Certification Application Modernization Project

Board staff have begun to examine the current certification application and application approval process to find ways to eliminate some requests for additional information and generate more applicant success in the first round of review, applying LEAN concepts.

Updated applications will be brought to the committee as they are developed.

Committee requests status reports as work progresses.

Trainee MPE when employed by architectural firm or engineering firm

Recently, staff has fielded a few questions about the possibility of entering into a trainee program when the applicant is employed by an architectural firm and the applicant and supervisor are performing plans examinations by contract for one or more jurisdictions.

Committee recommendation: Approve MPE trainee in this context.

Mr. Leach moved and Mr. Samuelson seconded to approve the recommendations of the committee.

Vice-Chairman Pavlis called for the ayes and nays.

Motion carried unanimously.

CR-3 Code Committee Report

Mr. Denk gave the committee's report included in the Board's Meeting packet at Tab CR-3:

The Code Committee met on August 25, 2022 with the following members present: Mr. Denk, Ms. Cromwell, Mr. Johnson, Mr. Miller, Mr. Pavlis, Mr. Samuelson, Mr. Stanbery, Mr. Tyler, and Mr. Yankie. Board Chairman, Tim Galvin, was also present.

The committee report is included in the August 26, 2022 Board Meeting Packet at tab CR-1 for the Board's consideration.

Call to Order

The meeting was called to order by Mr. Denk at 1:08 P.M.

Approval of Minutes

Mr. Stanbery made the motion to approve the minutes of the Code Committee meeting held on June 23, 2022. Mr. Johnson seconded the motion. The motion passed unanimously.

Petitions

Petition #22-02 from Larry Cormack, Jr. of the City of Columbus was re-introduced to the committee by staff. The original OPC petition proposed to prohibit all dead ends in plumbing systems. Staff researched the proposal, found 2021 UPC code language that included a definition of “Dead leg” and required a method of flushing for dead legs, and shared the UPC language with Mr. Cormack. Mr. Cormack was satisfied that the UPC language accomplished his goal and requested that his petition be modified to request adoption of the UPC definition and requirement for flushing. Mr. Tyler made the motion to deny the original petition because the language was too restrictive. Mr. Miller seconded the motion. The motion passed unanimously. Mr. Tyler further made the motion to deny the 2021 UPC language because the language is too vague and unenforceable, as it didn’t require flushing. Mr. Miller seconded the motion. The motion passed unanimously.

Recommendations of the Residential Construction Advisory Committee

No items for consideration

Old Business

Definition of Registered Design Professional

Doug Boyer and Luther Liggett, representing the Ohio Chapter of the American Society of Landscape Architects (ASLA), proposed a change to the OBC definition of Registered Design Professional that includes the term “landscape architect” in addition to the Revised Code citation that addresses landscape architects. They explained that the language is necessary because building departments are rejecting plans sealed by a landscape architect. The committee preferred language drafted by BBS staff and Mr. Boyer and Liggett stated that the staff language accomplished their goal. Mr. Pavlis made a motion to include the staff draft definition of Registered Design Professional in the next OBC and to send a courtesy notice of the clarification to the Architects Registration Board and the code officials. Ms. Cromwell seconded the motion. The motion passed unanimously.

2020 NEC Proposed TIAs

Staff updated the committee on the status of the two proposed TIAs that could impact the rule language decided upon by the BBS for the adoption of the 2020 edition of NFPA 70: TIA 1653 which proposes to expand the GFCI exemption to all outdoor HVAC equipment and extend it through September of 2026; and TIA 1656 which proposes to extend the GFCI exemption only for outdoor HVAC equipment employing power conversion equipment through September of 2026. The NFPA Standards Council was expected to make a decision on the proposed TIAs in early August. However, staff contacted the Standards Council staff and the decision has still not yet been posted. Staff will keep the committee informed.

Commercial Energy Code Review

No discussion occurred and no action was taken.

New Business

Zero Lot Line Townhouse Buildings

Bill Kaufholz presented the issue of zero lot-line residential townhome units and explained that there have been different understandings and interpretations from building officials and plans examiners across Ohio regarding which code should be followed. Additionally, Mr. Kaufholz explained that having to comply with the OBC for energy conservation and mechanical systems was adding cost to the projects because building officials were requiring a registered design professional to design the system.

Staff explained that this code scoping issue was addressed several years ago when the RCO and OBC definition of “dwelling” was changed to clarify that there could be a maximum of three connected dwelling units in a building to remain within the scope of the RCO.

Mr. Pavlis made a motion to table the issue and asked staff to draft modified OBC Section 310.5.5 language that could address the concerns of Mr Kaufholz. Mr. Miller seconded the motion. The motion passed with Mr. Johnson abstaining.

HB 430 Update

Staff explained that HB 430 contained two issues that impact the Board. The bill added a definition of “Mobile Computing Unit” and exempts those structures from the rules of the Board. Additionally, the bill expanded the use of temporary door locking devices (TDLDs) from schools to several other nonresidential occupancies. Staff had presented draft BBS memos to the committee in the previous week and asked if the committee had any questions or concerns about the memos. There were none. Staff also indicated that draft rules will be presented at a later date for the committee’s review and approval.

Special Inspections for Shoring

Ms. Cromwell brought up a concern that the City of Cincinnati building department is requiring a special inspection of horizontal elevated concrete shoring and asked whether the code requires that special inspection. Staff will contact the building official in Cincinnati and learn more about their requirement.

Ms. Cromwell also mentioned that she will be speaking to the Structural Engineers Association of Ohio about the BBS and careers in code enforcement.

Adjourn

Mr. Stanberry made the motion to adjourn at 4:10 P.M. Ms. Cromwell seconded the motion. The motion passed unanimously.

Mr. Denk moved and Mr. Miller seconded to approve the recommendations of the committee.

Vice-Chairman Pavlis called for the ayes and nays.

Motion carried unanimously.

CR-4 Committee-of-the-Whole

There was no report.

RATIFICATION OF BOARD RECOGNIZED ACCREDITATION BODIES, CONFORMITY ASSESSMENT BODIES & INDUSTRY TRADE ASSOCIATION CERTIFICATION PROGRAMS

No items for consideration.

BUILDING DEPARTMENT SUPPORT AND OVERSIGHT

RE-1 September Building Department Report

Mr. Johnson presented the September Building Department Report:

Board Staff conduct building department visits to engage building officials in discussion regarding the administration of their departments and to obtain feedback for the Board.

Specifically, Board Staff inquire on the status of plan review and inspection turnaround times, protocols, policies and processes of the department, software systems used, current and projected activity, department funding and fees, reported activity to the Board, relationships with fire departments, administration and elected officials, the issuance of plan approvals, adjudication orders, certificates of occupancy, and appeals.

The following Building departments were visited since the last monthly Board update:

Girard

Fairfield County
Groveport
London
Powell
University Heights
Lorain
Lake County
Ashtabula County
Orange Village

Staff observed that most departments building officials are now full time in office, with hybrid schedules for other employees. Movement to digital platforms is a predominant feature of operations now. (Virtual Office/website exchange.)

Building officials indicate that workflow is stabilizing in both commercial and Residential sectors. Some departments indicate more significant slowdowns in residential work.

The building officials provide positive feedback regarding the quality of technical support received from staff. They are appreciative for education opportunities, and specific guidance for building code enforcement.

CODE COMMITTEE RECOMMENDATIONS

The Code Committee met on October 20, 2022 with the following members present: Mr. Denk, Ms. Cromwell, Mr. Johnson, Mr. Miller, Mr. Pavlis, Mr. Stanbery, Mr. Tyler, and Mr. Yankie. Board Chairman, Tim Galvin, was also present.

The committee report is included in the October 21, 2022 Board Meeting Packet at tab CR-3 for the Board's consideration.

October 20, 2022 Code Committee Meeting

Call to Order

The meeting was called to order by Mr. Denk at 1:03 P.M.

Approval of Minutes

Mr. Miller made the motion to approve the minutes of the Code Committee meeting held on September 22, 2022. Mr. Johnson seconded the motion. The motion passed unanimously.

Recommendations of the Residential Construction Advisory Committee

No items for consideration

Old Business

Zero Lot Line Townhouse Buildings

As a follow up from the last meeting, staff presented the revised draft of proposed changes to the OBC Sections 106.2.1, 310.5.5, and 1301.1.1 to address zero lot line townhouse-type buildings. Mr. Pavlis made the motion to approve the revised draft language as presented by staff. Mr. Johnson seconded the motion. The motion passed unanimously.

Commercial Energy Code Review

The committee continued discussions about the ASHRAE 90.1-2019. Mr. Denk shared his concerns with the language in ASHRAE 90.1-2019 Sections 6.4.3.6 (Humidification and Dehumidification Control) and 6.5.6.1 (Exhaust Air Energy Recovery for Nontransient Dwelling Units). The committee asked staff to research whether deleting these requirements would affect the COMcheck software report results. Mr. Yankie shared that ERV systems allow for easier balancing of HVAC systems and help to resolve condensation and mold issues that seem to be increasingly common. The committee discussed the option of allowing certain occupancies constructed of metal buildings to use earlier editions of the standard, but agreed that would likely complicate demonstrating compliance with the code when using COMcheck. No action was taken.

OBC Draft rule review (Chapters 10-12 and 14-16)

Staff presented additional draft rules of the OBC and explained that staff would go through each chapter in greater detail at a later date to make the committee aware of the significant changes that staff is recommending for each chapter. No action was taken.

Adjourn

Mr. Miller made the motion to adjourn at 3:41 P.M. Mr. Stanbery seconded the motion. The motion passed unanimously.
