SUMMARY:

The resolution sets the final Millage Rate of 5.4945 mils to fund the City's Proposed FY 2023 operating Budget.

BACKGROUND AND JUSTIFICATION:

Taxing entities are required to hold two (2) public hearings for the adoption of a property tax (millage) rate and budget. The first public hearing is advertised by the Property Appraiser mailing a TRIM notice to each property owner. Chapter 200, Florida Statutes, requires the City to:

- 1. Notify the County Property Appraiser of the City's final millage rate in July and of the date and time of first public hearing on the millage and budget. The City complied with this requirement and the City informed the Property Appraiser of the first hearing date and time (September 8, 2022, at 5:01 PM). The advertisement must be published 2 to 5 days prior to the final public hearing, which is scheduled for September 22, 2022, at 5:01 PM.
- 4. At the second public hearing, the City Commission must adopt a final millage rate and final operating budget for fiscal year 2023.
- 5. Subsequent to the final adoption, the City must deliver the resolution adopting the final millage rate to the County Property Appraiser, the County Tax Collector, and the Department of Revenue within 3 days after the final public hearing.

6. Resolution No. 67-20222 passed 4-0 (Commissioner Diaz was absent) at the First Public Hearing on September 8, 2022.

City Hall - Exterior Paint and Waterproofing

Project Location

7 North Dixie Highway

Project Description/Justification

The existing exterior paint and sealing around City Hall was last performed approximately 15 years ago. The paint has become chalky and the waterproofing of openings and voids has become cracked and dried. The facility would require a full exterior paint and waterproofing to maintain its integrity and provide for a water tight envelope.

Strategic Plan Alignment

Pillar 1 - Positioning Lake Worth Beach to be a competitive viable location of choice

1E - Provide superior public amenities and services to retain existing and entice new residents and businesses.

Project's Return on Investment

The project will provide a sound exterior that is free from water infiltration, preserves the structure and is aesthetically functional.

Strategic Goals Relevance/Categorical Criteria

Pillar 1 - Positioning Lake Worth Beach to be a competitive viable location of choice
1E - Provide superior public amenities and services to retain existing and entice new residents and businesses.

Project's Return on Investment

The City will provide a high quality amenity that is pleasant and safe to utilize. In addition LED fixtures would reduce energy consumption by approximately \$5,000 per year/ per field.

Well #18 New Construction

Project Location

TBD

Project Description/Justification

The design, drilling, permitting and construction of a new surficial Aquifer production well and test well 18A, to include testing and well head equipment. The new production well location will be determined by the water quality of the test wells drilled in FY2020. This well is currently included in the City's Consumptive Use Permit from South Florida Water Management District (SFWMD). The well construction will be a 8-inch well installed to an overall well depth of approximately 250-feet inside a 16-inch diameter casing installed to approximately 250-feet. The existing Surficial Wellfield contains several wells that have reduced capacity due to age and/or are east of I-95 which have been curtailed in usage by the SFWMD. A variety of events cause well

Local Sewer System Pipe Network

Project Location

City-wide

Project Description/Justification

This project includes replacement and lining of the sewer collection system pipe network, both the gravity and pressurized forcemain system. Many portions of pipe in the collection system are beyond their useful life and collapsing, joints are cracked or separated and causing excess water to flow into the system (inflow and infiltration) and in general need of repair. The manholes that provide connections between the pipes are also in need of structural repair and coatings.

Strategic Plan Alignment

4C. Facilitate environmental sustainability through infrastructure investments, environmental resiliency, capital improvement planning, training and regional partnership and planning.

Project's Return on Investment

Resiliency and reliability of wastewater collection system.

Project Description/Justification

These projects, which place value on a vital part of the City's infrastructure, have been coordinated with the City's Public Services Department and the Neighborhood Road Program. The Departments were able to establish a construction sequence by meshing the Utilities fire protection plan and proposed sewer rehabilitation project schedule with the Stormwater Masterplan and Public Services Roadway & Sidewalk Masterplan. Stormwater main installations and replacements identified in the plan were prioritized based on the stormwater modeling for capacity and treatment in the Masterplan.

Project Description/Justification

This proposed project serves to address the chronic flood conditions at the southern end of the South Palm Park neighborhood along 18th Avenue South in Lake Worth Beach that are worsening with sea level rise. The existing stormwater outfall has reached the end of its useful life and during high/king tide events, stormwater is unable to be properly discharged into the Lake Worth Lagoon. In order to make the stormwater system more resilient to sea level rise and higher tides, the stormwater collection system will be improved to include the installation of a stormwater pump station and a new outfall with a tidal check valve.

Project Description/Justification

The Stormwater Utility Department actively engages in the process of cleaning and televising the City's stormwater piping and manhole system. The existing vacuum truck (Equipment #153) was purchased in 2003 and has reached the end of its useful life and repairs are too costly not worth doing. The vacuum truck is an essential piece of equipment in ensuring the City's stormwater infrastructure is clean, free from blockages, and intact.

Strategic Goals Relevance/Categorical Criteria

Renewal & Replacement

Project's Return on Investment

An operational vacuum truck is essential for staff to make efficient repairs to sewer piping.

FISCAL DETAILS 2023

The maintenance cost to keep the vacuum truck in mint condition is approximately \$5,000 per year.

Project Description/Justification

This project includes upgrades of the stormwater collection and conveyance system. The West Village Art Lofts were built with a finished floor elevation that is barely above the N F St crown of road. When intense rains occur, the storm system takes time to convey the water, but the stormwater builds up and has flooded the residents townhomes at this location. The City is working with the developer and owners to remedy this situation.

EXECUTIVE BRIEF SPECIAL MEETING

AGENDA DATE: September 22, 2022 DEPARTMENT: Water Utilities

TITLE:

Resolution No. 75-2022 – Establish the rates and charges for the Water System for Fiscal Year 2023

SUMMARY:

Resolution 75-2022 establishes the rates and charges for the City's Water System for Fiscal Year 2023. There have been no changes in the rates and charges since fiscal year 2020.

BACKGROUND AND JUSTIFICATION:

The City of Lake Worth Beach contracts with Stantec on an ongoing basis to provide a yearly Revenue Sufficiency Analysis. This analysis provides a multi-year projection of the sufficiency of revenues for the Water Utility to meet current and projected financial requirements and determine the level of revenue increases necessary in each year to provide adequate revenues to fund all identified cost requirements.

The results of the current FY2022 rate sufficiency analysis have shown that no rate changes are needed.

Continued conservation efforts including water conservation education materials and the City's block rate structure will assure that the City remains a leader in water conservation efforts.

MOTION:

Move to approve/disapprove Resolution No. 75-2022 establishing the rates and charges for the City Water Utility for Fiscal Year 2023.

Section 3: It is the City's intention to maintain Phase I (3 days per week) water restrictions within the City's service area. However, in the event that a Phase II or IV mandatory water restriction is declared by the South Florida Water Management District or other authority having jurisdiction upon the City to reduce water production, the Volume Charge listed in Section 2 above will be adjusted upwards by fifteen percent (15%). The application of the water restriction surcharge is to maintain net revenue margins of the utility system, which may be eroded due to reduced sales resulting from the imposed water restrictions, to meet debt service covenants on any outstanding indebtedness allocable to utility system and to promote water conservation. The water consumption rates will be adjusted and will be applicable to all water use above the first consumption block usage range as referenced in Section 1 – General Service – Schedule No. 1 for the commercial, industrial and governmental use and Section 2 – Residential – Schedule No. 2 for individually metered single-family and multiple-family residential, as well as master metered multiple-family residential use.

The water restriction surcharge will not be applied to the base facility charge, unmetered fire line charge or the wastewater rates for service. The water restriction surcharge shall be applied by the City beginning with the first billing cycle following the declared mandatory Phase IV water restrictions as imposed by the South Florida Water Management District or other authority having jurisdiction.

The mandatory water restriction surcharge shall be discontinued by the City beginning at the first billing cycle following the removal or lifting of the Phase IV water restrictions by the South Florida Water Management District or other authority having jurisdiction.

<u>Section 4:</u> Average Billing Calculation: The average billing process will establish a monthly bill, which will be based on the average water bill for the preceding 12 calendar months. If the residence or apartment has been occupied for the last 12 months and the customer can qualify as an existing customer, the previous tenant or owner's bill may be used to estimate the average monthly billing.

The average billing calculation will be reviewed and adjustments made to correct for changes in rates, usage, or other factors to be implemented on the bills issued during June and December of each year.

<u>Section 5:</u> With respect to any premises or users situated outside the corporate limits of the City of Lake Worth Beach, which premises or users now or hereafter have active connections with the water system of the City, there shall be charged a rate equal to the

charges established for service to residents of the City, plus a surcharge equal to twenty-five percent (25%) of such charge as outlined in the Policies & Procedures Manual. The foregoing surcharge shall not apply to users with whom the City has now or shall hereafter contract for services at charges established in such contracts unless the contract provides for surcharges.

<u>Section 6:</u> If any provision of this resolution, or the application thereof any person or circumstance is held invalid, the invalidity shall not affect other provisions or applications of the resolution, which can be given effect without the invalid provision or applications, and to this end, the provisions of this resolution are declared severable.

<u>Section 7:</u> All resolutions or parts of resolutions in conflict herewith are hereby repealed.

Section 8: This resolution shall be in effect for billings issued on or after the 1st day of October 2022.

EXECUTIVE BRIEF SPECIAL MEETING

AGENDA DATE: September 22, 2022 DEPARTMENT: Water Utilities

TITLE:

Resolution No. 76-2022 – Establishing the rates, fees and charges for the City Subregional Sewer Utility

SUMMARY:

Resolution 76-2022 establishes rates and charges for the subregional sewer utility based on the recommendations of the subregional board for FY 2023. These charges are based upon the reserved capacity of each Entity.

BACKGROUND AND JUSTIFICATION:

The Lake Worth Beach Subregional System is made up of wastewater collection systems that connect to the Lake Worth Beach system and include the City of Lake Worth Beach and seven other entities (Town of Lantana, City of Atlantis, Town of Manalapan, Town of South Palm Beach, Village of Palm Springs, Town of Lake Clarke Shores and Palm Beach State College).

The Subregional system transports the other entities' wastewater through the City's Subregional System to the East Central Regional Water Reclamation Facility (ECR). The Lake Worth Beach Subregional System includes several major gravity interceptors, a master pump station (MPS) located in Bryant Park, a 36-inch forcemain, a repump station (RPS) located north of 2nd Avenue North, a pump station at Palm Beach State College and a second section of 36-inch forcemain that transfers flow to the Palm Beach County portion of the regional system and eventually to the ECR.

The operating agreement approved on March 5, 2013 contained a rate calculation methodology for use during the term of the agreement. The proposed rates were calculated in accordance with this method.

The City held a meeting with the Subregional Customer Member Board to discuss these proposed rates as required under the new agreements. All members attended and the Board is recommending approval of the rates.

MOTION:

Move to approve/disapprove Resolution 76-2022 establishing the Fiscal Year 2023 rates and charges for the City Subregional Sewer Utility.

Re: FY2023 Utility Budget

Dear Mr. Shields:

On the 27th of March 2013, the City of Lake Worth entered into an Interlocal Agreement with City of Atlantis, Town of Lantana, Town of Manalapan, the Village of Palm Springs, the Town of South Palm Beach and Palm Beach State College. On the 17th of September 2013, the Town of Lake Clarke Shores entered into a similar Interlocal Agreement with the City of Lake Worth.

The purpose of the agreements was to define wastewater service and wastewater facilities cost sharing. The Parties to the Interlocal Agreement are to participate in a Sub Regional Sewer Member Board. The Member Board has specific duties and responsibilities as defined within the agreements.

On June 16, 2022 the Member Board met with the City of Lake Worth Utility staff and their consultants and reviewed the proposed FY2023 utility wastewater budget. It was the consensus of the Member Board that the proposed FY2023 utility wastewater budget is acceptable. The Member Board recommends adoption of the FY2023 Utility Budget as presented on June 16, 2022 and the associated bulk O & M rates and special assessment.
