SPECIAL COUNCIL MEETING
City of Moberly
City Council Room – Moberly City Hall
101 West Reed Street
November 29, 2023
12:00 PM**

Posted:

Pledge of Allegiance

Roll Call

Approval of Agenda

Ordinances & Resolutions

- 1.** A Resolution Of The City Of Moberly, Missouri, Authorizing The Moberly Fire Department To Make A Grant Application Through The State Of Missouri For Rope Rescue Equipment.

Adjournment

The public is invited to attend the Council meeting. Representatives of the news media may obtain copies of this notice by contacting the City Clerk. If a special accommodation is needed as addressed by the Americans with Disabilities Act, please contact the City Clerk twenty-four (24) hours in advance of the meeting.

City of Moberly City Council Agenda Summary

Agenda Number: #1.

Department: Fire

Date: November 29, 2023

Agenda Item: A Resolution Of The City Of Moberly, Missouri, Authorizing The Moberly Fire Department To Make A Grant Application Through The State Of Missouri For Rope Rescue Equipment.

Summary: The grant application would be to purchase replacement rope rescue equipment. This equipment will be to bring our rope rescue equipment within the recommended “life expectancy” by NFPA standards. The cost estimate of the new equipment would be approximately \$40,000.00 with no match requirements from the City.

Recommended

Action: Approve the resolution.

BILL NO. _____

RESOLUTION NO. _____

A RESOLUTION OF THE CITY OF MOBERLY, MISSOURI, AUTHORIZING THE MOBERLY FIRE DEPARTMENT TO MAKE A GRANT APPLICATION THROUGH THE STATE OF MISSOURI FOR ROPE RESCUE EQUIPMENT.

WHEREAS, the Moberly Fire Department seeks authority to make a no-match grant application through the Emergency Management Performance Mini-Grant program; and

WHEREAS, the grant application will seek to purchase replacement rope rescue equipment to meet “life expectancy” NFPA standards at an approximate cost of \$40,000.00; and

WHEREAS, City Staff recommends the Council grant authority to prepare and submit the grant application.

NOW, THEREFORE, BE IT RESOLVED this 29th day of November, 2023, by the City Council for the City of Moberly, Missouri, that City Staff is to prepare and submit the application for grant funding described herein and further that the City Manager is hereby authorized to take such other and further action necessary to accomplish the purpose of this Resolution.

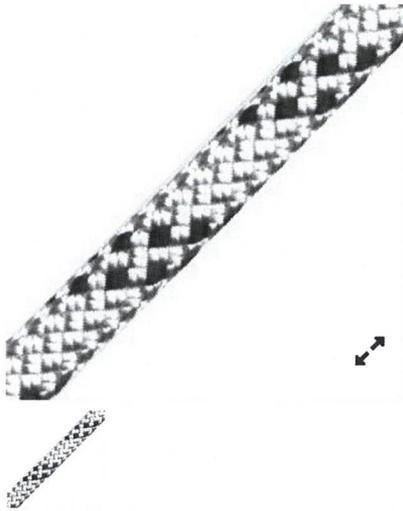

Presiding Officer at Meeting

Overview

The Newest Rescue Technology Life Safety Rope

Designed with the rescuer in mind, the RescueTECH ACCESSRescue Kernmantle gives the best combination of all rope characteristics. We spent 20 years helping other manufacturers create and update their ropes. RescueTECH introduces its own ACCESS Lifeline for Rope Rescue. Now, we have used our knowledge to create a rope design than gives the best combination of all desired characteristics. By building the ropes from ground up, we are able to provide a super-strong rope with low stretch and excellent flexibility and knotability. Our ropes actually handle better after 6 months of use than some new ropes from other manufactures. We specifically address the issue of sheath slippage when constructing all of our top quality Rescue Ropes. All ropes of the same diameter will perform identically, making multi-rope systems much easier to control. Certified by the Underwriters Laboratories to NFPA 1983. Available in 10 color combination. This rope can be purchased in the standard spool length or per foot for custom lengths.

Colors: White (Red Stripe)

Configurations

Standard Spool Lengths	150'
NFPA Tensile Strength	10,000 lbf. (46 kN)
WLL	667 lbs. (303 kg)
NFPA Rating	General Use
NFPA 10% Elongation	6.8 %
Elongation at failure	21%

Description

Rock Exotica P53D Omni-Block Double Swivel Pulley

Rock Exotica's P53D Omni-Block features a double sheave that allows you to install and remove rope while remaining connected to the anchorage point. The side plate locks into place with a two-stage double-catch safety mechanism. Omni-Blocks combine a pulley, swivel, and carabiner into one piece of equipment to offer shorter rigging. This double pulley has a 2" sheave diameter and can hold rope up to 1/2" in diameter.

Features:

- Install and remove rope while still connected to the anchor.
- Sideplate locks with two-stage, double-catch safety mechanism.
- Integrated swivel allows the pulley to orient while reducing gain.
- Connect, install, and remove rope with one hand.
- CNC machined for optimal weight & strength.

Specifications:

- MBS: 40 kN
- WLL: 10 kN
- Weight: 20.9oz
- Sheave Diameter: 2.0"
- Sheave Material: Aluminum
- Max Rope Diameter: 1/2" (13mm)
- Certification: CE/UIAA

Description

Rock Exotica P55 Omni-Block Swivel Pulley

The Omni-Block combines a pulley with a swivel to offer tremendous advantages. The P55 offers an increased MBS of 80 kN for extra strength. Omni-Block pulleys allow you to connect, install, and remove rope with one hand, all while remaining connected to the anchor.

Specifications:

- Weight: 1.9 lbs (850 gm)
- MBS: 80kN
- WLL: 20 kN
- Max Rope Diameter: 0.5" (13 mm)
- Sheave Diameter: 2.6" (66 mm)
- Certification: CE pending
- Color: Orange (P55) or Black (P55-B)

Description

Petzl P67 Kootenay Knot-Passing Pulley

The P67 Petzl Kootenay Knot-Passing Pulley is one of the most versatile knot passing pulleys available. It excels in highline systems with a large main hole that will accept 3 carabiners and two smaller holes for attachment of tag and belay lines. The sheave of the Petzl Kootenay has a tread diameter of 3 inches and it turns on two sealed ball bearings. The pulley comes with pins that can be used to lock off the sheave for making high strength anchors, etc.

- P67 Petzl Kootenay is a large pulley which allows passing knots in rope.
- Very large sheave mounts on sealed ball bearings for high efficiency.
- Locking pins on sheave allow use of the pulley as an anchor.

Specifications

- Breaking load - 9,000 lbs.
- Working load - 2,250 lbs.
- Maximum rope diameter - 3/4"
- Made in the USA

Description

SMC XL Steel Locking D Carabiner NFPA

Features:

- Stainless Steel Gate
- Stainless Steel Sleeve
- Compliance with:
 - NFPA 1983, G

Specifications:

- Dimensions (inches)
 - Width: 3.50
 - Length: 5.70
 - Gate Opening: 1.45
 - Weight: 12.2 oz
 - Major Axis MBS: 54 kN
 - Minor Axis MBS: 13 kN
 - Gate Open MBS: 14 kN

The SMC XL Steel Locking Carabiner NFPA offset "D" shape fits easily over a standard 1.25-inch ladder rung, making this carabiner an indispensable tool for the rescue professional. This product is more suited for extra-wide clipping than for tight rigging.

Add to cart

Description

Petzl PAW Rigging Plate

Features:

- For easy organization of the workstation and setup of multi-anchor systems:
 - - 19 mm holes allow the locking sleeves of most carabiners to pass through, enabling the carabiner to be rotated
 - - hole design allows ropes or slings to be threaded for direct connection.
 - - main attachment hole accepts up to three carabiners
 - - the odd number of attachment holes enables the system to be centered and balanced
 - - up to three users can be connected at the same time
- Durability:
 - - made of forged aluminum for an excellent strength-to-weight ratio
 - - durable markings, thanks to the recessed area in the center of the plate
- Two wide auxiliary attachment holes (size L only), compatible with the CONNEXION FIXE and CONNEXION VARIO anchor straps.
- Specifications: NFPA 1983 General Use, CE

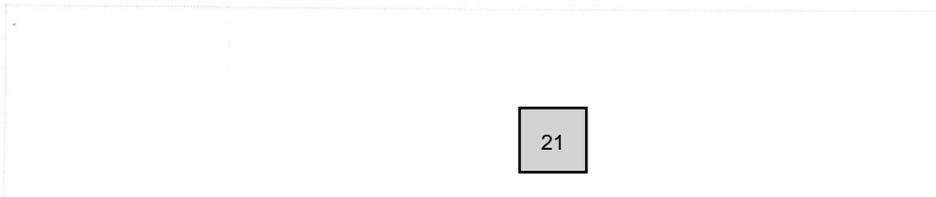

Available Options:

- Yellow
 - Small: PZ-G063AA00
 - Medium: PZ-G063BA00
 - Large: PZ-G063CA00
- Black
 - Small: PZ-G063AA01
 - Medium: PZ-G063BA01
 - Large: PZ-G063CA01

The Petzl PAW Rigging Plate available in three sizes, the PAW rigging plate allows the organizing of the workstation and setup of multi-anchor systems. The hole design allows ropes or slings to be threaded for direct connection. Made of forged aluminum, it offers an excellent strength-to-weight ratio.

Description

Climbing Technology Quick Roll Ascender

Features:

- Ergonomic handle designed for efficiency
- One-handed cam opening lever
- Steel cam
- Two attachment holes
- Works with ropes: 10-13mm
- Working load up to 140 kg or 308 pounds
- EN 567:2013
- EN 12841:2006-B

The Climbing Technology Quick Roll Ascender is an innovative ascender. New over-molded, ergonomic handle ascender, designed for greater efficiency when pulling and increased resistance to wear and tear. Cam opening lever usable with one hand; patented system for unlocking the cam, with just one downwards movement necessary. Steel cam, manufactured with technology that implements the resistance to wear and tear. Equipped with a set of teeth that protects the wear of the rope, but it is equally effective in blocking and ascending the rope. It also has three slots to prevent the accumulation of mud and reduce the effort needed to slide the device up the rope under any condition (muddy rope, frozen, etc.). Two attachment holes for various possible uses, an anti-inversion cam system, a secondary hole for connecting a quick link for an etrier. The working load increased to 140 kg.

Overview

Made with TECHWeb

Manufactured from heavy-duty TECHWeb flat webbing (Tensile Strength: 10,000 lbf.) Each sling has a standard "D" ring (proof load: 5,000 lbf.) and a Wide "D" sewn at the end to provide maximum versatility. Anchor points may be wrapped single, double, triple, and rigged choker-style to suit particular rescue situations. When looped like a basket hitch, anchor slings meet General Use load requirements. Although webbing tensile strength is high, overall tensile strength is limited by the "D" rings.

- Strength, Straight: 8,660 lbf.
- Strength, Basket: 15,760 lbf.
- Strength, Choker: 7,240 lbf.

Part #	Length	Strength	WLL	Weight
75941082	8 ft.	8,660 lbf.	866 lbs.	17.6 oz.

Overview

RescueTECH webbing is specially designed for the demands of rescue. The RescueTECH Rescue-Spec tubular webbing exceeds the strength specifications of normal mil-spec webbing. Additionally, it will outwear any comparably sized 1 in. tubular webbing. RescueTECH tubular webbing is produced using a custom-designed locking stitch that outperforms spiral (shuttle) loom webbing. The lock stitch ensures that the webbing will not unravel – even less than spiral loom webbing.

Part #	Color	Length	Strength	Weight
7901RD	Red	300 ft.	4,200 lbf.	xxx oz.

Description

Sterling Bound Loop Prusiks

The Sterling Rope Bound Loop Prusiks are part of the very popular sewn cord product line. These sewn cords can eliminate bulky knots without comprising the strength of the prusik. These 8mm sewn cords come in a variety of lengths for your convenience.

Specifications:

- Short Prusik: 4,496 (20kN)
- Long Prusik: 4,496 (20kN)

Available Lengths:

- 8mm x 16" Red - Short Prusik (SC080320816)
- 8mm x 16" Orange - Short Prusik (SC080320716)
- 8mm x 22" Black - Long Prusik (SC080320422)
- 8mm x 22" Blue - Long Prusik (SC080320622)

Note: To ensure that your Prusik cord moves and grips properly, the diameter relationship between the standing line and your Prusik loop diameter should follow the general rule of a 60-80% ratio. Proper guidelines recommend that you review your rescue applications and test any new cord prior to actual field use.

Description

Petzl VERTEX Vented Helmet

Features:

- Lightweight and comfortable, customized fit
- CENTERFIT adjustment
- Flip&Fit system adjustment
- Dual chinstrap which is adjustable to strengthen it to whether you're working at height or on the ground
- Accessories to customize to you and modular for easy install
- Nine colors: White, Yellow, Red, Black, Orange, Blue, Green, and Hi-Viz Orange, Hi-Viz Yellow
- Certifications: CE, EN 397, EN 50365, EAC, AS/NZ 1801, ANSI Z89.1 Type 1 Class C

The Petzl VERTEX Helmet is essential for work at height and in industrial settings. The helmet gives you effective protection from falling objects, and if you fall yourself. They feature two adjustment systems: Flip&Fit and Centerfit. Centerfit allows you to adjust the helmet to be perfectly centered and is adjusted by the two side wheels the helmet features. Flip&Fit positions the headband low on the back of the helmet to guarantee that the helmet fits securely. The headband folds into the shell for easy storage and transport.

With the dual chinstrap, it allows you to adjust the chinstrap strength in order to adapt to your different working environments: at height or on the ground. The clip has two positions that correspond to how to be used:

- Higher Strength: limits the risk of the helmet coming off in a fall (strength greater than 50 daN)
- Lower Strength: limits the risk of strangulation by releasing if snagged at ground level (strength lower than 25 daN)

With the modular accessories, you can customize your helmet to fit your needs with a range of protective eye and face shields, headlamps, and other various accessories including nape and helmet protectors, chinstraps, and more.

The liner is made of EPP (expanded polypropylene) and EPS (expanded polystyrene) for reduced weight and shock absorption. In the un-vented version, the helmet protects against electrical hazards, molten metal splash, and flames.

With multiple certifications including ANSI Z89.1, you can trust your Petzl VERTEX High-Performance Helmet to perform as you want it to and when you need it the most.

Specifications:

- Weight: 490g
- Head Circumference: 53 - 63 cm / 20.86 - 24.80 inches
- Material(s): ABS (acrylonitrile butadiene styrene), nylon, polycarbonate, high-strength polyester, polyethylene

Description

An Original CMC Design, and Still a Favorite!

The Pro Pocket is designed to carry your accessory equipment - runners, prusiks, trauma shears, gloves, etc. - securely attached to your harness instead of in a Stuff Bag hanging from your rescue harness or in pants pockets, where the contents sink below the harness leg straps, which can be difficult to access. Made of the same 1,000-denier CORDURA nylon as our tough Rope Bags, the main compartment is large enough to fit your hand inside and it easily stores cord or bulky items. The front pocket can hold a field guide, note pad, lightstick, exam gloves, phone, or pager. The small side pocket is designed for trauma shears and a multi-tool. Gear loop and MOLLE strip allow you to clip carabiners and runners to the outside of the bag or put a safety tether on tools you might be using. The pocket has multiple mounting options, including a wide strap that wraps around your harness and adjusts with hook and loop as well as a belt tunnel allowing a tight, secure fit on harnesses. Accessory items shown not included.

Overview

Made from Kevlar Brand Fire Resistant Web

Our popular Fire Resistant Corona Escape Belt with integral glove-friendly auto-locking Aluminum Ladder Hook. Manufactured of Kevlar® Brand fibers from Dupont and forged hardware. Retro-reflective striping. Auto-Locking waist snap works well with Structural gloves and gives more security than a non-locking snap. Auto-locking Ladder Hook manufactured from high-strength alloy aluminum. Perfect for use in ladders and platforms. Fire Resistant – The melting point of Kevlar is above 500°C (930°F).

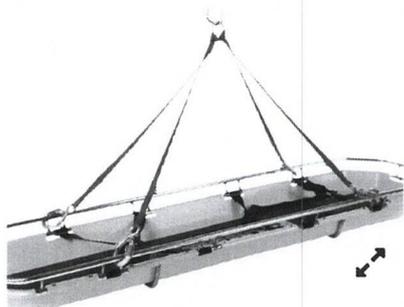

Features

- Retro-reflective striping sewn on for better visibility.
- Materials, Hardware: Forged Steel and Forged Alloy Aluminum
- Materials, Belt: Kevlar
- Materials, Thread: Kevlar
- Webbing Width, Waist: 1.75"
- V-Ring Width: 2.25"
- Adjuster Width: 2.25"
- Locking Snap Dimensions: 2.375"w x 2.25"d x 6.5"l
- Ladder Hook Dimensions: 9.25" x 4.75"

- **Belt Strength:** 6,000 lbs. (26.7 kN)

Overview

Vertical, Horizontal, and Low Angle

Ideal for all standard lifting applications. Designed for single rope rigging, the 4 Point Litter Bridle attaches directly to the railing of all types of stretchers. Two 1" heavy duty type 18 slings (Webbing Tensile strength: 6,000 lbf.) are looped through a 3" forged steel lifting ring to allow end-to-end height adjustment. Connects to litters with four forged autolocking snaps (included).

Config.

WLL: 600 lbs.

Weight: 4.75 lbs.

Color: Red
