not in compliance with California's hierarchy of planning law.

2) Folsom Municipal Zoning Code (FMC) 17.52 HD-Historic District is a good example.

The FMC 17.52 was crafted from a Master Environmental Impact Report (MEIR), taken from the Historic District Specific Plan mentioned in the 1988 General Plan as almost completed. When finished, this Plan was to be adopted by the City Council and become the controlling *standard of guidance* for the Historic District.

The Historic District Specific Plan was NOT adopted by the City Council. However, the Plan and MEIR were later used to develop the City's Zoning Code 17.52 HD-Historic District, and to craft the Historic District Design and Development Guidelines, both as a *standards of guidance* for the Historic

District. The unadopted Historic District Specific Plan and MEIR, were still used as *standards of guidance* for Folsom's Municipal Code 17.52 and the Historic District Guidelines.

The historic record for how this *standard of guidance* came into being can be found in the (c.1995) Historic District Design and Development Guidelines Introduction, Chapter 1.03 CEQA Compliance:

“The City conducted environmental review of a proposed Historic District Specific Plan. Due to the nature and complexity of the Plan and the projects which will follow under it, a Master Environmental Impact Report (MEIR) was prepared. The City ultimately elected to implement zoning changes to Chapter 17.52 of the Folsom Municipal Code and *design standards* through the adoption of these Design and Development Guidelines. Many of the provisions of the proposed Historic District Specific Plan and the amendments to Chapter 17.52 are contained within these *guidelines*. Accordingly, the City Council relied upon the MEIR for evaluation and consideration of environmental impacts.

... The intent is to allow the creation of an environmental impact analysis and mitigation foundation in an MEIR for a broad planning project which will then enable significant reduced CEQA documentation for future projects built according to Chapter 17.52 and the Design and Development Guidelines.”

The Historic Specific District Plan and MEIR, the foundational instruments for FMC 17.52 and the Historic District Design and Development Guidelines, are in direct conflict with Folsom's General Plan because they were/are used as *standards of guidance* but were not adopted by the City Council into the General Plan. Up until 2 weeks ago, the Historic District Specific Plan was on the City's website as a Resource for the public who need information from the Planning webpage.

3) The Folsom Historic District Commission (HDC) has been given the authority to perform discretionary actions, i.e. the granting of a major CUP, without *standards of guidance* to facilitate mandated deliberation (**CEQA Guidelines Section 15121**) on whether a project qualifies for a major CUP as expressed in its FINDINGS (***Protecting Our Water and Environmental Resources v. County of Stanislaus (2020) 10 Cal.5th 479***).

Accordingly, the City of Folsom describes its *standards of guidance* for issuance of a CUP from its Historic District Design and Development Guidelines however one must go to FMC 17.60.101 Issuance Conditions and applicable laws, and to FMC 1.08 Enforcement of the Folsom Municipal Code and Other Applicable Laws to find standards of guidance for both the Planning Commission and the Historic District Commission. None of these webpages on the City's website refer to CEQA as a controlling *standard of guidance* triggered by the discretionary act of approving a CUP.

CEQA is referred to in the General Plan Update PEIR as a controlling *standard of guidance* for discretionary acts. So, the FMC is in direct conflict with Folsom's General Plan Update PEIR. Here is a conflict in Folsom's planning law that enables unbridled discretionary decisions on Historic District projects.

Summary of Recommendation

The Lakeside Memorial Lawn Crematorium Project and its CUP application is just such a project that requires CEQA deliberation and consideration, which is contained in the General Plan Update PEIR, but not in the FMC.

Approval of the Lakeside Memorial Lawn Crematorium Project and its CUP operations would have very big impacts on residents' health, safety and welfare who live in the neighborhood, and big impacts on treasured historic resources based on the 2022 Mitigated Negative Declaration. I recommend careful CEQA study of the 2003 Initial Study Staff Report and Findings on the last time that the Lakeside Memorial Lawn Cemetery made the same application for a CUP and was denied. Please read the 2003 Findings on the CUP before you deliberate and make your Findings.

To summarize the questions that CEQA could generate on the 2022 MND (which are identical to the Findings in the 2003 MND), and that would satisfy the obligation to show deliberation and where Findings (sans Staff Findings) came from, are:

Is there enough definitive information contained in the 2022 Mitigated Negative Declaration (MND) that is a health study, evidence based, published in a respected scientific medical journal, showing that this crematorium operation will not directly impact, or indirectly impact the health, safety and welfare of the 300+ residents that live next to it?; Do you have enough evidence that says it's okay to ignore General Plan policies, Historic District Design and Development Guidelines' policies regarding preservation of, and protection of, unique historic resources?; Is your decision respectful of the pioneers' and Chinese cultures and their funerary rights? Does your decision reflect the respect the National Register of Historic Places, Sacramento County's Cemetery Commission, the City of Folsom's Master Preservation List of Historic Resources have for the Lakeside Lawn Cemeteries and the Chung Wah Cemetery? And, based on the evidence in the whole record, can you definitively say the Crematorium's operation would have no impact on Folsom's residents performing sacred ablutions graveside, visiting their interred loved ones, and living next to treasured cemeteries that are inundated with fine particles generated by 800 lbs of burning human flesh each day?

The operation of a crematorium at Lakeside Memorial Lawn Cemetery is not a compatible use with historic cemeteries, or proved to have no impact on the health, safety and welfare of the community.

I recommend denial based on the 2003 Staff Findings that still contain the original, unanswered CEQA questions when applied to the new, 2022 Lakeside Memorial Lawn Crematorium Mitigated Negative Declaration and CUP operation.

Sincerely,

Deborah Grassl

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Thanks Josh. I don't know how I missed that the Initial Study and MND were combined.

A comment on the IS/MND: There is scant information on the crematorium's cumulative future impacts regarding traffic, circulation, air quality and wildfire safety.

Example: Igor didn't seem to know how often activities at the Cemetery generate a high level of cars parking on Forrest, Young Wo and Sutter Streets. He thinks that the Cemetery has 50 parking spaces and that is all he needs for future ceremonies and interments that future cremations will generate. In addition, he thinks that although he will conduct 500 cremations a year, this might generate 30 actual ceremonies and interments at the Cemetery...

Example: When asked about the Level of Service change at the intersection of Folsom Blvd and Forrest anticipated by the increased level of cars heading into the Cemetery to attend ceremonies and interments generated by the 30 cremations, he didn't know...

Example: When asked about what kind of wildfire design he used for the crematorium, he said that as far as he knew there weren't any wildfire problems. (He was unaware of Folsom's Community Wildfire Protection Plan. And although the IS stated that the Folsom Fire Chief signed off on the project, there was no input from the Fire Chief in the IS.) He then described how the blast zone of one of the propane tanks was 600' and he thought the propane tanks would be far enough away from homes to not blow them up. He didn't mention the National Registry of Historic Place Chung Wah Cemetery, the State Park filled with dry grasses and trees - or his own Cemetery filled with trees and dry grasses in the back abutting the State Park lands and on the old abandoned Figueroa Street behind 21 Young Wo Circle homes...

Example: Couldn't find any reference about if the crematorium will operate on days when our area is impacted by wildfire smoke or Spare The Air days. When asked if he realized that we are in a non-attainment area and that Folsom doesn't meet State or County government regulations to reducing overall air pollution, Igor didn't know whether the crematorium's air pollution footprint would help the City of Folsom meet the General Plan air quality goals or not...

These future operational impacts are important to people living at The Preserve, Lake Natoma Shores and the Historic District - not so much the IS's construction procedures of the actual building of the crematorium.

We would like Igor to get the environmental information for the cumulative effects of his future operation. That information will tell us whether the quality of our lives will be impacted by a crematorium or not.

Thanks,

Deborah Grassl

July 28, 2021

Dear Ms. Anderson,

I am writing to voice my concerns regarding the proposed Lakeside Memorial Lawn crematorium project. The crematorium would be built and operate just a few hundred feet from my home. After reading the Initial Study/Mitigated Negative Declaration posted on the Folsom City website and doing further research of reliable sources, I am not convinced that the effects would be "less than significant" for those living so near the project. I have serious concerns regarding the impact to air quality, including the release of toxins such as mercury that an operating crematorium would have on my family (my 83 year old mother lives on the same street), and other residents of the neighborhood.

My mother has lived on this street for 23 years and I have lived four doors up the street from her and been a teacher at the public middle school just one mile from our neighborhood since 2006. I ask that this proposal be denied and that the business owners find a location that is not so near a residential area. Please consider how you would feel if you were in our shoes. I imagine that most persons involved in this decision making process and those who would make a profit from the business, would not want their own family living so close to it.

Thank you very much for your time and attention to this very sensitive and important issue.

Sincerely,

Debra Williams

Dear Josh Kinkade:

Lakeside Memorial Lawn, owned by the Caring Service Group, has applied for a conditional use permit to install a crematory on the grounds, here in our backyard in Historic Folsom. This has serious implications for the physical, environmental, and fiscal health of our community and the Folsom Historic District.

Our homes and business in Historic Folsom have been here for many years. We do not want to jeopardize our beautiful community with the consequents of having a crematory installed.

Rancho Cordova has the Rendering Plant. The business and residents who live in the area complain of the horrible smell from the rendering plant. It's stinky and you don't want to go outside in your backyard. I've researched crematory online with different cities who have had complaints from residents with dark smoke and smell. We definitely do not want this in our neighborhood.

Historic Folsom is a charming place where people come to live, enjoy the outdoors with biking, and walking. The Historic Folsom Sutter Street attracts tourist and locals. If the crematory is approved this will change the Historic Folsom charm and lose the tourist and locals supporting the business on Sutter Street. It will also bring down the value of our homes.

We love and live here locally in the Historic Folsom area. I asked you to do the right thing and **deny** the conditional use permit to install a crematory on the grounds at Lakeside Memorial Lawn, owned by Caring Service Group.

Can you suggest to relocate somewhere else like Folsom Ranch on the other side of Hwy 50? Of course not near homes. There is plenty of open space land to build a crematory in that area.

Do not build crematory in a residential area. Its not fair to the home owners.

Please provide my email to the Historic Commission who will make the decision to deny or grant the decision of the permit.

Thank you

Diana Luzader

Re: Vote NO on Folsom Crematory Proposal
Public hearing scheduled for February 16, 2022

I am writing to you as a concerned resident in the Folsom Historic District. I am strongly opposed to the conditional use permit to install a crematorium on the grounds of a residential open space. I believe allowing a permanent, industrial incinerator in the residential open space does not meet the criteria of the Folsom Historic District.

I further believe this contradicts the city of Folsom motto, 'Distinctive by Nature'. I urge you to vote NO on the proposed Folsom Crematorium. Please consider the impacts to the environment, physical health of the residents and the fiscal health of the Folsom Historic District.

Vote NO on the Folsom Crematory Proposal.

Sincerely,

Edwin Grattan
Historic Folsom Resident

To whom it may concern,

I live on the bluffs in Orangevale overlooking Lake Natoma. I have learned that a crematorium may be put in the Lakeside Cemetery next to the lake. This is a terrible idea.

I understand this is zoned as open space, and it should be kept natural. I paddle board frequently on the lake, enjoy being outside walking the paths and relishing the beauty I am so lucky to have in my backyard. A crematorium does not belong near residents and visitors to Folsom recreation, shopping and dining. Nor does this crematorium belong in an area that is next to a state park. Nobody wants to see or smell puffs of human remains/smoke while they are trying to enjoy the outdoors and neighboring areas; this should be put within an industrial zone or the like. Please help us keep the view and open space natural and (live) people-centered.

On another note, I would be furious and deeply disappointed if I heard this crematorium would be installed across or down the actual street from my home. Would you like it near yours?

Thank you for your time and attention to this important community matter.

Sincerely,
Erika Hamer

I am 8 years old, and I really don't want a crematorium in my neighborhood. My family lives in this neighborhood, and I don't want all of us to breathe bad air. I just moved here, and I don't want to move again. My grandparents live directly across from the cemetery. And my cousin lives 5 houses away from my grandparents, and she's only one! Please don't put a crematorium in my neighborhood there are lots of kids in the neighborhood.

Sincerely,
Evelyn Gates

ACTION NEEDED: NOTICE OF PUBLIC HEARING

Lakeside Memorial Lawn cemetery off Folsom Blvd. next to Sutter Street, owned by **Miller Funeral Home**, has applied for a conditional use permit to install a crematory here in the heart of our community. Their proposal has changed--they have doubled the number of bodies they propose burning each day. Burning 800 pounds of human bodies per day has serious implications for the physical, environmental, and fiscal health of the Folsom Historic District. Allowing a permanent, industrial incinerator in open space does not meet the criteria of the Historic District.

The time for action is **NOW!**

1. Mark Your Calendars!

- The public hearing is scheduled for **February, 16, 2022 at 5:00 pm.**
- Our attendance and participation is critical to ensure our interests are represented.

2. Write a Letter & Sign the Community Petition

- The public review period, where public comment is collected, is from January 7 - February 7.
- Write a letter to our Historic District and City Council elected representatives to tell them to vote "NO!"
- Sign the community petition at noburningbodies.com

3. Phone a Friend (or 3)!

- Please ask other community members, friends and family to write letters, sign the petition and attend on February 16th!

4. Want to Help?

- Email protectthepreserves@gmail.com to sign up to help!

Dear K. Mullett,

I am a resident of the "Historic District" just across Folsom Blvd. within walking distance to old town Sutter St. I live on Sutter St. in one of the few historic homes that were spared when the Natoma Crossing Bridge was constructed. I love the neighborhood that I reside in. At first glance you would think it must be a dream come true area to call home. Well, we have had to accept and learn to live with relentless loud Light Rail dinging for 10 consecutive minutes on the half hour of every hour all day long and well into the evening EVERY single day. Roaring motorcycles that feel and sound like a freight train going through our home at all hours of the day, perhaps due to the close proximity of the Harley Davidson retail establishment just down the street, regardless, impossible to EVER enjoy a quiet summer morning or evening in our sweet yard. Add to the mind numbing roar of the motorcycles and we have constant noise pollution from the never ending backup of traffic on Folsom Blvd., not to mention the choking toxic exhaust and unhealthy fumes from this staggering amount of congestion of traffic, that truly does not lighten up until maybe 3:00am in the early morning and the quiet only lasts a couple of hours until it all begins again. This brings me to the proposal of building a crematorium on site of the Lakeside Memorial Lawn Cemetery that is not a very big cemetery to begin with. The Preserves is a lovely neighborhood with a beautiful mix of elderly and young and everything in between. I can tell you though, that not many of us can take much more. I have had to accept an Air B&B next door (currently now a Beauty Salon), the homeless trying to set up residence in city owned triangles of tiny land, arrogant and selfish bicyclists that absolutely refuse to respect the numerous "please walk your bikes" signs and fly at breakneck speed through the pedestrian walkway access to the Light Rail Station and to old town Sutter St. I have heard and witnessed many close calls and am terrified of the day when a young child or an elderly will be hit by one of these self centered and entitled individuals that are very

reckless and dangerous, thinking they have found a fabulous shortcut to the bike trail along the river. The crematorium will, needless to say, be the "last straw" for many. I, for one, will not stay. I already ceaselessly worry about the toxic exhaust and dangerous unhealthy fumes from the close proximity to busy Folsom Blvd. It will truly be the one last thing that so many will see as one thing just too much to have to accept and make the best of.

Sincerely,
A quiet lovely senior citizen

Dear Folsom City Officials,

I have grown to cherish our city with it's well thought out planning and infrastructure. I guess that's why I'm so confused that the city would even consider building a crematorium literally one block from my house. In fact I'm quite frustrated that on a Saturday instead of enjoying time with my 9 month old and teenage sons I'm having to write an email defending what seems like a common sense decision. Building a crematorium one block from my house will not only do psychological harm to myself and my family but will also worsen the air quality in my neighborhood where I am trying to raise my family. We already have some of the worst air quality in the country. With annual wildfires causing horrible conditions every year that on many days it's not even recommended that we go outside. I cannot believe that you would even consider adding to that horrible pollution with the smoke of dead bodies being billowed into my backyard as we try to enjoy our lives in historic Folsom. As we try to BBQ with family and friends, all the while breathing the smoke of the deceased.

Please do the right thing and reject this proposal. Have the crematorium be moved to a remote and rural location where it belongs. Please protect the health and well being of my family and preserve the sanctity of historic Folsom.

Heather Hayes

Dear Mr. Johnson,

I am writing in regard to the proposed crematorium at Lakeside Cemetery. I am a resident of the Preserve neighborhood in Folsom.

My first concern with having a crematorium in my neighborhood is the release of harmful toxins into the air during the cremation process and the long term effects on me and my family. One such example is the mercury from the dental amalgam fillings being vaporized and released into the atmosphere. The emissions of mercury will not be regulated. There is no national standard for mercury emissions from a crematorium. There is no known lower level of toxicity of mercury. As stated in the 2019 Final Senate Crematoria Committee Report of Georgia:

“ while there are emissions of other chemicals during the cremation process, mercury is of the most concern to communities near crematoriums. When mercury is burned, it becomes a colorless and odorless gas that can travel long distances. While mercury exposure has the potential to cause a variety of health problems, the brain and kidneys are especially vulnerable.”

<https://www.senate.ga.gov/sro/Documents/StudyCommRpts/12CrematoriaStudy.pdf>

The following 2020 study from the Canadian Journal of Public Health highlights the fact that crematoriums are a source of air pollution and should be monitored due to cumulative effects.

“This study underlines that the main concern about mercury from crematoriums is not acute exposure to immediately dangerous ground-level concentrations but long-term indirect exposure from the contamination of the environment and the food chain, although more difficult to assess quantitatively. It is important to inform decision-making around environmental permitting and pollution prevention to motivate further regulation. Crematoriums are a source of air pollution as a result of combustion of caskets and human bodies, as well as companion clothing, and should be subject to the regulatory framework covering all sources of air pollutants, notably including mercury. Environmental monitoring of mercury emission from crematoriums is warranted.”

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7728964>

Another concern is the cremation of bodies that have had radiation treatment therapy or chemotherapy. If there are no ongoing emissions regulations, how is it determined there is no negative impact to the residents or environment?

A recent study from Journal of American Medical Association (JAMA) reported on an incident of radioactive contamination to the facility equipment and an employee that occurred in Arizona crematorium when a cancer patient was cremated.

“As of 2006 (the most recently reported data), 18.6 million nuclear medicine procedures were performed in the United States, with nearly 40 million performed worldwide.¹ Safety regulations are well established for radiopharmaceutical administration in living patients. However, radiopharmaceuticals present a unique and often overlooked postmortem safety challenge. Cremating an exposed patient volatilizes the radiopharmaceutical, which can then be inhaled by workers (or released into the adjacent community) and result in greater exposure than from a living patient. Regulations for cremation of exposed patients vary by state, as well as internationally, and there are no regulations at the federal level in the United States.”

<https://jamanetwork.com/journals/jama/fullarticle/2725673>

It just seems common sense to not place a crematorium in close proximity to residents, a state park and a lake. Besides the above environmental concerns, there is the concern of fire or accidents at crematoriums. Here are a few examples. Many more can be found with a simple internet search:

Thank you for your consideration, Helen Walsh

**HERITAGE PRESERVATION LEAGUE OF FOLSOM
INITIAL STUDY REVIEW**

February 4, 2022

PROJECT: 1201 Forrest Street, Lakeside Memorial Lawn Cemetery in the State Open Space Area along Lake Natoma (Project File: 19-182)

REQUEST: Design Review including the installation of a crematorium in an existing metal shed and the installation of two freestanding propane tanks adjacent to the shed.
Conditional Use Permit to operate the Crematorium at Lakeside Cemetery.

PROJECT

HISTORY: The Public Review Period for the Initial Study and Mitigated Negative Declaration started on January 7, 2022 and ends on February 7, 2022.

A similar application was processed through the City in 2002 and 2003.
(Project File: 02-258)

BACKGROUND

Lakeside Cemetery was started by the miners at Negro Bar. In the days that followed the early gold rush the state property became a Pioneer Cemetery with a cluster of individual burial sites. As documented by Sacramento County Cemetery Advisory Commission, the cemetery incorporates areas designated to the Jewish community, the Masons, the Oddfellows, the Cook Family, the Citizens of Folsom and a special area reserved for infants and young children. Cremations were not a part of the traditions during these times.

On November 24, 1998, Folsom's City Council approved the Historic Preservation Master Plan. As a part of this document, Lakeside Cemetery was placed on the Preliminary Cultural Resources Inventory of properties and structures eligible for local listing. In 2006, the Masons and Oddfellows cemeteries were processed for listing and added to the City's official Inventory.

THE PREVIOUS CREMATORIUM APPLICATION

When a crematorium addition was proposed for Lakeside Cemetery in 2002, planning staff recommended that the Historic District Commission should deny the Conditional Use Permit based on the age and history of the cemetery. The following issues were raised:

- The cemetery can provide unique information about the early days of Folsom and the various groups of citizen that lived in the City during this time.
- A crematorium was not included with Pioneer Cemeteries and a crematorium addition will impact the historic character of Lakeside Cemetery.
- Sacramento County Historic Cemetery Commission has identified Lakeside Cemetery as locally significant. *(Six individual sub-areas of Lakeside Cemetery are included with Sacramento County Cemetery List.)*

INITIAL STUDY

The Cultural Resources Chapter of the current Initial Study fails to mention that the City of Folsom and Sacramento County considers Lakeside Cemetery a locally significant historic site. It also does not describe the early use of the cemetery by various local groups of citizens.

The mitigation measures for cultural resources (CUL-01, 02, and 03) does not address the expanded use of the cemetery property. Instead these mitigation measures provide standard language for projects that require excavation (including the uncovering of archeological resources and human remains). Because the crematorium project will only require leveling of the ground before a concrete pad is installed (for fuel tanks), these mitigation measures does not apply to the proposed crematorium project.

CONCLUSION

The Lakeside Crematorium project has not changed since the previous application in 2002. The same findings that staff prepared in 2002 to justify a recommendation for denial still applies.

- The Heritage Preservation League of Folsom urges the Historic District Commission to deny the Lakeside Crematorium project.

The Initial Study does not discuss how the existing project will impact the historic significance of the Pioneer Cemetery. Any conclusion that environmental issues can be covered by a Mitigated Negative Declaration is therefore premature.

- The Heritage Preservation League of Folsom recommends that the Historic District Commission deem the Initial Study regarding the Lakeside Crematorium project incomplete.

Attachment 1

Findings for Denial
PN02-258

STAFF RECOMMENDATION

Staff recommends denial of a Conditional Use Permit to operate a crematorium at an existing cemetery at 1201 Forrest Street in the Historic District, based on the following findings.

HISTORIC DISTRICT COMMISSION ACTION

MOVE TO DENY THE CONDITIONAL USE PERMIT TO OPERATE A CREMATORIUM AT AN EXISTING CEMETERY AT 1201 FORREST STREET IN THE HISTORIC DISTRICT.

FINDINGS FOR DENIAL

- A. NOTICE HAS BEEN GIVEN AT THE TIME AND IN THE MANNER REQUIRED BY STATE LAW AND CITY CODE.
- B. THE USE APPLIED FOR IS DETRIMENTAL TO THE HEALTH, SAFETY, OR GENERAL WELFARE OF PERSONS RESIDING OR WORKING IN THE NEIGHBORHOOD, AND DETRIMENTAL OR INJURIOUS TO PROPERTY AND IMPROVEMENTS IN THE NEIGHBORHOOD AND THE GENERAL WELFARE OF THE CITY BECAUSE THE INTRODUCTION OF THIS USE WILL IMPACT THE HISTORICAL CHARACTER OF THE EXISTING CEMETERY AND HISTORICAL USE OF THE AREA.
- C. THE CONGLOMERATION OF HISTORIC CEMETERIES, COMBINED WITH THE CALIFORNIA STATE DREDGER TAILINGS DATING BACK TO THE 1850'S, CREATE A RARE COMBINATION OF UNIQUE CULTURAL RESOURCES THAT WILL BE IMPACTED BY THIS PROPOSAL.
- D. THE USE OF THE PROPOSED PROJECT IS NOT CONSISTENT WITH GOAL 2 OF THE DESIGN AND DEVELOPMENT GUIDELINES IN THAT IT DOES NOT MAINTAIN THE HISTORIC USE OF THE SITE. IN ADDITION, THE PROJECT DOES NOT FURTHER DESIGN AND DEVELOPMENT GUIDELINE POLICIES 2.1, 2.2, AND 2.3 IN THAT:
 1. COMMISSIONERS FROM SACRAMENTO COUNTY HISTORIC CEMETERY COMMISSION HAVE IDENTIFIED THIS SITE AS LOCALLY SIGNIFICANT, AND COMMISSIONERS INTEND TO PRESENT LAKESIDE CEMETERY TO THE SACRAMENTO BOARD OF SUPERVISORS FOR DESIGNATION AS AN HISTORIC CEMETERY.
 2. APPROVAL OF A CONDITIONAL USE PERMIT FOR A CONTEMPORARY USE THAT WILL JEOPARDIZE THE ELIGIBILITY STATUS OF THE SITE WOULD WORK TO DISCOURAGE, RATHER THAN TO ENCOURAGE, NATIONAL REGISTER NOMINATION.
 3. BASED ON A LETTER FROM JAMES A. PURCELL, CHAIRMAN OF THE SACRAMENTO COUNTY HISTORIC CEMETERY COMMISSION DATED JANUARY 2, 2003, A CREMATORIUM IS NOT A CONSISTENT USE WITH A HISTORIC CEMETERY.

Attachment 2

Letter from the Chairman of
Sacramento County Cemetery Advisory Commission

Sacramento County Cemetery Advisory Commission
4800 Broadway, Suite 100
Sacramento CA 95820

City of Folsom Historic District Commission
50 Natoma Street
Folsom, CA 95630

Attn: Jane Talbot

Dear Ms Talbot::

The Sacramento County Cemetery Advisory Commission is in receipt of your Notice of Public Hearing regarding PN 02-258 Conditional Use Permit and Mitigated Negative Declaration 1201 Forrest Street.

The commission is charged with the duty to encourage the preservation and designation of historical cemeteries. We are currently preparing a list of those cemeteries in Sacramento County, which should be considered historic. It is my opinion that Lakeview Cemetery will be one of the cemeteries in Sacramento County that will be on the list that is to be presented to the Board of Supervisors for designation as an historic cemetery.

While no official action has yet been taken by either The Cemetery Advisory Commission or The Board of Supervisors regarding Lakeview Cemetery we ask that you consider the above mentioned conditional use permit in the context of Lakeview's historic significance and endeavor to preserve its historic elements.

Sincerely,

James A. Purcell, Chairman
Cemetery Advisory Commission

Chair, James A. Purcell

Vice Chair, Dr. Robert La Perriere

Dear Council members, Planning Commission members, and Residence Association members,

The Lakeside Memorial Lawn crematorium proposal is deeply troubling to me and my family for a number of reasons. The Caring Service Group is not a small business and states outright on their website that they're in the business of buying up and aggregating small funeral home businesses. This model further distances the business from its community's concerns and it shows with the "Initial Study/Mitigated Negative Declaration" dated April 2021.

The TAC (Toxic Air Contaminants) assessment in Appendix B of the "Lakeside Memorial Lawn Crematorium Initial Study/Mitigated Negative Declaration" dated April 2021 is flawed and irresponsible. Most specifically in terms of the evaluation of the impact to "Sensitive Receptors". The report by Helix Environmental Planning notes that the adjacent residential houses are as close as 450 feet which is not that far! That's about the width of 5 or 6 lots in our neighborhood, 5 houses down the street. The report makes it sound like the combustion stack is remotely located away from our neighborhood which couldn't be farther from the truth. I walk the neighborhood regularly with my 1 and 3 year old children and it's a short walk from the closest house to the proposed site which is where my son likes to occasionally ride his balance bike. The Historic District Historical Society write-up of the cemetery (<https://www.folsomhistoricalsociety.org/post/lakeside-cemetery>) concludes with "The next time you are in town I highly suggest you take a visit to the cemetery; the older burial sites are beautiful, and its quiet location makes a perfect Fall afternoon walk." This will certainly change when there are constant emissions adjacent to the cemetery and increased vehicular activity carting the deceased to and from the crematorium "shed".

The report also neglects to recognize that the American River Bike Trail is adjacent to the proposed site where numerous people of all ages including sensitive groups, i.e. elderly and families with young children religiously use the trail. The proposed industrial process does not fit within the open space plan of the adjacent area. It should not be used for a pollution buffer zone, it's a recreation area. While using the trail, the folks that are exercising will be subject to toxic emissions, at times while breathing heavily. The Air Quality Board recommends restricted exertion levels of people when air quality is poor, so to introduce a source of constant emissions renders the trail effectively unusable, especially by sensitive individuals.

The assumption that the meteorological data used from the Sacramento Executive Airport station, almost 20 miles away, which regularly gets the delta breeze where the planned site does not, appears to be laughably unethical. The canyon near the proposed site has significantly different geography. It often has stagnated air that collects along the river trail which can be witnessed when exercising along the trail in the summer and winter months. At these times when the air is perfectly still, combustion gas from leaf blowers from the adjacent business parking lots simply stagnates right on the trail. Trail users should not have to worry about breathing in toxic hydrocarbon and heavy metal combustion products along with new unpleasant smells. The near-zero initial vertical gas velocity assumption of the stack configuration in the source parameters paragraph will only exacerbate the emissions settling issue on the trail and adjacent neighborhood. The 500 meter radius geography sample used in the analysis is not enough to capture the adjacent yet substantial cliffs in the region and could be interpreted to be an attempt to replicate geography near the airport which would also be unethical in terms of being non-representative.

For a city that wants to define itself as distinctive by nature, this is a far cry from the current mission statement. The benefits to the community are substantially outweighed by the safety risk and misuse of the planned site.

I strongly encourage the Folsom City Leadership to reevaluate the applicant's intentions to monetize a currently quaint property with a toxic industrial process directly adjacent to a family oriented neighborhood and world class nature trail.

Sincerely,

Isaac Monical

Hi my name is jackson I am very very sad. Every day me and my neighbor friends play outside and I am not sure if that will be able to continue in the future . I am 10 years old and had my birthday party here. Will I be able to have another birthday party outside? will animals stay in our neighborhood?

To: The Folsom Historic District Commission

The Caring Service Group and the Miller Funeral Home have applied for a conditional use permit to install a crematorium in an area that is zoned open space in the Folsom Historic District. I am very opposed to their plan of burning hundreds of bodies a year. Burning up to 800 pounds of bodies each day has serious implications for the physical, environmental, and fiscal health of our community.

I live in The Preserve/Lake Natoma Shores (over 100 homes) area which is located next to Lakeside Cemetery. Forrest Street, which is the sole entry point to our neighborhood, is narrow and curved. I have lived here over 25 years and at this point in time, it is frequently challenging to even enter or exit my neighborhood for a variety of reasons: Light Rail increased the traffic problems; The current traffic from our neighbors and visitors to the state park, the Lakeside Cemetery, the Murer House and the VFW cause time-consuming inconveniences that are sometimes dangerous. Please do not approve of the crematorium which will cause more danger and additional traffic.

The crematorium has proposed two, 250 gallon propane tanks above ground, in a wild fire danger area. There have been fires in the state park over the years. Countless people come to our neighborhood daily to walk, run, ride bikes, trikes, boating and to enjoy Lake Natoma. Please do not put those of us who live here and the people that come here to enjoy the state park and lake, in danger by approving the crematorium.

In addition, I am extremely concerned about the air quality if the crematorium is approved. Poor air quality, smell, increased fire risk and toxic particulate matter will cause lasting damage on the physical and environmental health of our community. According to the Sacramento County's Air Quality Management District, the crematorium would be self-regulated, with the County having very little

oversight over the mercury-based emissions. The Initial Study by HELIX Environmental Planning Inc., notates levels for harmful toxins including chromium, mercury, and organics. Our local experts have warned that those toxins are most dangerous when vaporized. The smaller the particulate matter, the more dangerous it becomes. The report designates the level as “not significant.” That only applies to the average, healthy adults. The study does not report significant and potentially deadly levels for unborn children, developing children, elderly, and those with existing health conditions. I am a senior citizen with health issues and there are many young children that live here and many more that come to play in the nearby Preserve Mini Park on Sutter Street.

Please protect Historic Folsom. I am not opposed to a crematorium in a rural or industrial area. I am extremely opposed to a crematorium next to open space, neighborhoods, and a recreational area where people come here to enjoy Lake Natoma and our lovely Historic Folsom.

Sincerely,

Janice Brial

Subject: Proposed - Lakeside Cemetery Crematorium
Date: Tue, 23 Feb 2021 12:12:21 -0800
From: JANICE BRIAL [REDACTED]
To: daronbr@pacbell.net

To: Chairman Daron Bracht
 Chairman of the Folsom Historic District Commission

Dear Chairman Bracht,

It is my understanding that there is going to be a meeting about a proposed Crematorium at Lakeside Cemetery, at the Folsom Historic District Commission soon. It has been challenging to try to be up to date about what is going on during the last year of COVID. I am not aware of the developer contacting anyone in my neighborhood about the crematorium. I wonder if they have contacted the state park that is also near by?

I live in The Preserve/Lake Natoma Shores which is located next to Lakeside Cemetery. There are over 100 homes. Also, people using The Murer House, Lakeside Cemetery, the VFW and the Preserve Mini Park only have **one way** to drive in or out of this area on Forrest St. Forrest St. is small, curved and has very narrow parts. I have lived here over 25 years and at this point in time, it is frequently challenging to even enter or exit my neighborhood.

The state park is also next to this neighborhood. We have many people coming through riding their bikes, trikes, scooters, walking and running through our neighborhood. We also have traffic with people driving to Young Wo Circle and parking next to the state park and accessing the state park for biking, kayaking, running, walking, etc.

One frequent problem in trying to get in and out of Forrest Street, is the frequent train traffic. At this point in time, I believe that a train comes and goes to Old Town Folsom every 30 minutes (to and from Old Town Folsom). I have been told that the train traffic is going to be increased to every 15 minutes. When that happens, it will be much more difficult to exit and enter Forrest Street, which is the only way all of the above mentioned drivers can get in and out of the neighborhood.

A driver frequently must wait to exit Forrest St, for the traffic lights to cycle through 2 times, because a train is either going to or coming from Old Town Folsom. All of this is tedious and inconvenient. However, the biggest concern is when there is an actual emergency such as a fire at the state park (which has happened) or a fire or other emergency

anywhere in this area. People could be **trapped** and unable to safely leave the **ONLY EXIT** on Forrest St. It seems only sensible that nothing else should be built in this area when a safe exit does not exist in case of any type of emergency.

Drivers who are familiar with the complicated intersection at Folsom Blvd, Natoma Street/Forrest St. and are attempting to leave Forrest Street, know that there are two very small slots to exit next to Folsom Blvd. The right slot in the lane, is for right turns only. The left slot of the lane, is for turning left on Folsom Blvd. or going straight to Natoma St. Unfortunately, the individuals who are unfamiliar with the intersection frequently sit in the right hand lane slot and block the only exit that does not require a green light to leave. Any increased traffic to the Lakeside Cemetery will cause the intersection to be even more dangerous.

Our hard working Folsom Police Department also uses the entrance at Forrest St. and pulls over vehicles that have been speeding on Folsom Blvd., or breaking the law in other ways. It is rather routine to see one or more vehicles pulled over on Forrest St., opposite the entrance to Lakeside Cemetery. It is crowded and a driver must cross, to drive to the other side of the street, to get by.

I am not aware that the Lakeside Cemetery has notified any of the nearby residents or businesses about the proposed crematorium. We would all be involved in our attempts to exit and enter our neighborhood with any increased traffic. It seems like such a facility should only be installed in an industrial or commercial area, not near a neighborhood and state park.

My other concern is air quality. I am sure there must be safety precautions regarding fumes and dangerous particles going into the air with crematoriums. However, things happen, and sometimes even the best made plans do not work. We already have unsafe days and are sometimes told to not even walk outdoors. We are hundreds of people of all ages from babies to senior citizens. Many of us already have existing asthma, allergies and other breathing issues. Please do not allow a crematorium to be put into this lovely area where people are exercising (walking, biking, running, etc.) in our neighborhood and also going to and from the state park. I moved here to have a healthy life style near beautiful Lake Natoma and charming Old Town Folsom.

Please share my letter with the rest of the Historic District Commission. Please let me know that you received this email.

Thank you for your service.

Sincerely,

Janice Brial

To: City Council Representatives and Folsom Historic District Commissioners

Re:Vote NO on Folsom Crematory Proposal
Public hearing scheduled for February 16, 2022

I am writing to you as a concerned resident in the Folsom Historic District. I am strongly opposed to the conditional use permit to install a crematorium on the grounds of a residential open space. I believe allowing a permanent, industrial incinerator in the residential open space does not meet the criteria of the Folsom Historic District.

I further believe this contradicts the city of Folsom motto, 'Distinctive by Nature'. I urge you to vote NO on the proposed Folsom Crematorium. Please consider the impacts to the environment, physical health of the residents and the fiscal health of the Folsom Historic District.

Please preserve the environment, the physical health of the residents and the community as a whole.

Vote NO on the Folsom Crematory Proposal.

Kindly,

Jennifer Grattan
Historic Folsom Resident

Hi there,

I am writing to you as a plea to vote "no" on the crematorium proposal in the residential Preserve neighborhood of Historic Folsom. My mom lives there and we frequently visit her with our small children, especially in the Spring and Summer when the weather is nice and we can play outside at her house and nearby the river.

A crematorium doesn't belong there. The noise of machinery, the increase of cars in and out of the neighborhood, AND the pollution in the air will devastate the livelihood of the people who live and visit there.

A crematorium should be placed in an industrial area. Please vote in favor of the residents who need you to protect their neighborhood.

Thank you,

Jessica Grob

[Sent from Yahoo Mail for iPhone](#)

From the desk of Joan Boyle

I am writing to you today because it has come to my attention that Lakeside Memorial Lawn Cemetery is working to put a crematorium on the property located at the intersection of Folsom Blvd and Forrest St. The **crematorium** will be housed in a **shed**, serviced by **two 250-gallon propane tanks**, and have a **smoke stack** installed for ventilation.

Lakeside Memorial Lawn Cemetery is part of the Miller Funeral Home which is owned by Caring Services Group. When looking at Caring Services Group's website their opening statement is, and I am quoting here, "**Caring Services Group was established in 2010 with a primary goal of purchasing Funeral Home businesses.**" With this as their primary goal, they do not appear to be a family-owned business with the best interests of the community at heart, but more a corporation that only cares about their bottom line. I attended a Zoom meeting where Igor Semenyuk, the Chief Operations Officer for Caring Services Group, was speaking on the topic. When asked why they wanted to place the crematory in the Lakeside Memorial Lawn he said something to the effect that 'the location is cost effective'. Again, no regard for the community or it's people, just their bottom line.

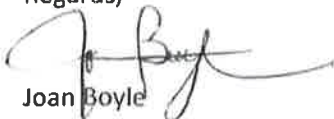

Lakeside Memorial Lawn is currently designated as Open Space which excludes it from operating a crematorium. The owners are applying for a Conditional Use Permit to change that. This is very concerning for a number of reasons, including but not limited to:

- **Toxicity levels** – harmful toxins such as chromium, mercury and organics become most dangerous when vaporized. While the initial report by HELIX Environmental Planning, Inc. notes the levels as "not significant" this applies to only average healthy adults. The study fails to report the effect on unborn children, developing children, the elderly and those with existing health conditions.
- **Air Quality** – poor air quality, smell and toxic particulate matter will cause lasting damage on the physical, environmental and fiscal health of our community.
- **Fire Danger** – two 250 gallon above ground propane tanks pose a real threat to the area. The proposed crematory site is located within a wildfire danger area. It is also adjacent to the American River Bike Trail, Lake Natoma and a residential neighborhood. If there were to be a wildfire or vandalism, the propane tanks could cause untold damage to the area.
- **Traffic** – there is only one ingress and egress to the area. This intersection of Folsom Blvd and Forrest St is already compromised by the light rail train interruptions. Additional business, or the need for an emergency evacuation could be very problematic.

Please deny the Conditional Use Permit to operate a crematorium at this location.

In closing, I am not opposed to a crematorium. But it should be placed in an appropriately zoned area, not in Historic Folsom, adjacent to the American River Bike Trail and Lake Natoma.

Regards,

Joan Boyle

From the desk of Joan Boyle

It is clear from this picture that the shed, actually both of them, are visible from Folsom Blvd. How can the report conclude that "Tailing piles between the site and Folsom Boulevard prevent the site from being visible from that street."? That is not a true statement. You can clearly see the shed, and the smokestack is not even installed yet. That's at least another 10 feet in the air, but the report says the smokestack was taken into consideration. How can the report be trusted?

Second:

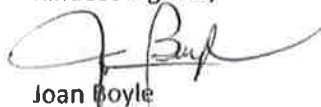

- **In Section 9.0 Environmental Initial Study Checklist Subsection XVII. Transportation** it states "As the crematorium would not be located in or near a funeral home and would be separate from any funeral services or public gatherings provided by the project applicant, access would only need to accommodate a small number of staff members with a business at the site." While in the **Lakeside Memorial Lawn, Scope of work – Installing a Crematory – Point at Issue** it states "There are several large cultural communities residing and moving into Folsom. Regretfully, we do not have the ability nor the capability to serve the Sikh, Hindu, Buddhist or other cremation-based cultures as they require an on-site crematory so that they are able to exercise their funeral rights and customs. Currently there is no crematory in the city of Folsom so they must find the services outside the city."
 - Is the proposed crematorium going to be opened the public so "the Sikh, Hindu, Buddhist or other cremation-based cultures as they require an on-site crematory so that they are able to exercise their funeral rights and customs", or is it just open to a "small number of staff members"?
 - If it is the former, will the Initial Study be updated to reflect that? I have reached out to the consultant to ensure clarity on this

I have yet to hear back from Josh on this topic. But, if the primary purpose of the Conditional Use Permit is to have "the capability to serve the Sikh, Hindu, Buddhist or other cremation-based cultures as they require an on-site crematory so that they are able to exercise their funeral rights and customs" but, as the Mitigated Negative Declaration says, only a few workers will be on site, then there's no need to put the crematorium at the cemetery. It should be located in a properly zoned area. At best these are two completely contradictory statements. It appears to me that this issue needs to be resolved prior to voting on the request.

I understand this is a difficult decision you are championed to make. I implore you to consider the nature of Historic Folsom, the American River Bike Trail, Lake Natoma, as well as the welfare of the residents when making your decision.

Thank you for your time.

Kindest regards,

Joan Boyle

From the desk of Joan Boyle

Hi. Let me introduce myself, my name is Joan Boyle and I am a resident of the Preserve neighborhood. I am writing to you today regarding the upcoming vote on the proposed crematorium at the Lakeside Memorial Lawn Cemetery.

I have spent some time reading through documents from both Caring Services Group and the City of Folsom, including The Scope of Work and the Initial Study/Mitigated Negative Declaration, and I have some concerns and questions. I sent a number of questions to Josh Kinkade, the Project Planner at the City of Folsom, regarding statements and conclusions made in the Initial Study/Mitigated Negative Declaration. Below I have highlighted two of my questions that are particularly concerning to me (Josh's responses are in red).

First:

- **In Section 9.0 Environmental Initial Study Checklist Subsection I. Aesthetics** it also states "Tailing piles between the site and Folsom Boulevard prevent the site from being visible from that street." Note: Attached is a photo showing that the shed (even without the smokestack) is visible from Folsom Blvd.
 - Was the installation of the smokestack taken into account when this statement was made? **Yes**
- **In Section 9.0 Environmental Initial Study Checklist Subsection I. Aesthetics c)** concludes "Less Than Significant Impact". I would argue that the view of a smokestack in a Historic cemetery, adjacent to the American River Bike Trail and a residential neighborhood is significant.
 - What criteria was used to determine the impact is "Less Than Significant"? **It was determined that the smokestack would be adequately screened by existing walls and landscaping. If the commission would want additional screening, they can add that to the conditions of approval as part of their decision on whether to approve the project.**

Dear Josh,

Hi. Let me introduce myself, my name is Joan Boyle and I am a resident of the Preserve neighborhood. It has come to my attention that Lakeside Memorial Lawn Cemetery is working to put a crematorium on the property located at the intersection of Folsom Blvd and Forrest St. I am reviewing the Initial Study/Mitigated Negative Declaration to try and understand the details of the proposal. I have a few questions. This is all very new to me, so I apologize in advance if my questions are basic.

Just for background, I did attend a Zoom meeting where Igor Semenyuk, the Chief Operations Officer for Caring Services Group, was speaking on this topic. I mention this, because in some of my questions I will be referencing things Igor said in that meeting.

Okay so, here we go...

- **In Section 11.0 Initial Study Preparers** it states that you are one of the preparers of the document along with HELIX Environmental Planning Inc. and ECORP Consulting, Inc. But Igor said over and over again in the Zoom meeting that he paid \$30,000 for the report.
 - Who prepares the report?
 - Who pays for the report?
 - If Caring Services Group is paying for the report how is impartiality achieved in determining the conclusions presented in the report?
- **In Section 3.3 Project Characteristics** in the Initial Study dated April 2021 it states "The applicant anticipates one or two cremations on most business days (Monday through Friday) and expects that the total will not exceed 500 cremations per year." while in the Initial Study dated January 2022 it states "The applicant anticipates 1 - 4 cremations on business days (Monday through Friday) with the total number of cremations not exceeding 500 per year."
 - Why was this verbiage changed?
 - Who requested this verbiage change?
- **In Section 3.3 Project Characteristics** it states that "The applicant anticipates 1 - 4 cremations on business days (Monday through Friday) with the total number of cremations not exceeding 500 per year." But in the Zoom meeting Igor commented that it could be up to 5 per day.
 - Is this Initial Study/Mitigated Negative Declaration study and all its subsequent findings (including Air Quality), based on 1, 2, 3 or 4 cremations a day?

- Who monitors the number of cremations performed daily to ensure the total number of annual cremations do not exceed 500?
- **In Section 3.3 Project Characteristics** it also states that HCT Apex-250 crematory will be installed in a shed, and “The shed would be modified to accommodate this device, but the shed’s footprint would not be expanded.”
 - What modification(s) are being made to the shed?
- **Section 3.3 Project Characteristics** it also states that “Two 250-gallon propane tanks would be installed on a proposed concrete pad along the northern side of the shed to provide power for the crematorium, as no gas lines currently exist on the property.” In Appendix A it states “(N) 2 X 500 gallon propane tanks”
 - What is the size of the propane tanks 250 gallons or 500 gallons?
- **In Section 9.0 Environmental Initial Study Checklist Subsection I. Aesthetics** it states “A small exhaust stack would be added to the roof of the shed. The stack would be approximately 19.5 feet above grade, and would project approximately 10 feet above the existing roof of the shed.”
 - This statement uses the words **small** and **approximately**. Why is this statement so vague?
 - Shouldn’t Caring Services Group be able to provide specific enough information to calculate exactly how tall the smokestack would be, and provide that information to the writer of this report?
 - Example: If the smoke stack is installed 19.5 feet above grade and the shed is a single story building of approx. 12 feet, won’t the stack be more realistically about 15 feet above the existing roof? Doing the math - an 8 foot crematory (estimate) plus 19.5 foot smoke stack, minus a 12 foot tall shed equals 15.5 feet. I know it doesn’t seem like much, but aesthetically when you live in the neighborhood, a 15 foot smokestack towering above a 12 foot shed is much different than a ‘small’ smokestack.
- **In Section 9.0 Environmental Initial Study Checklist Subsection I. Aesthetics** it also states “Tailing piles between the site and Folsom Boulevard prevent the site from being visible from that street.” Note: Attached are two photos showing that the shed (even without the smokestack) is visible from Folsom Blvd as well as Forrest St.
 - Was the installation of the smokestack taken into account when this statement was made?
- **In Section 9.0 Environmental Initial Study Checklist Subsection I. Aesthetics c)** concludes “Less Than Significant Impact”. I would argue that the view of a smokestack in a Historic cemetery, adjacent to the American River Bike Trail and a residential neighborhood is significant.
 - What criteria was used to determine the impact is “Less Than Significant”?
- **In Section 9.0 Environmental Initial Study Checklist Subsection III. Air Quality** there is so much information in this section, so my questions on this section are very general.
 - The initial report by HELIX Environmental Planning, Inc. notes the levels as “not significant”. It is my understanding that this applies to average healthy adults. Is that true?
 - If so, does the study have findings that report the effect on unborn children, developing children, the elderly and those with existing health conditions?
- **In Section 9.0 Environmental Initial Study Checklist Subsection XVII. Transportation** it states “As the crematorium would not be located in or near a funeral home and would be separate from any funeral services or public gatherings provided by the project applicant, access would only need to accommodate a small number of staff members with a business at the site.” While in the **Lakeside Memorial Lawn, Scope of work – Installing a Crematory – Point at Issue** it states “There are several large cultural communities residing and moving into Folsom. Regretfully, we do not have the ability nor the capability to serve the Sikh, Hindu, Buddhist or other cremation-based cultures as they require an on-site crematory so that they are able to exercise their funeral rights and customs. Currently there is no crematory in the city of Folsom so they must find the services outside the city.”

- Is the proposed crematorium going to be open the public so “the Sihk, Hindu, Buddhist or other cremation-based cultures as they require an on-site crematory so that they are able to exercise their funeral rights and customs”, or is it just open to a “small number of staff members”?
- If it is the former, will the Initial Study be updated to reflect that?

Thank you in advance for your time. If you have any questions please feel free to contact me at [REDACTED]

Kind regards,
-Joan Boyle

Dear Planning Manager Scott Johnson:

I am writing again today as a very concerned citizen and resident of Historic Folsom. The issue is the proposed crematorium at Lakeside Cemetery near the intersection of Folsom Boulevard and Forrest Street. Because the Commission represents all of the people of Historic Folsom, I urge you to deny the building of the proposed crematorium at this location.

My concerns include fire safety and air quality. The City of Folsom has signed agreements. Because the City needed a certain amount of Open Space, Lakeside Cemetery was zoned as **Open Space**. This seemed fitting in that the Cemetery adjoins an historic Chinese heritage cemetery, and the American River Bike Trail. Access to our adjacent Preserve residential community is limited, with one way in, and one way out. Fire engine access to the neighborhood can be difficult. It is fitting that the City of Folsom signed the document declaring our whole area as a **high-risk fire zone**.

Our neighborhood hosts a trailhead to the American River Bike Trail, and Lake Natoma. The recreational opportunities of both bring many people to our neighborhood. (And money to the local businesses.) Biking or hiking along the trail, one can see that the dead wood from the drought and heavy winds is everywhere. Some clearing has been done, but still much tinder remains. **I encourage you to come walk or bike this area.** Right now, we enjoy green grass. But from early spring through what we hope will be a rainy season, the grasses are extremely dry, tinder waiting to be ignited. Individually we pray that no one drops a match, or all of this area will be up in flames. It is common knowledge that we are in, and presumably will stay in a **major drought**. This **potential flammability** is a reality which intensifies each season.

Imagine the residents' concerns when we heard of the project which will put a blast furnace and two propane tanks above ground in the middle of all this! And with no additional water lines! The cemetery management seems to think this proposal is a done deal. No one plans for an **"accident"**

to happen, but we all know that accidents do happen, and then questions are asked, “**Who approved such a thing?!**” Should just one of these tanks ignite, the blast range is 1800 feet, and the resulting fires could wipe out most of Historic Folsom. Do you want the loss of life, in addition to property, both residential and commercial, attached to **your** approval of such a risky project?

Air quality is another concern. Last summer, we all suffered from forest fire smoke, (notably smoke trapped in our Preserve neighborhood) to the point that we were advised we should not leave our houses. Because of what smoke does to our lungs, and to our children’s health, we were hesitant to go shop or eat at, the multiple Folsom small businesses that depend on locals’ patronage to survive. This economic challenge for our merchants was in addition to Covid slowdowns and closures. Do we need to add to the economic issues by building a crematorium walking distance away? Smoke of human remains does escape a crematorium, and cremating obese human bodies emits a dark smoke that smells horribly. The wind will carry these fumes to all of Historic Folsom. Air quality affects both human and fiscal health of our Historic Folsom. Would **you** choose to eat outside at a restaurant on Sutter Street and breathe burning bodies, or drive minutes and eat at the Palladio?

An additional concern is that the cemetery management has expressed an entitled **attitude by starting construction before the approval has been issued.** Might that attitude extend to **safety issues?** Lakeside Cemetery originally projected an average of one cremation a day, **now doubled!** but what can stop the increase to **multiple cremations per day?** When asked about permits, the reply was “Oh, the city will take care of that.” Does Lakeside Cemetery speak for the Historic Folsom Commission? Does it speak for the City of Folsom? Do we need more air pollution in this area, let alone **escaping fumes of human remains? No, we do not.**

I do not oppose a crematorium, but it **must not be built** in this **Open Space and High-Risk Fire Zone.** It should be approved and built in an **industrial area** with adequate access to **water, fire prevention and containment.** Thank you for your time and your attention to this very important issue.

Sincerely,

Joy Hays

Commission and Council Members,

Folsom is a second home to me; I spend a lot of time there as I have many life-long friends, including my children's godparents, who live in the housing development next to Lakeside Cemetery. Some of the things I love most about Folsom are the trails along the river and quintessential Sutter Street. When visiting, we are almost always outside enjoying the fresh air, kind people and beautiful scenery that Folsom has to offer. During the pandemic we have celebrated numerous events outdoors including backyard birthday parties, playdates in the little park, baby showers, and family gatherings where we would take walks on the trails and to Sutter Street to pick up food. It is a unique city rich with history and charm, that would be greatly diminished by the establishment of a crematorium at the cemetery.

It would be devastating if this crematorium is put in. I can't imagine anyone would want to visit the resting place of their loved ones at the cemetery, while breathing in the smell of the crematorium. None of us would want to gather outside together or let our children play at the playground when it's a burn day. The people who walk and bike on the trails and eat at the restaurants on Sutter Street would disappear on these days as well. People will stop visiting Folsom.

Ask yourselves how would you feel if you or your loved ones lived or owned a business next to a crematorium? Our quality of life will have a significant negative impact if this crematorium is allowed to be built; families and businesses will suffer repercussions for years to come. Please keep letting us live life and enjoy the clean air in the neighborhood, on the trails, and when spending time on Sutter Street.

Thank you,

Katie Musfelt

July 20, 2021

NO.... to the Crematorium

My Name is Kim Higgins. I live directly across from the entrance of Lakeside Memorial Lawn. My backyard and kitchen window is in direct sight of the cemetery driveway. I believe, with a crematorium at Lakeview we will receive the most impact from the increased use of the facility.

Memorial Lawn has been a good neighbor. My husband and I enjoy the open space and the wildlife that frequents there. We respect it. The Preserves Neighborhood is very small, unique and quaint. We have a park for children and a beautiful lake with eagles and diverse wildlife, hiking and bike trails, and a short walk to downtown Historic Folsom. It's all a gem.

However, it is a busy place. Veterans Hall, Muir House, Chinese Cemetery, Access to Lake Natomas, our park and playground brings with it alot of traffic. Not to mention the endless UPS, Fedex, Amazon and delivery trucks to the Vets Hall. We have only one way in and out of this neighborhood.

My husband and I purchased our home three years ago. During those years we encouraged our adult children with their families to move into the Preserves Neighborhood. Our lives with our kids and grandkids is a dream come true. With the proposal of the Crematorium at the cemetery it has become a game changer to the quality of life we have become accustomed to. Members of my family suffer from severe asthma and allergies. I am very concerned for their well being.

I watched the Zoom meeting presented by HFRA on June 20. Igor Semenyuk and Peter Hartwick explained that we won't know when a cremation is taking

place. Mr. Semenyuk stated all we might see is an "initial puff of white smoke" and heat waves. Mr. Hartwick stated there won't be any smoke or smell. I am concerned that there is still going to be particulate matter in the air.

In the meeting Mr. Semenyuk guesstimated a possibility of 2 to 3 bodies a day. What would the number of cremations be in the future with our current population growth. More cremations, more service trucks, more emissions from more smoke stacks?

I realize Miller Funeral Home is a business. It makes good business sense to them to put a crematorium there. But a crematorium does not belong in a residential neighborhood. I am sure they can find a great location in a commercial-industrial area where they can operate day and night.

Should this crematorium get installed I will be looking at the American flag that flies in the cemetery to see which way the wind is blowing. This will dictate what type of day to expect. Will we be inside or outside? I suspect our quality of life will be diminished during operating hours because we will be trapped in our homes for health reasons.

I believe our property values will be affected by having a crematorium so close. According to an article from "Applied Economics Magazine" by Mark Agee, dated June 19, 2008, "Data Spans 27 months of house sales: 7 months before and 20 months after the startup of crematory operations. Results indicate that proximity, measured in terms of direction and distance from the crematory, imparts a statistically significant negative impact on average house sale prices - an increase of 0.3% to 3.6% of average sale price for every tenth mile increase up to a half mile in distance from the crematory."

California disclosure law requires us to disclose. Not many people desire to live near one. Do you?

We love our small unique neighborhood. The Preserves Neighborhood is where we are planning to spend the rest of our lives. All our family is here. Our quality of life will be affected if the crematorium goes forward. Honestly, would you want this in your backyard?

Thank You
Kim Higgins

To whom it concerns,

Folsom "Distinctive by Nature". While we move deeper into the twenty first century we have become more aware of the choices we must make to protect the future. Small choices might not make immediate impacts but we understand that the small choices we make today add up to the large impacts we seek.

I am writing regarding the proposed crematorium planned at lakeside memorial lawn cemetery. Many people will have written to you about the theoretical risk associated with the carcinogens living near one. While my concern is about protecting the future and we have a small chance to make a meaningful change today. At the same time eliminating all risk associated with a crematorium.

Reverend Desmond Tutu provided direction on this matter. Upon his recent death he chose to use aquamation to promote green burial. Reducing greenhouse gases by 90% associated with normal cremation. Some estimates state that each time aquamation is used it is the equivalent of taking a car off the road for 1000 miles in co2 creation. As cremation becomes closer to being the standard choice in California these numbers start to add up.

Some might be concerned about water use. Per one manufacture website each use requires about 100 gallons of water. We are in the process of adding 10,000 homes which per your own literature uses on average of 600gallons of water a day. So this extra amount used would be the equivalent of one home if used to full capacity.

I actually would prefer that the city of Folsom would choose to not allow any crematorium projects moving forward and encourage the use of this proven technology. In fact we already have an aquamation facility in Folsom. Sacramento Pet Aquamation is located on Bidwell provides this service for residents cherished pets.

Now is the time to make this choice. It is much harder to change directions on this path once you allow the crematorium to be put in operation. The decision to preferably not allow a crematorium in the city of Folsom and encourage the use of green burial technology is not something to make a decision on in two decades. It is today.

Thank you,
Kyal Von Gunten

August 4, 2021

TO: City Council Members
 Historic District Commission
 Planning Department - Scott Johnson

My name is Kyal VonGuten. I live next to Lakeside Memorial Lawn on [REDACTED] Fong St.

Lakeside Memorial Lawn proposed crematorium is 460 feet from the closest residence. The majority of the homes are on Young Wo Circle.

I have read the assessment report from Helix Environmental Planning, appendix "B" and I have anxiety about what will occur in my neighborhood.

In the "Air Quality and Greenhouse Gas Emissions Assessment", appendix "B" written by Helix Environmental Planning, page 5, under "**Sensitive Receptors**", they state the closest residences are 450 feet. They are correct, there are nine homes on Young Wo Circle that fall within the distance of 450 feet. From there it fans out to all of the Preserves Neighborhood.

"Sensitive Receptors" Corporate speak for people, people with homes, families and lives.

According to an article by Julliette O'keeffe, dated march 24, 2020, "Crematoria Emissions and Air Quality Impacts". page 4, item 3

What is standard practice for siting of crematorium in proximity to residential areas?

Table 1 identifies the many factors affecting emissions from crematoria. Ground level concentrations can also be affected by local prevailing wind direction and topography. In North America, there are no standard requirements for crematoria setback distances and no minimum separation distances are set at a federal level in either the US or Canada. Crematoria are regulated at the provincial/territorial level and regional or municipal authorities determine whether minimum setbacks are required based on relevant planning and environmental considerations.

The literature search for public agency resources and the grey literature identified many different practices, with some selected examples from around the world listed in Table 3.

Table 3. Selected example setback distances for crematoria from around the world

Country/Jurisdiction	Minimum distance
England and Wales (UK Cremation Act) ⁴⁶	200 yards (183 m) between a crematorium and any dwelling house and 50 yards from a public highway to protect residents from nuisance smoke and fumes and provide privacy to funeral proceedings
West Australia ⁴⁷	200-300 m between crematoria and sensitive land uses
South Australia and the Australian Capital Territory ^{48, 49}	150 m minimum separation distance
South Africa, Department of Health ⁵⁰	500 m from any habitable building

Back to the Helix Report. On page 2 of the document, under Air Quality, it explains the "Environmental Setting" of Folsom. This is important data.

AIR QUALITY ANALYSIS - Environmental Setting

The City of Folsom lies within the Sacramento Valley Air Basin (SVAB), near the southeastern edge. The SVAB consists of all or parts of eleven counties spanning from Solano and Sacramento counties to the south, and Shasta County to the north.

The Sacramento Metropolitan Air Quality Management District (SMAQMD) is responsible for implementing emissions standards and other requirements of federal and state laws for Sacramento County, including the project area. The climate of the SVAB is characterized by hot dry summers and mild rainy winters. During the year the temperature may range from 20 to 115 degrees Fahrenheit with summer highs usually in the 90s and winter lows occasionally below freezing. Average annual rainfall is about 20 inches with snowfall being very rare. The prevailing winds are moderate in strength and vary from moist breezes from the south to dry land flows from the north. The mountains surrounding the Sacramento Valley create a barrier to airflow, which can trap air pollutants in the valley when certain meteorological conditions are right and a temperature inversion (areas of warm air overlying areas of cooler air) exists.

Air stagnation in the autumn and early winter occurs when large high-pressure cells lie over the valley. The lack of surface wind during these periods and the reduced vertical flow caused by less surface heating reduces the influx of outside air and allows pollutants to become concentrated in the air. The surface concentrations of pollutants are highest when these conditions are combined with

increased levels of smoke or when temperature inversions trap cool air, fog and pollutants near the ground.

The ozone season (May through October) in the SVAB is characterized by stagnant morning air or light winds with the breeze arriving in the afternoon out of the southwest from the San Francisco Bay. Usually the evening breeze transports the airborne pollutants to the north out of the SVAB. During about half of the days from July to September, however, a phenomenon called the "Schultz Eddy" prevents this from occurring. Instead of allowing for the prevailing wind patterns to move north carrying the pollutants out of the valley, the Schultz Eddy causes the wind pattern and pollutants to circle back southward. This phenomenon's effect exacerbates the pollution levels in the area and increases the likelihood of violating the federal and state air quality standards (SMAQMD 2020a)

This data is important to note as pollutants, particulate matter, ozone and smoke would most likely lay within the neighborhood because of the elevation decrease to Lake Natomas.

Regulatory Setting - Criteria Pollutants

As permitted by the Clean Air Act, California has adopted the more stringent California ambient air quality standards (CAAQS) and expanded the number of regulated air constituents. **Ground-level ozone is not emitted directly into the environment but is generated from complex chemical and photochemical reactions between precursor pollutants, primarily reactive organic gases (ROGs; also known as volatile organic compounds [VOCs]), 1 and oxides of nitrogen (NOX). PM10 and PM2.5 are generated from a variety of sources, including road dust, diesel exhaust, fuel combustion, tire and brake wear, construction operations and windblown dust. In addition, PM10 and PM2.5 can also be formed through chemical and photochemical reactions of precursor pollutants in the atmosphere.**

The California Air Resources Board (CARB) is required to designate areas of the state as attainment, nonattainment, or unclassified for the ambient air quality standards. An "attainment" designation for an area signifies that pollutant concentrations do not violate the standard for that pollutant in that area.

A "nonattainment" designation indicates that a pollutant concentration violated the standard at least once.

This data is valuable because it is an evaluation of today, before the crematorium is operational. This ozone and particulate matter pollution most likely comes from the busy traffic on Folsom Blvd. With a crematorium initially proposing 2 bodies or 400lbs of matter a day, 100,000 lbs a year, one can only imagine the additional contaminants flowing into The Preserves Neighborhood. In my opinion, once established, Caring Service Group is only going to increase the number of cremations in the future.

Please consider the residents of the Preserves Neighborhood's quality of life. Thank you,

Kyal VonGunten

NOTICE OF PUBLIC HEARING AND NOTICE TO ADOPT A MITIGATED NEGATIVE CITY OF FOLSOM HISTORIC DISTRICT

DATE OF HEARING: February 16, 2022
TIME OF HEARING: 5:00 P.M.
PLACE OF HEARING: City Council Chambers, 50 Natoma Street, Folsom, CA

NOTICE IS HEREBY GIVEN THAT: A public hearing will be held before the Historic District Commission of the City of Folsom to consider the merits of the following:

PROJECT NAME Lakeside Memorial Lawn Crematorium
Property Owner/Applicant: Lakeside Memorial Lawn/Igor Semenyuk
Project Location/APN: 1201 Forrest Street / 070-0260-001-0000
Planning No.: PN-19-182
Staff Contact: Josh Kinkade, Associate Planner, 916-461-6200
jkinkade@folsom.ca.us
Entitlements: a. Conditional Use Permit

Project Description: The proposed project includes operation of a crematorium building, a 1,071-square foot metal shed located at 1201 Forrest Street, within the Lakeside Memorial Lawn cemetery. The site is zoned OS/P (Open Space/Public Primary Area) with a General Plan designation of OSC (Open Space and Conservation) and has a General Plan designation of Historic District. The Historic District Commission will take final action on this request unless the City Council.

cemetary. The site is zoned OPR (Open Space and Conservation) and has a General Plan designation of OSC (Open Space and Conservation) and has a General Plan designation of Historic District Commission will take final action on this request unless the the City Council.

Environmental Review: An Initial Study and Mitigated Negative Declaration accordance with the requirements of the California Environmental Quality Act review period begins January 7, 2022 and ends February 7, 2022. Copies of the Declaration are available for review at the City of Folsom Planning Department Folsom CA 95630, Monday through Friday from 8:30 a.m. to 1:00 p.m. The document is available for download from the City of Folsom website at <https://www.folsom.ca.us/government/development/planning-services/current-project-information>

All persons interested in these matters are invited to present and submit statements orally at a public hearing. The environmental documents are available for review at, and further information can be obtained from the Community Development Department, 50 Natoma Street, during regular business hours. The Community Development Department can be reached by phone at (916) 461-6202. A staff report will be available at City Hall or at www.folsom.ca.us on the Thursday preceding the Public Hearing.

Pursuant to all applicable laws and regulations, including without limitation, California Government Code Section 65009 and/or California Public Resources Code Section 21177, if you wish to challenge any decision (regarding planning, zoning and/or environmental decisions), you may be limited to the issues you or someone else raised at the public hearing(s) described in this notice/agenda, or any appeal must be delivered to the City at, or prior to, the public hearing. An appeal to the City Council from the Historic District Commission may be brought by any interested party within then (10) days of the

Subject: Re: PRA REQUEST City Eng. APPROVED RECORDS, Furnace necessity PN 19 182 crematory CUP NegDec Filed for "enactment"

Urgent PRA REQUEST January 7, 2022, for Folsom City Engineer Documentation, Permits, Sealed/Signed Reports, Building Permits, and all public records pertaining to three year old "application" for furnaces on OPEN SPACE Zone District surrounded by Public Open Space and s.f. homes.

To: Folsom City Engineer
Asst City Clerk Konopka

cc: interested parties OPEN SPACE Parcel protectors Adjacent to proposed 500 gallons LPG, on site with 3" water supply pipe.
 cc: silent city staff; council
 From: Laurette Laurent
 January 7, 2022

PRA REQUEST: Documents Requested: City Engineer Sealed/Signed Approved drawings for furnaces abutting federal forests/river, including Perjury Sworn Applicant Statement, City Engineer APPROVED Report of Findings of Necessity, Hardship, Unique 'circumstances', WATER SUPPLY lines, required for such furnaces 2,400 F, Fire Marshall portion of City Engineer's Report;
 All Building Permit applications [perjury sworn accurate & Complete] granted to this Parcel with Legal Address 2020 Mormon St. since 1858 Judah Map of Folsom Streets; All Memos, notes, minutes of meetings, and communications, between "Community Development director, Asso. Planner and others with City Engineer on this "Public Project" as advertised.
 Also requested are City Engineer and community development director/manager **Duties and Ordinances** establishing said CE and manager's duties.

As always, State Law allows ten days for production of these Ordinary Public Records for this "Public Project." Since this Public Project has been a Matter of Record since 2019, three whole years, surely all Required Public Records and City Engineer Approved Reports, with recommendations should be available January 18, 2022.

Second Request, Pursuant to Law Mailed Public Notices to Abutting Parcels are mandatory. Please supply Verified & CE Certified **Proof of said Mailings to all Public Agencies** and s.f. home residents abutting Parcel 070 0260 001 0000, which city identifies with False Address as being located with Ordinance-Created Lake Natoma Shores Planned Unit Development Subdivision.

Repeated, ignored Prior PRA Requests: not once in over ten years has Folsom City Engineer of Record produced even one single PRA RESPONSE for Public Projects -- which include his Seal & Signature proving he did his job of Certifying all Engineer Details of Folsom Public Projects such as this one -- which is the ultimate in License dereliction due to the obvious Hazards he is allowing, abetting, or silently watch being processed as he remains mute, inactive, etc., on his Public Project Duties.

Again, city staff have had three long years of prolonging this "application" and "approved" building Permits which are based upon Perjured information, so all Public Project PN 19 182 Records and Permits should be at-hand for immediate PRA RESPONSES.

CE Records and PROOF of Open Fire Department Access for all Federal Agencies Parcels surrounding this Public Project, and Historic Site under BLM protection, and State 13 acre parcel are requested.

Certification of Safety by City Engineer with respect to Blast Radius of 500 gallons of LPG highly flammable propane gas abutting federal & state Open Space lands & forests is

also part of this PRA Request for following reasons: danger of LPG and NO Water Lines at all and no Access roads for Water Trucks:

Propane Tank Explosion

Propane Tank Explosion

Propane Tank Explosion

FYI to City Engineer: all loose objects, metal, rocks, will become projectiles capable of flying further than 1,500 feet.

PRA Request for your APPROVAL of this LPG storage with your Certified Safety Analysis is REQUESTED as mandatory portion of Application. How could residents be paying a CE who ignores our very lives and sole Water Supply and Federal Assets?

Kindly Expedite this Portion of PRA Request with immediate PRA RESPONSE as it is your License Obligation.

PRA Request concern: since mayor also holds a state License for an Engineering Field long discontinued in this state, this ought to concern entire city council. How can residents fail to regard her inactions all three years as anything but Negligence or willful disregard of License Duties?

August 5, 2021

Re: CA State-owned Parcel: encroachment, dumping, unpermitted uses & grading, by Miller Lakeside Cemetery, dba Caring Service Group.

Mr. Dewey, It has been twelve days since my first attempts to contact you personally; ten days since this email cc'd to CA DGS Counsel. People have difficulty realizing the dis-organization of State Parks, but Lake Natoma Shores Subdivision neighbors do. We know the travesty of Folsom and CA SP ignoring impacts upon Federal land & waters of American River. CA SP is "Managing Partner" of USBR Reclamation, yet SP has done nothing to protect, manage, or provide Enforcement on the surrounding federal Parcels at American River/CA State Park Managing Partner.

For that reason, I am informing USBR Mid Pacific Director Conant and Folsom USBR Manager Drew Lessard CE as well. It is unacceptable that California State Parks is failing Managing Partners Duties, and ignoring Property-Ownership Protection of the Parcel which has been the dumping ground and part of the necessary land for movement/Access to construct more unpermitted, uninspected Structures on "Folsom Open Space & Open Space Conservation" Zone District. Because cemetery owners derive a huge tax benefit from this reporting by city of Folsom, this is copied to Sacramento County authorities and powers as well.

Clearly, my experiences prove California State Parks has major issues and hence it was moved to lesser status in CA Natural Resources Department. My complaints sent via Certified Mail have gained NO Direct Responses to me, whatsoever from either SP or Natural Resources. This is extremely important to me because some of them detailed Violations of Federal Laws, on Federal Property -- which is assigned via Managing Partner Agreement to California State Parks. Research Reports have been created, submitted, but California State Parks top, Sworn LEOs, Legal Counsel, and management have never once responded during the Period September 1, 2020, and today. People whom I've known for years, in CA SP Gold Fields District, have done absolutely nothing about addressing the shortcomings and failures. California State Parks and Natural Resources Department remain nonresponsive to the Peoples' Business.

Therefore, I am asking California Department of General Services to take some action to accomplish two outstanding Issues.

1. Please take actions to stop the mis-use, encroachment onto, dumping, storing of rusty cemetery junk on the Parcel in Question which has enabled a crematory process to exist and to proceed without Permits nor Inspections by city of Folsom.

2. Please ask DGS Legal Staff to fill the obvious void left by California State Parks.

Please refer SP "issues" directly to California Attorney General as there appears to be no hope SP will comply or remediate their failures with respect to obeying and enforcing Laws on Federal Land/Watershed Forest/American River.

Lake Natoma Shores Subdivision homes abut this State Parcel, as well as cemetery parcel zoned "Open Space Conservation". Folsom staff have had a crematory application in Community Development Department for approximately 18 months, without any Public Notice whatsoever. USBR Reclamation is an abutting landowner. Public **OPEN Space Zone surrounds about 80% of cemetery parcel**, and yet USBR, State of California, and Single Family home owners have NOT been mailed Notice of Proposed exceptions, change of land Uses, etc. In the **past**, when this crematory became an issue, ALL state, federal, county, and local neighbors were Notified by Mail. Sacramento County Medical Examiner excoriated owners for proposing not only a Hazardous Use, but desecrating Historic Features, abutting Chinese Cemetery which is a Registered National Historic Site, and failing to respect History and environment.

This time, construction has been on-going with mis-use of State Parcel in question enabling "access" for earth-moving machines. **Will State employees provide a Solution under the Laws?**

If we wait for State Park action, the entire federal land/water area, and our homes may vanish in wildfire from 2,200 F degree burner, with two huge liquid propane gas tanks, and on a 2 inch water-meter-constricted 3 inch diameter Water Service Pipe onto cemetery parcel.

Someone needs to stop Caring Service Group by stopping city of Folsom "quiet" enabling actions and city failure to enforce OPEN SPACE Conservation Zoning, and failure to enforce new stringent Historic Oak tree protection law. Whatever business proposals emerge, there is never a Folsom City Engineer signed & Sealed Report on laws of federal, State, County, and their own Municipal Code -- which prohibits all the 12 buildings on OSC Zone. Without a state licensed Civil Engineer participating, many laws are ignored. We pay licensed people, but they never produce Reports to protect residents, and Enforce Development, Land Use Laws.

Neighbors are justifiably very deeply concerned, as we know Folsom as a city is on the Federal WUI Register: Wildfire Urban Interface Registry.

Anyone wishing copy of links, Folsom WUI Plan, , please request them.
Managing Partner Agreement attached.

Re: Application for Illegal Zoning District Usages, illegal granting of Variance from HDC Commission with NO State Authority to grant such benefits, violation of CA Govt Code Title Zoning; violation of Folsom Zoning Code District restricting NO buildings on any "open space" category -- consistent with VIOLATED State Govt Code; Failure to abide by Sunshine Laws; Failure to conduct Full IS, EIR/EIS; failure to provide PROOF of Publications for all such steps; Failure to OBTAIN State Fire Marshal Approvals due to ABUTMENT to Federal Watershed and Federal Forests; Failure to Notify CA State Parks; Failure to Notify Sacramento County Assessor office of "Proposed changes" [likewise to Cemetery Commission]; Failure to provide NOTICE to an ABUTTING RESIDENT who filed Complaints about SECRECY in this Land Usage improper SECRET Process - by FAILING to NOTIFY ME -- despite my historic and RECENT objects & Comments with regard to this SECOND time around crematory Proposal -- and my WRITTEN NOTICE to Folsom City Clerk and Planning to be given ALL HDC & Plan Commission Notices. Other violations exist, but are previously filed and resulted in PENALTIES against Applicant.

----- Original Message -----

From: Josh Kinkade <jkinkade@folsom.ca.us>

Comment: THIS IS NOT Permit Modification: because there is NO MENTION of ORIGINAL Permit. There is NO EVIDENCE a VARIANCE is due to Miller nor Lakeside because there is NO PROOF of "EASEMENT", Nor abandonment of Figueroa St. in the Parcel boundary legal description

as of September 10, 2020, city clerk, city lawyer, HAVE FAILED TO PROVIDE a Prior legal documents Exist and were approved by city attorney Steve Rudolph. No one proved said cited documents were created, reviewed by Professional lawyer, engineer – FOR LEGALITY [such as unproved Easement Leland Miller granted to 1850s Chinese cemeteries.]
Existence of EASEMENT GRANTED by Miller, to Chinese

12 Cond. 12 "Any proposed construction of Lakeside masoleums would NOT OBSTRUCT HISTORICAL EASEMENT or ACCESS to Chinese Cemetery as was AGREED TO YEARS AGO by Leland Miller former owner of Lakeside Memorial Cemetery."

PC 91-042 Findings for 1991 Permit Modification

NOTE: NO TIME LIMIT on CUP, Variance or MODIFICATIONS – Rudolph WARNED them as city attorney to put a TIME LIMIT on CUP, and Mods.

APPROVAL OF NEG DEC; VARIANCE from 50' Setback
Planner Matt Franck

Miln Construction stated it would take 50 years to fill 2000 spaces in buildings of 12,682 sq ft.

NO MORE Discussion

Maxfield moved to approve

NEG DEC

APPROVE VARIANCE FROM 50 foot required Open Space Setback

APPROVE CLANEY USE PERMIT

with CONDITIONS:

APPROVE FINDINGS including **C. Is consistent with General Plan and Zoning CODE**

D. Not harm health. Masoleums are SIMILAR TO and COMPATIBLE ADJOINING USES.

E. Unique circumstances in this area – i.e. rock piles surrounding it everywhere. “size and shape of parcel make it difficult to build in the OPEN SPACE Area” **ISN’T THAT THE POINT????**

F. VARIANCE is ESSENTIAL to PROPERTY RIGHTS. Plus, an ALLEGED TRIANGULAR shape of “parcel” “BUILDABLE AREA would be limited by shape.” **BECAUSE they think Commercial buildings belong in OPEN SPACE/ Conservation Zone???**

G. Grant of Variance will NOT affect area Residents or workers and is “is of SIMILAR CHARACTER TO USES.”

CONDIITIONS

SECTION ONE enforced by Community Development Dept CDD
CDD will do GRADIN REPORT and ARCHAEOLOGICAL studies.

ESPECIALLY OFFENSIVE: CDD will Regulate and ensure “CHINESE COMMUNITY” & George Chan is NOT denied ACCESS to Chinese Cemeteries.

CDD will ensure Lighting, Landscaping and adherence to Fish & Game Regs.
CDD HAD NO ENGINEER.

PUBLIC WORKS ENFORCEMENT AREAS:

NO MENTION OF CITY ENGINEER, nor that “PW” lacked an Engineer in charge: Director then WAS JOE LUCHI, a typist. – Bob was sidelined.

CONDITION 8 “Improvements shall be installed to the satisfaction of public works dept. PW” Luchi was sidelined City Engineer's typist, really.

Condition 9“EROSION CONTROL..... shall be directed by PW Director – Luchi – what a laugh.

Cond. 10 Construction shall have 5 – NOT 50 Foot setback --“thereby

NOT CROSSING INTO Chinese cemetery ITSELF.

11 Proposed ROAD to Lakeside masoleums would BE NEAR TO ENTRANCE to Chinese cemetery thereby allowing ENTRANCE to Chinese cemetery GROUNDS>

12 Cond. 12 "Any proposed construction of Lakeside masoleums would NOT OBSTRUCT HISTORICAL EASEMENT or ACCESS to Chinese Cemetery as was AGREED TO YEARS AGO by Leland Miller former owner of Lakeside Memorial Cemetery."

June 15, 1995 TO: Planning Commission FROM: Loretta McMaster, Senior
planner suBJEcr: Lakeside cemetery conditionat Use permit status
Agenda Item No. 6 PC Mtg. 6-21-95 PC91-042
cemetery, National Reoister status

The Chung Wah cemetery has been approved by the California State

Historical Commission and is awaiting national action for listing. One of the major factors in a successful nomination is whether the site maintains the "sense of time and place." There is some concern that development of the Phase XI and XIII mausoleum buildings, and the equipment building, may cause this aspect to be destroyed. Conditions 4, 7, and 10 relate directly to this question. It will be difficult to design the structures and landscape the area to mask their existence completely, but careful choice of materials and design can minimize their noticeability.

Need to send to city engineer or whoever.....

Besides the items required by the conditions of approval, staff has identified the following actions which could reduce future conflicts: Archaeologist on-site when work is occurring. Recording of an access easement. A second survey of the boundary (or perhaps consultation between the recent surveyor and Mr. Chan regarding basis).

Removal of Phases XI and XIII, by Mr. Claney, from his plans. (He has indicated that it will be many years before they would be constructed.) Taking any of these actions would be a demonstration of good faith on the part of the Claney's and/or the Chan's.

Although the responsibility would lie primarily with the property owners, the City may be able to assist in some of these actions. The interested parties have been invited to be present at this meeting. Staff can also provide an update at the Planning Commission meeting of July sth if directed by the Planning Commission. PC91-042.62t PC Mts. 6-21-95 Page 2

Loretta McMasters

Agenda Item No. 6 PC Mtg. 6-21-95 PC91-042 June 15, 1995 TO: Planning Commission FROM: Loretta McMaster, Senior planner suBJEcr: Lakeside cemetery conditionat Use permit status BACKGROUND This report is presented to update the Commission on the status of the conditional use permit issued on October 2, 1991 for construction of mausoleums at the Lakeside Cemetery. A site plan, minutes and conditions of approval, and historical map are attached. Concerns regarding the project's effect on the National Register status of the adjacent Chung Wah cemetery were raised by June Chan at the May 17, 1995 Planning Commission meeting. As reported by Commissioner O'Brien at the Commission's June 7, 1995 meeting, a meeting of concerned citizens, Commissioner O'Brien and staff was held on June 2. Loren Claney of tf," Lakeside Cemetery did not attend the meeting, but staff subsequently met with

Mr. Claney at the site. Issues identified relate to grading, archaeological investigation, access, boundary location, and National Register status. The road and parking area have recently been constructed, according to approved improvement plans.

NOTE: All Claney references of Hardship claims, compliance etc. are spurious.

EVEN THEIR PARKING is on Public ROW MORMON St.

Lots of cheating occurs when a mayor has fired the City Engineer/Public Works Director Bob Blaser CE.

This proves the Federal owners and Sacramento County Assessor were never notified of all this COMMERCIAL Development and the State and federal Status protection of Chun Wah cemetery itself.

There's a major problem with this HDC thinking they have a legal force – and they don't even realize the Plan Commission made serious errors because the acting PW Director was Bob Blaser's typist Joe Luchi.

CEMETERY 7

Conditional Use Permit Modification

If the Commission feels that completion of a mausoleum is the appropriate use of this property, it would be appropriate to schedule a hearing to modify the conditional use permit to address the issues that have arisen. The applicant has requested a modification of the conditional use permit and has offered to re-design the project as necessary. Until so directed by the Commission, staff has not prepared a complete listing of additional conditions which might be adopted, but the following has been prepared to serve for preliminary consideration: No construction near Chung Wah boundary.

Application for Mormon Street abandonment, with recorded access easement to Chung Wah. Use of gray stone construction; additional screen planting, including oaks.

West-Yost review of surveys, at applicants cost but contracted with City. Fence boundaries.

Additional drainage and erosion control.

DOCUMENT 11 PC Minutes December 1995

Very LENGTHY many pages, finally

Vice-Chairman Maxfield Moved To coNTTINUE THE rrEM To JANUARv 3 BUT LtMtlNG tr ro oNly CONSIDERING ALTERNATIVE 2 AND THE CHANGED CONDITIONS AFTER STAFF HAS HAD TIME TO LOOK THEM OVER THAT WERE SUBMITTED BY MR. PHILLIPS TONIGHT. HE ADDED THAT HE'D LIKE TO HAVE THE ITEM HEARD AFTER 9:00PM BECAUSE HE WOULDN'T BE ABLE TO ATTEND UNTIL THAT TIME. COMMISSIONER MESSNER SECONDED THE MOTION Commissioner O'Brien preferred to have the absent Commissioners present before any motion is made and would prefer having it continued. Steve Rudolph suggested that if the first goal is to resolve the issue regarding revocation, that before continuing, the first motion should be to move that there are no grounds for revocation as the Commission desires. Vice-Chairman Maxfield withdrew his motion. The second agreed. VICE-CHAIRMAN MAXFIELD MOVED THE PLANNING COMMISSION HAD THE HEARING FOR A REVOCATION OF A PERMIT AND THEY FOUND NO GROUNDS FOR REVOCATION OF A PERMIT, UNLESS SOMETHING ELSE HAPPENS AND THE ISSUE IS RAISED AGAIN. COMMISSIONER MILLER SECONDED THE MOTION AND THE MOTION CARRIED WITH THE FOLLOWING VOTE AYES: COMMISSIONERS HOWELL, MESSNER, MILLER, MAXFIELD NOES: COMMISSIONER O'BRIEN ABSTAIN: NONE ABSENT: CHAIRMAN LEHMAN, COMMISSIONER DREW MOTION THAT THE PLANNING COMMISSION FOUND NO GROUNDS FOR A REVOCATION OF THE PERMIT CARRTED 4-1-2. Commissioner O'Brien stated her opposition was because the other two members of the Planning Commission were not present. Steve Rudolph stated it appears the Commission is interested in modifying the conditions

which exist on the permit and recommended the next motion be that the Commission has found there are grounds to warrant the modification of the existing use permit. PC Mtg. 12-6-95 Page 10

COMMISSIONER MILLER MOVED THAT THE PLANNING COMMISSION HAS FOUND THERE ARE GROUNDS TO WARRANT THE MODIFICATION OF THE EXISTING USE PERMIT. VICE-CHAIRMAN MAXFIELD SECONDED THE MOTION AND THE MOTION CARRIED WITH THE FOLLOWING VOTE: AYES: NOES: ABSTAIN ABSENT: COMMISSIONERS HOWELL, O'BRIEN, MESSNER, MAXFIELD, MILLER NONE NONE CHAIRMAN LEHMAN, COMMISSIONER DREW MOTION CARRIED: 5-0-2 VICE-CHAIRMAN MAXFIELD MOVED TO CONTINUE TO THE JANUARY 3, 1996 MEETING FOR THE PREPARATION OF REVISED CONDITIONS. COMMISSIONER MESSNER SECONDED THE MOTION Commissioner Howell Alternative No. 2 only. questioned whether the motion was restricting the discussion to Vice-Chairman Maxfield stated it was Commissioner Howell stated she would prefer to leave it only to removal of the revocation issue. Vice-Chairman Maxfield felt he'd prefer to have a staff report without alternatives. Commissioner Miller stated he agreed with Vice-Chairman Maxfield that it's been fine-tuned enough between them with one set of conditions and if a concern is raised with something specific, the Planning Commission can adjust it in January. VICE-CHAIRMAN MAXFIELD MOVED TO CONTINUE TO JANUARY 3 AND ALTERNATIVE 2 WITH CONDITIONS SUBMITTED BY MR. PHILLIPS WITH STAFF FINE-TUNING THE CONDITIONS AND GIVE A REPORT BACK TOT HE COMMISSION AND TO HAVE THE PROPONENT AND OPPONENTS TIME TO LOOK AT THE CONDITIONS WITH TIME TO COMMENT ON THEM. Steve Rudolph stated the public hearing is closed but nothing is preventing the Commission from reopening the public hearing at the next meeting. The Commission doesn't have a legal obligation to open the public hearing if that was their desire. COMMISSIONER MESSNER SECONDED THE MOTION AGAIN Commissioner Howell stated her concerns for limiting the motion to Alternative 2 only. In the summary of the staff report, the wording states build out of the existing planned facilities in Alternative 1 and Alternative 2 has, what she considers to be, some unusual language referring PC Mtg. 12-6-95 Page I I to "an environmentally sensitive area". She feels Alterative 1 and 2 can overlay dramatically depending upon the definition of that environmentally sensitive area which she understands both the existing conditions and the new conditions received by Mr. Phillips is going to provide definition of exactly where that environmentally sensitive area is. She didn't feel the motion should be limited to one of the two alternatives just because of the environmentally sensitive issue. She stated she'd like to eliminate the revocation and allow both Alternative 1 and 2 to exist because Alternative 1 talks about going with what's been planned already and Alternative 2 refers to complete build out of the site with the exception of the environmentally sensitive area. Until that area is defined, ome can't say that everything can be done because you don't know whether all the property can be built on yet. VICE-CHAIRMAN MAXFIELD AMENDED HIS MOTION TO INCLUDE STAFF TO LOOK INTO THE ISSUE RAISED BY COMMISSIONER HOWELL ON THE ENVIRONMENTALLY SENSITIVE AND ARCHAEOLOGICALLY SENSITIVE AREAS AND DEFINITIONS AND FACTOR THOSE IN. COMMISSIONER MESSNER AGREED WITH THE AMENDMENT Commissioner O'Brien felt the motion was too vague. VICE-CHAIRMAN MAXFIELD CLARIFIED HIS MOTION TO READ AS FOLLOWS:

MOVE TO CONTINUE LAKESIDE MAUSOLEUM AMENDMENT OR REVOCATION OF CONDITIONAL USE PERMIT TO JANUARY 3, 1996 AND THE MATTER TO BE CONSIDERED BE ALTERNATIVE 2 AND IT'S CONDITIONS RECEIVED BY MR. PHILLIPS THIS EVENING AND STAFF FACTOR IN THE ISSUE RAISED REGARDING THE ENVIRONMENTALLY AND ARCHAEOLOGICALLY SENSITIVE AREAS AND THEIR DEFINITIONS AND FACTOR THOSE IN AND ADD CONDITIONS AS REOUED TO MAKE SURE THOSE ISSUES ARE COVERED. COMMISSIONER MESSNER SECONDED THE MOTION AND THE MOTION CARRIED WITH THE FOLLOWING VOTE AYES: NOES:

ABSTAIN ABSENT: COMMISSIONERS HOWELL, MILLER, MESSNER, MAXFIELD
COMMISSIONER O'BRIEN NONE CHAIRMAN LEHMAN, COMMISSIONER DREW

DOCUMENT 12

 December 18, 2020

Re: below circulated Public Record, filed with Sacramento County Cemetery Commission December 17, 2020.
 Application for Illegal Zoning District Usages, illegal granting of Variance from HDC Commission with NO State Authority to grant such benefits, violation of CA Govt Code Title Zoning;
 violation of Folsom Zoning Code District restricting NO buildings on any "open space" category -- consistent with VIOLATED State Govt Code;
 Failure to abide by Sunshine Laws; Failure to conduct Full IS, EIR/EIS;
 failure to provide PROOF of Publications for all such steps;
 Failure to OBTAIN Fire Marshal Approvals due to ABUTMENT to Federal Watershed and Federal Forests;
 Failure to Notify CA State Parks;
 Failure to Notify Sacramento County Assessor office of "Proposed changes" [likewise to Cemetery Commission on prior 2020 application];
 Failure to provide NOTICE to an ABUTTING RESIDENT who filed Complaints
 SECRECY in this Land Usage improper SECRET Process - by FAILING to NOTIFY ME -- despite my historic and RECENT objects & Comments with regard to this SECOND time around crematory Proposal -- and my WRITTEN NOTICE to Folsom City Clerk and Planning to be given ALL HDC & Plan Commission Notices.
 Other violations exist, but are previously filed and resulted in Penalties.

Thank you to Folsom city officials and Staff [Including "city top officials" and "city engineers" with Licenses] for proving beyond a shadow of a doubt I -- AN ABUTTING Parcel Owner to 070 0260 001 -- WAS NOT given Notice of Proposed Applications and EXISTING DISCUSSIONS of this outrageous set of Violations.

State laws are extremely explicit with respect to Permissible lower agency Zoning Code and Land Usage Laws applications, TRANSPARENCY, and Process. My Complaints were already filed. My Request for NOTIFICATIONS of all Public Processes regarding Zoning Law were ignored. What is shown below is a PUBLIC RECORD sent to Sacramento County Cemetery Commission BUT NOT to over 36 ABUTTING OWNERS, including TWO Federal Govt AGENCIES with jurisdiction.

Former City Attorney Steve Rudolph advised the Plan Commission to issue a STOP WORK ORDER for All construction of buildings on this cemetery. He further recommended POSTPONEMENT of Plan Commission vote of approval because

1. George Chan had NO opportunity to engage Counsel,
2. Private titled-parcels within the existing cemetery belonged according to Sacramento County Records, to Private persons or entities who were NAMED by County and Steve Rudolph. His legal advice was ignored. Plan Commissioners who changed to approval instead of Opposition ended up on City Council and in one other appointed position.
3. George Chan was RESTRICTED to access the Chun Wah cemetery by FOOT, and only ONE person could enter this large cemetery served at the end of Mormon Street.

All named licensed City Engineers were clearly PUT ON NOTICE yesterday, and yet DID NOTHING. Ditto the City Manager and City Lawyer whom I addressed repeatedly to DO THEIR JOBS.

If Folsom intends to CONTINUE SECRET operations with respect to all State Enabling Legislation, our Constitutional Rights and Sunshine law respect, please continue in this path and expect the consequences of all these extremely VALUABLE "gifts" to private parties. South of Hwy 50 is the same identical type of operation.

I have given and conveyed written Notice to all top staff and licensed engineers. NOT ONE of them has RESPONDED to Formal Complaints. Is this SECRECY or scores and scores of instances and formal complaints IGNORED -- even when complaints CITE the exact LAWS Violated? Mens Rea or negligence since a sitting mayor fired the final independent City Engineer and put Folsom City Charter "ONLINE ONLY", then ERASED City Engineer & CE DUTIES? Folsom FMC Chapter 17 went online with the TOTAL OMISSION of the "cemetery" Zone designation. "Crematorium" was not an allowed use in city historically. FMC 17.52 is an OVERLAY District and HDC does NOT have LEGAL Right to grant any Land Usage Exceptions/Entitlements.

This was submitted in writing to top officials 2020 in formal Complaint Notices.

603 Sutter Street is identical set of SECRECY & Violations.

Why was this submitted to PGE, BUT NOT to Sacramento County Authorities with Oversight & Jurisdiction?

Please, I ask each Licensed Engineer, do you obey the Dictates of your Law Enforcing License -- with respect to Land usage, Subdivisions, Public Infrastructure, and all State Mandated Government Codes?

Please decide whether you wish to continue in this Folsom secrecy. This week alone I asked Mark Rackovan Sr. Eng. Traffic Eng. why he refused to Enforce the November 2020 new law regarding "encroachment on city property". ALL encroachments are defined in FMC, and yet NOTHING WAS DONE to clear a dangerous Substandard Folsom Right of Way of multiples violations. New Encroachment law requires a Permit and CONTRACT to be executed.

Please also BE AWARE, if you claim this is NOT YET in the Public Domain, My/Our Constitutional Rights have been VIOLATED in all PRIOR Lakeside Cemetery gifts from Folsom. No PROOF of Publication was provided for prior instances. No formal Letters were sent to Three Federal Agencies abutting, nor to SP Managing Partner to USBR, nor to 36 ABUTTING Single Family homeowners.

When Claney clan last sought a crematory, our Subdivision brought forth testimony from a Medical expert about the Sites acceptable for a crematory. As usual, abutting parcel owners only learned of crematorium Proposal/Application via Newspaper reporters coverage. Ex post facto, according to Law.

Final Question: this time in 2020, did you ever intend even one licensed city engineer would make an Approval and Plan with his License & seal/signature? Don't you feel Elected Officials should NOT be party to Folsom employees clear, repeated wrongdoing? Don't you feel "at risk" and responsible under your BPLSG Required Duties?

No, MORE/Comment:

Legally this Parcel is on MORMON ST. since the 1850 Theodore Judah Map creating Folsom Street Map. Calling it Forrest causes visitors to jam the Eighteen foot wide Substandard "street" which is DANGEROUS and improper because LNS Subdivision was created and Enacted VIA an Ordinance which DID NOT INCLUDE any Commercial Usages, NOR parking for same.

Applicant for a special **use permit** does not have to show hardship. Instead, the focus is on simply showing that the proposed **use** meets the conditions already contained in the ordinance, whereas a **variance is, in essence, permission to "break the law."** Mar 22, 2013
Case Law citation/ Advisory overlay "committee" cannot grant it under California enabling law.

Note to Sacramento County authorities:

PLEASE ensure ABUTTING PARCELS are notified PRIOR to secret planning & discussions of putting a FURNACE into a rickety shed abutting Federal Forest & watershed & waters of American River. USBR and Managing Partner CA SP and Bureau of Land Management are the major landowners/protectors here.

Cremation of a dead body is carried out at a temperature ranging between **1400 to 1800 degrees Fahrenheit.**

Let's show them some respect for Law, Health & Safety, and Common Sense. That old shed abuts Federal Forest which is suffering during drought. Its "emanations" contain MERCURY, and other toxics.

According to Federal Government Biological Research, there are Known Contaminants associated with burning bodies. Of course Folsom never involves Licensed Engineers; anything for a buck is OK in this place.

Lydia,

Folsom always had appointed citizens equipped with their own email address.

Mr. Duewel is lawyer who asked city staff [non-licensed people] for an opinion about a matter of Law. Mr. Duewel stated he wanted to know more about my Objection letter citations. In response, junior planner stated Opinions about Matters of Land Use Law. Planner erred. I did not.

Please forward this to Kevin Duewel.

If City Attorney has any problems with an appointed person being in touch PRIOR to a decision on Exceptions to Land Use Process Law, he needs to review his License Obligations.

If our elected Council members directed city staff to remove the committee members' emails at @folsom.ca.us, **this** is a prime example of why they should NOT have limited correspondence between city Appointees and city residents during a shutdown for pandemic. One year later Mr. Duewel's request for explanations of my points of law, came to light in the on-going battle to keep us safe from fire.

We in LNS are dealing with the Third Application for crematory abutting OUR Parcels, and federal Watershed Forest. There are significant violations involved, including actions covered by California Penal Code.

This needs to stop.

Thanks in advance, Laurie

sziv{ lmgli\$w\$wli\$lew\$yxlsvm}z

All these years City Attorney has failed to inform "HD" group they do NOT have legal authority to grant Variances, Conditional Use Permits, DE FACTO REZONING, or any "exceptions to Zone District laws, Standards, or Duties of City Engineer to seal/sign and certify all actions are correct under state laws..... and upon certification also by a licensed lawyer.

I know city elected officials have difficulty believing city hall people are perfectly correct and able to administer Legal Process Laws, but this crematory nonsense -- for the 3 time -- is an outrage.

Residents of Lake Natoma Shores have to look at that ugly new shed every single day, yet young staffer proceeded as if we don't even exist. What do you want to bet the tall height which "cools" the building" will become another, larger bunch of furnaces for human bodies?

Over-Extending the Legal Authority of an "overlay" group, even a lawyer voted to approval extension of Land Use Exceptions which they NEVER EVEN VERIFIED.

City Attorney Steve Rudolph told the Plan Commission back in 1992 cemetery hearings on these outrageous exceptions that he advised against. He recommended a STOP WORK ORDER, and our future council members, ignored his Work Product Advice to them. Steve Rudolph sat and gave legal Opinions at all City Council and Plan Commission meetings. That was not popular with mayor.

In fact, those on Plan Commission who switched their opposition to approval, and voted, before Mr. Chan had opportunity to engage Counsel, voted to restrict Mr. Chan's access to a National Historic Site to "one person, on foot only." It is so "Folsom."

Question: webcast: someone asked "Mrs. Rodriguez" if she had any questions. Was this our current councilperson?

My favorite crematory protests say "don't let the dead kill the living." "Like the smoke, more is coming, with Mercury in it." Children in LNS have black balloons out front.

Did you all know cemetery only got water line of mere 3" diameter with 2" limiter, because we in LNS paid for water lines? Cemetery has NO hydrants, and won't pay to extend 4000 PSI pipes which fire fighters must have.

Did you know crematory will go into the 1930's metal shed, and that's why a huge 18 foot tall new shed was built. They don't need more maintenance equipment: they butchered more than 7 trees, including the living protected Historic Oaks. They cut "grass" cutting down last winter -- less to save money paid for water through that tiny connection we enabled. They committed criminal acts which still have not been cited [to our knowledge].

Sorry, I just cannot understand how it "slipped the minds" of our city attorney and city engineer to do their advisory jobs, to supply signed opinions of legal compliance.

Mr. Duewel wanted to KNOW, prior to voting. Then he said "but it's only a design review". But that is not what it was. It included an illegal Variance or Condition Use Permit, or "grandfathering in" an old public cemetery -- according to webcast. He actually believed that junior staffer saying that "yes" it's all grandfathered in.

Poor Oak Chan, he's probably suffering in his unreachable Grave with large monument - --- back there in the inaccessible National Historic Site. Why did planner fail to ask a Licensed city professional to review his Recommendation?

Why were the Minutes approved by a person who was not even present to know there were questions?

"HD" is NO zone; their powers are not those of 'commission'. It's a pathetic violation of higher Authorities in Law, and people believe what they are told at cityhall [apparently.]

Re: Telegraph published article VS Reality of city staff

<https://goldcountrymedia.com/news/202040/proposed-folsom-crematory-opposition-continues-to-heat-up/>

Furnace Application is the third in few years. **NOT ONCE** were Abutting forest/river protection US Agencies given Notice, according to city records/minutes.

This application was filed over ONE YEAR ago, and yet Sacramento County Recorder was Never Notified of Project in Public Domain. In fact city reports this parcel 070 0260 001 as "Open Space/OS Conservation Zone District." Tax bill 10/2020 was REDUCED by \$1.2 Million, to help "open space".

New co-owners Caring Service Group, has no city Business License. They filed all their Building Permits using FALSE ADDRESSes, and in some cases, a totally non-existent Parcel Number. The Zone District is clearly parcel is NOT OPEN SPACE Conservation - which means ZERO BUILDINGS. They built and plan more huge Commercial buildings on Parcel, a FURNACE, and huge LPG Gas Tanks.

Clearly Applicants are not concerned with "legal niceties." Since city made residents pay for a "study" which recommended "Approval" of this Zone District Exception", it is clear the city is at the foundation of this chicanery.

LNS Residents were charged with Code Violations for lawful protest and WARNING Signs. Cemetery got away, forever, with NO Posting of Application for Exception for body burning 2,400 F furnace adjacent to Federal Forest, river, homes.

[Proposed Folsom crematory opposition continues to heat up](#)

Proposed Folsom crematory opposition continues to heat up

As residents eagerly wait for a meeting date to be announced, the opposition against the proposal for a new Fols...

"Folsom city staff originally anticipated a September hearing on the matter, but Planning Commission and Historical Commission hearings were then canceled for September.

"We had initially targeted a Sept. 15 date, but it was never officially scheduled for that date," said **Folsom planner Josh Kincade**. "We don't currently have a meeting date set but there will be a notice (in local newspapers) 20 days prior to the hearing and the notice will be physically sent to property owners within 300 feet of the project site at the same time."

<https://www.youtube.com/watch?v=Lr15rPHEmeQ>

"heating up is right" fire & debris would spread for miles.

Folsom does NOT publish "city planner JOB description".

Only "Park planner" is available now. It is LESS demanding than city planner, and pays less, but here it is.

Salary 2018 \$58,353.84 - \$89,071.08 Annually

THE POINT IS: that is BIG BUCKS for persons who might not even KNOW basic Public Notice laws, and comprehend their **Obligations** which come with that kind of money.

Comm Dev director makes \$15,388 per Month salary, or about **\$190,000 a year in salary**. That is a lot of money PLUS huge benefits. And we don't even get PROPER, Legally-mandated Posted Notices and USPS Mail Notices. We get citations.

As a Federal Tax Payer, I firmly believe our USBR, DOI, and BLM federal employees DESERVE a NOTICE of a body-burning FURNACE be delivered to their Offices via Certified Mail.

Folsom acts like an insulated power-structure with very little respect for Laws, Rights, and Protection of Water Supply and our Environment.

Folsom staff have OK'd the 'study' for Approval. No Fire Dept objections were in that study. No ONE cited Zoning Code, Fire Code, Street ACCESS Code, etc. Development staff give an impression to us, that they think our Fire and Police people are as disposable as those bodies who represent Revenue from OPEN SPACE Zone.

You get the message? This is a highly paid group who have incentives to deliver the "Folsom Version" of laws.

Residents? We get the "wrong end of the match-book."

If you knew the Extent of the Expertise behind LNS Objections, you might be ashamed of yourselves. But, at those reimbursement rates and rewards, guess it is unlikely.

LNS residents exist between the unbelievably dry Federal Forest & Watershed of American River, and the incredibly DANGEROUS gas tanks and furnace on Parcel Zoned OPEN SPACE/OS Conservation. If even one of those huge LPG tanks explodes, Folsom Blvd., Light rail, and lots of drivers and businesses in old sutter, will all take the "hit" with us. VIEW VIDEO!

Folsom, It this hell, or what?

Below is only city Job Description online, for a "planner".

EXAMPLES OF ESSENTIAL DUTIES:

NOTE: The following are the duties performed by employees in this classification. However, employees may perform other related duties at an equivalent level. An individual in the classification does not necessarily perform all the

- Prepare preliminary construction drawings, specifications, and cost estimates for landscape architectural projects and bid documents including the grading, drainage, paving, irrigation, plant materials, and play equipment.
- Participate in site analyses, master planning, designing, cost estimating, and reviewing landscape architectural plans and drawings for accuracy and conformance with design and check calculations used in designs and estimates.
- Review, check, and make necessary corrections to landscape architectural site plan drawings, designs, and estimates as prepared by consultants to ensure conformance to original design.
- Inspect park, recreational, and trail site projects during construction to ensure construction is performed according to plans and specifications.
- Interpret city standards and specifications regarding trail construction.
- Prepare a variety of charts, graphs, maps, plans, and other illustrative presentations to the Parks and Recreation Commission and the Finance Commission, reports, and studies.
- Monitor and approve project expenditures and maintain project accounts.
- Analyze proposed projects for conformance with adopted city landscape architectural standards.
- Meet and confer with developers, contractors, and engineers.
- Prepare grant applications and necessary graphics for a variety of projects.
- Compile a variety of information and data for staff reports and studies.
- Perform related duties as assigned.

Dear Mr. Kinkaid:

I understand the owner of the Lakeside Memorial Lawn cemetery located at the entrance of "The Preserve" neighborhood off Folsom Boulevard is planning to put a crematorium in his facility. He states his plans are to run his crematorium Monday through Friday each week, estimating the cremation of three bodies per day. This will require the use of two-250-pound propane tanks. He assures his process is safe and compliant with fire and environmental safety standards.

While this may be true, accidents can and do happen. From 2012 until May 2021, there have been some seventeen (17) crematory accidental fires in this country, that I am aware of. The most recent took place on 05-11-2021 in Corona, California. The actual cause of this fire was not made clear. The one before that was in May 2018, in San Diego County. Firefighters were able to put out the fire, but the fire spoke's person confirmed the continued presence of "sand clouds of human remains in the sky". This is what nearby residents were breathing in.

There were several others before these I could detail, but in the interest of space, will refrain.

Especially in this time of climate change and easily ignited fires, a crematorium in a residential neighborhood, in the middle of a small city, *is an unnecessary public safety risk*. As it is, our landscape is so dry that we must be vigilant throughout the summer months to prevent fires.

Should a fire break out in this prospective crematorium, the people in this entire neighborhood would be at risk. There is only one exit, exactly where this cemetery is located. Residents could be trapped.

I have additional concern about air quality. The Amigone Cemetery cremation center in upstate New York was shut down in 2010 by the State's Department of Environmental Conservation because of "heavy black smoke spewing from the crematorium". Equipment repairs were made, and the crematorium was re-opened in 2019. Even still, nearby residents continued to experience distinctive odors and dust particles on windowsills, they said were "human remains". This has been disturbing enough that these residents report reluctance still to leave their windows open or spend time outside.

We ask you to please not permit this crematory project of the Lakeside Cemetery to occur. It simply is NOT SAFE in this location that is near people and their homes that have only one exit, near the fire source itself.

Sincerely,

Marie Rice

Dear Historic District Commissioners, City Manager, and City Planners,

Thank you for the time and attention you are dedicating to the voters' serious concerns about the proposed Miller's Funeral Home crematorium at Lakeside Memorial Cemetery. I am writing to you as a permanent resident of Forrest Street, living directly across from the Cemetery. I am greatly worried about the impact of your decisions to come on my family, one year old daughter, and high-risk neighbors. I have reviewed Lakeside's project proposal and Environmental Impact Report conducted by Helix Enterprises and sought professional environmental science and medical consultation to inform my position on this matter. The concerns I am requesting inform your decision to vote "NO" include:

1. **Nonconforming use** of commercial, industrial incinerator in open space and in contradiction to the City's master plan;
2. **Inequitable consideration** of crematorium proposal in the Historic District when other open space in Folsom is not being considered for approval driven by profit motives;
3. **Proximity** of the proposed crematorium next to residential zone to several historic sites in the Historic District, with potential to negatively impact cultural practices and significance;
4. **Negative impact the proposed crematorium has already had on home values** in the historic district, with several realtors/brokers documenting decrease in buyers and offers due to proposal;
5. **Assumption that there is a safe level toxicity exposure** to developing children, pregnant women, elderly, medically vulnerable, and veterans in the immediate surrounding area of the Cemetery from vaporized toxins;
6. **The absence of historical relevance**—if external French doors are not permitted in the Historic District because they would not be found in the early 1900's, how can a commercial, industrial incinerator be acceptable?
7. **Impact of immeasurable sight, smell and ingestion of particulate matter** on use of trail, river, Historic District, and Sutter Street;
8. **Use and appearance** of shed for crematorium that is permitted for commercial storage only;
9. Increase to existing **extreme fire risk with one evacuation route for residents**;
10. **No emergency services plan or allocation of resources** to support potential increase in demand for fire and police as required by CEQA guidelines;
11. **Insufficient fencing and security** on site as required by CEQA guidelines;
12. **False identification** of proposed location as not next to State land or increased fire risk in Initial Study and **absence of additional design measures** to create defensible space as required by CEQA guidelines.
13. **Stark differences** between crematorium application to City in 2020 and the work that Miller's Funeral Home has done at Lakeside Memorial Cemetery without approval;
14. Presence of **permanent, industrial pollutant** in Historic District;
15. **Absence of ongoing monitoring** of air quality testing of particulate matter, employee safety, and testing by air quality chemist, pediatric toxicologist, and geriatric toxicologist;

DR. MARIKO MCGARRY

1204 Forrest Street, Folsom, CA 95630 ♦ 530-545-9055 ♦ mariko.mcgarry@gmail.com

16. **No monitoring of mercury** which is odorless and colorless--yet poses biggest risk to children and unborn babies who can experience disorders such as autism, Asperger's, developmental delays and other neurological issues.
17. **Significant delays by the City** in publishing application, conditional use permit, and reports to the public;

The Initial Study/Mitigated Negative Declaration conducted by the City of Folsom Community Development Department and Helix Environmental Planning related for January 2020, identifies the "Maximum exposed individual resident," in the photo above. That purple dot sits directly on our **one-year old's bedroom window**. I am hard pressed to find an elected official in this City who has attested to being comfortable with even the smallest risk posed to their children. I am even harder pressed to find an elected official who has attested to the belief that this proposal would be accepted in any *other* residential or open space zone in Folsom. From an equity perspective, the voters and children of Empire Ranch would never have to self-organize, self-fund, and self-advocate as the voters and children of the Historic District have been forced to do for the last two years.

The Historic District and the City of Folsom either believes and will testify to their commitment to maintain community open space resources for the purposes ranging from conservation, to preserving community land use options, or it is time to change the definition of open space zones and the public marketing of the City.

As a Historic District Resident, voter, professional, and parent, I cannot express the need to vote "No" on the Lakeside Memorial Lawn Crematorium enough. *Protect history. Protect the City's legacy. Protect our children.*

Sincerely,

Mariko McGarry, Ph.D.

City of Folsom Historic District Commission

RE: Opposition to the proposed Folsom Lakeside Crematorium Project

Dear Commissioners,

I am writing this letter to voice my concerns regarding the proposal to build a crematorium right behind my house. This is the second letter that I have sent regarding my opposition to the crematorium. My concerns include negative impacts on my health and the health of the community, enjoyment of my property, the likely devaluation of the value of my property and degradation of our natural environment.

I have read the letter from Igor Semenyuk titled "Scope of Work- Installing a Crematory" and take issue with many of it. First and foremost, the crematory is not "removed from any residences and Parks", my home is literally feet from the proposed crematory site and the property borders State Park land with historical and major natural resources and wildlife, including endangered Bald Eagles. In his "Cremation Process" section he states "there is no smoke or residue that leaves the chamber" This is a completely false statement contradicted by the study he paid for and was completed by Helix Environmental Planning. There will be toxic emissions, particulates and a significant amount of CO2 released into the environment from the cremation process.

I am a retired Oncology/Hematology RN and Hospice RN, so I have cared for patients prior to and during the death process. There are multiple medical implants, catheters, joint replacements and dental work that when cremated and release toxic substances. Not to mention the toxic pharmaceuticals (chemotherapy, radioactive pellets and drugs) that remain in human tissue and are vaporized during the cremation process. I have read the Assessment completed by Helix Environmental Planning and am concerned that the above referenced toxic substances were lumped in Reactive Organic Compounds (ROC) or (PM) without stating how dangerous these emissions can be. The Report on the Air Quality and Greenhouse Gas impacts of the Crematorium and the Health Risk Assessment does not address our concerns about Public Health and Greenhouse gas emissions posed by the crematorium. The report done for CEQA (California Environmental Quality Act) is not complete and does not fully support a full environmental review process.

I was concerned that the Helix report only briefly mentions the release of mercury from cremation. No estimates were provided and the data mentioned was from the manufacturer of the crematorium unit. A report on the NIH website states that "Crematoria represent a significant source of mercury emissions to the environment". "The danger with mercury is long term indirect exposure from the environment and the food chain". This is because mercury can accumulate over time in our tissues and becomes a potent neurotoxin. It's also linked to decreased intelligence in children. Mercury is also known to cause kidney damage. We live in a neighborhood where we eat fruits and vegetables from our yards and people and wildlife catch and consume fish from Lake Natoma. The Lake Natoma/ American River is a major source of drinking water for over a million people or more. Why wasn't this mentioned or reviewed?

Another area that wasn't covered in the Helix report was the the amount of greenhouse gasses that will be produced, specifically CO2 . There are multiple Initiatives from the state, federal and international agencies that are attempting to reduce greenhouse gas production and the Crematorium will be a significant producer of CO2 . The crematory proposes to burn propane for the cremation process, per their report, each cycle burns 19.672 gallons with a proposed 4 cycles a day and 500 cycles per year. From the U.S Energy Information Administration, each gallon of propane burned produces 12.61 lbs of CO2. Multiply that by 19.67 gallons per cycle times 4 cycles per day. It comes to 992 lbs of CO2 produced per day. 500 cycles per year produces 124,032 lbs of CO2. This is a large amount of CO2 production in our neighborhood which adds to our existing elevated levels of CO2. Why was this not fully evaluated? Have alternatives been fully considered? Maybe Igor Semenyuk could be a leader in the industry by investing in Aquamation for human remains, which is a significantly less polluting and has a lower carbon footprint.

I also take issue with the statement from the Helix report that states " The project was not found to be a substantial source of objectionable odors and odor imparts." There is no methodology, background or citations given to base that statement on. Do we have to rely on their word or will they provide more information on which to base that claim? From the articles I have read, odors and smoke are the main complaint from neighbors who live near crematoriums.

My personal concerns are that the smell from burning bodies will be a daily occurrence and will interfere with the enjoyment and value of my property. I love to spend time gardening, generally enjoying my backyard, which backs up to the cemetery and is very close to the proposed crematory. This will be impacted by the presence and smell of crematorium operations. I am also concerned about the health impact of breathing the emissions from cremations. Breathing residue from human bodies being burned, including substances which are toxic to humans and wildlife and particulates have been shown to have major health adverse impacts and are known to shorten lives. There are personal financial consequences too. Having a Crematorium behind my home will decrease my resale value as most future purchasers will find it upsetting and distasteful to have a crematorium out back.

I do hope this letter helps you to realize that the crematorium project will have negative health and pollution consequences and that it does not belong in our neighborhood and historic Folsom. Please demand a greater articulation of the consequences of this proposal. Better yet, please deny the project.

Sincerely,

Mary Johnson

Scott Johnson, Planning Manager
Steve Banks, Principal Planner

I am writing as a concerned citizen that lives in the adjacent neighborhood of the proposed crematorium. My concerns are from the heart. I have loved ones that have been laid to rest at the Lakeside Cemetery and visit often. The cemetery is a beautiful place to walk through and visit. The wildlife I have seen there over the years has brought much pleasure to me. In the last several years a pair of bald eagles have been successful in nesting and have been quite successful in growing their family and growing their species. One of my concerns is about the long-term environmental impact the crematorium emissions would have on the future successes of the bald eagle population. Air quality for the neighborhood would be another major concern, especially for those with health issues such as asthma. The neighborhood is a mix of young, growing families and retired families. The area is known for its healthy environment and healthy style of living. The industrial business just is not a good fit or in the best interest of the people of Folsom.

The site is zoned OS/P (Open Space/Public Primary Area) with underlying zoning of OSC (Open Space and Conservation) and has a General Plan designation of OS (Open Space). The Historic District Commission will take final action on this request unless the decision is appealed to the City Council. I am asking the City Council to vote NO on the proposed crematorium.

Thank you for your consideration,

Mary Matthews

HFRA Mission Statement

The Historic Folsom Residents Association is a group of neighbors working together to protect, preserve, advocate for and enhance the Folsom Historic Residential District. Through community involvement and awareness, HFRA shall strive to collaborate and build strong partnerships with City Government and local entities to identify and resolve current and future neighborhood concerns affecting the Folsom Historic District. We are united by our love for the community and desire to maintain and improve the quality of life for residents and defend the historic integrity of this neighborhood for future generations.

Dear Historic District Commissioner:

Bottom line – who benefits from having a crematorium in our neighborhood? The neighbors? The City? Caring Service Group/Miller Funeral Home? The Chinese historical sites? The Folsom Historic District? The children or elderly of our community, especially with health issues? Not likely! It’s definitely pause for speculation & concern.

Please help us, the Folsom residents within the historic district, and specifically The Preserve neighborhood, to reject the proposal to have a crematory built where we live our daily lives.

You are already well-informed of our many objections & serious concerns of having this crematory approved, so I will not list them here, but I don’t believe it’s asking too much to want clean air, clean lakes, and good health. And this doesn’t even include our worries about fires in our high-risk fire area with 500 gallons of propane present at the cemetery property for the cremations, and what invisible harmful particles might be in the air caused by the use of a crematorium 4-6 times a day. It would seem more plausible to build such a crematorium in an industrial area, or use another facility of which there are a number of them in our county.

And yes, I’m over 75 and live in a receptor area.

Thank you for listening to our concerns and worries,

Mary Rigney

Dear Daron,

I'm hoping I'm not too late in voicing my concern about having a crematorium in our Preserve neighborhood, this being the second attempt by Miller's Funeral Home. Please pass my concerns onto those making the decisions in this serious matter.

We've already voiced our strong feelings against having dead bodies burned in our own backyards, yet we are being faced with this same issue one more time! I'm sure that it is sanitary & safe, but that is not the point. I don't see why this can't be done elsewhere in an industrial area that would be far more fitting than to disrupt an entire neighborhood who have already voted against this project.

It seems we're being hit hard right now with other propositions which would drastically alter our quiet safe haven, our main reason for choosing this area to live in the first place. Between the constant battle with the future of the Corp yard (most recently affordable housing!), the light rail adding more tracks doubling the stops at our ONE outlet for our community, and now the crematorium issue on top of it all!

Therefore, I would like to join my other neighbors in requesting reconsideration of the projects I've mentioned above. Thank you for your time & listening to my concerns, and for sharing with the those making the decisions, it's so appreciated.

Ms. Anderson:

I am a direct sight line neighbor of where the proposed crematorium is to sit. We already contend with the very unfavorable smell of the Kikkoman plant any day the wind is our direction from it, which is frequent. So this doubles our concern as, if Kikkomans can't control odor how on earth will the Crematorium be able to control theirs?

But to have to go out of my front door, look out my only front living room windows or to go sit on my only porch and stare at a stack from a Crematorium is a real slap in the face and our main concern.

I am a NICU nurse and deal with enough death on the daily at my job. I really don't appreciate having not only to deal with it at work but literally stare at it at home daily.

I have attached photo's that are taken from my front porch. I take pics almost weekly since the sunset is so beautiful from my front porch. This is apparently, exactly where the stack will stand. So no more front porch sitting for me, again - it's my only porch, it's my only sight line outside since our windows from our living room face that direction.

We volunteer in Folsom Days, we actively help keep an eye on the Historic Rail Yard which is our neighbor, we speak to Jim and other staff occassionally through the year. We spend as much money locally as possible.

PLEASE VOTE NO - I oppose the Crematorium location and I expect any council or official representing me to oppose it's location in this residential area.

Thank You Respectfully,

**RE: COMMENTS ON THE PROPOSED LAKESIDE MEMORIAL LAWN
CREMATORUIM DRAFT INITITAL STUDY/MITIGATED NEGATIVE
DECLARTION AND THE CONDITIONAL USE PERMIT**

First, I would like to state that I have lived in Folsom for 20 years and live adjacent to the Lakeside Cemetery property. Also, my family has been identified as “sensitive receptors” in the Health Risk Assessment.

I have reviewed the above-mentioned documents and I recommend **disapproval** of the draft Initial Study/Mitigated Negative Declaration based on comments below. I also recommend **disapproval** of the draft Conditional Use Permit (CUP).

Draft Initial Study/Mitigated Negative Declaration (IS/MND)

#1. Project Description, Parking and Circulation (page 2), last paragraph, it states that access would only need to accommodate a **small number of staff members** as there is limited parking onsite. However, this appears to be in conflict with statements made in the applicant’s Scope of Work. It states that ...”cremation-based cultures require on-site crematory so they may be able to exercise their funeral rights and customs.” As any cremation may attract large number of attendees, the cremations should clearly be limited to small number of staff as stated in the IS/MND.

Unless the cremations are limited to only staff attending, there could be potentially significant impacts on traffic, circulation, and parking within a small residential neighborhood with only one way in and out of the subdivision with limited amount of off-street parking (the Transportation Section XVII of the draft IS/MND also states under parking and access that only a small number of staff members will need to be accommodated).

#2. Land Use and Planning, Section XI. The proposed crematorium is totally incompatible with the existing land use zoning of Open Space. The City of Folsom’s Chapter 17.30, M-2, General Industrial District of the municipal code, lists permitted uses only allowed in M-2 districts. While crematoriums are not specially listed, yet, in M-2 districts, it does list similar uses. A crematorium should only be located in an industrial zone. This can be a significant impact on Land Use. As the proposed crematorium is located in the Historic District an analysis should have been completed to identify any impacts and conflicts with the Historic District planning guidelines.

#3. Air Quality, Section III and Hazards and Hazardous Materials Section IX. The health risk assessment and receptor modeling for potential health risks appear to only have been

conducted one time, on November 11, 2020. Air pollution patterns will vary depending on time of year and wind directions, etc. Additional air modeling should be conducted at the project site at different times of the year.

I believe additional analysis needs to be done regarding health risks to sensitive receptors from vapors emitted from dental fillings that include mercury, both from air pollution and consequential contaminated soils. There have been numerous studies identifying these health risks.

Draft Conditional Use Permit (CUP)

#1. The public noticing for this proposed CUP does not meet State Planning Law for CUP's as per Government Code Section 65905 and needs to be re-noticed. I have attached a copy of the State Training guide for CUP's. The public notice for this project is titled "Notice of Public Hearing and Notice of Intent to Adopt a Mitigated Negative Declaration." No mention of a draft CUP for review. The notice only refers to the CUP once, and as an entitlement.

#2. Further, no draft CUP was included in the public review documents listed online by the City for public comments. City staff's notification stated that the CUP will be included in a Staff Report and be available at least 5 days prior to the February 16th HDC meeting. Section 65905 states that noticing of the CUP needs to be made available at least 10 days prior to the public hearing. No Staff Report online as of February 3th.

#3. A condition of the permit should include limiting attendance of cremations to cemetery employees only as assured in the IS/MND.

It appears that there may be significant impacts from this project. While the IS/MND did not identify potentially significant impacts, the Lead Agency (City of Folsom), makes the final determination. The Lead Agency should complete a project-specific Environmental Impact Report (EIR). While the Lead Agency is relying on an existing program EIR, a project-specific EIR should instead be completed due to the uniqueness of this proposed project and its location, located in Open Space zoning in the Historic District.

Sincerely,

Nancy Fallan Oldham

The Planner's Training Series

This publication is one in a series prepared by the Office of Planning and Research (OPR) on topics of general interest to planners. As with the rest of this series, its primary purpose is to provide both a reference for experienced planners and training materials for new planners, planning commissioners, and zoning board members. Citations are made to pertinent sections of the California statutes and to court decisions in order to provide the reader the opportunity to do additional research on their own. Unless otherwise noted, all statutory references are to the California Government Code.

This document and other OPR publications, along with additional information about local government planning and zoning, is available from the LUPIN (Land Use Planning Information Network) web site maintained by the California Resources Agency at <http://ceres.ca.gov/planning/>

The CONDITIONAL USE PERMIT

WHAT IS A CONDITIONAL USE PERMIT?

A CONDITIONAL USE PERMIT (CUP) allows a city or county to consider special uses which may be essential or desirable to a particular community, but which are not allowed as a matter of right within a zoning district, through a public hearing process. A conditional use permit can provide flexibility within a zoning ordinance. Another traditional purpose of the conditional use permit is to enable a municipality to control certain uses which could have detrimental effects on the community (*Neighborhood Action Group v. County of Calaveras* (1984) 156 Cal.App.3d 1176).

Consideration of a CUP is a discretionary act. A CUP application tendered by a project proponent is considered at a public hearing and, if approved, is generally subject to a number of pertinent conditions of approval. Depending on local ordinance requirements, hearings are typically held by a board of zoning, the planning commission, or a zoning administrator. The owners of property near the site are sent advance notice of the date, time, and place of the hearing.

Examples of common uses allowed with a conditional use permit can be found in any city or county zoning ordinance. For example, Santa Rosa's zoning ordinance lists uses which may be permitted within single-family residential districts with a conditional use permit. These uses include churches, public or private schools, public building or utility structures, parking lots, temporary subdivision sales offices, and community care and health care facilities. Chico's zoning ordinance lists various uses permitted with a use permit issued by either a planning director or planning commission. These uses include temporary amusement attractions, the placement of a building or structure on a lot or parcel which has been moved from another lot or parcel, public buildings and facilities, parking or access located off-site from the site being served, private recreation centers, and planned developments. Each city or county may include in their zoning ordinance a wide variety of uses which they will permit with a conditional use permit.

ENABLING LEGISLATION

The rules under which counties and general law cities may issue a conditional use permit are provided by state and case law. Charter cities are not subject to state zoning law, except in special circumstances, but

may still use its provisions (Section 65803). The following is a brief examination of the authority and rules under which local governments act in issuing use permits.

Constitutional Authority:

Local governments have the authority to enact local planning and land use regulations to protect the public health, safety, and welfare of their residents through their police power. The "police power" provides the right to adopt and enforce zoning regulations, as long as they do not conflict with state laws. The police power is the basis for charter city zoning powers. (California Constitution, Article XI, Section 7)

Statutory Authority:

California code reiterates the Constitutional police powers of cities and counties to enact zoning regulations, but has little to say about CUPs in particular.

"The legislative body of any county or city may, pursuant to this chapter, adopt ordinances that do any of the following:

"Regulate the use of buildings, structures, and land as between industry, business, residences, open space, including agriculture, recreation, enjoyment of scenic beauty, use of natural resources, and other purposes. . . ." (Section 65850(a))

"The board of zoning adjustment or zoning administrator shall hear and decide applications for conditional uses or other permits when the zoning ordinance provides therefor and establishes criteria for determining those matters . . ."

"The board of zoning adjustment or zoning administrator may also exercise any other powers granted by local ordinance and may adopt all rules and procedures

THE CONDITIONAL USE PERMIT

necessary or convenient for the conduct of the board's or administrator's business."

(Section 65901(a))

Case Law:

California case law has established a number of fundamental principles relating to conditional use permits. In addition to the basic uses permitted within a zoning district, a city or county zoning ordinance can provide other specified uses which may be permitted after consideration and resolution by an administrative agency that the proposed use is in the best interest of public convenience and necessity and will not be contrary to the public health, morals, or welfare (*Upton v. Gray* (1969) 269 Cal.App.2d 352).

Local governments must have a complete and valid general plan before they can issue conditional use permits (*Resource Defense Fund v. County of Santa Cruz* (1982) 133 Cal.App.3d 800 and *Neighborhood Action Group v. County of Calaveras* (1984) 156 Cal.App.3d 1176).

The authority to consider conditional use permits, delegated to planning commissions or other administrative bodies by elected officials, must include standards of guidance. These standards of guidance are provided to insure that the delegation of discretion to an administrative agency is not unbridled and, thus, not invalid. The doctrine of the need of an ascertainable standard to guide an administrative body applies where the legislative body of a city attempts to delegate its law-making functions (*Stoddard v. Edelman* (1970) 4 Cal.App.3d 544).

PROCEDURE

The approval of a conditional use permit is an administrative, quasi-judicial act. It is not a change of zone, but rather a project-specific change in the uses allowed on a specific property. Conditional use permits do not involve the establishment of new codes, regulations, or policies. Instead, a conditional use permit applies the provisions of the zoning ordinance and its standards to the specific set of circumstances which characterize the proposed land use. Cities and counties have the authority to establish either a board of zoning adjustment or a zoning administrator to hear and decide applications for conditional uses. Local ordinance can establish specific procedures under which a delegated board of appeals will hear and determine appeals from the decisions of the board of zoning

adjustment or the zoning administrator (Section 65903). In most jurisdictions, appeals are heard by the next highest body, eventually reaching the city council or county board of supervisors for a final decision.

Public Hearing:

Section 65905 requires a public hearing to be held on an application for a conditional use permit. At a minimum, advance public notice, an opportunity to be heard, and a fair hearing are constitutional due process rights as explained in *Horn v. County of Ventura* (1979) 24 C.3d 605.

The Government Code establishes minimum requirements for public notice for counties and general law cities. Charter cities may adopt similar provisions. The notice of a public hearing must include: the date, time, and place of the hearing; the identity of the hearing body or officer (commonly the delegated board of zoning adjustment or the zoning administrator); a description of the proposal and the conditional use permit process; and the location of the property involved (Section 65094). Notice must be mailed to all property owners within 300 feet of the proposal's site boundary at least 10 days prior to the public hearing. The names and addresses of owners are those listed on the most current county equalized assessment roll. This requirement includes the owners of property which lie outside the city limits or county line (*Scott v. Indian Wells* (1972) 6 C.3d 541). Notice must also be published once in a newspaper of general circulation at least 10 days before the hearing.

Section 65030 recognizes the importance of public participation in public hearings and expresses a clear legislative intent that local agencies insure public participation at every level of the conditional use permit process. The purposes of the public hearing is for the zoning board or zoning administrator to hear and consider the opinions of the proponent and nearby property owners prior to making their decision to either approve or deny the conditional use permit. As a quasi-judicial act, the approval of a conditional use permit requires the board or administrator to adopt written findings to support their action. Whether the proposal has been approved or denied, the decision can be appealed to a higher body, usually the board of appeals, the planning commission, or city council, in accordance with the city or county zoning ordinance. The appeals body may reverse or affirm, wholly or partly, or may modify the decision, and may make such decision as should be made, and its action is final (Section 65903).

THE CONDITIONAL USE PERMIT

Section 65903 delegates to local legislative bodies the authority to establish procedures for an appeal but not the power to restrict the right of appeal. Thus, a county zoning ordinance cannot attempt to restrict the right of appeal to solely the applicant and exclude the general public, especially adjacent property owners (*Concerned Citizens of Murphys v. Jackson* (1977) 72 Cal.App.3d 1021).

In order to encourage concurrent processing for the purpose of expediting zone changes and general plan amendments, Section 65862 provides that planning agencies may simultaneously process a consolidated application which may include a use permit, rezoning, and general plan amendment if all three applications encompass the same property.

California Environmental Quality Act:

Conditional use permits are subject to the California Environmental Quality Act (CEQA, Public Resources Code Section 21000, et seq.). Prior to the public hearing on the proposed conditional use permit, the city or county must evaluate the proposal to determine whether or not it may have any significant adverse effects on the environment. If the proposal is not exempt from environmental review, the city or county is required to prepare either a negative declaration indicating that the conditional use permit will have no significant effect, or an Environmental Impact Report (EIR) which describes the potential negative impacts of the proposal and the means to avoid or lessen those impacts. See the bibliography for a reference which can provide more information about the California Environmental Quality Act.

Permit Streamlining Act:

The Permit Streamlining Act (Section 65920, et seq.) establishes time limits within which the review and approval or denial of a conditional use permit proposal must occur. For instance, if an EIR was certified for a conditional use permit, the application must be acted upon within one hundred eighty days from the date of certification (Section 65950(a)(1)). A proposal for which a negative declaration was adopted or a CEQA exemption used must be acted upon within sixty days of that action (Section 65950(a)(2)(3)). A conditional use permit cannot be disapproved solely to comply with these deadlines.

The Permit Streamlining Act provides that failure to meet its deadlines will result in automatic approval of the conditional use permit (Section 65956(b)). However, the permit can only be deemed approved if public

notice and an opportunity to be heard had been provided either by the agency or by the applicant.

The Permit Streamlining Act does not apply to administrative appeals within a state or local agency (Section 65922). Therefore, if a permit is appealed to a higher body there is no strict time frame within which the appeal must be heard.

LIMITATIONS ON CONDITIONAL USE PERMITS

As a rule, conditional use permits do not authorize uses that the zoning ordinance does not authorize, nor uses not expressly authorized by the permit. The conditional use permit includes conditions which limit the applicant's authority to use the property. Under certain conditions, however, local governments may incorporate provisions from federal laws and broaden the range of uses permitted (*Sports Arena Properties, Inc. v. City of San Diego* (1985) 40 C.3d 808).

It is often the case that local agencies follow a general set of standards in considering a conditional use permit. These standards are generally acceptable since it is a near impossibility to devise standards to cover all possible situations in which a use permit can be issued (*Tustin Heights Association v. Board of Supervisors* (1959) 170 Cal.App.2d 619). There are several cases in which these standards have been upheld.

General Welfare Standard:

"The establishment, maintenance or conducting of the use for which a use permit is sought will not, under the particular case, be detrimental to the public welfare or injurious to property or improvements in the neighborhood" (*Hawkins v. County of Marin* (1976) 54 Cal.App.3d 586).

Nuisance Standard:

"Any use found to be objectionable or incompatible with the character of the city and its environs due to noise, dust, odors or other undesirable characteristics may be prohibited" (*Snow v. City of Garden Grove* (1961) Cal.App.2d 496).

General Plan Consistency Standard:

"Although use permits are not explicitly made subject to a general plan meeting the requirement of state law, that condition is necessarily to be implied from the hierarchical relationship of land use laws.

THE CONDITIONAL USE PERMIT

Thus, use permits are struck from the mold of the zoning law, the zoning law must comply with the adopted general plan, and the adopted general plan must conform with state law; the validity of the permit process derives from compliance with this hierarchy of planning laws (*Neighborhood Action Group v. County of Calaveras* (1984) 156 Cal.App.3d 1176).

Zoning Consistency Standard:

"To obtain a use permit, the applicant must generally show that the contemplated use is compatible with the policies in terms of the zoning ordinances, and that such use would be essential or desirable to the public convenience or welfare, and will not impair the integrity and character of the zoned district or be detrimental to the public health, safety, morals or welfare" (*O'Hagen v. Board of Zoning Adjustment* (1971) 19 Cal.App.3d 151).

In addition to the general standards discussed, there also exist other limitations on conditional use permits. Conditional use permits run with the land not the applicant (*Cohn v. County Board of Supervisors* (1955) 135 Cal.App.2d 180). That is, where conditional use permits are concerned, all related property and personal rights are freely transferable, unless expressly prohibited by law (*Anza Parking Corporation v. City of Burlingame* (1988) 195 Cal.App.3d 855). Inversely, a conditional use permit may not lawfully limit the permittee from transferring it with the land since such a condition is beyond the power of the zoning authority (*Anza*, supra).

The conditions which are imposed on a conditional use permit must be expressly attached to the permit and cannot be implied. For example, if a conditional use permit contains language that restricts a building's height to five stories and requires the developer to submit and obtain planning-commission approval of a landscaping plan, among other things, the permit itself does not imply a height limitation on trees within the development (*Pacifica Homeowners' Association v. Wesley Palms Retirement Community* (1986) 178 Cal.App.3d 1147).

**OTHER TYPES OF
CONDITIONAL USE PERMITS**

State law also allows conditional use permits for "granny" units, second dwelling units, and mobile-home parks. If a local zoning ordinance does not

provide for these cases, the ability to apply for conditional use permits allowing these uses is provided for by state law. In all cases, public notice and hearing must be provided as discussed earlier.

"Granny" Units (Section 65852.1) -

"... any city, including a charter city, county, or city and county may issue a zoning variance, special use permit, or conditional use permit for a dwelling unit to be constructed, or which is attached to or detached from, a primary residence on a parcel zoned for a single-family residence, if the dwelling unit is intended for the sole occupancy of one adult or two adult persons who are 62-years of age or over, and the area of floor space of the attached dwelling unit does not exceed 30 percent of the existing living area or the area of the floor space of the detached dwelling unit does not exceed 1,200 square feet."

Prior to approval of a conditional use permit under Section 65852.1, the city or county must find that the resident or residents meet the age criteria, and that the floor area of the proposed unit does not exceed that allowed by the statute. In accordance with the special circumstances provided in Section 65803, Section 65852.1 applies to charter cities, as well as general law cities.

Second Dwelling Units (Section 65852.2) -

"Notwithstanding Section 65901, every local agency shall grant a special use or a conditional use permit for the creation of a second unit if the second unit complies with all of the following:

"(A) The unit is not intended for sale and may be rented.

"(B) The lot is zoned for single-family or multi-family use.

"(C) The lot contains an existing single-family dwelling.

"(D) The second unit is either attached to the existing dwelling and located within the living area of the existing dwelling or detached from the existing dwelling and located on the same lot as the existing dwelling.

"(E) The increased floor area of an attached second unit shall not exceed 30 percent of the existing living area.

"(F) The total area of floor space for a detached second unit shall not exceed 1,200 square feet.

"(G) Requirements relating to height, setback, lot coverage, architectural review, site plan review, fees, charges, and other zoning requirements generally ap-

THE CONDITIONAL USE PERMIT

plicable to residential construction in the zone in which the property is located.

"(H) Local building code requirements which apply to detached dwellings, as appropriate.

"(I) Approval by the local health officer where a private sewage disposal system is being used, if required."

Section 65852.2 also provides that any local agency may, by ordinance, allow second units in single-family and multifamily residential zones. Thus, a Section 65852.2 conditional use permit is only required for second units when a local agency has not adopted an ordinance governing second units.

Mobilehome Parks (Section 65852.7) -

"A mobilehome park, as defined in Section 18214 of the Health and Safety Code, shall be deemed a permitted land use on all land planned and zoned for residential land use as designated by the applicable general plan; provided, however, that a city, county, or a city and county may require a use permit."

If a local government denies the renewal of a conditional use permit allowing a mobilehome park, the government must take specified required steps to mitigate the adverse impacts of the mobilehome park closure, pursuant to Section 65863.7.

FINDINGS

Written "findings of fact" are required in order to support the decision of the hearing body to approve or deny a conditional use permit (*Topanga Association for a Scenic Community v. County of Los Angeles* (1974) 11 C.3d 506). Findings are the legal footprints left by local decision-makers to show how the decision-making process progressed from the initial facts to the decision.

Findings are important. They "bridge the analytical gap between the raw evidence and ultimate decision" (*Topanga, supra*). If the decision is challenged, a court will examine the evidence supporting the findings to determine whether the hearing body abused its discretion when acting on a conditional use permit. Such an abuse of discretion is to be found when: (1) the agency did not proceed in a manner prescribed by law; (2) the agency's decision is not supported by findings; and (3) the agency's findings are not supported by evidence in the administrative record.

Topanga cites several purposes for making findings, among which include: (1) providing a framework

for making principled decisions, thus enhancing the integrity of the administrative process; (2) helping make analysis orderly and reducing the likelihood that the agency will randomly leap from evidence to conclusion; and (3) serving a public relations function by helping to persuade the parties that administrative decision-making is careful, reasoned, and equitable. Findings should also justify any conditions which impose fees or other exactions.

For a detailed discussion of findings requirements, see OPR's publication entitled *Bridging the Gap*.

CONDITIONS OF APPROVAL

Section 65901 empowers local decision-making bodies to take action on use permit proposals when zoning ordinances make provisions and set criteria for them. The hearing body may also modify a conditional use permit's terms by imposing new or revised conditions, if the ordinance, interim ordinance, or original conditional use permit so provides (*Garavatti v. Fairfax Planning Commission* (1971) 22 Cal.App.3d 145).

Just as there are limitations in approving a conditional use permit, there are also limitations in establishing conditions of approval. Four general rules of thumb in applying conditions of approval include: (1) the jurisdiction must be acting within its police powers; (2) the condition must substantially further a legitimate public purpose; (3) the condition must further the same public purpose for which it was imposed; and (4) the property owner may not be required to carry a disproportionate load in furthering the public purpose (*California Land-Use and Planning Law*, 9th edition).

Section 65909 provides that dedications of land, as conditions of approval, must be "reasonably related" to the use of the property for which the conditional use permit is requested. There must also be a "rough proportionality" between the extent of the condition and the particular demand or impact of the project (*Dolan v. City of Tigard* (1994) 129 L.Ed2nd 304). In addition, a performance bond cannot be required for the installation of public improvements that are not reasonably related to the property use. Limitations on impact fees are described in the Mitigation Fee Act (Section 66000, et seq.).

If a condition applied to a conditional use permit is not linked to some legitimate public need or burden the project creates, the condition imposed could be deemed a taking of property in violation of the U.S. Constitution's Fifth and Fourteenth Amendments

THE CONDITIONAL USE PERMIT

**CONDITIONAL USE
PERMIT CHECKLIST**

If a conditional use permit is to be approved, all of the following questions must be answered affirmatively.

1. Is the public hearing notice complete in its description of the project?
 Yes No
2. Has the public hearing notice been issued in accordance with all procedures?
 Yes No
3. Is the proposed use, with proposed conditions of approval, suitable for the site?
 Yes No
4. If any conditions of approval call for dedications of land, are they reasonably related to the use and its impacts?
 Yes No
5. If significant environmental effects have been identified as a result of the proposed conditional use permit, have conditions been required, or has the project been redesigned, to mitigate those effects?
 Yes No
6. Have findings been adopted to support the agency's decision, based upon substantial evidence in the record?
 Yes No
7. Are the required environmental findings being adopted?
 Yes No

(*Nollan v. California Coastal Commission* (1987) 97 L.Ed2nd 677). Where a regulatory taking has been found to occur, the courts will overturn the agency's action and may require the agency to pay the applicant compensation for the taking (*Dolan, supra*).

EXAMPLES

The following court cases illustrate when it may be proper to grant a conditional use permit and when it may not be. These cases are illustrations only and should not be used as the sole basis for granting or denying a conditional use permit.

**Cases Upholding Conditional Use
Permit Approvals****General Welfare Standard**

The general welfare standard is sufficient in granting a conditional use permit. The issuance of a conditional use permit for a low-cost rental housing for the elderly in a residential area was upheld on grounds that the proposed use would not be "detrimental to the public welfare or injurious to property or improvements in the neighborhood" (*Hawkins v. County of Marin* (1976) 54 Cal.App.3d 586).

General Plan Consistency

The absence of a valid general plan does not preclude all development activity. Section 65361 establishes the general plan extension procedure whereby local governments can proceed with development pending completion of a valid general plan. This procedure also applied to the case where a county approved minor land subdivisions without a required general plan (*Resources Defense Fund v. County of Santa Cruz* (1982) 133 Cal.App.3d 800).

Procedure/Public Notice

A conditional use permit cannot be revoked without sufficient cause. Further, prior to revocation, notice and hearing must be provided for. Thus, in the case where an applicant was given notice that the hearing would concern the expiration of the conditional use permit rather than the revocation of the permit, attempt to revoke the permit was nullified (*Community Development Commission of Mendocino County v. City of Fort Bragg* (1988) 204 Cal.App.3d 1124).

**Cases Overturning Conditional Use
Permit Approvals****General Welfare Standard**

A county zoning ordinance requiring a church in a residential zone to obtain a conditional use permit prior to allowing it to use the land was found not to abridge the constitutional right of freedom of religious wor-

THE CONDITIONAL USE PERMIT

ship. The court held that a county zoning ordinance which provides a use permit to be granted if the use will not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons or property in the neighborhood, or to the general welfare of the county, is not unconstitutional by reason of vagueness or uncertainty (*Mathews v. Board of Supervisors of Stanislaus County* (1962) 203 Cal.App.2d 800).

Nuisance Standard

The approval of a conditional use permit for the storage of houses was overturned on grounds that any use may be prohibited if found to be objectionable or

incompatible with the character of the city and its environs due to noise, dust, odors or other undesirable characteristics (*Snow v. City of Garden Grove* (1961) 188 Cal.App.2d 496).

General Plan Consistency

The issuance of a conditional use permit to a construction company for production of sand and gravel was overturned on grounds that that the general plan elements which bear on the permit are inadequate and the permit is inconsistent with pertinent provisions of an adequate general plan (*Neighborhood Action Group v. County of Calaveras* (1984) 156 Cal.App.3d 1176).

From: N Oldham [REDACTED]
To: Daron Bracht <Daronbr@pacbell.net>

Hi Daron, I do not think that the proposed Lakeside Memorial Lawn Crematory project and a conditional use permit should be approved. The proposed crematory I believe is considered an industrial use and should be located only in an industrial zoned area.

As you know the Lakeside Memorial Lawn Cemetery is zoned open space/public primary area.

Further, I believe Folsom's Open Space Element of the General Plan counted on the Cemetery land in its open space requirement. The crematory is not a compatible use in open space zoning.

Folsom's General Industrial District (Chapter 17.30 M-2) states that specific uses shall only be permitted in M-2 districts. While it doesn't reference crematories it does list pottery kilns and ceramic works.

I have other concerns and comments on the proposed project including health related concerns with vapors emitted from dental mercury fillings. There are numerous studies regarding this health and environmental issue.

Can you please forward my email to the other commissioners? I know that there may be some new commissioners appointed soon. I will include my above comments and others when the draft Initial Study is made available at a Historic District Commission meeting.

Thank You.

Hello,

My husband, two young kids, and I bought a home in the Lake Natoma Shores neighborhood a year ago. We moved here to be closer to family, and have a better quality of life.

The neighborhood has proven to be magical. My kids have freedom, ride their bikes with the other neighborhood kids, and meet at the park to play. The neighbors gather for movie nights with an outdoor projector, piñatas in the alley, poker nights, the neighborhood band playing for the community, chili cook offs, kayaking on the lake, and holiday decorating contests.

My parents live down the street, and my sister and her family live a couple houses down from them. A new baby is expected in April.

We found out about the proposed crematorium a couple of months after we moved in. I wasn't worried at first. I never thought it would be allowed in an established historic neighborhood.

We moved to Folsom because of family and that it is "Distinctive by Nature". Please keep the Historic District special. Please protect Open Space. Please save our magical neighborhood. The crematorium should be put in an industrial area. It does not belong where kids play. If the crematorium gets put in it will destroy an entire neighborhoods' quality of life just so The Caring Services Group/Miller Funeral Home can make a profit. I don't want this to happen to my family and my neighbors (please note the smoke and odor quotes):

Hello,

I am opposed to having a crematorium in my neighborhood. I have read the "Initial Study/Mitigated Negative Declaration." I am voicing my concerns about:

"The Project Objectives"

On page 7 it states; The project objectives **as expressed by the applicant**, are to:

1.) Provide cremation services for those who currently live in and around Folsom, as no such services currently exist for the city.

There are 18 crematories within an 18 mile radius of Miller Funeral Home (google maps). 12 are in the City of Sacramento proper, 1 in Rocklin, 1 in Placerville, 1 in Fair Oaks, and 2 in Carmichael. I received this information from the Consumer Affairs office in Sacramento. Mr. Semenyuk is right, there isn't a cremation service directly in Folsom, however there are other facilities close by. Does Folsom really need to have a crematory?

If it is deemed a necessary service for Folsom, the crematorium needs to be in a zoned industrial/commercial area distant from residential neighborhoods.

2.) Provide cremation services for members of the population whose customs or religions require such practices.

While this may be true, it is my opinion the number of Folsom residents requiring this service is low. Customs and religious needs can be met at Mount Vernon Memorial Park and Mortuary in Fair Oaks- 11 minutes or 5.2 miles away from Miller Funeral Home.

3.) Prepare for an increase in the demand for cremation services as cremation becomes more popular in California and as the Folsom population grows.

Mr. Semenyuk is right. Plan, prepare, and place the industrial incinerator in an appropriate location. It belongs in a zoned commercial/industrial area. There is plenty of time to research a far better location than in the Preserves Neighborhood. I see no need to rush to a decision. Lakeside Memorial Lawn is the wrong place for an industrial incinerator.

4.) Upgrade the existing facilities to capitalize on a business opportunity that has proven successful for the applicant elsewhere in California.

Mr. Semenyuk states he wants to "upgrade existing facilities". Mr. Semenyuk stated he was

going to "use an existing metal shed" to install the HCT-250 industrial incinerator and 10X15 foot walk-in chiller. This is an old shed. It is my estimation that the shed in question is at least 25 years old. It doesn't make sense to me to place machinery, maybe worth 100K, in an old metal shed. They recently built a 25x25 foot metal shed next to the old shed. It is a matter of time before Mr. Semenyuk requests to remove the old shed, build another bigger and better structure, and move the equipment to the new metal shed with possibly another incinerator.

5.) "Capitalize on a business opportunity"

That says it all. It's all about the money.

Zero regard to the residents of the Preserve Neighborhood, to their health, safety, quality of life, and the ability to thrive.

Zero regard to the Historic Value of the area.

According to "Folsom Historic Commission District Staff Report" dated 01-15-2003:

"Lakeside Memorial Lawn is actually a conglomeration of Citizen, Jewish, Masonic, Negro Bar, Cook's/American Legion, and Odd Fellows Cemeteries that date back to the 1850's. Adjacent to this site is the China Mission-Chung Wah Cemetery, a national registered historic site. These cemetery sites along with the neighboring California State Dredger Tailing Preserve, create a combination, in itself, is a extremely unique resource, according to the Commissioners of the Sacramento County Historical Cemetery Commission."

The Caring Service Group on their website states;

"Caring Service Group was established in 2010 with the primary goal of purchasing Funeral Home Business".

It's just about business, money, and expansion. It's not about local cremations, there are 18 crematories within 18 miles. It's not about providing a service for religious or cultural customs, there is a facility 5.2 miles away. It's not about growing populations.

It's to, **"CAPITALIZE ON A BUSINESS OPPORTUNITY"** with zero regard toward the community.

No to the industrial incinerator.

Thank you for your time,

Nicole Gates

**RE: Lakeside Memorial Lawn Crematorium CUP and IS/MND
Planning No. P-19-182**

Words matter....and calling a crematorium 'safe' is misleading. Peter Hartwick of Peter Hartwick Combustion Technologies claims their crematoriums use less fuel, lower Nitrogen Oxide (NOx) emissions, and are compliant with NFPA and air quality standards. "Low NOx emissions"? **Any** NOx molecules during exposure to UV rays in sunlight and heat, interact with volatile organic compounds and form a serious ground level pollutant....and in the presence of rain...acid rain. There is strong evidence that NOx respiratory exposure can trigger and exacerbate existing asthma symptoms, and can even lead to the development of asthma over a longer period of time. These toxins can irritate the lungs of healthy people! And what about those with existing medical conditions such as asthma or heart disease?

In a study by the EPA, from only one crematory in Southern California, they found Carbon monoxide, nitrogen oxides, Particulate Matter (PM10), (PM2.5), mercury and other heavy metals like cadmium, lead, and nickel. Known carcinogens like dioxins and furans and even hydrogen chloride. Mercury is colorless and odorless, and there is no agreement about the safe level of it. Some say no level is safe. Mercury can be present in dental fillings (mostly from baby-boomer days) and medical devices of bodies that are cremated and is most dangerous when heated. Crematoriums are required to remove these things beforehand, but the materials become biohazard waste and so most won't bother. Who would know?

Without information of how often a crematory is working, how does one say it "meets air quality standards". Igor Semenyuk, Chief Operations Officer of Miller Funeral Home (which also owns and operates Lakeside Memorial Lawn) says they may be cremating 2-3 per day, and then claims 7 a week. Which is it? I noticed in his addendum to the proposal he has already increased the daily rate from 400 lbs to 800 lbs a day of human remains. Does that mean more per day? As the demand for cremations increase, so will the need for more working days. Once in operation, whose to know? Who regulates that? NO one!

Because of a successful lobbying effort to declassify crematoriums as solid waste incinerators, the EPA does not regulate solid-waste incinerators category pertaining to the funeral industry. States that regulate air quality standards don't require testing for specific toxins that are released during cremation. I understand that the California Air Resources does an annual inspection, but what and how do they test? What about the 364 days in between?

Additionally, besides air health, propane will be used at this proposed site in Folsom, meaning more truck traffic through our neighborhoods and although NFPA compliant, crematories aren't required to report workplace accidents to OSHA. So a mishap occurs and nothing has to be reported, unless of course it is catastrophic...then we would all know! *THIS IS AN OPEN SPACE AND RESIDENTIAL AREA...WHAT A CATASTROPHE IT WOULD BE!*

The Preserve Neighborhood has about 111 households sharing the neighborhood with the Lakeside Memorial Lawn Cemetery. Can anyone really say there are SAFE levels of toxic chemicals?

Crematories are definitely a necessity but why would they be allowed in an environmentally sensitive open space area with vegetation, historical structures and next to a fresh body of water (Lake Natoma). A designated industrial business district away from a fully occupied community of families, schools, and animals could be considered.

Please don't approve profits over human lives! I ask that you take these health issues seriously to preserve the Preserve Neighborhood and historic Folsom.

The crematorium in our neighborhood will affect all of us in the Preserve Neighborhood, and it should be treated as a **HAZARDOUS PROPOSITION** to this urban historical area of Folsom.

Kelly Mullett,

Words matter....and calling a crematorium 'safe' is misleading. Peter Hartwick of Peter Hartwick Combustion Technologies claims their crematoriums use less fuel, lower Nitrogen Oxide (NOx) emissions, and are compliant with NFPA and air quality standards. "Low NOx emissions"? Any NOx molecules during exposure to UV rays in sunlight and heat, interact with volatile organic compounds and form a serious ground level pollutant....and in the presence of rain...acid rain. These toxins can enter the lungs, and even short term exposure can irritate the lungs of healthy people! And what about those with medical conditions such as asthma or heart disease?

Because of a successful lobbying effort to declassify crematoriums as solid waste incinerators, the EPA does not regulate solid-waste incinerators category pertaining to the funeral industry. States that regulate air quality standards don't require testing for specific toxins that are released during cremation. If there are inspections by the California Air Resources, how often is it performed and how is it tested?

In a study by the EPA, from only one crematorium in Southern California, they found Carbon monoxide, nitrogen oxides, Particulate Matter (PM10), (PM2.5), mercury and other heavy metals like cadmium, lead, and nickel. Known carcinogens like dioxins and furans and even hydrogen chloride. Mercury is colorless and odorless, and there is no agreement about the safe level of it. Some say no level is safe. Mercury can be present in dental fillings (mostly from baby-boomer days) and medical devices of bodies that are cremated and is most dangerous when heated. Crematoriums should remove these things beforehand, but the materials become biohazard waste and so most won't bother. Who would know?

Without information of how often a crematorium is working, how does one say it "meets air quality standards". Igor Semenyuk, Chief Operations Officer of Miller Funeral Home (which also owns and operates Lakeside Memorial Lawn) says they may be cremating 2-3 per day, and then says 7 a week. Which is it? As the demand for cremations increase, so will the need for more working days. Once in operation, whose to know? Who regulates that? NO one!

Additionally, besides air health, propane will be used at this proposed site in Folsom, meaning more truck traffic through our neighborhoods and although NFPA compliant, crematoriums aren't required to report workplace accidents to OSHA. So a mishap occurs and nothing has to be reported, unless of course it is catastrophic...then we would all know!

I don't have a problem with crematoriums, but like an airport, it should be in a designated business district away from a fully occupied community of families, schools, and animals. The Preserve Neighborhood has about 111 households sharing the

neighborhood with the Lakeside Memorial Lawn Cemetery. We feel there is no such thing as a safe level of a toxic chemical.

The crematorium in our neighborhood will affect all of us in the Preserve Neighborhood, and I think it should be treated as a **hazardous proposition** to this urban area of Folsom.

Please don't approve profits over human lives! I ask that you take these health issues seriously to preserve the Preserve Neighborhood.

 and Mike Kozlowski

I am writing in response to public comments on the application for a Crematorium to be installed at the Lakeside Memorial Lawn Cemetery in Historic Folsom. While the Helix report focuses on the Environmental scope, our neighbors hope you will see the human impacts and aspects of this proposal. In his scope of Work- Installing a Crematory document, Mr. Semenyuk, the applicant, stated that Caring Services Group has eight Mortuaries and four Crematoriums. All four crematoriums are located inside the funeral homes per Mr. Semenyuk. Yet in historic Folsom, he is asking to operate a crematorium in a metal shed fueled by above ground propane tanks. I am surprised that The City of Folsom does not have standards that would prohibit such an unrefined concept. I also find it distasteful that remains would be stored in a cooler in the shed.

Aesthetics: Both sheds are visible from Natoma Street and Forrest Street even without the roof exhaust stack installed. People visiting their deceased loved ones situated behind the shed also can see the crematorium. This is not peaceful nor esthetically pleasant..I feel the initial study and mitigated negative declaration minimizes and/or fails to recognize the negative effects on very many people. The Lakeside Memorial Lawn Cemetery is designated as a historic cemetery. It is old, well landscaped and is a peaceful and interesting place to visit. The Chung Wah Chinese Historical Cemetery, very close by, is listed on the National Historic Register. The California State Dredger Tailings Preserve, located next to the sheds, is in itself historic and unique. These sites should not be altered by installing a crematorium. The current open space zoning is appropriate for this site and I ask you to not change it in order to operate a crematorium. Our city has a lovely historic district, I ask you to protect it's historic features as well as protecting the people living in the surrounding area.

Parking impact. Project objectives: Provide cremation services for members of the population whose customs or religion require such practices. As I understand it, the cemetery has about 50 parking spaces. If there are large groups witnessing cremations, overflow parking on Forrest Street would be a problem due to the width of the street. Two lanes down to one narrow lane. I spoke to an employee at a nearby mortuary and crematorium and asked about how many people witness cremations? His answer was anywhere from five to two hundred at a time. If his estimate is true, the current parking spaces are not adequate. Also, traffic flow is problematic at this location with light rail blocking the intersection frequently. No other exit is available. The additional parking will affect the quality of life of the residents who all use Forrest St. to access the intersection on Folsom Blvd. (intensity impact)

Fire impact: This devastating impact has been minimized. The City of Folsom Community Wildfire Protection Plan clearly outlines the fire danger in this area. The city also declared a Fire danger emergency last year. It concerns me that this much propane will be in constant use at high

-2-

temperatures so close to a populated area and major roadway. This area would not be easy to evacuate in an emergency. I would encourage you to read the wildfire report if you are not familiar with it. Why would the city agree to place 500 pounds of propane that would be used at high temperatures, five days a week, for 90 minutes to 2 hours for each cremation in a complicated environment that affects so many people? I noticed in the section on geology and soils, the mention of seismic activity. C). Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project, and potentially result in on-or off site landslide, lateral spreading, subsidence, liquefaction or collapse. Another reason above ground propane is very concerning at this location.

There needs to be an emergency evacuation plan in existence for the neighborhood. An illegal fire at the Lake would prove difficult to access for fire engines and a fire could spread quickly endangering homes and the propane tanks. While an argument might be made that there are many large propane tanks in use in the city, I would say, they are not burning at high temperatures at a constant rate. The crematory would use 9,835.9 gallons of propane a year.

Air Quality is very concerning for people like myself with respiratory problems. Spare the air days affect my asthma and I need to stay indoors. The proposed crematorium location close to residences and recreation can certainly effect our quality of life. The report refers to The Preserve/ Lake Natoma Shores neighborhood as small, however there are 118 homes here. It also lists the distance to all the nearby schools but does not seem to be concerned with the exposure of the children who live here. I wish I were more versed on CEQA, but I feel that people more qualified than myself can address those concerns as well as cultural resources and air quality.

I have some observations regarding the Initial Study and Mitigated Negative Declaration dated Jan. 2022.

Future growth of the city of Folsom: Project objectives: prepare for an increase in the demand for cremation services as cremations become more popular in California and as Folsom's population grows. This concerns me. The report examines what the needs would be at 500 cremations per year. What's to say the need doubles as do the impacts. Because of the problems noted in my letter regarding the impacts on the neighborhood, I ask you to look ahead and consider this as you make your decision.

Page 6: I am concerned about the drainage into Lake Natoma. I assume the machinery is routinely cleaned however, I don't see any mention of maintenance procedures. Since no sewer line is being planned, what happens to residue, dust etc?

On the Section of the History of Lakeside Memorial Lawn, it states not much information in academic or grey literature exists on the history of the Lakeside Lawn Memorial. In 2002-2003, Mr. Clane of Millers Mortuary applied for a conditional use permit to operate a Crematorium at the Lakeside Cemetery. Sue Silver wrote a comprehensive research paper describing the historic graves and history of the cemetery which is included in the, then city's staff report. Her report is very interesting to read and I hope you will have a chance to read it. Not long afterward, the cemetery was designated historic. The prior application was denied before the designation.

-3-

Chinese Influence on Folsom. I would have liked to see more emphasis on the Chung Wah Historic Cemetery that is located so close to Lakeside Memorial Lawn. It is on the National Historic Register, California State Registered Landmark and the City of Folsom's resource inventory. A place of this significance deserves more than a mention.

Section: 7.0. Environmental Factor's Potentially Affected. Items not checked: Aesthetics, Biological, Recreation and Wildfire. I feel they are affected.

Energy: Under lighting: I did not see the large light installed on the adjacent shed mentioned as a new source of light.

Conflicting information: evaluation of transportation: (b). No impact: the proposed action would not be a destination accessible for members of the public and would only be visited by a SMALL NUMBER of WORKERS during construction and operation. The project would not result in significant increase in vehicle miles traveled, and is located within one half mile of a major public transit stop which provides both bus and light rail service. No impact will occur.

Mr. Semenyuk: There are several large cultural communities residing and moving to Folsom. Regretfully, we do not have the ability nor the capability to serve the Sikh, Hindu, Buddhist or other cremation based cultures as they require an on site crematory so that they can exercise their funeral rights and customs. (witness cremation)

Thank you for your consideration.

Sincerely,

Pat Binley

Dear Historic District Chairman Bracht and Commissioners, West, Ankhelyi, Cole, Duewel, Dascallos and Felts,

I am writing concerning the application for a crematorium at the Lakeside Memorial Lawn Cemetery. The cemetery is located in the Historic District of Folsom and is zoned Open Space/Conservation. This is a unique area because of the Three Historical entities located there. The Lakeside Memorial Lawn Cemetery is designated a Historic Cemetery. To the rear boundary of the cemetery is the Historic Chung Wah Chinese cemetery which is listed on the National Historic Register. And very close to the proposed Crematory metal shed site is the California State Dredger Tailings Preserve. This is probably the only site in our state that combines these aspects of our heritage in one small area. I believe the addition of a crematorium will change the character of the cemetery.

Besides the above Historical aspects, the cemetery is located close to the American River Bike trail, Lake Natoma and the residential neighborhood where I reside. A crematorium will affect many people who enjoy recreation on the trail and the lake, not just a few people.

I am concerned about Fire Danger. The proposal includes the installation of two 250 gallon above ground propane tanks. This area is located in a wildfire danger area. In fact, the City of Folsom recently declared a local emergency due to fire danger. If there were a wildfire or vandalism the propane is a dangerous threat. I am also concerned about Emergency Evacuation . Access to the bike trail and Lake Natoma is difficult for fire trucks to maneuver. Our neighborhood, in which the cemetery entrance is located, has only one entrance and the same egress. This is compounded by light rail train interruptions blocking the Folsom Blvd.-Forrest St. intersection four times every hour. Emergency evacuation could be a big problem for occupant of over 100 plus homes.

We have been researching the effects of air quality from the smoke released into the air from crematoriums and have learned that cumulative effects are harmful to unborn children, developing children, elderly and those with existing health conditions like myself.

If the crematorium is allowed, I wonder how anyone can know how many people are cremated daily and the actual condition of the air quality. The air quality report is based on two cremations per day, 5 day a week. Air quality is monitored once a year.

While there are other crematoriums not far away from Folsom, I am not against a crematorium in our city. I would hope it would be in an industrial surrounding zoned for this type of business operation, not in an area where people live, bike ride, walk, run, canoe, kayak, paddle board, fish and swim. The Sacramento State Aquatic team practices rowing on the lake and there are many bird nesting sites and animals to protect such as our bald eagles. I urge you to deny a conditional use permit and protect the citizens affected by this proposal. Thank You.

Sincerely,

Pat Binley

To: Daron Bracht
 Chairman Folsom Historic District Commission

Dear Daron,

I am writing to you because I have learned that an application has been made to the city for a Crematorium at the Lakeside Cemetery. I understand the planning is close to completion and will be presented to the Historic District Commission soon.

I reside in The Preserve/ Lake Natoma Shores development in which some homes are located on Forrest St. across from the cemetery. Other properties back up to the cemetery from Young Wo Circle. I am concerned that many of our residents do not know of the plans that are taking place. To my knowledge we have not had any word from the city nor the developer regarding the proposal. This is compounded by the problem that we are not able to gather or meet in order to have some discussions and share information.

Speaking for myself, I have some concerns I'd like to share. I believe the cemetery is zoned open space and I wonder if a crematorium would be an allowable use for this property. Is this why the applicant is asking for a conditional use permit? It also seems unsuitable to have this type of facility adjacent to a heavily used recreational area (bike trail and Lake Natoma) and a residential neighborhood. I have questions regarding how it would be regulated if it were passed, as far as the actual amount of cremations taking place (not estimated) and safety with large amounts of propane on the property. I also am concerned with air quality regulating as we often have bad air days . I have asthma and am affected by bad air days & smoke. I also wondered if state parks have been consulted due to their property being next to the proposed area. I would be interested in their input.

I hope you can share my concerns with other commission members. I would hope if a crematorium is built in Folsom, it would be in an industrial or commercial area, not by state park land where people are recreating or living. Thank you,

Sincerely

SUBJECT: Lakeside Cemetery Crematorium, FILE #:19-182

I am asking for your consideration to reject the conditional use permit requested by the owners of Lakeside Cemetery for the addition of a crematorium.

To be very clear, I am not opposed to a crematorium in Folsom.
